Terms of Use of ICD-10-CA/CCI in PDF

The World Health Organization (WHO) is the official publisher of the Tenth Revision of the International Statistical Classification of Diseases and Related Health Problems (ICD-10) and holds the international copyright. The WHO has granted the Canadian Institute for Health Information (CIHI) the licence to enhance the ICD-10 classification to meet Canadian needs for the collection of morbidity data. This Canadian modification, ICD-10-CA, is a variable-axis classification that uses an alphanumeric code. The Canadian Classification of Health Interventions (CCI) was developed and is maintained solely by CIHI. CCI is a multi-axial and hierarchical classification that uses an alphanumeric code. Both ICD-10-CA and CCI (collectively, ICD-10-CA/CCI) are owned and copyrighted by CIHI in English and in French.

CIHI is making ICD-10-CA/CCI available on a read-only basis for non-commercial use related to the Canadian healthcare system. ICD-10-CA/CCI cannot be reproduced in whole or in part for any purpose. For greater certainty and without limiting the generality of the above statement, you cannot modify, repurpose, copy, distribute, sell, or otherwise share ICD-10-CA/CCI, and you cannot embed ICD-10-CA/CCI into software or create derivative works of ICD-10-CA/CCI. You can only view ICD-10-CA/CCI for personal or internal use. In addition, you cannot reverse engineer or apply any other process or procedure to derive the source code of the ICD-10-CA/CCI files, and you cannot attempt to defeat, avoid, bypass, remove, deactivate or otherwise circumvent any mechanism used to restrict or control the security and functionality of the ICD-10-CA/CCI files. If you wish to purchase a licence to the ICD-10-CA/CCI codes for other purposes, you may do so through CIHI's online store or by contacting help@cihi.ca.

You will not alter, cover or remove any acknowledgement, copyright or other proprietary rights notice placed by CIHI or a third party on the ICD-10-CA/CCI. You obtain no title in or other rights to the ICD-10-CA/CCI beside those use rights expressly granted to you by these Terms of Use. If you become aware of any infringement of CIHI's intellectual property rights in the ICD-10-CA/CCI, you will promptly notify CIHI and use commercially reasonable efforts to help CIHI protect those rights.

THE ICD-10-CA/CCI IS PROVIDED "AS IS" AND WITHOUT WARRANTIES OF ANY KIND, INCLUDING BUT NOT LIMITED TO WARRANTIES OF FITNESS FOR A PARTICULAR PURPOSE. YOU BEAR ALL RISKS ASSOCIATED WITH USE OF THE ICD-10-CA/CCI.

If you do not or cannot agree to the above Terms of Use, you may not access, view, or use ICD-10-CA/CCI. If you access, view, or use ICD-10-CA/CCI, you are indicating that you have understood and agreed to the above Terms of Use.

About the Canadian Institute for Health Information (CIHI)

The Canadian Institute for Health Information (CIHI) is an independent, not-for-profit organization that provides essential data and analysis on Canada's health system and the health of Canadians.

Our vision is to help improve Canada's health system and the well-being of Canadians by being a leading source of unbiased, credible and comparable information that will enable health leaders to make better-informed decisions.

CIHI tracks data in many areas, thanks to information supplied by hospitals, regional health authorities, medical practitioners and governments. Other sources provide additional data to help inform CIHI's in-depth analytic reports.

CIHI's data and reports focus on:

- Health care services
- Health spending
- Health human resources
- Population health

CIHI also identifies and promotes national health indicators - measures such as life expectancy or what we spend on health per capita - that are used to compare health status and health-system performance and characteristics. To make sure these measurements are comparable and meet the same quality requirements, CIHI coordinates national health information standards.

CIHI's research and data are published in reports, analytical documents, and special studies. CIHI also coordinates and leads education sessions and conferences.

Introduction to CCI

The Canadian Classification of Health Interventions, referred to as CCI, is a multi-axial classification of health-related interventions, developed and maintained by the Canadian Institute for Health Information (CIHI). The tabular listing of CCI provides comprehensive coverage of diagnostic, therapeutic and other associated healthcare interventions excluding laboratory and pathology procedures upon specimens and compounding and manufacturing of health-related devices and products. It is designed to be provider and location neutral so that it may be used across the continuum of healthcare settings in Canada.

Guiding Principles

Several guiding principles were used to assist in the development of this classification. These principles formed the basis for some of CCI's key features and they are described below.

Service Provider and Service-setting Neutral

One of the key features of this classification is its service provider and service setting neutrality. The classification has been developed in such a way that modes of practice are not reflected in the code structure. Therefore, the same codes are intended to be applicable regardless of whether a physician, a nurse or a respiratory technologist performs the interventions, or whether the intervention is performed in an operating room, an emergency department, a clinic, a physician's office, or even the patient's home.

Comprehensive, Dynamic and Expandable

The classification has a significantly expanded scope to meet the needs across the continuum of health services. The range of interventions reflects the broad spectrum of providers and variety of applications beyond traditional classifications. Ongoing maintenance and updating of the classification will be facilitated by reserving blocks of codes that will allow for future growth or changes.

Relevant

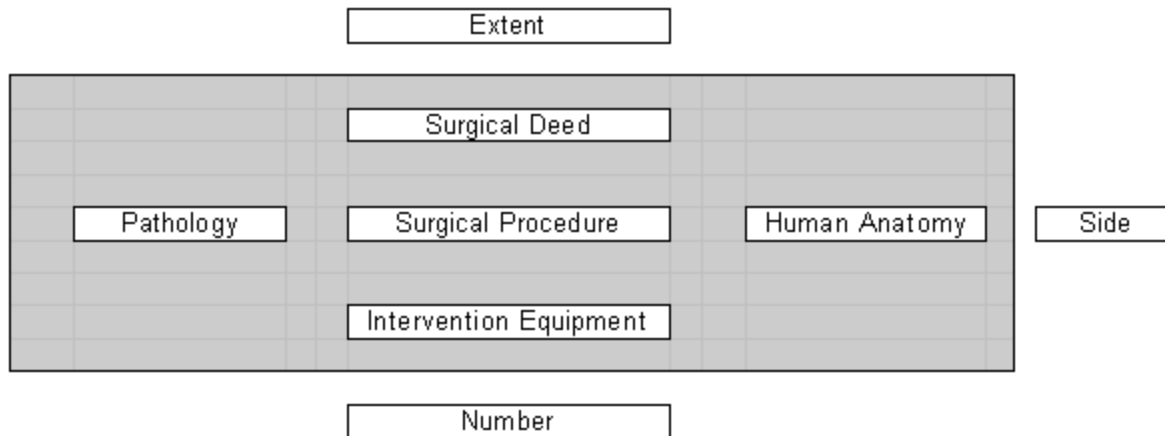

The classification has been developed to ensure that the meaning of each conceptual term is unique and clinically significant. Complex and multi-component interventions are identified, where possible, by a conceptual term that recognizes the various levels of complexity. Experts from various clinical specialties continue to participate in the developmental process to ensure that the classification is clinically relevant.

Restricted to Procedure-related Information

Wherever possible, diagnostic (or other non-procedure variables) are not included in the intervention code except in those cases where some diagnostic detail may be required to facilitate the appropriate code selection (e.g. for congenital anomalies affecting "normal" anatomy). This type of information will be stored in the client's record in other, more appropriate, data fields (e.g. diagnosis, provider ID #, location etc...).

International Connection

The European informatics standard setting organization, CEN/TC 251 Working Group 2, prepared and disseminated a conceptual framework for designing surgical procedure classifications in 1994. This group was driven by a desire to make information exchange easier in the international community— all national surgical classifications built the same way—so that one day, perhaps, WHO might convene the national organizations to compile a single international standard acceptable to all. The CCI code structure is based on the conceptual framework proposed by CEN/TC 251. The framework identifies several code elements that belong to the "surgical classification". These are: **surgical deed, surgical procedure, intervention equipment, human anatomy** and **pathology**. Outside of the code but connected, descriptively, are: **number, side** and **extent**. The CCI code looks a lot like this model in Section 1.

The shaded area contains the elements that the European committee believes should be a part of the procedure (or intervention) code. The elements indicated by boxes outside of the shaded area are modifiers of the procedure (or intervention) code.

Within the code, we have deleted "pathology" because we believe that it is better left within the diagnosis field. Outside the code, but connected as descriptive modifiers, we have retained "side (or location)" and "extent" and have added "status". ("Number" is combined with "extent".)

Definition of Healthcare Intervention*

For the purposes of this classification, a healthcare intervention is:

A service performed for or on behalf of a client whose purpose is to improve health, to alter or diagnose the course of a disease (health condition), or to promote wellness.

A service performed for or on behalf of a pregnant client which pertains solely to the pregnancy or to the fetus. Since interventions performed during this state affect both mother and fetus(es), they have been treated separately from other diagnostic and therapeutic interventions.

A service performed for or on behalf of a client whose basic purpose is to improve health, alter the course of a disease or health condition, or to promote wellness. While a therapeutic intervention may contain a diagnostic component, the primary intent of the intervention is to alleviate or treat the underlying disease or health condition.

A service performed for or on behalf of a client whose basic purpose is to assess the presence, absence or status of a disease process or health condition.

Any other service that cannot be described as obstetrical (fetal), therapeutic or diagnostic but, nevertheless, contributes directly to improve a client's health, alters the course of a health condition or promotes wellness.

**Please note:*

The term "intervention" is used instead of "procedure" to reflect an expanded scope addressing application of this definition beyond traditional medical/surgical settings.

Generic Definition of Interventions

CCI organizes specific healthcare interventions according to the generic type of action performed. By an iterative process, generic definitions for these types of actions were proposed, clinically reviewed, edited and rewritten until they were clearly differentiated from each other. For example, such similar actions as "resection" and "excision" are too close in meaning to be clearly differentiated from each other; they are thus combined under "excision". This process has enabled CCI to limit the actual number of interventions listed within each section to a manageable group. Each intervention has been assigned a two-digit numeric value. There is room for growth - and the addition of new intervention definitions in every section. The most populous section is "Physical and Physiological Therapeutic Interventions".

General Instructions on the Format and Structure of CCI

CCI is divided into two main parts: the alphabetical index and the tabular list.

Alphabetical Index

The alphabetical index contains "lead terms" or the titles of interventions positioned to the far left of the column with modifiers underneath. These modifiers are most often anatomy sites but may also be stages of pregnancy or other information pertaining to each section. The rubric (first five characters) portion of the code highlighted in blue follows the modifiers. The rubric cannot be used alone and the user must refer to the tabular list to obtain the qualifier and complete the code. The caret marks (^) following the rubric indicate there is more information needed. The alphabetical index contains terms found in all sections of CCI.

Tabular List

CCI is divided into 7 sections:

Field 1	CCI Section Titles	Code Range
1	Physical/Physiological Therapeutic Interventions	1.AA-1.ZZ
2	Diagnostic Interventions	2.AA-2.ZZ
3	Diagnostic Imaging Interventions	3.AA-3.ZZ
5	Obstetrical and Fetal Interventions	5.AA-5.PD
6	Cognitive, Psychosocial and Sensory Therapeutic Interventions	6.AA-6.VA
7	Other Healthcare Interventions	7.SC-7.SZ
8	Therapeutic Interventions Strengthening the Immune System and/or Genetic Composition	8.AA-8.ZZ

Section 4 "Clinical Laboratory Interventions" was removed from the classification in 2009 because the de facto standard supported by Canada Health Infoway for the electronic health record is Logical Observations Identifiers Names and Codes (LOINC). Maintaining a separate section in CCI for lab interventions was deemed a redundant effort and so this code set was retired from use.

Blocks and Groups

The sections are subdivided into homogenous ranges of groups which represent the second axis of the classification. For Section 1, 2 and 3 these blocks of groups represent body systems and their specific anatomy sites. In Section 5, these blocks represent stages of pregnancy and fetal development. For example, within Section 1, the block 1.AA to 1.BZ represents the nervous system. Within that block, the group 1.AN represents the brain.

Rubrics

The first five digits (fields 1, 2 and 3) comprise the rubric which categorizes the intervention within the group and section. Generically, the rubric describes what health intervention was performed. For example, an "excision total larynx NEC 1.GE.89.^^"

Qualifiers

Once users have identified the appropriate rubric code to use, they must select the appropriate intervention qualifier to complete the CCI code. The qualifier describes how the intervention was performed*. These qualifiers, which follow the rubric code and explanatory notes, may be formatted in a simple "pick" list box or in a table:

-From a **"pick" list box**: These are presented as complete CCI codes, followed by a brief description (of the qualifier only) and, where appropriate, some additional supplementary words or common examples.

For example:

1.GE.89.LA	using open approach [e.g. apron flap incision]
1.GE.89.LA-XX-A	using open approach and autograft [e.g. full thickness skin graft]
1.GE.89.LA-XX-F	using open approach and free distant flap
1.GE.89.LA-XX-G	using open approach and pedicled distant flap [e.g. myocutaneous flap]
1.GE.89.LA-XX-Q	using open approach and combined sources of tissue

-From a **table**. Tables are normally used to simplify presentation and selection of valid qualifiers when more than one axis is important (e.g. for therapeutic interventions, tables are used where multiple approaches, multiple devices, or different types of tissue may be used to perform the intervention). In such cases, the first cell of the table provides users with the five-digit rubric code, while the first rows and columns indicate the different axis being examined (e.g. approach/technique, types of tissue). The other cells include the rubric with the appropriate qualifier.

For example:

1.GE.87.^^ Excision partial, larynx	using autograft [e.g. cartilage]	using combined sources of tissue	using pedicled distant flap	no tissue used
open approach [e.g. apron flap incision] with horizontal technique	1.GE.87.NZ-XX-A	1.GE.87.NZ-XX-Q	1.GE.87.NZ-XX-G	1.GE.87.NZ
open approach [e.g. apron flap incision] with vertical technique	1.GE.87.LL-XX-A	1.GE.87.LL-XX-Q	1.GE.87.LL-XX-G	1.GE.87.LL
endoscopic per orifice approach	—	—	—	1.GE.87.BA

**Note: Where a qualifier is not found or where more than one qualifier may be equally applicable or important, please notify CIHI. It is expected that qualifier codes will require regular updates.*

Attributes

For the convenience of coders, valid attributes are indicated along side each CCI code. These attributes are separate data elements extraneous to the CCI code. Their function is to provide extra detail about the intervention (or the episode for the intervention) that may be useful for researchers or utilization analysts but does not significantly impact the essence of the healthcare intervention as described within the CCI code.

- **Status** attribute -is used to further describe interventions which may be "Repeats/Revisions", "Abandoned after Onset", "Converted", "Delayed" or "Staged" for example.
- **Location** attribute -is used to identify additional anatomical detail or information for example, laterality (e.g (L)eft, (R)ight, (B)ilateral).
- **Mode of delivery** attribute -is used to identify, where applicable, extra information related to the way a particular intervention was delivered: for example, direct (in person), indirect (by telephone), self-directed (by interactive CD-ROM). These attributes

are applied in the same field as the **Location** attribute when they describe interventions that are not connected to a particular anatomy site (for example, counseling, assessments etc...).

- **Extent** attribute -is used to indicate, where appropriate, a quantitative measure related to the intervention (e.g. length of laceration repaired, number of anatomical structures involved)

It should be noted that not all CCI codes require the coding of these attributes. Users should consult the tabular listing in the various sections and Canadian Coding standards to determine which CCI codes require the use of an attribute. Users may also wish to consult Appendix C for a list of valid intervention attributes used in CCI.

For example, a joint replacement may be modified by a status attribute that states it was a "revision". This may be interesting for researchers in terms of extra resources needed and patient outcomes but the intervention itself is essentially still a joint replacement. Another example is a coronary bypass which may be modified by an extent attribute stating the bypass involved 5 grafts. This may have relevance to researchers and utilization analysts but it does not essentially change the fact that the intervention is a coronary bypass.

Separating attributes from the CCI codes makes it possible to ensure the basic simplicity of the intervention concept and reduce the total number of codes that are needed in the classification while, at the same time, still allowing for great detail to be collected as necessary (or desired).

Inclusions

Inclusion terms are found at various levels throughout CCI. They are found at the "group" level, for example, the anatomy site to provide direction and at the rubric and code level. These lists of short alternate descriptions, synonyms and eponyms are not intended to be exhaustive but are a guide to the content represented within the particular group (e.g. anatomy site), rubric or code.

Exclusions

The exclusion terms list interventions that, even though they appear to fit at a particular code, are in fact classified elsewhere. Exclusion terms in CCI are followed by their associated rubrics; in the electronic version, this is a jump link that will take the coder directly to the new destination in the tabular list.

Code also

Although CCI is designed so that all steps involved in the routine completion of an intervention—from approach through technique and closure—can be captured in a single code, there are times when additional procedures, with different intents, are commonly performed together. The "Code also" note lists the more common of these concomitant procedures for the convenience of the coder. Not all codes listed in the "Code also" notes are mandatory across all sectors. Follow the jump links to these codes in accordance with applicable coding standards, grouping methodology and your own research and utilization requirements.

Notes

Explanatory notes are sometimes provided as further assistance to users concerning the content of the rubric or the code. These notes are general and intended to eliminate potential confusion during code selection; they do not purport to describe the exact nature of all the possible interventions that may be correctly classified to that rubric or code.

Omit Code

From time to time, an instruction may appear to "omit code" under certain and specified circumstances. This is not an optional instruction. It usually refers to circumstances when an "associated" procedure is considered part of a more complex intervention. For example, in cardiovascular surgery, the thymus may be excised to facilitate surgical approach. The thymectomy may not be coded under that circumstance.

Coding Conventions Found in CCI

And/or: The term "and" in CCI implies "and/or". For example, the rubric title: "Fixation, radius and ulna" may mean either "radius and ulna" or it may mean "radius alone"/"ulna alone".

With: The term "with" in CCI implies mutual involvement. For example, "Transplantation, heart with lungs" means that both the heart and lungs must have been involved in the transplant. (If the heart alone was involved, there is usually a separate code, for example, "Transplantation, heart".

Brackets: Parentheses () which follow intervention terms are used to enclose supplementary words which modify the rubric (code) description without affecting code assignment. They are also used to enclose the rubric to which an exclusion term refers. Square brackets [] are used to enclose synonyms, alternate terms [meaning the same thing] or explanatory phrases.

NEC: This standard abbreviation, meaning "not elsewhere classified", represents a residual group, rubric or code such as "therapeutic intervention NEC" or "Eye NEC". It should alert classification users that if more precise information about a given intervention or grouping (e.g. an anatomy site) exists then this could yield a different code. Users should carefully examine the exclusions noted whenever the rubric or code they are selecting contains the NEC abbreviation.

NOS: This standard abbreviation, meaning "not otherwise specified", is used whenever further information is either unnecessary (to select the code), unspecified or unavailable from the clinical documentation.

^^: The use of these two caret symbols indicates that additional characters are still required to make the code complete.

Spelling

There is a mixture of both American and British spelling throughout the classification as both are in common usage in Canada.

Use of Eponyms

Selection of an intervention code by referring only to an eponym (e.g. John's procedure) is discouraged. Very few eponyms are currently listed in CCI. Where they are found, it is the responsibility of the coder to ensure that clinical documentation supports the selection of such a code (e.g. clinical documentation matches the description found in the CCI code). This is especially important in cases where the actual procedure carried out may have been modified from the original technique to fit the individual circumstances of the patient.

Use eponyms with caution and do not hesitate to confirm the code selection with the healthcare providers who commonly use these terms to describe their interventions.

How to Code with CCI

Establishing Intent

Due to the generic nature of CCI, coders do need to adjust their methods of code selection slightly and determine the intent of an intervention. In the past, the index term to search for removal of foreign body, exploration, or drainage was Incision, by site. Each of the above examples is now a distinct intervention by anatomy site. In most instances the title of the intervention report will give a good indication of the intent. For example, when a patient is receiving treatment for a neoplasm the intent may be to remove or destroy the lesion and these interventions would be found under *Excision, partial, total or radical, or Destruction*. When there is trauma, the intent may be to Repair an open wound or *Reduce* a fracture. A patient with hydrocephalus may have a ventriculoperitoneal shunt inserted to facilitate *Drainage* of the ventricles of the brain. There may be times when the intent is not as obvious and when this occurs the coder has several different methods of code selection to choose from.

Selecting the CCI code

When searching for a specific intervention, users may either:

- use the electronic search features of the infobase to search the tabular list
- look up the term in the alphabetical index
- use the CCI rubric finders for each section found in Appendix B.

Searching the tabular list

Performing an electronic search of the tabular list is accomplished by entering terms into the advanced query box. Terms appear in the word window and the number of times the word appears in the infobase is listed in the records with hits. Once the term has been found, users must consult the tabular listing to confirm correctness of choice. Verification of code selection is done by viewing all appropriate hits and paying particular attention to inclusion/exclusion notes and any additional notes that may be present to add further detail. The first "hit" or code is not necessarily the correct one!

If a term is not found, users should carefully review the clinical documentation to determine the generic nature of the intervention. Based on this review, users should consult the appendices to review the definitions provided for the generic interventions used in CCI. Once a match is found, a search should be redone based on the generic intervention lead term. For example, a "vest-over-pants fascia closure" is not found in the index, but upon review of the nature of the intervention, the lead term "repair" provides for the best match. A search on "repair of fascia, by site" should confirm your selection, through examples contained in the qualifier fields.

Searching the alphabetical index

Coders may prefer to limit their search to the alphabetical index first and may do so electronically by either using the index query template or by checking the index branch (in the table of contents) and using the advanced query function. While the index allows an alternate method of searching for an intervention code, users must still proceed to the tabular list for code completion. The alphabetical index contains only the rubric portion of the code, underlined in blue (in the electronic version) as a "jump link" to the code in the tabular list.

For example:

Repair

- blood vessels (see also Repair, vessels)

-- aorta

--- abdominal 1.KA.80.^

--- arch of 1.ID.80.^

---- by increasing size 1.ID.79.^

--- ascending 1.ID.80.^

--- overlapping sites of thoracic and abdominal aorta 1.ID.80.^

--- thoracic 1.ID.80.^

---- by bypass 1.ID.76.^

---- by dilation 1.ID.50.^

---- by resection 1.ID.87.^

The above example shows how the generic interventions are listed as the lead term, followed by the anatomy site and various methods of performing the intervention. Synonyms for the generic interventions may also be found in the index.

Using the CCI rubric finders

The third option for selecting a code is to use the CCI rubric finders - found in Appendix B – which provide a comprehensive overview of all the potential interventions that actually apply, for example, to a particular anatomy site within a body system. Whenever there appears to be no code available for the health intervention that is being classified, this is the quickest method for determining where that intervention should fit.

Composite codes in CCI

Every attempt has been made to reduce the need for multiple code assignment to describe a complex health intervention. In most cases, it should be possible to use a single code to definitely describe in generic terms the intent and means of accomplishing an intervention. When an intervention commonly or frequently may involve a sequence of associated concomitant actions in order to reach its goal, this will be described - wherever possible - by a single code. The qualifiers provide options that describe the alternate techniques involved.

For example: a partial gastrectomy (see [1.NF.87.^](#)) may be performed alone or with a vagotomy. When the vagotomy is performed with the gastrectomy, a qualifier is selected to identify this. A second code for the vagotomy is not recorded. The vagotomy, in fact, may only be coded when it is performed alone.

Even more common as an example, is the excision of (lesion of) an anatomy site with a concomitant repair involving a graft or a flap to close the surgical defect. A qualifier is selected to describe the concomitant repair.

Multiple Codes in CCI

If more than one intervention is performed during the same episode of care and there is no composite code (qualifier) to cover this combination, multiple codes must be assigned. This will be necessary particularly for trauma and congenital repairs where multiple anatomy sites may be involved. While "code also" notes have been included throughout CCI, they must not be considered exhaustive.

Combined Diagnostic and Therapeutic Interventions

Where interventions can be described as being both diagnostic and therapeutic in nature, the therapeutic intervention should supersede the diagnostic. For example: in the case of an **excisional biopsy**, the intent is primarily to remove the lesion (therapeutic) and (as a secondary purpose) to diagnose its nature (diagnostic), therefore, excisional biopsies should be coded as "partial excisions" to the appropriate anatomy site involved. In the case of **incisional biopsies**, which are performed only to diagnose the nature of a lesion (by removing a small portion of tissue), these should be coded as "biopsies" at the appropriate anatomy site.

Aspiration of bodily fluid for examination are similar, conceptually, to the biopsy example. A pleurocentesis is sometimes performed for diagnosis, but it also always has a concomitant therapeutic value in draining the fluid that is increasing pressure on organs within that body region. Because of this, pleurocentesis has been designated a therapeutic "drainage" intervention.

Finally, if a diagnostic intervention is planned for (and initiated), but is changed subsequently to a therapeutic intervention during the course of the intervention (e.g. an angiography that converts to an angioplasty), then only the therapeutic intervention should be coded.

Contact CIHI for more information about coding standards, education products and questions about the use of the codes.

Acknowledgements

Version 2022 of the ICD-10-CA and CCI classifications is dedicated to all our colleagues in various departments of CIHI and the Classification Specialists whose commitment to excellence enhanced all our ICD-10-CA and CCI products.

The last date of changes made into the version 2022 classifications is August 18, 2021.

CCI

The development and enhancement of a classification of health interventions to meet the exacting administrative, epidemiological and public health research requirements of Canadians involves considerable research, cooperation and collaboration with clinicians, coders, information analysts, researchers and other stakeholders across the country. There were hundreds who gave their time and energy. Our thanks go out to each individual contributor for the success of CCI belongs to them. For a complete list of original contributors, please see the Acknowledgements section in Version 2001 or contact CIHI at help@cihi.ca.

Version 2022 of CCI could not have been completed without the generous support and assistance of all those who sent in submissions for enhancement, requests for clarification and notice of errata. We thank all the classification users who took the time to contribute. We also thank the clinical advisors for their dedicated time and expertise in the development of enhancements for the classification.

Knee Joint Replacement Components

1.VG.53.^ Implantation of internal device, knee joint

Qualifier 2

PM—single component prosthetic device

PN—dual component prosthetic device

PP—tri-component prosthetic device

PR—partial component [e.g. tibial liner (insert) alone]

SL—cement spacer [temporary] [impregnated with antibiotics]

Note: The tibial liner and tibial tray (2 pieces) = tibial component.

Joint - Shoulder

Joints and Bones of Forefoot

Joints and Bones of Hand and Wrist

**Joints - Hindfoot/midfoot
(Intertarsal joints with tarsal bones)**

Kidney

Larynx

Segments of the liver

Lymph nodes - Abdomen, pelvis and inguinal regions

Lymphatic nodes - Axillary (and parasternal)

Lymph Nodes—Cervical

(Levels based on the Robbins classification. Adapted from K. T. Robbins, J. L. D. Atkinson, R. M. Byers, et al. [2001].)

Lymph nodes - Trachea and bronchus (mediastinum)

Male genital organs

Muscles of face (EP)

Muscles of neck

Respiratory system

Sacrum, coccyx and sacroiliac joint

Skin - Cross section

Spinal nerves

**Stomach**

Tendons of finger (2nd to 5th digit)

Tendons of hand - Palmar view

Urinary system

Section 1 - Physical/Physiological Therapeutic Interventions

Includes:

- correction of misplacements (i.e. reduction of bone fracture or displacement of joint)
- destructive interventions
- drainage of body fluids
- exchange/replacement of body fluids (e.g. transfusion, infusion)
- implantation and/or removal of devices or appliances
- physical therapies related to speech, hearing, sight, and mental health rehabilitation
- prevention/treatment/restoration of physical functions (i.e. joint immobilization, traction, application/removal of casts/splints, prosthesis, heat, cold, ultrasound and other forms of physiotherapy)
- removal of foreign bodies
- reparative and reconstructive surgery
- treatment of conditions of the respiratory system (i.e. ventilation, resuscitation, intubation, decompression)
- treatment of pathological and systemic conditions (i.e. radiation therapy, chemotherapy, apheresis)

Excludes:

- cognitive/psychosocial/vocational/communication interventions (see Section 6)
- collection of biological specimens [for diagnostic purpose] (see Section 2)
- diagnostic imaging interventions (see Section 3)
- diagnostic interventions (see Section 2)
- personal care, activities of daily living, clinical/administrative support activities (see Section 7)
- therapeutic interventions strengthening the immune system and/or genetic composition (see Section 8)
- therapeutic interventions unique to the state of pregnancy (see Section 5)

Tabular List of Therapeutic Interventions

Therapeutic Interventions on the Nervous System (1AA - 1BZ)

Excludes: those done on intracranial vessels (see [1.JW.^.^](#))

Therapeutic Interventions on Brain and Spinal Cord (1AA - 1AZ)

Includes: Spinal nerve roots within canal

Excludes: Intracranial nerves (see [1.BA.^.^](#))

Spinal nerves outside of canal: brachial plexus C5 to T1 (see [1.BG.^.^](#))

Spinal nerves outside of canal: cervical plexus C2, C3 & C4 (see [1.BB.^.^](#))

1.AA.^.^ Therapeutic Interventions on the Meninges and Dura Mater of Brain

Includes: Dura mater [of brain]
Epidural space [of brain]
Falx
Fossa (frontal, temporal and posterior clinoid)
Subdural space [of brain]

Excludes: Arachnoid tissue of brain (see [1.AB.^.^](#))
Meninges and dura of spine (see [1.AX.^.^](#))
Subarachnoid space (see [1.AB.^.^](#))

1.AA.13.^.^ Control of bleeding, meninges and dura mater of brain

Includes: Control of bleeding, meninges of brain

Excludes: Administration of systemic pharmacological agent (see [1.ZZ.35.^.](#))
Intra-arterial embolization (see [1.JW.51.^.](#))

1.AA.13.HA-C2	using percutaneous (needle) injection of antihemorrhagic agent [antifibrinolytic]
	Includes: aminocaproic acid, aprotinin, phytonadione, thrombin, coagulation factor VIII
1.AA.13.SE-C2	using injection of antihemorrhagic agent into burr hole
	Includes: aminocaproic acid, aprotinin, phytonadione, thrombin, coagulation factor VIII

1.AA.35.^ ^ Pharmacotherapy (local), meninges and dura mater of brain

Includes: Injection of pharmaceutical agent(s), meninges of brain
Instillation, pharmaceutical agent(s), meninges of brain

Excludes: Systemic pharmacotherapy (see [1.ZZ.35.^ ^](#))
that for control of bleeding (see [1.AA.13.^ ^](#))

1.AA.35.^ ^ Pharmacotherapy (local), meninges and dura mater of brain	percutaneous [needle] approach	percutaneous transcatheter approach
using antithrombotic agent	1.AA.35.HA-C1 Includes: • warfarin, heparin, enoxaparin, dipyridamole	1.AA.35.HH-C1 Includes: • warfarin, heparin, enoxaparin, dipyridamole
using thrombolytic agent	1.AA.35.HA-1C Includes: • anistreplase, alteplase, reteplase, streptokinase, tenecteplase, TNKase (TNK), tissue plasminogen activator (tPA), urokinase	1.AA.35.HH-1C Includes: • anistreplase, alteplase, reteplase, streptokinase, tenecteplase, TNKase (TNK), tissue plasminogen activator (tPA), urokinase
using antiinfective agent NEC	1.AA.35.HA-K0	1.AA.35.HH-K0
using antineoplastic agent NEC	1.AA.35.HA-M0	1.AA.35.HH-M0
using other pharmacological agent NEC	1.AA.35.HA-T9	1.AA.35.HH-T9

1.AA.52.^ ^ Drainage, meninges and dura mater of brain**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Decompression, intracranial
Drainage [abscess, hematoma], epidural or subdural, brain
Evacuation [abscess, hematoma], meninges of brain
Puncture, anterior fontanelle [for decompression]
Puncture, cranial NOS [for decompression]
Replacement of entire shunt system, meninges and dura mater of brain [e.g. subdural-peritoneal]
Shunt, subdural-peritoneal
Tap, subdural [for decompression]

Excludes: Partial "revision" for maintenance of subdural shunt system (see [1.AA.54.^ ^](#))

Code Also: Any concomitant removal of old subdural shunt system (see [1.AA.55.^ ^](#))
Any intraoperative stereotactic or computer guidance (see [3.AN.94.^ ^](#))

1.AA.52.^ Drainage, meninges and dura mater of brain	open craniotomy/craniectomy flap approach	burr hole technique	percutaneous approach (e.g. by needle or through fontanelle)
drainage alone [without catheter in situ]	1.AA.52.SZ	1.AA.52.SE	1.AA.52.HA
ultrasonic device [CUSA]	1.AA.52.SZ-AZ	1.AA.52.SE-AZ	—
leaving drainage tube [catheter] in situ	1.AA.52.SZ-TS	1.AA.52.SE-TS	—
shunt terminating in abdominal cavity (e.g. peritoneum)	1.AA.52.ME-SJ	—	—
negative pressure device (e.g. vacuum system)	1.AA.52.SZ-NC	1.AA.52.SE-NC	—

1.AA.53.^ Implantation of internal device, meninges and dura mater of brain**S**⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Implantation, pressure monitoring device, subdural space

Excludes: Implantation, pressure monitoring device, intracranial NOS (see [1.AC.53.^](#))
 Implantation, pressure monitoring device, intraparenchymal (see [1.AN.53.^](#))
 Implantation, pressure monitoring device, intraventricular (see [1.AC.53.^](#))

1.AA.53.SE-PL of pressure monitoring device using burr hole technique
 1.AA.53.SZ-PL of pressure monitoring device using open craniotomy [craniectomy] flap approach

1.AA.54.^ Management of internal device, meninges and dura mater of brain**S**⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Irrigation, ligation or adjustment of drainage tube of meninges and dura mater of brain
 Maintenance of drainage tube of meninges and dura mater of brain
 Partial revision of subdural shunt system
 Revision of drainage tube of meninges and dura mater of brain

Excludes: Complete removal with replacement of a drainage tube (see [1.AA.52.^](#))
 Complete removal with replacement of a new subdural shunt system (see [1.AA.52.^](#))

Note: May involve adding, changing, repositioning or lengthening catheters; aspirating reservoirs; changing valves or correcting valve configurations.

1.AA.54.HA-TS irrigation drainage tube [catheter], percutaneous [needle] approach
 1.AA.54.ME-SJ shunt system terminating in the abdominal cavity (e.g. peritoneum), open approach
 1.AA.54.MP-SJ shunt system terminating in other site, open approach

1.AA.55.^ ^ Removal of device, meninges and dura mater of brain

1.AA.55.SE-TS	of drainage tube [catheter] using burr hole technique
1.AA.55.SZ-PL	of pressure monitoring device using open craniotomy flap approach
<i>Includes:</i> Removal, pressure monitoring device, subdural space	
1.AA.55.SZ-SJ	of shunt system using open craniotomy flap approach

1.AA.80.^ ^ Repair, meninges and dura mater of brain**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Duraplasty of brain
Graft, dura of brain
Repair, dura of brain

Excludes: repair, fistula, intracranium (see [1.AB.86.^ ^](#))
that with resection of dura or meninges (see [1.AA.87.^ ^](#))

Omit code: when dura has been incised to access surgical site and is subsequently just sutured closed (this is an integral part of the definitive intervention)

1.AA.80.SZ	using apposition technique [e.g. suture]
1.AA.80.SZ-W3	using fibrin [glue]
1.AA.80.SZ-XX-A	using autograft [e.g. pericranium, fascia lata]
1.AA.80.SZ-XX-K	using homograft [e.g. freeze dried donor dura]
1.AA.80.SZ-XX-L	using xenograft [e.g. bovine]
1.AA.80.SZ-XX-N	using synthetic tissue substitute [Silastic sheath]

1.AA.87.^ ^ Excision partial, meninges and dura mater of brain**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes:	Decortication, meninges Excision [neoplasm], meninges and dura mater of brain Resection, meninges (with or without concomitant duraplasty) Stripping, subdural membrane
Excludes:	that extending into (or involving) cranium (see 1.EA.92.^^)
Code Also:	Any concomitant (or subsequent) hematoma drainage, epidural or subdural, brain (see 1.AA.52.^^)
1.AA.87.SZ	using apposition technique [e.g. suture]
1.AA.87.SZ-XX-A	using autograft [e.g. pericranium, fascia lata]
1.AA.87.SZ-XX-K	using homograft [e.g. freeze dried donor dura]
1.AA.87.SZ-XX-L	using xenograft [e.g. bovine]
1.AA.87.SZ-XX-N	using synthetic tissue substitute [Silastic sheath]

1.AB.^^.^^ Therapeutic Interventions on the Subarachnoid

Includes:	Arachnoid tissue of brain Basal cisterns Subarachnoid space
------------------	---

1.AB.35.^^ Pharmacotherapy (local), subarachnoid

Includes:	Injection of pharmaceutical agent(s), subarachnoid space Instillation, agent(s), intrathecal (brain)
Excludes:	Instillation, agent(s), intrathecal (spine) (see 1.AX.35.^^) Systemic pharmacotherapy (see 1.ZZ.35.^^)

1.AB.35.^^ Pharmacotherapy (local), subarachnoid	percutaneous [needle] approach	percutaneous transcatheter approach
using antithrombotic agent	1.AB.35.HA-C1 Includes: • warfarin, heparin, enoxaparin, dipyridamole	1.AB.35.HH-C1 Includes: • warfarin, heparin, enoxaparin, dipyridamole
using thrombolytic agent	1.AB.35.HA-1C Includes: • anistreplase, alteplase, reteplase, streptokinase, tenecteplase, TNKase (TNK), tissue plasminogen activator (tPA), urokinase	1.AB.35.HH-1C Includes: • anistreplase, alteplase, reteplase, streptokinase, tenecteplase, TNKase (TNK), tissue plasminogen activator (tPA), urokinase
using antiinfective agent NEC	1.AB.35.HA-K0	1.AB.35.HH-K0
using antineoplastic agent NEC	1.AB.35.HA-M0	1.AB.35.HH-M0
using other pharmacological agent NEC	1.AB.35.HA-T9	1.AB.35.HH-T9

1.AB.52.^ ^ Drainage, subarachnoid**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Aspiration, subarachnoid [cyst, hematoma]
 Drainage, subarachnoid [cyst, hematoma]
 Replacement of entire shunt system, (sub)arachnoid
 Shunt, arachnoid
 Tap, cisternal [for CSF drainage]
 Tap, subarachnoid [for CSF drainage]

Excludes: Partial "revision" for maintenance of subarachnoid shunt system (see [1.AB.54.^ ^](#))
 that with excision of subarachnoid cyst (see [1.AB.87.^ ^](#))
 that with insertion of syringosubarachnoid shunt catheter [for syringomyelia] (see [1.AP.52.^ ^](#))

Code Also: Any concomitant removal of old (sub)arachnoid shunt system (see [1.AB.55.^ ^](#))
 Any intraoperative stereotactic guidance (see [3.AN.94.^ ^](#))

1.AB.52.^ ^ Drainage, subarachnoid	burr hole technique	endoscopic [neuroendoscopic] approach	using craniotomy or craniectomy (flap) approach
drainage alone [without catheter in situ]	1.AB.52.SE	1.AB.52.DA Includes: • Burr hole endoscopic fenestration of subarachnoid cyst	1.AB.52.SZ Includes: • Open fenestration of subarachnoid cyst
leaving drainage tube [catheter] in situ	1.AB.52.SE-TS	1.AB.52.DA-TS	—
shunt terminating in abdominal cavity [e.g. cystoperitoneal]	—	1.AB.52.GN-SJ	1.AB.52.ME-SJ
shunt terminating in circulatory system [e.g. cystoatrial]	—	1.AB.52.GI-SJ	1.AB.52.MF-SJ
shunt terminating in thoracic cavity [e.g. cystopleural]	—	1.AB.52.GJ-SJ	1.AB.52.MQ-SJ

1.AB.54.^ ^ Management of internal device, subarachnoid**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

- Includes:** Maintenance of subarachnoid shunt system
Partial revision of subarachnoid shunt system
- Excludes:** Complete removal with replacement of a new subarachnoid shunt system (see [1.AB.52.^^](#))
- Note:** May involve adding, changing, repositioning or lengthening catheters; aspirating reservoirs; changing valves or correcting valve configurations.

1.AB.54.HA-TS	of drainage tube [catheter]
1.AB.54.ME-SJ	of shunt system terminating in abdominal cavity [e.g. cystoperitoneal]
1.AB.54.MF-SJ	of shunt terminating in circulatory system [e.g. cystoatrial]
1.AB.54.MQ-SJ	of shunt system terminating in thoracic cavity [e.g. cystopleural]

1.AB.55.^^ Removal of device, subarachnoid**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

- Includes:** Removal, shunt catheter system, subarachnoid
- Code Also:** Any intraoperative stereotactic guidance (see [3.AN.94.^^](#))

1.AB.55.SE-TS	of drainage tube [catheter] using burr hole access
1.AB.55.SZ-SJ	of shunt catheter system using open approach

1.AB.86.^^ Closure of fistula, subarachnoid**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

- Includes:** Repair, fistula, CSF of brain
- Code Also:** Any concomitant insertion of shunt system (see [1.AC.52.^^](#))

1.AB.86.^ ^ Closure of fistula, subarachnoid	using apposition technique [e.g. suture]	using autograft [e.g. fascia lata, pericranium, fat, muscle or bone]	using fibrin [glue]
for fistula terminating at skin	1.AB.86.MB	1.AB.86.MB-XX-A	1.AB.86.MB-W3
for fistula terminating in ear	1.AB.86.MS	1.AB.86.MS-XX-A	1.AB.86.MS-W3
for fistula terminating in head and neck [e.g. subdural space]	1.AB.86.MJ	1.AB.86.MJ-XX-A	1.AB.86.MJ-W3
for fistula terminating in nasal (oral) cavity	1.AB.86.ML Includes: • Repair of nasal sinus for CSF leak	1.AB.86.ML-XX-A Includes: • Repair of nasal sinus for CSF leak	1.AB.86.ML-W3 Includes: • Repair of nasal sinus for CSF leak

1.AB.87.^ ^ Excision partial, subarachnoid**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Enucleation [cyst], basal cistern
 Enucleation [cyst], subarachnoid
 Excision, subarachnoid [cyst, hematoma]
 Resection, subarachnoid [cyst, hematoma]

Excludes: Enucleation [cyst], posterior fossa (see [1.AC.87.^ ^](#))
 Enucleation [cyst], suprasellar (see [1.AC.87.^ ^](#))

Code Also: Any intraoperative image assistance (see [3.AN.94.^ ^](#))

1.AB.87.^ ^ Excision partial, subarachnoid	burr hole approach	open approach
with device NEC	1.AB.87.SE-GX	1.AB.87.SZ-GX
with laser	1.AB.87.SE-AG	1.AB.87.SZ-AG
with ultrasonic aspirator [e.g. CUSA]	1.AB.87.SE-AZ	1.AB.87.SZ-AZ

1.AC.^ ^ Therapeutic Interventions on the Ventricles of Brain

Includes: Aqueduct of Sylvius
 Cerebral ventricles [lateral, 3rd and 4th]
 Choroid plexus of 3rd and 4th ventricles
 Dandy Walker malformation of 4th ventricle
 Foramen of Monro, Luschka and Magendie

1.AC.27.^ ^ Radiation, ventricles of brain

Includes: Radiosurgery (stereotactic), ventricle(s) of brain

Excludes: Destruction (lesion) using radiofrequency probe through a cranial incision (see [1.AC.59.^ ^](#))
 Fractionated stereotactic radiotherapy, ventricles of brain (see [1.AN.27.^ ^](#))
 Radiotherapy not using focused beam radiation (see [1.AN.27.^ ^](#))

Note: Involves use of a stereotactical frame for positioning during delivery of external focused beam [or gamma "knife"] radiation to obliterate or shrink tumour within ventricle of the brain.

1.AC.27.JX using focused beam [e.g. gamma knife, cyber knife stereotactic radiosurgery]

1.AC.35.^ ^ Pharmacotherapy (local), ventricles of brain

Includes: Instillation, pharmaceutical agent(s), ventricles of brain
 that by previously inserted catheter

Code Also: Any insertion of catheter for infusion (see [1.AC.53.^ ^](#))

1.AC.35.HH-1C percutaneous transcatheter approach using thrombolytic agent

Includes: anistreplase, alteplase, reteplase, streptokinase, tenecteplase, TNKase (TNK), tissue plasminogen activator (tPA), urokinase

1.AC.35.HH-T9 percutaneous transcatheter approach using other pharmacological agent NEC

1.AC.50.^ ^ Dilation, ventricles of brain**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Dilation, foramen of brain
 Dilation, ventricular
 Insertion, stent, aqueduct of Sylvius[for dilation and drainage]

Code Also: Any concomitant cervical laminectomy [C3-C7] (see [1.SC.80.^ ^](#))
 Any concomitant dural graft for closure (see [1.AA.80.^ ^](#))
 Any concomitant laminectomy of atlas, axis [C1-C2 with or without C3] (see [1.SA.80.^ ^](#))

Note: Stent is placed in foramen or aqueduct [to maintain dilation] and terminates in subarachnoid space of spinal cord

1.AC.50.DA-NR using endoscopic [ventriculoscopic] approach and stent

1.AC.50.SE-NR using open approach with burr hole technique and stent

1.AC.50.SZ-NR using open approach with craniotomy [craniectomy] flap technique and stent

1.AC.52.^ ^ Drainage, ventricles of brain**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes:

Aspiration [cyst], ventricle
 Drainage, CSF, ventricles of brain
 Enlargement of aqueduct [to unblock occlusion for drainage]
 Puncture, septum pellucidum for drainage (into ventricle)
 Replacement of entire shunt system, ventricles of brain
 Shunt, ventricular
 Shunt, ventriculoatrial
 Shunt, ventriculoperitoneal
 Shunt, ventriculopleural
 Shunt, ventriculosubgaleal
 Ventriculopuncture [for continuous CSF drainage]
 Ventriculostomy NEC

Excludes:

Dilation, foramen [of Magendie] with stent placement (see [1.AC.50.^ ^](#))
 Partial "revision" for maintenance of ventricular shunt system (see [1.AC.54.^ ^](#))
 Partial "revision" for maintenance of ventriculoatrial shunt system (see [1.AC.54.^ ^](#))
 Partial "revision" for maintenance of ventriculoperitoneal shunt system (see [1.AC.54.^ ^](#))
 Partial "revision" for maintenance of ventriculopleural shunt system (see [1.AC.54.^ ^](#))
 Shunt, lumboperitoneal (see [1.AX.52.^ ^](#))
 Shunt, syringopleural or syringoperitoneal (see [1.AP.52.^ ^](#))
 Shunt, thecal (see [1.AX.52.^ ^](#))
 Ventricular aspiration of pituitary region (for craniopharyngioma cyst) (see [1.AF.52.^ ^](#))

Code Also:

Any concomitant removal of old shunt system (see [1.AC.55.^ ^](#))
 Any intraoperative stereotactic guidance (see [3.AN.94.^ ^](#))

1.AC.52.^.^ Drainage, ventricles of brain	craniotomy or craniectomy [flap] approach	burr hole technique	endoscopic [ventriculoscopic] approach	percutaneous (via needle through fontanel) approach
drainage without shunt or catheter left in situ	1.AC.52.SZ Includes: • Open fenestration of cyst	1.AC.52.SE	1.AC.52.DA Includes: • burr hole endoscopic fenestration of cyst	1.AC.52.HA
drainage to skin (of head) with catheter or shunt (temporarily) left in situ	—	1.AC.52.MB-SJ Includes: • Insertion, Ommaya reservoir • that with implantation of intracranial pressure monitoring device Excludes: • Percutaneous aspiration of CSF from Ommaya reservoir (see 1.AC.54.^.^) Code Also: • Any monitoring of intracranial pressure performed following insertion of drainage device (see 2.AN.28.^.^)	1.AC.52.DA-SJ Includes: • Burr hole endoscopic fenestration of cyst with drainage tube left in situ	—
shunt terminating in abdominal cavity [e.g. ventriculoperitoneal or ventriculobiliary]	1.AC.52.ME-SJ	—	1.AC.52.GN-SJ	—
shunt terminating in circulatory system [e.g. ventriculoatrial]	1.AC.52.MF-SJ	—	1.AC.52.GI-SJ	—
shunt terminating in head and neck [e.g. cisterna magna or Torkildsen shunt]	1.AC.52.MJ-SJ	—	—	—
shunt terminating in other site	1.AC.52.MP-SJ	—	1.AC.52.GK-SJ	—
shunt terminating in thoracic cavity [e.g. ventriculopleural]	1.AC.52.MQ-SJ	—	1.AC.52.GJ-SJ	—

1.AC.53.^.^ Implantation of internal device, ventricles of brain

Includes: Implantation, catheter, ventricles of brain [for chemical palliative infusion e.g. Ommaya reservoir]
 Implantation, pressure measuring/ monitoring device, intracranial NOS
 Implantation, pressure measuring/ monitoring device, ventricles of brain

Excludes: Implantation of intracranial pressure monitoring device concomitant with external ventricular drainage (EVD) (see [1.AC.52.^.^](#))
 Implantation, catheter, brain [into cyst or tumor] (see [1.AN.53.^.^](#))
 Implantation, catheter, spinal canal and meninges (see [1.AX.53.^.^](#))
 Implantation, pressure measuring/ monitoring device, intraparenchymal (see [1.AN.53.^.^](#))
 Implantation, pressure measuring/monitoring device, subdural space (see [1.AA.53.^.^](#))

Code Also: Any monitoring of intracranial pressure performed following implantation of pressure monitoring device (see [2.AN.28.^.^](#))

1.AC.53.DA-PL	of pressure measuring/monitoring device using endoscopic [ventriculoscopic] approach
1.AC.53.SE-FT	of [semipermeable] catheter [for chemical palliative infusion] using burr hole technique
1.AC.53.SZ-FT	of [semipermeable] catheter [for chemical palliative infusion] using open craniotomy [or craniectomy] flap technique
1.AC.53.SZ-PL	of pressure measuring/monitoring device using open craniotomy/craniectomy [flap] technique for access

1.AC.54.^ ^ Management of internal device, ventricles of brain

- Includes:** Irrigation, ligation or adjustment of (part of) ventricular shunt system of brain
Maintenance of ventricular shunt system of brain
Partial revision of ventricular shunt system of brain
- Excludes:** Complete removal with replacement of a new ventricular shunt system (see [1.AC.52.^ ^](#))
- Note:** May involve adding, changing, repositioning or lengthening catheters; aspirating reservoirs; changing valves or correcting valve configurations.

1.AC.54.HA-TS	using percutaneous [needle] approach irrigation of drainage tube [catheter]
	Includes: Percutaneous aspiration of CSF from the Ommaya reservoir
1.AC.54.JA-SJ	using external adjustment of (flow) (programmable) valves of (any) shunt system
	Includes: Adjustment or reprogramming, valves of shunt system using magnetic wand Shunt calibration
1.AC.54.ME-SJ	using open approach shunt system terminating in abdominal cavity [e.g. ventriculoperitoneal, gallbladder]
1.AC.54.MF-SJ	using open approach shunt system terminating in circulatory system [e.g. ventriculoatrial]
1.AC.54.MJ-SJ	using open approach shunt system terminating in head and neck [e.g. cisterna magna, Torkildsen's shunt]
1.AC.54.MP-SJ	using open approach shunt system terminating in other site
1.AC.54.MQ-SJ	using open approach shunt system terminating in thoracic cavity [e.g. ventriculopleural]

1.AC.55.^ ^ Removal of device, ventricles of brain**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

- Includes:** Removal, shunt catheter system, ventricles of brain
Removal, stent, ventricles of brain

Code Also: Any intraoperative stereotactic guidance (see [3.AN.94.^ ^](#))

1.AC.55.^ ^ Removal of device or appliance, ventricles of brain	endoscopic approach	open approach
of pressure measuring/ monitoring device using craniotomy access	—	1.AC.55.SZ-PL
of shunt catheter system	—	1.AC.55.SZ-SJ
of stent using burr hole access	1.AC.55.DA-NR	1.AC.55.SE-NR

1.AC.59.^.^ Destruction, ventricles of brain**S** 4 **L** 10

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 10	Optional	Ventricles of brain	Location	V3	3rd ventricle of brain
				V4	4th ventricle of brain

Includes: Coagulation, choroid plexus
Destruction, choroid plexus
Neoplasm within ventricles of brain

Excludes: Radiation, ventricle of brain (see [1.AC.27.^.^](#))

1.AC.59.^.^ Destruction, ventricles of brain	open approach with craniotomy [craniectomy] flap technique	endoscopic approach
using radiofrequency probe	1.AC.59.SZ-AW	1.AC.59.DA-AW
using laser	1.AC.59.SZ-AG Includes: • Laser interstitial thermal therapy [LITT]	1.AC.59.DA-AG Includes: • Laser interstitial thermal therapy [LITT]
using device NEC	1.AC.59.SZ-GX	1.AC.59.DA-GX

1.AC.87.^.^ Excision partial, ventricles of brain**S** 4 **L** 10

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 10	Optional	Ventricles of brain	Location	V3	3rd ventricle of brain
				V4	4th ventricle of brain

Includes: Debulking [neoplasm], ventricles of brain
Enucleation [cyst], posterior fossa
Enucleation [cyst], suprasellar
Plexectomy, choroid
Resection [neoplasm], ventricles of brain
Resection, posterior fossa [neoplasm] extending into ventricle

Excludes: Enucleation, subarachnoid [or basal cistern] cyst (see [1.AB.87.^.^](#))
Resection of neoplasm arising in ventricles but extending into brain stem (see [1.AP.87.^.^](#))

Code Also: Any concomitant ventricular shunt for continuous drainage (see [1.AC.52.^.^](#))
Any intraoperative microscope assistance (see [3.AN.94.^.^](#))
Any intraoperative stereotactic guidance (see [3.AN.94.^.^](#))

1.AC.87.^ ^ Excision partial, ventricles of brain	endoscopic approach	open approach
with device NEC	1.AC.87.DA-GX	1.AC.87.SZ-GX
with laser	1.AC.87.DA-AG	1.AC.87.SZ-AG
with ultrasonic aspirator [e.g. CUSA]	1.AC.87.DA-AZ	1.AC.87.SZ-AZ

1.AE.^ ^ Therapeutic Interventions on the Thalamus and Basal Ganglia

Includes: Caudate
Fornix
Globus pallidus
Hypothalamus
Internal capsule
Lemniscal pathway
Lentiform nuclei
Putamen
Superior and inferior vagal ganglia

1.AE.09.^ ^ Stimulation, thalamus and basal ganglia

Includes: Activation of surgically implanted stimulator, thalamus that for control of pain

Excludes: Implantation of stimulating device into thalamus (see [1.AE.53.^ ^](#))

1.AE.09.JA-QQ	using remote radio transmitter
1.AE.09.JH-ED	using external manual activation of implanted stimulator

1.AE.27.^ ^ Radiation, thalamus and basal ganglia

Includes: Radiosurgery (stereotactic), thalamus

Excludes: Destruction (lesion) using radiofrequency probe through cranial incision (see [1.AE.59.^ ^](#))
Fractionated stereotactic radiotherapy, thalamus and basal ganglia (see [1.AN.27.^ ^](#))
Radiotherapy not using focused beam radiation (see [1.AN.27.^ ^](#))

Note: Involves the use of a stereotactical frame for positioning during delivery of external focused beam (or gamma "knife") radiation.

1.AE.27.JX	using focused beam [e.g. gamma knife, cyber knife stereotactic radiosurgery]
------------	--

1.AE.35.^.^ Pharmacotherapy (local), thalamus and basal ganglia

- Includes:** Instillation, agent
that by previously inserted catheter
- Excludes:** Irrigation of previously installed catheter (see [1.AE.54.^.^](#))
Systemic pharmacotherapy (see [1.ZZ.35.^.^](#))

1.AE.35.^.^ Pharmacotherapy (local), thalamus and basal ganglia	percutaneous [needle] approach	percutaneous transcatheter approach
using antiinfective agent NEC	1.AE.35.HA-K0	1.AE.35.HH-K0
using antineoplastic agent NEC	1.AE.35.HA-M0	1.AE.35.HH-M0
using other pharmacological agent NEC	1.AE.35.HA-T9	1.AE.35.HH-T9

1.AE.53.^.^ Implantation of internal device, thalamus and basal ganglia**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

- Includes:** Implantation, electrodes, thalamus [e.g. for interictal measurement of epileptic discharges or stimulation of paresthesia to suppress pain]
Implantation, semipermeable catheter, thalamus [for continuous chemical therapy]

Code Also: Any intraoperative stereotactic computer guidance (see [3.AN.94.^.^](#))

1.AE.53.SE-JA	of electrodes [e.g. recording, stimulating] using burr hole approach
1.AE.53.SZ-FT	of semipermeable catheter [e.g. for continuous chemical therapy]
1.AE.53.SZ-JA	of electrodes [e.g. recording, stimulating] using open approach

1.AE.54.^.^ Management of internal device, thalamus and basal ganglia

- Includes:** Adjustment of device, thalamus and basal ganglia
Irrigation of device, thalamus and basal ganglia

1.AE.54.JA-FT	of semipermeable catheter
1.AE.54.LA-JA	of electrodes using open (skin incision) approach
Includes: Exteriorization, previously implanted electrodes	

1.AE.55.^ ^ Removal of device, thalamus and basal ganglia**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Code Also: Any intraoperative stereotactic guidance (see [3.AN.94.^ ^](#))

1.AE.55.SZ-FT of semipermeable catheter [e.g. for continuous chemical therapy]
 1.AE.55.SZ-JA of electrodes [e.g. recording, stimulating]

1.AE.59.^ ^ Destruction, thalamus and basal ganglia**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Pallidotomy
 Subthalamotomy
 Thalamotomy

Excludes: Stereotactic radiosurgery, thalamus (see [1.AE.27.^ ^](#))
 Use of external focused beam "gamma knife" radiation, thalamus (see [1.AE.27.^ ^](#))

Code Also: Any intraoperative stereotactic guidance (see [3.AN.94.^ ^](#))
 Any robotic assisted telemanipulation of tools (see [7.SF.14.^ ^](#))

1.AE.59.^ ^ Destruction, thalamus and basal ganglia	open approach	burr hole approach	external approach
using chemical cautery agent	1.AE.59.SZ-X7	1.AE.59.SE-X7	—
using device NEC	1.AE.59.SZ-GX	1.AE.59.SE-GX	—
using radiofrequency probe	1.AE.59.SZ-AW	1.AE.59.SE-AW	—
using ultrasound	—	—	1.AE.59.JA-AZ

1.AE.85.^ ^ Transplant, thalamus and basal ganglia**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Transplant, adrenal medullary tissue [to thalamus region]
 Transplant, fetal substantia nigra tissue [to thalamus region]
 Transplant, mesencephalic tissue [to thalamus region]

1.AE.85.SZ-XX-J of fetal mesencephalic tissue using open approach
 1.AE.85.SZ-XX-L of xenograft tissue [e.g. pig cell] using open approach

1.AE.87.^.^ Excision partial, thalamus and basal ganglia

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Hypothalamectomy
 Pallidoansectomy
 Thalamectomy

Code Also: Any intraoperative stereotactic guidance (see [3.AN.94.^.^](#))

Note: Involves the focal resection of epileptic activity or psychosis [to eradicate condition]

1.AE.87.SZ-GX using open approach and device NEC

1.AF.^.^.^ Therapeutic Interventions on the Pituitary Region

Includes: Cavernous Sinus
 Craniobuccal pouch
 Hypophyseal fossa
 Hypophysis cerebri
 Parasella
 Petrosal sinus
 Pituitary fossa
 Rathke's pouch
 Sella
 Sella turcica
 Suprasella

1.AF.27.^ ^ Radiation, pituitary region

Includes: Irradiation, pituitary region
 Radiosurgery (stereotactic), pituitary region
 Radiotherapy, pituitary region
 sella turcica
 Teletherapy, pituitary region
 Therapy, radiation, pituitary region

Excludes: Destruction (lesion) using radiofrequency probe through cranial incision (see [1.AF.59.^ ^](#))

Note: May involve the use of a stereotactical frame for positioning during delivery of external focused beam (or gamma "knife") radiation .

1.AF.27.JA	using external beam [or teletherapy NEC]
1.AF.27.JX	using focused beam [e.g. gamma knife, cyber knife stereotactic radiosurgery]

1.AF.52.^ ^ Drainage, pituitary region**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Drainage [abscess, hematoma], hypophysis
 Drainage [abscess, hematoma], parasellar region
 Drainage [cyst], Rathke's pouch
 Drainage, craniobuccal pouch
 Drainage, sella turcica

Excludes: Aspiration and management of a (cyst) reservoir system, pituitary region (see [1.AF.54.^ ^](#))

1.AF.52.QS	using transnasal [e.g. transsphenoidal, transthemoidal] approach
1.AF.52.QS-TS	using transnasal (e.g. transthemoidal, transsphenoidal) approach and leaving drainage tube [catheter] in situ
1.AF.52.SZ	using transcranial [e.g. transfrontal, pterion or craniectomy NOS] approach
1.AF.52.SZ-TS	using transcranial (e.g. transfrontal, pterion or craniectomy NOS) approach and leaving drainage tube [catheter] in situ

1.AF.53.^ ^ Implantation of internal device, pituitary region**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Placement of reservoir system, pituitary region (for craniopharyngioma cyst)

1.AF.53.SE-QS	using burr hole approach and reservoir (with tubing) system
---------------	---

1.AF.54.^ ^ Management of internal device, pituitary region**S** ⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Adjustment of device, pituitary region
 Irrigation of tubing and reservoir system within craniopharyngioma cyst
 Maintenance of reservoir system within craniopharyngioma cyst

1.AF.54.HA-QS of reservoir (and tubing) system using percutaneous (aspiration) approach
 1.AF.54.SE-QS of reservoir (and tubing) system using burr hole approach

1.AF.55.^ ^ Removal of device, pituitary region**S** ⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Excludes: Replacement of part of reservoir system within craniopharyngioma cyst (see [1.AF.54.^ ^](#))

1.AF.55.SE-QS of reservoir (and tubing) system using burr hole approach

1.AF.59.^ ^ Destruction, pituitary region**S** ⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Destruction [lesion], pituitary gland
 sella turcica

Excludes: Stereotactic radiosurgery, pituitary region (see [1.AF.27.^ ^](#))
 Use of external focused beam "gamma" knife radiation, pituitary region (see [1.AF.27.^ ^](#))

1.AF.59.^.^ Destruction, pituitary region	transcranial [e.g. transfrontal, pterion or craniotomy NOS] approach	transnasal [e.g. transsphenoidal or transthemoidal] approach
with chemical cautery agent	1.AF.59.SZ-X7	1.AF.59.QS-X7
with cryoprobe	1.AF.59.SZ-AD	1.AF.59.QS-AD
with device NEC	1.AF.59.SZ-GX	1.AF.59.QS-GX
with radiofrequency probe	1.AF.59.SZ-AW	1.AF.59.QS-AW

1.AF.87.^.^ Excision partial, pituitary region**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes:

Debulking [neoplasm], pituitary region
 Excision, craniopharyngioma
 Hypophysectomy
 Pituitectomy
 Resection [neoplasm] parasellar [may involve extension into cavernous or petrosal sinus]
 Resection, craniopharyngioma
 sella turcica
 that with repair of any resulting sellar defect
 that with repair to prevent CSF leak

Code Also:

Any concomitant duraplasty (see [1.AA.80.^.^](#))
 Any intraoperative stereotactic guidance (see [3.AN.94.^.^](#))
 Any robotic assisted telemanipulation of tools (see [7.SF.14.^.^](#))

Note:

May involve intracapsular [neoplasm] debulking with or without concomitant removal of capsule or complete excision of neoplasm.

1.AF.87.^.^ Excision partial, pituitary region	combined transnasal & transcranial approach	endoscopic (via sinus) approach	transcranial [e.g. transfrontal, pterion or craniectomy NEC] approach	open transnasal [e.g. transsphenoidal, transthemoidal] approach
without tissue	1.AF.87.LU	1.AF.87.DA	1.AF.87.SZ	1.AF.87.QS
with autograft [e.g. fascia lata, fat, muscle or bone]	1.AF.87.LU-XX-A	1.AF.87.DA-XX-A	1.AF.87.SZ-XX-A	1.AF.87.QS-XX-A
with pedicled flap [e.g. nasoseptal]	1.AF.87.LU-XX-G	1.AF.87.DA-XX-G	1.AF.87.SZ-XX-G	1.AF.87.QS-XX-G
with synthetic tissue	1.AF.87.LU-XX-N	1.AF.87.DA-XX-N	1.AF.87.SZ-XX-N	1.AF.87.QS-XX-N
with combined sources of tissue	1.AF.87.LU-XX-Q	1.AF.87.DA-XX-Q	1.AF.87.SZ-XX-Q	1.AF.87.QS-XX-Q

1.AG.^.^ Therapeutic Interventions on the Pineal Gland**Includes:**

Pineal recess

1.AG.27.^.^ Radiation, pineal gland

Includes: Radiosurgery (stereotactic), pineal gland

Excludes: Fractionated stereotactic radiotherapy, pineal gland (see [1.AN.27.^.^](#))
Radiation therapy not using focused beam radiation (see [1.AN.27.^.^](#))

Note: Involves the use of a stereotactical frame for positioning during delivery of external focused beam (or gamma "knife") radiation.

1.AG.27.JX using focused beam [e.g. gamma knife, cyber knife stereotactic radiosurgery]

1.AG.52.^.^ Drainage, pineal gland**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Aspiration, pineal gland (drainage of cyst, abscess, etc.)

1.AG.52.HA using percutaneous (needle) aspiration

1.AG.87.^.^ Excision partial, pineal gland**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Pinealectomy
Resection [neoplasm], pineal gland

Code Also: Any intraoperative stereotactic guidance (see [3.AN.94.^.^](#))
Any robotic assisted telemanipulation of tools (see [7.SF.14.^.^](#))

1.AG.87.^.^ Excision partial, pineal gland	craniotomy [craniectomy] flap technique for access	burr hole technique for access
with device NEC	1.AG.87.SZ-GX	1.AG.87.SE-GX
with laser	1.AG.87.SZ-AG	1.AG.87.SE-AG
with ultrasonic aspirator [e.g. CUSA]	1.AG.87.SZ-AZ	1.AG.87.SE-AZ

1.AJ.^.^ Therapeutic Interventions on the Cerebellum

Excludes: Cerebellopontine angle (see [1.AK.^.^](#))

1.AJ.27.^ ^ Radiation, cerebellum

Includes: Radiosurgery (stereotactic), cerebellum

Excludes: Fractionated stereotactic radiotherapy, cerebellum (see [1.AN.27.^ ^](#))
Radiation therapy not using focused beam radiation (see [1.AN.27.^ ^](#))

Note: Involves the use of a stereotactical frame for positioning during delivery of external focused beam (or gamma "knife") radiation.

1.AJ.27.JX using focused beam [e.g. gamma knife, cyber knife stereotactic radiosurgery]

1.AJ.53.^ ^ Implantation of internal device, cerebellum**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Implantation, electrode, cerebellum

Code Also: Any intraoperative stereotactic guidance (see [3.AN.94.^ ^](#))

1.AJ.53.SE-JA of electrode using open approach with burr hole technique

1.AJ.55.^ ^ Removal of device, cerebellum**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Code Also: Any intraoperative stereotactic guidance (see [3.AN.94.^ ^](#))

1.AJ.55.SE-JA of electrode using open approach with burr hole technique

1.AJ.87.^ ^ Excision partial, cerebellum**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

- Includes:** Corticectomy, cerebellar
Debulking [neoplasm], cerebellum
Resection [neoplasm, cyst], cerebellum
Resection, posterior fossa [neoplasm], cerebellum
- Excludes:** Resection of posterior fossa neoplasm involving cerebellum but extending into 4th ventricle (see [1.AC.87.^](#))
Resection of posterior fossa neoplasm involving cerebellum but extending into brain stem (see [1.AP.87.^](#))
Resection of posterior fossa neoplasm involving cerebellum but extending into cerebellopontine angle (see [1.AK.87.^](#))
- Code Also:** Any intraoperative stereotactic guidance (see [3.AN.94.^](#))
Any robotic assisted telemanipulation of tools (see [7.SF.14.^](#))
- Note:** Use this code for posterior fossa neoplasm arising in but not extending beyond the cerebellum. See exclusion notes to determine the most appropriate code when multiple sites are involved. (Use only one code to identify a posterior fossa resection. The order of precedence is: brain stem involvement, ventricle involvement, cerebellopontine angle involvement, cerebellum involvement.)

1.AJ.87.^ Excision partial, cerebellum	endoscopic approach	open [craniotomy flap] approach	burr hole technique
with device NEC	1.AJ.87.DA-GX	1.AJ.87.SZ-GX	1.AJ.87.SE-GX
with laser	1.AJ.87.DA-AG	1.AJ.87.SZ-AG	1.AJ.87.SE-AG
with ultrasonic aspirator [e.g. CUSA]	1.AJ.87.DA-AZ	1.AJ.87.SZ-AZ	1.AJ.87.SE-AZ

1.AK.^.^ Therapeutic Interventions on the Cerebellopontine Angle

- Includes:** Acoustic (vestibular) nerve within the cerebellopontine angle
Choroid plexus of cerebellopontine angle
Cisterna
Facial nerve (intracranial) within the cerebellopontine angle

1.AK.87.^ Excision partial, cerebellopontine angle

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

S 4

- Includes:** Debulking [neoplasm], cerebellopontine angle
Resection [neoplasm], cerebellopontine angle
Resection, posterior fossa [neoplasm], cerebellopontine angle
- Excludes:** Resection of posterior fossa neoplasm involving cerebellopontine angle but extending into brain stem (see [1.AP.87.^](#))
Resection of posterior fossa neoplasm involving cerebellopontine angle but extending into ventricle (see [1.AC.87.^](#))
- Code Also:** Any robotic assisted telemanipulation of tools (see [7.SF.14.^](#))
- Note:** Use this code for posterior fossa neoplasm arising or extending into the cerebellopontine angle. (This may involve neuromas arising from the vestibular [or facial] nerve and extending into the cerebellopontine angle). See exclusion notes to determine the most appropriate code when multiple sites are involved. (Use only one code to identify a posterior fossa resection. The order of precedence is: brain stem involvement, ventricle involvement, cerebellopontine angle involvement, cerebellum involvement.)

1.AK.87.^ Excision partial, cerebellopontine angle	open craniotomy [or craniectomy] approach [e.g. suboccipital, midfossa, temporal]	open translabyrinthine approach [with or without additional craniotomy flap]
with device NEC	1.AK.87.SZ-GX	1.AK.87.QQ-GX
with laser	1.AK.87.SZ-AG	1.AK.87.QQ-AG
with ultrasonic aspirator [e.g. CUSA]	1.AK.87.SZ-AZ	1.AK.87.QQ-AZ

1.AN.^.^ Therapeutic Interventions on the Brain

- Includes:** Ansa
Brain NEC
Cingulate cortex
Cingulum
Corpus callosum
Lobes of brain: parietal, occipital, frontal and temporal
Septum pellucidum

1.AN.09.^ Stimulation, brain

L 87

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 87	Optional	Brain lobes 2	Location	F	Frontal lobe
				M	Multiple (overlapping) lobes
				O	Occipital lobe
				P	Parietal lobe
				T	Temporal lobe
				Z U	Other NEC (e.g. corpus callosum) or unspecified

Includes: Activation, stimulation system (previously) implanted in brain/ cerebellum
 Stimulation, lobes of brain (e.g. that for pain control)
 Stimulation, transcranial magnetic (TMS)
 Therapy, electroconvulsive
 Therapy, electroshock

Excludes: Implantation of electrodes, within brain (see [1.AN.53.^^](#))
 Implantation of electrodes, within cerebellum (see [1.AJ.53.^^](#))

1.AN.09.HA-X7 using percutaneous chemical stimulation
 1.AN.09.JA-DV using external electrical stimulation (for shock or convulsion)
 1.AN.09.JA-ED using external manual activation (of implant)
 1.AN.09.JA-LZ using external application of magnetic coil (for TMS)
 1.AN.09.JA-QQ using remote radio transmitter activation (of implant)

1.AN.26.^^ Brachytherapy, brain

S 35 **L** 1

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 35	Optional	Implant Status	Status	P M	Permanent implant – Radioactive source left in place permanently
				T M	Temporary implant – Radioactive source removed after course of treatment is complete
L 1	Optional	Brain lobes	Location	F	Frontal lobe
				M	Multiple (overlapping) lobes
				O	Occipital lobe
				P	Parietal lobe
				T	Temporal lobe
				Z	Other NEC (e.g. corpus callosum)

Includes: Endocurietherapy, brain
 Implantation of radioactive material, brain (any site)
 that using interstitial radiation implants (e.g. iodine 125, iridium 192)

Code Also: Any concomitant implantation of brachytherapy applicators or conduits (e.g. needles, catheters) to gain access to treatment site (see [1.AN.53.^^](#))
 Any intraoperative stereotactic guidance (see [3.AN.94.^^](#))

Note: There are typically two distinct phases required to complete the process of brachytherapy. The first phase involves the insertion of non-radioactive applicators or conduits (e.g. hollow needles, catheters, stents, etc.) that receive or transmit the radioactive material into the body. The second phase involves the loading of the radioactive material (e.g. seeds, pellets, wires, etc.) into the applicator or conduit.

1.AN.26.HA using percutaneous (transcatheter or transneedle) approach
 1.AN.26.SZ using craniotomy (or craniectomy) approach

1.AN.27.^ ^ Radiation, brain

Includes:	Fractionated stereotactic radiotherapy, brain (any site) Irradiation, brain Radiosurgery (stereotactic), brain Radiotherapy, brain Teletherapy, brain Therapy, radiation, brain
Excludes:	Destruction (lesion) using radiofrequency probe through a cranial incision (see 1.AN.59.^ ^) Intracranial radiosurgery for arteriovenous malformation (AVM) of the brain (see 1.JW.27.^ ^) Radiosurgery, brain stem (see 1.AP.27.^ ^) Radiosurgery, cerebellum (see 1.AJ.27.^ ^) Radiosurgery, pineal gland (see 1.AG.27.^ ^) Radiosurgery, pituitary region (see 1.AF.27.^ ^) Radiosurgery, thalamus (see 1.AE.27.^ ^) Radiosurgery, ventricles (see 1.AC.27.^ ^)
Note:	May involve use of a stereotactical frame for positioning during delivery of external focused beam (or gamma "knife") radiation.
1.AN.27.JA	using external beam [for teletherapy NEC]
1.AN.27.JX	using focused beam [e.g. gamma knife, cyber knife stereotactic radiosurgery]

1.AN.35.^ ^ Pharmacotherapy (local), brain

Includes:	Instillation, pharmaceutical agent(s), brain that by previously inserted catheter that into brain cyst or tumor
Excludes:	Irrigation of previously inserted catheter (see 1.AN.54.^ ^) Systemic pharmacotherapy (see 1.ZZ.35.^ ^)
Code Also:	Any insertion of catheter for infusion (see 1.AN.53.^ ^)
1.AN.35.HH-M0	using antineoplastic agent and percutaneous transcatheter approach
1.AN.35.SZ-M1	using alkylating agent [e.g. carmustine] and open approach with craniotomy flap technique
	Includes: Brain wafer (implantable) chemotherapy

1.AN.52.^ Drainage, brain**S** 5 **L** 1

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 1	Optional	Brain lobes	Location	F	Frontal lobe
				M	Multiple (overlapping) lobes
				O	Occipital lobe
				P	Parietal lobe
				T	Temporal lobe
				Z	Other NEC (e.g. corpus callosum)

Includes: Aspiration [abscess, cyst, hematoma], brain
Marsupialization [cyst], brain

Excludes: Aspiration and management of (cyst) reservoir system, pituitary region (see [1.AF.54.^](#))
Debridement [abscess, hematoma], brain (see [1.AN.87.^](#))
Enucleation [cyst], brain (see [1.AN.87.^](#))

Code Also: Any robotic telemanipulation of tools (see [7.SF.14.^](#))

1.AN.52.^ Drainage, brain	endoscopic approach	burr hole approach	open craniotomy flap technique
drainage alone [without catheter in situ]	1.AN.52.DA	1.AN.52.SE	1.AN.52.SZ
leaving drainage tube [catheter] in situ	1.AN.52.DA-TS	1.AN.52.SE-TS	1.AN.52.SZ-TS

1.AN.53.^ Implantation of internal device, brain**S** 4 **L** 1

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 1	Optional	Brain lobes	Location	F	Frontal lobe
				M	Multiple (overlapping) lobes
				O	Occipital lobe
				P	Parietal lobe
				T	Temporal lobe
				Z	Other NEC (e.g. corpus callosum)

- Includes:** Implantation, brachytherapy applicator, brain (any site)
 Implantation, catheter, brain [for chemical palliative infusion e.g. Ommaya reservoir]
 Implantation, electrode, brain
 Implantation, electrode, subdural
 Implantation, pressure measuring/ monitoring device, intraparenchymal
- Excludes:** Implantation, catheter, spinal canal and meninges (see [1.AX.53.^^](#))
 Implantation, catheter, ventricles of brain (see [1.AC.53.^^](#))
 Implantation, pressure measuring device, intraventricular (see [1.AC.53.^^](#))
 Insertion of electrodes into brain for (diagnostic) electrophysiological measurement (see [2.AN.24.^^](#))
 Insertion of reservoir system, pituitary region (for craniopharyngioma cyst) (see [1.AF.53.^^](#))
- Code Also:** Any concomitant loading of brachytherapy applicator (see [1.AN.26.^^](#))
 Any intraoperative stereotactic or computer guidance (see [3.AN.94.^^](#))

1.AN.53.^^ Implantation of internal device, brain	burr hole technique for access	craniotomy [or craniectomy] flap technique for access
of [semipermeable] catheter [e.g. for chemical palliative infusion]	1.AN.53.SE-FT	1.AN.53.SZ-FT
of brachytherapy applicator	1.AN.53.SE-EM	1.AN.53.SZ-EM
of electrodes [e.g. recording, stimulating]	1.AN.53.SE-JA Includes: • Epidural motor cortex stimulation (MCS) electrodes	1.AN.53.SZ-JA Includes: • Epidural motor cortex stimulation (MCS) electrodes
of pressure measuring/ monitoring device	1.AN.53.SE-PL	1.AN.53.SZ-PL

1.AN.54.^^ Management of internal device, brain

S 4 **L** 1

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 1	Optional	Brain lobes	Location	F	Frontal lobe
				M	Multiple (overlapping) lobes
				O	Occipital lobe
				P	Parietal lobe
				T	Temporal lobe
				Z	Other NEC (e.g. corpus callosum)

- Excludes:** Aspiration and maintenance of reservoir system, pituitary region (for craniopharyngioma cyst) (see [1.AF.54.^^](#))

1.AN.54.^ Management of internal device, brain	using external approach	using burr hole approach	using craniotomy/craniectomy approach
of electrodes [e.g. recording, stimulating]	—	1.AN.54.SE-JA	1.AN.54.SZ-JA
of pressure measuring/monitoring device	1.AN.54.JA-PL Includes: • Adjustment by external magnetic impulse	1.AN.54.SE-PL	1.AN.54.SZ-PL
of semipermeable catheter	1.AN.54.JA-FT	—	—

1.AN.55.^ Removal of device, brain**S 4 L 1**

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 1	Optional	Brain lobes	Location	F	Frontal lobe
				M	Multiple (overlapping) lobes
				O	Occipital lobe
				P	Parietal lobe
				T	Temporal lobe
				Z	Other NEC (e.g. corpus callosum)

Excludes: Removal of reservoir system, pituitary region (for craniopharyngioma cyst) (see [1.AF.55.^](#))

Code Also: Any intraoperative stereotactic guidance (see [3.AN.94.^](#))

1.AN.55.^ Removal of device, brain	burr hole technique for access	craniotomy or craniectomy [flap] technique for access
of [semipermeable] catheter [e.g. for chemical palliative infusion]	1.AN.55.SE-FT	1.AN.55.SZ-FT
of electrodes [e.g. recording, stimulating]	1.AN.55.SE-JA	1.AN.55.SZ-JA
of pressure measuring/ monitoring device	1.AN.55.SE-PL	1.AN.55.SZ-PL
of radioactive material	1.AN.55.SE-EB	1.AN.55.SZ-EB

1.AN.56.^ Removal of foreign body, brain**S** 4 **L** 1

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 1	Optional	Brain lobes	Location	F	Frontal lobe
				M	Multiple (overlapping) lobes
				O	Occipital lobe
				P	Parietal lobe
				T	Temporal lobe
				Z	Other NEC (e.g. corpus callosum)

Includes: Removal of foreign body, intracranium**Code Also:** Any intraoperative stereotactic guidance (see [3.AN.94.^](#))**Note:** May involve aspiration and debridement as necessary with removal of foreign body

1.AN.56.SZ using open approach with craniotomy [craniectomy] flap technique for access

1.AN.59.^ Destruction, brain**S** 4 **L** 1

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 1	Optional	Brain lobes	Location	F	Frontal lobe
				M	Multiple (overlapping) lobes
				O	Occipital lobe
				P	Parietal lobe
				T	Temporal lobe
				Z	Other NEC (e.g. corpus callosum)

Includes:

- Amygdalohippocampotomy
- Callosotomy
- Cingulotomy
- Leucotomy, limbic [fronto medial]
- Lobotomy
- Psychosurgery NOS

Excludes: Stereotactic radiosurgery, brain [lobes] (see [1.AN.27.^^](#))
that by radiosurgery (or gamma "knife") technique (see [1.AN.27.^^](#))
Tractotomy (see [1.AP.59.^^](#))
Tractotomy, mesencephalic (see [1.AP.59.^^](#))
Use of external focused beam (or "gamma" knife) radiation (see [1.AN.27.^^](#))

Code Also: Any intraoperative stereotactic guidance (see [3.AN.94.^^](#))

1.AN.59.^^ Destruction, brain	burr hole technique for access	craniotomy [or craniectomy] flap technique for access
with chemical cautery [e.g. alcohol]	1.AN.59.SE-X7	1.AN.59.SZ-X7
with device NEC	1.AN.59.SE-GX	1.AN.59.SZ-GX
with laser	1.AN.59.SE-AG Includes: • Laser interstitial thermal therapy [LITT]	1.AN.59.SZ-AG Includes: • Laser interstitial thermal therapy [LITT]
with radiofrequency probe	1.AN.59.SE-AW	1.AN.59.SZ-AW

1.AN.70.^^ Incision NOS, brain

1.AN.70.JA-AZ using transcranial focused ultrasonic pulse
Includes: Opening blood brain barrier by ultrasonic pulse disruption
Code Also: Any concomitant brain lesioning (see [1.AN.59.^^](#))
Any concomitant delivery of medication to the brain (see [1.AN.35.^^](#))
Any magnetic resonance image (MRI) guidance (see [3.AN.40.^^](#))

1.AN.70.LA using open approach

1.AN.73.^^ Reduction, brain

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Closure, encephalocele, brain
Repair, encephalocele, brain

Code Also: Any concomitant cranioplasty using bone graft or flap (see [1.EA.80.^^](#))

Note: May involve excision of encephalocele [or replacement of vital neural tissue within brain, wherever possible] and repair of the dura.

1.AN.73.QP using combined transcranial and transnasal approach
1.AN.73.QR using transmastoid approach
1.AN.73.SZ using open approach with craniotomy [craniectomy] flap technique for access

1.AN.87.^ ^ Excision partial, brain**S** 6 **L** 1

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 6	Optional	Tx Status 2	Status	A	Abandoned after onset
				R	Revision (return to same site to debride abscess, not planned)
				S	Staged (resection completed over 2 separate operative episodes)
L 1	Optional	Brain lobes	Location	F	Frontal lobe
				M	Multiple (overlapping) lobes
				O	Occipital lobe
				P	Parietal lobe
				T	Temporal lobe
				Z	Other NEC (e.g. corpus callosum)

Includes: Amygdalohippocampectomy
Debridement, brain
Debulking [neoplasm], brain
Hemispherectomy, brain
Lobectomy, brain
Lysis, cortical [adhesions]
Resection [cyst, hematoma, neoplasm], brain

Excludes: Excision [neoplasm], brain with orbital osteotomy, transoral maxillectomy, or craniectomy requiring concomitant craniofacial reconstruction (see [1.EA.92.^ ^](#))
Resection [neoplasm], brain involving cranial base (see [1.EA.92.^ ^](#))
Resection [neoplasm], cranial base (see [1.EA.92.^ ^](#))
Resection, craniopharyngioma (see [1.AF.87.^ ^](#))
that involving cranium and requiring a radical excision of cranium and neural tissue to eradicate neoplasm (see [1.EA.92.^ ^](#))

Code Also: Any concomitant duraplasty (patch grafting) (see [1.AA.80.^ ^](#))
Any intraoperative stereotactic guidance (see [3.AN.94.^ ^](#))
Any robotic assisted telemanipulation of tools (see [7.SF.14.^ ^](#))

1.AN.87.^ ^ Excision partial, brain	burr hole technique for access	craniotomy [or craniectomy] flap technique for access
with device NEC	1.AN.87.SE-GX	1.AN.87.SZ-GX
with laser	1.AN.87.SE-AG	1.AN.87.SZ-AG
with ultrasonic aspirator [e.g. CUSA]	1.AN.87.SE-AZ	1.AN.87.SZ-AZ

1.AP.^.^ Therapeutic Interventions on the Brain Stem

Includes: Cerebral peduncle
Chiari malformations of brain stem [hindbrain]
Medulla oblongata
Mesencephalon
Midbrain
Pons
Tectal plate

1.AP.09.^.^ Stimulation, brain stem

1.AP.09.JA-ED	using external manual activation
1.AP.09.JA-QQ	using remote radiotransmitter

1.AP.27.^.^ Radiation, brain stem

Includes: Radiosurgery, brain stem

Excludes: Destruction (lesion) using radiofrequency probe through cranial incision (see [1.AP.59.^.](#))
Fractionated stereotactic radiotherapy, brain stem (see [1.AN.27.^.](#))
Radiation therapy not using focused beam radiation (see [1.AN.27.^.](#))

Note: Involves the use of a stereotactical frame for positioning during delivery of external focused beam (or gamma "knife") radiation.

1.AP.27.JX	using focused beam [e.g. gamma knife, cyber knife stereotactic radiosurgery]
------------	--

1.AP.52.^.^ Drainage, brain stem**S**⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes:	Replacement of entire shunt system, brain stem Shunt, syringoatrial, syringosubarachnoid, syringopleural, syringoperitoneal Shunt, syrx [for continuous drainage]
Excludes:	Partial "revision" for maintenance of syringo shunt system (see 1.AP.54.^) Puncture, subarachnoid (for temporary drainage), using drainage catheter to skin (see 1.AB.52.^)
Code Also:	Any concomitant removal of old syringo shunt system of brain stem (see 1.AP.55.^)
1.AP.52.ME-SJ	using shunt system terminating in abdominal cavity [e.g. syringoperitoneal]
1.AP.52.MF-SJ	using shunt system terminating in circulatory system [e.g. syringoatrial]
1.AP.52.MJ-SJ	using shunt system terminating in head and neck [e.g. syringosubarachnoid]
1.AP.52.MQ-SJ	using shunt system terminating in thoracic cavity [e.g. syringopleural]

1.AP.53.^ Implantation of internal device, brain stem**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes:	Implantation, catheter, brain stem [for chemical palliative infusion] Implantation, electrode, brain stem
Excludes:	Implantation of radioactive material [for brachytherapy] (see 1.AN.26.^)
Code Also:	Any intraoperative stereotactic guidance (see 3.AN.94.^)

1.AP.53.^ Implantation of internal device, brain stem	burr hole technique for access	craniotomy [or craniectomy] flap technique for access
of [semipermeable] catheter [e.g. for chemical palliative infusion]	1.AP.53.SE-FT	1.AP.53.SZ-FT
of electrodes [e.g. recording, stimulating]	1.AP.53.SE-JA	1.AP.53.SZ-JA

1.AP.54.^ Management of internal device, brain stem

Includes:	Irrigation or adjustment of syringo shunt system of brain stem Maintenance of syringo shunt system of brain system Partial revision, syringo shunt system of brain stem
Excludes:	Complete removal with replacement of a new shunt system (see 1.AP.52.^)
Note:	May involve adding, changing, repositioning or lengthening catheters; aspirating reservoirs; changing valves or correcting valve configurations.
1.AP.54.ME-SJ	of shunt system terminating in abdominal cavity (e.g. syringoperitoneal)
1.AP.54.MF-SJ	of shunt system terminating in circulatory system (e.g. syringoatrial)
1.AP.54.MJ-SJ	of shunt system terminating in head and neck (e.g. syringosubarachnoid)
1.AP.54.MQ-SJ	of shunt system terminating in thoracic cavity (e.g. syringopleural)

1.AP.55.^.^ Removal of device, brain stem**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Removal of syringo shunt system, brain stem

Code Also: Any intraoperative stereotactic guidance (see [3.AN.94.^.^](#))

1.AP.55.^.^ Removal of device, brain stem	burr hole technique for access	craniotomy [or craniectomy] flap technique for access
of [semipermeable] catheter [e.g. for chemical palliative infusion]	1.AP.55.SE-FT	1.AP.55.SZ-FT
of electrodes [e.g. recording, stimulating]	1.AP.55.SE-JA	1.AP.55.SZ-JA
of shunt catheter system	1.AP.55.SE-SJ	1.AP.55.SZ-SJ

1.AP.59.^.^ Destruction, brain stem**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Tractotomy NOS
Tractotomy, mesencephalic
Tractotomy, spinothalamic

Excludes: Stereotactic radiosurgery, brain stem (see [1.AP.27.^.^](#))
Use of external focused beam (or "gamma" knife) radiation (see [1.AP.27.^.^](#))

Code Also: Any intraoperative stereotactic guidance (see [3.AN.94.^.^](#))
Any robotic assisted telemanipulation of tools (see [7.SF.14.^.^](#))

1.AP.59.^.^ Destruction, brain stem	burr hole technique for access	craniotomy [or craniectomy] flap technique for access
with chemical cautery [e.g. alcohol]	1.AP.59.SE-X7	1.AP.59.SZ-X7
with device NEC	1.AP.59.SE-GX	1.AP.59.SZ-GX
with laser	1.AP.59.SE-AG Includes: • Laser interstitial thermal therapy [LITT]	1.AP.59.SZ-AG Includes: • Laser interstitial thermal therapy [LITT]
with radiofrequency probe	1.AP.59.SE-AW	1.AP.59.SZ-AW

1.AP.72.^ ^ Release, brain stem**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes:

Correction, Chiari malformation, brain stem
 Craniectomy, posterior fossa [for decompression of brain stem]
 Craniectomy, suboccipital [for decompression of brain stem]
 Decompression, brain stem [in Chiari malformation]

Code Also:

Any concomitant cervical laminectomy [C3-C7] (see [1.SC.80.^ ^](#))
 Any concomitant duraplasty (see [1.AA.80.^ ^](#))
 Any concomitant laminectomy of atlas, axis [C1-C2 with or without C3] (see [1.SA.80.^ ^](#))
 Any insertion of stent, foramen of Magendie (see [1.AC.50.^ ^](#))
 Any intraoperative stereotactic guidance (see [3.AN.94.^ ^](#))
 Any robotic assisted telemanipulation of tools (see [7.SF.14.^ ^](#))

1.AP.72.QT using transoral approach
 1.AP.72.SE using burr hole approach
 1.AP.72.SZ using craniotomy [or craniectomy] flap technique for access

1.AP.87.^ ^ Excision partial, brain stem**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes:

Debulking [neoplasm], brain stem
 Resection [neoplasm, cyst], brain stem
 Resection, posterior fossa [neoplasm], brain stem

Code Also:

Any intraoperative stereotactic guidance (see [3.AN.94.^ ^](#))
 Any robotic assisted telemanipulation of tools (see [7.SF.14.^ ^](#))

Note:

Use this code for resection of a posterior fossa neoplasm that involves the brain stem. Although the neoplasm may involve multiple sites [e.g. cerebellum, cerebellopontine angle, ventricle] select this code if brain stem is in any way involved.

1.AP.87.^ ^ Excision partial, brain stem	burr hole technique for access	open craniotomy [or craniectomy] flap technique for access	open transcervical approach for access
with device NEC	1.AP.87.SE-GX	1.AP.87.SZ-GX	1.AP.87.LP-GX
with laser	1.AP.87.SE-AG	1.AP.87.SZ-AG	1.AP.87.LP-AG
with ultrasonic aspirator [e.g. CUSA]	1.AP.87.SE-AZ	1.AP.87.SZ-AZ	1.AP.87.LP-AZ

1.AW.^^.^^ Therapeutic Interventions on the Spinal Cord

Includes:	Cauda equina Cervical and thoracic spinal cord Conus medullaris Intramedullary spine Spinal nerve NEC Spinal nerve roots
Excludes:	Brachial plexus (see 1.BG.^^.^^) Cerebral Spinal Fluid [CSF] of spine (see 1.AX.^^.^^) Cervical plexus (see 1.BB.^^.^^) Dura of spinal cord (see 1.AX.^^.^^) Epidural (or extradural) space of spine (see 1.AX.^^.^^) Lumbar plexus (see 1.BS.^^.^^) Meninges of spinal cord (see 1.AX.^^.^^) Spinal canal (see 1.AX.^^.^^) Spinal nerves C2, C3 and C4 (see 1.BB.^^.^^) Spinal nerves: C5, C6, C7 and T1 (see 1.BG.^^.^^) Spinal theca (see 1.AX.^^.^^) Subarachnoid space of spine (see 1.AX.^^.^^) Subdural spine (see 1.AX.^^.^^) Transverse [superficial] cervical nerve (see 1.BB.^^.^^)

1.AW.09.^^ Stimulation, spinal cord

Includes:	Activation of implanted stimulator
Excludes:	Implantation of stimulating device (see 1.AX.53.^^)
1.AW.09.HA-X7	using percutaneous injection of chemical agent NEC
1.AW.09.JA-ED	using external manual activation
1.AW.09.JA-QQ	using remote radio transmitter

1.AW.27.^^ Radiation, spinal cord

Includes:	Radiosurgery (stereotactic), spinal cord Radiotherapy, spinal cord Teletherapy, spinal cord Therapy, radiation, spinal cord
Excludes:	Destruction (lesion) using radiofrequency probe through incision (see 1.AW.59.^^)
Note:	May involve use of a stereotactical frame for positioning during the delivery of external focused beam (or gamma "knife") radiation.
1.AW.27.JA	using external beam [for teletherapy NEC]
1.AW.27.JX	using focused beam [e.g. gamma knife, cyber knife stereotactic radiosurgery]

1.AW.59.^ Destruction, spinal cord**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes:

- Chordotomy
- Commissurotomy, midline
- Cordotomy
- Creation, lesion, spinal cord, [e.g. at dorsal root entry zone: DREZ]
- Denervation, spinal nerve (dorsal rami or ganglion) to sacroiliac joint
- Myelotomy [midline]
- Radiofrequency ablation/neurotomy, spinal nerve (dorsal ramus and branches to sacroiliac joint)
- Rhizotomy, spinal cord (dorsal rami or ganglion) (nerve roots)

Excludes:

- Denervation, facet joint(s) [C3-C7] (see [1.SC.59.^](#))
- Denervation, facet joint(s) of atlas, axis [C1-C2] with C3 alone (see [1.SA.59.^](#))
- Denervation, facet joint(s) sacroiliac (see [1.SC.59.^](#))
- Stereotactic radiosurgery, spinal cord (see [1.AW.27.^](#))
- Use of external focused beam (or "gamma" knife) radiation (see [1.AW.27.^](#))

Code Also:

- Any concomitant laminectomy (see [1.SC.80.^](#))
- Any concomitant laminectomy of atlas, axis [C1-C2 with or without C3] (see [1.SA.80.^](#))
- Any concomitant laminectomy with bone graft (see [1.SC.75.^](#))
- Any concomitant laminectomy with instrumentation (see [1.SC.74.^](#))
- Any intraoperative microscope assistance (see [3.AW.94.^](#))
- Any intraoperative stereotactic guidance (see [3.AW.94.^](#))

Note: Involves destroying a part of the spinal cord by incising or creating a lesion (for pain management).

1.AW.59.^ Destruction, spinal cord	open approach	percutaneous approach
using chemical cautery agent [e.g. glycerol]	—	1.AW.59.HA-X7
using dorsal root entry zone lesion [creation] technique	1.AW.59.WK Includes: • Lesions may be created at multiple segment levels of spinal cord along DREZ	—
using midline incision technique	1.AW.59.LA	—
using radiofrequency probe	—	1.AW.59.HA-AW

1.AW.72.^ ^ Release, spinal cord**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Decompression, spinal cord or nerve root requiring incision (damage) to dura to effect release
 Division [tethered], spinal cord
 Excision [of lipomatous mass] with untethering of spinal cord
 Lysis [adhesions], spinal cord
 Removal of bone fragments from spinal cord or spinal nerve roots
 Repair, lipomyelomeningocele
 Repair, meningocele [or lipomyelomeningocele] of spine

Excludes: Repair, myelomeningocele (see [1.AX.73.^ ^](#))

Code Also: Any concomitant discectomy (see [1.SE.87.^ ^](#))
 Any concomitant dural grafting required for closure (see [1.AX.80.^ ^](#))
 Any concomitant laminectomy or foraminotomy (see [1.SC.80.^ ^](#))
 Any concomitant laminectomy with bone graft (see [1.SC.75.^ ^](#))
 Any concomitant laminectomy with instrumentation (see [1.SC.74.^ ^](#))
 Any intraoperative fluoroscopy for guidance (see [3.SC.12.^ ^](#))

Note: Involves removing bony spicules or [adherent] ligament compressing spinal cord or nerve roots, during which the dura must be damaged (breached) to effect this release. Or involves the untethering of the spinal cord with or without removal of lipomatous mass [e.g. lipomyelomeningocele, dermoid cyst or sinus].

1.AW.72.^ ^ Release, spinal cord	endoscopic approach [e.g. myeloscopy]	open approach

1.AX.^^.^^ Therapeutic Interventions on the Spinal Canal and Meninges

- Includes:** Cerebral Spinal Fluid (CSF) of spine
Dura of spinal cord
Epidural (or extradural) space of spine
Meninges of spinal cord
Spinal theca
Subarachnoid (and subdural) space of spine
- Excludes:** Intramedullary spine (see [1.AW.^^.^^](#))

1.AX.11.^^ Anesthetization, spinal canal and meninges

- Includes:** Anesthesia operative, epidural
Anesthesia, intraspinal (caudal, intrathecal)
Anesthesia, spinal NOS
Block, subarachnoid, spinal sensory nerves and spinal cord
- Excludes:** Administration of analgesics intraspinally (see [1.AX.35.^^](#))
Epidural anesthesia during labour (see [5.LD.20.^^](#))
that for pain control [postoperative or chronic] (see [1.AX.35.^^](#))

1.AX.11.HA-P1 using percutaneous (needle) injection of local anesthetic agent

1.AX.13.^ ^ Control of bleeding, spinal canal and meninges**E** 53

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 53	Mandatory	Mandatory Coils	Extent	0	Not applicable (no coil used)
				01	One coil
				02	Two coils
				03	Three coils
				04	Four coils
				05	Five coils
				06	Six coils
				07	Seven coils
				08	Eight coils
				09	Nine coils
				10	Ten coils
				G	More than ten coils (11 - 20)
				H	More than twenty coils
				U	Unspecified

Includes: Embolization, spinal cord
Intraarterial embolization

Excludes: Systemic pharmacotherapy for control of bleeding (see [1.ZZ.35.^ ^](#))

1.AX.13.GP-C2	using percutaneous transluminal (catheter) injection of antihemorrhagic agent
	Includes: using aminocaproic acid, aprotinin, phytonadione, thrombin, coagulation factor VIII
1.AX.13.GP-GE	using percutaneous transluminal (catheter) approach and [detachable] coils
1.AX.13.HA-C2	using percutaneous (needle) injection of antihemorrhagic agent (e.g. intraspinal)
	Includes: aminocaproic acid, aprotinin, phytonadione, thrombin, coagulation factor VIII

1.AX.35.^ ^ Pharmacotherapy (local), spinal canal and meninges

Includes: Administration, pharmaceutical agent(s), intrathecal spine (for pain control)
Chemotherapy, spinal cord NOS
Injection, epidural (steroid)
Instillation, spinal canal and meninges
Medial branch block (to) spinal nerve
Medial nerve branch block, spinal canal
Perfusion, spinal canal and meninges
that via previously implanted catheter, reservoir, or infusion pump system

Excludes: Facet joint injection (see [1.SC.35.^](#))
Injection, spinal vertebrae (see [1.SC.35.^](#))
Irrigation of previously installed catheter/shunt (see [1.AX.54.^](#))
Systemic pharmacotherapy (see [1.ZZ.35.^](#))
that for control of bleeding (see [1.AX.13.^](#))
that for operative anesthesia, spinal cord (see [1.AX.11.^](#))

Code Also: Any insertion of intrathecal or epidural catheter, reservoir, or infusion pump system (see [1.AX.53.^](#))

1.AX.35.^ Pharmacotherapy (local), spinal canal and meninges	percutaneous [needle] approach	percutaneous transcatheter approach
using antithrombotic agent	1.AX.35.HA-C1 Includes: • warfarin, heparin, enoxaparin, dipyridamole, glycoprotein (GP), eptifibatide	1.AX.35.HH-C1 Includes: • warfarin, heparin, enoxaparin, dipyridamole, glycoprotein (GP), eptifibatide
using thrombolytic agent	1.AX.35.HA-1C Includes: • anistreplase, alteplase, reteplase, streptokinase, tenecteplase, TNKase (TNK), tissue plasminogen activator (tPA), urokinase	1.AX.35.HH-1C Includes: • anistreplase, alteplase, reteplase, streptokinase, tenecteplase, TNKase (TNK), tissue plasminogen activator (tPA), urokinase
using antiinfective agent NEC	1.AX.35.HA-K0	1.AX.35.HH-K0
using antineoplastic agent NEC	1.AX.35.HA-M0	1.AX.35.HH-M0
using nervous system agent NEC	1.AX.35.HA-P0	1.AX.35.HH-P0
using anesthetic agent	1.AX.35.HA-P1	1.AX.35.HH-P1
using analgesic agent	1.AX.35.HA-P2	1.AX.35.HH-P2
using corticosteroid agent	1.AX.35.HA-J2	1.AX.35.HH-J2
using hypnotic or sedative agent	1.AX.35.HA-P7 Includes: • barbiturates (e.g. secobarbital, pentobarbital), chloral hydrate, benzodiazepines (e.g. flurazepam, midazolam), zopiclone	1.AX.35.HH-P7 Includes: • barbiturates (e.g. secobarbital, pentobarbital), chloral hydrate, benzodiazepines (e.g. flurazepam, midazolam), zopiclone
using other pharmacological agent NEC	1.AX.35.HA-T9	1.AX.35.HH-T9

1.AX.52.^ Drainage, spinal canal and meninges

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

- Includes:** Drainage [abscess, hematoma], epidural, spine
 Drainage [abscess, hematoma], meninges of spine
 Drainage [abscess, hematoma], subdural, spine
 Evacuation [abscess, hematoma], spinal meninges
 Replacement of entire shunt system, spinal canal and meninges
 Shunt, lumboperitoneal
 Shunt, pleurothecal
 Shunt, spinal theca [for continuous drainage of CSF]
- Excludes:** Partial "revision" for maintenance of thecal shunt system (e.g. lumboperitoneal, pleurothecal) (see [1.AX.54.^^](#))
 Shunt, syringopleural, peritoneal, atrial] (see [1.AP.52.^^](#))
 Shunt, ventricular (see [1.AC.52.^^](#))
- Code Also:** Any concomitant removal of old thecal shunt system of spinal cord and meninges (see [1.AX.55.^^](#))

1.AX.52.^^ Drainage, spinal canal and meninges	open approach	percutaneous [needle] approach
drainage without shunt or catheter left in situ	1.AX.52.LA	1.AX.52.HA
catheter (shunt) terminating at skin [e.g. temporary external drainage]	1.AX.52.MB-TS	1.AX.52.HA-TS
shunt terminating in abdominal cavity [e.g. lumboperitoneal shunt]	1.AX.52.ME-SJ	—
shunt terminating in thoracic cavity [e.g. pleurothecal shunt]	1.AX.52.MQ-SJ	—

1.AX.53.^^ Implantation of internal device, spinal canal and meninges

S⁹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 9	Optional	Tx Status 4	Status	A	Abandoned after onset
				S	Staged

- Includes:** Implantation, catheter, spinal canal [for chemical palliative infusion e.g. Ommaya reservoir]
 Implantation, chemical [antineoplastic] reservoir, spinal canal
 Implantation, neurostimulator, spinal canal
- Excludes:** Implantation, catheter, ventricles of brain (see [1.AC.53.^^](#))
 Insertion, drainage catheter, spinal canal (see [1.AX.52.^^](#))
 Replacement of device within existing subcutaneous pocket (see [1.YY.54.^^](#))
 Second stage creation of subcutaneous pocket for implantation of device within pocket (see [1.YY.53.^^](#))
- Code Also:** Any intraoperative microscope assistance (see [3.AW.94.^^](#))
 Any intraoperative stereotactic guidance (see [3.AW.94.^^](#))

1.AX.53.^ Implantation of internal device, spinal canal and meninges	endoscopic approach	open approach	percutaneous approach (transcatheter)
of catheter (includes creation of reservoir)	1.AX.53.DA-FT	1.AX.53.LA-FT	1.AX.53.HH-FT
of infusion pump	—	1.AX.53.LA-QK	—
of neurostimulator device	1.AX.53.DA-DV	1.AX.53.LA-DV	—
of pressure measuring device	1.AX.53.DA-PL	1.AX.53.LA-PL	—

1.AX.54.^ Management of internal device, spinal canal and meninges

- Includes:** Adjustment of device position, spinal canal and meninges
 Irrigation of device, spinal canal and meninges
 Lengthening, shunt catheter, spinal canal and meninges
 Maintenance, shunt system, spinal canal and meninges
 Partial revision, (thecal) shunt system, spinal canal and meninges
 Repositioning, shunt catheter, spinal canal and meninges
- Excludes:** Analysis/evaluation of neurostimulator, spinal canal and meninges function/rate (see [2.AX.07.^](#))
 Complete replacement of entire spinal shunt system (see [1.AX.52.^](#))
 Instillation of agent into device (see [1.AX.35.^](#))
 Interventions on subcutaneous pocket only (see [1.YY.^](#))
 Replacement of pulse generator/battery, neurostimulator (see [1.YY.54.^](#))

1.AX.54.HA-SJ	of shunt using percutaneous (needle) approach (for aspiration, irrigation)
1.AX.54.JA-FT	of catheter (indwelling) using external approach
1.AX.54.JA-QK	of infusion pump (surgically implanted) using external approach
1.AX.54.JA-QS	of reservoir using external approach
1.AX.54.LA-DV	of implanted neurostimulator using open approach
1.AX.54.LA-FT	of catheter (indwelling) using open approach
1.AX.54.ME-SJ	of shunt terminating in abdomen (lumboperitoneal) using open approach
1.AX.54.MQ-SJ	of shunt terminating in thoracic cavity (pleurothecal) using open approach

1.AX.55.^ Removal of device, spinal canal and meninges

S⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Removal of thecal shunt system, spinal canal
Excludes: Removal of device from subcutaneous pocket only (see [1.YY.55.^](#))

1.AX.55.LA-DV of neurostimulator device
 1.AX.55.LA-FT of catheter
 1.AX.55.LA-PL of pressure measuring/monitoring device
 1.AX.55.LA-QK of infusion pump
 1.AX.55.LA-SJ of shunt system

1.AX.56.^ Removal of foreign body, spinal canal and meninges

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Removal, foreign body, spinal canal
Excludes: Removal, bone fragments, compressing spinal cord (see [1.AW.72.^](#))
Code Also: Any concomitant laminectomy or foraminotomy (see [1.SC.80.^](#))
 Any concomitant laminectomy with bone graft (see [1.SC.75.^](#))
 Any concomitant laminectomy with instrumentation (see [1.SC.74.^](#))
 Any intraoperative microscope assistance (see [3.AW.94.^](#))

Note: May involve aspiration and debridement, as necessary, with the removal of foreign body from the spinal canal, dura, meninges or subarachnoid space.

1.AX.56.^ Removal of foreign body, spinal canal and meninges	endoscopic [thoracoscopic, laparoscopic] approach	open approach	percutaneous approach
using apposition technique [e.g. suturing] for closure	1.AX.56.DA	1.AX.56.LA	—
using autograft [e.g. dura, fascia lata] for closure	1.AX.56.DA-XX-A	1.AX.56.LA-XX-A	—
using blood patch for closure	—	—	1.AX.56.HA-U9
using fibrin glue technique for closure	1.AX.56.DA-W3	1.AX.56.LA-W3	—
using homograft [e.g. dura] for closure	1.AX.56.DA-XX-K	1.AX.56.LA-XX-K	—
using synthetic tissue [e.g. Silastic sheath] for closure	1.AX.56.DA-XX-N	1.AX.56.LA-XX-N	—

1.AX.73.^ Reduction, spinal canal and meninges

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

- Includes:** Closure, myelomeningocele
Repair, dysraphism of spinal cord
Repair, myelomeningocele
- Excludes:** Repair, lipomyelomeningocele (see [1.AW.72.^^](#))
Repair, meningocele (see [1.AW.72.^^](#))
- Code Also:** Any concomitant repair of muscles of back (see [1.SG.80.^^](#))
- Note:** May involve excision of dural sac, replacement of placode in dural canal, and closure of dura.

1.AX.73.LA	using apposition technique [e.g. suturing] for closure
1.AX.73.LA-W3	using fibrin glue technique for closure
1.AX.73.LA-XX-A	using autograft [e.g. dura, fascia lata] for closure
1.AX.73.LA-XX-K	using homograft [e.g. dura] for closure
1.AX.73.LA-XX-N	using synthetic tissue [e.g. Silastic sheath] for closure

1.AX.80.^^ Repair, spinal canal and meninges

S⁵

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

- Includes:** Blood patch, spinal
Duraplasty, spinal
- Excludes:** Repair following removal of foreign body (see [1.AX.56.^^](#))
Repair, spinal nerve [C5 to T1], using nerve autograft (see [1.BG.^^.^^](#))
- Note:** Use this code when repair is for traumatic laceration of dura.

1.AX.80.^^ Repair, spinal canal and meninges	endoscopic [thoracoscopic, laparoscopic] approach	open approach	percutaneous needle approach [injection]
using apposition technique [e.g. suturing] for closure	1.AX.80.DA	1.AX.80.LA	—
using autograft [e.g. dura, fascia lata] for closure	1.AX.80.DA-XX-A	1.AX.80.LA-XX-A	—
using combined sources of tissue for closure	1.AX.80.DA-XX-Q	1.AX.80.LA-XX-Q	—
using fibrin glue technique for closure	1.AX.80.DA-W3	1.AX.80.LA-W3	—
using homograft [e.g. dura] for closure	1.AX.80.DA-XX-K	1.AX.80.LA-XX-K	—
using synthetic tissue [e.g. silastic sheath] for closure	1.AX.80.DA-XX-N	1.AX.80.LA-XX-N	—
using xenograft for closure	1.AX.80.DA-XX-L	1.AX.80.LA-XX-L	—
using whole blood	—	—	1.AX.80.HA-U9

1.AX.86.^ Closure of fistula, spinal canal and meninges**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Closure, fistula, CSF of spinal meninges
Fistulectomy, spinal meninges
Repair, fistula, spinal meninges

Excludes: Closure, congenital dermal sinus (see [1.AW.72.^](#))
Repair, dermal sinus, terminating in spinal canal (see [1.AW.72.^](#))

Code Also: Any concomitant laminectomy by vertebral site

Note: Involves fistula which originates in spinal meninges [or canal]. If fistula [or sinus] originates at other site [e.g. skin], see that site for repair.

1.AX.86.^ Closure of fistula, spinal canal and meninges	debridement and closure [e.g. suture]	debridement and closure using autograft [dura, fascia lata]	debridement and closure using fibrin [glue]	debridement and closure using synthetic tissue [silastic sheath]
for fistula terminating anywhere in abdominal cavity [e.g. digestive or biliary tract]	1.AX.86.ME	1.AX.86.ME-XX-A	1.AX.86.ME-W3	1.AX.86.ME-XX-N
for fistula terminating anywhere in thoracic cavity	1.AX.86.MQ	1.AX.86.MQ-XX-A	1.AX.86.MQ-W3	1.AX.86.MQ-XX-N
for fistula terminating at skin [or subcutaneous tissue]	1.AX.86.MB	1.AX.86.MB-XX-A	1.AX.86.MB-W3	1.AX.86.MB-XX-N
for fistula traveling through multiple cavities and terminating in any organ(s) or at skin	1.AX.86.VC	1.AX.86.VC-XX-A	1.AX.86.VC-W3	1.AX.86.VC-XX-N

1.AX.87.^ Excision partial, spinal canal and meninges**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Debulking, space occupying lesion, spinal canal
Resection, meninges of spine
Resection, space occupying lesion, spinal canal

Excludes: Resection, intramedullary (see spinal cord [1.AW.87.^](#))

1.AX.87.^.^ Excision partial, spinal canal and meninges	endoscopic approach with apposition technique [e.g. suturing]	open approach with apposition technique [e.g. suturing]	open approach with autograft for closure [e.g. dura, fascia lata]	open approach with homograft [e.g. deceased donor fascia lata]	open approach with synthetic tissue for closure	open approach with combined sources of tissue for closure
using extradural incision technique [e.g. for space occupying lesion of canal]						
with device NEC	1.AX.87.DA-GX	1.AX.87.LA-GX	1.AX.87.LA-GX-A	1.AX.87.LA-GX-K	1.AX.87.LA-GX-N	1.AX.87.LA-GX-Q

1.AZ.^.^ Therapeutic Interventions on Central Nervous System NEC

1.AZ.94.^.^ Therapeutic intervention NEC, central nervous system NEC

1.AZ.94.HA	using percutaneous (needle) approach
1.AZ.94.LA	using open approach

Therapeutic Interventions on Nerves (1BA - 1BZ)

1.BA.^^.^^ Therapeutic Interventions on the Cranial Nerves [intracranial]

Includes:	Abducent CN VI Accessory CN XI [intracranial] Facial CN VII [intracranial] Gasserian ganglion Glossopharyngeal CN IX [intracranial] Hypoglossal CN XII [intracranial] Oculomotor CN III Olfactory CN I Optic CN II Trigeminal CN V Trochlear CN IV Vagus CN X
Excludes:	Acoustic [vestibular] nerve within cerebellopontine angle (see 1.AK.^^.^^) Cranial nerves outside skull [extracranial] (see 1.BB.^^.^^) Facial nerve [intracranial] within cerebellopontine angle (see 1.AK.^^.^^) Nerve of head, face or neck outside skull (see 1.BB.^^.^^) Superior and inferior vagal ganglia (see 1.AE.^^.^^)

1.BA.09.^^ Stimulation, cranial nerves

Includes:	Activation of surgically implanted electrical stimulation device [neurostimulator]
Excludes:	Implantation of stimulating device (see 1.BA.53.^^)

1.BA.09.JA-ED	using external manual activation
1.BA.09.JA-QQ	using remote transmitter

1.BA.27.^^ Radiation, cranial nerves

Includes:	Radiosurgery, cranial nerves
Excludes:	Creation (lesion) using radiofrequency probe through incision (see 1.BA.59.^^)
Note:	Involves the use of a stereotactical frame for positioning during delivery of external focused beam (or gamma "knife") radiation.
1.BA.27.JX	using focused beam [e.g. gamma knife, cyber knife stereotactic radiosurgery]

1.BA.53.^.^ Implantation of internal device, cranial nerves**S** ⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Implantation, neurostimulator device, cranial nerves [intracranial]
 Implantation, neurostimulator device, trigeminal nerve [intracranial]
 Implantation, neurostimulator device, vagus nerve [intracranial]

Excludes: Replacement of pulse generator/battery, neurostimulator (see [1.YY.54.^.^](#))

1.BA.53.SZ-DV of neurostimulator device

1.BA.55.^.^ Removal of device, cranial nerves**S** ⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Removal, neurostimulator device, cranial nerve [intracranial]

Excludes: Removal of pulse generator/battery, neurostimulator (see [1.YY.55.^.^](#))

1.BA.55.SZ-DV of neurostimulator device

1.BA.59.^.^ Destruction, cranial nerves**S** ⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

- Includes:** Avulsion, cranial nerves [intracranial]
 Avulsion, infraorbital [or supraorbital] nerve
 Avulsion, suboccipital nerve
 Rhizolysis, cranial nerve [intracranial]
 Rhizolysis, trigeminal [using craniectomy technique]
 Rhizotomy, cranial nerve [intracranial]
 Rhizotomy, glossopharyngeal [intracranial]
 Rhizotomy, infraorbital
- Excludes:** Neurotomy, vestibular (see [1.BD.59.^^](#))
 Rhizolysis, Gasserian using percutaneous [needle] approach (see [1.BB.59.^^](#))
 Rhizolysis, trigeminal using percutaneous [needle] approach (see [1.BB.59.^^](#))

- 1.BA.59.LA using open approach [e.g. orbitotomy without bone flap]
 1.BA.59.QS using transnasal [e.g. transsphenoidal, transethmoidal] approach
 1.BA.59.SZ using craniotomy [craniectomy] flap approach and transection [or aversion] technique
 1.BA.59.SZ-AW using craniotomy [craniectomy] flap approach and radiofrequency probe
 1.BA.59.SZ-X7 using craniotomy [craniectomy] flap approach and chemical cautery agent [e.g. alcohol, glycerol]

1.BA.72.^^ Release, cranial nerves

S 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

- Includes:** Decompression [microvascular], facial nerve [intracranial]
 Decompression [microvascular], glossopharyngeal [intracranial]
 Decompression [microvascular], trigeminal nerve [intracranial]
 Decompression [microvascular], vagus nerve [intracranial]
 Decompression [microvascular], vestibular nerve [intracranial]
 Decompression, cranial nerve [intracranial]
 Fenestration, optic nerve sheath [for decompression]
 Rhizotomy, trigeminal posterior

- Excludes:** Neurolysis, cranial nerve outside skull (see [1.BB.72.^^](#))

- Code Also:** Any intraoperative microscope assistance (see [3.AN.94.^^](#))
 Any intraoperative stereotactic guidance (see [3.AN.94.^^](#))

- 1.BA.72.LA using open approach [e.g. orbitotomy] without bone flap
Note: Involves freeing the medial rectus muscle and retracting the globe to gain access to the cranial nerve.
- 1.BA.72.QS using transnasal [e.g. trans sphenoidal, trans ethmoidal] approach
 1.BA.72.SZ using open approach with craniectomy [craniotomy] flap technique for access
Includes: Release, cranial nerve by orbitotomy [lateral] with bone flap
Note: A lateral orbitotomy involves temporary removal of the lateral wall of the orbit to gain access to the cranial nerve.

1.BA.80.^ ^ Repair, cranial nerves**S** 7

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 7	Optional	Tx Status 3	Status	A	Abandoned after onset
				D P	Delayed primary (repair occurring 2 to 14 days post trauma)
				D S	Delayed secondary (repair occurring >14 days post trauma)
				R	Revision

Includes: Neuroorrhaphy, cranial nerve [intracranial]
Repair [traumatically lacerated], cranial nerve [intracranial]

Excludes: Neurectomy with end to end repair, cranial nerve [intracranial] (see [1.BA.87.^ ^](#))
that with nerve autograft, cranial nerve [intracranial] (see [1.BA.87.^ ^](#))

Code Also: Any intraoperative microscopic assistance (see [3.AN.94.^ ^](#))
Any intraoperative stereotactic guidance (see [3.AN.94.^ ^](#))

1.BA.80.SZ using an open (craniotomy/ craniectomy) approach and end to end suture [rejoining] technique
1.BA.80.SZ-W3 using an open (craniotomy/craniectomy) approach and fibrin glue [rejoining] technique

1.BA.87.^ ^ Excision partial, cranial nerves**S** 7

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 7	Optional	Tx Status 3	Status	A	Abandoned after onset
				D P	Delayed primary (repair occurring 2 to 14 days post trauma)
				D S	Delayed secondary (repair occurring >14 days post trauma)
				R	Revision

Includes:	Ganglionectomy, Gasserian Ganglionectomy, intracranial Ganglionectomy, trigeminal Graft, nerve, intracranial Neurectomy, intracranial Neurectomy, trigeminal [intracranial or retrosigmoidal approach] Resection, intracranial nerve [with or without end to end suture repair]
Excludes:	Excision facial neuroma extending into cerebellopontine angle (see 1.AK.87.^) Excision of acoustic neuroma [vestibular nerve] extending into cerebellopontine angle intracranial (see 1.AK.87.^) Neurectomy, vestibulocochlear within inner ear (see 1.BD.87.^)
Code Also:	Any intraoperative microscope assistance (see 3.AN.94.^) Any intraoperative stereotactic guidance (see 3.AN.94.^)
Note:	Involves the resection of damaged or diseased [e.g. neoplastic] nerve tissue which may then require a concomitant repair using a nerve autograft or transposition [due to lost nerve length] to establish re-apposition of the nerve endings.
1.BA.87.LA	using open (craniotomy/craniectomy) approach and end to end whole nerve [rejoining] technique
1.BA.87.LA-XX-A	using open (craniotomy/craniectomy) approach and whole nerve autograft technique (to replace lost length)
1.BA.87.LA-XX-E	using open (craniotomy/ craniectomy) approach and transposition [intracranial to intracranial] nerve technique
1.BA.87.LA-XX-Q	using open (craniotomy/ craniectomy) approach and transposition [IC to IC] nerve with additional nerve autograft (to replace lost length)
1.BA.87.QS	using transnasal [e.g. transsphenoidal, transthemoidal] approach
1.BA.87.UH-XX-A	using open (craniotomy/ craniectomy) approach and interfascicular [split] inlay nerve autograft technique (to replace lost length)
1.BA.87.WF	using open (craniotomy/craniectomy) approach and burial of nerve end

1.BB.^.^ Therapeutic Interventions on other Nerve(s) of Head and Neck

Includes:	Accessory nerve CN XI [extracranial] Cervical plexus [C2 to C4] Cranial nerve, [extracranial] Dental nerve Facial nerve CN VII [extracranial] Gasserian ganglion Glossopharyngeal CN IX [extracranial] Hypoglossal nerve CN XII [extracranial] Laryngeal nerve Mental nerve Pharyngeal nerve Transverse [superficial] cervical nerve Trigeminal nerve [extracranial] Vagus nerve, head and neck region
Excludes:	Cranial nerve [intracranial] (see 1.BA.^.^) Facial nerve within cerebellopontine angle (see 1.AK.^.^) Nerve of inner ear (see 1.BD.^.^) Trigeminal nerve, intracranial (see 1.BA.^.^) Vagus nerve, thorax and abdomen region (see 1.BK.^.^) Vestibular nerve (see 1.BD.^.^)

1.BB.11.^ Anesthetization, other nerves of head and neck

Includes: Anesthesia (regional or field), nerves of head and neck
Anesthetization, dental nerve
Anesthetization, facial nerve
Anesthetization, mental nerve
Anesthetization, teeth
Block, regional, nerves of head and neck for operative anesthesia
Freezing, teeth

Excludes: Nerve block for pain control (see 1.BB.35.^)

1.BB.11.HA-P1	using percutaneous (needle) injection of local anesthetic agent
1.BB.11.JJ	using external manual technique (e.g. massage)

1.BB.27.^ ^ Radiation, other nerves of head and neck

Includes: Radiosurgery (stereotactic), nerves of head and neck

Excludes: Creation (lesion) using radiofrequency probe through incision (see 1.BB.59.^)

Note: Involves the use of a stereotactical frame for positioning during delivery of external focused beam (or gamma "knife") radiation.

1.BB.27.JX	using focused beam [e.g. gamma knife, cyber knife stereotactic radiosurgery]
------------	--

1.BB.35.^ ^ Pharmacotherapy (local), other nerves of head and neck

Includes: Block, nerves of head and neck for pain control
Cervical paravertebral nerve block

Excludes: that for operative anesthesia (see 1.BB.11.^)

1.BB.35.HA-J2	using percutaneous (needle) injection of corticosteroid agent Includes: prednisone, dexamethasone, fludrocortisone
1.BB.35.HA-P1	using percutaneous (needle) injection of local anesthetic agent
1.BB.35.HH-P1	using percutaneous catheter infusion of local anesthetic agent

1.BB.53.^ Implantation of internal device, other nerves of head and neck

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Insertion of neurostimulator, nerve of head and neck
Insertion, vagal nerve pacemaker, extracranial

Excludes: Implantation of intracranial neurostimulator (see [1.BA.53.^^](#))
Implantation of vagal nerve stimulator in abdominal region (see [1.BK.53.^^](#))
Replacement of pulse generator/battery, neurostimulator (see [1.YY.54.^^](#))

1.BB.53.LA-DV of neurostimulator device

1.BB.55.^^ Removal of device, other nerves of head and neck

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Removal of electrodes (of pacemaker), vagal nerve
Removal of extracranially implanted neurostimulator device, head and neck

Excludes: Removal of intracranially implanted neurostimulator device, head (see [1.BA.55.^^](#))
Removal of pulse generator/battery, neurostimulator (see [1.YY.55.^^](#))

1.BB.55.LA-DV of neurostimulator device

1.BB.58.^^ Procurement, other nerves of head and neck

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Procurement, cervical plexus [nerve]

1.BB.58.LA using open approach

1.BB.59.^^ Destruction, other nerves of head and neck

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

- Includes:** Avulsion, nerves of head and neck [e.g. dental, mental]
 Destruction, nerve, dental
 Neurotomy, nerve of head and neck
 Rhizotomy, trigeminal
- Excludes:** Neurotomy, nerves of inner ear (see [1.BD.59.^^](#))
 Rhizotomy, trigeminal intracranial using craniotomy flap (see [1.BA.59.^^](#))
 Rhizotomy, vestibular using craniectomy approach (see [1.BD.59.^^](#))
 Stereotactic radiosurgery, nerves of head and neck (see [1.BB.27.^^](#))
 Use of external focused beam (or gamma "knife") radiation (see [1.BB.27.^^](#))

- 1.BB.59.HA using percutaneous approach with transection [or avulsion] technique
Includes: Division, laryngeal nerve
- 1.BB.59.HA-AW using percutaneous approach with radiofrequency probe
 1.BB.59.HA-AZ using percutaneous approach with ultrasonic probe [e.g. CUSA]
 1.BB.59.HA-BD using percutaneous approach and balloon (compression)
 1.BB.59.HA-X7 using percutaneous approach with chemical cautery agent [e.g. alcohol]

1.BB.72.^^ Release, other nerves of head and neck

S 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

- Includes:** Decompression, nerve of head and neck
 Decompression, trigeminal [extracranial]
 Lateralization, inferior alveolar nerve
 Neurolysis, facial
 Neurolysis, mandibular
 Neurolysis, nerve of head and neck
 Neurolysis, vestibular
- Excludes:** Neurolysis with end to end [rejoining] repair, head and neck (see [1.BB.80.^^](#))
- Omit code:** If nerve is transected and requires repair (see [1.BB.80.^^](#)) or if nerve requires additional nerve grafting for loss of length (see [1.BB.87.^^](#))

- 1.BB.72.LA using open approach

1.BB.80.^ ^ Repair, other nerves of head and neck**S**⁷

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 7	Optional	Tx Status 3	Status	A	Abandoned after onset
				D P	Delayed primary (repair occurring 2 to 14 days post trauma)
				D S	Delayed secondary (repair occurring >14 days post trauma)
				R	Revision

Includes: Neurolysis with end to end repair (of transected), nerve of head and neck
 Neuroorrhaphy, facial
 Neuroorrhaphy, head and neck

Excludes: Neurectomy with end to end [rejoining] repair, head and neck (see [1.BB.87.^ ^](#))
 that with nerve autograft, head and neck (see [1.BB.87.^ ^](#))
 Transposition, nerves of head and neck (see [1.BB.87.^ ^](#))

Code Also: Any concomitant removal of foreign body, soft tissue of head and neck (see [1.EQ.56.^ ^](#))

1.BB.80.LA using end to end nerve suture [rejoining] technique
 1.BB.80.LA-W3 using fibrin glue [rejoining] technique
 1.BB.80.UH using interfascicular [split] repair [rejoining] technique

1.BB.87.^ ^ Excision partial, other nerves of head and neck**S**⁷

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 7	Optional	Tx Status 3	Status	A	Abandoned after onset
				D P	Delayed primary (repair occurring 2 to 14 days post trauma)
				D S	Delayed secondary (repair occurring >14 days post trauma)
				R	Revision

- Includes:** Graft, nerve
 Neurectomy, dental
 Neurectomy, head and neck [extracranial]
 Neurectomy, infraorbital [or supraorbital]
 Transposition, 12th [hypoglossal] to 7th [facial] nerve [outside of skull]
 Transposition, accessory nerve to cervical plexus [C2 to C4]
 Transposition, accessory nerve to facial nerve
 Transposition, faciofacial nerves [includes crossover transfer]
 Transposition, hypoglossal to facial nerve
 Transposition, nerves of head and neck
- Excludes:** Ganglionectomy, Gasserian (see [1.BA.87.^](#))
 Ganglionectomy, trigeminal (see [1.BA.87.^](#))
 Transposition, accessory nerve to brachial plexus [C5 to T1] (see [1.BG.87.^](#))
 Transposition, accessory nerve to nerve of arm (see [1.BM.87.^](#))
 Trimming with end to end repair, nerve of head and neck (see [1.BB.80.^](#))
- Note:** Involves resection of damaged or diseased [e.g. neoplastic] nerve tissue which may then require a concomitant repair to establish reapposition [and reinnervation] of the nerve endings with or without a nerve graft to replace lost length. See qualifiers for the various special repair techniques.

1.BB.87.^ Excision partial, other nerves of head and neck	end to end [rejoining] technique (e.g. suture, glue)	interfascicular split repair [rejoining] technique	no rejoining [of nerve ends]
combined transposition of nerves with a nerve autograft	1.BB.87.LA-XX-Q	1.BB.87.UH-XX-Q	—
autograft (nerve or vein) to replace lost length	1.BB.87.LA-XX-A	1.BB.87.UH-XX-A	—
homograft (nerve or vein) to replace lost length	1.BB.87.LA-XX-K	—	—
nerve end buried	—	—	1.BB.87.WF
nerve end fascicles coagulated (and buried)	—	—	1.BB.87.WG
simple apposition of nerve ends	1.BB.87.LA	1.BB.87.UH	—
nerve end(s) wrapped or bridged using synthetic tissue [e.g. neural tube]	—	—	1.BB.87.LA-XX-N
transposition of nerves [e.g. crossover]	1.BB.87.LA-XX-E	1.BB.87.UH-XX-E	—

1.BD.^.^ Therapeutic Interventions on the Nerve(s) of the Ear

- Includes:** Ampullary nerve: anterior, lateral and posterior
 Auditory nerve
 Auricular nerve: greater
 Auriculotemporal nerve
 Cochlear nerve
 Saccular nerve
 Tympanic nerve
 Utricular nerve
 Vestibulocochlear nerve CN VIII
- Excludes:** Vestibular nerve within cerebellopontine angle (see [1.AK.^.^](#))

1.BD.11.^ ^ Anesthetization, nerve(s) of the ear**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Block, regional, nerves of ear for operative anesthesia

Excludes: Destruction, nerves of ear (see [1.BD.59.^ ^](#))
Nerve block for pain control (see [1.BD.35.^ ^](#))

1.BD.11.HA-P1 using percutaneous (needle) injection of local anesthetic agent

1.BD.27.^ ^ Radiation, nerve(s) of the ear**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Radiosurgery (stereotactic), nerves of ear

Excludes: Destruction nerve of ear using radiofrequency probe through incision (see [1.BD.59.^ ^](#))

Note: Involves the use of a stereotactical frame for positioning during delivery of external focused beam (or gamma "knife") radiation.

1.BD.27.JX using focused beam [e.g gamma knife, cyber knife stereotactic radiosurgery]

1.BD.35.^ ^ Pharmacotherapy (local), nerve(s) of the ear

Includes: Block, nerves of ear for pain control

Excludes: that for operative anesthesia (see [1.BD.11.^ ^](#))

1.BD.35.HA-J2 using percutaneous (needle) injection of corticosteroid agent
Includes: prednisone, dexamethasone, fludrocortisone

1.BD.35.HA-P1 using percutaneous (needle) injection of local anesthetic agent

1.BD.58.^ ^ Procurement, nerve(s) of the ear**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Procurement, greater auricular nerve

1.BD.58.LA using open approach

1.BD.59.^ ^ Destruction, nerve(s) of the ear**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Division, vestibular nerve
Neurotomy, nerve of inner ear
Rhizotomy, vestibular nerve
Section, vestibular nerve

Excludes: Stereotactic radiosurgery (see [1.BD.27.^ ^](#))
that requiring craniectomy [e.g. mid fossa, retrosigmoidal, temporal or suboccipital approach] for access (see [1.BA.59.^ ^](#))
Use of external focused beam (or gamma "knife") radiation (see [1.BD.27.^ ^](#))

1.BD.59.^ ^ Destruction, nerve(s) of the ear	transcanal [transmeatal, transtympanic] approach	translabyrinthine approach
using chemical cauterly agent [e.g. alcohol]	1.BD.59.XE-X7	1.BD.59.QQ-X7
using cryoprobe	1.BD.59.XE-AD	1.BD.59.QQ-AD
using radiofrequency probe	1.BD.59.XE-AW	1.BD.59.QQ-AW
using transection (or avulsion) technique	1.BD.59.XE	1.BD.59.QQ
using ultrasonic probe	1.BD.59.XE-AZ	1.BD.59.QQ-AZ

1.BD.72.^ ^ Release, nerve(s) of the ear**S** 5 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Decompression, nerve of inner ear
Neurolysis, inner ear

Excludes: Decompression [microvascular], vestibular nerve (see [1.BA.72.^ ^](#))
that requiring craniectomy [e.g. mid fossa, retrosigmoidal, temporal or suboccipital approach] for access (see [1.BA.59.^ ^](#))
that requiring end to end [rejoining] suture technique (see [1.BD.80.^ ^](#))

1.BD.72.QQ using translabyrinthine approach
1.BD.72.XE using transcanal approach [e.g. transmeatal, transtympanic]

1.BD.80.^ ^ Repair, nerve(s) of the ear**S** 7 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 7	Optional	Tx Status 3	Status	A	Abandoned after onset
				D P	Delayed primary (repair occurring 2 to 14 days post trauma)
				D S	Delayed secondary (repair occurring >14 days post trauma)
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Neurolysis with end to end repair, inner ear
Neurorrhaphy, inner ear

Excludes: Neurectomy with concomitant end to end repair, inner ear (see [1.BD.87.^ ^](#))

1.BD.80.^ ^ Repair, nerve(s) of the ear	transcanal approach [e.g. transmeatal, transtympanic]	translabyrinthine approach
using end to end suture [rejoining] technique	1.BD.80.XE	1.BD.80.QQ
using fibrin glue [rejoining] technique	1.BD.80.XE-W3	1.BD.80.QQ-W3

1.BD.87.^ ^ Excision partial, nerve(s) of the ear**S** 10 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 10	Optional	Tx Status 5	Status	A	Abandoned after onset
				R	Revision
				S	Staged
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes:

Neurectomy, inner ear
 Neurectomy, singular [posterior ampullary nerve]
 Neurectomy, vestibulocochlear

Excludes:

Neurectomy, vestibular [within cerebellopontine angle] (see [1.AK.87.^ ^](#))
 that with radical excision of inner ear (see [1.DR.91.^ ^](#))
 Trimming with end to end repair, nerve of ear (see [1.BD.80.^ ^](#))

Note:

Involves the resection of damaged or diseased [neoplastic] nerve within the inner ear. A [cortical] mastoidectomy may be an integral part of this procedure and should not be coded separately. If a craniectomy, however, is performed to gain access to the nerve then the cerebellopontine angle is the correct anatomy site to select. (See exclusion note above).

1.BD.87.QQ	using translabyrinthine approach
1.BD.87.XE	using transcanal approach [e.g. transmeatal, transtympanic]

1.BF.^ ^ Therapeutic Interventions on the Sympathetic Nerves**Includes:**

Celiac nerve
 Parasympathetic ganglia
 Peripheral autonomic nervous system
 Perivascular plexus
 Splanchnic nerve
 Stellate ganglia

1.BF.35.^ ^ Pharmacotherapy (local), sympathetic nerves

Includes: Block, stellate (ganglion)
Block, sympathetic nerve (ganglion) for pain control

1.BF.35.BV-P1	using endoscopic per orifice approach with injection of local anesthetic agent
1.BF.35.HA-E6	using percutaneous (needle) injection of antihypertensive agent [e.g. guanethidine]
1.BF.35.HA-J2	using percutaneous (needle) injection of corticosteroid agent
	Includes: prednisone, dexamethasone, fludrocortisone
1.BF.35.HA-P1	using percutaneous (needle) injection of local anesthetic agent

1.BF.55.^ ^ Removal of device, sympathetic nerves**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Reversal, (thoracic) sympathectomy by removal of clips

Excludes: Reversal, (thoracic) sympathectomy by rejoining previously transected nerve (see [1.BF.80.^ ^](#))

1.BF.55.DA-FF	of clips using endoscopic (laparoscopic, thoracoscopic) approach
1.BF.55.LA-FF	of clips using open approach

1.BF.59.^ ^ Destruction, sympathetic nerves**S** 4 **L** 79

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 79	Mandatory	Mandatory Sympathetic	Location	C X	Cervical level (includes stellate ganglion)
				L B	Lumbar level
				P V	Perivascular or endovascular region (any site)
				S L	Sacral level
				T H	Thoracic (dorsal) level
				Z	Other NEC (e.g. splanchnic nerve)

Includes: Ablation, renal sympathetic nerve
 Ablation, uterine nerve
 Destruction, celiac nerve
 Destruction, splanchnic nerve
 Division, splanchnic nerve
 Endoscopic sympathectomy, thoracic nerve [ETS]
 Neurectomy, presacral (with or without division of uterosacral ligaments)
 Paracervical uterine denervation
 Splanchnicectomy, chemical
 Sympathectomy
 Sympathectomy, chemical

Code Also: Any intraoperative microscope assistance

Omit code: when performed concomitantly with stripping of veins (see technique of vein excision by site).

1.BF.59.^.^ Destruction, sympathetic nerves	endoscopic [thoroscopic, laparoscopic] approach	open approach	percutaneous approach	percutaneous transluminal arterial approach	endoscopic per orifice injection
with chemical cautery agent [e.g. alcohol]	—	1.BF.59.LA-X7	1.BF.59.HA-X7	—	1.BF.59.BV-X7
with clips	1.BF.59.DA-FF	1.BF.59.LA-FF	—	—	—
with laser	1.BF.59.DA-AG	1.BF.59.LA-AG	—	—	—
with radiofrequency probe	1.BF.59.DA-AW	1.BF.59.LA-AW	1.BF.59.HA-AW	1.BF.59.GQ-AW Includes: • Endovascular renal artery denervation • Radiofrequency ablation, renal (sympathetic) nerve (for refractory hypertension)	—
with transection [or avulsion] technique	1.BF.59.DA	1.BF.59.LA	—	—	—

1.BF.80.^.^ Repair, sympathetic nerves

S 5 **L** 11

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 11	Optional	Sympathetic	Location	C X	Cervical level [includes: stellate ganglion]
				L B	Lumbar level
				P V	Perivascular region [any site]
				S L	Sacral level
				T H	Thoracic level [includes: dorsal]
				Z	Other NEC [e.g. splanchnic nerve]

Includes: Neurorrhaphy, sympathetic nerve
Reversal, (thoracic) sympathectomy by rejoining previously transected nerve

Excludes: Reversal, (thoracic) sympathectomy by removal of clips (see [1.BF.55.^^](#))

1.BF.80.LA using end to end [whole] nerve suture technique
1.BF.80.LA-W3 using fibrin glue [rejoining] technique

1.BG.^^.^^ Therapeutic Interventions on the Brachial Plexus

Includes: Antebrachial nerve
Brachial plexus [lateral, medial and posterior cord]
Cervical spinal nerves: C5, C6, C7, C8 [and T1]
Intercostal nerve
Scalenus plexus
Scapular nerve
Spinal nerves: C5, C6, C7, C8 and T1
Supraclavicular plexus
Thoracic nerve
Thoracic spinal nerve: T1
Thoracodorsal nerve

Excludes: Cervical plexus [C2 to C4] (see [1.BB.^^.^^](#))
Phrenic nerve (see [1.BJ.^^.^^](#))
Suprascapular nerve (see [1.BM.^^.^^](#))

1.BG.11.^^ Anesthetization, brachial plexus

L 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Nerve block, regional, brachial plexus for operative anesthesia

Excludes: Nerve block for pain control (see [1.BG.35.^^](#))

1.BG.11.HA-P1 using percutaneous (needle) injection of local anesthetic agent

1.BG.35.^ ^ Pharmacotherapy (local), brachial plexus

Includes: Nerve block, brachial plexus for pain control
Excludes: that for operative anesthesia (see [1.BG.11.^ ^](#))

1.BG.35.HA-J2 using percutaneous (needle) injection of corticosteroid agent
Includes: prednisone, dexamethasone, fludrocortisone
 1.BG.35.HA-P1 using percutaneous (needle) injection of local anesthetic agent

1.BG.72.^ ^ Release, brachial plexus**S** ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Decompression thoracic outlet [with or without scalenectomy]
 Neurolysis, brachial plexus
Excludes: Neurolysis with nerve autograft, brachial plexus (see [1.BG.87.^ ^](#))
 Neurolysis with transection requiring end to end repair, brachial plexus (see [1.BG.80.^ ^](#))
 Neurolysis with transposition, brachial plexus nerves (see [1.BG.87.^ ^](#))
 Removal of first rib alone to decompress thoracic outlet (see [1.SL.89.^ ^](#))
Code Also: Any concomitant rib resection for decompression of thoracic outlet, brachial plexus (see [1.SL.89.^ ^](#))

1.BG.72.LA using decompression technique alone
 1.BG.72.WJ using scalenectomy for thoracic outlet decompression

1.BG.80.^ ^ Repair, brachial plexus**S** ⁷ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 7	Optional	Tx Status 3	Status	A	Abandoned after onset
				D P	Delayed primary (repair occurring 2 to 14 days post trauma)
				D S	Delayed secondary (repair occurring >14 days post trauma)
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Neurolysis with end to end repair, brachial plexus
 Neurorrhaphy, brachial plexus
 Neurorrhaphy, spinal nerves [C5 to T1]
 Neurotization with end to end repair, brachial plexus

Excludes: that with nerve autograft to replace lost length (see [1.BG.87.^ ^](#))
 Transposition, brachial plexus [nerves] for regeneration (see [1.BG.87.^ ^](#))

1.BG.80.LA using end to end nerve suture [rejoining] technique
 1.BG.80.LA-W3 using fibrin glue [rejoining] technique
 1.BG.80.UH using interfascicular [split] repair [rejoining] technique

1.BG.87.^ ^ Excision partial, brachial plexus**S** ⁷ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description

				D P	Delayed primary (repair occurring 2 to 14 days post trauma)
				D S	Delayed secondary (repair occurring >14 days post trauma)
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Neurectomy, brachial plexus nerve [C5 to T1]
 Neurectomy, spinal nerve: C5, C6, C7, C8 and T1
 Neurolysis with nerve autograft, brachial plexus
 Resection, brachial plexus nerve [C5 to T1]
 Transposition, brachial plexus
 Transposition, brachial plexus to nerve of arm
 Transposition, spinal nerve: C5, C6, C7, C8 or T1
 Transposition, suprascapular to accessory nerve

Excludes: Resection of brachial plexus with lobectomy (see [1.GR.91.^^](#))
 Trimming, nerve of brachial plexus for end to end repair (see [1.BG.80.^^](#))

Note: Involves the resection of damaged or diseased [e.g. neoplastic] nerve tissue which may then require a concomitant repair using a nerve autograft or transposition [due to lost nerve length] to establish reapposition of the nerve endings.

1.BG.87.^^ Excision partial, brachial plexus	end to end [rejoining] technique [e.g. suture, glue]	interfascicular split repair [rejoining] technique	no rejoining (of nerve ends)
combined transposition of nerves with a nerve autograft	1.BG.87.LA-XX-Q	1.BG.87.UH-XX-Q	—
nerve autograft (to replace lost length)	1.BG.87.LA-XX-A	1.BG.87.UH-XX-A	—
nerve homograft (to replace lost length)	1.BG.87.LA-XX-K	—	—
nerve end buried	—	—	1.BG.87.WF

transposition of nerves [e.g. crossover]	1.BG.87.LA-XX-E	1.BG.87.UH-XX-E	—

1.BG.91.^^ Excision, radical brachial plexus

S 4 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Code Also: Any concomitant amputation of radius/ulna (see [1.TV.93.^^](#))
Any concomitant amputation through forequarter (see [1.SN.93.^^](#))

Note: Involves en bloc resection of brachial plexus and soft tissue with or without resection of blood vessels and bone (e.g. clavicle, rib)

1.BG.91.UH-XX-A	interfascicular split rejoining using autograft
1.BG.91.UH-XX-Q	interfascicular split rejoining using combined sources of tissue (composite flap and graft)
1.BG.91.WF	nerve end buried

1.BJ.^^.^^ Therapeutic Interventions on the Phrenic Nerve

1.BJ.09.^^ Stimulation, phrenic nerve

Excludes: Administration of systemic pharmacological agent (see [1.ZZ.35.^^](#))

1.BJ.09.HA-DV	using percutaneously inserted electrical stimulation device [e.g. neurostimulator]
1.BJ.09.HA-Z9	using percutaneous needle [injection] of pharmacological agent NEC
1.BJ.09.JA-DV	using external electric stimulation device
1.BJ.09.JA-MD	using motion device (e.g. rocking bed)
	Excludes: that for continuous ventilation (see 1.GZ.31.^^)
1.BJ.09.JH-ED	using external manual activation (of implanted stimulator)

1.BJ.35.^^ Pharmacotherapy (local), phrenic nerve

Includes: Block, phrenic nerve for pain control

1.BJ.35.HA-J2	using percutaneous (needle) injection of corticosteroid agent
	Includes: prednisone, dexamethasone, fludrocortisone
1.BJ.35.HA-P1	using percutaneous (needle) injection of local anesthetic agent

1.BJ.53.^^ Implantation of internal device, phrenic nerve

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Insertion of neurostimulator, phrenic nerve
that for diaphragmatic pacing
that with external transmitter and internal receiver

Excludes: Replacement of pulse generator/battery, neurostimulator (see [1.YY.54.^^](#))

1.BJ.53.LA-DV	using open approach and electrical stimulation device
---------------	---

1.BJ.55.^ ^ Removal of device, phrenic nerve

Includes: Removal, neurostimulator device, phrenic nerve

Excludes: Removal of pulse generator/battery, neurostimulator (see [1.YY.55.^ ^](#))

1.BJ.55.LA-DV of electrical stimulation device using open approach
Includes: Removal of diaphragmatic pacemaker

1.BJ.59.^ ^ Destruction, phrenic nerve**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Neurectomy, phrenic
that for surgical collapse of lung

1.BJ.59.HA-X7 using percutaneous approach with chemical cautery agent [e.g. alcohol]
1.BJ.59.LA using open approach with transection [or avulsion] technique
1.BJ.59.LA-X7 using open approach with chemical cautery agent [e.g. alcohol]

1.BJ.80.^ ^ Repair, phrenic nerve**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Neurorrhaphy, phrenic nerve

1.BJ.80.LA open approach using end to end nerve suture [rejoining] technique
1.BJ.80.LA-W3 open approach using fibrin glue [rejoining] technique

1.BK.^.^ Therapeutic Interventions on the Vagus Nerve

- Includes:** Esophageal, cardiac and renal plexus
Gastric nerve
Thoracoabdominal branches of vagal nerve
Vagal trunk [celiac, hepatic, gastric, splenic, pancreatic branches]
- Excludes:** Extracranial vagus nerve, head and neck region (see [1.BB.^.^](#))
Superior and inferior vagal ganglia (see [1.AE.^.^](#))
Vagus nerve, intracranial (see [1.BA.^.^](#))

1.BK.09.^.^ Stimulation, vagus nerve

- Includes:** Activation of surgically implanted stimulation device [e.g. neurostimulator]
- Excludes:** Implantation of stimulation device [neurostimulator], vagus nerve (see [1.BK.53.^.](#))
-
- 1.BK.09.HA-DV using percutaneously inserted electrical stimulation device [e.g. neurostimulator]
1.BK.09.JA-DV using external electrical stimulation device
Includes: that without implanted electrical stimulation device in situ
-

1.BK.35.^.^ Pharmacotherapy (local), vagus nerve

- Includes:** Block, vagus nerve for pain control
-
- 1.BK.35.HA-J2 using percutaneous (needle) injection of corticosteroid agent
Includes: prednisone, dexamethasone, fludrocortisone
1.BK.35.HA-P1 using percutaneous (needle) injection of local anesthetic agent
-

1.BK.53.^.^ Implantation of internal device, vagus nerve**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

- Includes:** Gastric Electrical Stimulation (GES)
Insertion, gastric pacemaker
Insertion, neurostimulator device, vagus nerve
that for gastric pacing
- Excludes:** Insertion, vagal nerve pacemaker, extracranial (head and neck region) (see [1.BB.53.^^](#))
Insertion, vagal nerve pacemaker, intracranial (see [1.BA.53.^^](#))
Replacement of pulse generator/battery, neurostimulator (see [1.YY.54.^^](#))
Stimulation, vagus nerve using external stimulation device (see [1.BK.09.^^](#))

1.BK.53.DA-DV using endoscopic [laparoscopic] approach and electrical stimulation device
1.BK.53.LA-DV using open approach and electrical stimulation device

1.BK.55.^^ Removal of internal device, vagus nerve

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

- Includes:** Removal, gastric electrical stimulation device
Removal, neurostimulator device, vagus nerve
- Excludes:** Removal of pulse generator/battery, neurostimulator (see [1.YY.55.^^](#))

1.BK.55.DA-DV of electrical stimulation device using endoscopic [laparoscopic] approach
1.BK.55.LA-DV of electrical stimulation device using open approach

1.BK.59.^^ Destruction, vagus nerve

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

- Includes:** Vagotomy [proximal, parietal cell, highly selective, truncal, NOS]
- Excludes:** Vagotomy with [diversionary] bypass, small intestine (see [1.NK.76.^^](#))
Vagotomy with gastrectomy (see [1.NF.87.^^](#))
Vagotomy with gastric bypass (see [1.NF.76.^^](#))
Vagotomy with pancreaticoduodenectomy (see [1.OK.87.^^](#))
Vagotomy with pyloroplasty (see [1.NE.80.^^](#))

1.BK.59.^.^ Destruction, vagus nerve	endoscopic [laparoscopic] approach	open approach
using proximal technique	1.BK.59.EL Includes: <ul style="list-style-type: none"> Highly selective vagotomy Parietal (cell) vagotomy Partial denervation of stomach 	1.BK.59.VY Includes: <ul style="list-style-type: none"> Highly selective vagotomy Parietal (cell) vagotomy Partial denervation of stomach
using truncal technique	1.BK.59.EK Includes: <ul style="list-style-type: none"> (Selective) vagotomy Total denervation of stomach 	1.BK.59.XN Includes: <ul style="list-style-type: none"> (Selective) vagotomy Total denervation of stomach

1.BM.^.^ Therapeutic Interventions on Nerve(s) of Upper Arm and Elbow

- Includes:** Axillary nerve
Cubital tunnel
Cutaneous nerve of upper arm
Median nerve NEC
Radial nerve NEC
Radial tunnel
Suprascapular nerve
Ulnar nerve NEC
- Excludes:** Median nerve at wrist (see [1.BN.^.^](#))
Nerves of the forearm and wrist (see [1.BN.^.^](#))
Posterior interosseous nerve (see [1.BN.^.^](#))
Ulnar nerve at wrist (see [1.BN.^.^](#))

1.BM.11.^.^ Anesthetization, nerve(s) of upper arm and elbow

L²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Block, regional, nerves of upper arm for operative anesthesia

Excludes: Nerve block for pain control (see [1.BM.35.^.](#))

1.BM.11.HA-P1 using percutaneous (needle) injection of local anesthetic agent

1.BM.35.^ ^ Pharmacotherapy (local), nerve(s) of upper arm and elbow**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Block, nerves of upper arm and elbow for pain control
Injection, suprascapular nerve

Excludes: that for operative anesthesia (see [1.BM.11.^ ^](#))

1.BM.35.HA-J2 using percutaneous (needle) injection of corticosteroid agent
Includes: prednisone, dexamethasone, fludrocortisone

1.BM.35.HA-P1 using percutaneous (needle) injection of local anesthetic agent

1.BM.58.^ ^ Procurement, nerve(s) of upper arm and elbow**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Procurement, cutaneous nerve of upper arm

1.BM.58.LA using open approach

1.BM.72.^ ^ Release, nerve(s) of upper arm and elbow**S** ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes:

- Decompression, median nerve NEC
- Decompression, nerve(s) of elbow
- Decompression, nerve(s) of forearm and elbow
- Decompression, radial nerve NEC
- Decompression, ulnar nerve NEC
- Neurolysis, median nerve NEC
- Neurolysis, radial nerve NEC
- Neurolysis, ulnar nerve NEC
- Release, cubital tunnel
- Release, radial tunnel

Excludes:

- Neurolysis, posterior interosseous nerve (see [1.BN.72.^ ^](#))
- that with nerve autograft (see [1.BM.87.^ ^](#))
- that with transection of nerve and reapposition of nerve ends (see [1.BM.80.^ ^](#))

Note: Involves freeing nerve from compression of adjacent tissues and may involve placement (or "transposition") of nerve more deeply within soft tissue to prevent future compression.

1.BM.72.LA using open approach

1.BM.80.^ ^ Repair, nerve(s) of upper arm and elbow**S** ⁷ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 7	Optional	Tx Status 3	Status	A	Abandoned after onset
				D P	Delayed primary (repair occurring 2 to 14 days post trauma)
				D S	Delayed secondary (repair occurring >14 days post trauma)
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Neurorrhaphy, arm**Excludes:** that with nerve autograft, arm (see [1.BM.87.^ ^](#))
that with transposition of nerves [e.g. axillary to suprascapular nerve (see [1.BM.87.^ ^](#))**Code Also:** Any concomitant removal of foreign body, soft tissue of upper arm (see [1.TX.56.^ ^](#))**Note:** May involve a neurolysis to free nerve from compression with a minor trimming of damaged tissue and concomitant reapposition of nerve ends.

1.BM.80.LA	using end to end suture [rejoining] technique
1.BM.80.LA-W3	using fibrin glue [rejoining] technique
1.BM.80.UH	using interfascicular [split] repair [rejoining] technique

1.BM.87.^ ^ Excision partial, nerve(s) of upper arm and elbow**S** ⁷ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 7	Optional	Tx Status 3	Status	A	Abandoned after onset
				D P	Delayed primary (repair occurring 2 to 14 days post trauma)
				D S	Delayed secondary (repair occurring >14 days post trauma)
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Neurectomy, upper arm and elbow
 Neuroplasty with nerve autograft
 Resection, nerve of upper arm and elbow
 Transposition, [sensory] radial to median nerve of arm
 Transposition, accessory nerve to nerve of arm
 Transposition, axillary nerve to nerve of arm

Excludes: Transposition without transection of nerve for decompression (see [1.BM.72.^ ^](#))
 Trimming with end to end repair, nerve of arm (see [1.BM.80.^ ^](#))

Note: Involves the resection of damaged or diseased [e.g. neoplastic] nerve tissue which may then require a concomitant repair using a nerve autograft or transposition [nerve to nerve] due to lost nerve length to establish re-apposition of the nerve endings.

1.BM.87.^ ^ Excision partial, nerve(s) of upper arm and elbow	end to end [rejoining] technique (e.g. suture, glue)	interfascicular split repair [rejoining] technique	no rejoining (of nerve ends)
combined transposition of nerves with a nerve autograft	1.BM.87.LA-XX-Q	1.BM.87.UH-XX-Q	—
autograft (nerve or vein) to replace lost length	1.BM.87.LA-XX-A	1.BM.87.UH-XX-A	—
nerve end buried	—	—	1.BM.87.WF
nerve end fascicles coagulated (and buried)	—	—	1.BM.87.WG
simple apposition of nerve ends	1.BM.87.LA	1.BM.87.UH	—
nerve end(s) wrapped or bridged using synthetic tissue [e.g. neural tube]	—	—	1.BM.87.LA-XX-N
transposition of nerves [e.g. crossover]	1.BM.87.LA-XX-E	1.BM.87.UH-XX-E	—

1.BN.^^.^^ Therapeutic Interventions on Nerve(s) of Forearm and Wrist

Includes:

- Carpal tunnel
- Guyon's canal
- Median nerve at forearm and wrist
- Median with ulnar nerve at wrist
- Posterior interosseous nerve
- Ulnar nerve at forearm and wrist

1.BN.72.^^ Release, nerve(s) of forearm and wrist**S** 15 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 15	Optional	Tx Status 9	Status	A	Abandoned after onset

Excludes: Removal of pulse generator/battery, neurostimulator (see [1.YY.55.^ ^](#))

1.BS.55.LA-DV of electrical stimulation device using open approach

1.BS.58.^ ^ Procurement, nerve(s) of pelvis, hip and thigh (and lower trunk)**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Procurement, cutaneous femoral nerve

1.BS.58.LA using open approach

1.BS.59.^ ^ Destruction, nerve(s) of pelvis, hip and thigh (and lower trunk)**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Destruction, sciatic nerve

1.BS.59.HA-X7 using percutaneous approach with chemical cautery agent [e.g. alcohol]

1.BS.59.LA using open approach with transection [or avulsion] technique

1.BS.59.LA-X7 using open approach with chemical cautery agent [e.g. alcohol]

1.BS.72.^ ^ Release, nerve(s) of pelvis, hip and thigh (and lower trunk)**S** ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Decompression, nerve of pelvis, hip and thigh
 Neurolysis, pelvis, hip and thigh
 Release, femoral cutaneous nerve [from inguinal ligament]

Excludes: that with nerve autograft (see [1.BS.87.^ ^](#))
 that with transection of digital nerve and re- apposition of nerve ends (see [1.BS.80.^ ^](#))

Note: Involves freeing nerve from compression of adjacent tissues and may involve placement (or "transposition") of nerve more deeply within soft tissue to prevent future compression.

1.BS.72.LA using open approach

1.BS.80.^ ^ Repair, nerve(s) of pelvis, hip and thigh (and lower trunk)**S** ⁷ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 7	Optional	Tx Status 3	Status	A	Abandoned after onset
				D P	Delayed primary (repair occurring 2 to 14 days post trauma)
				D S	Delayed secondary (repair occurring >14 days post trauma)
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Neurorrhaphy, pelvis, hip and thigh
Excludes: that with nerve autograft, pelvis, hip and thigh (and lower trunk) (see [1.BS.87.^^](#))
Note: May involve a neurolysis to free nerve from compression with a minor trimming of damaged tissue and concomitant re- apposition of nerve ends.

1.BS.80.LA using end to end suture [rejoining] technique
 1.BS.80.LA-W3 using fibrin glue [rejoining] technique
 1.BS.80.UH using interfascicular [split] repair [rejoining] technique

1.BS.87.^^ Excision partial, nerve(s) of pelvis, hip and thigh (and lower trunk)

S ⁷ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 7	Optional	Tx Status 3	Status	A	Abandoned after onset
				D P	Delayed primary (repair occurring 2 to 14 days post trauma)
				D S	Delayed secondary (repair occurring >14 days post trauma)
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Ganglionectomy, hip [femoral, sciatic]
 Neurectomy, pelvis, hip and thigh
 Neuroplasty with nerve autograft, pelvis, hip and thigh
 Resection, nerve of pelvis, hip and thigh

Excludes: Splanchnicectomy (see [1.BF.59.^^](#))
 Transposition without transection of nerve for decompression (see [1.BS.72.^^](#))
 Trimming, nerve of pelvis, hip and thigh [for end to end repair] (see [1.BS.80.^^](#))

Note: Involves the resection of damaged or diseased [e.g. neoplastic] nerve tissue which may then require a concomitant repair using a nerve autograft or nerve-to-nerve transposition, due to lost nerve length, to establish re-apposition of the nerve endings.

1.BS.87.^.^ Excision partial, nerve(s) of pelvis, hip and thigh (and lower trunk)	end to end [rejoining] technique (e.g. suture, glue)	interfascicular split repair [rejoining] technique	no rejoining (of nerve ends)
combined transposition of nerves with a nerve autograft	1.BS.87.LA-XX-Q	1.BS.87.UH-XX-Q	—
nerve autograft (to replace lost length)	1.BS.87.LA-XX-A	1.BS.87.UH-XX-A	—
nerve homograft (to replace lost length)	1.BS.87.LA-XX-K	—	—
nerve end buried	—	—	1.BS.87.WF
nerve end fascicles coagulated (and buried)	—	—	1.BS.87.WG
simple apposition of nerve ends	1.BS.87.LA	1.BS.87.UH	—
nerve end(s) wrapped or bridged using synthetic tissue [e.g. neural tube]	—	—	1.BS.87.LA-XX-N
transposition of nerves [e.g. crossover]	1.BS.87.LA-XX-E	1.BS.87.UH-XX-E	—

1.BT.^.^.^ Therapeutic Interventions on Nerve(s) of the Lower Leg

Includes:

- Nerves at ankle
- Nerves at knee
- Peroneal nerve NEC
- Saphenous nerve
- Sciatic nerve at tibial level
- Sural nerve
- Tarsal tunnel
- Tibial nerve NEC

Excludes:

- Peroneal nerve at buttock level (see [1.BS.^.^.^](#), peroneal division of sciatic nerve)
- Tibial nerve at buttock level (see [1.BS.^.^.^](#), tibial division of sciatic nerve)

1.BT.11.^.^ Anesthetization, nerve(s) of lower leg

L ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes:

- Block, regional, nerves of lower leg for operative anesthesia

Excludes:

- Nerve block for pain control (see [1.BT.35.^.](#))

1.BT.11.HA-P1 using percutaneous (needle) injection of local anesthetic agent

1.BT.35.^ ^ Pharmacotherapy (local), nerve(s) of lower leg**L** ²

L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Block, nerves of lower leg for pain control

Excludes: that for operative anesthesia (see [1.BT.11.^ ^](#))

1.BT.35.HA-J2 using percutaneous (needle) injection of corticosteroid agent
Includes: prednisone, dexamethasone, fludrocortisone

1.BT.35.HA-P1 using percutaneous (needle) injection of local anesthetic agent

1.BT.58.^ ^ Procurement, nerve(s) of lower leg**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Procurement, sural nerve

1.BT.58.DA using endoscopic approach

1.BT.58.LA using open approach

1.BT.59.^ ^ Destruction, nerve(s) of lower leg**S** ⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Lesioning of calcaneal nerve/branches

1.BT.59.LA-AD open approach using cryoprobe
1.BT.59.LA-AW open approach using radiofrequency probe

1.BT.72.^ ^ Release, nerve(s) of lower leg

S 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Decompression, nerve of leg [from knee to foot]
Neurolysis, leg [from knee to foot]
Release, tarsal tunnel

Excludes: that with nerve autograft (see [1.BT.87.^ ^](#))
that with transection of digital nerve and re-apposition of nerve ends (see [1.BT.80.^ ^](#))

Note: Involves freeing nerve from compression of adjacent tissues and may involve placement (or "transposition") of nerve more deeply within soft tissue to prevent future compression.

1.BT.72.LA using open approach

1.BT.80.^ ^ Repair, nerve(s) of lower leg

S 7 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 7	Optional	Tx Status 3	Status	A	Abandoned after onset
				D P	Delayed primary (repair occurring 2 to 14 days post trauma)
				D S	Delayed secondary (repair occurring >14 days post trauma)
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Neurorrhaphy, leg
- Excludes:** Neuroplasty with nerve graft, leg (see [1.BT.87.^^](#))
Neurorrhaphy, pelvis, hip and thigh (see [1.BS.80.^^](#))
- Code Also:** Any concomitant removal of foreign body, soft tissue of thigh or lower leg (see [1.VX.56.^^](#))
- Note:** May involve a neurolysis to free nerve from compression with minor resection of damaged tissue and concomitant neurorrhaphy

1.BT.80.LA using end to end suture [rejoining] technique
 1.BT.80.LA-W3 using fibrin glue [rejoining] technique
 1.BT.80.UH using interfascicular [split] repair [rejoining] technique

1.BT.87.^^ Excision partial, nerve(s) of lower leg

S ⁷ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 7	Optional	Tx Status 3	Status	A	Abandoned after onset

				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Neurectomy, leg [from knee to foot]
Neuroplasty with nerve autograft, leg [from knee to foot]
Resection, nerve of leg [from knee to foot]
Transposition, tibial to peroneal nerve
- Excludes:** Neurectomy, pelvis, hip and thigh region (see [1.BS.87.^^](#))
Transposition without transection of nerve for decompression (see [1.BT.72.^^](#))
Trimming with end to end repair, nerve of leg (see [1.BT.80.^^](#))
- Note:** Involves the resection of damaged or diseased [neoplastic] nerve with or without concomitant re-apposition of nerve ends.

1.BT.87.^.^ Excision partial, nerve(s) of lower leg	end to end [rejoining] technique [e.g. suture, glue]	interfascicular split repair [rejoining] technique	no rejoining (of nerve ends)
combined transposition of nerves with a nerve autograft	1.BT.87.LA-XX-Q	1.BT.87.UH-XX-Q	—
nerve autograft (to replace lost length)	1.BT.87.LA-XX-A	1.BT.87.UH-XX-A	—
nerve end buried	—	—	1.BT.87.WF Includes: • neurectomy NOS, lower leg
nerve end fascicles coagulated (and buried)	—	—	1.BT.87.WG
simple apposition of nerve ends	1.BT.87.LA	1.BT.87.UH	—
nerve end(s) wrapped or bridged using synthetic tissue [e.g. neural tube]	—	—	1.BT.87.LA-XX-N
transposition of nerves [e.g. crossover]	1.BT.87.LA-XX-E	1.BT.87.UH-XX-E	—

1.BX.^.^ Therapeutic Interventions on Peripheral Nerves NEC

Includes: Nerve NEC

1.BX.09.^.^ Stimulation, peripheral nerves NEC

Includes: Insertion, electrode, neurostimulator, peripheral nerve [any site]

1.BX.09.HA-DV	using percutaneously inserted electrical stimulation device
1.BX.09.JA-DV	using external electrical stimulation device

1.BX.11.^.^ Anesthetization, peripheral nerves NEC

Includes: Block, regional, peripheral nerve NEC for operative anesthesia that using subarachnoid or ganglion approach

Excludes: Destruction, peripheral nerve NEC (see [1.BX.59.^.](#))
Nerve block for pain control (see [1.BX.35.^.](#))

1.BX.11.HA-P1	using percutaneous (needle) injection of local anesthetic agent
---------------	---

1.BX.35.^.^ Pharmacotherapy (local), peripheral nerves NEC

Includes: Block, peripheral nerves NEC for pain control
Thoracic paravertebral nerve block

Excludes: that for operative anesthesia (see [1.BX.11.^.](#))

1.BX.35.HA-J2	using percutaneous (needle) injection of corticosteroid agent
	Includes: prednisone, dexamethasone, fludrocortisone
1.BX.35.HA-P1	using percutaneous (needle) injection of local anesthetic agent
1.BX.35.HH-P1	using percutaneous catheter infusion of local anesthetic agent

1.BX.53.^.^ Implantation of internal device, peripheral nerves NEC**S**⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Implantation, neurostimulator device, peripheral nerve [any site]

Excludes: Replacement of pulse generator/battery, neurostimulator (see [1.YY.54.^.](#))

1.BX.53.LA-DV	of electrical stimulation device using open approach
---------------	--

1.BX.55.^.^ Removal of device, peripheral nerves NEC

Includes: Removal, neurostimulator device, peripheral nerve [any site]

Excludes: Removal of pulse generator/battery, neurostimulator (see [1.YY.55.^.](#))

1.BX.55.HA-DV	of electrical stimulation device using percutaneous approach
1.BX.55.LA-DV	of electrical stimulation device using open approach

1.BX.59.^.^ Destruction, peripheral nerves NEC**S**⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Ablation, peripheral nerves NEC

1.BX.59.HA-AW	using percutaneous approach with radiofrequency probe
1.BX.59.HA-X7	using percutaneous approach with chemical cautery agent [e.g. alcohol]
1.BX.59.LA	using open approach with transection [or avulsion] technique
1.BX.59.LA-X7	using open approach with chemical cautery agent [e.g. alcohol]

1.BX.72.^ ^ Release, peripheral nerves NEC

S 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Decompression, peripheral nerve NEC
Neurolysis, peripheral nerve NEC

1.BX.72.LA	using open approach
------------	---------------------

1.BX.80.^ ^ Repair, peripheral nerves NEC

S 7

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 7	Optional	Tx Status 3	Status	A	Abandoned after onset
				D P	Delayed primary (repair occurring 2 to 14 days post trauma)
				D S	Delayed secondary (repair occurring >14 days post trauma)
				R	Revision

Includes: Neurorrhaphy, peripheral nerve NEC

Excludes: that with nerve autograft (see [1.BX.87.^ ^](#))

Note: May involve a neurolysis to free nerve from compression with a minor trimming of damaged tissue and concomitant re- apposition of nerve ends.

1.BX.80.LA	using end to end suture [rejoining] technique
1.BX.80.LA-W3	using fibrin glue [rejoining] technique

1.BX.87.^.^ Excision partial, peripheral nerves NEC**S** 7

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 7	Optional	Tx Status 3	Status	A	Abandoned after onset
				D P	Delayed primary (repair occurring 2 to 14 days post trauma)
				D S	Delayed secondary (repair occurring >14 days post trauma)
				R	Revision

Includes: Neurectomy, peripheral NEC
Resection peripheral nerve NEC

Note: Involves the resection of damaged or diseased [neoplastic] nerve with or without concomitant re-apposition of nerve ends.

1.BX.87.LA	simple reapposition of nerve by end to end [rejoining] technique (e.g. suture, glue)
1.BX.87.LA-XX-A	reapposition of nerve by end to end [rejoining] technique (e.g. suture, glue) using a nerve autograft (to replace lost length)
1.BX.87.LA-XX-N	nerve end(s) wrapped or bridged using synthetic tissue (e.g. neural tube)
1.BX.87.WF	nerve end buried (e.g. in muscle)
1.BX.87.WG	nerve end fascicles coagulated [and buried]

1.BZ.^.^ Therapeutic Interventions on Nervous System NEC**1.BZ.94.^.^ Therapeutic intervention NEC, nervous system NEC**

1.BZ.94.HA	using percutaneous (needle) approach
1.BZ.94.LA	using open approach

Therapeutic Interventions on the Eye and Ocular Adnexa (1CC - 1CZ)

1.CC.^.^ Therapeutic Interventions on Cornea

Includes:	Bowman's membrane [layer][anterior lamina] stroma Corneal epithelium Descemet's membrane [posterior elastic lamina] corneal endothelium
Excludes:	Cornea with sclera (see 1.CE.^.^)

1.CC.07.^.^ Hyperthermy, cornea

Includes:	Application of heat, cornea that for treatment of acute hydrops of cornea
Excludes:	Application of heat to eye (see 1.CZ.07.^.)

1.CC.07.JA-KH	using hot (dry) air
1.CC.07.JA-KJ	using steam

1.CC.09.^.^ Stimulation, cornea

Includes:	Needling , cornea Wounding, cornea
Note:	Involves needle wounding the cornea (for recurrent corneal erosion) to stimulate output adherence.
1.CC.09.HA	using percutaneous (needle) approach

1.CC.12.^.^ Therapy, cornea

Includes:	Epithelium on (transepithelial) corneal collagen cross linking
Excludes:	Epithelium off corneal collagen cross linking (see 1.CC.87.LA-DQ)
Code Also:	Administration of riboflavin (B2) drops for corneal collagen cross linking (see 1.CZ.35.JA-B2)
1.CC.12.JA-DQ	using external approach and ultraviolet UV light

1.CC.14.^.^ Dressing, cornea

Includes:	Application of moist chamber (for exposed cornea after burn)
Excludes:	Application of pad, shield or dressing (see 1.CZ.14.^.)
1.CC.14.JA-KN	using moist chamber

1.CC.55.^ ^ Removal of device, cornea**S** 4 **L** 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

1.CC.55.LA-LC of alloplastic optical cylinder [keratoprosthesis] using incisional approach

1.CC.58.^ ^ Procurement, cornea

1.CC.58.LA using open [incisional] approach
Includes: Procurement of limbal stem cells from contralateral [healthy] eye
1.CC.58.LA-XX-K of homograft from deceased donor
Includes: Procurement, corneal button or limbal stem cells
Trephination, cornea

1.CC.59.^ ^ Destruction, cornea**S** 4 **L** 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Ablation
Intrastromal ablation
that for destruction of lesion
that for erosion or degeneration by destruction of the corneal epithelium

Excludes: Refractive intrastromal ablation (see [1.CC.84.^ ^](#))

1.CC.59.JA-AD using cryoprobe [cryotherapy]
1.CC.59.JA-AG using laser [e.g. Excimer laser]
Includes: Phototherapeutic keratectomy
1.CC.59.JA-GX using device NEC [cauterization]
1.CC.59.JA-Z9 using chelating agent [e.g. EDTA]

1.CC.80.^ ^ Repair, cornea**S** 5 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes:

Closure, corneal or corneoscleral fistula
 Repair, corneal or corneoscleral fistula
 Repair, corneal wound dehiscence (post cataract)
 Repair, traumatic wound with involvement of cornea (and sclera)
 Repositioning, prolapsed iris
 Suture, macro perforation of cornea
 that for detachment of Descemet's membrane
 that with excision or closure of filtering bleb
 that with or without restoration of anterior chamber by injection of air or saline
 that with overlap into sclera
 that with placement of compression sutures

Excludes:

Closure or revision of filtering bleb (post-glaucoma surgery) alone (see [1.CS.80.^ ^](#))
 Endothelial keratoplasty (see [1.CC.85.^ ^](#))
 Needling, cornea (see [1.CC.09.^ ^](#))
 Penetrating keratoplasty (see [1.CC.85.^ ^](#))
 Refractive keratoplasty (see [1.CC.84.^ ^](#))
 Repair of filtering bleb with corneal transplant (see [1.CC.85.^ ^](#))

1.CC.80.LA	using simple closure [suture]
1.CC.80.LA-W4	using glue
1.CC.80.LA-XX-A	using autograft [e.g. conjunctival flap]
1.CC.80.LA-XX-K	using homograft [e.g. "blow-out" patch, amniotic membrane transplant (AMT) or graft]
1.CC.80.LA-XX-Q	using combined sources of tissue

1.CC.83.^ Transfer, cornea**S** 4 **L** 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Code Also: Any procurement of limbal stem cells from contralateral [healthy] eye (see [1.CC.58.^](#))

1.CC.83.LA-XX-A of autograft using open [incisional] approach

Includes: Limbal stem cell transplantation [transfer] from contralateral [healthy] eye

1.CC.84.^ Construction or reconstruction, cornea**S** 5 **L** 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Correction of refractive errors
Refractive corneal surgery

Excludes: Endothelial keratoplasty (see [1.CC.85.^](#))
Penetrating keratoplasty (see [1.CC.85.^](#))

Code Also: Any (pre-treatment) corneal collagen cross linking (see [1.CC.12.JA-DQ](#))

1.CC.84.^ Construction or reconstruction, cornea	using diathermy device	using laser	using scalpel or diamond blade
arcuate incision	—	1.CC.84.RT-AG Includes: • that for (surgically induced) astigmatism	1.CC.84.RT Includes: • that for (surgically induced) astigmatism
epikeratophakia [epikeratoplasty]	—	1.CC.84.VP-AG-K	1.CC.84.VP-XX-K
keratomileusis	—	1.CC.84.NQ-AG Includes: • Automated lamellar keratoplasty, cryolathe technique • LASIK [laser assisted in situ keratomileusis]	1.CC.84.NQ Includes: • Automated lamellar keratoplasty, cryolathe technique
keratophakia	—	1.CC.84.WL-AG-K	1.CC.84.WL-XX-K
keratotomy [radial, hexagonal]	—	1.CC.84.WK-AG	1.CC.84.WK
photorefractive keratectomy [PRK]	—	1.CC.84.VP-AG Includes: • Laser sculpting	—
using (intrastromal) synthetic ring	—	1.CC.84.WL-AH Includes: • Insertion of intracorneal ring	1.CC.84.WL-FE Includes: • Insertion of intracorneal ring
using alloplastic corneal implant	—	1.CC.84.LA-AH Includes: • Blepharokeratoplasty • Insertion of (temporary) keratoprosthesis, intracorneal lens • Prosthokeratoplasty	1.CC.84.LA-LC Includes: • Blepharokeratoplasty • Insertion of (temporary) keratoprosthesis, intracorneal lens • Prosthokeratoplasty
using other refractive techniques [e.g. intrastromal ablation or puncture, thermal keratoplasty]	1.CC.84.TA-HB	1.CC.84.TA-AG Includes: • Pico second laser	1.CC.84.TA
wedge resection of cornea	—	1.CC.84.WJ-AG Includes: • that for (surgically induced) astigmatism	1.CC.84.WJ Includes: • that for (surgically induced) astigmatism

1.CC.85.^ ^ Transplant, cornea**S** 5 **L** 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Endothelial keratoplasty
Lamellar keratoplasty
Penetrating keratoplasty

Excludes: Refractive keratoplasty (see [1.CC.84.^ ^](#))
Transfer of autograft limbal cells from contralateral [healthy] eye (see [1.CC.83.^ ^](#))

1.CC.85.HA-U7-K	using percutaneous approach and donor limbal stem cells
1.CC.85.LA-XX-K	using open approach and donor full thickness homograft
	Includes: Keratoplasty with homograft NOS
1.CC.85.LL-XX-H	using open anterior approach and donor partial thickness homograft
	Includes: Deep anterior lamellar keratoplasty [DALK]
1.CC.85.PF-XX-H	using open posterior approach and donor partial thickness homograft
	Includes: Deep lamellar endothelial keratoplasty [DLEK] Descemet's stripping automated endothelial keratoplasty [DSAEK, DSEK]
1.CC.85.WJ-XX-H	using open posterior approach with special excisional technique and donor partial thickness homograft
	Includes: Descemet's membrane endothelial keratoplasty [DMEK]

1.CC.87.^ ^ Excision partial, cornea**S** 4 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Abrasion, cornea
 Abscission, cornea
 Excision of pterygium
 Excision of retro prosthetic membrane
 Keratectomy, lamellar [partial, superficial]
 Removal [curettage], corneal epithelium
 Shaving, cornea
 that with or without chemo cauterization
- Excludes:** that done for refractive errors of cornea (see [1.CC.84.^^](#))
 that done with evisceration of eye (see [1.CP.87.^^](#))
 Wedge resection of cornea (for astigmatism) (see [1.CC.84.^^](#))

1.CC.87.LA	using mechanical removal
1.CC.87.LA-DQ	using mechanical removal and ultraviolet UV light
	Includes: Epithelium off corneal collagen cross linking
	Excludes: Epithelium on (transepithelial) corneal collagen cross linking (see 1.CC.12.JA-DQ)
	Code Also: Administration of riboflavin (B2) drops for corneal collagen cross linking (see 1.CZ.35.JA-B2)
1.CC.87.LA-XX-A	using mechanical removal and autograft [e.g. conjunctival flap]
1.CC.87.LA-XX-K	using mechanical removal and homograft (e.g. amniotic membrane transplant [AMT] or graft)

1.CD.^^.^^ Therapeutic Interventions on the Sclera

- Includes:** Limbus [border]
 Schlemm's canal
 Sclerocorneal junction [corneoscleral junction]
- Excludes:** Sclera with cornea (see [1.CE.^^.^^](#))

1.CD.52.^^ Drainage, sclera

S 4 **L** 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Fistulization, sclera
that for glaucoma
that with or without iridectomy
- Excludes:** Deep sclerectomy (for glaucoma) (see [1.CJ.52.^^](#))
Laser trabeculoplasty (see [1.CJ.52.^^](#))
Sclerectomy for excision of lesion (see [1.CD.87.^^](#))
Trabeculectomy (see [1.CJ.52.^^](#))

1.CD.52.LA	using excisional technique
Includes:	Posterior lip punch sclerectomy (full thickness drainage) Trephination
1.CD.52.LA-AG	using laser
Includes:	Laser sclerostomy (e.g. Holmium) Trabeculostomy
1.CD.52.LA-HB	using diathermy [thermocauterization]
Includes:	Intrascleral thermosclerostomy Thermal sclerostomy
Excludes:	Ablation of trabecular meshwork for glaucoma [e.g. Trabectome] (see 1.CJ.52.^^)

1.CD.53.^^ Implantation of internal device, sclera**S** 5 **L** 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** that for retinal detachment
- Excludes:** that for glaucoma (see [1.CJ.52.^^](#))
that for radiation plaques (see [1.CZ.26.^^](#))
- Code Also:** Destruction, retinal detachment, tear or lesion (see [1.CN.59.^^](#))

1.CD.53.LA-KS	of scleral implant
1.CD.53.LA-KT	of scleral buckle [explant]

1.CD.54.^ ^ Management of internal device, sclera**S** 4 **L** 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Adjustment of device
Release, encircling material

1.CD.54.LA-KT of scleral buckle [explant]

1.CD.55.^ ^ Removal of device, sclera**S** 4 **L** 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

1.CD.55.LA-KS of scleral implant
1.CD.55.LA-KT of scleral buckle [explant]

1.CD.59.^ ^ Destruction, sclera**S** 4 **L** 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Excludes: Ablation trabecular meshwork for glaucoma (see [1.CJ.52.^^](#))
 Destruction, ciliary body for glaucoma (see [1.CG.59.^^](#))
 Thermal sclerostomy for glaucoma (see [1.CD.52.^^](#))

1.CD.59.LA-AD using cryoprobe [cryotherapy]
 1.CD.59.LA-AG using laser
 1.CD.59.LA-GX using device NEC [cauterization]
 1.CD.59.LA-X7 using chemocautery

1.CD.80.^^ Repair, sclera

S ⁷ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 7	Optional	Tx Status 3	Status	A	Abandoned after onset
				D P	Delayed primary (repair occurring 2 to 14 days post trauma)
				D S	Delayed secondary (repair occurring >14 days post trauma)
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Closure, scleral fistula
 Reinforcement, sclera
 Repair, scleral fistula
 that with excision or closure of filtering bleb
 that with graft

Excludes: Closure or revision of filtering bleb (post-glaucoma surgery) alone (see [1.CS.80.^^](#))
 that with overlap into cornea (see [1.CC.80.^^](#))
 that with rupture of globe (see [1.CP.80.^^](#))

Note: Use Status attribute to indicate delayed closure

1.CD.80.LA using simple suture
 1.CD.80.LA-XX-A using autograft
 1.CD.80.LA-XX-K using homograft

Omit code: When patch graft is applied following insertion of an aqueous shunt (for glaucoma) (see [1.CJ.52.LA-SJ](#))

1.CD.87.^ ^ Excision partial, sclera**S** 4 **L** 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Sclerectomy
that for excision of lesion

Excludes: Posterior lip punch sclerectomy (see [1.CD.52.^ ^](#))
that for drainage of aqueous (see [1.CD.52.^ ^](#))
that for glaucoma (see [1.CD.52.^ ^](#))

1.CD.87.LA using incisional approach

1.CE.^ ^.^ Therapeutic Interventions on the Cornea with Sclera

Excludes: Cornea alone (see [1.CC.^ ^.^](#))
Sclera alone (see [1.CD.^ ^.^](#))

1.CE.35.^ ^ Pharmacotherapy (local), cornea with sclera

- Includes:** Flushing, cornea with sclera
Injection, cornea and/or sclera
Instillation, cornea and/or sclera
Irrigation, cornea with sclera
that with direct application for local effect
- Excludes:** Instillation of anesthetic, eye (see [1.CZ.35.^ ^](#))
Irrigation for removal of foreign body (see [1.CE.56.^ ^](#))
Systemic pharmacotherapy (see [1.ZZ.35.^ ^](#))
that for removal of foreign body (see [1.CE.56.^ ^](#))

1.CE.35.HA-Q5	of ophthalmologic agent using needle injection
	Includes: antiinfectives, antiinflammatory agents, mydriatics, cycloplegics
1.CE.35.JA-D1	of antiinfective irrigating solution using external approach
	Includes: chlorhexidine, neomycin
1.CE.35.JA-D2	of salt irrigating solution using external approach
	Includes: sodium chloride
1.CE.35.JA-D3	of other irrigating solution using external approach
	Includes: sorbitol, mannitol
1.CE.35.JA-Q5	of ophthalmologic agent using external approach
	Includes: antiinfectives, antiinflammatory agents, mydriatics, cycloplegics
1.CE.35.JA-X9	of water using external approach

1.CE.55.^ ^ Removal of device, cornea with sclera**S** 4 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Suture removal, cornea and/or sclera
- Excludes:** Removal of radiation implants (see [1.CZ.55.^ ^](#))

1.CE.55.JA-FF	of sutures
---------------	------------

1.CE.56.^.^ Removal of foreign body, cornea with sclera**S** 4 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Extraction of (superficial) foreign body, cornea and sclera
Removal of (deep penetrating) foreign body, cornea and sclera

Note: May involve slit lamp magnification and/or instillation of fluorescein or other dye to visualize the foreign body and will often include irrigation.

1.CE.56.JA	using external manual technique [e.g. cotton, needle, spud]
1.CE.56.JA-D2	using external irrigation [saline, water] alone
1.CE.56.JA-LZ	using external approach and magnet
1.CE.56.LA	using incisional approach with device NEC
1.CE.56.LA-LZ	using incisional approach and magnet

1.CF.^.^ Therapeutic Interventions on the Choroid**1.CF.52.^.^ Drainage, choroid****S** 4 **L** 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Drainage, choroidal detachment
that by sclerotomy to gain access to the choroid
that with or without injection of balanced salt solution and/or viscous solutions

1.CF.52.LA	using incisional approach
1.CF.52.LA-AG	using laser

1.CF.59.^ Destruction, choroid**S** 4 **L** 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

1.CF.59.LA-AD using cryoprobe [cryotherapy]
 1.CF.59.LA-AG using laser
 1.CF.59.LA-GX using device NEC
 1.CF.59.LA-X7 using chemocautery

1.CF.87.^ Excision partial, choroid**S** 4 **L** 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Sclerouvectomy (lamellar)

1.CF.87.LA using incisional approach

1.CF.91.^ Excision radical, choroid**S** 4 **L** 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Full thickness eye wall resection
Sclero chorioretinal resection
Sclerouveoretinovitrectomy

1.CF.91.LA using incisional approach

1.CG.^^.^^ Therapeutic Interventions on the Ciliary Body

1.CG.35.^^ Pharmacotherapy (local), ciliary body

Includes: Injection, ciliary sympathetic ganglion [e.g. for relief of intraocular tension]
Injection, opticociliary [e.g. for nerve block or other local effect]
Instillation, ciliary body

Excludes: Systemic pharmacotherapy (see [1.ZZ.35.^^](#))

1.CG.35.HA-P2 of analgesic agent NEC using needle injection
Includes: opioids (e.g. morphine, meperidine), acetylsalicylic acid, acetaminophen, ergotamine, sumatriptan
1.CG.35.HA-V0 of air or gas using needle injection
1.CG.35.HA-X7 of chemical (neurolytic) agent NEC [e.g. alcohol] using needle injection

1.CG.59.^^ Destruction, ciliary body

S 4 **L** 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: that for destruction of cyst or lesion
that for reduction of production of aqueous (e.g. glaucoma)

Excludes: Removal of epithelial down growth (see [1.CJ.87.^^](#))

1.CG.59.LA-AD using cryoprobe [cryotherapy]
Includes: Cyclocryotherapy
1.CG.59.LA-AG using laser
Includes: Cilioablation
Cyclo photocoagulation, transscleral
Photocoagulation
1.CG.59.LA-AZ using ultrasound [ultrasonic probe]
1.CG.59.LA-GX using device NEC

1.CG.71.^.^ Division, ciliary body**S** 4 **L** 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Anterior ciliary division
that for preservation during muscle surgery

1.CG.71.LA using incisional approach

1.CG.76.^.^ Bypass, ciliary body**S** 4 **L** 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Creation of cleft between ciliary body and sclera
Cyclodialysis
that with detachment of ciliary body to lower intraocular pressure

1.CG.76.LA using incisional approach

1.CG.80.^.^ Repair, ciliary body**S** 4 **L** 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Reattachment, ciliary body

1.CG.80.LA using simple suture

1.CG.87.^.^ Excision partial, ciliary body

S 4 **L** 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Ciliectomy
Excision, prolapsed ciliary body
Iridocyclectomy

Excludes: Excision partial, iris alone (see [1.CH.87.^.^](#))

1.CG.87.LA using open (incisional) approach

1.CH.^.^ Therapeutic Interventions on the Iris

Includes: Pupil

1.CH.59.^.^ Destruction, iris

S 4 **L** 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

1.CH.59.LA-AD using cryoprobe [cryotherapy]

1.CH.59.LA-AG using laser

1.CH.59.LA-GX using device NEC

1.CH.72.^ ^ Release, iris**S** 4 **L** 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Incision, (congenital) anterior hyaloid membrane
Release of synechiae
Synechialysis
that with or without injection of air or liquid

1.CH.72.LA using incisional approach

1.CH.72.LA-AG using laser

1.CH.80.^ ^ Repair, iris**S** 5 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Coreoplasty
Iridoplasty
that for iris coloboma

Excludes: Repositioning, prolapsed iris (see Repair, cornea [1.CC.80.^ ^](#))

1.CH.80.LA using incisional approach

1.CH.80.LA-AG using laser

Includes: Photocoagulation

1.CH.87.^.^ Excision partial, iris**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Corectomy
 Discission
 Excision, prolapsed iris
 Iridectomy (peripheral)
 Iridectomy (sector)
 Iridocystectomy (peripheral)
 Iridosclerotomy
 Iridotomy NOS (laser)
 Puncture
 Pupillotomy
 Sphincterotomy of iris
 that for drainage (for glaucoma)
 that with conjunctival flap raised for access to the iris

Excludes: that done with simultaneous lens extraction (see [1.CL.89.^.](#))
 that done with trabeculectomy (see [1.CJ.52.^.](#))
 that with scleral fistulization (see [1.CD.52.^.](#))

1.CH.87.LA	using incisional approach
	Includes: Iridotomy Peripheral iridectomy
1.CH.87.LA-AG	using laser
	Includes: Laser iridotomy Laser sphincterotomy that with keyhole pupil
1.CH.87.VH	using optical technique
	Includes: that with removal of inner ring of iris to widen abnormally small pupil

1.CJ.^.^ Therapeutic Interventions on Anterior Chamber (of eye)

Includes: Anterior chamber angle
 Anterior segment
 Trabecular meshwork

1.CJ.35.^.^ Pharmacotherapy (local), anterior chamber (of eye)

Includes: Injection, anterior chamber
 Instillation, anterior chamber
 Reformation, anterior chamber

Excludes: Systemic pharmacotherapy (see [1.ZZ.35.^.^](#))

1.CJ.35.HA-V0 of air or gas using needle injection
 1.CJ.35.HA-Z9 of chemical agent NEC using needle injection

1.CJ.52.^.^ Drainage, anterior chamber (of eye)**S** ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Filtering surgery NOS
 that for glaucoma
 that with iridectomy
 that with or without irrigation and/or injection of air or liquid

Excludes: Trabeculectomy (see [1.CD.52.^.^](#))

Code Also: Any concomitant lens extraction (see [1.CL.89.^.^](#))
 Any concomitant posterior vitrectomy (see [1.CM.89.^.^](#))

1.CJ.52.HA	using needle aspiration [paracentesis] Includes: Aspiration, anterior chamber (of eye) Evacuation, anterior chamber (of eye) that for therapeutic release of aqueous or blood Excludes: Aspiration, vitreous anterior chamber (see 1.CJ.52.LL) Aspiration, vitreous posterior chamber (see 1.CM.89.^^)
1.CJ.52.LA	using incisional approach with goniotomy Includes: Goniopuncture using knife, laser or needle that for infant glaucoma
1.CJ.52.LA-AG	using laser trabeculoplasty Includes: Argon laser trabeculoplasty [ALT] Selective laser trabeculoplasty [SLT] Titanium Sapphire laser trabeculoplasty [TiSaLT][e.g. SOLX DeepLight]
1.CJ.52.LA-HB	using open approach and diathermy Includes: Ablation of trabecular meshwork for glaucoma [e.g. Trabectome procedure] Excludes: Ablation of epithelial down growth (see 1.CJ.59.^^)
1.CJ.52.LA-SJ	using incisional approach with insertion of aqueous shunt with extraocular reservoir Includes: Nonvalved aqueous shunt [e.g. Baerveldt, Molteno, Schocket] that with (seton) (tube) shunt which communicates with plate placed under the conjunctiva (extraocular reservoir) that with patch repair [e.g. dural patch] Valved aqueous shunt [e.g. Ahmed, Denver Krupin]
1.CJ.52.LL	using open anterior approach Includes: Anterior (mechanical) vitrectomy that for drainage of vitreous humor Excludes: Posterior vitrectomy (see 1.CM.89.^^)
1.CJ.52.NG-LP	using incisional approach with insertion of aqueous shunt with drainage into subconjunctival space without extraocular reservoir [e.g. ExPRESS, Xen]
1.CJ.52.NH-LP	using incisional approach with insertion of aqueous shunt with drainage into Schlemm's canal without extraocular reservoir [e.g. Glaukos iStent, Hydrus]
1.CJ.52.NJ-LP	using incisional approach with insertion of aqueous shunt with drainage into suprachoroidal space without extraocular reservoir [e.g. CyPass, SOLX gold implant]
1.CJ.52.VP	using nonpenetrating excisional technique Includes: Deep sclerectomy or nonpenetrating trabeculectomy (without insertion of space maintaining implant) Note: May involve unroofing of Schlemm's canal and creation of Descemet's window (without penetrating into anterior chamber).

1.CJ.52.VP-SL	using nonpenetrating excisional technique with implant Includes: Canaloplasty (with tension suture placement) Canalostomy Deep sclerectomy or nonpenetrating trabeculectomy with insertion of device or material to maintain (intrasceral) space [e.g. collagen, viscoelastic] Viscocanaloplasty (with tension suture placement) Viscocanalostomy Note: May involve use of laser to raise scleral flap, unroofing of Schlemm's canal and creation of Descemet's window (without penetrating into anterior chamber).
1.CJ.52.WJ	using penetrating excisional technique Includes: Trabeculectomy ab externo (from outside the eye cutting toward and penetrating the anterior chamber) Note: May involve (peripheral) iridectomy, with or without laser (to raise scleral flap), patch repair (scleral or conjunctival graft).
1.CJ.52.XD	using incisional approach with trabeculotomy Includes: that for infant glaucoma

1.CJ.54.^.^ Management of internal device, anterior chamber (of eye)**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Excludes: Complete removal with replacement of glaucoma implant system (see [1.CJ.52.^.^](#))**Note:** May involve adjusting, irrigating, lengthening, shortening, repositioning or releasing shunt or tube (occluding suture/ligature).

1.CJ.54.LA-AH	of aqueous shunt using laser Includes: Laser titration (opening of additional channels) of multichannelled aqueous shunt [e.g. SOLX gold mini shunt]
1.CJ.54.LA-GX	of device NEC
1.CJ.54.LA-LP	of aqueous shunt without extraocular reservoir Includes: Management, mini or micro glaucoma shunt [ExPress, SOLX] Management, trabecular meshwork bypass stent [e.g. Glaukos iStent]
1.CJ.54.LA-SJ	of aqueous shunt with extraocular reservoir Includes: Management, nonvalved aqueous shunt [e.g. Baerveldt, Molteno, Schocket] Management, valved aqueous shunt [e.g. Ahmed, Denver Krupin]

1.CJ.55.^ ^ Removal of device, anterior chamber (of eye)**S** 4 **L** 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- 1.CJ.55.LA-GX of device NEC
Includes: Removal of space maintaining implant [e.g. Collagen, Viscoelastic]
- 1.CJ.55.LA-LP of anterior chamber drainage device without extraocular reservoir
Includes: Removal, mini or micro glaucoma shunt [e.g. ExPress, SOLX]
 Removal, trabecular meshwork bypass stent [e.g. Glaukos iStent]
- 1.CJ.55.LA-SJ of aqueous shunt with extraocular reservoir
Includes: Removal, nonvalved aqueous shunt [e.g. Baerveldt, Molteno, Schocket]
 Removal, valved aqueous shunt [e.g. Ahmed, Denver Krupin]

1.CJ.56.^ ^ Removal of foreign body, anterior chamber (of eye)**S** 4 **L** 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Removal of foreign body from iris, ciliary body or anterior chamber

- 1.CJ.56.LA using open approach
 1.CJ.56.LA-LZ using open approach and magnet

1.CJ.59.^ Destruction, anterior chamber (of eye)**S** 4 **L** 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Ablation, anterior chamber (of eye)
that for epithelial down growth

Excludes: Destruction, ciliary body (see [1.CG.59.^](#))
Destruction, sclera (see [1.CD.59.^](#))
that for glaucoma (see [1.CJ.52.^](#))

1.CJ.59.LA-AD using cryoprobe [cryotherapy]
1.CJ.59.LA-AG using laser
1.CJ.59.LA-GX using device NEC
1.CJ.59.LA-X7 using chemocautery

1.CJ.80.^ Repair, anterior chamber (of eye)**S** 5 **L** 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Note: Use Status attribute to identify revisions.

1.CJ.80.LA-AG using open approach and laser
Includes: Laser suture lysis (scleral flap sutures)
that following trabeculectomy

1.CJ.87.^.^ Excision partial, anterior chamber (of eye)**S** 4 **L** 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Removal, epithelial down growth
Excludes: that done by laser (see [1.CJ.59.^.](#))
 Trabeculectomy (see [1.CJ.52.^.](#))

1.CJ.87.LA using open approach

1.CL.^.^ Therapeutic Interventions on the Lens

Includes: Capsule
 Cortex
 Nucleus

1.CL.53.^.^ Implantation of internal device, lens**S** 10 **L** 12 **E** 61

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description

				S	Unilateral (unspecified if right or left)

- Includes:** Anterior capsulectomy
Excision of residual anterior capsular flap
Posterior capsulectomy
- Excludes:** Discission, secondary membranous cataract (see [1.CL.59.^^](#))
Excision of retained lens fragments (see [1.CL.89.^^](#))
Posterior capsulotomy (see [1.CL.59.^^](#))
- Omit code:** When capsulectomy is part of initial lens removal

1.CL.87.LA using open approach
1.CL.87.LA-AG using open approach and laser

1.CL.89.^^ Excision total, lens**S⁹ L² E⁶¹**

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 9	Optional	Tx Status 4	Status	A	Abandoned after onset
				S	Staged
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)
E 61	Optional	Intraocular lens	Extent	0	Not applicable
				01	Single intraocular lens
				02	Piggyback [stacked] intraocular lenses

- Includes:** Lens extraction (for cataract) with or without insertion of intraocular lens prosthesis
Piggyback intraocular lenses
Removal of retained fragments

Code Also: Any concomitant drainage procedures (for glaucoma)
Any concomitant insertion of capsular tension or reform ring (see [1.CL.53.^^](#))
Any concomitant surgery on the vitreous or retina or both

Note: An extracapsular cataract extraction consists of manual expression of the nucleus either by applying pressure or with the use of an instrument such as forceps, spoon or loop to remove the lens. The phakoemulsification technique involves the destruction and subsequent removal of the nucleus and cortex using ultrasonic vibrations and is performed via a much smaller limbal incision. When retinal detachment is also present, the cataract operation and vitrectomy must be performed concomitantly. Extracapsular cataract extraction may be done if nucleus is too dense for fragmentation or lensectomy can be done through pars plana.

1.CL.89.^Excision total, lens	extracapsular lens extraction NEC	phacoemulsification	phacoemulsification and Femtosecond laser	intracapsular lens extraction

				S	Unilateral (unspecified if right or left)

Includes: Aspiration, subretinal fluid or blood
Drainage, subretinal fluid or blood

Excludes: that with release of retina (see [1.CN.72.^^](#))
that with repair of retina (see [1.CN.59.^^](#))

1.CN.52.HA using needle aspiration

1.CN.59.^ Destruction, retina**S** 4 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Repair, retinal detachment
 Repair, retinal tear
 that for destruction of lesion [e.g. diabetic retinopathy, macular edema]

Code Also: Any concomitant injection into vitreous [e.g. pneumatic retinopexy] (see [1.CM.35.^](#))
 Any concomitant vitrectomy with vitreous replacement (see [1.CM.89.^](#))
 Buckling, sclera (see [1.CD.53.^](#))
 Implantation, sclera (see [1.CD.53.^](#))
 Vitrectomy with silicone oil replacement (see [1.CM.89.^](#))

1.CN.59.LA-AD	using cryoprobe [cryotherapy]
	Includes: Peripheral retinal cryotherapy Transscleral cryotherapy
1.CN.59.LA-AG	using laser
	Includes: Endo laser photocoagulation Focal photocoagulation
1.CN.59.LA-GX	using device NEC
1.CN.59.LA-GY	using multiple devices
	Includes: laser and cryotherapy

1.CN.72.^ Release, retina**S** 5 **L** 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Peeling, epi retinal or subretinal membranes
Removal, epi retinal or subretinal membranes
Stripping, epi retinal or subretinal membranes
that using membrane peeler cutter or bent needle
that with drainage of subretinal fluid or blood
- Excludes:** Decompression sheathotomy, branch retinal vein occlusion [BVRO] (see [1.JW.72.^^](#))
Sheathotomy, retinal vein (see [1.JW.72.^^](#))
- Code Also:** any core vitrectomy (see [1.CM.89.^^](#))
- Note:** Fibrocellular membranes may proliferate on surface of retina, either in macula or peripheral retina. Contraction or shrinkage of these membranes may cause varying degrees of visual distortion, intraretinal edema, and degeneration of underlying retina. They may also inhibit surgical reattachment of retinal detachment or tear.

1.CN.72.LA using open (incisional) approach [e.g. with bent needle, blade]

1.CP.^^.^^ Therapeutic Interventions on Soft Tissue of Orbit and Eyeball NEC

- Includes:** Eyeball NOS
Soft tissue of orbit
- Excludes:** Bony structures surrounding the eyeball (see [1.EC.^^.^^](#))
Ethmoid bone (see [1.EC.^^.^^](#))
Frontal bone (see [1.EA.^^.^^](#))
Maxillary bone (see [1.ED.^^.^^](#))
Other bones of head or face [e.g. frontal, maxillary, zygomatic, sphenoid, ethmoid and palatine] (see Interventions, by specific site)
Palatine bone (see [1.FB.^^.^^](#))
Sphenoid bone (see [1.EC.^^.^^](#))
Zygomatic bone (see [1.EB.^^.^^](#))

May also include removal of sinuses.	1.CP.91.WB-XX-A	1.CP.91.WB-XX-F

1.CQ.^.^ Therapeutic Interventions on Ocular Muscles and Tendons

1.CQ.35.^.^ Pharmacotherapy (local), ocular muscles and tendons

Includes: Injection, retrobulbar
Instillation, ocular muscles or tendons
Partial chemodenervation (botulinum), eye muscles

Excludes: Injection, Tenon's capsule (see [1.CR.35.^.](#))
Systemic pharmacotherapy (see [1.ZZ.35.^.](#))

1.CQ.35.HA-L7	of bacterial toxin [e.g. Botulinum toxin] using needle injection
1.CQ.35.HA-T9	of pharmacological agent NEC using needle injection

1.CQ.59.^ ^ Destruction, ocular muscles and tendons**S** ⁴ **L** ² **E** ³

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)
E 3	Optional	Ocular muscles	Extent	1	One muscle
				2	Two muscles
				3	Three muscles
				4	Four muscles
				5	Five muscles
				6	Six muscles

Excludes: Partial chemodenervation of eye muscles (see [1.CQ.35.^ ^](#))

1.CQ.59.HA-X7 using percutaneous (needle) injection of chemical agent
 1.CQ.59.LA-AG using laser
 1.CQ.59.LA-GX using device NEC

1.CQ.72.^ ^ Release, ocular muscles and tendons**S** ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Freeing, scar tissue (use revision attribute if applicable)
 Lysis, adhesions

1.CQ.72.LA using open approach

1.CQ.78.^ ^ Repair by decreasing size, ocular muscles and tendons**S** 5 **L** 2 **E** 3

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)
E 3	Optional	Ocular muscles	Extent	1	One muscle
				2	Two muscles
				3	Three muscles
				4	Four muscles
				5	Five muscles
				6	Six muscles

Includes: Resection with concomitant reinsertion to same ocular muscles (for repair of strabismus)
Strengthening, ocular muscles

1.CQ.78.LA using excisional technique
Includes: that with temporary detachment from globe
1.CQ.78.VT using other methods of length reduction (without excision or resection)
Includes: that done by plication, cinching, folding, pleating, tucking
that without temporary detachment from globe

1.CQ.80.^ ^ Repair, ocular muscles and tendons**S** 5 **L** 2 **E** 3

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 3	Optional	Ocular muscles	Extent	1	One muscle
				2	Two muscles
				3	Three muscles
				4	Four muscles
				5	Five muscles
				6	Six muscles

Includes: that following trauma

Note: Use Status attribute to identify revisions

1.CQ.80.LA using open approach with apposition [suture]

1.CQ.80.LA-XX-A using open approach and autograft

1.CQ.83.^ Transfer, ocular muscles and tendons

S⁵ **L**² **E**³

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)
E 3	Optional	Ocular muscles	Extent	1	One muscle
				2	Two muscles
				3	Three muscles
				4	Four muscles
				5	Five muscles
				6	Six muscles

Includes: Advancement or transposition of ocular muscles
 Recession, ocular muscles
 that with detachment and subsequent reattachment of the muscle to a new point on the sclera
 Weakening, ocular muscle

Code Also: Any concomitant injection of botulinum toxin (see [1.CQ.35.^^](#))
 Any concomitant resection

1.CQ.83.LA using open approach and apposition [suture]
 1.CQ.83.RC using open approach and adjustable suture technique
 1.CQ.83.TW using open approach and posterior fixation technique

Includes: Faden procedure

1.CQ.87.^^ Excision partial, ocular muscles and tendons

S⁵ **L**² **E**³

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)
E 3	Optional	Ocular muscles	Extent	1	One muscle
				2	Two muscles
				3	Three muscles
				4	Four muscles
				5	Five muscles
				6	Six muscles

Includes: Excision of lesion, ocular muscle or tendon
 Myectomy
 Myotomy (for lengthening)
 Tenectomy

Excludes: Resection of ocular muscles with reattachment (see [1.CQ.78.^^](#))
 Resection of ocular muscles with reattachment to same muscle (for strabismus repair) (see [1.CQ.78.^^](#))
 that with detachment and reattachment (see [1.CQ.78.^^](#))

1.CQ.87.LA using open approach

1.CR.^.^ Therapeutic Interventions on the Fascia of Eye

Includes: Tenon's capsule

1.CR.35.^.^ Pharmacotherapy (local), fascia of eye

Includes: Injection, Tenon's capsule
Instillation, Tenon's capsule

Excludes: Injection into ocular muscles (see [1.CQ.35.^.](#))
Systemic pharmacotherapy (see [1.ZZ.35.^.](#))

1.CR.35.HA-T9 of pharmacological agent NEC using needle injection

1.CR.80.^.^ Repair, fascia of eye

S 5 **L** 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Closure, Tenon's capsule
Repositioning herniated fat

1.CR.80.LA using open approach

1.CR.87.^.^ Excision partial, fascia of eye

S 4 **L** 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Removal of cyst, Tenon's capsule

1.CR.87.LA using open approach

1.CS.^.^ Therapeutic Interventions on the Conjunctiva

Includes: Inner eye lid

1.CS.35.^.^ Pharmacotherapy (local), conjunctiva

Includes: Injection, sub conjunctiva
 Instillation, conjunctiva
 Irrigation, conjunctiva
 Lavage, conjunctiva
 that for replacement of aqueous component of tears (artificial)

Excludes: (Topical) instillation of local anesthetic (see [1.CZ.35.^.](#))
 Irrigation or lavage for removal of foreign body (see [1.CS.56.^.](#))
 Systemic pharmacotherapy (see [1.ZZ.35.^.](#))

1.CS.35.HA-T9	of pharmacological agent NEC using needle injection
1.CS.35.JA-D1	of antiinfective irrigating solution using external approach
	Includes: chlorhexidine, neomycin
1.CS.35.JA-D2	of salt irrigating solution using external approach
	Includes: sodium chloride
1.CS.35.JA-D3	of other irrigating solution using external approach
	Includes: sorbitol, mannitol
1.CS.35.JA-Q5	of ophthalmologic agent NEC using external approach
	Includes: antiinfectives, antiinflammatory agents, mydriatics, cycloplegics, anesthetics
1.CS.35.JA-X9	of water using external approach
1.CS.35.JA-Z9	of agent NEC using external approach

1.CS.52.^.^ Drainage, conjunctiva**S** 4 **L** 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Drainage, conjunctival cyst
Expression, conjunctival follicles
That with or without irrigation

1.CS.52.HA using percutaneous (needle) approach
1.CS.52.LA using open approach

1.CS.56.^.^ Removal of foreign body, conjunctiva

S ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Extraction of non penetrating foreign body, conjunctiva [inner eye lid] with or without irrigation
Extraction of penetrating foreign body, conjunctiva [inner eye lid]

1.CS.56.JA using external manual approach [e.g. cotton, needle, spud]
1.CS.56.JA-D2 using external approach and irrigating solution [saline, water]
1.CS.56.JA-LZ using external approach and magnet
1.CS.56.LA using incisional approach and device NEC
1.CS.56.LA-LZ using incisional approach and magnet

1.CS.59.^.^ Destruction, conjunctiva

S ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Code Also: Any concomitant tissue repair of conjunctiva (see [1.CS.80.^.^](#))

1.CS.59.JA-AD using cryoprobe [cryotherapy]
1.CS.59.JA-AG using laser
1.CS.59.JA-GX using device NEC

1.CS.72.^ ^ Release, conjunctiva**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Division, symblepharon (with or without insertion of conformer or contact lens)
Lysis, adhesions

Excludes: that with mucous membrane grafting (see [1.CS.84.^ ^](#))
that with repair (see [1.CS.80.^ ^](#))

1.CS.72.LA using incisional approach

1.CS.80.^ ^ Repair, conjunctiva**S** ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes:	(Re)suturing (of buttonhole) in conjunctival flap (following trabeculectomy) Closure, filtering bleb (post-glaucoma surgery) Conjunctival flap to repair fistula Conjunctivoplasty Reduction, filtering bleb (post-glaucoma surgery) Revision/repair, filtering bleb by excision (post-glaucoma surgery) that by mobilization and rearrangement of tissue for repair of traumatic wound that with division of symblepharon that with restoration of anterior chamber by air or saline injection
Excludes:	Closure, repair or excision of filtering bleb with concomitant repair of corneal or corneoscleral fistula (see 1.CC.80.^^) Closure, repair or excision of filtering bleb with concomitant repair of scleral fistula or scleroplasty (see 1.CD.80.^^) Repair, filtering bleb with corneal transplant (see 1.CC.85.^^)
Omit code:	When mobilization and rearrangement of tissue is done as closure for other surgical intervention
1.CS.80.LA	using incisional approach (with or without suture e.g. that for laceration)
1.CS.80.LA-XX-E	using incisional approach and local flap (e.g. Z-plasty, transposition technique)
1.CS.80.LA-XX-K	using incisional approach and homograft (e.g. amniotic membrane transplant [AMT] or graft)

1.CS.84.^^ Construction or reconstruction, conjunctiva**S** 4 **L** 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: that for symblepharon (with or without insertion of conformer or contact lens)

1.CS.84.LA-XX-A	using incisional approach and full-thickness autograft [e.g. mucous membrane graft]
1.CS.84.LA-XX-K	using incisional approach and homograft (e.g. amniotic membrane transplant [AMT] or graft)

1.CS.87.^^ Excision partial, conjunctiva**S** 4 **L** 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Curettage of follicles
Excision, ring of conjunctiva around cornea
Grattage of conjunctiva
Peridectomy
Peritectomy
Removal, trachoma follicles
Scarification of conjunctiva
Scraping, trachoma follicles

Excludes: Removal of pterygium (see [1.CC.87.^^](#))

1.CS.87.LA	using incisional approach
1.CS.87.LA-XX-A	using incisional approach and autograft [e.g. conjunctival graft]
1.CS.87.LA-XX-K	using incisional approach and homograft (e.g. amniotic membrane transplant [AMT] or graft)

1.CT.^^.^^ Therapeutic Interventions on Lacrimal Secretory System

Includes: Lacrimal gland

1.CT.35.^^ Pharmacotherapy, lacrimal secretory system

Includes: Instillation, lacrimal secretory system

Excludes: Systemic pharmacotherapy (see [1.ZZ.35.^^](#))

1.CT.35.CA-T9	of pharmacological agent NEC using per orifice approach
---------------	---

1.CT.51.^^ Occlusion, lacrimal secretory system

S 4 **L** 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Occlusion, lacrimal gland tubules
that for preservation of tears

1.CT.51.LA	using open approach
1.CT.51.LA-AG	using open approach and laser
1.CT.51.LA-GX	using open approach and device NEC
1.CT.51.LA-HB	using open approach and diathermy device

1.CT.52.^ ^ Drainage, lacrimal secretory system**S** 4 **L** 12

S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Drainage, lacrimal cyst
 Drainage, lacrimal gland
 That with or without irrigation

1.CT.52.HA using percutaneous (needle) approach
 1.CT.52.LA using open approach

1.CT.59.^ ^ Destruction, lacrimal secretory system**S** 4 **L** 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

1.CT.59.LA-AG using laser
 1.CT.59.LA-GX using device NEC

1.CT.80.^ ^ Repair, lacrimal secretory system**S** 5 **L** 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Fistulectomy, lacrimal gland

1.CT.80.LA using open approach

1.CT.87.^.^ Excision partial, lacrimal secretory system

S 4 **L** 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Dacryoadenectomy, partial
Excision, lacrimal gland tumors

1.CT.87.LA using open approach

1.CT.89.^.^ Excision total, lacrimal secretory system

S 4 **L** 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Dacryoadenectomy, total

1.CT.89.LA using open approach

1.CU.^.^ Therapeutic Interventions on Lacrimal Excretory System

Includes: Lacrimal duct
Lacrimal sac
Nasolacrimal canaliculi
Nasolacrimal duct
Nasolacrimal punctum
Nasolacrimal sac

1.CU.07.^ ^ Hyperthermy, lacrimal excretory system**Includes:** Application of heat, lacrimal system

1.CU.07.JA-KJ using warm compresses

1.CU.12.^ ^ Therapy, lacrimal excretory system**Includes:** Manipulation, nasolacrimal passage
Massage, nasolacrimal passage**Excludes:** Manipulation by intubation (see [1.CU.50.^ ^](#))
Probing with drainage (see [1.CU.50.^ ^](#))

1.CU.12.JJ using manual technique [e.g. Q tip pressure, massage]

1.CU.35.^ ^ Pharmacotherapy (local), lacrimal excretory system**Includes:** Flushing, lacrimal excretory system
Irrigation, lacrimal excretory system
Syringing, nasolacrimal duct or punctum**Excludes:** that for removal of foreign body (see [1.CU.56.^ ^](#))
that involving dilation (see [1.CU.50.^ ^](#))

1.CU.35.CA-D1 of antiinfective irrigating solution using per orifice approach

Includes: chlorhexidine, neomycin

1.CU.35.CA-D2 of salt irrigating solution (e.g. saline) using per orifice approach

Includes: sodium chloride

1.CU.35.CA-D3 of other irrigating solution using per orifice approach

Includes: sorbitol, mannitol**1.CU.50.^ ^ Dilation, lacrimal excretory system****S** 4 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Dilation , lacrimal punctum
Manipulation, lacrimal excretory system
Probing, lacrimal canaliculi
Probing, nasolacrimal duct
that with or without irrigation

Excludes: that with removal of calculus or concretions (see [1.CU.57.^^](#))

Code Also: Any concomitant release of lacrimal excretory system (see [1.CU.72.^^](#))
Any concomitant repair of lacrimal duct stenosis (see [1.CU.72.^^](#))

1.CU.50.CA-BJ using per orifice approach and (flexible) dilating device [e.g. wire]
1.CU.50.CA-NR using per orifice approach and (flexible) dilating device [e.g. wire] followed by insertion of stent
1.CU.50.LA-BJ using open approach and (flexible) dilating device [e.g. wire]
1.CU.50.LA-NR using open approach and (flexible) dilating device [e.g. wire] followed by insertion of stent

1.CU.51.^^ Occlusion, lacrimal excretory system

S ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Occlusion, lacrimal punctum

1.CU.51.CE-G2 using per orifice injection of (temporary) silicon plug
1.CU.51.CE-W2 using per orifice injection of (temporary) collagen plug
1.CU.51.LA using open approach and suture (ligation)
Includes: Division (surgical), canaliculus
1.CU.51.LA-AG using open approach and laser
1.CU.51.LA-HB using open approach and diathermy device

1.CU.52.^.^ Drainage, lacrimal excretory system**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description

L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Dacryocystotomy (for drainage)
 Drainage, lacrimal duct
 Drainage, lacrimal sac
 that with or without irrigation

1.CU.52.HA using percutaneous (needle) aspiration
 1.CU.52.LA using open approach
 1.CU.52.LA-NR using open approach with insertion of stent

1.CU.55.^.^ Removal of device, lacrimal excretory system**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

1.CU.55.CA-G2 of silicon plug using per orifice approach
 1.CU.55.LA-NR of stent [drain]

1.CU.56.^ ^ Removal of foreign body, lacrimal excretory system**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

1.CU.56.CE-D2 using per orifice injection of irrigating solution [e.g. saline]
 1.CU.56.LA using open approach

1.CU.57.^ ^ Extraction, lacrimal excretory system**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Canaliculotomy with removal of concretions
 Removal, bacterial matter
 Removal, concretions, lacrimal system
 that with dilation that with or without irrigation

Excludes: that done by manual manipulation (see [1.CU.12.^ ^](#))

1.CU.57.CA using per orifice approach
 1.CU.57.LA using open approach

1.CU.59.^ ^ Destruction, lacrimal excretory system**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Obliteration, punctum

1.CU.59.LA-AD using cryoprobe [cryotherapy]
 1.CU.59.LA-AG using laser
 1.CU.59.LA-GX using device NEC

1.CU.72.^ ^ Release, lacrimal excretory system**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Release, lacrimal duct
 Snip incision of punctum
 that for repair of congenital atresia of the puncta
 that for repair of stenosis
 that with dilation following the incision
 Three snip punctoplasty

1.CU.72.LA using open approach

1.CU.76.^ ^ Bypass, lacrimal excretory system**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description

L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Removal of device, upper eyelid used in previous ptosis or lagophthalmos repair

1.CV.55.LA-LF of implant [e.g. gold weight] using open approach

1.CV.55.LA-XX-N of synthetic material [e.g. silicone rod, Mersilene mesh sling] using open approach

1.CV.80.^.^ Repair, upper eyelid**S** 5 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Correction, ptosis (acquired)(congenital)
 Repair, blepharoptosis (with or without blepharoplasty)
 Repair, overcorrection of ptosis (code any revision procedure using status attribute)
 Repair, ptosis (acquired)(congenital)

Excludes: Repair, traumatic laceration (see [1.CX.80.^.^](#))

1.CV.80.^.^ Repair, upper eyelid	no tissue used (for repair)	with autograft [e.g. fascia lata] (for sling)	with homograft (for sling)	with synthetic material [e.g. Mersilene] (for sling)
conjunctivotarsal Muller's muscle levator resection	1.CV.80.WS Includes: <ul style="list-style-type: none">Block resection techniquesMuller's muscle conjunctiva resectionTarsotomy mullerectomy [Fasanella Servat]	—	—	—
frontalis muscle suspension [frontalis sling]	1.CV.80.TV Includes: <ul style="list-style-type: none">Frontalis sling	1.CV.80.TV-XX-A Includes: <ul style="list-style-type: none">Frontalis sling	1.CV.80.TV-XX-K Includes: <ul style="list-style-type: none">Frontalis sling	1.CV.80.TV-XX-N Includes: <ul style="list-style-type: none">Frontalis sling
levator muscle resection or aponeurosis tuck or advancement [ptosis repair NOS]	1.CV.80.UP Includes: <ul style="list-style-type: none">Ptosis repair NOS	—	—	—

1.CX.^.^ Therapeutic Interventions on Eyelid NEC

- Includes:** Canthus
Epicanthal fold
Eyelash follicles
Eyelashes
Eyelid retractors [Muller's muscle and capsulopalpebral fascia]
Lower eyelid
Meibomian glands
Skin of eyelid
Tarsus
Upper eyelid with lower eyelid
- Excludes:** Eyebrow (see [1.YB.^.^](#))
Inner eye lid (see [1.CS.^.^](#))
Upper eyelid alone (see [1.CV.^.^](#))

1.CX.14.^.^ Dressing, eyelid NEC

- Includes:** Bandage, eyelid NEC

1.CX.14.JA-GN	using external pressure dressing
1.CX.14.JA-H1	using medicated dressing
1.CX.14.JA-T6	using dressing NEC

1.CX.26.^.^ Brachytherapy, eyelid NEC**S** 35 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 35	Optional	Implant Status	Status	P M	Permanent implant – Radioactive source left in place permanently
				T M	Temporary implant – Radioactive source removed after course of treatment is complete
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes:	Endocurietherapy, eyelid
Code Also:	Any concomitant implantation of brachytherapy applicators or conduits [e.g. needles, catheters] to gain access to treatment site (see 1.CX.53.^^)
Note:	There are typically two distinct phases required to complete the process of brachytherapy. The first phase involves the insertion of non-radioactive applicators or conduits [e.g. hollow needles, catheters, stents etc.] that receive or transmit the radioactive material into the body. The second phase involves the after loading of the radioactive material [e.g. seeds, pellets, wires, etc.] into the applicator or conduit.
1.CX.26.HA	using percutaneous (transcatheter or transneedle) approach
1.CX.26.JA	using external approach [e.g. surface mould]
1.CX.26.LA	using open approach

1.CX.35.^^ Pharmacotherapy (local), eyelid NEC

Includes:	Cleansing (wound), eyelid Cosmetic tattooing (permanent eyeliner), eyelid Injection of pharmaceutical agent, eyelid Instillation, eyelid NEC Irrigation, eyelid
Excludes:	Irrigation with drainage (see 1.CX.52.^^) Systemic pharmacotherapy (see 1.ZZ.35.^^) that for removal of foreign body (see 1.CX.56.^^)
1.CX.35.HA-T9	of pharmacological agent NEC using percutaneous (needle) approach
1.CX.35.HA-W2	of augmentation agent (e.g. collagen) using percutaneous (needle) approach
1.CX.35.HA-X4	of dye using percutaneous (needle) approach
1.CX.35.JA-D1	of antiinfective irrigating solution using external approach Includes: chlorhexidine, neomycin
1.CX.35.JA-D2	of salt irrigating solution using external approach Includes: sodium chloride
1.CX.35.JA-D3	of other irrigating solution using external approach Includes: sorbitol, mannitol

1.CX.52.^^ Drainage, eyelid NEC**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Aspiration [cyst, abscess], eyelid NEC
 Drainage, hordeolum
 Lancing, styne
 That with or without irrigation

1.CX.52.HA using percutaneous (needle) approach
 1.CX.52.LA using open approach

1.CX.53.^ ^ Implantation of internal device, eyelid NEC

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Implantation, brachytherapy applicator, eyelid NEC
 Insertion, radioactive material, eyelid

Code Also: Any concomitant loading of brachytherapy applicator (see [1.CX.26.^ ^](#))

1.CX.53.HA-EM of brachytherapy applicator using percutaneous approach
 1.CX.53.LA-EM of brachytherapy applicator using open approach

1.CX.55.^ ^ Removal of device, eyelid NEC

S 4 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Suture removal, eyelid NEC

Excludes: Removal of device, upper eyelid (e.g. gold weight or ptosis sling/rod) (see [1.CV.55.^ ^](#))

1.CX.55.JA-FF of closure device [e.g. sutures]

1.CX.56.^ ^ Removal of foreign body, eyelid NEC**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Extraction of (superficial, embedded) foreign body, (inner aspect of) eyelid with or without irrigation

1.CX.56.JA using external manual (extraction) approach
 1.CX.56.JA-D2 using external approach using irrigating solution (salt, water) alone
 1.CX.56.LA using incisional approach

1.CX.59.^ ^ Destruction, eyelid NEC**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: that for ectropion
 that for entropion
 that for eyelash follicles
 that for trichiasis

Excludes: Repair of entropion or ectropion (see [1.CX.74.^ ^](#))

1.CX.59.JA-AD using cryoprobe [cryotherapy]
Includes: Epilation, cryosurgical
 1.CX.59.JA-AG using laser
 1.CX.59.JA-AL using electrolysis
Includes: Epilation, electrosurgical
 1.CX.59.JA-GX using device NEC

1.CX.72.^.^ Release, eyelid NEC**S** 10 **L** 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 10	Optional	Tx Status 5	Status	A	Abandoned after onset
				R	Revision
				S	Staged
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: 2nd stage, opening of reconstruction [e.g. Hughes, Cutler Beard procedure]
 Division, with reformation of upper and lower lids
 Severing, tarsorrhaphy

1.CX.72.LA using incisional approach

1.CX.74.^.^ Fixation, eyelid NEC**S** 5 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes:	Adjustment, eyelid position Lateral tarsal strip technique Repair, (involutional) entropion Repair, ectropion NEC Repair, lid retraction
Excludes:	that done by thermocautery (see 1.CX.59.^^) that for cicatricial entropion or ectropion (see 1.CX.87.^^ or 1.CX.88.^^) that with excision and reconstruction (see 1.CX.88.^^)
Code Also:	Any concomitant insertion of gold weight into upper eyelid (see 1.CV.53.^^) Correction, everted punctum [e.g. medial spindle technique] (see 1.CU.80.^^)
1.CX.74.LA	using incisional approach Includes: Canthotomy alone
1.CX.74.RZ	lid retraction repair Includes: Correction, lid retraction
1.CX.74.RZ-XX-A	lid retraction repair, using autograft Includes: that with cartilage spacer that with scleral block
1.CX.74.TV	entropion and ectropion repair
1.CX.74.UO	ectropion repair Includes: Correction of lower eyelid retractor disinsertion that done by simple suture that with medial canthal tendon plication
1.CX.74.UX	entropion repair Includes: that done by simple suture that with cantholysis or canthotomy that with lateral canthoplasty (with or without full thickness horizontal lid shortening) that with lower eyelid retractor tightening
1.CX.74.WQ	tarsorrhaphy (temporary or permanent) Includes: Blepharorrhaphy Canthorrhaphy Surgical fusion of upper and lower eyelids Traction sutures (of eyelids) Omit code: When performed concomitantly with a radical excision of the soft tissue of orbit and eyeball NEC (see 1.CP.91.^^)

1.CX.78.^ ^ Repair by decreasing size, eyelid NEC**S** 5 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Blepharoplasty NOS
that with (trans conjunctival) removal of fat

Excludes: that with ptosis repair (see [1.CV.80.^ ^](#))

1.CX.78.LA using incisional approach

1.CX.80.^ ^ Repair, eyelid NEC**S** 5 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: that following trauma

Excludes: Repair, ectropion (see [1.CX.74.^ ^](#))
Repair, entropion (see [1.CX.74.^ ^](#))
Repair, ptosis (see [1.CV.80.^ ^](#))
that with excision of lesion [scar tissue] (see [1.CX.87.^ ^](#))
that with major reformation of lid (see [1.CX.84.^ ^](#))

Code Also: Any concomitant correction, everted punctum (see [1.CU.80.^ ^](#))

1.CX.80.^ Repair, eyelid NEC	no tissue used (for repair)	with autograft	with local flap [e.g. Z plasty]
using excision technique	1.CX.80.WJ Includes: • Horizontal lengthening, Vertical shortening, Repair of epicanthal fold, Canthoplasty	1.CX.80.WJ-XX-A Includes: • Horizontal lengthening, Vertical shortening, Repair of epicanthal fold, Canthoplasty	1.CX.80.WJ-XX-E Includes: • Horizontal lengthening, Vertical shortening, Repair of epicanthal fold, Canthoplasty
using full thickness repair (involving lid margin)	1.CX.80.UD	1.CX.80.UD-XX-A	1.CX.80.UD-XX-E
using partial thickness repair (involving lid margin)	1.CX.80.VP	1.CX.80.VP-XX-A	1.CX.80.VP-XX-E
using simple suture [linear repair]	1.CX.80.LA	—	—
using fibrin [glue]	1.CX.80.LA-W3	—	—

1.CX.84.^ Construction or reconstruction, eyelid NEC**S** 8 **L** 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 8	Optional	Eyelid	Status	A	Abandoned after onset
				S	Staged (applies only to 1.CX.84.LA-XX-E and 1.CX.84.LA-XX-Q)
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Excludes: that with excision of lesion (see [1.CX.88.^](#))
that with suture technique (see [1.CX.80.^](#))

1.CX.84.LA-XX-E	using open approach and local flap [e.g. transposition, advancement, semicircular, rotating, Z-plasty] [e.g. Cutler Beard procedure] Note: Use Status attribute to indicate staged procedure
1.CX.84.LA-XX-F	using open approach and free flap [e.g. tarsoconjunctival flap from opposite eyelid]
1.CX.84.LA-XX-Q	using open approach and combined sources of tissue [e.g. grafts/flaps] [e.g. Hughes procedure] Note: Use Status attribute to indicate staged procedure

1.CX.87.^ ^ Excision partial, eyelid NEC**S** 4 **L** 2 **E** 80

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)
E 80	Optional	Mohs Micrographic Surgery	Extent	0	Not applicable (e.g. other type of excision)
				01	One layer removed
				02	Two layers removed
				03	Three layers removed
				04	Four layers removed
				05	Five layers removed
				06	Six layers removed
				D	Greater than 6 layers removed

Includes: Excision, chalazion
 Excision, meibomian gland
 Rhytidectomy, eyelid
 that for (minor) cicatricial entropion or ectropion
 that with or without lateral cantholysis

Excludes: that with destruction of eyelid (see [1.CX.59.^ ^](#))
 that with reconstruction of eyelid (see [1.CX.88.^ ^](#))

1.CX.87.^ ^ Excision partial, eyelid NEC	no tissue used (for repair)	with autograft	with homograft [e.g. amniotic membrane transplant (AMT) or graft]
full thickness excision of lesion (more than one fourth of lid margin)	1.CX.87.UD	1.CX.87.UD-XX-A	1.CX.87.UD-XX-K
partial thickness excision of lesion (up to one fourth of lid margin)	—	1.CX.87.VP-XX-A	1.CX.87.VP-XX-K
using manual [extraction] device	1.CX.87.LA-CD	—	—
using simple excision	1.CX.87.LA	1.CX.87.LA-XX-A	1.CX.87.LA-XX-K

1.CX.88.^.^ Excision partial with reconstruction, eyelid NEC**S** 4 **L** 12 **E** 80

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)
E 80	Optional	Mohs Micrographic Surgery	Extent	0	Not applicable (e.g. other type of excision)
				01	One layer removed
				02	Two layers removed
				03	Three layers removed
				04	Four layers removed
				05	Five layers removed
				06	Six layers removed
				D	Greater than 6 layers removed

Includes: that for (major) cicatricial entropion or ectropion
that for excision of major lesion

1.CX.88.^.^ Excision partial with reconstruction, eyelid NEC	with combined types of flaps and grafts	with autograft [e.g. hair follicles]	with free flap	with homograft [e.g. amniotic membrane transplant (AMT) or graft]	with local flap
full thickness excision of major lesion (more than one fourth of lid margin)	1.CX.88.UD-XX-Q	1.CX.88.UD-XX-A	1.CX.88.UD-XX-F	1.CX.88.UD-XX-K	1.CX.88.UD-XX-E
partial thickness excision of major lesion (up to one fourth of lid margin)	1.CX.88.VP-XX-Q	1.CX.88.VP-XX-A	1.CX.88.VP-XX-F	1.CX.88.VP-XX-K	1.CX.88.VP-XX-E

1.CZ.^.^ Therapeutic Interventions on Eye NEC

Includes: Eye ball and surrounding structure
Eye socket (of eviscerated eye)

Excludes: Soft tissue of orbit and eyeball NEC (see [1.CP.^.^](#))

1.CZ.06.^.^ Hypothermy, eye NEC

Includes: Application of cold, eye NEC

1.CZ.06.JA-KL	using cold device [e.g. cold pack, ice]
1.CZ.06.JA-KM	using cold compress

1.CZ.07.^.^ Hyperthermy, eye NEC**Includes:** Application of heat, eye NEC

1.CZ.07.JA-KJ using moist warm/hot compress

1.CZ.12.^.^ Therapy, eye NEC**Includes:** Massage, ocular (to relieve occlusion of central retinal artery)**Excludes:** Massage, nasolacrimal passage only (see [1.CU.12.^.^](#))

1.CZ.12.JA-BD using external approach and balloon (Honan's device)

Includes: Orbital compression/decompression by balloon

1.CZ.12.JJ using manual technique [e.g. massage]

1.CZ.14.^.^ Dressing, eye NEC**Includes:** Bandaging, eye or socket
Occlusion therapy (for strabismus)
Replacement, dressing (with removal of previous one)

1.CZ.14.JA-GN using external pressure dressing

1.CZ.14.JA-NP using packing

1.CZ.14.JA-NQ using (protective) shield

1.CZ.26.^.^ Brachytherapy, eye NEC**S** 35 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 35	Optional	Implant Status	Status	P M	Permanent implant – Radioactive source left in place permanently
				T M	Temporary implant – Radioactive source removed after course of treatment is complete
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Endocurietherapy, eye
 Implantation of radioactive material, eye
 Implantation of radioactive plaque, sclera

Excludes: Scleral buckle (see [1.CD.53.^^](#))

1.CZ.26.JA using external approach [e.g. scleral radiation plaque]

1.CZ.27.^^ Radiation, eye NEC

L ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Stereotactic [gamma knife] radiosurgery, eye NEC
 Teletherapy, eye
 Therapy, radiation, eye (and surrounding structures)

Note: Involves external beam irradiation, eye (e.g. for occult tumors, periocular hemangioma, dysthyroid eye disease or rhabdomyosarcoma)

1.CZ.27.JA using external beam
 1.CZ.27.JX using focused beam [gamma knife stereotactic radiosurgery]

1.CZ.35.^ ^ Pharmacotherapy (local), eye NEC

- Includes:** Cleansing, eye socket
 Flushing, eye NEC
 Flushing, eye socket
 Injection, eye NEC
 Instillation of local anesthetic, eye NEC
 Instillation, eye NEC
 Irrigation, eye NEC
 that for treatment of entire eye or eye socket
- Excludes:** Flushing or irrigation for removal of foreign body (see [1.CZ.56.^ ^](#))
 Irrigation, cornea (see [1.CE.35.^ ^](#))
 Systemic pharmacotherapy (see [1.ZZ.35.^ ^](#))
 that with or without drainage (see [1.CZ.52.^ ^](#))

1.CZ.35.HA-T9	of pharmacological agent NEC using percutaneous (needle) approach
1.CZ.35.JA-B2	of vitamin using external approach Includes: riboflavin (B2) drops for corneal collagen cross linking
1.CZ.35.JA-D1	of antiinfective irrigating solution using external approach Includes: chlorhexidine, neomycin
1.CZ.35.JA-D2	of salt irrigating solution using external approach Includes: sodium chloride
1.CZ.35.JA-D3	of other irrigating solution using external approach Includes: sorbitol, mannitol
1.CZ.35.JA-Q5	of ophthalmologic agent NEC using external approach Includes: atropine, antiinfectives, antiinflammatory agents, mydriatics, cycloplegics, anesthetics
1.CZ.35.JA-T9	of pharmacological agent using external approach

1.CZ.37.^ ^ Installation of external appliance, eye NEC**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: External scleral shell prosthesis
Insertion of contact lens, eye
Placement of visual aids (corrective glasses, low visual aids, etc.)
Replacement of contact lens

Excludes: Fitting of external eye device (see [7.SF.18.^^](#))
Instruction, visual aid appliances, eye (see [7.SC.59.^^](#))
Surgically implanted ocular prosthesis (see [1.CP.53.^^](#))

1.CZ.37.JA-GR of superficial corrective device [e.g. contact lens]
1.CZ.37.JA-LH of external scleral shell prosthesis

1.CZ.38.^^ Management of external appliance, eye NEC

L²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Adjustment, removal, cleansing of prosthesis or visual aid appliances (on client), eye

Excludes: Fabrication, manufacturing of appliances
Removal with concomitant insertion of visual aid appliance (see [1.CZ.37.^^](#))
Removal with concomitant insertion, external scleral shell prosthesis (see [1.CZ.37.^^](#))

1.CZ.38.JA-GR of superficial corrective device [e.g. contact lens]
1.CZ.38.JA-LH of external scleral shell prosthesis

1.CZ.52.^^ Drainage, eye NEC

Includes: Aspiration, eye
that for contusion, hematoma, etc.
That with or without irrigation

Excludes: that for site specific drainage (see Drainage by site)

1.CZ.52.HA using percutaneous (needle) approach
1.CZ.52.LA using open approach

1.CZ.55.^.^ Removal of device, eye NEC**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

1.CZ.55.JA-EB of radioactive implant
 1.CZ.55.JA-FF of sutures
 1.CZ.55.JA-GN of external pressure dressing
 1.CZ.55.JA-NP of packing
 1.CZ.55.JA-NQ of external protective shield

1.CZ.56.^.^ Removal of foreign body, eye NEC**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Extraction of foreign body (e.g. errant contact lens), eye with or without irrigation
 Removal of (superficial, embedded) foreign body, eye (socket)

1.CZ.56.JA using external (extraction) approach
 1.CZ.56.JA-D2 using external approach and irrigating solution (salt, water) alone
Includes: Irrigation of eye to remove foreign substance (e.g. sand, pepper spray)
 1.CZ.56.LA using open approach

1.CZ.70.^.^ Incision NOS, eye NEC

1.CZ.70.LA	using open approach
------------	---------------------

1.CZ.94.^.^ Therapeutic intervention NEC, eye NEC

1.CZ.94.HA	using percutaneous (needle) approach
1.CZ.94.JA	using external approach
1.CZ.94.LA	using open approach

Therapeutic Interventions on the Ear and Mastoid (process) (1DA - 1DZ)

Therapeutic Interventions on the External Ear NEC (1DA - 1DE)

1.DA.^.^ Therapeutic Interventions on the External Ear NEC

Includes:	Auricle Cartilage of ear, helix, fossa triangularis, scapha, concha, tragus, antitragus, antihelix Pinna
Excludes:	Ear lobe (see 1.YC.^.^) Skin of external ear (see 1.YC.^.^)

1.DA.14.^.^ Dressing, external ear NEC

Includes:	Application, mould dressing, ear Bandaging, auricle (pinna) Binding, ear (pinna) Dressing, auricle
Excludes:	Bandaging ear lobe alone (see 1.YC.14.^.)

1.DA.14.JA-FG	with binding
1.DA.14.JA-MC	with moulds

1.DA.35.^.^ Pharmacotherapy (local), external ear NEC

Includes:	Cleansing of wound (involving cartilage) , auricle Irrigation, external ear Pharmacotherapy (local), auricle
Excludes:	that for removal of foreign body (see 1.DA.56.^.) that of wound of skin only of ear (see 1.YF.35.^.)

1.DA.35.JA-D1	of antiinfective irrigating solution using external approach Includes: chlorhexidine, neomycin
1.DA.35.JA-D2	of salt irrigating solution using external approach Includes: sodium chloride
1.DA.35.JA-D3	of other irrigating solution using external approach Includes: sorbitol, mannitol

1.DA.52.^ ^ Drainage, external ear NEC**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Drainage, auricle
that for drainage of abscess or hematoma

1.DA.52.HA using percutaneous (needle) approach
1.DA.52.LA using incisional approach

1.DA.56.^ ^ Removal of foreign body, external ear NEC**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Extraction of (infected) earring, auricle of ear
Removal of foreign body, auricle

Excludes: Extraction of (infected) earring, lobe of ear (see [1.YC.56.^ ^](#))

1.DA.56.JA using external approach (for simple extraction)
1.DA.56.LA using incisional approach

1.DA.58.^ ^ Procurement, external ear NEC**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Procurement of cartilage from external ear (e.g. tragus, conchal cartilage)
Procurement, auricle

1.DA.58.LA using open approach

1.DA.59.^ ^ Destruction, external ear NEC**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Destruction, auricle

Excludes: Destruction, skin lesion of ear not extending into cartilage (see [1.YC.59.^ ^](#))

1.DA.59.HA-T9 using percutaneous (needle) injection of pharmacological agent NEC (e.g. triamcinolone)
1.DA.59.JA-AG using laser
1.DA.59.JA-GX using device NEC
1.DA.59.JA-LV using suture [ligature]

Includes: Ligation, preauricular skin tag

1.DA.80.^ ^ Repair, external ear NEC**S** ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes:

- Cartilage graft
- Cartilage otoplasty
- Correction, prominent ear
- Correction, prominent ear with cartilage graft
- Fixation, outstanding ear
- Otoplasty NOS
- Pinnaplasty
- Repair, auricle
- Repair, lop ear
- Repair, lop ear with tissue graft
- that done by suture of cartilage
- that following trauma
- that with or without size reduction

Excludes:

- Attachment of artificial ear (see [1.DZ.37.^ ^](#))
- Correction, congenital absence of external ear (see [1.DA.84.^ ^](#))
- Repair of skin of ear (see [1.YC.80.^ ^](#))

1.DA.80.LA	using open approach and no tissue
1.DA.80.LA-XX-A	using open approach and autograft (e.g. cartilage or full thickness skin)
1.DA.80.LA-XX-E	using open approach and local flap
1.DA.80.LA-XX-F	using open approach and free flap
1.DA.80.LA-XX-G	using open approach and distant pedicled flap
1.DA.80.LA-XX-K	using open approach and homograft
1.DA.80.LA-XX-Q	using open approach and combined sources of tissue

1.DA.82.^ ^ Reattachment, external ear NEC**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Reattachment, (amputated) external ear
 Reattachment, auricle

1.DA.82.LA using external approach

1.DA.84.^ ^ Construction or reconstruction, external ear NEC**S** ¹⁰ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 10	Optional	Tx Status 5	Status	A	Abandoned after onset
				R	Revision
				S	Staged
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes:	Construction, auricle Correction, congenital absence of external ear Correction, microtia Reconstruction, auricle Repositioning of external ear remnant as lobule Transposition of lobule with excision of remnant
Excludes:	Attachment of artificial ear (see 1.DZ.37.^^) Framework fabrication and insertion of auricular framework of autogenous rib graft in a subcutaneous pocket [Stage 1 of construction] (see 1.YY.84.^^) Reconstruction, external auditory canal, for congenital atresia (see 1.DE.84.^^)
1.DA.84.LA-XX-A	using open approach and autograft (e.g. cartilage) Includes: Reconstruction, tragus, using graft (conchal cartilage) harvested from the contralateral ear [Stage 4 of construction]
1.DA.84.LA-XX-E	using open approach and local flap Includes: Creation of ear lobe (using Z-plasty) [Stage 2 of construction]
1.DA.84.LA-XX-F	using open approach and free flap Includes: Auricular elevation (creating the auriculocephalic angle) using free flap along the posterior aspect of the elevated ear [Stage 3 of construction]
1.DA.84.LA-XX-G	using open approach and pedicled distant flap
1.DA.84.LA-XX-Q	using open approach and combined sources of tissue [e.g. flap, graft, synthetic tissue]

1.DA.87.^^ Excision partial, external ear NEC**S⁹ L²**

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 9	Optional	Tx Status 4	Status	A	Abandoned after onset
				S	Staged
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Excision, cervical auricle
Excision, lesion of ear extending into cartilage of auricle
Excision, lesion with repair by post auricular pedicle or graft
Excision, partial, auricle
Excision, preauricular remnant [appendage]
Unroofing, external ear
- Excludes:** Excision, preauricular sinus (see [1.DE.86.^^](#))

1.DA.87.^ Excision partial, external ear NEC	using autograft	using combined sources of tissue	using local flap	without tissue repair
using laser	1.DA.87.LA-AG-A	1.DA.87.LA-AG-Q	1.DA.87.LA-AG-E	1.DA.87.LA-AG
not using laser	1.DA.87.LA-XX-A	1.DA.87.LA-XX-Q	1.DA.87.LA-XX-E	1.DA.87.LA

1.DA.89.^ Excision total, external ear NEC**S**⁹ **L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 9	Optional	Tx Status 4	Status	A	Abandoned after onset
				S	Staged
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Amputation, external ear
Auriculectomy
Excision, complete, external ear
Excision, total, auricle
that with or without tissue repair

Excludes: Total excision of preauricular sinus (see [1.DE.87.^](#))

Code Also: Any concomitant neck dissection (see [1.MC.^.^](#))

1.DA.89.^ Excision total, external ear NEC	using autograft	using combined sources of tissue	using local flap	without tissue repair
using laser	1.DA.89.LA-AG-A	1.DA.89.LA-AG-Q	1.DA.89.LA-AG-E	1.DA.89.LA-AG
not using laser	1.DA.89.LA-XX-A	1.DA.89.LA-XX-Q	1.DA.89.LA-XX-E	1.DA.89.LA

1.DA.91.^ ^ Excision radical, external ear NEC**S** ⁹ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 9	Optional	Tx Status 4	Status	A	Abandoned after onset
				S	Staged
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Excision radical, auricle
that with partial resection of temporal bone
that with repair of resulting defect

Excludes: that involving structure(s) of the inner ear (see [1.DR.91.^ ^](#))
that involving the external auditory meatus (see [1.DE.91.^ ^](#))

Code Also: Any concomitant neck dissection (see [1.MC.^ ^.^ ^](#))

1.DA.91.LA using open approach
1.DA.91.LA-XX-A using open approach and autograft
1.DA.91.LA-XX-F using open approach and free flap
1.DA.91.LA-XX-G using open approach and pedicled distant flap
1.DA.91.LA-XX-Q using open approach and combined sources of tissue

1.DE.^ ^.^ ^ Therapeutic Interventions on the External Auditory Meatus

Includes: External auditory canal [external acoustic meatus]

1.DE.14.^ ^ Dressing, external auditory meatus

Includes: Packing, external auditory meatus

1.DE.14.CA-NP using per orifice approach and packing

1.DE.35.^ ^ Pharmacotherapy (local), external auditory meatus**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes:

- Injection, external auditory meatus
- Instillation, external auditory meatus
- Irrigation, with or without suction, auditory canal
- Syringing, ear canal that administered by wick
- Warm air therapy (via blowdryer)

Excludes:

- Irrigation with drainage (see [1.DE.52.^ ^](#))
- Irrigation with extraction (see [1.DE.57.^ ^](#))
- Systemic pharmacotherapy (see [1.ZZ.35.^ ^](#)) that with removal of foreign body (see [1.DE.56.^ ^](#))

1.DE.35.^ ^ Pharmacotherapy (local), external auditory meatus	external [wick] approach	per orifice approach
using antiinfective irrigating solution	—	1.DE.35.CA-D1 Includes: • chlorhexidine, neomycin
using salt irrigating solution	—	1.DE.35.CA-D2 Includes: • sodium chloride
using other irrigating solution	—	1.DE.35.CA-D3 Includes: • sorbitol, mannitol
using otological agent NEC	1.DE.35.JA-Q6 Includes: • antiinfectives, antiinflammatory agents, anesthetics	1.DE.35.CA-Q6 Includes: • antiinfectives, antiinflammatory agents, anesthetics
using air or gas NOS	—	1.DE.35.CA-V0
using agent NEC	1.DE.35.JA-Z9	1.DE.35.CA-Z9

1.DE.52.^ ^ Drainage, external auditory meatus**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: that for branchial cyst/abscess
that for preauricular cyst/abscess

Excludes: Excision, branchial fistula/sinus (see [1.DE.86.^ ^](#))
Excision, preauricular fistula/sinus (see [1.DE.86.^ ^](#))
that with mention of debridement or curettage (see [1.DE.86.^ ^](#))

1.DE.52.HA using percutaneous (needle) approach
1.DE.52.LA using incisional technique

1.DE.55.^ ^ Removal of device, external auditory meatus**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Removal, packing [dressing]
Removal, suture

Excludes: Removal of hearing appliance (see [1.DZ.38.^ ^](#))

1.DE.55.CA-FF of sutures using per orifice approach
1.DE.55.JA-NP of packing using external approach

1.DE.56.^ ^ Removal of foreign body, external auditory meatus**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Removal of foreign body (e.g. insect, marble), ear with or without irrigation

Excludes: Removal of cerumen from ear (see [1.DE.57.^ ^](#))

-
- 1.DE.56.CA using per orifice approach (for simple extraction of intraluminal object)
Excludes: Simple extraction (or irrigation) of ear canal to remove wax (see [1.DE.57.^ ^](#))
- 1.DE.56.JA using external approach (for extraction of embedded foreign body)
Excludes: Removal of pierced earring, auricle (see [1.DA.56.^ ^](#))
- 1.DE.56.LA using incisional approach
-

1.DE.57.^ ^ Extraction, external auditory meatus**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Disimpaction, auditory canal
Removal of cerumen, external auditory meatus
that with or without irrigation

Code Also: Any intraoperative microscope assistance (see [3.DZ.94.^ ^](#))

1.DE.57.^ Extraction, external auditory meatus	endoscopic per orifice approach	per orifice approach
using agent NEC [e.g. soap solution]	1.DE.57.BA-Z9	1.DE.57.CA-Z9
using antiinfective irrigating solution	1.DE.57.BA-D1 Includes: • chlorhexidine, neomycin	1.DE.57.CA-D1 Includes: • chlorhexidine, neomycin
using device NEC	1.DE.57.BA-GX	1.DE.57.CA-GX
using suction	1.DE.57.BA-TJ	1.DE.57.CA-TJ
using thermal device [e.g. candle]	1.DE.57.BA-KH	1.DE.57.CA-KH

1.DE.59.^ Destruction, external auditory meatus**S** 4 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Excludes: Debridement for removal of cerumen from ear (see [1.DE.57.^](#))

1.DE.59.JA-AG using laser
 1.DE.59.JA-GX using device NEC

1.DE.80.^ Repair, external auditory meatus**S** 10 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 10	Optional	Tx Status 5	Status	A	Abandoned after onset
				R	Revision
				S	Staged
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Canaloplasty, external auditory meatus that following trauma

1.DE.80.LA	using open approach and simple suture or apposition technique
1.DE.80.LA-XX-A	using open approach and full thickness autograft
1.DE.80.LA-XX-B	using open approach and split thickness autograft (e.g. Thiersch graft)
1.DE.80.LA-XX-E	using open approach and local flap [e.g. Korner, Surdille, Starke, Panse]
1.DE.80.LA-XX-F	using open approach and free flap
1.DE.80.LA-XX-Q	using open approach and combined sources of tissue [e.g. skin flaps and grafts]

1.DE.84.^ Construction or reconstruction, external auditory meatus

S⁹ **L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 9	Optional	Tx Status 4	Status	A	Abandoned after onset
				S	Staged
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Construction, external auditory canal
Correction, congenital atresia of meatus
Drilling to create meatus
Meatoplasty, for atresia

Code Also: Any concomitant repair of tympanic membrane (see [1.DF.80.^](#))
Any concomitant repair, middle ear (see [1.DK.80.^](#))

1.DE.84.^ Construction or reconstruction, external auditory meatus	using combined sources of tissue	using full thickness autograft	using split thickness autograft
transmastoid approach	1.DE.84.QR-XX-Q	1.DE.84.QR-XX-A	1.DE.84.QR-XX-B
transmeatal approach	1.DE.84.LL-XX-Q	1.DE.84.LL-XX-A	1.DE.84.LL-XX-B

1.DE.86.^.^ Closure of fistula, external auditory meatus**S** ⁹ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 9	Optional	Tx Status 4	Status	A	Abandoned after onset
				S	Staged
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Closure, branchial cleft sinus/fistula (see Note below)
 Closure, postauricular sinus/fistula
 Closure, preauricular sinus/fistula
 Curettage, preauricular abscess/cyst
 Fistulectomy, branchial cleft (see Note below)
 Fistulectomy, preauricular

Note: Branchial cleft fistulas originate in more than one site (e.g. pharynx, pyriform sinus) but the repair is grouped here with the preauricular fistulas. A portion of them are considered to be congenital duplications of the external auditory canal and hence, the selection of this site for the intervention. The diagnosis code will give further detail as to whether there is a branchial cleft fistula or a preauricular fistula.

1.DE.86.^.^ Closure of fistula, external auditory meatus	using distant pedicled flap	using full thickness autograft	using split thickness autograft	with excision alone [e.g. débridement, curettage]
for fistula terminating at face [horizontal]	1.DE.86.MG-XX-G	1.DE.86.MG-XX-A	1.DE.86.MG-XX-B	1.DE.86.MG
for fistula terminating in neck [vertical fistula]	1.DE.86.MK-XX-G	1.DE.86.MK-XX-A	1.DE.86.MK-XX-B	1.DE.86.MK
for fistula terminating in nose [horizontal]	1.DE.86.ML-XX-G	1.DE.86.ML-XX-A	1.DE.86.ML-XX-B	1.DE.86.ML

1.DE.87.^.^ Excision partial, external auditory meatus**S** ⁹ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 9	Optional	Tx Status 4	Status	A	Abandoned after onset
				S	Staged
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Enlarging, external auditory meatus
Excision, bony lesion (e.g. osteoma)
Meatoplasty without mastoidectomy
Sleeve excision of cartilaginous and soft tissue of the canal that for acquired or traumatic stenosis
Unroofing, external auditory meatus
Widening, external auditory meatus
- Excludes:** Meatoplasty concurrent with canal wall-down mastoidectomy (see [1.DL.91.^^](#))
that for congenital atresia (see [1.DE.84.^^](#))

1.DE.87.LA	using open approach and no tissue
	Includes: Debridement Microdebridement
1.DE.87.LA-XX-A	using open approach and full thickness autograft [e.g. fascia, fat]
1.DE.87.LA-XX-B	using open approach and split thickness graft [e.g. Thiersch graft]
1.DE.87.LA-XX-E	using open approach and local flap [e.g. Korner, Surdille, Starke, Panse]
1.DE.87.LA-XX-F	using open approach and free flap

1.DE.91.^^ Excision radical, external auditory meatus

S⁹ **L**²

1.DF.72.^ ^ Release, tympanic membrane**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Tympanic plicotomy
Tympanolysis

1.DF.72.LA using open approach

1.DF.80.^ ^ Repair, tympanic membrane**S** 10 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 10	Optional	Tx Status 5	Status	A	Abandoned after onset
				R	Revision
				S	Staged
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Closure of perforation, eardrum
Myringostapediopexy
Repair, eardrum

Code Also: Any concomitant ossicular bone manipulation or excision for placement of prosthesis (see [1.DG.84.^ ^](#))
Any concomitant ossiculoplasty (see [1.DG.84.^ ^](#))
Any mastoidectomy (see canal wall up [1.DL.89.^ ^](#) or canal wall down [1.DL.91.^ ^](#))
Any release of ear ossicles (see [1.DG.72.^ ^](#))

Note: When there has been a perforation of the tympanic membrane, a myringoplasty or a tympanoplasty is done to restore the two major functions: to control infection and to improve conductive hearing loss.
The term myringoplasty, sometimes referred to as tympanoplasty type 1, is the closure of the tympanic membrane perforation without entering the middle ear (i.e. without altering the ossicular chain).
The term tympanoplasty, types 2 to 5, involves the manipulation of the tympanic membrane and bones of the ossicular chain and if present, eradication of disease from the middle ear.

Omit code: When raising [elevating] a tympanomeatal flap for access to the middle ear and subsequently suturing it back in place (without grafting for surgical defect reinforcement of the tympanic membrane).

1.DF.80.LA	using myringoplasty technique without tissue
	Includes: that for microperforation patches (using gel)
1.DF.80.LA-XX-A	using myringoplasty technique and autograft
1.DF.80.LA-XX-L	using myringoplasty technique and xenograft
1.DF.80.LA-XX-Q	using myringoplasty technique and combined sources of tissue [e.g. autograft, xenograft, synthetic tissue]
1.DF.80.TP-XX-A	using tympanoplasty technique and autograft
1.DF.80.TP-XX-L	using tympanoplasty technique and xenograft
1.DF.80.TP-XX-Q	using tympanoplasty technique and combined sources of tissue [e.g. autograft, xenograft, synthetic tissue]

1.DF.85.^ ^ Transplant, tympanic membrane**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

1.DF.85.LA-XX-K without removal of recipient's annulus
Includes: Placing homologous annulus onto the patient's annulus

1.DF.85.WE-XX-K with total removal of recipient's annulus
Includes: Total replacement of patient's annulus placed in the bony sulcus

1.DF.87.^ ^ Excision partial, tympanic membrane**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Note: The elevation and replacing [re-draping] of canal skin over the defect does not qualify as a tissue graft.

1.DF.87.LA using open approach and no tissue
 1.DF.87.LA-XX-A using open approach and full thickness autograft [e.g. fascia]

1.DF.89.^.^ Excision total, tympanic membrane**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Myringectomy
Myringodectomy
that without tissue graft
Tympanectomy

1.DF.89.LA-XX-A using open approach and full thickness autograft [e.g. fascia]

1.DG.^.^ Therapeutic Interventions on the Ossicular Chain

Includes: that with involvement of tensor tympani

Excludes: Tympanic cavity with contents (see Middle ear NEC [1.DK.^.^](#))

1.DG.55.^.^ Removal of device, ossicular chain**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

1.DG.55.LA-PM of (total, partial) ossiculoplasty replacement prosthesis [TORP, PORP] using open approach

1.DG.58.^.^ Procurement, ossicular chain

Includes: Harvesting, ossicles [stapes, incus or malleus]

1.DG.58.LA using open approach

1.DG.72.^ ^ Release, ossicular chain**S** ¹⁰ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 10	Optional	Tx Status 5	Status	A	Abandoned after onset
				R	Revision
				S	Staged
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Division of otosclerotic process [material]
 Mobilization, stapes
 Mobilization, trans crural
 Raising [elevating] and replacing the tympanomeatal flap
 Stapediolysis

Excludes: that done with stapedectomy (see [1.DG.84.^ ^](#))

Code Also: Any concomitant myringoplasty (see [1.DF.80.^ ^](#)) and/or mastoidectomy

1.DG.72.LA using open approach

1.DG.72.LA-AG using open approach and laser

1.DG.84.^ ^ Reconstruction, ossicular chain**S** ¹⁰ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 10	Optional	Tx Status 5	Status	A	Abandoned after onset
				R	Revision
				S	Staged
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes:	Correction, previously placed stapes prosthesis Excision of footplate Malleostapediopexy Ossiculoplasty Removal of stapes superstructure [suprastructure] Replacement, previously placed ossicular prosthesis Revision, stapedectomy/stapedotomy Stapedectomy with bisection of footplate Stapedectomy with incus replacement Stapedectomy with reestablishment of ossicular continuity (by insertion of stapes prosthesis attached to incus) Stapedioplasty with insertion of prosthesis Stapedotomy, small fenestra that for otosclerosis
Excludes:	Mobilization only (see 1.DG.72.^^)
Code Also:	Any concomitant mastoidectomy (see canal wall up 1.DL.89.^^ or canal wall down 1.DL.91.^^) Any concomitant tympanoplasty graft (see 1.DF.80.^^)
1.DG.84.LA	using open approach
	Includes: Ossiculoplasty NEC
1.DG.84.WJ-PM	using stapedectomy technique and prosthesis
	Includes: Total/partial ossicular replacement prosthesis (i.e. TORP, PORP)
	Note: Involves the complete removal of the posterior and anterior portions of the footplate to allow placement of the prosthesis.
1.DG.84.WK-PM	using stapedotomy technique and prosthesis
	Includes: Total/partial ossicular replacement prosthesis (i.e. TORP, PORP)
	Note: In this procedure, the entire footplate is not removed; instead, a fenestration is created in the footplate to allow placement of a prosthesis.

1.DJ.^^.^^ Therapeutic Interventions on the Eustachian Tube

Includes: Auditory tube

1.DJ.35.^ ^ Pharmacotherapy (local), eustachian tube

- Includes:** Injection, eustachian tube
 Instillation, eustachian tube
 Insufflation, eustachian tube
 Irrigation, eustachian tube
 that using transnasal approach
- Excludes:** Systemic pharmacotherapy (see [1.ZZ.35.^ ^](#))
 that for dilation of eustachian tube (see [1.DJ.50.^ ^](#))
 that for occlusion of eustachian tube (see [1.DJ.51.^ ^](#))

1.DJ.35.CA-D1	using per orifice approach and antiinfective irrigating solution Includes: chlorhexidine, neomycin
1.DJ.35.CA-D2	using per orifice approach and salt irrigating solution Includes: sodium chloride
1.DJ.35.CA-D3	using per orifice approach and other irrigating solution Includes: sorbitol, mannitol
1.DJ.35.CA-Q6	using per orifice injection of otological agent NEC Includes: antiinfectives, antiinflammatory agents, anesthetics
1.DJ.35.CA-V0	using per orifice injection of air, gas

1.DJ.50.^ ^ Dilation, eustachian tube**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Distention, eustachian tube
 Inflation, eustachian tube
 Politzerization, eustachian tube (for dilation)
 that using trans nasal approach

1.DJ.50.CA-EP	using per orifice approach with bag [e.g. Politzer]
1.DJ.50.CA-V0	using per orifice injection of air or gas
1.DJ.50.CA-Z9	using per orifice injection of agent NEC [e.g. liquid]

1.DJ.51.^ ^ Occlusion, eustachian tube**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: that using trans nasal approach

1.DJ.51.CA-H4 using per orifice approach with occlusive agent [e.g. boric acid, salicylic acid]
 1.DJ.51.CA-W8 using per orifice approach with synthetic agent [e.g. Teflon paste]

1.DJ.52.^ ^ Drainage, eustachian tube**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Aspiration, eustachian tube (for drainage of abscess)

Excludes: Aspiration for biopsy (see Section 2)

1.DJ.52.CA-TJ using per orifice (transnasal) approach and suction device
 1.DJ.52.CA-TS per orifice (transnasal) approach and drainage catheter

1.DJ.53.^ ^ Implantation of internal device, eustachian tube**S** ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Cannulation, eustachian tube
 Catheterization (indwelling), eustachian tube
 Insertion of device, eustachian tube
 Intubation, eustachian tube
 Trans tympanic catheterization with stent

1.DJ.53.CA-NR of stent using per orifice (transnasal) approach

1.DJ.53.LA-NR of stent using open (trans tympanic) approach

1.DJ.55.^ ^ Removal of device, eustachian tube**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

1.DJ.55.CA-NR of stent using per orifice (trans nasal) approach

1.DJ.55.LA-NR of stent using open (trans tympanic) approach

1.DJ.80.^.^ Repair, eustachian tube**S** 5 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: that with obliteration, eustachian tube

1.DJ.80.LA-XX-A using open approach and full thickness autograft

1.DK.^.^ Therapeutic Interventions on the Middle Ear NEC

Includes: Attic
Middle ear NOS
Tympanic cavity (with contents)
Tympanomastoid cavity (with contents)

Excludes: Mastoid process alone (see [1.DL.^.^](#))
Ossicular chain NEC alone (see [1.DG.^.^](#))
Tympanic membrane [ear drum] alone (see [1.DF.^.^](#))

1.DK.35.^.^ Pharmacotherapy (local), middle ear NEC

Includes: Injection, middle ear
Injection, tympanum
Instillation, middle ear
Instillation, tympanum
Pulverization (for instillation), middle ear

Excludes: Systemic pharmacotherapy (see [1.ZZ.35.^.](#))
that for destruction (see [1.DK.59.^.](#))

1.DK.35.HI-Q6 using transtympanic needle injection of otological agent NEC

Includes: anti-infectives, anti-inflammatory agents, anesthetics

1.DK.52.^ ^ Drainage, middle ear NEC**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Aspiration, middle ear
Myringotomy with removal of fluid
Paracentesis, tympanum
that by tympanotomy

Excludes: Myringotomy and intubation (see [1.DF.53.^ ^](#))

1.DK.52.CA-AG using per orifice approach and laser NEC
1.DK.52.HA using percutaneous (needle) approach
1.DK.52.LA using open approach

1.DK.53.^ ^ Implantation of internal device, middle ear NEC**S** ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Implanted vibrating ossicular prosthesis [VORP]
that using tympanomeatal flap

Excludes: Bone anchored hearing aid (see [1.DL.53.^ ^](#))
Cochlear implant hearing aid (see [1.DM.53.^ ^](#))
Fitting of external sound processor component (see [1.DZ.37.^ ^](#))

1.DK.53.LA-TW using open approach and vibrating device

1.DK.55.^ ^ Removal of device, middle ear NEC**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Removal of implanted vibrating ossicular prosthesis [VORP]

1.DK.55.LA-TW of vibrating device using open approach

1.DK.56.^ ^ Removal of foreign body, middle ear NEC**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

1.DK.56.CA using per orifice (extraction) approach

1.DK.59.^ ^ Destruction, middle ear NEC**S** 4 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

1.DK.59.LA-AG using laser
 1.DK.59.LA-GX using device NEC
 1.DK.59.LA-X7 using chemocautery

1.DK.80.^ ^ Repair, middle ear NEC**S** 10 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 10	Optional	Tx Status 5	Status	A	Abandoned after onset
				R	Revision
				S	Staged
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

1.DK.80.LA using open approach and no tissue
 1.DK.80.LA-XX-A using open approach and full thickness autograft [e.g. fascia, fat]
 Includes: Packing of middle ear with tissue (e.g. muscle, fascia)

1.DK.85.^ ^ Transplant, middle ear NEC**S** 4 **L** 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: that with tympanomeatal flap
 Transplant of ear drum and malleus
 Transplant of ear drum, malleus and incus as a block, possibly together with the stapes

1.DK.85.LA-XX-K using open approach and homograft (from deceased donor)

1.DK.87.^ ^ Excision partial, middle ear NEC**S** 4 **L** 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Incudectomy NOS
 Ossiculectomy NOS
 Removal of (congenital) cholesteatoma with no mastoid involvement
 Removal of small glomus tympanicum tumors
 that with hypotympanotomy

Excludes: Gamma knife radiosurgery, glomus jugulare (see [1.BD.27.^ ^](#))
 Obliteration, (tympano)mastoid cavity (see [1.DL.87.^ ^](#))
 Removal of (attic) cholesteatoma with atticotomy (see [1.DL.87.^ ^](#))
 Removal of glomus jugulare tumor involving mastoidectomy (see [1.DL.89.^ ^](#) or [1.DL.91.^ ^](#))
 that involving mastoidectomy (see [1.DL.89.^ ^](#) or [1.DL.91.^ ^](#))
 that with synchronous canal wall down (tympano)mastoidectomy (for removal of cholesteatoma) (see [1.DL.91.^ ^](#))
 that with synchronous canal wall up (tympano)mastoidectomy (for removal of cholesteatoma) (see [1.DL.89.^ ^](#))

1.DK.87.LL using transtympanotomy approach
 1.DK.87.LL-NR using transtympanotomy approach with insertion of stent or Silastic implant
 1.DK.87.LL-NR-A using transtympanotomy approach with insertion of stent or Silastic implant using autograft
 1.DK.87.LL-XX-A using transtympanotomy approach using autograft

1.DL.^.^ Therapeutic Interventions on the Mastoid (process)

Includes: Mastoid bone
Mastoid portion of temporal bone
Mastoid process
Petrus apex
Petrus pyramid air cells

1.DL.14.^.^ Dressing, mastoid (process)**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

1.DL.14.CA-NP using per orifice approach and packing

1.DL.35.^.^ Pharmacotherapy (local), mastoid (process)

Includes: Routine irrigation (cleaning) of the mastoid cavity following mastoidectomy

1.DL.35.CA-D1 using antiinfective irrigating solution
1.DL.35.CA-D3 using other irrigating solution

1.DL.52.^.^ Drainage, mastoid (process)**S**⁵ **L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Drainage, petrous apex
Drainage, petrous pyramid air cells
that done by trans mastoid antrotomy

1.DL.52.HA using percutaneous (needle) approach
1.DL.52.LA using incisional approach

1.DL.53.^ ^ Implantation of internal device, mastoid (process)

S 10 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 10	Optional	Tx Status 5	Status	A	Abandoned after onset
				R	Revision
				S	Staged
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Osseointegration, bone anchored hearing aid [BAHA]
Osseointegration, bone conduction implant [BCI]

Excludes: Cochlear implants (see [1.DM.53.^ ^](#))
Fitting hearing aid in external ear (see [1.DZ.37.^ ^](#))
Fitting of external sound processor for bone anchored hearing aid [BAHA] (see [1.DZ.37.^ ^](#))
Fitting of external sound processor for bone conduction implant [BCI] (see [1.DZ.37.^ ^](#))

1.DL.53.^ Implantation of internal device, mastoid (process)	of anchoring device (titanium implant) [1st stage osseointegration]	of anchoring device (titanium implant) and connecting abutment [single episode]	of connecting abutment [2nd stage osseointegration]	of (auditory) conduction device (implant)
using full thickness autograft for repair	1.DL.53.LA-EJ-A Includes: <ul style="list-style-type: none">that for bone anchored hearing aid [BAHA] Note: <ul style="list-style-type: none">This device uses a percutaneous osseointegrated fixture to create a method for direct transmission of vibration to the skull	1.DL.53.LA-EF-A Includes: <ul style="list-style-type: none">that for bone anchored hearing aid [BAHA] Note: <ul style="list-style-type: none">This device uses a percutaneous osseointegrated fixture to create a method for direct transmission of vibration to the skull	1.DL.53.LA-EG-A Includes: <ul style="list-style-type: none">that for connection to previously implanted bone anchored hearing aid [BAHA]	—
using split thickness autograft for repair	1.DL.53.LA-EJ-B Includes: <ul style="list-style-type: none">that for bone anchored hearing aid [BAHA] Note: <ul style="list-style-type: none">This device uses a percutaneous osseointegrated fixture to create a method for direct transmission of vibration to the skull	1.DL.53.LA-EF-B Includes: <ul style="list-style-type: none">that for bone anchored hearing aid [BAHA] Note: <ul style="list-style-type: none">This device uses a percutaneous osseointegrated fixture to create a method for direct transmission of vibration to the skull	1.DL.53.LA-EG-B Includes: <ul style="list-style-type: none">that for connection to previously implanted bone anchored hearing aid [BAHA]	—
without tissue	1.DL.53.LA-EJ Includes: <ul style="list-style-type: none">that for bone anchored hearing aid [BAHA] Note: <ul style="list-style-type: none">This device uses a percutaneous osseointegrated fixture to create a method for direct transmission of vibration to the skull	1.DL.53.LA-EF Includes: <ul style="list-style-type: none">that for bone anchored hearing aid [BAHA] Note: <ul style="list-style-type: none">This device uses a percutaneous osseointegrated fixture to create a method for direct transmission of vibration to the skull	1.DL.53.LA-EG Includes: <ul style="list-style-type: none">that for connection to previously implanted bone anchored hearing aid [BAHA]	1.DL.53.LA-EI Includes: <ul style="list-style-type: none">Bonebridge conduction hearing implant Note: <ul style="list-style-type: none">A bone conduction implant is surgically seated into the mastoid process and a titanium pin is placed into the temporal bone for sound wave conduction. The implant is wholly under the skin, without an abutment exiting the skin, (as is the case in the bone anchored hearing aid)

1.DL.55.^ ^ Removal of device, mastoid (process)**S** ⁴ **L** ²

using combined sources of tissue [e.g. autograft, pedicled/free flap]	1.DL.80.LA-XX-Q	1.DL.80.SZ-XX-Q

1.DL.87.^.^ Excision partial, mastoid (process)**S** 5 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Atticoantrotomy
Atticotomy
Removal of attic cholesteatoma
- Excludes:** that with Bondy mastoidectomy (see [1.DL.91.^^](#))
that with canal wall down mastoidectomy (see [1.DL.91.^^](#))
that with canal wall up mastoidectomy (see [1.DL.89.^^](#))

- 1.DL.87.LA using open approach
Includes: Debridement, mastoid cavity
- 1.DL.87.LA-AG using open approach and laser
- 1.DL.87.LA-XX-A using open approach and autograft [e.g. fascia, cartilage, bone]
- 1.DL.87.LA-XX-G using open approach and pedicled distant flap [e.g. Rambo procedure, muscle flap]
Includes: Obliteration, mastoid cavity

1.DL.89.^^ Excision total, mastoid (process)**S** 10 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 10	Optional	Tx Status 5	Status	A	Abandoned after onset
				R	Revision
				S	Staged
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Cortico mastoidectomy
Mastoidectomy, complete
Mastoidectomy, cortical
Mastoidectomy, intact bridge
Mastoidectomy, simple
Removal of ossicular chain
that done by retroauricular or endaural approach
that done by trans mastoid antrotomy
that with excision of tympanic membrane
Tympanomastoidectomy NOS
Tympanomastoidectomy, canal wall up
- Code Also:** Any concomitant ossicular chain reconstruction (see [1.DG.84.^^](#))
Any concomitant tympanoplasty (see [1.DF.80.^^](#))

- 1.DL.89.LA using postauricular or endaural approach
- 1.DL.89.NR using postauricular or endaural approach with facial recess approach (posterior tympanotomy)

1.DL.91.^ ^ Excision radical, mastoid (process)**S** 10 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 10	Optional	Tx Status 5	Status	A	Abandoned after onset
				R	Revision
				S	Staged
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes:

Bondy's operation
 Canal wall down mastoidectomy with replacement of (posterior) canal wall
 Mastoidectomy, (classical) radical [e.g. no reconstruction of drum (tympanic membrane) is performed]
 Mastoidectomy, (conservative) radical
 Mastoidectomy, (modified) radical (structures within the tympanic cavity are preserved)
 Mastoidectomy, retrograde
 that with excision of tympanic membrane
 that with petrous apicectomy
 that with removal of ossicular chain
 that with subsequent meatoplasty
 Tympanomastoidectomy, canal wall down that with re pneumatization

Excludes:

that involving parotidectomy (see [1.FM.91.^ ^](#))

Code Also:

Any concomitant neck dissection (see [1.MC.^ ^.^ ^](#))
 Any concomitant ossicular chain reconstruction (see [1.DG.84.^ ^](#))
 Any concomitant tympanoplasty (see [1.DF.80.^ ^](#))

Note:

A canal wall down mastoidectomy also involves a meatoplasty to widen the ear canal for better access to the created mastoid cavity. A tissue flap(s) is used to obliterate the mastoid cavity following canal wall down mastoidectomy. Obliteration is considered part of the procedure and not coded separately.

1.DL.91.LA	using open canal wall down approach
1.DL.91.LA-XX-A	using open canal wall down approach with autograft
1.DL.91.LA-XX-F	using open canal wall down approach with free flap
	Includes: Heerman free temporalis muscle flap
1.DL.91.LA-XX-G	using open canal wall down approach with pedicled flap
	Includes: Rambo flap, Meurmann's musculoperiosteal flap, Palva flap, superiorly based flaps, anteriorly based flaps, and inferiorly based flaps
1.DL.91.LA-XX-Q	using open canal wall down approach with combined sources of tissue

Therapeutic Interventions on the Inner Ear (1DM - 1DZ)

1.DM.^.^ Therapeutic Interventions on the Cochlea

1.DM.53.^.^ Implantation of internal device, cochlea

S⁵ **L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description

1.DM.55.LA-LK of single channel cochlear implant
 1.DM.55.LA-LL of multi-channel cochlear implant

1.DN.^ ^.^ Therapeutic Interventions on the Endolymphatic Sac

Note: A mastoidectomy may be an integral part of these procedures as access to the site and should not be coded separately.

1.DN.52.^ ^ Drainage, endolymphatic sac**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Decompression, endolymphatic sac
 Fistulization, endolymphatic sac
 Perilymphatic tap

1.DN.52.QR using trans mastoid [mastoidectomy] approach

1.DN.76.^.^ Bypass, endolymphatic sac**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes:

- Shunt, endolymph perilymph
- Shunt, endolymphatic (subarachnoid) that terminating in mastoid
- that terminating in subarachnoid space
- that with dilation of endolymphatic duct

1.DN.76.QR-QB endolymphatic mastoid shunt (with valved shunt) and simple mastoidectomy approach

1.DP.^.^.^ Therapeutic Interventions on the Utricle and Saccule

Note: A mastoidectomy may be an integral part of these procedures as access to the site and should not be coded separately.

1.DP.53.^.^ Implantation of internal device, utricle and saccule**S** ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

1.DP.53.LA-GN of decompression device using trans canal approach

Includes: that done by sacculotomy

1.DP.53.QR-GN of decompression device using trans mastoid approach

1.DP.55.^.^ Removal of device, utricle and saccule**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

1.DP.55.LA-GN of decompression device using trans canal approach
 1.DP.55.QR-GN of decompression device using trans mastoid approach

1.DR.^.^ Therapeutic Interventions on the Inner Ear NEC

- Includes:**
- Inner ear NOS
 - Internal auditory canal
 - Labyrinth NOS
 - Membranous labyrinth
 - Osseous labyrinth
 - Oval window
 - Round window
 - Semicircular canals
 - Semicircular ducts
 - Vestibular system
 - Vestibule
- Excludes:**
- Cochlea alone (see [1.DM.^.^](#))
 - Endolymphatic sac alone (see [1.DN.^.^](#))
 - Eustachian tube (see [1.DJ.^.^](#))
 - Utricle and saccule alone (see [1.DP.^.^](#))
 - Vestibular nerve (see [1.BD.^.^](#))

1.DR.12.^.^ Therapy, inner ear NEC

- Includes:**
- Canalith [particle] repositioning procedure [CRP]
 - Epley [repositioning] maneuver
- Note:** In the repositioning procedure [Epley maneuver] the patient is moved through several positions to slowly move the otoconia particles (otoliths) from the posterior semicircular canals back into the utricle.

1.DR.12.JJ using manual technique

1.DR.51.^ ^ Occlusion, inner ear NEC**S** ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Canal partitioning
 Canal plugging (for the treatment of benign paroxysmal positional vertigo)
 Occlusion, semicircular canal

Excludes: Fenestration, semicircular canal (see [1.DR.52.^ ^](#))
 Oval or round window plugging for repair of perilymph fistulas (see [1.DR.80.^ ^](#))

1.DR.51.LA-W3 using open approach and fibrin glue [e.g. TisseI]
 1.DR.51.LA-XX-A using open approach and autograft [e.g. fat, fascia or muscle to pack area]

1.DR.52.^ ^ Drainage, inner ear NEC**S** ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description

L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Fenestration, labyrinth (for otosclerosis)
 Fistulization, labyrinth NOS

1.DR.52.LA using trans canal approach
 1.DR.52.QR using trans mastoid [mastoidectomy] approach

1.DR.57.^ ^ Extraction, inner ear NEC**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Sequestrectomy, osseous labyrinth

1.DR.57.QQ using trans labyrinthine approach
 1.DR.57.SZ using temporal bone approach

1.DR.59.^ ^ Destruction, inner ear NEC**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Destruction, labyrinth

Excludes: Ablation, peripheral vestibular apparatus by systemic injection of antibacterial agent (e.g. gentamicin, streptomycin) (see [1.ZZ.35.^ ^](#))
 Destruction, vestibular nerve (see [1.BD.59.^ ^](#))

Code Also: Any concomitant repair of facial nerve (see [1.BB.80.^ ^](#))

1.DR.59.^ ^ Destruction, inner ear NEC	using transcanal approach [transmeatal oval window approach]	using transmastoid approach [via mastoidectomy]
using chemocautery	1.DR.59.LA-X7	1.DR.59.QR-X7
using cryotherapy	1.DR.59.LA-AD	1.DR.59.QR-AD
using tack procedure [e.g. tack into footplate of stapes or hook into round window]	1.DR.59.LA-KD	1.DR.59.QR-KD
using ultrasound	1.DR.59.LA-AZ	1.DR.59.QR-AZ

1.DR.72.^.^ Release, inner ear NEC**S** ¹⁰ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 10	Optional	Tx Status 5	Status	A	Abandoned after onset
				R	Revision
				S	Staged
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Decompression, internal auditory canal
Decompression, labyrinth NOS

Excludes: Decompression, facial nerve (see [1.BB.72.^.^](#))
Decompression, vestibular nerve (see [1.BD.72.^.^](#))

1.DR.72.SZ-XX-A using temporal bone approach and autograft [e.g. muscle]

1.DR.80.^.^ Repair, inner ear NEC**S** ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Closure, fistula, oval window
 Closure, fistula, round window
 Fistulectomy, inner ear NEC
 Oval or round window plugging for the repair of perilymph fistulas
 Repair, fistula, inner ear NEC
 Repair, perilymphatic fistula
- Excludes:** Canal plugging for the treatment of benign paroxysmal positional vertigo (see [1.DR.51.^^](#))
 Occlusion of semicircular canal for the treatment of benign paroxysmal positional vertigo (see [1.DR.51.^^](#))

1.DR.80.LA-W3 using open approach and fibrin (glue e.g. Tisseal)
 1.DR.80.LA-XX-A using open approach and autograft [e.g. fat, fascia or muscle to pack area]

1.DR.89.^^ Excision total, inner ear NEC

S 9 **L** 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description

				S	Staged
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Bony exenteration of the labyrinth
 Excision, semicircular canals
 Labyrinthectomy
 that for vertigo
 that with excision of incus and stapes to gain access to inner ear
 Trans canal [transtympanic] labyrinthectomy

1.DR.89.LA using trans canal approach [trans meatal oval window approach]
 1.DR.89.QQ using trans-labyrinthine approach
Includes: that done by simple mastoidectomy
 that with removal of incus

1.DR.91.^.^ Excision radical, inner ear NEC**S** 9 **L** 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 9	Optional	Tx Status 4	Status	A	Abandoned after onset
				S	Staged
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Resection, temporal bone with excision of inner ear that with decompression or destruction of nerves

Excludes: Decompression, facial nerve alone (see [1.BB.72.^.^](#))
Section, vestibular nerve alone (see [1.BD.59.^.^](#))

Code Also: Any concomitant neck dissection (see [1.MC.^.^.^](#))

Note: A radical excision of the inner ear may include excision of most of the temporal bone, internal auditory canal, facial nerve, whole of middle ear, parotid gland, pinna and portion of mandible.

1.DR.91.^.^ Excision radical, inner ear NEC	using autograft (for repair of defect)	using combined sources of tissue (for repair of defect)	using free flap (for repair of defect)	using local flap (for repair of defect)	using pedicled flap (for repair of defect)	without tissue
with infratemporal bone approach [transcranial] [craniotomy flap technique]	1.DR.91.SZ-XX-A	1.DR.91.SZ-XX-Q	1.DR.91.SZ-XX-F	1.DR.91.SZ-XX-E	1.DR.91.SZ-XX-G	1.DR.91.SZ
with translabyrinthine approach [transcochlear]	1.DR.91.QQ-XX-A	1.DR.91.QQ-XX-Q	1.DR.91.QQ-XX-F	1.DR.91.QQ-XX-E	1.DR.91.QQ-XX-G	1.DR.91.QQ

1.DZ.^.^.^ Therapeutic Interventions on the Ear NEC**1.DZ.07.^.^ Hyperthermy, ear NEC**

Includes: Application, heat, ear [e.g. for relief of pain]
Reversal, hypothermia, ear

1.DZ.07.JA-KH	using externally applied dry heat [e.g. hot pack]
1.DZ.07.JA-KJ	using externally applied moist heat [e.g. compress]

1.DZ.37.^ ^ Installation of external appliance, ear NEC**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Replacement of appliance or prosthesis, ear

Excludes: Surgical placement of cochlear implant (see [1.DM.53.^ ^](#)), bone anchored hearing device [BAHA] (see [1.DL.53.^ ^](#)) or bone conduction implant [BCI] (see [1.DL.53.^ ^](#))

1.DZ.37.CA-EH of amplification device [e.g. hearing aid] using per orifice approach

1.DZ.37.JA-EH of amplification device [e.g. hearing aid] using external approach

Includes: Installation of external processor for implanted vibrating ossicular prosthesis [VORP]
 Installation of external sound processor for bone anchored hearing aid [BAHA]
 Installation of external sound processor for bone conduction implant [BCI]

1.DZ.37.JA-PM of prosthetic ear using external approach

1.DZ.37.LA-PM of prosthetic ear using open approach

1.DZ.38.^ ^ Management of external appliance, ear NEC**L** ²

				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Adjustment of appliance or prosthesis, ear
 Removal (routine) of appliance or prosthesis, ear

Excludes: that with surgical repair (see [1.DA.80.^ ^](#))

1.DZ.38.JA-EH of amplification device [e.g. hearing aid]

1.DZ.38.JA-PM of prosthetic ear using external approach

1.DZ.70.^ ^ Incision NOS, ear NEC

1.DZ.70.LA	using open approach
------------	---------------------

1.DZ.94.^ ^ Therapeutic intervention NEC, ear NEC

1.DZ.94.HA	using percutaneous (needle) approach
1.DZ.94.JA	using external approach
1.DZ.94.LA	using open approach

Therapeutic Interventions on the Orocraniofacial Region (1EA - 1FX)

Therapeutic Interventions on Musculoskeletal Tissue of Head, Nasal Cavity and Sinuses (1EA - 1EY)

1.EA.^^.^^ Therapeutic Interventions on the Cranium

- Includes:** Cranial base
Cranial suture or ligament
Frontal, parietal, temporal, occipital bone
Skull NOS
- Excludes:** Cranium with maxilla (see [1.EH.^^.^^](#))
Cranium with naso-ethmoidal complex and maxilla (see [1.EH.^^.^^](#))
Ethmoidal bone [lining nasal sinus] (see [1.EC.^^.^^](#))
Malar bone (see [1.EB.^^.^^](#))
Mandible (see [1.EE.^^.^^](#))
Maxilla (see [1.ED.^^.^^](#))
Naso-ethmoidal complex (see [1.EC.^^.^^](#))
Naso-orbital complex alone (see [1.EC.^^.^^](#))
Orbital rim (see [1.EC.^^.^^](#))
Sphenoidal bone [lining nasal sinus] (see [1.EC.^^.^^](#))
Zygoma (see [1.EB.^^.^^](#))

Note: Location attributes may be used in conjunction with the codes listed below to indicate the specific bone involved

1.EA.27.^^ Radiation, cranium

- Includes:** Teletherapy, cranium
Therapy, radiation [radiotherapy], cranial bones
- Excludes:** Radiation, brain (see [1.AN.27.^^](#))

1.EA.27.JA	using external beam
1.EA.27.JX	using focused beam [e.g. gamma knife, cyber knife stereotactic radiosurgery]

1.EA.35.^ ^ Pharmacotherapy (local), cranium

Includes: Cleansing, cranium (open wound fracture)
Irrigation, cranium

Excludes: that concomitant with debridement with elevation of [fracture] fragments of cranium (see [1.EA.73.^ ^](#))
that concomitant with fixation of cranium (see [1.EA.74.^ ^](#))

1.EA.35.JA-D1	using external approach and antiinfective irrigating solution Includes: chlorhexidine, neomycin
1.EA.35.JA-D2	using external approach and salt irrigating solution Includes: sodium chloride
1.EA.35.JA-D3	using external approach and other irrigating solution Includes: sorbitol, mannitol
1.EA.35.LA-K8	using open approach and antibacterial agent (e.g. gentamycin beads)

1.EA.55.^ ^ Removal of device, cranium**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Excludes: Removal, percutaneously fixated immobilization device (e.g. halospinal traction, tongs) (see [1.SC.38.^ ^](#))

1.EA.55.LA-KD	of wire or mesh fixative device
1.EA.55.LA-MG	of osseodistractor device
1.EA.55.LA-NW	of plate, screw device

1.EA.56.^ ^ Removal of foreign body, cranium**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Excludes: that penetrating beyond cranial bone (see [1.AN.56.^ ^](#))

1.EA.56.LA	using open approach
------------	---------------------

1.EA.58.^ ^ Procurement, cranium**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Procurement, calvarial osseous [axial] flap
 Procurement, forehead [axial] flap
 Procurement, pericranial [axial] flap

1.EA.58.LA-XX-G of pedicled cranial flap
 1.EA.58.WL-XX-F of split free cranial flap [e.g. split calvarial flap]
 1.EA.58.WL-XX-G of split pedicled cranial flap

1.EA.72.^ ^ Release, cranium**S** 5 **E** 35

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
E 35	Optional	Number of Cranial Sutures released	Extent	1	One cranial suture (released)
				2	Two cranial sutures (released)
				3	Three cranial sutures (released)
				F	More than three cranial sutures (released)
				U	Unspecified

Includes: Craniectomy, linear
 Craniectomy, strip
 Craniotomy [for release of synostosis]
 Opening, cranial suture
 Osteotomy, cranial [for release of craniosynostosis]
 that for repair of craniosynostosis [or decompression]

Excludes: Elevation of skull fracture (see [1.EA.73.^ ^](#))
 that using osseodistraction device (see [1.EA.79.^ ^](#))

Note: Paediatric cranial repair may involve cranial osteotomies to remodel cranium to eliminate premature fusing [craniosynostosis].

1.EA.72.^ Release, cranium	no tissue used (in the release)	with autograft	with combined sources of tissue [e.g. graft and flap]	with pedicled flap [pericranial flap]
no device used	1.EA.72.LA	1.EA.72.LA-XX-A	1.EA.72.LA-XX-Q	1.EA.72.LA-XX-G
using plate, screw device (with/without wire or mesh)	1.EA.72.LA-NW	1.EA.72.LA-NW-A	1.EA.72.LA-NW-Q	1.EA.72.LA-NW-G
using wire or mesh only	1.EA.72.LA-KD	1.EA.72.LA-KD-A	1.EA.72.LA-KD-Q	1.EA.72.LA-KD-G

1.EA.73.^ Reduction, cranium**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: (Debridement) (with) elevation [of fragments], cranium, without internal fixation

Excludes: that with application of fixation device (see [1.EA.74.^](#))

Code Also: Any concomitant drainage, subdural hematoma (see [1.AA.52.^](#))
Any debridement of brain (see [1.AN.87.^](#))

1.EA.73.LA using open approach

1.EA.74.^ Fixation, cranium**S** 5 **L** 19

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 19	Optional	Cranium	Location	F	Frontal bone
				M	Multiple (overlapping) bones
				O	Occipital bone
				P	Parietal bone
				T	Temporal bone

Includes: Elevation [of fragments], cranium, with internal fixation
Reduction with fixation, cranium

Excludes: Elevation [of fragments], cranium, without fixation (see [1.EA.73.^](#))

Code Also: Any debridement of brain (see [1.AN.87.^](#))
Any occlusion of CSF leak (see [1.AB.86.^](#))

1.EA.74.^ Fixation, cranium	no tissue used during fixation	with autograft	with combined sources of tissue	with free flap	with homograft	with pedicled flap [pericranial flap]	with synthetic tissue [cement, paste]
using plate, screw device (with or without wire or mesh)	1.EA.74.LA-NW	1.EA.74.LA-NW-A	1.EA.74.LA-NW-Q	1.EA.74.LA-NW-F	1.EA.74.LA-NW-K	1.EA.74.LA-NW-G	1.EA.74.LA-NW-N

endoscopic per orifice (e.g. transnasal) approach							
using device NEC	1.EA.87.BA-GX Includes: • Intranasal skull base resection Excludes: • that requiring concomitant cranial reconstruction (plate/bone graft) (see 1.EA.92.^) Code Also: • Any concomitant duraplasty (see 1.AA.80.^)	—	—	—	—	—	—
using ultrasonic aspirator	1.EA.87.BA-AZ Includes: • Intranasal skull base resection Excludes: • that requiring concomitant cranial reconstruction (plate/bone graft) (see 1.EA.92.^) Code Also: • Any concomitant duraplasty (see 1.AA.80.^)	—	—	—	—	—	—

1.EA.92.^ Excision radical with reconstruction, cranium**S** 9

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 9	Optional	Tx Status 4	Status	A	Abandoned after onset
				S	Staged

- Includes:** Craniectomy, radical subtemporal
Glossopharyngectomy with resection of cranial base
Nasopharyngectomy, radical subtemporal
Resection, cranial base
Resection, skull base
- Excludes:** Cranial base resection not requiring cranial reconstruction (plate/bone graft) to close defect (see [1.EA.87.^^](#))
- Code Also:** Any concomitant mandibular split or swing (see [1.EE.71.^^](#))
Any intraoperative stereotactic guidance or computer assistance (see [3.AN.94.^^](#))
Any repair of the dura (see [1.AA.80.^^](#))
Any robotic assisted telemanipulation of tools (see [7.SF.14.^^](#))
- Note:** Involves the resection of neoplasm arising from or extending to cranial base. Approach always involves exposing brain either by a temporary displacement of the facial skeleton or a resection of bony structures [face and skull] for access. Since the neoplasm invades the intracranial space, the resection may involve a surgical margin of neural tissue. Closure of the cranial wound usually requires the use of grafts or flaps [e.g. galeal pericranial flap, calvarial flap, local muscle flap, distant free muscle flap omental flap] often in combination to prevent infection, CSF leakage and facial disfigurement.

1.EA.92.^^ Excision radical with reconstruction, cranium	transcervical approach	transcranial approach (may include orbital osteotomy)	transnasal approach [e.g. transthemoidal, transsphenoidal]	transoral approach [e.g. transpalatine, transmaxillary]	other approach to cranial base [e.g. combination of approaches]
with plate (mesh) and screw	1.EA.92.LP-NW	1.EA.92.SZ-NW	1.EA.92.QS-NW	—	1.EA.92.LY-NW

1.ED.79.^^ Repair by increasing size, maxilla

S 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Distraction osteogenesis [DO], maxilla
 Osseodistraction, maxilla
 Rigid external distraction [RED], maxilla
 Surgically assisted rapid palatal expansion
 that with osteotomy or corticotomy

Excludes: Osseodistraction of maxillary alveolar ridge alone (see [1.EM.79.^^](#))
 Osteotomy without osseodistraction device installed/inserted (see [1.ED.80.^^](#))

Note: Involves either the application of a device from skull to maxilla which reconfigures a recessed maxilla over time as it is drawn outward by periodic adjustment or the induction by gradual separation (distraction) of bony segments using specifically fabricated hardware in conjunction with an osteotomy or corticotomy to promote osteogenesis (new bone formation).

1.ED.79.LA-MG	using osseodistraction device
---------------	-------------------------------

1.ED.80.^ ^ Repair, maxilla**S** 5 **L** 73

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 73	Optional	Maxillary osteotomy regions	Location	M	Multiple (e.g. segmental)
				U	Unspecified
				Z	Other (e.g. Lefort 1, total)

Includes: Osteotomy LeFort [I]
 Osteotomy, maxilla
 Osteotomy, segmental, maxilla

Excludes: Osteotomy, LeFort I with sagittal split of mandible (see [1.EF.80.^ ^](#))
 Osteotomy, LeFort II (see [1.EG.80.^ ^](#))
 Osteotomy, LeFort III (see [1.EH.80.^ ^](#))
 Osteotomy, maxilla involving cranium (see [1.EH.80.^ ^](#))
 Osteotomy, maxilla involving other midface bones (see [1.EG.80.^ ^](#))
 Osteotomy, maxilla with mandible (see [1.EF.80.^ ^](#))
 that using osseodistraction device (see [1.ED.79.^ ^](#))

Code Also: Any application of circumdental fixation [arch bar, wiring, tension band] (see [1.EF.03.^ ^](#))
 Any intermaxillary screw fixation for temporary occlusion (during healing phase) (see [1.EF.03.^ ^](#))
 Any intraoperative stereotactic guidance or computer assistance (see [3.ED.94.^ ^](#))
 Any robotic assisted telemanipulation of tools (see [7.SF.14.^ ^](#))

Note: Often involves the use of a splint to correct occlusal relationship of jaw

Includes:

Osteotomy LeFort I with mandible
 Osteotomy, LeFort I with sagittal split of mandibular ramus
 Osteotomy, maxilla with mandible

Code Also:

Any application of circumdental fixation [arch bar, wiring, tension band] (see [1.EF.03.^.](#))
 Any excision of tooth (see [1.FE.89.^.](#))
 Any intermaxillary screw fixation for temporary occlusion (during healing phase) (see [1.EF.03.^.](#))
 Any intraoperative stereotactic or computer guidance (see [3.EE.94.^.](#))
 Any mentoplasty [genioplasty] for augmentation (see [1.EE.79.^.](#))
 Any mentoplasty [genioplasty] for reduction (see [1.EE.78.^.](#))
 Any robotic assisted telemanipulation of tools (see [7.SF.14.^.](#))

Note:

Often involves the use of a splint to correct occlusal relationship of jaw

1.EF.80.^.^ Repair, maxilla with mandible	open approach using wire or mesh only	open approach using plate, screw device (with/without wire/ mesh)
no tissue used (for defect closure)	1.EF.80.LA-KD	1.EF.80.LA-NW
with autograft [e.g. bone]	1.EF.80.LA-KD-A	1.EF.80.LA-NW-A
with homograft	1.EF.80.LA-KD-K	1.EF.80.LA-NW-K
with synthetic tissue [cement, paste]	1.EF.80.LA-KD-N	1.EF.80.LA-NW-N
with free flap [fibular or costochondral]	1.EF.80.LA-KD-F	1.EF.80.LA-NW-F
with combined sources of tissue	1.EF.80.LA-KD-Q	1.EF.80.LA-NW-Q

1.EG.^^.^^ Therapeutic Interventions on Multiple Bones of Midface Region without Cranium Involvement

- Includes:** Maxilla [LeFort I] with any other of the following bones: nose, naso ethmoidal complex, zygoma, malar, orbital rim
Midface NOS
Midface region [LeFort II]
- Excludes:** Maxilla [LeFort III] with frontal, temporal, occipital or parietal involvement (see [1.EH.^^.^^](#))

1.EG.35.^^ Pharmacotherapy (local), multiple bones of mid face region without cranium involvement

- Includes:** Cleansing, bones of (mid) face (open wound fracture)
Irrigation, bones of (mid) face
- Excludes:** that concomitant with reduction with fixation of bones of mid face (see [1.EG.74.^^](#))

1.EG.35.JA-D1	using external approach and anti infective irrigating solution
	Includes: chlorhexidine, neomycin
1.EG.35.JA-D2	using external approach and salt irrigating solution
	Includes: sodium chloride
1.EG.35.JA-D3	using external approach and other irrigating solution
	Includes: sorbitol, mannitol
1.EG.35.LA-K8	using open approach and antibacterial agent (e.g. gentamycin beads)

1.EG.74.^^ Fixation, multiple bones of mid face region, without cranium involvement**S⁵ L²**

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Reduction with fixation, LeFort I with nasoethmoid complex
 Reduction with fixation, LeFort I with orbito zygomatic complex
 Reduction with fixation, LeFort II [pyramidal]
 Reduction with fixation, maxilla with nasoethmoid complex
 Reduction with fixation, maxilla with nasoorbital complex
 Reduction with fixation, maxilla with other midface bones
 Reduction with fixation, maxilla with zygoma
- Excludes:** Reduction with fixation, LeFort III (see [1.EH.74.^^](#))
 Reduction with fixation, maxilla with cranium (see [1.EH.74.^^](#))
 Reduction with fixation, multiple bones of midface with craniofacial disjunction (see [1.EH.74.^^](#))

1.EG.74.^^ Fixation, multiple bones of mid face region, without cranium involvement	no tissue used [device only]	with autograft	with combined sources of tissue	with free flap	with homograft	with pedicled flap [cranial flap]	with synthetic tissue [cement, paste]
using plate, screw device (with/without wire/mesh)	1.EG.74.LA-NW	1.EG.74.LA-NW-A	1.EG.74.LA-NW-Q	1.EG.74.LA-NW-F	1.EG.74.LA-NW-K	1.EG.74.LA-NW-G	1.EG.74.LA-NW-N

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Omit code: when hyoid bone is removed as part of operative approach to deeper site

1.EJ.89.LA using open approach

1.EL.^.^ Therapeutic Interventions on the Temporomandibular Joint [TMJ]

Includes: Joint capsule, bursa, articular disc, meniscus, ligament, synovial lining [cavity]
Mandibular condyle [subcondyle], coronoid process, glenoid fossa

1.EL.02.^ Exercise, temporomandibular joint [TMJ]

Includes: Assisting and supervising client in performing exercise
that for temporomandibular joint dysfunction

1.EL.02.YD	using exercise NOS
1.EL.02.YK	using passive motion exercise
1.EL.02.YN	using active range of motion exercise
1.EL.02.ZB	using balance training exercise

1.EL.04.^ Mobilization, temporomandibular joint [TMJ]

Includes: Traction, temporomandibular joint [TMJ]

Excludes: Manual myofascial release only around TMJ (see [1.EP.04.^](#))
Mobilization with concomitant manipulation, TMJ (see [1.EL.05.^](#))
Traction for immobilization of fracture, TMJ (see [1.EF.03.^](#))

Note: Involves moving, stretching, or elongating soft tissue of the temporomandibular joint

1.EL.04.JH	using external approach with manual technique
------------	---

1.EL.05.^ Manipulation, temporomandibular joint [TMJ]

Includes: Joint adjustment, temporomandibular [TMJ]
Mobilization with concomitant manipulation, TMJ
Skeletal manipulation, TMJ

1.EL.05.JH	using external approach with manual technique
------------	---

1.EL.35.^ ^ Pharmacotherapy (local), temporomandibular joint [TMJ]

Includes: Injection, temporomandibular joint
Instillation, temporomandibular joint

Excludes: Systemic pharmacotherapy (see [1.ZZ.35.^ ^](#))

1.EL.35.HA-J2	using percutaneous needle approach [injection] and corticosteroid
	Includes: prednisone, dexamethasone, fludrocortisone
1.EL.35.HA-K0	of antiinfective agent NEC using percutaneous needle approach
1.EL.35.HA-N1	of antiinflammatory agent using percutaneous needle approach
	Includes: NSAIDS (indomethacin, ibuprofen), diclofenac, chloroquine, aurothioglucose, D penicillamine
1.EL.35.HA-T9	of other pharmacological agent NEC using percutaneous needle approach
1.EL.35.JA-N2	of analgesic agent using external (topical application) approach
	Includes: dimethyl sufoxide

1.EL.52.^ ^ Drainage, temporomandibular joint [TMJ]**S** ⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Bursectomy, temporomandibular joint
Bursotomy, temporomandibular joint

1.EL.52.DA	using endoscopic [arthroscopic] approach
1.EL.52.HA	using percutaneous (needle) aspiration
1.EL.52.WJ	using open excisional approach [e.g. bursectomy]
1.EL.52.WK	using open incisional approach [e.g. bursotomy]

1.EL.53.^ ^ Implantation of internal device, temporomandibular joint [TMJ]**S** ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Arthroplasty with prosthetic implant, temporomandibular joint
 Implantation, glenoid fossa prosthesis, temporomandibular joint
 Replacement, temporomandibular joint, using prosthetic device
- Excludes:** Replacement, temporomandibular joint, using reconstructive bone flap (see [1.EL.80.^^](#))
- Code Also:** Any intraoperative stereotactic or computer guidance (see [3.EE.94.^^](#))
 Any robotic assisted telemanipulation of tools (see [7.SF.14.^^](#))
- Note:** May involve reshaping the glenoid fossa with removal of articular disc, condylectomy and replacement with a prosthetic implant (fastened, as necessary, with wires/screws)

1.EL.53.^^ Implantation of internal device, temporomandibular joint [TMJ]	open approach and wire	open approach and plate, screw device (with or without wire)
with prosthetic device	1.EL.53.LA-QD	1.EL.53.LA-QE
with prosthetic device and autograft	1.EL.53.LA-QD-A	1.EL.53.LA-QE-A
with prosthetic device and homograft	1.EL.53.LA-QD-K	1.EL.53.LA-QE-K
with prosthetic device and synthetic tissue	1.EL.53.LA-QD-N	1.EL.53.LA-QE-N
with prosthetic device and combined sources of tissue	1.EL.53.LA-QD-Q	1.EL.53.LA-QE-Q

1.EL.55.^^ Removal of device, temporomandibular joint [TMJ]

S ⁴ **L** ²

				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Fixation, mandibular condyle (sub condyle)
Reduction with fixation, mandibular condyle (sub condyle)
Reduction with fixation, mandibular coronoid process

Excludes: that with implantation of prosthetic device (see [1.EL.53.^.^](#))

1.EL.74.^.^ Fixation, temporomandibular joint [TMJ]	no tissue used [device only]	with autograft	with combined sources of tissue	with free [fibular or costochondral] flap	with homograft	with synthetic tissue [cement, paste]
open approach						
using plate, screw device (with or without wire or mesh)	1.EL.74.LA-NW	1.EL.74.LA-NW-A	1.EL.74.LA-NW-Q	1.EL.74.LA-NW-F	1.EL.74.LA-NW-K	1.EL.74.LA-NW-N
using wire or mesh device only	1.EL.74.LA-KD	1.EL.74.LA-KD-A	1.EL.74.LA-KD-Q	1.EL.74.LA-KD-F	1.EL.74.LA-KD-K	1.EL.74.LA-KD-N

1.EL.80.^.^ Repair, temporomandibular joint [TMJ]**S** 5 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Arthroplasty, temporomandibular joint
Condylectomy with reconstruction, temporomandibular joint
Condyloplasty, temporomandibular joint
Condylotomy, temporomandibular joint
Discectomy, temporomandibular joint

Eminectomy with fossaplasty
 Eminoplasty, articular disc of temporomandibular joint
 Meniscoplasty, temporomandibular joint
 Osteotomy, condylar
 Osteotomy, subcondylar
 Plication, meniscus of temporomandibular joint
 Suture of articular disc [or ligament] to joint capsule [with or without joint release]

Excludes: Arthroplasty with implantation, temporomandibular joint (see [1.EL.53.^^](#))
 Osteotomy, sagittal [coronoid process, ramus] (see [1.EE.80.^^](#))

Code Also: Any robotic assisted telemanipulation of tools (see [7.SF.14.^^](#))
 Any use of intraoperative stereotactic computer guidance (see [3.EL.94.^^](#))

Note: May involve multiple interventions on the temporomandibular joint (such as: synovectomy, partial excision [e.g. chondrectomy, condylectomy, meniscectomy synovectomy], loose body extraction, ligament repair, capsular release] resulting in a remodelled temporomandibular joint.

1.EL.80.^^ Repair, temporomandibular joint [TMJ]	no tissue used (for repair of joint)	with autograft	with combined sources of tissue	with free flap [fibular or costochondral flap]	with homograft	with pedicled flap [temporalis muscle or fascia flap]	with synthetic tissue [cement, paste]
open approach							
using plate, screw device (with/without wire/mesh)	1.EL.80.LA-NW	1.EL.80.LA-NW-A	1.EL.80.LA-NW-Q	1.EL.80.LA-NW-F	1.EL.80.LA-NW-K	1.EL.80.LA-NW-G	1.EL.80.LA-NW-N

1.EM.73.^ Reduction, maxillary alveolar ridge

S⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Reduction, maxillary, alveolar ridge and teeth (for fracture)
Excludes: that with internal fixation of alveolar ridge to body of maxilla (see [1.EM.74.^^](#))
Code Also: Any application of circum-dental fixation(see [1.EF.03.^^](#))

1.EM.73.JA using closed (external) approach
 1.EM.73.LA using open approach

1.EM.74.^^ Fixation, maxillary alveolar ridge

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Reduction with (internal) fixation, maxillary alveolar ridge (to body of maxilla)
Code Also: Any concomitant circum-dental fixation (see [1.EF.03.^^](#))

1.EM.74.LA-KD using open approach and wire fixative device (alveolar ridge to maxilla)

1.EM.79.^^ Repair by increasing size, maxillary alveolar ridge

S 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Distraction osteogenesis, maxillary alveolar ridge
 Osseodistraction, maxillary alveolar ridge

1.EM.79.LA-MG using osseodistraction device

1.EM.80.^ Repair, maxillary alveolar ridge**S** 5 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Alveoloplasty, maxillary
 Alveolotomy, maxillary [preprosthetic preparation]
 Augmentation with vestibuloplasty, maxillary alveolar ridge
 Augmentation, maxillary alveolar ridge
 Preparation [pre implant], maxillary alveolar ridge
 Regeneration [guided tissue], maxillary alveolar ridge
 Sinus lift [elevation] procedure, maxillary alveolar ridge

Excludes: Osseodistraction, maxillary alveolar ridge (see [1.EM.79.^](#))

Code Also: Any concomitant implantation of prosthesis, maxillary alveolar ridge (see [1.EM.53.^](#))

1.EM.80.^ Repair, maxillary alveolar ridge	no tissue used for repair	with autograft	with combined sources of tissue	with homograft	with local [transposition] flap [mucoperiosteal flap]	with synthetic tissue [hydroxyapatite, paste]
no device used [tissue alone]	1.EM.80.LA	1.EM.80.LA-XX-A	1.EM.80.LA-XX-Q	1.EM.80.LA-XX-K	1.EM.80.LA-XX-E	1.EM.80.LA-XX-N
with plate/screw	—	1.EM.80.LA-NW-A	1.EM.80.LA-NW-Q	—	—	—
with membrane [e.g. Guidor]	1.EM.80.LA-MA	1.EM.80.LA-MA-A	1.EM.80.LA-MA-Q	1.EM.80.LA-MA-K	1.EM.80.LA-MA-E	1.EM.80.LA-MA-N

1.EM.86.^ Closure of fistula, maxillary alveolar ridge**S** 6

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 6	Optional	Tx Status 2	Status	A	Abandoned after onset
				R	Revision (return to same site to debride abscess, not planned)
				S	Staged (resection completed over 2 separate operative episodes)

- Includes:** Closure, cleft, maxillary alveolar ridge
 Closure, fistula, maxillary alveolar ridge
 Repair, cleft, maxillary alveolar ridge
 Repair, fistula, maxillary alveolar ridge
- Excludes:** Closure, cleft, maxillary alveolar ridge with palate (see [1.FB.86.^^](#))

1.EM.86.LA-XX-A	using autograft [e.g. bone, skin, mucosa]
1.EM.86.LA-XX-E	using local flap [e.g. mucoperiosteal flap]
1.EM.86.LA-XX-K	using homograft [e.g. bone]
1.EM.86.LA-XX-N	using synthetic tissue [e.g. hydroxyapatite, paste]
1.EM.86.LA-XX-Q	using combined sources of tissue [grafts, flaps, synthetic tissue]

1.EM.87.^^ Excision partial, maxillary alveolar ridge

S ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Alveolectomy, maxillary
 Enucleation [cyst], maxillary alveolar ridge
 Excision, odontogenic [cyst], maxillary alveolar ridge
 Ostectomy, maxillary alveolar ridge
- Excludes:** Alveolectomy for surgical contouring of maxillary alveolar ridge [e.g. for denture preparation] (see [1.EM.80.^^](#))
 Alveolotomy, maxillary alveolar ridge (see [1.EM.80.^^](#))

1.EM.87.LA	using open approach without tissue (for closure of defect)
1.EM.87.LA-XX-A	using autograft [e.g. bone, skin, mucosa]
1.EM.87.LA-XX-E	using local flap [e.g. mucoperiosteal flap]
1.EM.87.LA-XX-K	using homograft [e.g. bone]
1.EM.87.LA-XX-N	using synthetic tissue [e.g. hydroxyapatite, bone paste]
1.EM.87.LA-XX-Q	using combined sources of tissue [grafts, flaps, synthetic tissue]

1.EN.^^.^^ Therapeutic Interventions on the Mandibular Alveolar Ridge

- Includes:** Mandibular alveolar process, arch

1.EN.53.^ ^ Implantation of internal device, mandibular alveolar ridge**S 11 E 5**

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 11	Optional	Tx Status 6	Status	A	Abandoned after onset
				R	Revision
				S1	Stage 1, placement of implant
				S2	Stage 2, abutment attachment
E 5	Optional	Implants	Extent	1	One implant
				2	Two implants
				3	Three implants
				4	Four implants
				5	Five implants
				6	Six implants
				7	Seven implants
				8	Eight implants
				9	Nine implants

Includes: Implantation, prosthetic anchor [osseointegrated], mandibular alveolar ridge
 Implantation, retentive device, mandibular alveolar ridge

Excludes: Preparation of alveolar ridge [preprosthetic] for mandibular implant (see [1.EN.80.^ ^](#))

Note: Involves implanting a retentive device into alveolar bone either to provide stable anchorage of dental prosthetic devices (which are subsequently attached to these permanent implants) or to prevent future erosion or fracture of the alveolar ridge. (For patients with a reconstructed mandible, this may involve placing implants directly into the reconstructed bone flap/graft.)

1.EN.53.LA-KD	of transosseous [mandibular] staple

1.EP.^ ^.^ ^ Therapeutic Interventions on the Muscles of Head and Neck

Includes: Fascia of head and neck: temporal, buccopharyngeal, parotid and masseter
Muscles of head: occipitofrontalis, pterygoid, temporalis, temporoparietal, zygomaticus major and minor palatini
Muscles of the face
Muscles of the neck: buccinator, cricothyroid, digastric, geniohyoid, mylohyoid, omohyoid, platysma, pterygoid, scalene, sternocleidomastoid, sternohyoid, thyrohyoid.

Excludes: Muscles of eye (see [1.CQ.^ ^.^ ^](#))
Muscles of the tongue (see [1.FJ.^ ^.^ ^](#))

1.EP.04.^ ^ Mobilization, muscles of head and neck

Includes: Myofascial release, muscles of head and neck
Traction, muscles of head and neck

Note: Involves moving, stretching, or elongating soft tissue of head and neck (e.g. around jaw).

1.EP.04.JH	using external approach with manual technique
------------	---

1.EP.09.^ ^ Stimulation, muscles of head and neck

Includes: Electrostimulation, muscles of head and neck that for wound healing, pain relief, etc.

1.EP.09.JA-AG	using laser
1.EP.09.JA-AZ	using ultrasound
1.EP.09.JA-DV	using electrical stimulating device
1.EP.09.JH	using external manual technique

1.EP.35.^ ^ Pharmacotherapy, muscles of head and neck

Includes: Chemodenervation (partial), muscles of head and neck

Excludes: Injection of botulinum toxin into ocular muscle (see [1.CQ.35.^ ^](#))

Note: Involves a partial chemical denervation of head and neck muscle to induce localized muscle paralysis, which may be temporary in duration, in order to treat spasms.

1.EP.35.HA-L7	of bacterial toxin [e.g. botulinum toxin or Botox] by needle injection
---------------	--

1.EP.58.^ ^ Procurement, muscles of head and neck**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Procurement, temporalis muscle [or fascia]

1.EP.58.LA	of autograft using open approach
------------	----------------------------------

1.EP.72.^ ^ Release, muscles of head and neck**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Fasciectomy, head and neck [e.g. temporal, buccopharyngeal, parotid, masseter]
 Fasciotomy, head and neck [e.g. temporal, buccopharyngeal, parotid, masseter]
 Lengthening, muscles of neck (for torticollis)
 Myotomy, head and neck
 Release, (congenital) torticollis
 Release, clavicle (for torticollis)
 Release, muscles of neck (for torticollis)

1.EP.72.DA using endoscopic approach (to preserve spinal accessory nerve)
 1.EP.72.WJ using excisional technique [e.g. fasciectomy]
 1.EP.72.WK using incisional technique [e.g. fasciotomy, myotomy]

1.EP.80.^ ^ Repair, muscles of head and neck

S 28

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 28	Optional	Treatment Status 3A	Status	D	Delayed (closure occurs > 24 hrs post trauma)
				R	Revision
				S	Staged

Includes: Fascioplasty, head and neck [temporal, buccopharyngeal, parotid, masseter]
 Fasciorrhaphy, head and neck [temporal, buccopharyngeal, parotid, masseter]
 Myoplasty, head and neck
 Myorrhaphy, head and neck
 Platysmaplasty
 Reanimation, face
 Sling, fascial, face
 Sling, static, face
 Transfer, crossover, muscles of face
 Transposition, muscles of face

Excludes: Suturing, skin and subcutaneous tissue eyelid (see [1.CV.80.^ ^](#))
 Suturing, skin and subcutaneous tissue of face (see [1.YF.80.^ ^](#))
 Suturing, skin and subcutaneous tissue of neck (see [1.YG.80.^ ^](#))
 Suturing, skin and subcutaneous tissue of nose (see [1.YD.80.^ ^](#))
 that with resection [e.g. for neoplasm] (see [1.EQ.87.^ ^](#))

1.EP.80.LA using apposition technique [e.g. suturing]
 1.EP.80.LA-XX-E using local flap [e.g. fascial sling]
 1.EP.80.LA-XX-F using free flap [e.g. gracilis muscle flap, serratus anterior with sural nerve flap]
 1.EP.80.LA-XX-G using pedicled flap [e.g. masseter, temporalis muscle flap, transpositional facial muscle flap]
 1.EP.80.LA-XX-N using synthetic tissue [e.g. static goretex sling]
 1.EP.80.LA-XX-Q using combined sources of tissue [e.g. pedicled with local flap or local flap with static sling]

1.EP.87.^.^ Excision partial, muscles of head and neck**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Excision, non viable (or necrotic) muscle or composite flap (e.g. used in previous facial muscle repair)

Excludes: Excision partial, soft tissue of head and neck (see [1.EQ.87.^.^](#))
 Procurement, muscle graft (see [1.EP.58.^.^](#))
 Resection [neoplasm], soft tissue of head and neck (see [1.EQ.87.^.^](#))

Note: Involves the excision of necrotic (non-viable) flap tissue.

1.EP.87.LA	using simple apposition technique [e.g. suture, staple] (for closure of surgical defect)
1.EP.87.LA-XX-A	using autograft [e.g. fascia or skin] (for closure of surgical defect)
1.EP.87.LA-XX-E	using local transposition flap [e.g. advancement muscle or Z-plasty skin flap] (for closure of defect)
1.EP.87.LA-XX-F	using free flap [e.g. myocutaneous free flap] (for closure of defect)
1.EP.87.LA-XX-Q	using combined sources of tissue [e.g. skin graft with flap] (for closure of defect)

1.EQ.^.^.^ Therapeutic Interventions on the Soft Tissue of Head and Neck

Includes: Soft tissue (abscess, hematoma, wound or neoplasm, sinuses, fistulae) of head and neck
 Soft tissue of head and neck NOS

Excludes: Muscles and tendons of eye (see [1.CQ.^.^.^](#))
 Skin and subcutaneous tissue of face (see [1.YF.^.^.^](#))
 Skin and subcutaneous tissue of neck (see [1.YG.^.^.^](#))

1.EQ.12.^.^ Therapy NEC, soft tissue of head and neck

Includes: Phototherapy, soft tissue of head and neck

1.EQ.12.JA	using other technique NEC
1.EQ.12.JA-AG	using laser NEC (with or without photosensitizing chemicals)
1.EQ.12.JA-DQ	using ultraviolet light
1.EQ.12.JA-DU	using light NEC
1.EQ.12.JA-TW	using vibration device
1.EQ.12.JD	using acupressure technique
	Includes: Reflexology, head (and ear)
1.EQ.12.JJ	using massage technique
1.EQ.12.JP	using therapeutic touch technique

1.EQ.13.^ ^ Control of bleeding, soft tissue of head and neck

- Includes:** Control of bleeding, soft tissue (wound) of head and neck that for open wound or contusion of muscles of head and neck
- Excludes:** Application of pressure dressing to head and neck (see [1.YF.14.^ ^](#))
Systemic pharmacotherapy for control of bleeding (see [1.ZZ.35.^ ^](#)) that with repair of blood vessels (see Repair, blood vessel, by site)

1.EQ.13.HA-C2	using percutaneous injection of antihemorrhagic agent
1.EQ.13.HH-C2	using percutaneous [transcatheter] approach and antihemorrhagic agent [e.g. Vasopressin]
	Includes: Embolization [wound], soft tissue of head and neck
1.EQ.13.JA-C2	using topical application of antihemorrhagic agent
	Includes: aminocaproic acid, aprotinin, phytonadione, thrombin, coagulation factor VIII
1.EQ.13.JN	using external manual compression

1.EQ.14.^ ^ Dressing, soft tissue of head and neck

- Includes:** Bandage, soft tissue [wound] of head and neck
Replacement [change] of dressing, [wound] of head and neck
- Excludes:** that for skin wound of head and neck (see [1.YF.14.^ ^](#) and [1.YG.14.^ ^](#))

1.EQ.14.JA-FN	using moist dressing
1.EQ.14.JA-GN	using pressure dressing
1.EQ.14.JA-H1	using medicated dressing
1.EQ.14.JA-T6	using dry dressing
1.EQ.14.JA-W2	using collagen sponge
1.EQ.14.JA-XX-N	using synthetic dressing [e.g. Biobrane Silastic sheet, nylon]

1.EQ.26.^ ^ Brachytherapy, soft tissue of head and neck**S** 35

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 35	Optional	Implant Status	Status	P M	Permanent implant – Radioactive source left in place permanently
				T M	Temporary implant – Radioactive source removed after course of treatment is complete

- Includes:** Endocurietherapy, head and neck
Implantation of radioactive material, soft tissue of head and neck
Interstitial radiation therapy, soft tissue of head and neck

Excludes:	Ablation, radioactive iodine, thyroid gland (see 1.FU.59.^) Brachytherapy, nasal cavity or vestibule (see 1.ET.26.^) Brachytherapy, oral/buccal mucosa (see 1.FG.26.^) Brachytherapy, pharynx (see 1.FX.26.^) Brachytherapy, salivary glands (see 1.FP.26.^)
Code Also:	Any concomitant implantation of brachytherapy applicators or conduits [e.g. needles, catheters] to gain access to treatment site (see 1.EQ.53.^)
Note:	There are typically two distinct phases required to complete the process of brachytherapy. The first phase involves the insertion of non-radioactive applicators or conduits [e.g. hollow needles, catheters, stents, etc.] that receive or transmit the radioactive material into the body. The second phase involves the after-loading of the radioactive material [e.g. seeds, pellets, wires, etc.] into the applicator or conduit.
1.EQ.26.HA	using percutaneous [transcatheter or transneedle] approach
1.EQ.26.LA	using open approach

1.EQ.27.^ Radiation, soft tissue of head and neck

Includes:	Teletherapy, soft tissue of head and neck NEC Therapy, radiation [radiotherapy], soft tissue of head and neck NEC
Excludes:	Radiation therapy, oral/buccal mucosa (see 1.FG.27.^) Radiation therapy, pharynx (see 1.FX.27.^) Radiation therapy, salivary glands (see 1.FP.27.^) Radiation therapy, thyroid (see 1.FU.27.^)
Note:	Involves external beam irradiation of the soft tissues of head and/or neck, which may involve lymph nodes, with or without hyperfractionation.
1.EQ.27.JA	using external beam

1.EQ.35.^ Pharmacotherapy (local), soft tissue of head and neck

Includes:	Injection, soft tissue of head and neck Instillation, soft tissue of head and neck Irrigation, soft tissue of head and neck
Excludes:	Irrigation for skin wound of head and neck (see 1.YF.35.^) Irrigation for skin wound of scalp (see 1.YA.35.^) Systemic pharmacotherapy (see 1.ZZ.35.^) that for control of bleeding (see 1.EQ.13.^) that for removal of foreign body (see 1.EQ.56.^)

1.EQ.35.^ ^ Pharmacotherapy (local), soft tissue of head and neck	direct instillation (into wound)	percutaneous needle [injection]
using antiinfective irrigating solution	1.EQ.35.JA-D1 Includes: • chlorhexidine, neomycin	—
using salt irrigating solution	1.EQ.35.JA-D2 Includes: • sodium chloride	—
using other irrigating solution	1.EQ.35.JA-D3 Includes: • sorbitol, mannitol	—
using antiinflammatory	1.EQ.35.JA-N1 Includes: • NSAIDS (indomethacin, ibuprofen), diclofenac, aurothioglucose, D penicillamine	1.EQ.35.HA-N1 Includes: • NSAIDS (indomethacin, ibuprofen), diclofenac, aurothioglucose, D penicillamine
using anesthetic agent	—	1.EQ.35.HA-P1 Includes: • enflurane, thiopental, alfentanil, ketamine, propofolprocaine, lidocaine, bupivacaine, cocaine
using analgesic	1.EQ.35.JA-P2 Includes: • opioids (morphine, meperidine), acetylsalicylic acid, acetaminophen, ergotamine, sumatriptan	1.EQ.35.HA-P2 Includes: • opioids (morphine, meperidine), acetylsalicylic acid, acetaminophen, ergotamine, sumatriptan
using pharmacological agent NEC	1.EQ.35.JA-T9	1.EQ.35.HA-T9

1.EQ.52.^ ^ Drainage, soft tissue of head and neck**S 4**

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes:

- Aspiration [abscess, hematoma] soft tissue of head and neck
- Drainage [abscess, hematoma], face NOS
- Drainage [abscess, hematoma], head NOS
- Drainage [abscess, hematoma], neck NOS
- Drainage, wound, soft tissue of head and neck that with or without irrigation

Excludes: Aspiration biopsy (see [2.EQ.71.^^](#))
 Drainage [abscess, hematoma] subcutaneous, head (see [1.YF.52.^^](#))
 Drainage [abscess, hematoma], oral or buccal mucosa (see [1.FG.52.^^](#))
 Drainage [abscess, hematoma], retromolar trigone (see [1.FH.52.^^](#))
 Drainage [abscess, hematoma], sublingual space (see [1.FH.52.^^](#))
 Drainage [abscess, hematoma], submandibular space (see [1.FH.52.^^](#))

1.EQ.52.HA using percutaneous (needle) approach
 1.EQ.52.HA-TS using percutaneous (needle) approach with drainage tube left in situ
 1.EQ.52.LA using open (incisional) approach

1.EQ.53.^^ Implantation of internal device, soft tissue of head and neck

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Code Also: Any concomitant loading of brachytherapy applicator (see [1.EQ.26.^^](#))

1.EQ.53.HA-EM of brachytherapy applicator using percutaneous approach
 1.EQ.53.LA-EM of brachytherapy applicator using open approach

1.EQ.55.^^ Removal of device, soft tissue of head and neck

Includes: Removal of device, soft tissue [wound] of head and neck

Excludes: Removal of device from skin wound only (see [1.YF.55.^^](#))

1.EQ.55.JA-EB of radioactive implant using external approach
 1.EQ.55.JA-TS of wound drain using external approach
 1.EQ.55.LA-EB of radioactive implant using open approach

1.EQ.56.^^ Removal of foreign body, soft tissue of head and neck

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Extraction of (superficial, embedded) foreign body, soft tissue of head and neck
Note: May involve the use of pulsatile jet lavage or irrigation to facilitate complete removal of foreign body debris.

1.EQ.56.JA using external approach (for simple extraction)
 1.EQ.56.LA using open (incisional) approach

1.EQ.59.^A Destruction, soft tissue of head and neck

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Ablation, soft tissue (muscle, fascia or tendon) of head and neck
 Debridement, soft tissue (muscle, fascia or tendon) of head and neck
Excludes: Removal of non-viable (or necrotic) muscle flap used for facial repair (see [1.EP.87.^A](#))

1.EQ.59.LA using open approach

1.EQ.70.^A Incision NOS, soft tissue of head and neck

1.EQ.70.LA using open approach

1.EQ.87.^A Excision partial, soft tissue of head and neck

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Resection [neoplasm], soft tissue of head and neck
Excludes: Resection, subcutaneous but not extending beyond fascia (see [1.YF.87.^A](#))
Note: Involves the resection of diseased (or neoplastic) tissue arising in the muscle or fascia of head and neck.

1.EQ.87.LA using open approach without tissue (for closure of defect)
 1.EQ.87.LA-XX-A using autograft [e.g. muscle, fascia, skin]
 1.EQ.87.LA-XX-E using local flap [e.g. advancement skin flap, Z-plasty]
 1.EQ.87.LA-XX-F using free flap [e.g. free myocutaneous flap]
 1.EQ.87.LA-XX-G using pedicled flap [e.g. masseter, or temporalis muscle flap, forehead flap]
 1.EQ.87.LA-XX-N using synthetic material [e.g. Gore Tex]
 1.EQ.87.LA-XX-Q using combined sources of tissue [e.g. graft/flap]

1.EQ.94.^.^ Therapeutic intervention NEC, soft tissue of head and neck

1.EQ.94.HA	using percutaneous (needle) approach
1.EQ.94.LA	using open approach

1.ES.^.^ Therapeutic Interventions on the Nasal Cartilage

Includes:	Alar cartilage [lower lateral] Columella Nasal cartilage [upper, lateral] Nasal cartilage alone Septal cartilage
Excludes:	Nasal cartilage with bone (see 1.ET.^.^)

1.ES.37.^.^ Installation of external appliance, nasal cartilage

Includes:	Simple placement of snap-in septal button
Excludes:	Repair of nasal septum with synthetic tissue (see 1.ES.80.^.)

1.ES.37.JA-FB	of occlusive device using external approach
Includes:	Nasal septal button

1.ES.38.^.^ Management of external appliance, nasal cartilage

Includes:	Adjustment of appliance, nasal cartilage Removal of appliance, nasal cartilage
------------------	---

1.ES.38.JA-FB	of occlusive device using external approach
Includes:	Nasal septal button

1.ES.52.^.^ Drainage, nasal cartilage**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

1.ES.52.HA	using percutaneous [needle] approach
1.ES.52.LA	using open incisional technique

1.ES.58.^ ^ Procurement, nasal cartilage**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

1.ES.58.LA using open approach

1.ES.80.^ ^ Repair, nasal cartilage**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Correction, alar naris [e.g. cleft deformity or unequal size]

Reinforcement, nasal cartilage

Rhinoplasty, tip [alar]

Septoplasty NOS

Septoplasty, augmentation

Septoplasty, cleft

Submucous resection [SMR], septum with grafting

Excludes: Installation of nasal septal button alone (see [1.ES.37.^ ^](#))Repair [deviated] nasal cartilage by simple swing to midline (see [1.ES.87.^ ^](#))Repair of cartilage with other structures of nose (see [1.ET.80.^ ^](#))Septoplasty involving simple dissection with a swing to midline and without a graft (see [1.ES.87.^ ^](#))Septorhinoplasty (see [1.ET.80.^ ^](#))Submucous resection [SMR] of septum without grafting (see [1.ES.87.^ ^](#))**Code Also:** Any concomitant installation of nasal septal button (see [1.ES.37.^ ^](#))**Note:** Involves repositioning cartilage using cartilage grafts [e.g. septum strut grafts] and may involve resection of small portions of bone that articulate with the septum [e.g. ethmoid, vomer or maxillary crest] to improve alignment. May involve a turbinectomy or turbinate reduction. Do not code this separately.**Omit code:** When performed concomitantly with maxillary osteotomy (see [1.ED.80.^ ^](#)) or maxillary with mandibular osteotomy (see [1.EF.80.^ ^](#))

1.ES.80.LA-XX-A using autograft [e.g. cartilage, skin]
 1.ES.80.LA-XX-E using local flap [e.g. alar cartilage rotation or transposition flap]
 1.ES.80.LA-XX-G using pedicled flap
 1.ES.80.LA-XX-K using homograft [e.g. cartilage]
 1.ES.80.LA-XX-N using synthetic tissue [e.g. silastic sheath]
 1.ES.80.LA-XX-Q using combined sources of tissue [e.g. graft and synthetic tissue]

1.ES.87.^.^ Excision partial, nasal cartilage**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Excision (lesion) extending into nasal cartilage
Simple septoplasty involving the trim of septum with a swing to midline but without a graft

Excludes: Septorhinoplasty (see [1.ET.80.^.](#))
Shaving, septal cartilage (see [1.ES.80.^.](#))
Submucous resection of turbinates without septoplasty (see [1.ET.87.^.](#))

Note: May involve turbinectomy or turbinate reduction and/or insertion of synthetic sheeting or stent. Do not code this separately.

1.ES.87.LA	using open approach with simple apposition (suturing) for closure
Includes:	Submucous resection [SMR], septum
Note:	May involve resection of small portions of bones that articulate with the septum [e.g. ethmoid, vomer, maxillary crest].
1.ES.87.LA-XX-A	using open approach and autograft (e.g. skin or ear cartilage)
Excludes:	Submucous resection [SMR] of septum with grafting (see 1.ES.80.^.)
1.ES.87.LA-XX-E	using open approach and local flap (rotation, advancement or transposition)
1.ES.87.LA-XX-Q	using open approach and combined sources of tissue

1.ET.^.^ Therapeutic Interventions on the Nose

Includes: Nasal bones with cartilage
Nasal cavity
Nasal fossa, vestibule, meatus and mucosa
Nose NEC
Turbinate

Excludes: Cartilage of nose alone (see [1.ES.^.^](#))
Choanal atresia (see [1.FA.84.^.](#))
Naso-ethmoidal complex [bones] (see [1.EC.^.^](#))
Skin of nose alone (see [1.YD.^.^](#))

1.ET.03.^.^ Immobilization, nose

Includes: Application, of splint, nose

1.ET.03.JA-SR	of external splinting device
---------------	------------------------------

1.ET.13.^ ^ Control of bleeding, nose**L** 23 **E** 53

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 23	Optional	Anterior/posterior	Location	A N	Anterior
				M	Multi-site
				P S	Posterior
E 53	Mandatory	Mandatory Coils	Extent	0	Not applicable (no coil used)
				01	One coil
				02	Two coils
				03	Three coils
				04	Four coils
				05	Five coils
				06	Six coils
				07	Seven coils
				08	Eight coils
				09	Nine coils
				10	Ten coils
				G	More than ten coils (11 - 20)
				H	More than twenty coils
				U	Unspecified

Includes: Compression, nose
 Control epistaxis
 Nasal embolization [transarterial: ethmoidal, maxillary, or external carotid artery]

Excludes: Control of bleeding, skin of nose alone (see [1.YD.13.^^](#))
 Ligation of ethmoidal artery (see [1.JX.51.^^](#))
 Ligation of external carotid artery (see [1.JE.51.^^](#))
 Ligation of maxillary artery (see [1.JX.51.^^](#))
 Systemic pharmacotherapy for control of bleeding (see [1.ZZ.35.^^](#))

1.ET.13.CA-BC	using per orifice approach and [nasal] balloon
1.ET.13.CA-C2	using per orifice approach and topical antihemorrhagic agent
1.ET.13.CA-GX	using per orifice approach and device NEC (e.g. electrocautery)
1.ET.13.CA-HB	using per orifice approach and diathermy or thermal device
1.ET.13.CA-NP	using per orifice approach and packing
1.ET.13.CA-TS	using per orifice approach and leaving drainage tube in situ
1.ET.13.CA-Z9	using per orifice approach and agent NEC [e.g. silver nitrate]
1.ET.13.GQ-C2	using percutaneous [transarterial] approach with antihemorrhagic agent [e.g. Vasopressin, aminocaproic acid, aprotinin, phytonadione, thrombin, coagulation factor VIII]
1.ET.13.GQ-GE	using percutaneous [transarterial] approach and [detachable] coils
1.ET.13.GQ-W0	using percutaneous [transarterial] approach and other synthetic material [e.g. gelfoam, microspheres, polystyrene, polyvinyl alcohol, contour particles]
1.ET.13.JN	using external manual compression

1.ET.26.^^ Brachytherapy, nose

S 35

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 35	Optional	Implant Status	Status	P M	Permanent implant – Radioactive source left in place permanently
				T M	Temporary implant – Radioactive source removed after course of treatment is complete

Includes: Endocurietherapy, nose
 Implantation of radioactive material, nose
 Interstitial radiation therapy, nasal cavity
 Intracavitary radiation therapy, nasal vestibule

Excludes: Brachytherapy, skin of nose (see [1.YF.26.^^](#))

Code Also: Any concomitant implantation of brachytherapy applicators or conduits [e.g. needles, catheters] to gain access to treatment site (see [1.ET.53.^^](#))

Note: There are typically two distinct phases required to complete the process of brachytherapy. The first phase involves the insertion of non-radioactive applicators or conduits [e.g. hollow needles, catheters, stents, etc.] that receive or transmit the radioactive material into the body. The second phase involves the after loading of the radioactive material [e.g. seeds, pellets, wires, etc.] into the applicator or conduit.

1.ET.26.CA	using per orifice approach
1.ET.26.HA	using percutaneous (transcatheter or transneedle) approach
1.ET.26.LA	using open (incisional) approach

1.ET.35.^ ^ Pharmacotherapy (local), nose

- Includes:** Irrigation, nasal passage NOS
Irrigation, nose
- Excludes:** Lavage, paranasal sinuses (see [1.EY.35.^ ^](#))
that for removal of foreign body (see [1.ET.56.^ ^](#))
that with drainage (see [1.ET.52.^ ^](#))

1.ET.35.CA-D1	using per orifice approach and antiinfective irrigating solution
	Includes: chlorhexidine, neomycin
1.ET.35.CA-D2	using per orifice approach and salt irrigating solution
	Includes: sodium chloride
1.ET.35.CA-D3	using per orifice approach and other irrigating solution
	Includes: sorbitol, mannitol
1.ET.35.CA-P1	using per orifice approach and anesthetic agent
1.ET.35.CA-R1	using per orifice approach and nasal preparation NEC
	Includes: nasal decongestants, nasal cromoglycate sodium, nasal corticosteroids (budesonide, flunisolide)

1.ET.37.^ ^ Installation of external appliance, nose

- Includes:** Replace [change] external appliance, nose
that for internal or external immobilization
- Excludes:** Application of splint (for immobilization), nose (see [1.ET.03.^ ^](#))
Installation of nasal septal button (see [1.ES.37.^ ^](#))

1.ET.37.JA-PM	of prosthesis
1.ET.37.JA-QD	of prosthesis with retentive screws

1.ET.38.^ ^ Management of external appliance, nose

- Includes:** Adjusting appliance, nose
Removal appliance, nose
- Excludes:** Removal with concomitant replacement of prosthesis (see [1.ET.37.^ ^](#))

1.ET.38.JA-PM	of prosthesis
1.ET.38.JA-QD	of prosthesis with retentive screws
1.ET.38.JA-SR	of external splinting device

1.ET.52.^ ^ Drainage, nose

Includes: Clearance, nose
that with or without irrigation

Excludes: Drainage skin of nose (see [1.YD.52.^ ^](#))
Drainage, septum (for hematoma) (see [1.ES.52.^ ^](#))

1.ET.52.CA-TJ	using per orifice approach and suction
1.ET.52.CR	using per orifice approach and incision
1.ET.52.HA	using percutaneous (needle) aspiration

1.ET.53.^ ^ Implantation of internal device, nose**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Implantation, brachytherapy applicator, nasal cavity or vestibule

Code Also: Any concomitant loading of brachytherapy applicator (see [1.ET.26.^ ^](#))

1.ET.53.CA-EM	of brachytherapy applicator using per orifice approach
1.ET.53.HA-EM	of brachytherapy applicator using percutaneous approach
1.ET.53.LA-EM	of brachytherapy applicator using open approach

1.ET.55.^ ^ Removal of device, nose

Excludes: Removal of sutures from skin of nose (see [1.YF.55.^ ^](#))

1.ET.55.CA-FF	of closure device [e.g. suture, clip] using per orifice approach
1.ET.55.CA-NP	of packing using per orifice approach
1.ET.55.CA-TS	of drain [e.g. Penrose] using per orifice approach
1.ET.55.HA-EB	of radioactive implant using percutaneous approach
1.ET.55.JA-EB	of radioactive implant using external approach
1.ET.55.LA-EB	of radioactive implant using open approach
1.ET.55.LA-GX	of device NEC using open approach

1.ET.56.^ ^ Removal of foreign body, nose**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Extraction of (superficial, embedded) foreign body, nasal cavity

Note: May involve irrigation of the nasal cavity.

1.ET.56.CA	using per orifice approach
	Includes: Removal of intraluminal foreign body (e.g. marble, insect)
1.ET.56.JA	using external approach (for simple extraction)
	Includes: Removal of (infected) nose ring
1.ET.56.LA	using open (incisional) approach

1.ET.57.^ ^ Extraction, nose

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Excludes: that with destruction (see [1.ET.59.^ ^](#))

1.ET.57.CA	using per orifice approach
1.ET.57.LA	using open (excisional) technique

1.ET.59.^ ^ Destruction, nose

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Destruction [rhinolith] with extraction
Destruction, turbinate(s)
Osteoclasia, turbinate(s)

Excludes: Debulking [neoplasm], nasal cavity (see [1.ET.87.^ ^](#))
Destruction, skin of nose (see [1.YD.59.^ ^](#))

1.ET.59.^ ^ Destruction, nose	endoscopic per orifice approach	open approach
using cryoprobe	1.ET.59.BA-AD	1.ET.59.LA-AD
using device NEC	1.ET.59.BA-GX	1.ET.59.LA-GX
using laser	1.ET.59.BA-AG	1.ET.59.LA-AG

1.ET.72.^ Release, nose**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Decompression, (lateral wall of) nasal cavity
Destruction [adhesions], nasal cavity

1.ET.72.BA using endoscopic per orifice approach
1.ET.72.LA using open approach [e.g. intranasal, transnasal]

1.ET.73.^ Reduction, nose**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Manipulation, nose/septum (to reduce displacement or fracture)
Reduction, turbinates

Excludes: Reduction of turbinates with (septo)rhinoplasty (see [1.ET.80.^](#))
Reduction of turbinates with septoplasty (see [1.ES.80.^](#))
Reduction of turbinates with submucous resection (of turbinates) (see [1.ET.87.^](#))
Reduction of turbinates with submucous resection [SMR] of septum (see [1.ES.87.^](#))
that with prosthetic implant for cosmesis (see [1.ET.80.^](#))

Code Also: Any application of external immobilization (see [1.ET.37.^](#))

Note: Involves reduction of nasal structures into proper alignment to relieve deviation, functional airway obstruction or nasal fracture. May involve reducing turbinates as required.

1.ET.73.JA using manual [reduction] technique
1.ET.73.LA using open approach

1.ET.80.^ Repair, nose**S** 10

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 10	Optional	Tx Status 5	Status	A	Abandoned after onset
				R	Revision
				S	Staged

- Includes:** Nasoplasty
 Nasoseptal reconstruction
 Nasoseptorhinoplasty [NSR]
 Rhinoplasty
 Septorhinoplasty
 Septorhinoplasty with prosthetic implant
- Excludes:** Correction, alar naris [e.g. cleft deformity or unequal size] (see [1.ES.80.^](#))
 Installation of nasal septal button (see [1.ES.37.^](#))
 Rhinoplasty, tip (see [1.ES.80.^](#))
 Septoplasty (with or without turbinectomy) (see [1.ES.80.^](#))
 Suture, skin of nose (see [1.YD.80.^](#))
- Note:** May involve turbinate reduction or turbinectomy. Do not code this separately.

1.ET.80.^ Repair, nose	using columellar incision approach	using intranasal approach
repair without graft/implant	1.ET.80.WK Includes: • Septoplasty with concomitant removal of dorsal hump	1.ET.80.LA
with autograft	1.ET.80.WK-XX-A	1.ET.80.LA-XX-A
with homograft	1.ET.80.WK-XX-K	1.ET.80.LA-XX-K

1.ET.86.^ ^ Closure fistula, nose**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Closure, fistula, nasolabial
 Closure, fistula, nasopharynx
 Fistulectomy, nasal
 Repair, fistula, nasal

Excludes: Repair, fistula, oronasal (see maxillary sinus [1.EW.86.^ ^](#))
 Repair, fistula, oronasal (see [1.FB.86.^ ^](#))

1.ET.86.MM for fistula terminating in pharynx [e.g. nasopharyngeal]

1.ET.86.MN for fistula terminating in oral cavity [e.g. nasolabial]

1.ET.87.^ ^ Excision partial, nose**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Debulking [neoplasm], nasal cavity
 Dermoplasty, septal
 Polypectomy, middle meatus
 Polypectomy, nasal NOS
 Resection, nasal mucosa
 Submucous resection [SMR], turbinates
 Turbinectomy

- Excludes:** Debulking (neoplasm) of nasal cavity extending into nasopharynx (see [1.FA.87.^](#))
 Polypectomy invading ethmoidal sinus (see [1.EU.87.^](#))
 Polypectomy invading frontal sinus (see [1.EX.87.^](#))
 Polypectomy invading maxillary sinus (see [1.EW.87.^](#))
 Polypectomy invading multiple sinuses (requiring pansinusectomy) (see [1.EY.87.^](#))
 Polypectomy invading sphenoidal sinus (see [1.EV.87.^](#))
 Removal of anterior end of inferior turbinate for creation of antral window only (see [1.EW.52.^](#))
 Resection, skin (lesion) extending into nasal cartilage only (see [1.ES.87.^](#))
 Turbinectomy with nasoseptal reconstruction (see [1.ET.80.^](#))
 Turbinectomy with septoplasty (see [1.ES.80.^](#))
 Turbinectomy with septorhinoplasty (see [1.ET.80.^](#))
 Turbinectomy with submucous resection of septum (see [1.ES.87.^](#))
- Note:** May involve excision of diseased nasal mucosa [e.g. for telangiectasia] with replacement skin grafting
- Omit code:** Turbinectomy with other reparative intervention to nasal structure.

1.EV.87.BA	using endoscopic per orifice approach [i.e. (functional) endoscopic sinus surgery (FESS)]
1.EV.87.LA	using open approach

1.EW.^^.^^ Therapeutic Interventions on the Maxillary Sinus

- Includes:** Maxillary antrum

1.EW.52.^^ Drainage, maxillary sinus

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

- Includes:** Antrostomy, meatal [for drainage of maxillary sinus]
Antrostomy, permanent [for continuous drainage]
Aspiration, maxillary sinus
Enlargement, maxillary ostium
that with or without lavage
- Excludes:** Fenestration, maxillary sinus concomitant with sinusectomy (see [1.EW.91.^^](#))

1.EW.52.^^ Drainage, maxillary sinus	endoscopic per orifice approach	open (incisional) approach	percutaneous (needle) approach
leaving drainage tube in situ	1.EW.52.BA-TS	1.EW.52.LA-TS	—
no drainage tube left in situ	1.EW.52.BA	1.EW.52.LA	1.EW.52.HA Includes: • Lateral wall of nose or anterior wall of antrum

1.EW.80.^^ Repair, maxillary sinus

S 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Rebuilding, maxillary sinus (walls or floor)
 Reconstruction, maxillary sinus
 Removal, dental root, maxillary sinus

1.EW.80.^ ^ Repair, maxillary sinus	no fixative devices used for closure	using screw/plate
using combined sources of tissue (e.g. bone graft and paste)	1.EW.80.LA-XX-Q	1.EW.80.LA-NW-Q
using autograft	1.EW.80.LA-XX-A	1.EW.80.LA-NW-A
using homograft	1.EW.80.LA-XX-K	1.EW.80.LA-NW-K
using local flap	1.EW.80.LA-XX-E	—

1.EW.86.^ ^ Closure fistula, maxillary sinus

S 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Fistulectomy, oroantral
 Repair, fistula, oroantral

Excludes: Closure, fistula, oronasal (see [1.FB.86.^ ^](#))

1.EW.86.^ ^ Closure fistula, maxillary sinus	using open approach without membrane	using open approach with membrane [e.g. Bio-Guide]
apposition (or excision) for closure	1.EW.86.MN	1.EW.86.MN-MA
and autograft	1.EW.86.MN-XX-A	1.EW.86.MN-MA-A
and homograft	1.EW.86.MN-XX-K	1.EW.86.MN-MA-K
and local flap	1.EW.86.MN-XX-E	1.EW.86.MN-MA-E

1.EW.87.^ ^ Excision partial, maxillary sinus

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes:	Curettage, maxillary sinus Polypectomy, maxillary sinus Sinusectomy, maxillary
Excludes:	Antrectomy, radical, maxillary sinus [e.g. Caldwell- Luc] (see 1.EW.91.^^) Maxillary sinusectomy with other sinusectomy (see 1.EY.87.^^) Polypectomy, antrochoanal [originates at maxillary sinus but may extend as far as nasopharynx] (see 1.FA.87.^^)
1.EW.87.BA	using endoscopic per orifice approach [i.e. (functional) endoscopic sinus surgery (FESS)]
1.EW.87.LA	using open approach

1.EW.91.^^ Excision radical, maxillary sinus**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Antrectomy, radical maxillary [e.g. Caldwell Luc]
Excludes: that with radical maxillectomy (see [1.ED.91.^^](#))

1.EW.91.BA	using endoscopic per orifice approach
1.EW.91.LA	using open approach

1.EX.^^.^^ Therapeutic Interventions on the Frontal Sinus

Includes: Frontonasal duct

1.EX.52.^^ Drainage, frontal sinus**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Sinusotomy, frontal [for drainage]
that with or without irrigation
Excludes: Sinusotomy, frontal [for curettage of tissue] (see [1.EX.87.^^](#))

1.EX.52.^ Drainage, frontal sinus	endoscopic per orifice approach	open (incisional) approach [e.g. trephine]	open approach with synthetic tissue used [Silastic sheath] for closure of sinus defect
leaving drainage tube in situ	1.EX.52.BA-TS	1.EX.52.LA-TS	1.EX.52.LA-TS-N
no drainage tube left in situ	1.EX.52.BA	1.EX.52.LA	1.EX.52.LA-XX-N

1.EX.59.^ Destruction, frontal sinus**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Cranialization, frontal sinus [posterior wall]
 Obliteration, frontal sinus [posterior wall]

Note: May involve plugging the nasofrontal duct (using a muscle or other tissue graft) as part of destruction of frontal sinus.

1.EX.59.LA-XX-A using autograft [e.g. fat, muscle]
 1.EX.59.LA-XX-N using synthetic tissue [e.g. cement, Silastic sheath]
 1.EX.59.LA-XX-Q using combined sources of tissue [autograft with synthetic tissue]

1.EX.80.^ Repair, frontal sinus**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Reconstruction, frontal sinus [wall]
 Repair, frontal sinus [wall]
 Repair, frontonasal duct

Excludes: that with obliteration of frontal sinus (see [1.EX.59.^](#))

Code Also: Any concomitant duraplasty for CSF fistula leak (see [1.AB.86.^](#))

1.EX.80.^ Repair, frontal sinus	endoscopic per orifice approach	open approach
using autograft	—	1.EX.80.LA-XX-A
using fibrin glue	1.EX.80.BA-W3	1.EX.80.LA-W3
using synthetic tissue [e.g. Silastic sheath]	—	1.EX.80.LA-XX-N

1.EX.87.^.^ Excision partial, frontal sinus**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Polypectomy, frontal sinus
Sinusectomy, frontal sinus

1.EX.87.BA	using endoscopic per orifice approach [i.e. (functional) endoscopic sinus surgery (FESS)]
1.EX.87.LA	using open approach

1.EY.^.^.^ Therapeutic Interventions on the Paranasal Sinuses

Includes: Multiple nasal sinuses (2 or more of the following: ethmoidal, sphenoidal, maxillary, frontal)
Nasal sinus NOS
Pansinus(es)
Paranasal sinuses

1.EY.35.^.^ Pharmacotherapy, paranasal sinuses

Includes: Irrigation, ethmoid sinus
Irrigation, frontal sinus
Irrigation, maxillary sinus
Irrigation, paranasal sinuses
Irrigation, sphenoidal sinus
Lavage, sinus

Excludes: Irrigation, nasal passage (see [1.ET.35.^.^](#))

1.EY.35.^.^ Pharmacotherapy, paranasal sinuses	endoscopic per orifice approach	percutaneous aspiration technique	percutaneous transcatheter approach
using antiinfective irrigating solution	1.EY.35.BA-D1	1.EY.35.HB-D1	1.EY.35.HH-D1
using salt irrigating solution	1.EY.35.BA-D2	1.EY.35.HB-D2	1.EY.35.HH-D2
using other irrigating solution	1.EY.35.BA-D3	1.EY.35.HB-D3	1.EY.35.HH-D3

1.EY.50.^ ^ Dilation, paranasal sinuses**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

1.EY.50.BA-BD using endoscopic per orifice approach and balloon dilator
Includes: Balloon sinuplasty

1.EY.52.^ ^ Drainage, paranasal sinuses**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Pansinusotomy for aspiration or drainage
 Sinusotomy NOS for aspiration or drainage
 that with or without lavage

Excludes: Antrostomy (alone) for continuous drainage (see [1.EW.52.^ ^](#))

1.EY.52.^ ^ Drainage, paranasal sinuses	endoscopic per orifice approach	open (incisional) approach
leaving drainage tube in situ	1.EY.52.BA-TS	1.EY.52.LA-TS
no drainage tube left in situ	1.EY.52.BA	1.EY.52.LA

1.EY.87.^ ^ Excision partial, paranasal sinuses**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

- Includes:** Frontoethmoidectomy
Pansinusectomy
Polypectomy, multiple nasal sinuses
Sinusectomy NOS
Sphenoidectomy
- Excludes:** Polypectomy antrochoanal (extending from maxillary sinus into nasopharynx) (see [1.FA.87.^](#))
Polypectomy, nasopharyngeal [extending into pharynx] (see [1.FA.87.^](#))
- Note:** May involve skeletonization of posterior and recess aspects of the nasal sinuses to remove bony overgrowth up to their insertion in the skull base.

1.EY.87.BA	using endoscopic per orifice approach [i.e. (functional) endoscopic sinus surgery (FESS)]
1.EY.87.BA-AG	using laser and endoscopic per orifice approach
1.EY.87.LA	using open approach

1.EY.91.^ Excision radical, paranasal sinuses

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

- Includes:** Sinusectomy, radical
- Excludes:** that involving hard palate (see [1.FB.91.^](#))
that involving maxillectomy (see [1.ED.91.^](#))
that involving nasopharyngectomy (see [1.FA.91.^](#))

1.EY.91.BA	using endoscopic per orifice approach [i.e. (functional) endoscopic sinus surgery (FESS)]
1.EY.91.LA	using open approach

Therapeutic interventions on the Oral Cavity and Pharynx (1FA - 1FX)

1.FA.^.^ Therapeutic Interventions on the Nasopharynx

Excludes: Nasopharynx with oropharynx (see [1.FX.^.^](#))

1.FA.50.^.^ Dilation, nasopharynx

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: that for treatment of stricture
that with or without incision

1.FA.50.CA-BP using per orifice approach and dilator device
1.FA.50.CA-NR using per orifice approach and stent (left in situ)
1.FA.50.CR using per orifice approach and incision
1.FA.50.CR-BP using per orifice approach and incision with dilator device

1.FA.52.^.^ Drainage, nasopharynx

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Aspiration, nasopharynx (for drainage of cyst, hematoma)
Clearance, nasopharynx
that with or without irrigation

1.FA.52.CA-TJ using per orifice approach and suction
1.FA.52.CQ using per orifice approach and needle aspiration
1.FA.52.CR using per orifice approach and incision

1.FA.53.^.^ Implantation of internal device, nasopharynx

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Insertion, nasopharyngeal airway
Insertion, oropharyngeal airway

Excludes: Naso-tracheal intubation (see [1.GJ.53.^^](#))

1.FA.53.CA-NB of airway using per orifice approach [via nose or mouth]

1.FA.55.^^ Removal of device, nasopharynx

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Excludes: Removal of radiation implants (see [1.FX.55.^^](#))

1.FA.55.CA-FF of sutures using per orifice approach
1.FA.55.CA-NB of airway [nasopharyngeal] using per orifice approach
1.FA.55.CA-NP of packing using per orifice approach
1.FA.55.CA-NR of stent using per orifice (trans-nasal) approach

1.FA.56.^^ Removal of foreign body, nasopharynx

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Extraction of (superficial, embedded) foreign body, nasopharynx
Nasopharyngotomy for removal of foreign body

Note: May involve irrigation to facilitate complete removal of foreign body debris.

1.FA.56.CA using per orifice approach (for removal of intraluminal foreign object)
1.FA.56.JA using external approach (for simple extraction of embedded object)
1.FA.56.LA using open (incisional) approach

1.FA.84.^ ^ Construction or reconstruction, nasopharynx**S** 4 **L** 24

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 24	Optional	Laterality	Location	B	Bilateral
				S	Unilateral

Includes: Correction, atresia, choanal
Repair, atresia, choanal

Code Also: Any concomitant insertion of stent for continuous dilation of nasopharynx (see [1.FA.50.^ ^](#))

1.FA.84.^ ^ Construction or reconstruction, nasopharynx		endoscopic per orifice approach	open approach
nasal approach			
using device NEC	1.FA.84.BA	1.FA.84.QS Note: <ul style="list-style-type: none">• Closure may involve rhinoplasty or palatoplasty	
using laser	1.FA.84.BA-AG	1.FA.84.QS-AG Note: <ul style="list-style-type: none">• Closure may involve rhinoplasty or palatoplasty	
oral approach [e.g. transpalatine]			
using device NEC	—	1.FA.84.QT Note: <ul style="list-style-type: none">• Closure may involve rhinoplasty or palatoplasty	
using laser	—	1.FA.84.QT-AG Note: <ul style="list-style-type: none">• Closure may involve rhinoplasty or palatoplasty	

1.FA.87.^ ^ Excision partial, nasopharynx**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Polypectomy, antrochoanal (extending from maxillary sinus into nasopharynx)
Polypectomy, nasopharyngeal

Excludes: Polypectomy, nasal (see [1.ET.87.^^](#))

1.FA.87.BA using endoscopic per orifice and device NEC
1.FA.87.BA-AG using endoscopic per orifice and laser
1.FA.87.CA using per orifice approach

1.FA.91.^^ Excision radical, nasopharynx

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Naso pharyngectomy, radical
Naso pharyngectomy, trans oro palatal or trans palatine

Excludes: Naso-pharyngectomy extending to hypopharynx (see [1.FX.91.^^](#))
Naso-pharyngectomy requiring craniectomy (see [1.EA.92.^^](#))
Radical subtemporal naso-pharyngectomy (see [1.EA.92.^^](#))

Code Also: Any concomitant neck dissection (see [1.MC.^^.^^](#))

Note: Resection involves adjacent tissue such as: hard palate, sinuses, nasal mucosa, soft tissue of head (with or without cartilage of eustachian tube). Closure of the surgical defect usually requires a graft or flap.

1.FA.91.LA-XX-A using autograft [e.g. dermal or skin graft]
1.FA.91.LA-XX-E using local flap [e.g. mucosal advancement flap]
1.FA.91.LA-XX-F using free flap [e.g. latissimus dorsi or cutaneous free flap]
1.FA.91.LA-XX-G using pedicled flap [e.g. deltopectoral, forehead, temporalis or sternocleidomastoid flap]
1.FA.91.LA-XX-Q using combined sources of tissue [e.g. flaps and grafts]

1.FB.^^.^^ Therapeutic Interventions on the Hard Palate

Includes: Palate NOS
Palatine bone

1.FB.37.^^ Installation of external appliance, hard palate

Includes: Application, maxillary obturator, hard palate

Excludes: Fitting, maxillary obturator (see [7.SF.18.^^](#))

1.FB.37.JA-FJ of occlusive device [maxillary obturator] using external approach

1.FB.38.^ ^ Management of external appliance, hard palate

Includes: Adjusting appliance, hard palate
Removal appliance, hard palate

Excludes: Removal with replacement (see [1.FB.37.^ ^](#))

1.FB.38.JA-FJ of occlusive device [maxillary obturator] using external approach

1.FB.53.^ ^ Implantation of internal device, hard palate**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Implantation, anchor, hard palate [for maxillary obturator]
Implantation, prosthetic augmentation, hard palate

Excludes: Application (and fitting) of maxillary obturator (see [1.FB.37.^ ^](#))

1.FB.53.LA-EJ of anchor [e.g. retentive bar for maxillary obturator]

1.FB.53.LA-PM of prosthetic device [palatal augmentation]

1.FB.55.^ ^ Removal of device, hard palate**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

1.FB.55.LA-EJ of anchor [e.g. retentive bar] using open (incisional) approach

1.FB.55.LA-PM of (implanted) maxillary prosthesis using open approach

1.FB.80.^ ^ Repair, hard palate**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

- Includes:** Contouring, torus palatinus
Palatoplasty NOS
Palatoplasty, hard palate
Palatorrhaphy, hard palate
Reshaping, hard palate
- Excludes:** Repair, cleft, palate (see [1.FB.86.^^](#))
Uvulopalatoplasty (see [1.FQ.78.^^](#))

- 1.FB.80.LA-XX-E using local flap [e.g. levator veli palatini sling reconstruction; V Y advancement flap, vomer flap]
1.FB.80.LA-XX-G using pedicled flap [e.g. pharyngeal flap]

1.FB.86.^^ Closure of fistula, hard palate**S** 6

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 6	Optional	Tx Status 2	Status	A	Abandoned after onset
				R	Revision (return to same site to debride abscess, not planned)
				S	Staged (resection completed over 2 separate operative episodes)

- Includes:** Closure, cleft, hard palate
Closure, fistula, hard palate [oronasal]
Palatoplasty for cleft hard (with soft) palate
Pharyngoplasty for cleft palate
Repair, cleft, hard palate
Repair, fistula, oronasal
- Excludes:** Closure, cleft, maxillary alveolar ridge alone (see [1.EM.86.^^](#))
Palatoplasty for cleft of soft palate only (see [1.FC.86.^^](#))
Palatoplasty for velopharyngeal insufficiency (VPI) (see [1.FC.80.^^](#))

- 1.FB.86.LA-XX-E using local flap
Includes: Double opposing Z plasty (Furlow) lengthening palatoplasty
Intravelar veloplasty
V Y advancement palatoplasty
Vomer flap cleft palate repair
Excludes: Palatoplasty (Furlow) for velopharyngeal insufficiency (VPI) (see [1.FC.80.^^](#))
- 1.FB.86.LA-XX-G using pedicled flap [e.g. pharyngeal flap, buccinator myomucosal flap]
Excludes: Pharyngeal flap repair for velopharyngeal insufficiency (VPI) (see [1.FC.80.^^](#))
- 1.FB.86.LA-XX-Q using combined sources of tissue [e.g. graft and flap, combined local and pedicled flap]

1.FB.87.^.^ Excision partial, hard palate**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Excision partial, hard palate [bony exostosis]
Excision, palatinus tori (maxilla)

Excludes: Surgical contouring of torus palatinus (see [1.FB.80.^.](#))

1.FB.87.LA using open approach
1.FB.87.LA-AG using open approach and laser

1.FB.91.^.^ Excision radical, hard palate**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Excision radical, hard palate with maxillary alveolar ridge or nasal cavity

Excludes: that with nasopharyngectomy (see [1.FA.91.^.](#))
that with pharyngectomy (see [1.FX.91.^.](#))

Code Also: Any concomitant application of maxillary obturator (see [1.FB.37.^.](#))
Any concomitant implantation of anchor for maxillary obturator (see [1.FB.53.^.](#))

1.FB.91.LA using open approach without tissue (for closure of defect)
1.FB.91.LA-XX-A using autograft [e.g. full thickness skin graft] (for closure of defect)
1.FB.91.LA-XX-E using local flap [e.g. mucosal flap] (for closure of defect)

1.FC.^.^ Therapeutic Interventions on the Soft Palate**1.FC.35.^.^ Pharmacotherapy, soft palate**

1.FC.35.HA-T9 using percutaneous (needle) approach and pharmacological agent NEC

1.FC.52.^ ^ Drainage, soft palate**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: that with or without irrigation

1.FC.52.HA using percutaneous (needle) approach
 1.FC.52.LA using open (incisional) approach

1.FC.56.^ ^ Removal of foreign body, soft palate**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Extraction of (superficial, embedded) foreign body, soft palate

Note: May involve irrigation to facilitate complete removal of foreign body debris.

1.FC.56.JA using external approach (for simple extraction of embedded object)
 1.FC.56.LA using open (incisional) approach

1.FC.59.^ ^ Destruction, soft palate**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Ablation, soft palate

1.FC.59.JA-AD using external approach and cryoprobe
 1.FC.59.JA-AG using external approach and laser
 1.FC.59.JA-GX using external approach and device NEC
 1.FC.59.JA-X7 using external approach and chemical cautery agent

1.FC.80.^ ^ Repair, soft palate**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Palatopharyngoplasty for velopharyngeal insufficiency (VPI)
 Palatoplasty for velopharyngeal insufficiency (VPI)
 Palatorrhaphy, soft palate
 Veloplasty for velopharyngeal insufficiency (VPI)

Excludes: Palatoplasty NOS (see [1.FB.80.^ ^](#))
 that for cleft hard (with soft) palate NOS (see [1.FB.86.^ ^](#))
 that for cleft soft palate (see [1.FC.86.^ ^](#))
 that with secondary oronasal fistula closure (see [1.FB.86.^ ^](#))
 Uvulopalatoplasty (see [1.FQ.80.^ ^](#))

1.FC.80.LA using apposition technique [e.g. suturing]

1.FC.80.LA-XX-B using split thickness skin graft

1.FC.80.LA-XX-E using local flap

Includes: Double opposing Z plasty (Furlow)
 Intravelar veloplasty
 Levator sling transposition
 Submucosal flap
 V-Y plasty

1.FC.80.LA-XX-G using pedicled flap [e.g. pharyngeal flap, buccinator myomucosal flap]

1.FC.80.LA-XX-Q using combined sources of tissue [e.g. graft and flap, combined local and pedicled flap]

1.FC.86.^ ^ Closure of fistula, soft palate**S** 6

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 6	Optional	Tx Status 2	Status	A	Abandoned after onset
				R	Revision (return to same site to debride abscess, not planned)
				S	Staged (resection completed over 2 separate operative episodes)

- Includes:** Palatoplasty for cleft of soft palate only
- Excludes:** Palatoplasty for cleft involving both soft and hard palate (see [1.FB.86.^^](#))
Palatoplasty for velopharyngeal insufficiency (VPI) (see [1.FC.80.^^](#))

1.FC.86.LA-XX-E	using local flap
	Includes: Double opposing Z plasty (Furlow) Intravelar veloplasty
1.FC.86.LA-XX-G	using pedicled flap [e.g. pharyngeal flap, buccinator myomucosal flap]
1.FC.86.LA-XX-Q	using combined sources of tissue [e.g. graft and flap, combined local and pedicled flap]

1.FC.87.^^ Excision partial, soft palate**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

- Excludes:** that with concomitant resection of pharynx (see [1.FX.91.^^](#))
that with concomitant resection of tongue and pharynx (see [1.FJ.91.^^](#))

1.FC.87.^^ Excision partial, soft palate	open approach	open approach with laser
closure (of defect) by apposition technique [e.g. suturing]	1.FC.87.LA	1.FC.87.LA-AG
closure by full thickness autograft [skin]	1.FC.87.LA-XX-A	1.FC.87.LA-AG-A
closure by local flap [e.g. mucosal flap]	1.FC.87.LA-XX-E	1.FC.87.LA-AG-E
closure by split thickness skin graft	1.FC.87.LA-XX-B	1.FC.87.LA-AG-B

1.FD.^^.^^ Therapeutic Interventions on the Gingiva

- Includes:** Gums
Oral Vestibule
Periodontal pocket

1.FD.12.^^ Therapy, gingiva

- Includes:** Massage, gingiva [e.g. for tissue conditioning]
- | | |
|------------|---------------------------------------|
| 1.FD.12.JJ | using manual technique [e.g. massage] |
|------------|---------------------------------------|

1.FD.13.^ ^ Control of bleeding, gingiva

- Includes:** Control, bleeding, dental
Control, bleeding, gums
- Excludes:** Systemic pharmacotherapy for control of bleeding (see [1.ZZ.35.^ ^](#))

-
- | | |
|---------------|--|
| 1.FD.13.JA-C2 | using topical application of antihemorrhagic agent |
| | Includes: aminocaproic acid, aprotinin, phytonadione, thrombin, coagulation factor VIII |
| 1.FD.13.JA-GX | using external approach and device NEC (e.g. electrocautery) |
| 1.FD.13.JN | using external manual compression |
-

1.FD.14.^ ^ Dressing, gingiva

- Includes:** Replacement [change] of dressing, gingiva
- Excludes:** Application of gingival tooth splint (see [1.FE.74.^ ^](#))

-
- | | |
|---------------|--|
| 1.FD.14.JA-FJ | using occlusive dressing [e.g. hydrocolloid, paraffin] |
| 1.FD.14.JA-H1 | using medicated dressing |
| 1.FD.14.JA-T6 | using dressing NEC [e.g. displacement] |
-

1.FD.35.^ ^ Pharmacotherapy (local), gingiva

- Includes:** Application of agent, gingiva
Injection, gingiva
Instillation, gingival wound
Irrigation, gingiva
Periodontal irrigation, subgingival
- Excludes:** Irrigation with drainage (see [1.FD.52.^ ^](#))
Systemic pharmacotherapy (see [1.ZZ.35.^ ^](#))
that for control of bleeding (see [1.FD.13.^ ^](#))

1.FD.35.^ ^ Pharmacotherapy (local), gingiva	external approach	percutaneous (needle) approach
using antiinfective irrigating solution	1.FD.35.JA-D1 Includes: • chlorhexidine, neomycin	—
using salt irrigating solution	1.FD.35.JA-D2 Includes: • sodium chloride	—
using other irrigating solution	1.FD.35.JA-D3 Includes: • sorbitol, mannitol	—
using antiinfective NEC	1.FD.35.JA-K0	1.FD.35.HA-K0
using antiinflammatory	1.FD.35.JA-N1 Includes: • NSAIDS (indomethacin, ibuprofen), diclofenac aurothioglucose, D penicillamine	1.FD.35.HA-N1 Includes: • NSAIDS (indomethacin, ibuprofen), diclofenac, aurothioglucose, D penicillamine
using analgesic	1.FD.35.JA-P2 Includes: • opioids (morphine, meperidine), acetylsalicylic acid, acetaminophen, ergotamine, sumatriptan	1.FD.35.HA-P2 Includes: • opioids (morphine, meperidine), acetylsalicylic acid, acetaminophen, ergotamine, sumatriptan
using pharmacological agent NEC	1.FD.35.JA-T9	1.FD.35.HA-T9
using agent NEC	1.FD.35.JA-Z9	1.FD.35.HA-Z9
using local anesthetic agent [e.g. spray or topical application]	1.FD.35.JA-P1	1.FD.35.HA-P1

1.FD.52.^ ^ Drainage, gingiva**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Drainage with curettage [abscess], gingiva
 Drainage with lancing or scaling [abscess], gingiva

1.FD.52.LA using open (incisional) approach

1.FD.53.^ ^ Implantation of internal device, gingiva**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Implantation, framework (subperiosteal intra oral)
 Implantation, tissue expander, gingiva

1.FD.53.LA-KE of subperiosteal intra-oral framework
 1.FD.53.LA-KE-N of subperiosteal intra-oral framework with synthetic tissue [e.g. hydroxyapatite, cement]
 1.FD.53.LA-TP of tissue expander

1.FD.55.^ ^ Removal of device, gingiva**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

1.FD.55.JA-FF of sutures
 1.FD.55.LA-KE of subperiosteal intra-oral framework
 1.FD.55.LA-KE-N of cemented subperiosteal intra-oral framework
 1.FD.55.LA-MA of membrane [e.g. Guidor]
 1.FD.55.LA-TP of tissue expander

1.FD.56.^ ^ Removal of foreign body, gingiva**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Extraction of (superficial, embedded) foreign body (e.g. dental instrument tip), gingiva

Note: May involve the use of pulsatile jet lavage or irrigation to facilitate complete removal of foreign body debris.

1.FD.56.JA using external approach (for simple extraction)
 1.FD.56.LA using open (incisional) approach
 1.FD.56.LA-LZ using open (incisional) approach and magnetic device (e.g. perioretriever)

1.FD.59.^ ^ Destruction, gingiva**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Ablation, gingiva

1.FD.59.JA-AG using external approach and laser
 1.FD.59.JA-GX using external approach and device NEC
 1.FD.59.JA-X7 using external approach and chemical cautery agent [e.g. citric acid]

1.FD.80.^ ^ Repair, gingiva**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Deepening, sulcus
 Extension, gingival ridge
 Gingivectomy, internal bevel
 Gingivoplasty
 Gingivoplasty (to prevent epithelial migration or eliminate furcation)
 Recontouring, gingiva (e.g. that for crown lengthening)
 Vestibuloplasty (e.g. that for extension or deepening)

Excludes: Control of bleeding, gingiva (see [1.FD.13.^ ^](#))
 Guided tissue regeneration (see [1.EM.80.^ ^](#) or [1.EN.80.^ ^](#))
 that involving mandibular alveolar bone augmentation (see [1.EN.80.^ ^](#))
 that involving maxillary alveolar bone augmentation (see [1.EM.80.^ ^](#))

1.FD.80.LA using apposition technique (e.g. suture)
 1.FD.80.LA-XX-A using autograft [e.g. mucosa or full thickness skin graft]
 1.FD.80.LA-XX-B using split thickness skin graft
 1.FD.80.LA-XX-E using local flap [e.g. buccal mucosa flap]
 1.FD.80.LA-XX-Q using combined sources of tissue [e.g. flap and graft]

1.FD.87.^.^ Excision partial, gingiva**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Debridement, gingiva
Excision, [vestibular hyperplasia] gingiva
Excision, periodontal pocket [walls, lining]
Fistulectomy, gingival
Gingivectomy
Sculpting, gum

Excludes: Gingival curettage/ root planing (see [1.FF.59.^.](#))
Gingivectomy, internal bevel (see [1.FD.80.^.](#))

Code Also: Any concomitant gingival curettage/ root planing (see [1.FF.59.^.](#))

1.FD.87.LA using apposition technique [e.g. suturing] (for closure of defect)
1.FD.87.LA-XX-B using split thickness skin graft (for closure of defect)
1.FD.87.LA-XX-E using local flap [e.g. mucosal flap, VY plasty] (for closure of defect)

1.FE.^.^ Therapeutic Interventions on the Tooth

Excludes: Root of tooth alone (see [1.FF.^.^](#))

1.FE.29.^.^ Restoration, tooth**S** 4 **L** 26 **E** 9

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 26	Optional	Teeth location	Location	M D	Multiple quadrants, deciduous [primary] teeth
				M M	Multiple quadrants, mixed dentition
				M T	Multiple quadrants, permanent teeth
				S D	Single quadrant, deciduous [primary] teeth
				S M	Single quadrant, mixed dentition
				S T	Single quadrant, permanent teeth

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 9	Optional	Surfaces	Extent	1	One surface
				2	Two surfaces [same tooth]
				3	Three surfaces [same tooth]
				4	Four surfaces [same tooth]
				5	Five surfaces [same tooth]

Includes: Excision (carious lesion) with restoration, tooth
 Repair (pit and fissure), tooth
 Repair, (pit and fissure), dental
 Restoration, dental (filling, crown)

Excludes: Bleaching, tooth (see [1.FE.35.^^](#))
 Implantation, alveolar ridge, endosseous device (see [1.EM.53.^^](#))
 Temporary filling (or dressing) for emergency treatment of dental caries (see [1.FE.87.^^](#))

Code Also: Implantation of pin into tooth (see [1.FE.53.^^](#))
 Implantation, post into root of tooth (see [1.FF.53.^^](#))

1.FE.29.JA-RO using crown
 1.FE.29.JA-RX using filling NEC

1.FE.35.^^ Pharmacotherapy (local), tooth

Includes: Application of agent, tooth
 Chemical control, plaque
 Treatment, fluoride

Excludes: Control, plaque NOS (see [1.FE.94.^^](#))
 Systemic pharmacotherapy (see [1.ZZ.35.^^](#))

1.FE.35.JA-A1 using fluoride agent
 1.FE.35.JA-SB using sealant
 1.FE.35.JA-X1 using bleaching agent
 1.FE.35.JA-Z9 using agent NEC

1.FE.37.^ ^ Installation of external appliance, tooth**L** 25 **E** 6

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 25	Optional	Upper/lower	Location	C B	Combined upper and lower
				L W	Lower (mandibular)
				U P	Upper (maxillary)
E 6	Optional	Partial/total	Extent	P	Partial
				T	Total

Includes: Application/ installation, pontics
Application/ installation, prosthodontics
Replacement of appliances

Excludes: Application, splint (gingival) (see [1.FE.74.^ ^](#))
Application/ installation, retentive pin (see [1.FE.53.^ ^](#))

1.FE.37.JA-EQ of braces
1.FE.37.JA-GX of device NEC
1.FE.37.JA-KE of prosthetic dental framework with attachment to retentive device [e.g. bone-anchored]
1.FE.37.JA-PM of denture [e.g. overdenture]
1.FE.37.JA-QD of denture with attachment to retentive device [e.g. bone-anchored]
1.FE.37.JA-QG of bridge
Includes: Abutment, retainer and pontic
1.FE.37.JA-SL of dental space maintainer
1.FE.37.JA-SN of dental space retainer

1.FE.38.^ ^ Management of external appliance, tooth

Includes: Adjusting appliance, tooth [teeth]
Removal of appliance, tooth [teeth]

Excludes: Fitting of appliance, teeth (see [7.SF.18.^ ^](#))
Removal with replacement (see [1.FE.37.^ ^](#))
Skills training for use of appliance (see [6.VA.50.^ ^](#))

1.FE.38.JA-EQ of braces
1.FE.38.JA-GX of device NEC
1.FE.38.JA-KE of prosthetic dental framework (with attachment to retentive device (bone-anchored))
1.FE.38.JA-PM of denture [e.g. overdenture]
1.FE.38.JA-QD of denture with attachment to retentive device (bone-anchored)
1.FE.38.JA-QG of bridge [e.g. abutment, retainer and pontic]
1.FE.38.JA-SL of dental space maintainer
1.FE.38.JA-SN of dental space retainer

1.FE.53.^ Implantation of internal device, tooth**S** 4 **E** 10

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
E 10	Optional	Posts	Extent	1	One post
				2	Two posts [same tooth]
				3	Three posts [same tooth]

Includes: Implantation, retentive pin, tooth
that for retention of crowns and inlay and onlay restorations

Excludes: Implantation, retentive post, root of tooth (see [1.FF.53.^](#))

Code Also: Any concomitant restoration, tooth (see [1.FE.29.^](#))

1.FE.53.JA-RV of retentive device [e.g. pin]

1.FE.55.^ Removal of device, tooth

1.FE.55.JA-RV of retentive device [e.g. pin]

1.FE.57.^ Extraction, tooth**S** 4 **L** 26 **E** 8

E 11	Optional	Root canals	Extent	1	One root (canal)
				2	Two root (canals)
				3	Three root (canals)
				4	Four (or more) root (canals)

Includes: Extirpation [pulp], with instrumentation, root of tooth
Instrumentation, root canal
Obliteration, root canal
Planing, root of tooth
Pulpectomy with root canal instrumentation, tooth
Scaling, root of tooth
Scaling, sub gingival [deep]

Excludes: Destruction, dental nerve (not involving instrumentation) (see [1.BB.59.^](#))
Scaling, supra-gingival (see [1.FE.94.^](#))

Code Also: Any permanent restoration of tooth (see [1.FE.29.^](#))

1.FF.59.LA using open approach
Includes: Planing and scaling outside root of tooth
1.FF.59.WK using special incisional technique
Includes: Instrumentation inside root of tooth

1.FF.80.^ Repair, root of tooth**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

- Includes:** Apexification
Apexogenesis [induction of hard tissue repair]
Closure, fistula, endodontic
Enlargement, root canal [or pulp chamber]
Repair, [pulp chamber] tooth
Repair, fistula, endodontic
that for calcification, perforation or resorption defect
- Excludes:** Enlargement with implantation, post, root canal (see [1.FF.53.^^](#))
- Code Also:** Any associated instrumentation of root canal (see [1.FF.59.^^](#))

1.FF.80.LA-RG using retrograde filling [e.g. varnish and amalgam]
1.FF.80.LA-XX-N using apexogenetic material [e.g. hydroxyapatite]

1.FF.87.^^ Excision partial, root of tooth**S** 4 **E** 12

				2	Two roots
				3	Three roots
				4	Four (or more) roots

- Includes:** Apicoectomy
Curettage, apical
- Code Also:** Any concomitant root canal instrumentation (see [1.FF.59.^^](#))

1.FF.87.LA using open excisional approach (to root)
1.FF.87.LA-RG with retrograde filling [e.g. varnish and amalgam]

1.FF.89.^^ Excision total, root of tooth**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

- Includes:** Amputation, root of tooth
Removal [remainder, residual], root of tooth

1.FF.89.LA using open excisional approach (to root)

1.FG.^^.^^ Therapeutic Interventions on the Oral and Buccal Mucosa

Includes: Buccal mucosa [fat pad, glands]
 Buccal sulcus
 Labial frenulum
 Labial sulcus
 Oral mucosa NEC
 Oral papilla

Excludes: Oral mucosa of floor of mouth (see [1.FH.^^.^^](#))

1.FG.13.^^ Control of bleeding, oral and buccal mucosa

Excludes: Systemic pharmacotherapy for control of bleeding (see [1.ZZ.35.^^](#))

1.FG.13.HA-C2	using needle injection of antihemorrhagic agent Includes: aminocaproic acid, aprotinin, phytonadione, thrombin, coagulation factor VIII
1.FG.13.JA-C2	using topical application of antihemorrhagic agent
1.FG.13.JN	using direct compression

1.FG.26.^^ Brachytherapy, oral and buccal mucosa**S 35**

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 35	Optional	Implant Status	Status	P M	Permanent implant – Radioactive source left in place permanently
				T M	Temporary implant – Radioactive source removed after course of treatment is complete

Includes: Endocurietherapy, oral and buccal mucosa
 Implantation of radioactive material, oral and buccal mucosa
 Interstitial radiation therapy, oral and buccal mucosa

Excludes: Brachytherapy, pharynx (see [1.FX.26.^^](#))
 Brachytherapy, salivary glands (see [1.FP.26.^^](#))
 Brachytherapy, soft tissue of head and neck (see [1.EQ.26.^^](#))

Code Also: Any concomitant implantation of brachytherapy applicators or conduits [e.g. needles, catheters] to gain access to treatment site (see [1.FG.53.^^](#))

Note: There are typically two distinct phases required to complete the process of brachytherapy. The first phase involves the insertion of non-radioactive applicators or conduits [e.g. hollow needles, catheters, stents, etc.] that receive or transmit the radioactive material into the body. The second phase involves the after loading of the radioactive material [e.g. seeds, pellets, wires, etc.] into the applicator or conduit.

1.FG.26.HA	using percutaneous (transcatheter or transneedle) approach
1.FG.26.LA	using open (incisional) approach

1.FG.27.^ ^ Radiation, oral and buccal mucosa

- Includes:** Teletherapy, oral and buccal mucosa
Therapy, radiation [radiotherapy], oral and buccal mucosa
- Excludes:** Radiation therapy, pharynx (see [1.FX.27.^ ^](#))
Radiation therapy, salivary glands (see [1.FP.27.^ ^](#))
- Note:** Involves external beam irradiation of the oral and/ or buccal mucosa with or without hyperfractionation.

1.FG.27.JA using external beam

1.FG.35.^ ^ Pharmacotherapy (local), oral and buccal mucosa

- Includes:** Application of agent, oral and buccal mucosa
Irrigation, oral and buccal mucosa
Oral hygiene NOS
- Excludes:** Irrigation with drainage (see [1.FG.52.^ ^](#))
Systemic pharmacotherapy (see [1.ZZ.35.^ ^](#))
that for control of bleeding (see [1.FG.13.^ ^](#))

1.FG.35.HA-P1 using percutaneous needle approach and local anesthetic agent
1.FG.35.JA-D1 using topical approach and antiinfective irrigating solution
Includes: chlorhexidine, neomycin
1.FG.35.JA-D2 using topical approach and salt irrigating solution
Includes: sodium chloride
1.FG.35.JA-D3 using topical approach and other irrigating solution
Includes: sorbitol, mannitol
1.FG.35.JA-K0 using topical approach and antiinfective agent NEC
1.FG.35.JA-P1 using topical approach and local anesthetic agent
1.FG.35.JA-P2 using topical application of analgesic agent
Includes: acetylsalicylic acid
1.FG.35.JA-T9 using topical application of pharmacological agent NEC
1.FG.35.JA-Z9 using topical application of agent NEC

1.FG.52.^ ^ Drainage, oral and buccal mucosa**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: that with or without irrigation

1.FG.52.HA using percutaneous [needle] approach
1.FG.52.LA using open [incisional] approach

1.FG.53.^.^ Implantation of internal device, oral and buccal mucosa

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Code Also: Any concomitant loading of brachytherapy applicator (see [1.FG.26.^.](#))

1.FG.53.HA-EM of brachytherapy applicator using percutaneous approach
1.FG.53.LA-EM of brachytherapy applicator using open approach

1.FG.55.^.^ Removal of device, oral and buccal mucosa

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Removal of device, oral and buccal mucosa

1.FG.55.JA-EB of radioactive implant using external approach
1.FG.55.JA-FF of sutures using external approach
1.FG.55.JA-TS of wound drain using external approach
1.FG.55.LA-EB of radioactive implant using open approach

1.FG.56.^.^ Removal of foreign body, oral and buccal mucosa

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Extraction of (superficial, embedded) foreign body, oral and buccal mucosa

1.FG.56.JA using external approach (for simple extraction)
Includes: Extraction of (infected) buccosal (mouth) stud
1.FG.56.LA using open (incisional) approach

1.FG.58.^ ^ Procurement, oral and buccal mucosa**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

1.FG.58.LA of graft
1.FG.58.WJ of free flap

1.FG.59.^ ^ Destruction, oral and buccal mucosa**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Ablation, oral mucosa

1.FG.59.JA-AD using external approach and cryoprobe
1.FG.59.JA-AG using external approach and laser
1.FG.59.JA-GX using external approach and device NEC
1.FG.59.JA-X7 using external approach and chemical cautery

1.FG.72.^ ^ Release, oral and buccal mucosa**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Frenectomy, labial
Frenotomy, labial
Frenulectomy
Frenumectomy, labial

1.FG.72.LA using incisional technique

1.FG.80.^.^ Repair, oral and buccal mucosa**S** 28

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 28	Optional	Treatment Status 3A	Status	D	Delayed (closure occurs > 24 hrs post trauma)
				R	Revision
				S	Staged

Includes: Stomatoplasty NEC
Stomatorrhaphy NEC

Excludes: that of floor of mouth (see [1.FH.80.^.^](#))

1.FG.80.LA using apposition technique (e.g. suturing for tissue regeneration)
 1.FG.80.LA-XX-A using autograft [e.g. full thickness skin graft]
 1.FG.80.LA-XX-B using split-thickness skin graft
 1.FG.80.LA-XX-E using local flap [e.g. mucosal advancement flap]

1.FG.87.^.^ Excision partial, oral and buccal mucosa**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Debridement, oral mucosa
Resection, oral and buccal mucosa

Excludes: that with concomitant resection of mandibular alveolar ridge (see [1.EN.91.^.^](#))

1.FG.87.LA-AG using open (excisional) approach and laser
 1.FG.87.LA-GX using open (excisional) approach and device NEC

1.FH.^.^.^ Therapeutic Interventions on the Floor of Mouth

Includes: Retromolar trigone
Sublingual space
Submandibular space

Note: Please use location qualifier to identify

1.FH.52.^ ^ Drainage, floor of mouth**S** ⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Drainage [hematoma, abscess], sublingual space
 Drainage [hematoma, abscess], submandibular space

1.FH.52.HA using percutaneous (needle) approach
 1.FH.52.LA using open (incisional) technique

1.FH.56.^ ^ Removal of foreign body, floor of mouth**S** ⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Extraction of (superficial, embedded) foreign body, floor of mouth

Note: May involve pulsatile jet lavage or irrigation to facilitate complete removal of foreign body debris.

1.FH.56.JA using external approach (for simple extraction)
 1.FH.56.LA using open (incisional) approach

1.FH.59.^ ^ Destruction, floor of mouth**S** ⁴ **L** ²⁷

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 27	Optional	Floor of mouth	Location	A N	Anterior
				L T	Lateral
				R T	Retromolar

Includes: Ablation, floor of mouth

1.FH.59.JA-AD using cryoprobe
 1.FH.59.JA-AG using laser
 1.FH.59.JA-GX using device NEC
 1.FH.59.JA-X7 using chemical cautery agent

1.FH.78.^.^ Repair by decreasing size, floor of mouth**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Lowering, floor of mouth (lateral)

1.FH.78.LA using open approach

1.FH.80.^.^ Repair, floor of mouth**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Stomatoplasty, floor of mouth
Stomatorrhaphy, floor of mouth

1.FH.80.LA using apposition technique [e.g. suturing] (for tissue regeneration)
 1.FH.80.LA-XX-A using full-thickness autograft [e.g. dermal graft]
 1.FH.80.LA-XX-B using split-thickness skin graft
 1.FH.80.LA-XX-E using local flap [e.g. mucosal advancement flap]

1.FH.87.^.^ Excision partial, floor of mouth**S** 4 **L** 27

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 27	Optional	Floor of mouth	Location	A N	Anterior
				L T	Lateral
				R T	Retromolar

Includes: Debridement, floor of mouth
Resection, floor of mouth

1.FH.87.^.^ Excision partial, floor of mouth	open (excisional) approach	open (excisional) approach with laser
using apposition technique [e.g. suturing]	1.FH.87.LA	1.FH.87.LA-AG
using autograft [e.g. dermal graft, skin graft]	1.FH.87.LA-XX-A	1.FH.87.LA-AG-A

using split thickness skin graft	1.FH.87.LA-XX-B	1.FH.87.LA-AG-B

1.FJ.^.^ Therapeutic Interventions on the Tongue

Includes: Lingual frenulum
Lingual sulcus
Muscles of tongue [intrinsic and extrinsic]: genioglossus styloglossus, hyoglossus
Sublingual tonsil [lymph follicles on posterior third of tongue]

1.FJ.13.^.^ Control of bleeding, tongue

1.FJ.13.JA-C2 using topical application of antihemorrhagic agent
Includes: that using aminocaproic acid, aprotinin, phytonadione, thrombin, coagulation factor VIII
1.FJ.13.JA-GX using device NEC [e.g. electrocautery]
1.FJ.13.JN using direct compression

1.FJ.26.^.^ Brachytherapy, tongue

S 35

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 35	Optional	Implant Status	Status	P M	Permanent implant – Radioactive source left in place permanently
				T M	Temporary implant – Radioactive source removed after course of treatment is complete

Includes:	Endocurietherapy, tongue Implantation of radioactive material, tongue Interstitial radiation therapy, tongue
Code Also:	Any concomitant implantation of brachytherapy applicators or conduits [e.g. needles, catheters] to gain access to treatment site (see 1.FJ.53.^^)
Note:	There are typically two distinct phases required to complete the process of brachytherapy. The first phase involves the insertion of non-radioactive applicators or conduits [e.g. hollow needles, catheters, stents, etc.] that receive or transmit the radioactive material into the body. The second phase involves the after loading of the radioactive material [e.g. seeds, pellets, wires, etc.] into the applicator or conduit.
1.FJ.26.HA	using percutaneous (transcatheter or transneedle) approach
1.FJ.26.LA	using open (incisional) approach

1.FJ.27.^^ Radiation, tongue

Includes: Teletherapy, tongue
Therapy, radiation [radiotherapy], tongue

1.FJ.27.JA using external beam

1.FJ.52.^^ Drainage, tongue**S**⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

1.FJ.52.LA using open (incisional) approach

1.FJ.53.^^ Implantation of internal device, tongue**S**⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Glossoplasty with implant

Code Also: Any concomitant loading of brachytherapy applicator (see [1.FJ.26.^^](#))

1.FJ.53.HA-EM of brachytherapy applicator using percutaneous approach
 1.FJ.53.LA-EM of brachytherapy applicator using open approach
 1.FJ.53.LA-PM of prosthetic [implant] device [e.g. for sleep apnea] using open approach

1.FJ.55.^.^ Removal of device, tongue**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Removal, radioactive implant, tongue

1.FJ.55.JA-EB	of radioactive implant using external approach
1.FJ.55.JA-FF	of closure device [e.g. sutures] using external approach
1.FJ.55.LA-EB	of radioactive implant using open approach
1.FJ.55.LA-PM	of prosthetic [implant] device using open approach

1.FJ.56.^.^ Removal of foreign body, tongue**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Ligation, Stensen's duct

1.FM.51.LA using open approach

Includes: that done by electrocautery or suturing

1.FM.52.^ ^ Drainage, parotid gland**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: that with or without irrigation

Excludes: that with repair [e.g. marsupialization] (see [1.FM.80.^ ^](#))

1.FM.52.BA-TS using endoscopic (sialendoscopic) per orifice approach with drainage tube [e.g. polyethylene]
 1.FM.52.CR using per orifice approach [incisional]
 1.FM.52.HA using percutaneous (needle) aspiration
 1.FM.52.JE using external manual expression

1.FM.57.^ ^ Extraction, parotid gland**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Sialolithotomy, parotid gland [Stensen's duct]

Excludes: Extraction [calculi] with ductoplasty (see [1.FM.80.^ ^](#))
Extraction [calculi] with replantation, Stensen's duct (see [1.FM.83.^ ^](#))

1.FM.57.BA-GX using endoscopic (sialendoscopic) per orifice approach and device NEC [e.g. basket, forceps]
1.FM.57.SM-BP using open approach and dilator device [e.g. wire, stent, bougie] for calculi extraction
1.FM.57.SN using open approach and incision (into duct) for calculi extraction

1.FM.59.^ ^ Destruction, parotid gland**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Lithotripsy, parotid gland [calculi]

1.FM.59.KQ-AR using extracorporeal (piezoelectric) shock wave lithotripsy [ESWL]

1.FM.80.^ ^ Repair, parotid gland**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Ductoplasty, Stensen's
Fistulization, Stensen's duct
Marsupialization, Stensen's duct
Sialodochoplasty, Stensen's

Excludes: Ligation, Stensen's duct (see [1.FM.51.^ ^](#))
that with replantation of Stensen's duct (see [1.FM.83.^ ^](#))

1.FM.80.^ ^ Repair, parotid gland	with extraction of calculi	without extraction of calculi
dilator device used for extraction followed by simple duct repair	1.FM.80.SN-BP	1.FM.80.LA-BP
simple duct repair [e.g. using suture]	1.FM.80.SN	1.FM.80.LA

1.FM.83.^ ^ Transfer, parotid gland**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Replantation, Stensen's duct
Repositioning, Stensen's duct

Note: Often involves ductoplasty as part of transfer with or without extraction of calculi.

1.FM.83.LA without extraction of calculi (simple duct repositioning)
1.FM.83.SN with extraction of calculi (and duct repositioning)

1.FM.87.^ ^ Excision partial, parotid gland**S** 4 **L** 89

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 89	Mandatory	Bilaterality Mandatory 2	Location	A T	Aberrant tissue only
				B	Bilateral
				L	Left
				R	Right
				U	Unilateral unspecified

Includes: Lobectomy, parotid
Parotidectomy, subtotal
Sialoadenectomy, parotid, subtotal

Code Also: Any concomitant neck dissection (see [1.MC.^^.^^](#))
Any concomitant repair to nerve of head and neck (see [1.BB.80.^^](#))

1.FM.87.LA using open approach without preservation of facial nerve technique
1.FM.87.LA-XX-G using open approach without preservation of facial nerve technique with pedicled flap [e.g. sternocleidomastoid flap]
Note: When there is concomitant neck dissection capture the repair of the surgical defect (i.e. flap graft) at the neck dissection code.

1.FM.87.VW using open approach with preservation of facial nerve technique
1.FM.87.VW-XX-G using open approach with preservation of facial nerve technique with pedicled flap [e.g. sternocleidomastoid flap]
Note: When there is concomitant neck dissection capture the repair of the surgical defect (i.e. flap graft) at the neck dissection code.

1.FM.89.^^ Excision total, parotid gland**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Parotidectomy, remainder
Parotidectomy, total
Sialoadenectomy, parotid, total

Code Also: Any concomitant neck dissection (see [1.MC.^^.^^](#))
Any concomitant repair to nerve of head and neck (see [1.BB.80.^^](#))

1.FM.89.LA using open approach without preservation of facial nerve technique
1.FM.89.LA-XX-G using open approach without preservation of facial nerve technique with pedicled flap [e.g. sternocleidomastoid flap]
Note: When there is concomitant neck dissection capture the repair of the surgical defect (i.e. flap graft) at the neck dissection code.

1.FM.89.VW using open approach with preservation of facial nerve technique
1.FM.89.VW-XX-G using open approach with preservation of facial nerve technique with pedicled flap [e.g. sternocleidomastoid flap]
Note: When there is concomitant neck dissection capture the repair of the surgical defect (i.e. flap graft) at the neck dissection code.

1.FM.91.^.^ Excision radical, parotid gland**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Parotidectomy with resection of adjacent tissues such as: mastoid bone, external auditory meatus, submandibular joint [styloid process, condyle, coronoid process, glenoid fossa, ramus], zygoma, muscle and nerve. May involve the use of grafts, flaps or fixation of mandible for closure of the surgical defect.

Parotidectomy, radical, with reconstructive flap/ graft

Excludes: Radical parotidectomy extending into inner ear structures [e.g. cochlea, utricle, osseous labyrinth, vestibular system] (see [1.DR.91.^.^](#))

Code Also: Any concomitant neck dissection (see [1.MC.^.^](#))

1.FM.91.^.^ Excision radical, parotid gland	no tissue used (for closure of defect)	with autograft [rib or skin graft]	with combined sources of tissue	with free flap [fibular, costochondral, or cutaneous flap]	with homograft [bone]	with pedicled flap [forehead, sternocleidomastoid flap]
using device NEC (or none used)	1.FM.91.LA	1.FM.91.LA-XX-A	1.FM.91.LA-XX-Q	1.FM.91.LA-XX-F	1.FM.91.LA-XX-K	1.FM.91.LA-XX-G
using plate, screw device (with/without wire or mesh)	1.FM.91.LA-NW	1.FM.91.LA-NW-A	1.FM.91.LA-NW-Q	1.FM.91.LA-NW-F	1.FM.91.LA-NW-K	1.FM.91.LA-NW-G
using wire or mesh only	1.FM.91.LA-KD	1.FM.91.LA-KD-A	1.FM.91.LA-KD-Q	1.FM.91.LA-KD-F	1.FM.91.LA-KD-K	1.FM.91.LA-KD-G

1.FN.^.^ Therapeutic Interventions on the Submandibular Gland

Includes: Salivary gland NEC
Submaxillary gland
Wharton's duct

1.FN.35.^.^ Pharmacotherapy (local), submandibular gland

Includes: Partial chemodenervation, submandibular gland

1.FN.35.HA-L7 using percutaneous injection of bacterial toxin (e.g. botulinum toxin or Botox)

1.FN.50.^.^ Dilation, submandibular gland**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: that with or without incision
Excludes: that with extraction of calculi (see [1.FN.57.^](#))

1.FN.50.BA-BP using endoscopic (sialendoscopic) per orifice approach and dilator device
 1.FN.50.CA-BP using per orifice approach and dilator device
 1.FN.50.CR using per orifice approach and incision
 1.FN.50.CR-BP using per orifice approach and incision and dilator device

1.FN.51.^ Occlusion, submandibular gland

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Sialoadenectomy NOS
Sialoadenectomy, remainder
Sialoadenectomy, submandibular, total
Sialoadenectomy, total

Excludes: Sialoadenectomy, parotid (see [1.FM.89.^ ^](#))
Sialoadenectomy, sublingual (see [1.FL.89.^ ^](#))

Omit code: when performed as part of neck dissection

1.FN.89.LA	using open approach
------------	---------------------

1.FP.^ ^.^ ^ Therapeutic Interventions on the Salivary Glands and Ducts NEC

Includes: Minor salivary glands

1.FP.07.^ ^ Hyperthermy, salivary glands and ducts NEC

Includes: Application of heat, salivary glands

1.FP.07.JA-KJ	using hot/warm compresses
1.FP.07.JA-KK	using heating device [mechanical]

1.FP.12.^ ^ Therapy, salivary glands and ducts NEC

Includes: Massage, salivary gland (e.g. to free mucous plug)

1.FP.12.JJ	using manual technique [e.g. massage]
------------	---------------------------------------

1.FP.26.^ ^ Brachytherapy, salivary glands and ducts NEC**S** 35

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 35	Optional	Implant Status	Status	P M	Permanent implant – Radioactive source left in place permanently
				T M	Temporary implant – Radioactive source removed after course of treatment is complete

Includes: Endocurietherapy, salivary glands and ducts
 Implantation of radioactive material, salivary glands and ducts
 Interstitial radiation therapy, salivary glands and ducts

Excludes: Brachytherapy, oral and buccal mucosa (see [1.FG.26.^ ^](#))
 Brachytherapy, pharynx (see [1.FX.26.^ ^](#))

Code Also: Any concomitant implantation of brachytherapy applicators or conduits [e.g. needles, catheters] to gain access to treatment site (see [1.FP.53.^ ^](#))

Note: There are typically two distinct phases required to complete the process of brachytherapy. The first phase involves the insertion of non-radioactive applicators or conduits [e.g. hollow needles, catheters, stents, etc.] that receive or transmit the radioactive material into the body. The second phase involves the after loading of the radioactive material [e.g. seeds, pellets, wires, etc.] into the applicator or conduit.

1.FP.26.HA using percutaneous (transcatheter or transneedle) approach
 1.FP.26.LA using open (incisional) approach

1.FP.27.^ ^ Radiation, salivary glands and ducts NEC

Includes: Teletherapy, salivary glands
 Therapy, radiation [radiotherapy], salivary glands

Excludes: Radiation therapy, oral/buccal mucosa (see [1.FG.27.^ ^](#))
 Radiation therapy, pharynx (see [1.FX.27.^ ^](#))

Note: Involves external beam irradiation of any of the salivary glands.

1.FP.27.JA using external beam

1.FP.53.^ ^ Implantation of internal device, salivary glands and ducts NEC**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Code Also: Any concomitant loading of brachytherapy applicator (see [1.FP.26.^^](#))

1.FP.53.HA-EM of brachytherapy applicator using percutaneous approach
1.FP.53.LA-EM of brachytherapy applicator using open approach

1.FP.55.^^ Removal of device, salivary glands and ducts NEC

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Aspiration, thyroglossal duct (cyst)

1.FT.52.HA using percutaneous (needle) aspiration
 1.FT.52.LA using open approach

1.FT.91.^.^ Excision radical, thyroglossal duct

S⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Sistrunk procedure

Note: Involves excision of surrounding muscles of the neck and base of tongue to the floor of the mouth with mobilization (or removal) of the hyoid bone for complete access (to cyst).

1.FT.91.LA using open approach

1.FU.^.^ Therapeutic Interventions on the Thyroid Gland

Includes: Thyroid isthmus

Excludes: Thyroid cartilage (see [1.GD.^.^](#))

Thyroid with larynx (see [1.GE.^.^](#))

1.FU.13.^.^ Control of bleeding, thyroid gland**E** 53

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 53	Mandatory	Mandatory Coils	Extent	0	Not applicable (no coil used)
				01	One coil
				02	Two coils
				03	Three coils
				04	Four coils
				05	Five coils
				06	Six coils
				07	Seven coils
				08	Eight coils
				09	Nine coils
				10	Ten coils
				G	More than ten coils (11 - 20)
				H	More than twenty coils
				U	Unspecified

Includes: Embolization or ligation, thyroid artery to control bleeding thyroid (region)
Repair, thyroid gland

Excludes: Embolization or ligation, thyroid artery for shrinkage of (diseased) thyroid gland (see [1.JX.51.^.](#))
Systemic pharmacotherapy for control of bleeding (see [1.ZZ.35.^.](#))

1.FU.13.GQ-GE	using percutaneous [transarterial] approach and (detachable) coils
1.FU.13.GQ-W0	using percutaneous [transarterial] approach and synthetic agent [e.g. gelfoam, microspheres, polystyrene, polyvinyl alcohol, contour particles]
1.FU.13.NZ	using open approach [e.g. neck incision]

1.FU.27.^.^ Radiation, thyroid gland

Includes: Teletherapy, thyroid gland (with or without parathyroid gland)
Therapy, radiation [radiotherapy], thyroid gland

Excludes: Ablation, radioactive iodine, thyroid (see [1.FU.59.^.](#))
Radiation therapy, pharynx (see [1.FX.27.^.](#))

Note: Involves external beam irradiation of the thyroid gland which may include the parathyroid glands and surrounding lymph nodes.

1.FU.27.JA	using external beam
------------	---------------------

1.FU.52.^ ^ Drainage, thyroid gland**S** ⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Aspiration, thyroid (for drainage of cyst or abscess)

Excludes: Aspiration biopsy (see [2.FU.71.^ ^](#))
Drainage, thyroglossal duct (cyst) (see [1.FT.52.^ ^](#))

1.FU.52.HA using percutaneous (needle) aspiration

1.FU.52.LA using open approach

1.FU.55.^ ^ Removal of device, thyroid gland**S** ⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

1.FU.55.JA-TS of wound drain

1.FU.59.^ ^ Destruction, thyroid gland**S** ⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Ablation, radioactive iodine, (cyst of) thyroid gland
Therapy, thyroid ablation [e.g. I-131, radioiodine]

Excludes: Radionuclide uptake scan, thyroid (see [3.FU.70.^ ^](#))

1.FU.59.CA-V1 using oral approach radioactive pharmaceutical agent [e.g. I 131, radioiodine]

1.FU.59.HA-V1 using percutaneous (needle) approach and radioactive pharmaceutical agent [e.g. I-131, radioiodine]

1.FU.59.HA-X7 using percutaneous (needle) approach and chemocautery agent [e.g. ethanol, adrenaline, hypertonic solution]

1.FU.71.^.^ Division, thyroid gland**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

1.FU.71.NZ using open approach [e.g. neck incision]

1.FU.87.^.^ Excision partial, thyroid gland**S** 4 **L** 89

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 89	Mandatory	Bilaterality Mandatory 2	Location	A T	Aberrant tissue only
				B	Bilateral
				L	Left
				R	Right
				U	Unilateral unspecified

Includes: Hemithyroidectomy
Isthmectomy, thyroid
Lobectomy, thyroid
that with excision of strap muscles (thyrohyoid, sternohyoid, sternothyroid)
Thyroidectomy, lingual
Thyroidectomy, subtotal

Excludes: Excision of thyroglossal duct cyst or tract (see [1.FT.91.^.^](#))
Parathyroidectomy with excision of margin of thyroid tissue to isolate embedded parathyroid tissue (see [1.FV.87.^.^](#) or [1.FV.89.^.^](#))
that with laryngectomy (with or without resection of trachea) (see [1.GE.91.^.^](#))
Thyroidectomy, remainder leaving no thyroid tissue behind (see [1.FU.89.^.^](#))

Code Also: Any concomitant mediastinal (tumor) resection (see [1.GW.87.^.^](#))
Any concomitant neck dissection (see [1.MC.^.^.^](#))
Any concomitant removal of (superior) mediastinal nodes (see [1.ME.^.^.^](#))
Any concomitant resection of trachea (without laryngectomy) (see [1.GJ.87.^.^](#))

Note: May involve subtotal parathyroidectomy (leaving at least one parathyroid gland in situ).

1.FU.87.^.^ Excision partial, thyroid gland	open approach [e.g. neck incision]	open substernal approach	open transoral approach [e.g. lingual, submental]	endoscopic (video assisted) approach
using device NEC	1.FU.87.NZ	1.FU.87.PZ	1.FU.87.QT	1.FU.87.DA
using laser	1.FU.87.NZ-AG	1.FU.87.PZ-AG	1.FU.87.QT-AG	1.FU.87.DA-AG

1.FU.89.^.^ Excision total, thyroid gland**S** 4 **L** 72

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 72	Mandatory	Bilaterality Mandatory	Location	B	Bilateral
				L	Left
				R	Right
				U	Unilateral unspecified

Includes: that with excision of strap muscles (thyrohyoid, sternohyoid, sternothyroid)
 Thyroidectomy, remainder
 Thyroidectomy, total

Excludes: Excision of thyroglossal duct or tract (see [1.FT.91.^.](#))
 that with laryngectomy (with or without resection of trachea) (see [1.GE.91.^.](#))

Code Also: Any concomitant mediastinal (tumor) resection (see [1.GW.87.^.](#))
 Any concomitant neck dissection (see [1.MC.^.^](#))
 Any concomitant removal of (superior) mediastinal nodes (see [1.ME.^.^](#))
 Any concomitant resection of trachea (without laryngectomy) (see [1.GJ.87.^.](#))
 Any concomitant total parathyroidectomy (see [1.FV.89.^.](#))
 Any concomitant transfer (replantation), parathyroid tissue (see [1.FV.83.^.](#))

Note: May involve subtotal parathyroidectomy (leaving at least one parathyroid gland in situ).

1.FU.89.^.^ Excision total, thyroid gland	open approach [e.g. neck incision]	open substernal approach	endoscopic (video assisted) approach
using device NEC	1.FU.89.NZ	1.FU.89.PZ	1.FU.89.DA
using laser	1.FU.89.NZ-AG	1.FU.89.PZ-AG	1.FU.89.DA-AG

1.FV.^.^ Therapeutic Interventions on the Parathyroid Gland**1.FV.52.^.^ Drainage, parathyroid gland****S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Aspiration, parathyroid gland (for drainage of cyst or abscess)

Excludes: Aspiration biopsy (see [2.FV.71.^^](#))

1.FV.52.HA using percutaneous (needle) aspiration
1.FV.52.LA using open approach

1.FV.55.^^ Removal of device, parathyroid gland

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

1.FV.55.JA-TS of wound drain

1.FV.59.^^ Destruction, parathyroid gland

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

1.FV.59.HA-X7 using percutaneous (needle) approach and chemocautery agent [e.g. ethanol, adrenaline, hypertonic solution]

1.FV.83.^^ Transfer, parathyroid gland

S 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Parathyroidectomy with replantation (one stage)
Reimplantation, parathyroid gland (or tissue)
Replantation, parathyroid gland (or tissue)

Note: Usually involves extensive exploration and total parathyroidectomy with preservation of some parathyroid tissue by replanting it in muscle (e.g. in forearm) in order to preserve some parathyroid function.

1.FV.83.^ ^ Transfer, parathyroid gland	open approach [e.g. neck incision] with another incision for transfer	open substernal approach with another incision for transfer
using device NEC	1.FV.83.NZ	1.FV.83.PZ
using laser	1.FV.83.NZ-AG	1.FV.83.PZ-AG

1.FV.87.^ ^ Excision partial, parathyroid gland**S** 4 **L** 89

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 89	Mandatory	Bilaterality Mandatory 2	Location	A T	Aberrant tissue only
				B	Bilateral
				L	Left
				R	Right
				U	Unilateral unspecified

Includes: Parathyroidectomy, subtotal (at least 1 gland remains in situ)**Excludes:** Subtotal parathyroidectomy with thyroidectomy (see [1.FU.87.^ ^](#))**Note:** May involve excision of margin of thyroid tissue to isolate embedded parathyroid tissue.

1.FV.87.^ ^ Excision partial, parathyroid gland	open approach [e.g. neck incision]	open substernal approach
using device NEC	1.FV.87.NZ	1.FV.87.PZ
using laser	1.FV.87.NZ-AG	1.FV.87.PZ-AG

1.FV.89.^ ^ Excision total, parathyroid gland**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Parathyroidectomy, remainder
Parathyroidectomy, total**Excludes:** that with replantation of parathyroid tissue in muscle (see [1.FV.83.^ ^](#))**Note:** Involves excision of all parathyroid tissue (including any embedded within the thyroid gland).

1.FV.89.^.^ Excision total, parathyroid gland	open approach [e.g. neck incision]	open substernal approach
using device NEC	1.FV.89.NZ	1.FV.89.PZ
using laser	1.FV.89.NZ-AG	1.FV.89.PZ-AG

1.FX.^.^ Therapeutic Interventions on the Oropharynx

Includes: Hypopharynx
Oropharynx with nasopharynx
Pharynx NOS
Retromaxillary, suprahyoid, posterior and lateral oropharynx
Retropharynx
Valleculae

Excludes: Nasopharynx alone (see [1.FA.^.^](#))
Pharynx with larynx (see [1.GE.^.^](#))

1.FX.11.^.^ Anesthetization, oropharynx

Includes: Anesthesia, throat

1.FX.11.JA-P1	using topical approach and local anesthetic agent
---------------	---

1.FX.13.^.^ Control of bleeding, oropharynx

Includes: Control of bleeding, pharynx

Excludes: Systemic pharmacotherapy for control of bleeding (see [1.ZZ.35.^.](#))
that for tonsillar bleeding (see [1.FR.13.^.](#))

1.FX.13.HA-C2	using needle injection of antihemorrhagic agent Includes: aminocaproic acid, aprotinin, phytonadione, thrombin, coagulation factor VIII
1.FX.13.JA-C2	using topical application of antihemorrhagic agent
1.FX.13.JA-GX	using device NEC (e.g. electrocautery)
1.FX.13.JN	using direct compression

1.FX.26.^ **Brachytherapy, oropharynx****S** 35

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 35	Optional	Implant Status	Status	P M	Permanent implant – Radioactive source left in place permanently
				T M	Temporary implant – Radioactive source removed after course of treatment is complete

Includes: Endocurietherapy, oropharynx
 Implantation of radioactive material, pharynx
 Interstitial radiation therapy, pharynx

Excludes: Brachytherapy, oral and buccal mucosa alone (see [1.FG.26.^](#))
 Brachytherapy, salivary glands alone (see [1.FP.26.^](#))
 Brachytherapy, soft tissue of head and neck alone (see [1.EQ.26.^](#))

Code Also: Any concomitant implantation of brachytherapy applicators or conduits [e.g. needles, catheters] to gain access to treatment site (see [1.FX.53.^](#))

Note: There are typically two distinct phases required to complete the process of brachytherapy. The first phase involves the insertion of non-radioactive applicators or conduits [e.g. hollow needles, catheters, stents, etc.] that receive or transmit the radioactive material into the body. The second phase involves the after loading of the radioactive material [e.g. seeds, pellets, wires, etc.] into the applicator or conduit.

1.FX.26.HA using percutaneous (transcatheter or transneedle) approach
 1.FX.26.LA using open (incisional) approach

1.FX.27.^ **Radiation, oropharynx**

Includes: Radiation, pharynx
 Teletherapy, pharynx
 Therapy, radiation [radiotherapy], pharynx

Excludes: Radiation therapy extending into esophagus (see [1.NA.27.^](#))
 Radiation therapy extending into thyroid gland (see [1.FU.27.^](#))
 Radiation therapy, oral and buccal mucosa alone (see [1.FG.27.^](#))
 Radiation therapy, salivary glands alone (see [1.FP.27.^](#))
 Radiation therapy, soft tissue of head and neck alone (see [1.EQ.27.^](#))

Note: Involves external beam irradiation of the pharynx and surrounding lymph nodes or soft tissue as necessary.

1.FX.27.JA using external beam

1.FX.35.^ ^ Pharmacotherapy (local), oropharynx

Includes: Injection, pharynx
 Instillation, pharynx
 Irrigation, oropharynx or pharynx
 Lavage, pharynx

Excludes: Irrigation with drainage, oropharynx (see [1.FX.52.^ ^](#))
 Systemic pharmacotherapy (see [1.ZZ.35.^ ^](#))
 that for control of bleeding (see [1.FX.13.^ ^](#))
 Tumor mapping [tattooing], oropharynx (see [7.SF.13.^ ^](#))

1.FX.35.CA-D1	using per orifice approach and antiinfective irrigating solution
1.FX.35.CA-D2	using per orifice approach and salt irrigating solution
1.FX.35.CA-D3	using per orifice approach and other irrigating solution
1.FX.35.HA-K0	using needle approach and antiinfective agent
1.FX.35.HA-N1	using needle approach and antiinflammatory agent
	Includes: NSAIDS (indomethacin, ibuprofen), aurothioglucose, D penicillimine, diclofenac
1.FX.35.HA-P2	using needle approach and analgesic
	Includes: opioids (morphine, meperidine), acetylsalicylic acid, acetaminophen, ergotamine, sumatriptan
1.FX.35.HA-T9	using needle approach and pharmacological agent NEC

1.FX.50.^ ^ Dilation, oropharynx**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Dilation, hypopharynx (for stenosis)

1.FX.50.^ ^ Dilation, oropharynx	endoscopic per orifice approach	per orifice approach
using balloon dilator	1.FX.50.BA-BD	1.FX.50.CA-BD
using incisional technique	—	1.FX.50.WK
using rigid dilator	1.FX.50.BA-BP	1.FX.50.CA-BP

1.FX.52.^ ^ Drainage, oropharynx**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Aspiration (for drainage), oropharynx
Drainage [abscess, hematoma], retropharyngeal region
Pharyngotomy (for drainage)

Excludes: Aspiration biopsy, oropharynx (see [2.FX.71.^^](#))
Drainage, nasopharynx (see [1.FA.52.^^](#))

1.FX.52.BA using endoscopic per orifice approach
1.FX.52.HA using percutaneous (needle) approach
1.FX.52.LA using open (incisional) approach

1.FX.53.^^ Implantation of internal device, oropharynx

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Implantation, brachytherapy applicator, pharynx

Code Also: Any concomitant loading of brachytherapy applicator (see [1.FX.26.^^](#))

1.FX.53.HA-EM of brachytherapy applicator using percutaneous approach
1.FX.53.LA-EM of brachytherapy applicator using open approach

1.FX.55.^^ Removal of device, oropharynx

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Removal of device, pharynx

Excludes: Removal of nasopharyngeal tube (see [1.FA.55.^^](#))
Removal of orotracheal tube (see [1.GJ.55.^^](#))

1.FX.55.JA-EB of radioactive implant using external approach
1.FX.55.LA-EB of radioactive implant using open (incisional) approach

1.FX.56.^ ^ Removal of foreign body, oropharynx**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Extraction of (superficial, embedded) foreign object, oropharynx
 Pharyngotomy for removal of foreign body
 Removal of foreign object (lodged in) throat

1.FX.56.CA using per orifice approach (for removal of intraluminal object)
 1.FX.56.JA using external approach (for simple extraction of embedded object)
 1.FX.56.LA using open (incisional) approach

1.FX.59.^ ^ Destruction, oropharynx**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Ablation of lesions, oropharynx
 Fulguration of lesions, oropharynx

1.FX.59.BA-AD using endoscopic per orifice approach and cryoprobe
 1.FX.59.BA-AG using endoscopic per orifice approach and laser
 1.FX.59.BA-AZ using endoscopic per orifice approach and ultrasound
 1.FX.59.BA-GX using endoscopic per orifice approach and device NEC
 1.FX.59.BA-X7 using endoscopic per orifice approach and chemical cautery agent

1.FX.80.^ ^ Repair, oropharynx**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Pharyngoplasty NOS
 Pharyngorrhaphy
 Repair, fistula, pharyngocutaneous and pharyngoesophageal
 Repair, pharynx

Excludes: Palatopharyngoplasty for velopharyngeal insufficiency (VPI) (see [1.FC.80.^](#))
 Pharyngoplasty in repair of hard (with soft) cleft palate (see [1.FB.86.^](#))
 Repair, nasopharynx for choanal atresia (see [1.FA.84.^](#))
 that for removal of foreign body (see [1.FX.56.^](#))
 that with pharyngectomy (see [1.FX.87.^](#))

1.FX.80.LA using open approach
 1.FX.80.LA-XX-G using open approach and pedicled flap [e.g. pharyngeal flap]

1.FX.87.^ Excision partial, oropharynx

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Excision, pharyngeal pouch (with or without cricopharyngeal myotomy)
 Hypo pharyngectomy
 Myotomy, cricopharyngeal (for excision pharyngeal tissue)
 Oro pharyngectomy
 Pharyngectomy NEC
 Pharyngectomy, partial
 that with creation of neopharynx

Excludes: Interventions performed on the neopharynx (see [1.OW.^.^](#))
 Myotomy, cricopharyngeal with laryngectomy (see [1.GE.87.^](#))
 Naso-pharyngectomy, trans-palatine (see [1.FA.91.^](#))
 Pharyngectomy with laryngectomy (see [1.GE.91.^](#))
 Pharyngolaryngectomy with esophagectomy (see [1.GE.91.^](#))

Code Also: Any concomitant mandibular split or swing (see [1.EE.71.^](#))

1.FX.87.BA using endoscopic per orifice approach (and simple apposition technique or no closure)
 1.FX.87.BA-AG using endoscopic per orifice approach (and simple apposition technique or no closure) and laser
 1.FX.87.LA using open approach and simple apposition technique [e.g. suturing] (for closure of defect)
 1.FX.87.LA-XX-A using open approach and autograft [e.g. skin graft] (for closure of defect)
 1.FX.87.LA-XX-F using open approach and free flap [e.g. colon interpositional flap] (for closure of defect)
 1.FX.87.LA-XX-G using open approach and pedicled flap [e.g. deltopectoral, forehead, pectoralis major or tongue flap] (for closure of defect)
 1.FX.87.LA-XX-Q using open approach and combined sources of tissue [e.g. flaps and grafts] (for closure of defect)

1.FX.91.^.^ Excision radical, oropharynx**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Oro pharyngectomy, radical
Pharyngectomy, radical
that with creation of neopharynx

Excludes: Glossopharyngectomy (see [1.FJ.91.^.^](#))
Interventions performed on the neopharynx (see [1.OW.^.^](#))
Nasopharyngectomy, trans-oro-palatal (see [1.FA.91.^.^](#))
Pharyngectomy with craniectomy (see [1.EA.92.^.^](#))
Pharyngectomy with resection of cranial base (see [1.EA.92.^.^](#))
Pharyngolaryngectomy (see [1.GE.91.^.^](#))

Code Also: Any application of maxillary obturator (see [1.FB.37.^.^](#))
Any concomitant mandibular split or swing (see [1.EE.71.^.^](#))
Any concomitant neck dissection (see [1.MC.^.^](#))

Note: Excision of oropharynx with any of the following adjacent tissue: nasopharynx, hard or soft palate, muscle of head or neck, salivary gland [parotid, submandibular, sublingual]

1.FX.91.LA	using apposition technique [e.g. suturing] (for closure of defect)
1.FX.91.LA-XX-A	using autograft [e.g. skin graft] (for closure of defect)
1.FX.91.LA-XX-F	using free flap [e.g. colon interpositional flap]
1.FX.91.LA-XX-G	using pedicled flap [e.g., deltopectoral, forehead, pectoralis major or tongue flap] (for closure of defect)
1.FX.91.LA-XX-Q	using combined sources of tissue [e.g. flaps and grafts]

Therapeutic Interventions on the Respiratory System (1GA - 1GZ)

1.GA.^.^ Therapeutic Interventions on the Glottis

- Includes:** Intrinsic larynx
Laryngeal commissure
True cord
True vocal cord
Vocal cord NOS
Vocal folds
- Excludes:** Anterior surface of epiglottis (see [1.FX.^.^](#))

1.GA.35.^ Pharmacotherapy (local), glottis

- Includes:** Injection, vocal folds
Instillation, glottis
that for vocal fold paralysis
- Excludes:** Systemic pharmacotherapy (see [1.ZZ.35.^](#))

1.GA.35.BA-L7	using endoscopic per orifice approach and bacterial toxin (e.g. Botulinum toxin)
1.GA.35.BA-W2	using endoscopic per orifice approach and collagen
1.GA.35.BA-W8	using endoscopic per orifice approach and Teflon
1.GA.35.BA-Z9	using endoscopic per orifice approach and agent NEC

1.GA.50.^ Dilation, glottis

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

- Includes:** Dilation, congenital glottic web
- Excludes:** that done by destruction (see [1.GA.59.^](#))
that with thyrotomy and insertion of keel (see [1.GA.80.^](#))

1.GA.50.BA-BP	using endoscopic per orifice approach and dilation device
---------------	---

1.GA.59.^ ^ Destruction, glottis**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Destruction, lesion of glottis (e.g. glottic web)

1.GA.59.BA-AG using endoscopic per orifice approach and laser
 1.GA.59.BA-GX using endoscopic per orifice approach and device NEC

1.GA.74.^ ^ Fixation, glottis**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Arytenoidopexy (for vocal fold paralysis)
 Lateralization, vocal folds

Excludes: Medialization (see [1.GA.80.^ ^](#))

1.GA.74.BA using endoscopic per orifice approach and suture technique
 1.GA.74.LA using open approach and suture technique

1.GA.80.^ ^ Repair, glottis**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Medialization, vocal folds
Phonosurgery
that for congenital glottic web
that for voice disorders (e.g. movement [paralysis], tension [flaccidity] or positional [folds not at same level] disorders)

1.GA.80.LA-SL	using spacing device Includes: Laryngeal framework surgery (with metal shims) that using keel into thyroid cartilage by thyrotomy that using Silastic wedge implant Thyroplasty (e.g. Isshiki thyroplasty)
1.GA.80.LA-SL-E	using local flap and spacing device Includes: that with implantation of silastic wedge and reinnervation with nerve/muscle flap technique to reconnect arteries/ veins/nerves
1.GA.80.LA-XX-E	using local flap Includes: Reinnervation with nerve/muscle flap (e.g. ans hypoglossal nerve)

1.GA.83.^ Transfer, glottis

S⁵

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Advancement, laryngeal commissure
Repositioning, anterior commissure (vertical)
Retrusion, laryngeal commissure
Transposition of vocal cords

1.GA.83.^ Transfer, glottis	using autograft [e.g. cartilage]	using autograft with synthetic material
endoscopic per orifice approach	1.GA.83.BA-XX-A	1.GA.83.BA-XX-Q
open anterior neck approach	1.GA.83.LA-XX-A	1.GA.83.LA-XX-Q

1.GA.87.^ Excision partial, glottis

S⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Stripping, vocal cord(s)
that with microlaryngoscopy

Excludes: Partial laryngectomy (see [1.GE.87.^^](#))

1.GA.87.BA using endoscopic per orifice approach
1.GA.87.BA-AG using endoscopic per orifice approach and laser

1.GA.89.^^ Excision total, glottis

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Vocal cordectomy

Excludes: Partial laryngectomy (see [1.GE.87.^^](#))
Ventriculocordectomy (see [1.GB.87.^^](#))

1.GA.89.BA using endoscopic per orifice approach
1.GA.89.BA-AG using endoscopic per orifice approach and laser

1.GB.^^.^^ Therapeutic Interventions on the Supraglottis

Includes: Epiglottic region
Epiglottis NOS
Extrinsic larynx
False cord
False vocal cord
Laryngeal aspect of aryepiglottic fold
Supraglottic region
Ventricular band of larynx
Vestibule

Excludes: Anterior surface of epiglottis (see [1.FX.^^.^^](#))

1.GB.78.^^ Repair by decreasing size, supraglottis

S 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Epiglottopexy
Epiglottoplasty
Supraglottoplasty

Note: Involves division, debulking and trimming of tissue (aryepiglottic folds, arytenoid mucosa, edges of epiglottis) with or without a concomitant epiglottopexy. The aim of the procedure is to prevent, by decreasing size, the soft tissue from collapsing into the larynx.

1.GB.78.BA using endoscopic (laryngoscopic) per orifice approach and suture technique
1.GB.78.BA-AG using endoscopic (laryngoscopic) approach and laser technique

1.GB.87.^ ^ Excision partial, supraglottis

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Epiglottidectomy, partial
Ventriculocordectomy

Excludes: Partial laryngectomy (see [1.GE.87.^ ^](#))
Vocal cordectomy (see [1.GA.89.^ ^](#))

1.GB.87.BA using endoscopic per orifice approach
1.GB.87.BA-AG using endoscopic per orifice approach and laser
1.GB.87.LA using open (anterior) neck approach (e.g. anterior pharyngectomy)
1.GB.87.LA-AG using open (anterior) neck approach and laser

1.GB.89.^ ^ Excision total, supraglottis

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Amputation, epiglottis
Epiglottidectomy, total
Resection, epiglottis

1.GB.89.BA using endoscopic per orifice approach
1.GB.89.BA-AG using endoscopic per orifice approach and laser
1.GB.89.LA using lateral neck approach
1.GB.89.LA-AG using lateral neck approach and laser

1.GC.^.^ Therapeutic Interventions on the Subglottis

Includes: Subglottic region

1.GC.50.^.^ Dilation, subglottis**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: that for dilation of a soft tissue subglottic stenosis

Excludes: that done by laser or other methods of destruction (see [1.GC.59.^.](#))
that with excision or transfer of cartilage or muscle flaps (see [1.GH.84.^.](#))

1.GC.50.BA-BP using endoscopic per orifice approach and dilation device

1.GC.59.^.^ Destruction, subglottis**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Destruction, soft tissue stenosis subglottic region

1.GC.59.BA-AG using endoscopic per orifice approach and laser
1.GC.59.BA-GX using endoscopic per orifice approach and device NEC

1.GD.^.^ Therapeutic Interventions on the Laryngeal Cartilage

Includes: Arytenoid cartilage
Corniculate cartilage
Cricoid cartilage
Cuneiform cartilage
Thyroid cartilage [Adam's apple]

1.GD.35.^ ^ Pharmacotherapy (local), laryngeal cartilage

Includes: Injection
Instillation, laryngeal cartilage

Excludes: Systemic pharmacotherapy (see [1.ZZ.35.^ ^](#))

1.GD.35.BA-J2 using endoscopic per orifice approach and steroids

1.GD.53.^ ^ Implantation of internal device, laryngeal cartilage**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Placement, keel by thyrotomy
that for congenital glottic web

Excludes: Medialization, vocal folds (see [1.GA.80.^ ^](#))

1.GD.53.LA-SL of spacer device (e.g. keel) using open approach (e.g. thyrotomy)

1.GD.55.^ ^ Removal of device, laryngeal cartilage**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

1.GD.55.BA-SL of spacer device (e.g. keel) using endoscopic per orifice approach

1.GD.74.^ ^ Fixation, laryngeal cartilage**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Fixation, laryngeal fracture
Reduction, (with fixation) laryngeal fracture

Excludes: Hyoid myotomy advancement to thyroid cartilage (see [1.EJ.74.^^](#))
Reduction, laryngeal fracture with pyriform sinus flap (see [1.GE.80.^^](#))

Code Also: Any excision of cartilage [e.g. arytenoidectomy] (see [1.GD.87.^^](#) or [1.GD.89.^^](#))

1.GD.74.BA using endoscopic per orifice approach
Includes: that done with suture technique

1.GD.74.BA-KD using endoscopic per orifice approach and fixation device NEC

1.GD.74.LA using open approach
Includes: Repair, cricoid cartilage (transected)

1.GD.74.LA-KD using open approach and fixation device NEC

1.GD.83.^^ Transfer, laryngeal cartilage**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Abduction, arytenoid

1.GD.83.BA using endoscopic per orifice approach

1.GD.87.^^ Excision partial, laryngeal cartilage**S** 9

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 9	Optional	Tx Status 4	Status	A	Abandoned after onset
				S	Staged

Includes: Arytenoidectomy, partial
Cricoidectomy, partial
Reduction, laryngeal cartilage [Adam's apple] (for sex change operation)

1.GD.87.BA using endoscopic per orifice approach

1.GD.87.BA-AG using endoscopic per orifice approach and laser

1.GD.87.LA using open approach

1.GD.87.LA-AG using open approach and laser

1.GD.89.^.^ Excision total, laryngeal cartilage**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Arytenoidectomy
Cricoidectomy, total
that with tracheostomy
Thyro cricoidectomy

Code Also: Any concomitant lateralization of vocal folds (see [1.GA.74.^.^](#))

1.GD.89.BA	using endoscopic per orifice approach
1.GD.89.BA-AG	using endoscopic per orifice approach and laser
1.GD.89.LA	using open approach (e.g. lateral neck)
1.GD.89.LA-AG	using open approach and laser

1.GE.^.^ Therapeutic Interventions on the Larynx NEC

Includes: Larynx NOS
Larynx with pharynx

Excludes: Laryngeal cartilage (see [1.GD.^.^](#))
Larynx with trachea (see [1.GH.^.^](#))

1.GE.27.^.^ Radiation, larynx NEC

Includes: Radiotherapy, larynx
Teletherapy, larynx
Therapy, radiation [radiotherapy], larynx

1.GE.27.JA	using external beam
1.GE.27.JX	using focused beam [e.g. gamma knife, cyber knife stereotactic radiosurgery]

1.GE.37.^.^ Installation of external appliance, larynx NEC

Excludes: Implantation, tracheoesophageal button (see [1.GJ.53.^.^](#))
 Insertion, Blom-Singer device (see [1.GJ.53.^.^](#))
 Insertion, duck bill prosthesis (see [1.GJ.53.^.^](#))

1.GE.37.CA-JA	of electronic artificial larynx using intra-oral approach (e.g. introduced by a silastic tube)
1.GE.37.JA-JA	of electronic artificial larynx
	Includes: that applied to cervical soft tissue of neck
1.GE.37.JA-PK	of pneumatic artificial larynx

1.GE.38.^.^ Management of external appliance, larynx NEC

Includes: Adjustment of [externally applied] artificial larynx

1.GE.38.CA-JA	of electronic artificial larynx using intra-oral approach
1.GE.38.JA-JA	of electronic artificial larynx
	Includes: that applied to cervical soft tissue of neck
1.GE.38.JA-PK	of pneumatic artificial larynx

1.GE.50.^.^ Dilation, larynx NEC**S**⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Excludes: Dilation, glottis (see [1.GA.50.^.^](#))
 Dilation, subglottic region of larynx (see [1.GC.50.^.^](#))
 that done by laser or other method of destruction (see [1.GE.59.^.^](#))

1.GE.50.BA-BP	using endoscopic per orifice approach and dilation device
1.GE.50.BA-NR	using endoscopic per orifice approach and stent

1.GE.52.^.^ Drainage, larynx NEC**S**⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Aspiration, laryngeal cyst
Marsupialization, laryngeal cyst

1.GE.52.BA using endoscopic per orifice approach
1.GE.52.CA-TJ using per orifice approach and suction device
1.GE.52.HA using percutaneous (needle) approach
1.GE.52.LA using open approach

1.GE.55.^ ^ Removal of device, larynx NEC

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

1.GE.55.BA-NR of stent using endoscopic per orifice approach
1.GE.55.LA-NR of stent using open approach

1.GE.56.^ ^ Removal of foreign body, larynx NEC

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Extraction of (superficial, embedded) foreign body, larynx
Removal of foreign body (lodged in) larynx

1.GE.56.BA using endoscopic per orifice approach (for simple extraction)
1.GE.56.BA-TJ using endoscopic per orifice approach and suction device
1.GE.56.LA using open (incisional) approach

1.GE.59.^ ^ Destruction, larynx NEC

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: that for control of bleeding, larynx NEC
Excludes: Destruction, subglottic region (see [1.GC.59.^^](#))

1.GE.59.BA-AD using endoscopic per orifice approach and cryoprobe
 1.GE.59.BA-AG using endoscopic per orifice approach and laser
 1.GE.59.BA-AZ using endoscopic per orifice approach and ultrasound
 1.GE.59.BA-GX using endoscopic per orifice approach and device NEC
 1.GE.59.BA-X7 using endoscopic per orifice approach and chemical cautery agent

1.GE.80.^^ Repair, larynx NEC

S 10

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 10	Optional	Tx Status 5	Status	A	Abandoned after onset
				R	Revision
				S	Staged

Includes: Closure of fistula, larynx
 Fistulectomy, larynx

Excludes: Fixation, laryngeal cartilage without flap (see [1.GD.74.^^](#))

1.GE.80.BA using endoscopic per orifice approach
 1.GE.80.BA-FH using endoscopic per orifice approach and bioabsorbable material [e.g. dextranomer microspheres (Deflux)]
 1.GE.80.BA-XX-E using endoscopic per orifice approach and local flap
 1.GE.80.LA using open approach
Includes: that with simple suture or apposition
 1.GE.80.LA-XX-E using open approach and local flap
Includes: Reduction, laryngeal fracture with pyriform sinus flap

1.GE.87.^^ Excision partial, larynx NEC

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

- Includes:** Laryngectomy, partial (with or without tracheotomy)
Laryngopharyngectomy, partial
Polypectomy, larynx
that done via laser incision
- Excludes:** Partial laryngectomy with laryngotracheoplasty to salvage function for larynx and reconstruct airway (see [1.GH.84.^](#))
- Code Also:** Any concomitant neck dissection (see [1.MC.^.^](#))
Any concomitant tracheoesophageal puncture (see [1.GJ.53.^](#))
- Note:** May involve cricopharyngeal myotomy.

1.GE.87.^ Excision partial, larynx NEC	using autograft [e.g. cartilage]	using combined sources of tissue	using pedicled distant flap	no tissue used
open approach [e.g. apron flap incision] with horizontal technique	1.GE.87.NZ-XX-A Includes: <ul style="list-style-type: none"> Extended supraglottic laryngectomy (with or without cricopharyngeal myotomy) Horizontal partial laryngectomy Partial laryngopharyngectomy Supracricoid partial laryngectomy Supraglottic laryngectomy (with or without cricopharyngeal myotomy) 	1.GE.87.NZ-XX-Q Includes: <ul style="list-style-type: none"> Extended supraglottic laryngectomy (with or without cricopharyngeal myotomy) Horizontal partial laryngectomy Partial laryngopharyngectomy Supracricoid partial laryngectomy Supraglottic laryngectomy (with or without cricopharyngeal myotomy) 	1.GE.87.NZ-XX-G Includes: <ul style="list-style-type: none"> Extended supraglottic laryngectomy (with or without cricopharyngeal myotomy) Horizontal partial laryngectomy Partial laryngopharyngectomy Supracricoid partial laryngectomy Supraglottic laryngectomy (with or without cricopharyngeal myotomy) 	1.GE.87.NZ Includes: <ul style="list-style-type: none"> Extended supraglottic laryngectomy (with or without cricopharyngeal myotomy) Horizontal partial laryngectomy Partial laryngopharyngectomy Supracricoid partial laryngectomy Supraglottic laryngectomy (with or without cricopharyngeal myotomy)

S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Extirpation, larynx
Laryngectomy, total
that with concomitant tracheostomy
that with creation of neopharynx

Excludes: that with mention of partial or total thyroidectomy (see [1.GE.91.^ ^](#))

Code Also: Any concomitant neck dissection (see [1.MC.^ ^.^ ^](#))
Any concomitant tracheoesophageal puncture [insertion of voice prosthesis] (see [1.GJ.53.^ ^](#))

1.GE.89.LA using open approach (e.g. apron flap incision)
1.GE.89.LA-XX-A using open approach and autograft (e.g. full thickness skin graft)
1.GE.89.LA-XX-F using open approach and free distant flap
1.GE.89.LA-XX-G using open approach and pedicled distant flap (e.g. myocutaneous flap)
1.GE.89.LA-XX-Q using open approach and combined sources of tissue

1.GE.91.^ ^ Excision radical, larynx NEC**S** 9

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 9	Optional	Tx Status 4	Status	A	Abandoned after onset
				S	Staged

Includes: Laryngectomy, radical (with or without tracheostomy/ tracheotomy)
Laryngopharyngectomy
Pharyngolaryngectomy
that with creation of neopharynx

Code Also: Any concomitant neck dissection (see [1.MC.^ ^.^ ^](#))
Any concomitant tracheoesophageal puncture [insertion of voice prosthesis] (see [1.GJ.53.^ ^](#))

Note: May also involve thyroidectomy and partial esophagectomy.

1.GE.91.LA using open approach
1.GE.91.LA-XX-A using open approach and autograft [e.g. cartilage]
1.GE.91.LA-XX-F using open approach and free flap
1.GE.91.LA-XX-G using open approach and pedicled distant flap [e.g. myocutaneous flap]
1.GE.91.LA-XX-Q using open approach and combined sources of tissue

1.GH.^^.^^ Therapeutic Interventions on the Larynx with Trachea

Excludes: Larynx alone (see [1.GE.^^.^^](#))
Trachea alone (see [1.GJ.^^.^^](#))

1.GH.71.^^ Division, larynx with trachea**S**⁵

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Decompression, anterior laryngotracheal
Laryngofissure
Split, (anterior) cricoid

1.GH.71.LA using open approach
1.GH.71.LA-AG using open approach and laser

1.GH.84.^^ Construction or reconstruction, larynx with trachea**S**⁹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 9	Optional	Tx Status 4	Status	A	Abandoned after onset
				S	Staged

Includes: Laryngotracheoplasty
Reconstruction, laryngotracheal
Salvage of functioning larynx with reconstruction of the airway
that for subglottic stenosis
that with cricoidotomy
that with laryngofissure or other partial laryngectomy

1.GH.84.LA-NR-A using open approach with stent and autograft
1.GH.84.LA-XX-A using open approach and autograft [e.g. costal cartilage]
1.GH.84.LA-XX-E using open approach and local flap
Includes: Rotary door flap technique that with posterior membranous tracheal flap

1.GJ.^^.^^ Therapeutic Interventions on the Trachea

Excludes: Trachea with larynx (see [1.GH.^^.^^](#))

1.GJ.13.^ ^ Control of bleeding, trachea

Excludes: Systemic pharmacotherapy for control of bleeding (see [1.ZZ.35.^ ^](#))

1.GJ.13.BA-C2	using endoscopic per orifice approach and topical antihemorrhagic agent
	Includes: aminocaproic acid, aprotinin, phytonadione, thrombin, coagulation factor VIII
1.GJ.13.BA-CD	using endoscopic per orifice approach and direct manual pressure
1.GJ.13.CA-NG	using per orifice approach with endotracheal tube (with cuff)

1.GJ.26.^ ^ Brachytherapy, trachea**S** 35

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 35	Optional	Implant Status	Status	P M	Permanent implant – Radioactive source left in place permanently
				T M	Temporary implant – Radioactive source removed after course of treatment is complete

Includes: Endocurietherapy, trachea
 Implantation of radioactive material, trachea
 Interstitial radiation therapy, trachea
 Intracavitary radiation therapy, trachea
 Intraluminal radiation therapy, trachea

Code Also: Any concomitant implantation of brachytherapy applicators or conduits [e.g. needles, catheters] to gain access to treatment site (see [1.GJ.53.^ ^](#))

Note: There are typically two distinct phases required to complete the process of brachytherapy. The first phase involves the insertion of non-radioactive applicators or conduits [e.g. hollow needles, catheters, stents, etc.] that receive or transmit the radioactive material into the body. The second phase involves the after loading of the radioactive material [e.g. seeds, pellets, wires, etc.] into the applicator or conduit.

1.GJ.26.BA	using endoscopic per orifice approach
1.GJ.26.CA	using per orifice approach
1.GJ.26.HA	using percutaneous (transcatheter or transneedle) approach
1.GJ.26.LA	using open (incisional) approach

1.GJ.27.^ ^ Radiation, trachea

Includes: Teletherapy, trachea
 Therapy, radiation [radiotherapy], trachea

1.GJ.27.JA	using external beam
1.GJ.27.JX	using focused beam [e.g. gamma knife, cyber knife stereotactic radiosurgery]

1.GJ.35.^ ^ Pharmacotherapy (local), trachea

Includes: Injection, trachea
 Instillation, trachea
 Irrigation, trachea
 that using nasotracheal, orotracheal or tracheostomy approach

Excludes: Irrigation or cleansing, tracheostomy device (see [1.GJ.54.^ ^](#))
 Systemic pharmacotherapy (see [1.ZZ.35.^ ^](#))
 that for control of bleeding (see [1.GJ.13.^ ^](#))
 that for inhalation therapy (see [1.GT.35.^ ^](#))

1.GJ.35.BA-D1	using endoscopic per orifice approach and antiinfective irrigating solution
	Includes: chlorhexidine, neomycin
1.GJ.35.BA-D2	using endoscopic per orifice approach and salt irrigating solution
	Includes: sodium chloride
1.GJ.35.BA-D3	using endoscopic per orifice approach using other irrigating solution
	Includes: sorbitol, mannitol
1.GJ.35.BA-T9	using endoscopic per orifice administration of pharmaceutical agent NEC
1.GJ.35.CA-K0	using per orifice administration of antiinfective agent NEC
1.GJ.35.CA-T9	using per orifice [tracheostomy, oro/nasotracheal] administration of pharmaceutical agent NEC
1.GJ.35.HA-T9	using percutaneous (needle) injection of pharmaceutical agent NEC

1.GJ.50.^ ^ Dilation, trachea**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: that to keep airway open

Excludes: Initial insertion (creation) of tracheostomy (see [1.GJ.77.^ ^](#))
 Tracheotomy (temporary) (see [1.GJ.77.^ ^](#))

Omit code: Initial insertion of endotracheal tube for purposes of ventilation (see [1.GZ.31.^ ^](#))

1.GJ.50.^ ^ Dilation, trachea	endoscopic approach	open approach	per orifice (or via stoma) approach
no device	—	1.GJ.50.LA	—
using endotracheal tube	—	—	1.GJ.50.CA-NG Includes: • Replacement of endotracheal tube • Replacement of tracheostomy tube
using other tube [e.g. T tube]	—	—	1.GJ.50.CA-TS
using rigid dilator	—	—	1.GJ.50.CA-BP
using stent	1.GJ.50.BA-NR	1.GJ.50.LA-NR	1.GJ.50.CA-NR
using balloon dilator	1.GJ.50.BA-BD	—	—

1.GJ.52.^ ^ Drainage, trachea**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Aspiration, trachea (for drainage of cyst or secretions)

Excludes: Aspiration for biopsy (see [2.GJ.71.^ ^](#))

1.GJ.52.CA-TJ using per orifice approach with suction device
 1.GJ.52.HA using percutaneous (needle) approach
 1.GJ.52.LA using incisional technique

1.GJ.53.^ ^ Implantation of internal device, trachea**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Fistulization, tracheoesophageal
 Implantation, brachytherapy applicator, trachea
 Insertion, prosthesis, trachea

Excludes: Endotracheal intubation to keep airway open or for dilation (see [1.GJ.50.^^](#))
 Implantation, artificial larynx (see [1.GE.37.^^](#))
 Initial insertion (creation) of tracheostomy (see [1.GJ.77.^^](#))
 Insertion of nasopharyngeal or oropharyngeal airway (see [1.FA.53.^^](#))
 Mechanical ventilation (see [1.GZ.31.^^](#))
 Replacement of endotracheal tube or tracheostomy tube (see [1.GJ.50.^^](#))
 Tracheostomy, (permanent) (see [1.GJ.77.^^](#))

Code Also: Any concomitant loading of brachytherapy applicator (see [1.GJ.26.^^](#))

Note: During placement of a tracheoesophageal button the tract may be initially stented with a catheter, which is replaced 48 hours or more after the initial procedure with a valved prosthesis that allows air diversion into the esophagus while the stoma is occluded.

1.GJ.53.BA-EM	of brachytherapy applicator using endoscopic per orifice approach
1.GJ.53.BA-PM	of tracheoesophageal button using endoscopic per orifice approach
	Includes: Endoscopic puncture, tracheoesophageal Insertion, low pressure prosthesis with or without tracheostomal valve that for primary voice restoration
1.GJ.53.HA-EM	of brachytherapy applicator using percutaneous approach
1.GJ.53.LA-EM	of brachytherapy applicator using open approach
1.GJ.53.LA-PM	of tracheoesophageal button using open approach
	Includes: Insertion, duck bill prosthesis (e.g. Blom Singer, Williams Singer) Insertion, low pressure prosthesis with or without tracheostomal valve Open puncture, tracheoesophageal that for primary voice restoration

1.GJ.54.^^ Management of internal device, trachea

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Adjustment of device, trachea (e.g. endotracheal tube cuff pressure)
 Irrigation [cleansing] of device, trachea
 Tracheostomy cuff and tube care [toilette]
 Tracheostomy toilette [care]

Excludes: Installation of agent into device for local pharmacotherapy (see [1.GJ.35.^^](#))
 Replacement of endotracheal or tracheostomy tube (see [1.GJ.50.^^](#))
 Tracheal and bronchial suctioning for clearance (see [1.GM.52.^^](#))

1.GJ.54.CA-NR	of stent using per orifice [oro/naso-tracheal] approach
1.GJ.54.JA-NG	of (cuffed) endotracheal tube
1.GJ.54.JA-TS	of tube (e.g. T-tube, drainage tube)

1.GJ.55.^ ^ Removal of device, trachea**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Endotracheal extubation

Excludes: that concomitant with tracheostomy take-down (see [1.GJ.82.^ ^](#))
that with replacement (see [1.GJ.50.^ ^](#))

1.GJ.55.^ ^ Removal of device, trachea	endoscopic per orifice approach	per orifice (or via stoma) approach	external approach	open [incisional] approach
of radioactive implant	1.GJ.55.BA-EB	1.GJ.55.CA-EB	1.GJ.55.JA-EB	1.GJ.55.LA-EB
of stent	1.GJ.55.BA-NR	1.GJ.55.CA-NR	—	1.GJ.55.LA-NR
of (cuffed) endotracheal tube	—	1.GJ.55.CA-NG Includes: • Removal of tracheostomy tube	—	—
of tube (e.g. T-tube, drainage tube)	—	1.GJ.55.CA-TS	—	—
of tracheoesophageal button	—	—	—	1.GJ.55.LA-PM

1.GJ.56.^ ^ Removal of foreign body, trachea**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Extraction of (superficial, embedded) foreign body, trachea
Removal of foreign body (lodged in) trachea

Note: May involve pulsatile jet lavage or irrigation to facilitate complete removal of foreign body debris.

1.GJ.56.BA	using endoscopic per orifice approach (for simple extraction)
1.GJ.56.BA-TJ	using endoscopic per orifice approach with suction device
1.GJ.56.CA	using per orifice approach (for simple extraction)
1.GJ.56.CA-TJ	using per orifice approach with suction device
1.GJ.56.JA-CD	using external approach with manual forced expulsion
	Includes: Heimlich maneuver
1.GJ.56.LA	using open approach [e.g. collar incision]

1.GJ.59.^ ^ Destruction, trachea**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Debulking [neoplasm], trachea

1.GJ.59.BA-AG using endoscopic per orifice approach and laser
 1.GJ.59.BA-GX using endoscopic per orifice approach and device NEC

1.GJ.77.^ ^ Bypass with exteriorization, trachea**S** 31

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 31	Mandatory	Mandatory Tx Status 1	Status	0	Not applicable
				A	Abandoned after onset
				R	Revision

- Includes:** Fenestration, trachea with skin flaps
Laryngostomy
Laryngotracheostomy
Tracheo fissure
- Excludes:** Replacement of endotracheal or tracheostomy tube (see [1.GJ.50.^](#))
that with partial laryngectomy (see [1.GE.87.^](#))
that with radical laryngectomy (see [1.GE.91.^](#))
that with total laryngectomy (see [1.GE.89.^](#))
- Code Also:** any mechanical ventilation (see [1.GZ.31.^](#))

1.GJ.77.HA	using percutaneous needle approach (e.g. percutaneous dilational tracheostomy - PDT)
	Includes: Percutaneous dilational tracheostomy [PDT]
1.GJ.77.LA	using open approach (e.g. collar incision)
	Includes: that for long term mechanical ventilation that performed in a non-emergency (planned) (elective) setting when there is a need for long term, prolonged or indefinite use Tracheostomy, (permanent) (semipermanent) Tracheostomy, approach NOS
1.GJ.77.LA-LG	using open approach and temporary implant
	Includes: Cricothyroidotomy Cricothyrotomy Laryngotracheotomy that performed in an acute emergency setting and intended as a short-term temporary measure until the patient can return to normal breathing Tracheotomy/tracheostomy (temporary) (emergency)
1.GJ.77.QB	using mediastinal approach

1.GJ.80.^ Repair, trachea**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

- Includes:** Slide tracheoplasty
Suture, cartilaginous corners of trachea
Suture, laceration (traumatic) trachea
Tracheoplasty
Tracheorrhaphy
- Excludes:** Fistulectomy, trachea (see [1.GJ.86.^](#))

1.GJ.80.^ ^ Repair, trachea	using distant pedicled flap	using local flap [e.g. omental wrap, pericardial patch]	using xenograft [e.g. bovine]	with simple apposition [reanastomosis]
endoscopic (percutaneous) approach	—	1.GJ.80.DA-XX-E	1.GJ.80.DA-XX-L	1.GJ.80.DA
open approach [transcervical, collar incision]	—	1.GJ.80.LA-XX-E	1.GJ.80.LA-XX-L	1.GJ.80.LA
open thoracic approach [mediastinal, posterolateral thoracotomy]	1.GJ.80.QB-XX-G	1.GJ.80.QB-XX-E	1.GJ.80.QB-XX-L	1.GJ.80.QB

1.GK.89.^ ^ Excision total, thymus	using distant pedicle flap	using local flap	with simple apposition [e.g. suture]
endoscopic (percutaneous) approach	—	—	1.GK.89.DA
open thoracic approach	1.GK.89.LA-XX-G	1.GK.89.LA-XX-E	1.GK.89.LA

1.GM.^ ^ Therapeutic Interventions on the Bronchus NEC

Includes: Bronchial region
Bronchus NOS
Hilus of lung
Left main bronchus
Main bronchus NOS
Right main bronchus

1.GM.07.^ ^ Hyperthermy, bronchus NEC**Includes:** Bronchial thermoplasty

1.GM.07.BA-KK using endoscopic per orifice approach and heat device

1.GM.13.^ ^ Control of bleeding, bronchus NEC**E 53**

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 53	Mandatory	Mandatory Coils	Extent	0	Not applicable (no coil used)
				01	One coil
				02	Two coils
				03	Three coils
				04	Four coils
				05	Five coils
				06	Six coils
				07	Seven coils
				08	Eight coils
				09	Nine coils
				10	Ten coils
				G	More than ten coils (11 - 20)
				H	More than twenty coils
				U	Unspecified

Includes: Embolization (transarterial) bronchus, for control of bleeding**Excludes:** Systemic pharmacotherapy for control of bleeding (see [1.ZZ.35.^ ^](#))

1.GM.13.BA using endoscopic per orifice approach

1.GM.13.CA-BD using per orifice approach with inflatable balloon catheter

1.GM.13.GQ-C2 using percutaneous transluminal (transarterial) injection of antihemorrhagic agent

Includes: aminocaproic acid, aprotinin, phytonadione, thrombin, coagulation factor VIII

1.GM.13.GQ-GE using percutaneous transluminal (transarterial) approach and [detachable] coils

1.GM.13.GQ-W0 using percutaneous transluminal (transarterial) approach and synthetic agent [e.g. gelfoam, microspheres, polystyrene, polyvinyl alcohol, contour particles]

1.GM.26.^ ^ Brachytherapy, bronchus NEC**S** 35 **L** 90

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 35	Optional	Implant Status	Status	P M	Permanent implant – Radioactive source left in place permanently
				T M	Temporary implant – Radioactive source removed after course of treatment is complete
L 90	Optional	Bronchus bilateral	Location	B	Bilateral
				L	Left
				N	Main
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Endobronchial irradiation [intra luminous radiation]
 Endocurietherapy, bronchus or lung
 Interstitial radiation therapy, bronchus or lung
 Intracavitary radiation therapy, bronchus or lung

Excludes: External beam radiation therapy, bronchus or lung (see [1.GT.27.^ ^](#))

Code Also: Any concomitant implantation of brachytherapy applicators or conduits [e.g. needles, catheters] to gain access to treatment site (see [1.GM.53.^ ^](#))

Note: There are typically two distinct phases required to complete the process of brachytherapy. The first phase involves the insertion of non-radioactive applicators or conduits [e.g. hollow needles, catheters, stents, etc.] that receive or transmit the radioactive material into the body. The second phase involves the after loading of the radioactive material [e.g. seeds, pellets, wires, etc.] into the applicator or conduit.

1.GM.26.BA using endoscopic per orifice approach
 1.GM.26.CA using per orifice approach
 1.GM.26.DA using endoscopic (thoracoscopic) approach
 1.GM.26.HA using percutaneous (transcatheter or transneedle) approach
 1.GM.26.LA using open approach

Includes: Intraoperative implantation of radioactive seeds or mesh following subtotal lung resection

1.GM.35.^ ^ Pharmacotherapy (local), bronchus NEC

- Includes:** Irrigation, bronchus
Lavage, bronchus
- Excludes:** Bronchial washings (see [2.GM.71.^ ^](#))
Systemic pharmacotherapy (see [1.ZZ.35.^ ^](#))
that for control of bleeding (see [1.GM.13.^ ^](#))

- 1.GM.35.BA-D1 using endoscopic per orifice approach and antiinfective irrigating solution
Includes: chlorhexidine, neomycin
- 1.GM.35.BA-D2 using endoscopic per orifice approach and salt irrigating solution
Includes: sodium chloride

1.GM.50.^ ^ Dilation, bronchus NEC**S** 4 **L** 90

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 90	Optional	Bronchus bilateral	Location	B	Bilateral
				L	Left
				N	Main
				R	Right
				S	Unilateral (unspecified if right or left)

- 1.GM.50.BA using endoscopic per orifice approach
- 1.GM.50.BA-NR using endoscopic per orifice approach and insertion of stent
- 1.GM.50.LA using open approach
- 1.GM.50.LA-NR using open approach and insertion of stent

1.GM.52.^ ^ Drainage, bronchus NEC**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Aspiration, bronchus and/or bronchioles (for drainage of secretions)
Removal of retained secretions, bronchus that with tracheal drainage

Excludes: Aspiration for biopsy (see [2.GJ.71.^^](#))
Postural drainage (see [1.GT.52.^^](#))

1.GM.52.BA-TJ using endoscopic per orifice approach (bronchoscope) with suction device
1.GM.52.CA-TJ using per orifice approach with suction device

1.GM.53.^^ Implantation of internal device, bronchus NEC

Includes: Implantation, brachytherapy applicator, bronchus or lung

Code Also: Any concomitant loading of brachytherapy applicator (see [1.GM.26.^^](#))

1.GM.53.BA-EM of brachytherapy applicator using endoscopic per orifice approach
1.GM.53.BA-PM of airflow redirection valve using endoscopic per orifice approach
Includes: Endobronchial valve (EBV)
1.GM.53.DA-EM of brachytherapy applicator using endoscopic (thoracoscopic) approach
1.GM.53.HA-EM of brachytherapy applicator using percutaneous approach
1.GM.53.LA-EM of brachytherapy applicator using open approach

1.GM.54.^^ Management of internal device, bronchus NEC

S 4 **L** 90

- Includes:** Lingulectomy
Lobectomy partial, lobe of lung
Segmentectomy, lobe of lung
that with or without stapler
that with removal of two segments (e.g. partial excision of two different lobes)
Wedge resection
- Excludes:** partial excision of lobe with total excision of another lobe (see [1.GT.87.^](#))
- Code Also:** Any robotic assisted telemanipulation of tools (see [7.SF.14.^](#))

1.GR.87.DA using endoscopic approach [VATS]
1.GR.87.NW using intrapericardial [transpericardial] approach
1.GR.87.QB using open thoracic approach

1.GR.89.^ Excision total, lobe of lung**S** 16 **L** 96

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 16	Optional	Tx Status 10	Status	A	Abandoned after onset
				C	Converted (from endoscopic to open approach)
L 96	Mandatory	Mandatory Lobes of Lung	Location	L H	Left lung, lower lobe
				L U	Left lung, upper lobe
				M L	Multiple segments, left lung
				M R	Multiple segments, right lung
				R H	Right lung, lower lobe
				R M	Right lung, middle lobe
				R U	Right lung, upper lobe
				U	Unilateral, unspecified if right or left

- Includes:** Lobectomy complete, lobe of lung
that with or without stapler
- Excludes:** Complete excision of two lobes of right lung (see [1.GT.87.^](#))
Excision of entire lung (see [1.GT.89.^](#))
that with partial excision of another lobe (see [1.GT.87.^](#))
- Code Also:** Any concomitant lymph node sampling (see [2.ME.71.^](#) or [2.MF.71.^](#))

1.GR.89.DA using endoscopic approach [VATS]
1.GR.89.NW using intrapericardial [transpericardial] approach
1.GR.89.QB using open thoracic approach

1.GR.91.^ ^ Excision radical, lobe of lung**S** 4 **L** 96

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 96	Mandatory	Mandatory Lobes of Lung	Location	L H	Left lung, lower lobe
				L U	Left lung, upper lobe
				M L	Multiple segments, left lung
				M R	Multiple segments, right lung
				R H	Right lung, lower lobe
				R M	Right lung, middle lobe
				R U	Right lung, upper lobe
				U	Unilateral, unspecified if right or left

Includes: Dissection (block) of brachial plexus, bronchus, ribs (transverse process), inter costal structures and sympathetic nerves along with lobe of lung (e.g. that for superior sulcus tumors)
 Lobectomy (sleeve), lobe of lung with excision of a portion of the bronchus and subsequent reanastomosis that with chest wall resection
 that with removal of adjoining/attached lymph nodes

1.GR.91.^ ^ Excision radical, lobe of lung	open thoracic approach	open intrapericardial [transpericardial] approach
with simple closure	1.GR.91.QB	1.GR.91.NW
using autograft [pericardium]	1.GR.91.QB-XX-A	1.GR.91.NW-XX-A

using xenograft	—	1.GR.91.NW-XX-L

1.GT.^ ^ Therapeutic Interventions on the Lung NEC

Includes: Base of lung
 Borders and surface of lung
 Multiple overlapping sites of lung
 Parenchyma of lung
 Pulmonary NOS

1.GT.13.^ ^ Control of bleeding, lung NEC**L** 2 **E** 53

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)
E 53	Mandatory	Mandatory Coils	Extent	0	Not applicable (no coil used)
				01	One coil
				02	Two coils
				03	Three coils
				04	Four coils
				05	Five coils
				06	Six coils
				07	Seven coils
				08	Eight coils
				09	Nine coils
				10	Ten coils
				G	More than ten coils (11 - 20)
				H	More than twenty coils
				U	Unspecified

Includes: Intra arterial embolization of lungs**Excludes:** Systemic pharmacotherapy for control of bleeding (see [1.ZZ.35.^ ^](#))
that for control of bleeding bronchus (see [1.GM.13.^ ^](#))

1.GT.13.BA-GX using endoscopic per orifice approach and device NEC (e.g. electrocautery)

1.GT.13.BA-KK using endoscopic per orifice approach and special electrical heat device [e.g. argon beam coagulator]

1.GT.13.GQ-C2 using percutaneous transluminal (transarterial) approach and antihemorrhagic agent

Includes: Aminocaproic acid, aprotinin, phytonadione, thrombin, coagulation factor VIII

1.GT.13.GQ-GE using percutaneous transluminal (transarterial) approach and [detachable] coils

1.GT.13.GQ-W0 using percutaneous transluminal (transarterial) approach and synthetic agent [e.g. gelfoam, microspheres, polystyrene, polyvinyl alcohol, contour particles]

1.GT.27.^ ^ Radiation, lung NEC**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Teletherapy, bronchus
 Teletherapy, lung
 Teletherapy, pleura
 Therapy, radiation [radiotherapy], lung

Excludes: Brachytherapy, lung or bronchus (see [1.GM.26.^ ^](#))
 Endobronchial brachytherapy (see [1.GM.26.^ ^](#))

Note: Involves external beam irradiation of lung with or without other adjacent structures such as vena cava, mediastinum or pericardium, etc.

1.GT.27.JA using external beam

1.GT.27.JX using focused beam [e.g. gamma knife, cyber knife stereotactic radiosurgery]

1.GT.33.^ ^ Decompression, lung NEC**L** ²

				L	Left
				R	Right
				U	Unilateral unspecified

Excludes: Transplant, heart with lung (see [1.HY.85.^.^](#))

Note: Use location attribute to specify unilateral or bilateral lung transplant

- 1.GT.85.LA-XX-J using open approach and homograft from living donor
 1.GT.85.LA-XX-K using open approach and homograft from deceased donor

1.GT.87.^.^ Excision partial, lung NEC

S 16 **L** 95

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 16	Optional	Tx Status 10	Status	A	Abandoned after onset
				C	Converted (from endoscopic to open approach)
L 95	Mandatory	Mandatory Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes:	Bilobectomy, right lung Bilobectomy, right lung with segmental resection of adjacent lobe Complete excision of two lobes of right lung Debridement, lung Lobectomy, one lobe with partial excision of another lobe that with or without stapler
Excludes:	Completion pneumonectomy (see 1.GT.89.^^) Lobectomy, partial, lobe of lung (see 1.GR.87.^^) that with removal of two segments (e.g. partial excision of two different lobes) (see 1.GR.87.^^)
Code Also:	Any robotic assisted telemanipulation of tools (see 7.SF.14.^^)
1.GT.87.DA	using endoscopic approach [VATS]
1.GT.87.NW	using intrapericardial [transpericardial] approach
1.GT.87.QB	using open thoracic approach

1.GT.89.^^ Excision total, lung NEC**S** 16 **L** 95

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 16	Optional	Tx Status 10	Status	A	Abandoned after onset
				C	Converted (from endoscopic to open approach)
L 95	Mandatory	Mandatory Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes:	Complete excision of three lobes of right lung Complete excision of two lobes of left lung Pneumonectomy, complete Pneumonectomy, completion [following previous removal of a portion of the ipsilateral lung] Pneumonectomy, NOS that with mediastinotomy
Excludes:	Complete excision of two lobes of right lung (see 1.GT.87.^^) Lobectomy, complete, single lobe of lung (see 1.GR.89.^^)
Code Also:	any subsequent repair of the pericardium (see 1.HA.80.^^)

1.GT.89.DA	using endoscopic approach [VATS]
1.GT.89.NW	using intrapericardial [trans pericardial] approach
1.GT.89.QB	using open thoracic approach

1.GT.91.^.^ Excision radical, lung NEC**S** 4 **L** 95

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 95	Mandatory	Mandatory Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Pneumonectomy (sleeve) with resection of segment of trachea followed by broncho tracheal anastomosis
Pneumonectomy, extended
Pneumonectomy, extrapleural
that with removal of adjoining/attached lymph nodes
that with resection of chest wall

1.GT.91.^.^ Excision radical, lung NEC	with simple closure	using synthetic material	using distant pedicled flap	using free flap	using combined sources of tissue
open thoracic approach	1.GT.91.QB	1.GT.91.QB-XX-N	1.GT.91.QB-XX-G	1.GT.91.QB-XX-F	1.GT.91.QB-XX-Q

1.GV.^.^ Therapeutic Interventions on the Pleura

Includes: Parietal pleura
Pleural cavity
Pleural space
Visceral pleura

1.GV.14.^.^ Dressing, pleura

Includes: that for open (sucking) chest wound

1.GV.14.JA-FJ	using occlusive external dressing [e.g. plastic adhesive with strapping]
---------------	--

1.GV.35.^.^ Pharmacotherapy (local), pleura

- Includes:** Injection, pleura or pleural cavity [intrapleural injection]
 Instillation, pleura or pleural cavity
 Insufflation, pleural cavity
 Irrigation, pleural cavity
- Excludes:** Irrigation of device, pleural cavity (see [1.GV.54.^.^](#))
 Systemic pharmacotherapy (see [1.ZZ.35.^.^](#))
 that for induction of pneumothorax (see [1.GT.33.^.^](#))
 that for pleurodesis (see [1.GV.59.^.^](#))

1.GV.35.^.^ Pharmacotherapy (local), pleura	percutaneous [needle] approach	transcatheter [chest tube] instillation or insufflation approach
using antithrombotic agent	1.GV.35.HA-C1 Includes: • warfarin, heparin, enoxaparin, dipyridamole	1.GV.35.HH-C1 Includes: • warfarin, heparin, enoxaparin, dipyridamole
using thrombolytic agent	1.GV.35.HA-1C Includes: • anistreplase, alteplase, reteplase, streptokinase, tenecteplase, TNKase (TNK), tissue plasminogen activator (tPA), urokinase	1.GV.35.HH-1C Includes: • anistreplase, alteplase, reteplase, streptokinase, tenecteplase, TNKase (TNK), tissue plasminogen activator (tPA), urokinase
using anesthetic agent	1.GV.35.HA-P1	1.GV.35.HH-P1
using antiinfective irrigating solution	—	1.GV.35.HH-D1 Includes: • chlorhexidine, neomycin
using salt irrigating solution	—	1.GV.35.HH-D2 Includes: • sodium chloride
using other irrigating solution	—	1.GV.35.HH-D3
using antiinfective agent NEC	—	1.GV.35.HH-K0
using antineoplastic agent NEC	—	1.GV.35.HH-M0
using pharmacological agent NEC	1.GV.35.HA-T9	1.GV.35.HH-T9
using agent NEC	1.GV.35.HA-Z9	1.GV.35.HH-Z9

1.GV.38.^.^ Management of external appliance, pleura

- Includes:** Adjustment of appliance, pleura or pleural cavity
 Initiation or discontinuation of external appliance, pleural cavity

1.GV.38.JA-HD	of drainage system
1.GV.38.JA-TJ	of suction pump system

1.GV.52.^ ^ Drainage, pleura**S** 16

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 16	Optional	Tx Status 10	Status	A	Abandoned after onset
				C	Converted (from endoscopic to open approach)

Includes: Aspiration [therapeutic tap, drainage of fluid], pleural cavity
 Creation, pleural window
 Creation, thoracic window
 Evacuation of air, pleural cavity
 Insertion, (chest tube) for intrapleural drainage
 Pleurocentesis
 that for hemothorax, empyema, chylothorax, pleural effusion
 that with or without irrigation or lavage
 Thoracentesis, (therapeutic)
 Thoracoplasty
 Thoracostomy

1.GV.52.DA using endoscopic approach [VATS]
 1.GV.52.DA-TS using endoscopic approach and leaving drainage tube in situ
 1.GV.52.HA using percutaneous (needle) approach
Includes: that using one way flutter valve needle for emergency air evacuation)
 1.GV.52.HA-HE using percutaneous catheter (intracostal) with underwater seal drainage system
Includes: Insertion of chest tube (for intrapleural drainage) NOS
 1.GV.52.HA-TK using percutaneous catheter with suction pump, (under water seal or negative pressure)
Includes: that by percutaneous tunnelling technique [e.g. permanent or semi-permanent tunnelled PleurX catheter]
 1.GV.52.LA using open approach
Includes: Thoracoplasty
Note: May involve removal of a portion of a rib and/or pleural peel. These should not be coded separately.
 1.GV.52.LA-TS using open approach and leaving drainage tube in situ
 1.GV.52.LA-XX-E using open approach and skin flaps
Includes: Eloesser flap for long term drainage
 Marsupialization, pleura

1.GV.54.^ ^ Management of internal device, pleura**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Adjustment of device, pleural cavity
Irrigation of device, pleural cavity

Excludes: Installation of agent into device for local pharmacotherapy (see [1.GV.35.^ ^](#))

1.GV.54.JA-TS of drainage tube [e.g. thoracotomy or pleural cavity drain] using external approach

1.GV.55.^ ^ Removal of device, pleura**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: that using Valsalva's maneuver and tying of purse string suture

1.GV.55.JA-TS of drainage tube [e.g. thoracotomy or pleural cavity drain] using external approach

1.GV.56.^.^ Removal of foreign body, pleura**S** 16 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 16	Optional	Tx Status 10	Status	A	Abandoned after onset
				C	Converted (from endoscopic to open approach)
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Extraction of (embedded) foreign body, pleura

1.GV.56.DA using endoscopic approach [VATS]

1.GV.56.LA using open approach

1.GV.59.^.^ Destruction, pleura**S** 16 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 16	Optional	Tx Status 10	Status	A	Abandoned after onset
				C	Converted (from endoscopic to open approach)
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Abrasion, pleura
 Obliteration, pleura
 Pleurodesis
 Pleurosclerosis
 Poudrage
 Scarification, pleura
- Excludes:** Decortication, partial, pleura (see [1.GV.87.^](#))
 Decortication, total, pleura (see [1.GV.89.^](#))

- 1.GV.59.DA-GX using endoscopic approach [VATS] and device NEC
 1.GV.59.DA-Z9 using endoscopic approach and chemical agent NEC
 1.GV.59.HA-Z9 using percutaneous instillation of agent NEC (e.g. blood, talc)
 Includes: Pleurodesis, autologous blood
 Pleurodesis, chemical
 Poudrage, talc
- 1.GV.59.LA-GX using open approach and device NEC

1.GV.76.^ Bypass, pleura**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Insertion, pleuroperitoneal shunt
 Shunt, pleuroperitoneal
- 1.GV.76.ME bypass terminating in abdominal cavity
 Includes: Peritoneal cavity

1.GV.80.^.^ Repair, pleura**S** 5 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Obliteration, pleural cavity or space

Excludes: Fistulectomy (see Closure of fistula, by originating site)

1.GV.80.LA using suture

1.GV.80.LA-XX-G using open approach and pedicled distant flap (e.g. muscle transposition flap)

1.GV.87.^.^ Excision partial, pleura**S** 16 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 16	Optional	Tx Status 10	Status	A	Abandoned after onset
				C	Converted (from endoscopic to open approach)
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Decortication partial, pleura
Pleurectomy (unilateral), partial
Pleurectomy NOS
Pleurodesis, mechanical

1.GV.87.DA using endoscopic approach [VATS]

1.GV.87.LA using open approach

1.GV.89.^.^ Excision total, pleura**S** 16 **L** 2

				S	Unilateral (unspecified if right or left)

Includes: Decortication total, pleura
Pleurectomy, total

1.GV.89.DA using endoscopic approach [VATS]
1.GV.89.LA using open approach

1.GW.^.^ Therapeutic Interventions on the Mediastinum

Includes: Anterior mediastinum
Inferior mediastinum
Mediastinal wall and cavity
Middle mediastinum
Posterior mediastinum
Superior mediastinum

Excludes: Blood vessels of mediastinal region (see [1.JY.^.^](#))
Chest wall (see [1.SZ.^.^](#))
Mediastinal lymphatic structures (see [1.ME.^.^](#))
Pleural cavity (see [1.GV.^.^](#))
Thoracic lymphatic structures (see [1.MN.^.^](#))

1.GW.27.^.^ Radiation, mediastinum

Includes: Teletherapy, mediastinum NOS
Therapy, radiation [radiotherapy], mediastinum NOS

Excludes: Radiation, heart (see [1.HZ.27.^.^](#))
Radiation, lung (with mediastinum) (see [1.GT.27.^.^](#))
Radiation, mediastinal lymph nodes (see [1.MF.27.^.^](#))
Radiation, soft tissue of chest wall (see [1.SZ.27.^.^](#))

1.GW.27.JA using external beam

				C	Converted (from endoscopic to open approach)

Includes: Extraction of foreign body, chest cavity NOS

Excludes: Removal of foreign body from chest wall (see [1.SZ.56.^.^](#))

1.GY.56.DA using endoscopic [VATS] approach
1.GY.56.LA using open approach

1.GY.70.^.^ Incision, thoracic cavity NEC

1.GY.70.LA using open approach

1.GY.72.^.^ Release, thoracic cavity NEC**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Adhesiolysis, lung
Freeing adhesions, thoracic cavity NEC (including trachea, larynx, pleura, diaphragm, lungs, chest all)

1.GY.72.DA using endoscopic approach
1.GY.72.LA using open approach

1.GY.86.^.^ Closure of fistula, thoracic cavity NEC

S 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Excludes: Closure of fistulas with specified originating and terminating sites (e.g. bronchopleural (see [1.GM.86.^.](#)))

1.GY.86.MP for fistula terminating in site NEC with simple apposition
1.GY.86.MP-XX-A for fistula terminating in site NEC using autograft
1.GY.86.MP-XX-E for fistula terminating in site NEC using local flap
1.GY.86.MP-XX-F for fistula terminating in site NEC using free flap
1.GY.86.MP-XX-G for fistula terminating in site NEC using distant pedicled flap [e.g. latissimus dorsi]

1.GY.94.^.^ Therapeutic intervention NEC, thoracic cavity NEC

1.GY.94.DA using endoscopic approach
1.GY.94.HA using percutaneous (needle) approach
1.GY.94.LA using open approach

1.GZ.^.^ Therapeutic Interventions on Respiratory System NEC

1.GZ.02.^.^ Exercise, respiratory system NEC

Includes: Assisting and supervising client in performing breathing exercise(s)

Excludes: that concomitant with postural drainage (see [1.GZ.52.^.](#))

1.GZ.02.YC using forced expulsion (e.g. coughing)
1.GZ.02.YC-GX using forced expulsion with device
1.GZ.02.YD using breathing maneuvers (e.g. deep)
1.GZ.02.YQ using resistive exercise (inspiration muscles)

1.GZ.12.^ ^ Therapy, respiratory system NEC

Includes: Therapy, chest (for sputum induction)
Excludes: that concomitant with postural drainage (see [1.GZ.52.^ ^](#))
Code Also: Aerosol inhalation therapy (see [1.GZ.35.^ ^](#))
 Isobaric therapy (hood, tent) for respiration (see [7.SC.70.^ ^](#))

1.GZ.12.JA-UE using vibration device
 1.GZ.12.JJ using manual technique (e.g. percussion, clapping)
 1.GZ.12.ZZ using technique NEC

1.GZ.30.^ ^ Resuscitation, respiratory system NEC

Includes: Artificial respiration
 Resuscitation, pulmonary
 that to reestablish breathing
Excludes: Resuscitation, cardiopulmonary (see [1.HZ.30.^ ^](#))
 that involving Heimlich maneuver for expulsion of foreign body (see [1.GJ.56.^ ^](#))
 Ventilation, mechanical (see [1.GZ.31.^ ^](#))

1.GZ.30.CJ using per orifice manual approach (e.g. mouth to mouth)
 1.GZ.30.JH using external manual compression technique

1.GZ.31.^ ^ Ventilation, respiratory system NEC**S 71 E 45**

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 71	Mandatory	Mandatory Potential Organ Donor Opportunity	Status	0	Not applicable: discharged alive
				V1	Ventilation at time of death or ended less than 3 hours before time of death
				V2	Ventilation ended equal to or greater than 3 hours to less than 6 hours before time of death
				V3	Ventilation ended equal to or greater than 6 hours to less than 24 hours before time of death
				V9	Ventilation ended equal to or greater than 24 hours before time of death
E 45	Mandatory	Mandatory Invasive Ventilation	Extent	0	Not applicable [use only for non-invasive ventilation]
				C N	Continuous but less than 96 hours of invasive ventilation
				E X	Extended continuous of 96 hours (or more) of invasive ventilation

Includes: Assistance, endotracheal respiratory
 Assistance, mechanical respiratory
 Forced oxygenation
 Intubation for the purposes of ventilation
 Ventilation, mechanical

Excludes: Replacement of endotracheal or tracheostomy tube (see [1.GJ.50.^^](#))

Code Also: Any concomitant cardiopulmonary resuscitation (CPR) (see [1.HZ.30.^^](#))
 Any concomitant tracheostomy (see [1.GJ.77.^^](#))
 Any inhalant pharmacotherapy (see [1.GZ.35.^^](#))

1.GZ.31.^^ Ventilation, respiratory system NEC	non-invasive approach	invasive per orifice approach by (endotracheal) intubation	invasive per orifice with incision approach for intubation through tracheostomy	invasive percutaneous transluminal approach (e.g. transtracheal jet) through needle
positive pressure (e.g. CPAP, BIPAP, IPPV)	1.GZ.31.CB-ND	1.GZ.31.CA-ND Includes: <ul style="list-style-type: none"> Controlled/assisted mechanical ventilation (CMV, AMV) High frequency ventilation (HFV) Intermittent mandatory ventilation (IMV, SIMV) Inverse ratio ventilation (IRV) Pressure support/control ventilation (PSV, PCV) 	1.GZ.31.CR-ND Includes: <ul style="list-style-type: none"> Controlled/assisted mechanical ventilation (CMV, AMV) High frequency ventilation (HFV) Intermittent mandatory ventilation (IMV, SIMV) Inverse ratio ventilation (IRV) Pressure support/control ventilation (PSV, PCV) 	1.GZ.31.GP-ND Includes: <ul style="list-style-type: none"> High frequency ventilation [HFV] via transtracheal jet
negative pressure	1.GZ.31.JA-NC	—	—	—
manual hand assisted (e.g. ambu bag)	1.GZ.31.CB-EP Includes: <ul style="list-style-type: none"> Bag and mask or bag-valve-mask ventilation 	1.GZ.31.CA-EP Includes: <ul style="list-style-type: none"> Bag-valve connected to endotracheal tube for ventilation 	—	—

1.GZ.32.^.^ Oxygenation, respiratory system NEC

Includes: High flow oxygen delivery via non-rebreathing mask, Venturi mask
Low flow oxygen delivery using mask, nasal cannula (prong) or reservoir nasal chamber

Excludes: Extracorporeal membrane oxygenation and carbon dioxide removal (see [1.LZ.37.^.](#))
Hyperbaric (chamber) oxygenation (see [1.ZZ.32.^.](#))
Ventilation therapy (see [1.GZ.31.^.](#))

Note: Use this code when oxygen therapy is provided to a person who is able to breath on his/her own but just requires supplemental oxygen.

1.GZ.32.CA-GX	using device NEC
1.GZ.32.CA-MU	using liquid oxygen system
1.GZ.32.CA-MV	using compressed gas cylinder
1.GZ.32.CA-MW	using oxygen concentrator
1.GZ.32.CA-MX	using air compressor, per orifice
1.GZ.32.CA-MY	using bulk storage manifold system

1.GZ.35.^.^ Pharmacotherapy (local), respiratory system NEC

Includes: Humidity and aerosol therapy
Instillation, respiratory system NEC
that using metered dosage inhaler, nebulizer (jet or ultrasonic), generator or spacer for delivery

Excludes: Oxygen therapy (see [1.GZ.32.^.](#))
Systemic pharmacotherapy (see [1.ZZ.35.^.](#))

1.GZ.35.CA-R3	using antiasthmatic agent
	Includes: salbutamol, fenoterol, budesonide, ipratropium, theophylline, zafirlukast
1.GZ.35.CA-T9	using pharmacological agent NEC
1.GZ.35.CA-V0	using (humidified) air (heated/cold)
1.GZ.35.CA-V4	using carbon dioxide [carbogen]
1.GZ.35.CA-V6	using helium
1.GZ.35.CA-Z9	using chemical agent NEC

1.GZ.38.^.^ Management of external appliance, respiratory system NEC

Includes: Adjustment of appliance, respiratory system
Initiation or removal of appliance, respiratory system
Weaning from device, respiratory system

1.GZ.38.JA-MT	of hyperbaric oxygen system
1.GZ.38.JA-ND	of positive pressure ventilator
1.GZ.38.JA-NE	of positive pressure end expiratory pressure ventilator (PEEP)

1.GZ.52.^ ^ Drainage, respiratory system NEC**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Postural drainage
that with assistance and/or supervision
that with breathing maneuvers [e.g. forced expiration]

Excludes: Drainage of bronchus (see [1.GM.52.^ ^](#))
Drainage of pleural cavity (see [1.GV.52.^ ^](#))
Drainage of trachea (see [1.GJ.52.^ ^](#))
Drainage of trachea with bronchus (see [1.GM.52.^ ^](#))

1.GZ.52.JH	using posture alone
1.GZ.52.JH-UE	using posture and vibration device
1.GZ.52.JM	using posture and manual percussion

Therapeutic Interventions on the Cardiovascular System (1HA - 1LZ)

Therapeutic Interventions on the Heart (and related structures) (1HA - 1HZ)

1.HA.^.^ Therapeutic Interventions on the Pericardium

Includes: Fibrous pericardium
Serous pericardium

1.HA.52.^.^ Drainage, pericardium

S 16

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 16	Optional	Tx Status 10	Status	A	Abandoned after onset
				C	Converted (from endoscopic to open approach)

Includes: Aspiration [puncture], pericardium
Creation, pericardial window
Decompression, pericardium by evacuation of blood or fluid
Fenestration, pericardium
Pericardiopleurostomy
Pericardiostomy
Pericardiotomy
that for recompression of cardiac tamponade

Excludes: that done by partial excision (see [1.HA.87.^.](#))

1.HA.52.DA	using endoscopic approach [VATS]
	Includes: Thoracoscopic drainage
1.HA.52.HA	using percutaneous (needle) approach
	Includes: Pericardiocentesis
1.HA.52.HA-TS	using percutaneous (needle) approach leaving drainage tube [catheter] in situ
1.HA.52.QA	using subxiphoid approach
1.HA.52.QB	using thoracic approach (e.g. sternotomy, thoracotomy)

1.HA.58.^ ^ Procurement, pericardium**S** 16

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 16	Optional	Tx Status 10	Status	A	Abandoned after onset
				C	Converted (from endoscopic to open approach)

Includes: Excision, pericardial tissue for patch graft

1.HA.58.DA using endoscopic approach [VATS]
 1.HA.58.LA using open approach

1.HA.59.^ ^ Destruction, pericardium**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

1.HA.59.HA-Z9 using percutaneous instillation of chemical agent NEC [e.g. Talc]

Includes: Pericardial poudrage

1.HA.72.^ ^ Release, pericardium**S** 16

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 16	Optional	Tx Status 10	Status	A	Abandoned after onset
				C	Converted (from endoscopic to open approach)

				A T	1 lead into atrium
				A V	1 lead into atrium with 1 lead into ventricle
				U	Other and unspecified (or unknown) number of leads
				V E	1 lead into ventricle

- Includes:** Addition, new connector
Adjustment, epicardial leads
Conversion of unipolar to bipolar
Repair, leads
Repositioning, leads
Repositioning, myocardial electrodes
Splicing, myocardial electrodes
Stabilization, epicardial lead(s)
- Omit code:** Repositioning of temporary transvenous pacemaker system

1.HB.54.LA-JA of pacemaker/defibrillator leads using open [thoracotomy] approach

1.HB.55.^.^ Removal of device, epicardium

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Excludes: that with replacement of leads (see [1.HB.53.^.](#))

1.HB.55.LA-JA of pacemaker/defibrillator leads and open approach
1.HB.55.LA-JB of electrode (e.g. pacemaker, defibrillation lead) using laser (extraction) and open approach

Includes: Laser lead extraction, epicardial leads

Excludes: Transluminal insertion of laser for extraction of endocardial pacemaker/defibrillator lead (see [1.HD.55.^.](#))

1.HB.87.^.^ Excision partial, epicardium

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Epicardiectomy

1.HB.87.DA using endoscopic approach
1.HB.87.LA using open approach

1.HD.^^.^^ Therapeutic Interventions on the Endocardium**1.HD.53.^^ Implantation of internal device, endocardium****S** 5 **E** 42

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
E 42	Mandatory	Mandatory cardiac pacemaker leads	Extent	3	Three leads: into atrium, ventricle and coronary sinus
				A T	One lead into atrium
				A V	Two leads: into atrium and ventricle
				U	Other and unspecified (or unknown) number of leads
				V E	One lead into ventricle

Includes: Drug (steroid) eluting leads
that for upgrading an existing single chamber pacemaker to a dual chamber by adding an extra lead

Excludes: that done with initial insertion of pacemaker (see [1.HZ.53.^^](#))

Code Also: Pharmacotherapy delivered via drug eluting leads (see [1.HZ.35.^^](#))

Note: This code may also be used to identify the removal and subsequent replacement of endocardial leads. When used for this purpose it should be flagged as a revision using a status attribute.

1.HD.53.GR-JA of pacemaker/defibrillator leads using percutaneous [transvenous] approach

1.HD.54.^^ Management of internal device, endocardium**S** 4 **E** 22

1.HD.55.GQ-JB of electrode (e.g. pacemaker, defibrillation lead) by laser (extraction) using percutaneous transluminal (arterial) approach

Includes: Laser lead extraction, endocardial leads

1.HD.55.GR-JA of pacemaker/defibrillator leads using percutaneous (transvenous) approach

1.HH.^.^ Therapeutic Interventions on the Cardiac Conduction System

Includes: Atrioventricular node
Atrioventricular pathway
Sinoatrial node

1.HH.59.^.^ Destruction, cardiac conduction system**S** 15

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 15	Optional	Tx Status 9	Status	A	Abandoned after onset
				C	Converted (from endoscopic to open approach)
				R	Revision

Includes: Ablation, cardiac conduction system
Ablation, pulmonary vein
Ablation, supraventricular arrhythmogenic focus or pathway (e.g. Wolff Parkinson White, AV node re-entry)
Cardiac ablation performed with 2-D electrophysiological mapping (standard ablation)
Dissection, atrioventricular node fibres and pathways (e.g. for treatment of atrial fibrillation or flutter)
Isolation, pulmonary vein antrum [PVAI]
Maze procedure
that done along tendon of Todaro and around annulus of tricuspid valve to induce heart block
that done at pulmonary vein ostia to prevent atrial fibrillation

Excludes: Ablation of ventricular septum for end stage congestive heart failure, cardiomyopathy (see [1.HP.78.^.^](#))
Cardioversion or defibrillation (see [1.HZ.09.^.^](#))

Code Also: Any concomitant three dimensional (3-D) mapping (for complex ablation) (see [2.HZ.24.GP-KM](#))
Any robotic assisted telemanipulation of tools (see [7.SF.14.^.^](#))

Note: Identify any failed prior attempt at cardiac ablation by using the Status "Revision" attribute. Subsequent cardiac ablations become much more complex if there has been a prior failed attempt.

1.HH.59.^.^ Destruction, cardiac conduction system	open approach	endoscopic (thoracoscopic) approach	percutaneous transluminal (arterial) approach	percutaneous transluminal transseptal (venous) approach	percutaneous transcatheter (e.g. subxiphoid needle) approach

Includes:

Conduit from right ventricle to aorta
 Conduit, apical aortic
 Conduit, left ventricular aortic
 Connection from right ventricle to right atrium
 Creation, conduit between right ventricle and pulmonary artery [Rastelli procedure, Lecompte repair]
 Diversion, blood flow from right ventricle
 Excision of right ventricular muscle bundles when done to make room for the tunnel
 Repair, double outlet right ventricle
 Shunt, apico aortic
 Shunt, between apex of left ventricle and aorta
 Shunt, between right ventricle and [distal] pulmonary artery
 Shunt, left ventricle to aorta
 that with creation of intraventricular tunnel from ventricular septal defect to aorta [closure of the ventricular septal defect by tunnelling]
 Tunneling from left ventricle to aorta

Excludes:

that associated with total repair of truncus arteriosus (see [1.LA.84.^ ^](#))
 that done with simple repair of ventricular septal defect (see [1.LD.84.^ ^](#))

Code Also:

Any cardiopulmonary bypass (see [1.LZ.37.^ ^](#))
 Any takedown of systemic-to-pulmonary artery shunt [e.g. Blalock-Taussig] (see [1.IM.82.^ ^](#))

Note:

The Rastelli procedure involves the construction of an intracardiac tunnel that results in closure of the ventricular septal defect in such a way as to direct left ventricular outflow through the ventricular septal defect toward the aortic valve. Enlargement of a "restrictive" ventricular septal defect is necessary in up to 45% of patients. This maneuver requires resection of the infundibular septum. The connection between the left ventricle and the pulmonary artery is interrupted by division of the main pulmonary artery with suture closure of the proximal end or by patch closure of the pulmonary valve. The procedure is completed by connecting the right ventricle with the distal pulmonary arterial confluence with a valved extracardiac conduit, such as a pulmonary or aortic cryopreserved homograft.

1.HP.76.^Bypass, ventricle	using autograft	using homograft	using xenograft	using synthetic material [e.g. repair of double outlet right ventricle using single patch technique]	using combined sources of tissue [e.g. repair of double outlet right ventricle using double patch technique]

1.HP.78.^Repair by decreasing size, ventricle

S 9 **L** 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 9	Optional	Tx Status 4	Status	A	Abandoned after onset
				S	Staged
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Batista procedure [operation] (for end stage congestive heart failure)
 Diverticulectomy, ventricle
 Partial left ventriculectomy
 Plication, atrialized ventricle
 Ventriculoplasty, reduction

Excludes: Partial excision of ventricle for repair of congenital anomalies (see [1.HP.87.^](#))

Code Also: Any associated plication of right atrium (see [1.HM.78.^](#))
 Any concomitant coronary artery bypass grafting (see [1.IJ.76.^](#))
 Any concomitant valve replacement or repair (see specific procedure by site)

1.HP.78.GQ-X7	using percutaneous transluminal arterial approach and chemical cautery agent [e.g. ethanol] Includes: Transcoronary ablation of septal hypertrophy (TASH) Transcoronary ethanol septal ablation (TESA)
1.HP.78.LA	using open approach

1.HP.80.^ Repair, ventricle**S** 10 **L** 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 10	Optional	Tx Status 5	Status	A	Abandoned after onset
				R	Revision
				S	Staged
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Reconstruction, right ventricular outflow tract (without resection of infundibular septum)

Repair, right ventricular outflow tract with patch

Excludes: reduction ventriculoplasty (for end stage congestive heart failure) (see [1.HP.78.^](#))
that for total repair of tetralogy of Fallot (see [1.LD.84.^](#))
that with resection of ventricular muscle bundles (see [1.HP.87.^](#))

Code Also: Any excision with reconstruction, aortic valve (see [1.HV.90.^](#))
Any repair of pulmonary artery stenosis (see [1.IM.87.^](#))
Any repair of tricuspid valve (see [1.HS.^](#))

1.HP.80.LA using open approach without tissue
1.HP.80.LA-XX-A using open approach with autograft
1.HP.80.LA-XX-K using open approach with homograft
1.HP.80.LA-XX-L using open approach with xenograft [e.g. bovine pericardium]
1.HP.80.LA-XX-N using open approach with synthetic material
1.HP.80.LA-XX-Q using open approach with combined sources of tissue

1.HP.82.^ Reattachment, ventricle**S** 10 **L** 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 10	Optional	Tx Status 5	Status	A	Abandoned after onset
				R	Revision
				S	Staged
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Takedown of extracardiac conduit, right ventricle
Takedown of intraventricular tunnel, right ventricle

1.HP.82.LA-XX-A using open approach with autograft
1.HP.82.LA-XX-L using open approach with xenograft
1.HP.82.LA-XX-N using open approach with synthetic tissue
1.HP.82.LA-XX-Q using open approach with combined sources of tissue

1.HP.83.^ ^ Transfer, ventricle

S 5 **L** 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Cardiomyoplasty
Transfer, latissimus dorsi muscle to wrap around the left ventricle

1.HP.83.LA using open approach

1.HP.87.^ ^ Excision partial, ventricle

S 10 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 10	Optional	Tx Status 5	Status	A	Abandoned after onset
				R	Revision
				S	Staged
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Infundibulectomy, right ventricle
Myomectomy, ventricle
Myotomy, ventricle
Resection, anomalous ventricular muscle bundles
Resection, right ventricular muscle bundles with repair of ventricular outflow tract [partial correction of tetralogy of Fallot] that for subinfundibular pulmonary stenosis [double chambered right ventricle]
- Excludes:** Reduction ventriculoplasty (for end stage congestive heart failure, cardiomyopathy) (see [1.HP.78.^](#))
Simple repair of ventricular septal defect (see [1.HR.^.^](#))
that done as part of creation of conduit from right ventricle to pulmonary artery (see [1.HP.76.^](#))
that done as part of total repair of tetralogy of Fallot (see [1.LD.84.^](#))
Ventriculectomy for size reduction (see [1.HP.78.^](#))

1.HP.87.^ Excision partial, ventricle	no tissue used [e.g. suture alone]	using autograft	using combined sources of tissue	using homograft	using synthetic material	using xenograft
open approach	1.HP.87.LA	1.HP.87.LA-XX-A	1.HP.87.LA-XX-Q	1.HP.87.LA-XX-K	1.HP.87.LA-XX-N	1.HP.87.LA-XX-L
open approach and laser	1.HP.87.LA-AG	1.HP.87.LA-AG-A	1.HP.87.LA-AG-Q	1.HP.87.LA-AG-K	1.HP.87.LA-AG-N	1.HP.87.LA-AG-L

1.HR.^.^ Therapeutic Interventions on the Interventricular Septum

- Includes:** Ventricular septal

1.HR.71.^ Division, interventricular septum

S 9

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 9	Optional	Tx Status 4	Status	A	Abandoned after onset
				S	Staged

- Includes:** Creation, ventricular septal defect
Enlargement, ventricular septal defect

1.HR.71.LA using open approach
1.HR.71.ST using closed heart technique

1.HR.80.^ Repair, interventricular septum

S 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

- Includes:** Closure, ventricular septal defect
Correction, ventricular septal defect
Repair, interventricular septal defect
that with or without pledgetted sutures for reinforcement
Ventriculoplasty
- Excludes:** Reduction, ventriculoplasty for end stage congestive heart failure, cardiomyopathy (see [1.HP.78.^^](#))
Repair, atrioventricular canal (see [1.LC.84.^^](#))
Repair, endocardial cushion defect (see [1.LC.84.^^](#))
Repair, ventricular septal defect associated with valvular and atrial septal defects (see [1.LC.84.^^](#))
that done as part of total repair of tetralogy of Fallot (see [1.LD.84.^^](#))
that done by tunneling (see [1.HP.76.^^](#))
that done with bypass of right heart structures (see [1.HJ.76.^^](#))
that done with reconstruction, aorta with pulmonary artery (see [1.LA.84.^^](#))
- Code Also:** Any cardiopulmonary bypass (see [1.LZ.37.^^](#))

- 1.HR.80.GP-FL using percutaneous transluminal approach with double sided umbrella device [e.g. clamshell, VSD occluder, or double disc device]
1.HR.80.LA using open approach without tissue
1.HR.80.LA-XX-A using open approach with autograft
1.HR.80.LA-XX-L using open approach with xenograft [e.g. bovine pericardial patch]
1.HR.80.LA-XX-N using open approach with synthetic material
1.HR.80.LA-XX-Q using open approach with combined sources of tissue
1.HR.80.ST-FL using open approach with closed heart technique [transventricular] with double sided umbrella device [e.g. clamshell, VSD occluder, or double disc device]
- Includes:** Periventricular closure of ventricular septal defect
Transmyocardial closure of ventricular septal defect

1.HR.84.^^ Construction or reconstruction, interventricular septum

S 9

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 9	Optional	Tx Status 4	Status	A	Abandoned after onset
				S	Staged

- Includes:** Septation, single ventricle
that with fenestrated patch

- 1.HR.84.LA-XX-A using open approach with autograft
1.HR.84.LA-XX-K using open approach with homograft
1.HR.84.LA-XX-L using open approach with xenograft
1.HR.84.LA-XX-N using open approach with synthetic material
1.HR.84.LA-XX-Q using open approach with combined sources of tissue

1.HR.87.^.^ Excision partial, interventricular septum**S** 9

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 9	Optional	Tx Status 4	Status	A	Abandoned after onset
				S	Staged

Includes: Amputation of the apex of the ventricle and portions of the ventricular septum along with closure of the resultant defect

Code Also: Any cardiopulmonary bypass (see [1.LZ.37.^.^](#))
Any concomitant valve replacement (see Excision total with reconstruction, by valve site)
Any coronary artery bypass grafting (see [1.IJ.76.^.^](#))

1.HR.87.LA	using open approach without tissue
1.HR.87.LA-XX-A	using open approach with autograft
1.HR.87.LA-XX-N	using open approach with synthetic material
1.HR.87.LA-XX-Q	using open approach with combined sources of tissue

1.HS.^.^ Therapeutic Interventions on the Tricuspid Valve

Includes: Commissure, tricuspid valve
Right atrioventricular valve

Excludes: Annulus alone (see [1.HW.^.^](#))

1.HS.80.^.^ Repair, tricuspid valve**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Commissurotomy, tricuspid valve
Repair, paravalvular (prosthetic valve) leak
that for Ebstein's disease
that with detachment followed by repair
that with or without resection of leaflet of valve
Tricuspid valve replacement without excision of the native valve
Valvotomy, tricuspid
Valvuloplasty

Excludes: Tricuspid valve replacement with excision of the native valve (see [1.HS.90.^.^](#))

1.HS.80.^ ^ Repair, tricuspid valve	closed heart technique [transventricular]	open approach	percutaneous transluminal approach
using autograft [e.g. patching of leaflet with pericardial tissue]	—	1.HS.80.LA-XX-A	—
using balloon [e.g. balloon valvuloplasty]	—	—	1.HS.80.GP-BD Includes: <ul style="list-style-type: none"> • Percutaneous balloon valvuloplasty • that with percutaneous transluminal radiofrequency or laser assisted perforation of an atretic or stenotic valve with subsequent balloon dilation
using dilation device [e.g. expanding dilator]	1.HS.80.ST-BP Note: <ul style="list-style-type: none"> • Closed heart technique is usually reserved for neonates and infants. 	—	—
using prosthetic device [e.g. ring annuloplasty]	—	1.HS.80.LA-FE	1.HS.80.GP-FE Includes: <ul style="list-style-type: none"> • Percutaneous insertion of prosthesis [e.g. occluder device] for control of paravalvular leak • Reduction of tricuspid regurgitation by transluminal insertion of FORMA spacer device
using suture [e.g. annular plication, semicircular annuloplasty]	—	1.HS.80.LA	—

1.HS.90.^ ^ Excision total with reconstruction, tricuspid valve**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

- Includes:** Replacement with excision, tricuspid valve
- Excludes:** Repair, endocardial cushion defect (see [1.LC.84.^^](#))
 Repair, valvular defect associated with atrial and ventricular septal defects (see [1.LC.84.^^](#))
 Tricuspid valve replacement without excision of the native valve (see [1.HS.80.^^](#))
- Code Also:** Any cardiopulmonary bypass (see [1.LZ.37.^^](#))
 Any concomitant repair or replacement of other valve

1.HS.90.LA-CF	using open approach with mechanical valve [e.g. caged ball, tilting disc, St. Jude, Starr Edwards]
1.HS.90.LA-XX-K	using open approach with homograft [deceased donor valve]
1.HS.90.LA-XX-L	using open approach with xenograft [bovine or porcine valve]
	Includes: Carpentier Edwards valve

1.HT.^^.^^ Therapeutic Interventions on the Pulmonary Valve

- Includes:** Commissure, pulmonary valve
- Excludes:** Annulus alone (see [1.HW.^^.^^](#))
 Atrioventricular valve with inter-atrial septum and inter-ventricular septum (see [1.LC.^^.^^](#))
 Interventions associated with repair of endocardial cushion defect (see [1.LC.^^.^^](#))

1.HT.80.^^ Repair, pulmonary valve

S 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description

using xenograft tissue valve [e.g. bovine or porcine tissue]	1.HV.80.ST-XX-L Includes: <ul style="list-style-type: none"> that with concomitant balloon dilation to seat valve Transapical transcatheter aortic valve (valve in valve) implantation (TAVI) Note: <ul style="list-style-type: none"> Approach is made by intercostal (between the ribs) or subxiphoid incision and a catheter is introduced through the tip of the left ventricle (transapical) with advancement to the aortic valve for seating of a bovine or porcine valve within the existing (diseased) valve [e.g. Cribier Edwards stent valve] 	—	1.HV.80.GQ-XX-L Includes: <ul style="list-style-type: none"> that with concomitant (balloon) dilation to seat valve Transfemoral (transcatheter) aortic valve (valve in valve) implantation (TAVI) Note: <ul style="list-style-type: none"> Approach is made via catheterization of an artery (e.g. femoral, axillary) with advancement to the aortic valve for seating of a bovine or porcine valve within the existing (diseased) valve [e.g. Cribier Edwards stent valve] 	1.HV.80.GR-XX-L Includes: <ul style="list-style-type: none"> that with concomitant (balloon) dilation to seat valve Transseptal (transcatheter) (transvenous) aortic valve (valve in valve) implantation (TAVI) Note: <ul style="list-style-type: none"> Approach is made via catheterization of the femoral vein with advancement via a transseptal puncture, to the aortic valve for seating of a bovine or porcine valve within the existing (diseased) valve [e.g. Cribier Edwards stent valve]

1.HV.90.^ ^ Excision total with reconstruction, aortic valve

S 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Replacement with excision of aortic valve
Replacement, aortic valve

Excludes: Aortic valve replacement without excision of native valve (see [1.HV.80.^ ^](#))
David procedure (see [1.ID.87.^ ^](#))
Repair, endocardial cushion defect (see [1.LC.84.^ ^](#))
Repair, valvular defect associated with atrial and ventricular septal defects (see [1.LC.84.^ ^](#))
Valve sparing aortic root replacement (see [1.ID.87.^ ^](#))

Code Also: Any concomitant aortic root enlargement (see [1.ID.79.^^](#))
Any concomitant cardiopulmonary bypass (see [1.LZ.37.^^](#))
Any concomitant enlargement of annulus (see [1.HW.79.^^](#))
Any concomitant repair of pulmonary valve (see [1.HT.80.^^](#))
Any concomitant repair of the ventricular outflow tract (see [1.HP.80.^^](#))

Note: A Bentall procedure is the simultaneous replacement of the aortic valve, aortic root and (proximal) ascending aorta. A composite graft that includes a new valve (tissue or mechanical) and aorta (synthetic or tissue) is put in place. The coronary arteries are reimplanted into the graft. In valve sparing aortic root replacement [e.g. David Procedure], the aortic root is replaced but the native valve is "spared". Valve sparing procedures are captured at [1.ID.87.^^](#).

1.HV.90.^^ Excision total with reconstruction, aortic valve	with mechanical valve	with autograft tissue valve	with homograft tissue valve	with xenograft tissue valve [e.g. bovine or porcine tissue]

Insertion, heart biventricular pacemaker
that with drug (steroid) eluting lead(s)

Excludes: Temporary pacemakers with cutaneous pads for external transmediastinal pacing (see [1.HZ.37.^ ^](#))

Code Also: Pharmacotherapy delivered via drug (steroid) eluting pacemaker lead(s) (see [1.HZ.35.^ ^](#))

Note: Unipolar leads are usually used for ventricular pacing and bipolar leads for atrial pacing. The most common approach to permanent transvenous pacemaker implantation is the subclavian cannulation technique, although alternatively the cephalic or jugular veins may be used. When this method is used the leads are placed into the endocardium. The subxiphoid or thoracotomy approach is used for epicardial ventricular lead implantation in adults with difficult endocardial pacing problems and occasionally in children. Fixed rate (VOO mode) pacemakers are used very rarely.

A biventricular pacemaker is a type of implantable pacemaker designed to treat heart failure. It resynchronizes the pumping action of the left ventricle with that of the right ventricle. This type of pacing is called cardiac resynchronization therapy [CRT]. Biventricular pacemakers are manufactured as "stand-alone" devices with pacing capability only [CRT-P] or with a built-in implantable cardioverter/defibrillator [BiV-ICD or CRT-D]. Typically, transvenous leads are inserted into the right atrium, the right ventricle and the coronary sinus. Optimal placement of a lead into the coronary sinus may require a thoracotomy approach (open and transluminal approach combined).

Code Also: Any robotic assisted telemanipulation of tools (see [7.SF.14.^ ^](#))

1.HZ.87.BA	using endoscopic approach
1.HZ.87.LA	using open approach without tissue
1.HZ.87.LA-XX-A	using open approach with autograft
1.HZ.87.LA-XX-L	using open approach with xenograft [e.g. bovine]
1.HZ.87.LA-XX-N	using open approach with synthetic material
1.HZ.87.LA-XX-Q	using open approach with combined sources of tissue

Therapeutic Interventions on the Great Vessels (1ID - 1IS)

1.ID.^.^ Therapeutic Interventions on the Aorta NEC

- Includes:** Overlapping regions of thoracoabdominal aorta
Thoracic aorta: arch, ascending, descending
- Excludes:** Abdominal aorta (see [1.KA.^.^](#))
Aorta with pulmonary artery and coronary arteries (see [1.IF.^.^](#))
Aorta with pulmonary artery and interventricular septum (see [1.LA.^.^](#))

1.ID.50.^.^ Dilation, aorta NEC

S 5 **L** 98

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 98	Mandatory	Mandatory Aorta Regions	Location	A R	Aortic arch – involving or originating at aortic arch with or without any other regions of aorta
				A S	Ascending thoracic aorta only
				T H	Thoracic (descending) (thoracoabdominal) (overlapping regions) aorta

- Includes:** Angioplasty, thoracic (thoracoabdominal) aorta
Dilation, coarctation of thoracic (descending) aorta
- Excludes:** Angioplasty, abdominal aorta (see [1.KA.50.^.](#))
- Code Also:** Any endarterectomy, aorta NEC (see [1.ID.57.^.](#))
Any infusion of thrombolytic agent (see [1.KV.35.^.](#))
Pharmacotherapy delivered via drug eluting stent (see [1.KV.35.^.](#))
- Note:** Dilation performed for a re-coarctation of the aorta requires a status attribute to specify the revision.

1.ID.50.GQ-BD	using percutaneous transluminal (arterial) approach and balloon dilator
1.ID.50.GQ-OA	using percutaneous transluminal (arterial) approach and balloon dilator with (endovascular) stent (insertion)

1.ID.53.^ ^ Implantation of internal device, aorta NEC**S** 5 **L** 98

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 98	Mandatory	Mandatory Aorta Regions	Location	A R	Aortic arch – involving or originating at aortic arch with or without any other regions of aorta
				A S	Ascending thoracic aorta only
				T H	Thoracic (descending) (thoracoabdominal) (overlapping regions) aorta

1.ID.53.GQ-QL of intraaortic balloon using percutaneous transluminal (arterial) approach

Includes: Insertion, pulsation balloon

1.ID.53.LA-QL of intraaortic balloon using open approach

1.ID.55.^ ^ Removal of device, aorta NEC**S** 5 **L** 98

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 98	Mandatory	Mandatory Aorta Regions	Location	A R	Aortic arch – involving or originating at aortic arch with or without any other regions of aorta
				A S	Ascending thoracic aorta only
				T H	Thoracic (descending) (thoracoabdominal) (overlapping regions) aorta

1.ID.55.^ ^ Removal of device, aorta NEC	percutaneous transluminal (arterial) approach	open approach
of endovascular stent	1.ID.55.GQ-NR	1.ID.55.LA-NR
of intraaortic balloon pump	1.ID.55.GQ-QL	1.ID.55.LA-QL

1.ID.56.^.^ Removal of foreign body, aorta NEC**S** 4 **L** 98

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 98	Mandatory	Mandatory Aorta Regions	Location	A R	Aortic arch – involving or originating at aortic arch with or without any other regions of aorta
				A S	Ascending thoracic aorta only
				T H	Thoracic (descending) (thoracoabdominal) (overlapping regions) aorta

Includes: Percutaneous transluminal removal of totally intraluminal (intravascular) foreign body
that for removal of balloon fragment
that for removal of broken catheter (tip)
that for removal of intraluminal (intravascular) foreign body
that for removal of retained guide wire

Excludes: Removal of (therapeutic) device from blood vessel (see specified vessel)

1.ID.56.GQ-GX using percutaneous transluminal arterial approach and device NEC [e.g. pigtail snare, gooseneck snare, basket device]

1.ID.57.^.^ Extraction, aorta NEC**S** 5 **L** 98

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 98	Mandatory	Mandatory Aorta Regions	Location	A R	Aortic arch – involving or originating at aortic arch with or without any other regions of aorta
				A S	Ascending thoracic aorta only
				T H	Thoracic (descending) (thoracoabdominal) (overlapping regions) aorta

- Includes:** Endarterectomy, aorta NEC
Thrombectomy, aorta NEC
Thromboendarterectomy, aorta NEC
- Excludes:** Extraction, abdominal aorta (only) (see [1.KA.57.^](#))
- Code Also:** Any cardiopulmonary bypass (see [1.LZ.37.^](#))
Any concomitant stent angioplasty, aorta NEC (see [1.ID.50.^](#))
Any dilation, aorta NEC (see [1.ID.50.^](#))
Any infusion of thrombolytic agent (see [1.KV.35.^](#))

1.ID.57.GQ	using percutaneous transluminal (arterial) approach
1.ID.57.LA	using open approach
1.ID.57.LA-XX-A	using open approach and (widening) autograft
1.ID.57.LA-XX-K	using open approach and (widening) homograft
1.ID.57.LA-XX-L	using open approach and (widening) xenograft
1.ID.57.LA-XX-N	using open approach and (widening) synthetic patch graft

1.ID.74.^ Fixation, aorta NEC

S 15 **L** 99

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 15	Optional	Tx Status 9	Status	A	Abandoned after onset
				C	Converted (from endoscopic to open approach)
				R	Revision
L 99	Mandatory	Mandatory Region for Aortopexy	Location	A S	Ascending thoracic aorta only

- Includes:** Aortopexy, ascending aorta
that with resection of the thymus gland for operative access

1.ID.74.LA	using open approach
------------	---------------------

1.ID.76.^.^ Bypass, aorta NEC**S** 10 **L** 98

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 10	Optional	Tx Status 5	Status	A	Abandoned after onset
				R	Revision
				S	Staged
L 98	Mandatory	Mandatory Aorta Regions	Location	A R	Aortic arch – involving or originating at aortic arch with or without any other regions of aorta
				A S	Ascending thoracic aorta only
				T H	Thoracic (descending) (thoracoabdominal) (overlapping regions) aorta

Includes: Bypass graft originating at the aorta NEC
Shunt, originating at the aorta NEC
that for staged correction of interrupted arch of aorta

Excludes: Bypass originating at abdominal aorta (see [1.KA.76.^.^](#))
Shunts originating at subclavian artery (see [1.JK.76.^.^](#))

Code Also: Any cardiopulmonary bypass (see [1.LZ.37.^.^](#))
Any repair of ventricular septal defect (for interrupted aortic arch) (see [1.HR.80.^.^](#))
Ligation of patent ductus arteriosus (see [1.IM.51.^.^](#))
Pulmonary artery banding (see [1.IM.51.^.^](#))

Note: Select a location attribute to identify the site of origin of the bypass.

1.ID.76.^.^ Bypass, aorta NEC	using autograft	using synthetic material	using combined sources of tissue
bypass terminating in carotid artery [e.g. aortocarotid]	1.ID.76.MX-XX-A	1.ID.76.MX-XX-N	1.ID.76.MX-XX-Q
bypass terminating in subclavian vessel [e.g. aortosubclavian artery]	1.ID.76.MV-XX-A	1.ID.76.MV-XX-N	1.ID.76.MV-XX-Q
bypass terminating in descending aorta [e.g. bypass coarctation]	1.ID.76.NB-XX-A	1.ID.76.NB-XX-N	1.ID.76.NB-XX-Q
bypass terminating in pulmonary artery [e.g. central, Waterston, Potts Smith shunt]	1.ID.76.NA-XX-A	1.ID.76.NA-XX-N	1.ID.76.NA-XX-Q
bypass terminating in abdominal vessels [e.g. celiac, renal, mesenteric]	1.ID.76.MU-XX-A	1.ID.76.MU-XX-N	1.ID.76.MU-XX-Q
bypass terminating in upper limb vessels [e.g. aortobrachial]	1.ID.76.MY-XX-A	1.ID.76.MY-XX-N	1.ID.76.MY-XX-Q
bypass terminating in thoracic vessels [e.g. aortothoracic]	1.ID.76.NF-XX-A	1.ID.76.NF-XX-N	1.ID.76.NF-XX-Q
bypass terminating in lower limb vessels [e.g. thoracofemoral]	—	1.ID.76.MI-XX-N	1.ID.76.MI-XX-Q

1.ID.79.^ Repair by increasing size, aorta NEC**S** 10 **L** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 10	Optional	Tx Status 5	Status	A	Abandoned after onset
				R	Revision
				S	Staged
L 4	Mandatory	Mandatory Aorta Enlargement Regions	Location	A R	Aortic arch
				A S	Ascending aorta (root)

Includes: Aortic root enlargement (ascending aorta)
 Enlargement of aortic arch for repair of hypoplastic left heart syndrome with aortic atresia
 Norwood procedure, stage 1 (aortic arch)

Code Also: Any concomitant replacement, aortic valve (see [1.HV.90.^](#))
 Any concomitant systemic aorta to pulmonary artery shunt (see [1.ID.76.^](#))

1.ID.79.LA using open approach
 1.ID.79.LA-XX-K using open approach with homograft [e.g. pulmonary artery or aorta]
 1.ID.79.LA-XX-L using open approach with xenograft [e.g. bovine]
 1.ID.79.LA-XX-Q using open approach with combined sources of tissue [e.g. pericardium and homograft]

1.ID.80.^ Repair, aorta NEC**S** 65 **L** 98 **E** 74

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 65	Optional	Tx Status 19	Status	A	Abandoned after onset
				R	Revision
				S1	Stage 1 (includes single stage hybrid repair)
				S2	Stage 2 (completion repair)
L 98	Mandatory	Mandatory Aorta Regions	Location	A R	Aortic arch – involving or originating at aortic arch with or without any other regions of aorta
				A S	Ascending thoracic aorta only
				T H	Thoracic (descending) (thoracoabdominal) (overlapping regions) aorta
E 74	Optional	Graft Types	Extent	1	Single (simple tubular) graft
				2	Branched (bifurcated) (bilioac) (bifemoral) graft

- Includes:** Aneurysmorrhaphy, aorta NEC
Division, double aortic arch
Reinforcement by wrapping, (ascending) aorta
Reinforcement of thoracoabdominal aorta using suture
Repair, aneurysm of the aortic root, aortic arch, ascending and thoracic (thoracoabdominal) aorta
Repair, vascular ring anomalies of aortic arch
Takedown, aorta NEC with subsequent repair (use revision attribute)
that with surgical collapse of lung
- Excludes:** Aortic root enlargement alone (see [1.ID.79.^^](#))
Repair, abdominal aortic aneurysm (alone) (see [1.KA.80.^^](#))
Resection, ascending aorta with concomitant replacement of aortic valve with composite graft (e.g. Bentall procedure) (see [1.HV.90.^^](#))
- Code Also:** Any (branch) grafting repair of abdominal arteries (renal, celiac, mesenteric) (see [1.KE.80.^^](#))
Any cardiopulmonary bypass (see [1.LZ.37.^^](#))
Any extraction, aorta NEC (see [1.ID.57.^^](#))
Any stent insertion, abdominal arteries (see [1.KE.50.^^](#))
- Note:** Hybrid repairs of the aortic arch by open approach and of the thoracic (thoracoabdominal) aorta by endovascular approach must be coded separately. Please use the status attribute to indicate this is a single-stage hybrid repair.

- 1.ID.80.GQ-NR-N using percutaneous transluminal (arterial) approach and (endovascular) stent graft
Includes: Endovascular aneurysm repair (EVAR), thoraco(abdominal) aorta (aneurysm)
- 1.ID.80.GQ-NR-R using percutaneous transluminal (arterial) approach and fenestrated (endovascular) stent graft
Includes: Endovascular aneurysm repair (EVAR), thoraco(abdominal) aorta fenestrated juxtarenal graft
- 1.ID.80.LA using open approach and apposition technique (e.g. suture)
Includes: Direct anastomosis of interrupted arch of aorta
- 1.ID.80.LA-XX-A using open approach and autograft
1.ID.80.LA-XX-K using open approach and homograft
1.ID.80.LA-XX-N using open approach and synthetic material (e.g. elephant, snorkel graft)
1.ID.80.LA-XX-Q using open approach and combined sources of tissue

1.ID.86.^^ Closure of fistula, aorta NEC

S 10 **L** 98

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 10	Optional	Tx Status 5	Status	A	Abandoned after onset
				R	Revision
				S	Staged
L 98	Mandatory	Mandatory Aorta Regions	Location	A R	Aortic arch – involving or originating at aortic arch with or without any other regions of aorta
				A S	Ascending thoracic aorta only
				T H	Thoracic (descending) (thoracoabdominal) (overlapping regions) aorta

Includes: Repair, aortoenteric fistula
Repair, aortopulmonary window

Note: Select a location attribute to identify the site of origin of the fistula.

1.ID.86.^ ^ Closure of fistula, aorta NEC	using simple closure	using autograft	using combined sources of tissue	using homograft	using synthetic tissue
fistula terminating in abdominal cavity [e.g. aortoduodenal]	1.ID.86.ME	1.ID.86.ME-XX-A	1.ID.86.ME-XX-Q	1.ID.86.ME-XX-K	1.ID.86.ME-XX-N
fistula terminating in thoracic cavity [e.g. aortobronchial, aortopulmonary]	1.ID.86.MQ	1.ID.86.MQ-XX-A	1.ID.86.MQ-XX-Q	1.ID.86.MQ-XX-K	1.ID.86.MQ-XX-N

1.ID.87.^ ^ Excision partial, aorta NEC

S 10 **L** 98

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 10	Optional	Tx Status 5	Status	A	Abandoned after onset
				R	Revision
				S	Staged
L 98	Mandatory	Mandatory Aorta Regions	Location	A R	Aortic arch – involving or originating at aortic arch with or without any other regions of aorta
				A S	Ascending thoracic aorta only
				T H	Thoracic (descending) (thoracoabdominal) (overlapping regions) aorta

Includes:	Partial excision, aorta NEC with reimplantation of adjoining vessels into graft Partial excision, ascending aorta with reimplantation of coronary arteries into graft Resection, (arch) (ascending) (descending) thoracic aorta with replacement Resection, coarctation of (descending) thoracic aorta
Excludes:	Endarterectomy, aorta NEC alone (see 1.ID.57.^) Resection, abdominal aorta with replacement (see 1.KA.87.^) Resection, ascending aorta with concomitant replacement of aortic valve with composite graft [e.g. Bentall procedure] (see 1.HV.90.^)
Code Also:	Any cardiopulmonary bypass (see 1.LZ.37.^) Any concomitant coronary artery bypass grafting (see 1.IJ.76.^) Any ligation of patent ductus arteriosus (see 1.IM.51.^)
1.ID.87.LA	using open approach with end to end anastomosis
1.ID.87.LA-XX-A	using open approach with autograft
1.ID.87.LA-XX-K	using open approach with homograft
1.ID.87.LA-XX-L	using open approach with xenograft [e.g. bovine pericardial patch]
1.ID.87.LA-XX-N	using open approach with synthetic material [e.g. Dacron patch] Includes: David procedure, ascending aorta Valve sparing Bentall procedure, ascending aorta
1.ID.87.LA-XX-Q	using open approach with combined sources of tissue Includes: Resection with patch thoracic aortoplasty and subclavian flap

1.IF.^.^ Therapeutic Interventions on the Aorta with Pulmonary Artery and Coronary Arteries

Excludes:	Aorta alone (see 1.ID.^.^) Coronary arteries alone (see 1.IJ.^.^) Pulmonary artery alone (see 1.IM.^.^)
------------------	--

1.IF.83.^ Transfer, aorta with pulmonary artery and coronary arteries

S⁹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 9	Optional	Tx Status 4	Status	A	Abandoned after onset
				S	Staged

Includes:	Arterial switch operation [Jatene] Correction, (anatomical) total transposition of great arteries Excision of the thymus Excision, coronary ostia Ligation of patent ductus arteriosus Reimplantation of coronary arteries into pulmonary artery Switching, great arteries that with or without aortic arch reconstruction
Excludes:	Atrial switching procedure (see 1.HN.87.^^) [Mustard procedure] or septal flap technique [Senning procedure] (see 1.HN.87.^^) Creation of shunt between right ventricle and pulmonary artery [Rastelli procedure] (see 1.HP.76.^^) Physiological correction by redirection of blood flow by baffle operation
Code Also:	Any cardiopulmonary bypass (see 1.LZ.37.^^) Any repair of associated ventricular septal defect (see 1.HR.80.^^)
1.IF.83.LA	using open approach

1.IJ.^^.^^ Therapeutic Interventions on the Coronary Arteries

Includes: Coronary arteries (right or left) and its tributaries

1.IJ.26.^^ Brachytherapy, coronary arteries

S 35

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 35	Optional	Implant Status	Status	P M	Permanent implant – Radioactive source left in place permanently
				T M	Temporary implant – Radioactive source removed after course of treatment is complete

Includes: Endocurietherapy, coronary arteries
Implantation of radioactive material, coronary arteries
Intravascular brachytherapy, coronary artery

Code Also: any associated angioplasty, coronary arteries (see [1.IJ.50.^^](#))

1.IJ.26.GQ using percutaneous transluminal arterial approach

1.IJ.27.^^ Radiation, coronary arteries

Includes: Teletherapy, coronary arteries
Therapy, radiation [radiotherapy], coronary arteries

1.IJ.27.JA using external beam

1.IJ.50.^ Dilation, coronary arteries**S** 62 **E** 67

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 62	Mandatory	Mandatory PCI 3	Status	A	Abandoned
				D1	Other PCI for STEMI
				N	Primary PCI for STEMI
				O P	Other PCI
				P	Elective PCI
				U N	Unknown
				U R	Urgent PCI for NSTEMI or unstable angina
E 67	Mandatory	Mandatory Coronary Arteries 2	Extent	D A	Bypass graft with any native artery vessel
				D B	Bypass graft alone (without native artery vessel)
				D C	Left main artery with LAD and/or Cx and/or RCA
				D D	Left main artery alone (without LAD or Cx or RCA)
				D E	3 vessels - LAD and Cx and RCA
				D F	2 vessels - 2 of the following: LAD, Cx, RCA
				D G	1 vessel - LAD or Cx or RCA
				U N	Unknown

Includes: Angioplasty, coronary artery [PTCA]
 Angioplasty, cutting balloon
 Angioplasty, laser balloon
 Dilation, previously placed coronary artery bypass graft
 Intracoronary sonotherapy
 Intravascular sonotherapy
 that using embolic protection device/filter wire (to capture dislodged plaque)
 that with atherectomy
 that with thrombectomy
 Ultrasonic angioplasty

Excludes: Coronary artery atherectomy alone (see [1.IJ.57.^](#))
 Coronary artery endarterectomy alone (see [1.IJ.57.^](#))
 Diagnostic intravascular ultrasound [IVUS] (see [3.IJ.30.^](#))
 Mechanical thrombectomy of coronary artery alone (see [1.IJ.57.^](#))

Code Also: Any coronary angiography (see [3.IP.10.^](#))
 Any infusion or injection of thrombolytic agent directly into coronary artery (see [1.IL.35.^](#))
 Any intravenous infusion of thrombolytic agent (see [1.ZZ.35.^](#))
 Pharmacotherapy delivered via drug eluting stent or balloon (see [1.IL.35.^](#))

1.IJ.50.^.^ Dilation, coronary arteries	percutaneous transluminal approach [e.g. with angioplasty alone]	percutaneous transluminal approach with thrombectomy	percutaneous transluminal approach with atherectomy [e.g. rotational, directional, extraction catheter, laser]
with (endovascular) stent insertion			
using (endovascular) stent only	1.IJ.50.GQ-NR Includes: • Direct stenting without predilation, (lesion of) coronary artery	—	—
using balloon or cutting balloon dilator with (endovascular) stent	1.IJ.50.GQ-OA Includes: • Coronary angioplasty balloon dilation with stent insertion	1.IJ.50.GU-OA Includes: • Thrombectomy with coronary angioplasty balloon dilation with stent insertion	1.IJ.50.GT-OA Includes: • Atherectomy (any type) with coronary angioplasty balloon dilation with stent insertion
using laser (and balloon) dilator with (endovascular) stent	1.IJ.50.GQ-OB Includes: • Coronary laser angioplasty balloon dilation with stent insertion	1.IJ.50.GU-OB Includes: • Thrombectomy with coronary laser angioplasty balloon dilation with stent insertion	1.IJ.50.GT-OB Includes: • Atherectomy (any type) with coronary laser angioplasty balloon dilation with stent insertion
using ultrasound (and balloon) dilator with (endovascular) stent	1.IJ.50.GQ-OE Includes: • Coronary ultrasonic angioplasty balloon dilation with stent insertion	1.IJ.50.GU-OE Includes: • Thrombectomy with coronary ultrasonic angioplasty balloon dilation with stent insertion	1.IJ.50.GT-OE Includes: • Atherectomy (any type) with coronary ultrasonic angioplasty balloon dilation with stent insertion
without stent insertion			
using balloon or cutting balloon dilator	1.IJ.50.GQ-BD Includes: • Coronary angioplasty balloon dilation	1.IJ.50.GU-BD Includes: • Thrombectomy with coronary angioplasty balloon dilation	1.IJ.50.GT-BD Includes: • Atherectomy (any type) with coronary angioplasty balloon dilation
using laser (and balloon) dilator	1.IJ.50.GQ-BF Includes: • Coronary laser angioplasty balloon dilation	1.IJ.50.GU-BF Includes: • Thrombectomy with coronary laser angioplasty balloon dilation	1.IJ.50.GT-BF Includes: • Atherectomy (any type) with coronary laser angioplasty balloon dilation
using ultrasound (and balloon) dilator	1.IJ.50.GQ-OD Includes: • Coronary ultrasonic angioplasty balloon dilation	1.IJ.50.GU-OD Includes: • Thrombectomy with coronary ultrasonic angioplasty balloon dilation	1.IJ.50.GT-OD Includes: • Atherectomy (any type) with coronary ultrasonic angioplasty balloon dilation

1.IJ.55.^ ^ Removal of device, coronary arteries**S** ⁴ **E** ⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
E 4	Mandatory	Mandatory Coronary arteries	Extent	1	One coronary artery
				2	Two coronary arteries
				3	Three coronary arteries
				4	Four coronary arteries
				5	Five coronary arteries
				6	Six coronary arteries
				D	More than six coronary arteries

Excludes: that for replacement of stent (see specific intervention)

1.IJ.55.GQ-NR of endovascular stent using percutaneous transluminal approach

1.IJ.55.LA-NR of endovascular stent using open approach

1.IJ.57.^ ^ Extraction, coronary arteries**S** ¹⁸ **E** ⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description

1.IN.83.LA-XX-L using open approach with xenograft
1.IN.83.LA-XX-N using open approach with synthetic material

1.IN.84.^ Construction or reconstruction, pulmonary vein**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

- Includes:** Correction, one stage, total anomalous pulmonary venous connection [TAPVC] that with atrial septal defect
that with ligation of patent ductus arteriosus
- Excludes:** Repair of partial anomalous venous connection (see specific procedure)
- Code Also:** Any cardiopulmonary bypass (see [1.LZ.37.^^](#))
- Note:** TAPVC is an anomaly in which there is no connection between any pulmonary vein and the left atrium. All pulmonary veins connect to either the right atrium or one of its tributaries with different locations of the connections defined as supracardiac, cardiac, infracardiac or mixed. The individual right and left pulmonary veins nearly always join to form a common pulmonary venous confluence. An atrial septal defect or patent foramen ovale is almost always present. Intent of repair of all types of TAPVR is to return blood flow to the left atrium where it can then be pumped to the body

				S E	Superior vena cava

Excludes: that with extraction (see [1.IS.57.^ ^](#))**Code Also:** Any infusion of thrombolytic agent (see [1.KX.35.^ ^](#))

1.IS.50.GR-BD using percutaneous transluminal approach and balloon dilator

1.IS.50.GR-OA using percutaneous transluminal venous approach balloon dilator with (endovascular) stent (insertion)

1.IS.50.LA-BP using open approach and other dilating device [e.g. venotomy]

1.IS.51.^ ^ Occlusion, vena cava (superior and inferior)**S** 5 **L** 9

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 9	Optional	Vena cava	Location	I F	Inferior vena cava
				S E	Superior vena cava

Includes: Insertion, sieve, vena cava
Interruption, vena cava
Ligation, vena cava
Plication, vena cava**Code Also:** Any cardiopulmonary bypass (see [1.LZ.37.^ ^](#))
Any concomitant resection of interatrial septum [e.g. Mustard or Senning procedure] (see [1.HN.87.^ ^](#))

1.IS.51.^ ^ Occlusion, vena cava (superior and inferior)	using filtering device	using suture [e.g. ligation, plication]	using umbrella device
open approach	—	1.IS.51.LA	—
percutaneous transluminal approach	1.IS.51.GR-KA	—	1.IS.51.GR-FK

1.IS.53.^ Implantation of internal device, vena cava (superior and inferior)**S** 5 **L** 97

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 97	Mandatory	Mandatory Venous Access Site	Location	F E	Femoral
				J U	Jugular
				P I	Peripheral - Includes: veins of the antecubital fossa, (e.g. brachial, cephalic, or basilic), greater or lesser saphenous vein, posterior auricular vein
				S C	Subclavian
				U M	Umbilical
				U N	Unknown

Includes: Cannulation, vena cava
 Insertion, central venous (vascular) access device [CVAD]
 Insertion, central venous catheter [CVC]
 Insertion, central venous line
 Insertion, permanent right atrial catheter [PRAC] (e.g. Broviac, Hickman, Cook)
 Peripherally inserted central catheter [PICC]
 that for administration of drugs, fluids, total parenteral nutrition [TPN] or hemodialysis
 that for monitoring of central venous pressure

Excludes: Insertion of simple intravenous [IV] line for short term peripheral venous access (e.g. ambulatory antibiotic therapy) (see [1.KX.53.^](#))
 Umbilical arterial catheterization (see [2.ZZ.13.^](#))

Code Also: Any administration of total parenteral nutrition [TPN] (see [1.LZ.35.^](#))
 Any chemotherapy for neoplasm (see [1.ZZ.35.^](#))
 Any hemodialysis (see [1.PZ.21.^](#))
 Any resuscitative intervention (see [1.HZ.09.^](#), [1.HZ.30.^](#))

1.IS.53.GR-LF non-tunnelled central venous catheter using percutaneous transluminal venous approach

Includes: Insertion of centrally inserted central catheter [CICC] NOS
 Insertion of peripherally inserted central catheter [PICC]

1.IS.53.HN-LF tunnelled central venous catheter using percutaneous tunnelling technique (e.g. Hickman, Broviac, Leonard)

1.IS.53.LA-LF totally implanted central venous catheter (with injection port) (e.g. Port-A-Cath) using open approach

Includes: Insertion, totally implanted venous access device [TIVAD]

Note: Port may be peripheral or central but tip lies in vena cava

1.IS.54.^ ^ Management of internal device, vena cava (superior and inferior)**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Cleansing and dressing of entry site
 Irrigation [flushing], central venous catheter
 Removal of intraluminal obstruction from central venous catheter [e.g. clot]
 Repositioning, central venous catheter

1.IS.54.GR-GX of central venous catheter using percutaneous transluminal approach and device NEC (for fibrin sheath stripping)
 1.IS.54.HA-LF of central venous catheter using percutaneous (needle) approach (for irrigation [flushing])
 1.IS.54.JA-LF of central venous catheter using external approach (for adjustment, cleansing)

1.IS.55.^ ^ Removal of device, vena cava (superior and inferior)**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

1.IS.55.GR-FK of umbrella device using percutaneous transluminal approach
 1.IS.55.GR-KA of filtering device using percutaneous transluminal approach
 1.IS.55.GR-LF of central venous catheter using percutaneous transluminal approach
 1.IS.55.GR-NR of endovascular stent using percutaneous transluminal approach
 1.IS.55.LA-KA of filtering device using open approach
Includes: Sieve, vena cava
 1.IS.55.LA-LF of central venous catheter using open approach

1.IS.56.^ ^ Removal of foreign body, vena cava (superior and inferior)

Includes: Percutaneous transluminal removal of totally intraluminal (intravascular) foreign body
 that for removal of balloon fragment
 that for removal of broken catheter (tip)
 that for removal of intraluminal (intravascular) foreign body
 that for removal of retained guide wire

Excludes: Removal of (therapeutic) device from blood vessel (see specified vessel)

1.IS.56.GR-GX using percutaneous transluminal approach and device NEC [e.g. pigtail snare, gooseneck snare, basket device]

1.IS.57.^ ^ Extraction, vena cava (superior and inferior)**S** 5 **L** 9

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 9	Optional	Vena cava	Location	I F	Inferior vena cava
				S E	Superior vena cava

Excludes: that with partial excision (see [1.IS.87.^ ^](#))**Code Also:** Any infusion of thrombolytic agent (see [1.KX.35.^ ^](#))

1.IS.57.^ ^ Extraction, vena cava (superior and inferior)	open approach [e.g. venotomy]	open approach with autograft [e.g. vein patch]	percutaneous venous approach
using atherectomy device (e.g. rotoablator)	—	—	1.IS.57.GR-FV
using balloon catheter	—	—	1.IS.57.GR-BD
using device NEC	1.IS.57.LA-GX	1.IS.57.LA-GX-A	—

1.IS.58.^ ^ Procurement, vena cava (superior and inferior)

1.IS.58.LA using open approach

1.IS.76.^ ^ Bypass, vena cava (superior and inferior)**S** 10 **L** 9 **E** 54

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 10	Optional	Tx Status 5	Status	A	Abandoned after onset
				R	Revision
				S	Staged
L 9	Optional	Vena cava	Location	I F	Inferior vena cava
				S E	Superior vena cava
E 54	Optional	Multidirectional	Extent	1	Unidirectional
				2	Bidirectional

- Includes:** Shunt, cavosplenoatrial
Shunt, originating in the vena cava
- Excludes:** Caval-mesenteric (see [1.KQ.76.^^](#))
Mesocaval shunt (see [1.KQ.76.^^](#))
Portacaval shunt (see [1.KQ.76.^^](#))

1.IS.76.^^ Bypass, vena cava (superior and inferior)	by direct anastomosis [without tissue]	using autograft	using combined sources of tissue	using homograft	using synthetic material
bypass terminating in pulmonary artery [e.g. cavopulmonary]	1.IS.76.NA Includes: • Classical [unidirectional] Glenn shunt for flow to one lung. Note: • When this procedure is done for flow to both lungs [cavobipulmonary] use the extent attribute "bidirectional", if desired.	1.IS.76.NA-XX-A Includes: • Classical [unidirectional] Glenn shunt for flow to one lung. Note: • When this procedure is done for flow to both lungs [cavobipulmonary] use the extent attribute "bidirectional", if desired.	1.IS.76.NA-XX-Q Includes: • Classical [unidirectional] Glenn shunt for flow to one lung. Note: • When this procedure is done for flow to both lungs [cavobipulmonary] use the extent attribute "bidirectional", if desired.	1.IS.76.NA-XX-K Includes: • Classical [unidirectional] Glenn shunt for flow to one lung. Note: • When this procedure is done for flow to both lungs [bidirectional] [cavobipulmonary] use location attribute for bilaterality.	1.IS.76.NA-XX-N Includes: • Classical [unidirectional] Glenn shunt for flow to one lung. Note: • When this procedure is done for flow to both lungs [cavobipulmonary] use the extent attribute "bidirectional", if desired.
bypass terminating in right atrium	1.IS.76.MQ	1.IS.76.MQ-XX-A	1.IS.76.MQ-XX-Q	1.IS.76.MQ-XX-K	1.IS.76.MQ-XX-N

1.IS.80.^^ Repair, vena cava (superior and inferior)

 Removal of atheromatous plaque, brachiocephalic artery
 that with patch graft to widen vessel lumen following brachiocephalic endarterectomy

Excludes: that with partial excision (see [1.JJ.87.^ ^](#))

Code Also: Any concomitant stent angioplasty, brachiocephalic artery (see [1.JJ.50.^ ^](#))
 Any dilation, brachiocephalic artery (see [1.JJ.50.^ ^](#))
 Any infusion of thrombolytic agent (see [1.KV.35.^ ^](#))

1.JJ.57.GQ using percutaneous transluminal (arterial) approach
 1.JJ.57.LA using open approach
 1.JJ.57.LA-XX-A using open approach and (widening) autograft
 1.JJ.57.LA-XX-K using open approach and (widening) homograft
 1.JJ.57.LA-XX-L using open approach and (widening) xenograft
 1.JJ.57.LA-XX-N using open approach and (widening) synthetic patch graft

1.JJ.58.^ ^ Procurement, brachiocephalic arteries**S** 4 **L** 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

1.JJ.58.LA using open approach

1.JJ.76.^ ^ Bypass, brachiocephalic arteries**S** 5 **L** 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes:

Shunt, Blalock Taussig (innominate pulmonary artery)

Shunt, originating in brachiocephalic artery (e.g. systemic to pulmonary artery)

Note:

A classical Blalock-Taussig is done with autologous tissue and becomes a "modified" Blalock-Taussig shunt when done with synthetic material.

Omit code:When artery is detached and resituated in graft as part of an aortic arch aneurysm repair (see [1.ID.80.^ ^](#)) or dissection excision (see [1.ID.87.^ ^](#)).

1.JJ.76.^ ^ Bypass, brachiocephalic arteries	using autograft [e.g. saphenous vein]	using combined sources of tissue	using homograft	using synthetic tissue
bypass terminating at pulmonary artery	1.JJ.76.NA-XX-A	1.JJ.76.NA-XX-Q	1.JJ.76.NA-XX-K	1.JJ.76.NA-XX-N
bypass terminating at aorta	1.JJ.76.NB-XX-A	1.JJ.76.NB-XX-Q	1.JJ.76.NB-XX-K	1.JJ.76.NB-XX-N

1.JJ.80.^ ^ Repair, brachiocephalic arteries**S** ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Aneurysmorrhaphy**Code Also:** Procurement of vessels

1.JJ.80.LA	using open approach without tissue [e.g. direct repair or end to end anastomosis]
1.JJ.80.LA-XX-A	using open approach with autograft
1.JJ.80.LA-XX-K	using open approach with homograft
1.JJ.80.LA-XX-N	using open approach with synthetic material
1.JJ.80.LA-XX-Q	using open approach with combined sources of tissue

1.JJ.83.^ ^ Transfer, brachiocephalic arteries**S** ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Transposition of arterial sling, brachiocephalic artery
Transposition, anomalous brachiocephalic trunk

1.JJ.83.LA	using open approach
------------	---------------------

1.JJ.87.^.^ Excision partial, brachiocephalic arteries**S** 4 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: that with or without extraction

1.JJ.87.LA	using open approach without tissue [e.g. direct repair or end to end anastomosis]
1.JJ.87.LA-XX-A	using open approach with autograft
1.JJ.87.LA-XX-K	using open approach with homograft
1.JJ.87.LA-XX-N	using open approach with synthetic material
1.JJ.87.LA-XX-Q	using open approach with combined sources of tissue

1.JK.^.^ Therapeutic Interventions on the Subclavian Artery**1.JK.50.^.^ Dilation, subclavian artery****S** 5 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Code Also: Any endarterectomy, subclavian artery (see [1.JK.57.^.^](#))
Any infusion of thrombolytic agent (see [1.KV.35.^.^](#))
Pharmacotherapy delivered via drug eluting stent (see [1.KV.35.^.^](#))

1.JK.50.GQ-BD	using percutaneous transluminal approach and balloon dilator
1.JK.50.GQ-BF	using percutaneous transluminal approach with laser and balloon dilator
1.JK.50.GQ-BP	using percutaneous transluminal approach and dilating device NEC
1.JK.50.GQ-OA	using percutaneous transluminal approach balloon dilator with (endovascular) stent (insertion)
1.JK.50.LA-BP	using open approach and dilating device NEC

1.JK.51.^ ^ Occlusion, subclavian artery**S** 5 **L** 2 **E** 53

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)
E 53	Mandatory	Mandatory Coils	Extent	0	Not applicable (no coil used)
				01	One coil
				02	Two coils
				03	Three coils
				04	Four coils
				05	Five coils
				06	Six coils
				07	Seven coils
				08	Eight coils
				09	Nine coils
				10	Ten coils
				G	More than ten coils (11 - 20)
				H	More than twenty coils
				U	Unspecified

Includes: Ligation (primary), subclavian artery (for aneurysm)

1.JK.51.GQ-GE	using percutaneous transluminal approach and [detachable] coil(s)
1.JK.51.GQ-GF	using percutaneous transluminal approach and vascular [nitinol mesh] plug
1.JK.51.LA	using open approach

1.JK.55.^ ^ Removal of device, subclavian artery**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

1.JK.55.GQ-NR of endovascular stent using percutaneous transluminal approach
 1.JK.55.LA-NR of endovascular stent using open approach

1.JK.56.^ ^ Removal of foreign body, subclavian artery

Includes: Percutaneous transluminal removal of totally intraluminal (intravascular) foreign body
 that for removal of balloon fragment
 that for removal of broken catheter (tip)
 that for removal of intraluminal (intravascular) foreign body
 that for removal of retained guide wire

Excludes: Removal of (therapeutic) device from blood vessel (see specified vessel)

1.JK.56.GQ-GX using percutaneous transluminal approach and device NEC [e.g. pigtail snare, gooseneck snare, basket device]

1.JK.57.^ ^ Extraction, subclavian artery**S** ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Arteriothrombectomy, subclavian artery
Declotting (graft)
Removal of atheromatous plaque, subclavian artery
that with patch graft to widen vessel lumen following subclavian endarterectomy
- Excludes:** that with partial excision (see [1.JK.87.^](#))
- Code Also:** Any concomitant stent angioplasty, subclavian artery (see [1.JK.50.^](#))
Any dilation, subclavian artery (see [1.JK.50.^](#))
Any infusion of thrombolytic agent (see [1.KV.35.^](#))

1.JK.57.GQ	using percutaneous transluminal (arterial) approach
1.JK.57.LA	using open approach
1.JK.57.LA-XX-A	using open approach and (widening) autograft
1.JK.57.LA-XX-K	using open approach and (widening) homograft
1.JK.57.LA-XX-L	using open approach and (widening) xenograft
1.JK.57.LA-XX-N	using open approach and (widening) synthetic patch graft

1.JK.58.^ Procurement, subclavian artery**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

1.JK.58.LA using open approach

1.JK.76.^ Bypass, subclavian artery**S** ¹⁰ **L** ¹²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 10	Optional	Tx Status 5	Status	A	Abandoned after onset
				R	Revision
				S	Staged
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Shunt, Blalock Park
Shunt, Blalock Taussig (subclavian pulmonary artery)
Shunt, left to right (when originating at subclavian artery)
- Excludes:** Systemic-to-pulmonary artery shunt originating at aorta (see [1.ID.76.^^](#))
- Note:** A classical Blalock-Taussig is done with autologous tissue and becomes a "modified" Blalock-Taussig shunt when done with synthetic material.
- Omit code:** When artery is detached and resituated in graft as part of an aortic arch aneurysm repair (see [1.ID.80.^^](#)) or dissection excision (see [1.ID.87.^^](#)).

1.JK.76.^^ Bypass, subclavian artery	using autograft	using synthetic material
bypass terminating in (descending) aorta [e.g. Blalock Park]	1.JK.76.NB-XX-A	1.JK.76.NB-XX-N
bypass terminating in pulmonary artery [e.g. Blalock Taussig]	1.JK.76.NA-XX-A	1.JK.76.NA-XX-N
bypass terminating in subclavian artery [e.g. subclavian]	1.JK.76.MV-XX-A	1.JK.76.MV-XX-N
bypass terminating in artery of arm	1.JK.76.MY-XX-A	1.JK.76.MY-XX-N

1.JK.80.^^ Repair, subclavian artery

S 5 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Aneurysmorrhaphy
- Excludes:** that with partial excision (see [1.JK.87.^^](#))

1.JK.80.GQ-NR-N	using percutaneous transluminal approach and (endovascular) stent with synthetic tissue (e.g. stent graft)
1.JK.80.LA	using open approach without tissue [e.g. direct repair or end to end anastomosis]
1.JK.80.LA-XX-A	using open approach with autograft
1.JK.80.LA-XX-K	using open approach with homograft
1.JK.80.LA-XX-N	using open approach with synthetic material
1.JK.80.LA-XX-Q	using open approach with combined sources of tissue

1.JK.87.^.^ Excision partial, subclavian artery**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Aneurysmectomy
that with excision of the first rib or cervical rib and division of scalenus anterior muscle
that with or without extraction

1.JK.87.^.^ Excision partial, subclavian artery	using autograft	using synthetic material	with direct repair [without tissue]
open approach	1.JK.87.LA-XX-A	1.JK.87.LA-XX-N	1.JK.87.LA
open approach with cervical sympathectomy	1.JK.87.WK-XX-A	1.JK.87.WK-XX-N	1.JK.87.WK

1.JL.^.^.^ Therapeutic Interventions on the Internal Mammary Artery

Includes: Internal thoracic artery

1.JL.50.^.^ Dilation, internal mammary artery**S** ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Code Also: Any endarterectomy, internal mammary artery (see [1.JL.57.^^](#))
 Any infusion of thrombolytic agent (see [1.KV.35.^^](#))
 Pharmacotherapy delivered via drug-eluting stent (see [1.KV.35.^^](#))

1.JL.50.GQ-BD	using percutaneous transluminal approach and balloon dilator
1.JL.50.GQ-BF	using percutaneous transluminal approach with laser and balloon dilator
1.JL.50.GQ-BP	using percutaneous transluminal approach and dilating device NEC
1.JL.50.GQ-OA	using percutaneous transluminal approach balloon dilator with (endovascular) stent (insertion)
1.JL.50.LA-BP	using open approach and dilating device NEC

1.JL.51.^^ Occlusion, internal mammary artery

S 5 **L** 2 **E** 53

				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Angioplasty, axillary artery
Angioplasty, brachial artery

Code Also: Any endarterectomy, arteries of arm NEC (see [1.JM.57.^](#))
Pharmacotherapy delivered via drug eluting stent (see [1.KV.35.^](#))

1.JM.50.GQ-BD using percutaneous transluminal approach and balloon dilator
1.JM.50.GQ-BP using percutaneous transluminal approach and dilating device NEC
1.JM.50.GQ-OA using percutaneous transluminal approach and balloon dilator with (endovascular) stent

1.JM.51.^ Occlusion, arteries of arm NEC**S** 5 **L** 2 **E** 53

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 53	Mandatory	Mandatory Coils	Extent	0	Not applicable (no coil used)
				01	One coil
				02	Two coils
				03	Three coils
				04	Four coils
				05	Five coils
				06	Six coils
				07	Seven coils
				08	Eight coils
				09	Nine coils
				10	Ten coils
				G	More than ten coils (11 - 20)
				H	More than twenty coils
				U	Unspecified

Includes: Ligation arterial limb of AV fistula
 Ligation, upper limb arteries (for aneurysm)
 Plication, upper limb arteries (for emboli)

1.JM.51.^ Occlusion, arteries of arm NEC	open approach	percutaneous transluminal approach	external approach with pressure [compression] technique
using (detachable) coils	—	1.JM.51.GQ-GE	—
using vascular [nitinol mesh] plug	—	1.JM.51.GQ-GF	—
using other synthetic material (e.g. gelfoam, microspheres, polystyrene, polyvinyl alcohol, contour particles)	—	1.JM.51.GQ-W0	—
using direct suture	1.JM.51.LA	—	—
using fibrin glue	1.JM.51.LA-W3	1.JM.51.GQ-W3	—
using suture with sympathectomy	1.JM.51.WK	—	—
using device NEC	—	—	1.JM.51.JN-GX

1.JM.56.^ ^ Removal of foreign body, arteries of arm NEC

Includes: Percutaneous transluminal removal of totally intraluminal (intravascular) foreign body
 that for removal of balloon fragment
 that for removal of broken catheter (tip)
 that for removal of intraluminal (intravascular) foreign body
 that for removal of retained guide wire

Excludes: Removal of (therapeutic) device from blood vessel (see specified vessel)

1.JM.56.GQ-GX using percutaneous transluminal approach and device NEC [e.g. pigtail snare, gooseneck snare, basket device]

1.JM.57.^ ^ Extraction, arteries of arm NEC**S** ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description

1.JW.^.^ Therapeutic Interventions on the Intracranial Vessels

Includes: Anterior choroidal vessels
 Basilar arteries
 Cerebellar vessels
 Cerebral vessels [anterior, middle, posterior communicating]
 Circle of Willis
 Dural venous sinuses [superior sagittal sinus, inferior sagittal sinus, straight sinus, transverse sinuses, sigmoid sinuses, cavernous sinuses, superior petrosal sinuses, inferior petrosal sinuses]
 Intracranial vessels NOS
 Meningeal vessels [anterior, posterior]
 Ophthalmic vessels
 Pontine artery

1.JW.27.^.^ Radiation, intracranial vessels

Includes: Radiosurgery (stereotactic), intracranial vessels (arteriovenous malformation) (AVM)

Code Also: Any concomitant embolization of arteriovenous malformation (AVM) (see [1.JW.51.^.](#))

1.JW.27.JX using focused beam [e.g. gamma knife, cyber knife stereotactic radiosurgery]

1.JW.35.^.^ Pharmacotherapy (local), intracranial vessels

- Includes:** Injection (of agent), intracranial vessels
 Instillation, intracranial vessels
 Pharmacotherapy delivered via drug eluting stent, intracranial vessels
 Thrombolytic therapy, intracranial vessels
- Excludes:** Systemic pharmacotherapy (see [1.ZZ.35.^.^](#))

1.JW.35.^.^ Pharmacotherapy (local), intracranial vessels	percutaneous transcatheter approach	percutaneous [needle] approach	elution from implanted device
using antithrombotic agent	1.JW.35.HH-C1 Includes: • warfarin, heparin, enoxaparin, dipyridamole	1.JW.35.HA-C1 Includes: • warfarin, heparin, enoxaparin, dipyridamole	—
using thrombolytic agent	1.JW.35.HH-1C Includes: • anistreplase, alteplase, reteplase, streptokinase, tenecteplase, TNKase (TNK), tissue plasminogen activator (tPA), urokinase	—	—
using pharmacological agent NEC	1.JW.35.HH-T9	1.JW.35.HA-T9	—
using immunosuppressive agent	—	—	1.JW.35.HZ-M8 Includes: • continuous elution of sirolimus, everolimus (Rapamycin) from drug eluting stent
using plant alkaloids and other natural products	—	—	1.JW.35.HZ-M3 Includes: • continuous elution of paclitaxel from drug-coated stent

1.JW.50.^.^ Dilation, intracranial vessels**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

- Includes:** Angioplasty, intracranial
- Code Also:** Any endarterectomy, intracranial vessels (see [1.JW.57.^.^](#))
 Any infusion of thrombolytic agent (see [1.JW.35.^.^](#))
 Pharmacotherapy delivered via drug eluting stent (see [1.JW.35.^.^](#))

1.JW.50.^ ^ Dilation, intracranial vessels	percutaneous transluminal (arterial) approach [e.g. endovascular]	open craniotomy [craniectomy] flap approach
using balloon dilator	1.JW.50.GQ-BD Includes: <ul style="list-style-type: none">• Endovascular balloon angioplasty, intracranial artery	1.JW.50.SZ-BD
using stent	1.JW.50.GQ-NR Includes: <ul style="list-style-type: none">• Deployment, pipeline embolization device (PED), intracranial artery (aneurysm)• Endovascular flow diversion (PED, SILK), intracranial artery (aneurysm)• Stent embolization for flow diversion (PED, SILK), intracranial artery (aneurysm)	1.JW.50.SZ-NR
using balloon dilator and stent	1.JW.50.GQ-OA Includes: <ul style="list-style-type: none">• Endovascular balloon angioplasty with stent deployment, intracranial artery (aneurysm)	—

1.JW.51.^ ^ Occlusion, intracranial vessels**S** 5 **E** 53

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
E 53	Mandatory	Mandatory Coils	Extent	0	Not applicable (no coil used)
				01	One coil
				02	Two coils
				03	Three coils
				04	Four coils
				05	Five coils
				06	Six coils
				07	Seven coils
				08	Eight coils
				09	Nine coils
				10	Ten coils
				G	More than ten coils (11 - 20)
				H	More than twenty coils
				U	Unspecified

Includes: Clipping, [aneurysm], intracranial
Control, intracranial hemorrhage
Division (with ligation), intracranial vessels
Embolization [aneurysm], intracranial vessels
Embolization, arteriovenous [AV] malformation, brain
Embolization, fistula, carotid cavernous
Obliteration, fistula, intracranial vessels

Excludes: Aneurysmectomy with autograft or patch repair (see [1.JW.87.^ ^](#))
Aneurysmectomy, intracranial (division with ligation only) (see [1.JW.80.^ ^](#))
Deployment, pipeline embolization device (PED), intracranial artery (aneurysm) (see [1.JW.50.^ ^](#))
Excision (or patch graft repair) of AV malformation (see [1.JW.86.^ ^](#))
Insertion, flow diverter (SILK), intracranial artery (aneurysm) (see [1.JW.50.^ ^](#))
Occlusion, retinal artery (for control of bleeding) (see [1.CN.13.^ ^](#))
that with patch graft (see [1.JW.80.^ ^](#))

Code Also: Any concomitant destruction [division] cranial nerve for access to site of aneurysm (see [1.BA.59.^ ^](#))
Any stereotactic computer or microscope assistance (see [3.AN.94.^ ^](#))

Note: Involves control of intracranial bleeding (e.g. due to ruptured aneurysm).
When a vascular plug is used at the same time as the deployment of coils, assign only the code for coils. The vascular plug is used to prevent migration of the coils.

1.KE.^ ^.^ ^ Therapeutic Interventions on the Abdominal Arteries NEC

Includes: Abdominal arteries NEC
Celiac arteries
Common iliac arteries
Gastric arteries
Gastroepiploic arteries
Hepatic arteries
Inferior phrenic arteries
Mesenteric arteries [inferior, superior]
Mesenteric artery with aorta
Renal arteries
Splenic arteries
Umbilical arteries

Excludes: Abdominal aorta (see [1.KA.^ ^.^ ^](#))
Iliac arteries with abdominal aorta (see [1.KA.^ ^.^ ^](#))
Internal and external portions of the iliac artery (see [1.KT.^ ^.^ ^](#))

1.KE.26.^ ^ Brachytherapy, abdominal arteries NEC**S** 35

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 35	Optional	Implant Status	Status	P M	Permanent implant – Radioactive source left in place permanently
				T M	Temporary implant – Radioactive source removed after course of treatment is complete

Includes: Intravascular brachytherapy, abdominal arteries [e.g. iliac artery]

Code Also: Any associated angioplasty, abdominal arteries (see [1.KE.50.^ ^](#))

Note: There are typically two distinct phases required to complete the process of brachytherapy. The first phase involves the insertion of non-radioactive applicators or conduits [e.g. hollow needles, catheters, stents, etc.] that receive or transmit the radioactive material into the body. The second phase involves the after loading of the radioactive material [e.g. seeds, pellets, wires, etc.] into the applicator or conduit

1.KE.26.GQ using percutaneous transluminal arterial approach

1.KE.35.^ ^ Pharmacotherapy (local), abdominal arteries NEC

Includes: Injection (of agent), abdominal artery
 Instillation, abdominal artery
 Pharmacotherapy delivered via drug eluting balloon
 Pharmacotherapy delivered via drug eluting stent, abdominal arteries
 that for thrombolytic therapy

Excludes: Systemic pharmacotherapy (see [1.ZZ.35.^ ^](#))

1.KE.35.^ ^ Pharmacotherapy (local), abdominal arteries NEC	percutaneous transcatheter approach	percutaneous [needle] approach	elution from implanted device	elution from other device
using antithrombotic agent	1.KE.35.HH-C1 Includes: • warfarin, heparin, enoxaparin, dipyridamole	1.KE.35.HA-C1 Includes: • warfarin, heparin, enoxaparin, dipyridamole	—	—
using thrombolytic agent	1.KE.35.HH-1C Includes: • anistreplase, alteplase, reteplase, streptokinase, tenecteplase, TNKase (TNK), tissue plasminogen activator (tPA), urokinase	—	—	—
using immunosuppressive agent	—	—	1.KE.35.HZ-M8 Includes: • continuous elution of sirolimus, everolimus (Rapamycin) from drug eluting stent	1.KE.35.H2-M8 Includes: • elution of sirolimus, everolimus (Rapamycin) from balloon
using pharmacological agent NEC	1.KE.35.HH-T9	1.KE.35.HA-T9	—	—
using plant alkaloids and other natural products	—	—	1.KE.35.HZ-M3 Includes: • continuous elution of paclitaxel from drug-coated stent	1.KE.35.H2-M3 Includes: • elution of paclitaxel from balloon

1.KE.50.^ ^ Dilation, abdominal arteries NEC**S 5 L 2**

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Angioplasty, abdominal arteries (e.g. splenic, renal)
Angioplasty, common iliac artery
- Excludes:** that with partial excision of artery (see [1.KE.87.^^](#))
- Code Also:** Any endarterectomy, celiac, common iliac, mesenteric and renal arteries (see [1.KE.57.^^](#))
Any infusion of thrombolytic agent (see [1.KE.35.^^](#))
Pharmacotherapy delivered via drug eluting stent (see [1.KE.35.^^](#))

1.KE.50.GQ-BD	using percutaneous transluminal approach and balloon dilator
1.KE.50.GQ-BF	using percutaneous transluminal approach with laser and balloon dilator
1.KE.50.GQ-BP	using percutaneous transluminal approach and dilating device NEC
1.KE.50.GQ-OA	using percutaneous transluminal approach balloon dilator with (endovascular) stent (insertion)
1.KE.50.LA-BD	using open approach [e.g. arteriotomy] and balloon dilator
1.KE.50.LA-BP	using open approach [e.g. arteriotomy] and dilating device NEC

1.KE.51.^^ Occlusion, abdominal arteries NEC**S** 5 **E** 53

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
E 53	Mandatory	Mandatory Coils	Extent	0	Not applicable (no coil used)
				01	One coil
				02	Two coils
				03	Three coils
				04	Four coils
				05	Five coils
				06	Six coils
				07	Seven coils
				08	Eight coils
				09	Nine coils
				10	Ten coils
				G	More than ten coils (11 - 20)
				H	More than twenty coils
				U	Unspecified

- Includes:** Division (with ligation), abdominal arteries
Embolization or ligation of splenic artery for shrinkage of diseased spleen
Embolization, abdominal arteries (transcatheter)
Ligation, aneurysm, abdominal arteries
- Excludes:** Control of bleeding within organ (see specific organ)
Control of bleeding, liver (see [1.OA.13.^^](#))
Occlusion for control of bleeding (postoperative hemorrhage) of spleen (see [1.OB.13.^^](#))

1.KE.51.^^ Occlusion, abdominal arteries NEC	open approach [e.g. arteriotomy]	percutaneous transluminal approach	endoscopic [laparoscopic] approach
using band or clip	1.KE.51.LA-FF	—	1.KE.51.DA-FF
using direct suture	1.KE.51.LA	1.KE.51.GQ	1.KE.51.DA
using fibrin glue	1.KE.51.LA-W3	1.KE.51.GQ-W3	1.KE.51.DA-W3
using antineoplastic or immunomodulating agent	—	1.KE.51.GQ-M0	—
using [detachable] coil(s)	—	1.KE.51.GQ-GE	—
using synthetic agent [e.g. gelfoam, silicone, microspheres, polystyrene, polyvinyl alcohol, contour particles]	—	1.KE.51.GQ-W0	—
using thrombosing agent	—	1.KE.51.GQ-C2	—
using vascular [nitinol mesh] plug	—	1.KE.51.GQ-GF	—
using [detachable] balloon	—	1.KE.51.GQ-ER	—

1.KE.55.^^ Removal of device, abdominal arteries NEC

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

1.KE.55.GQ-NR of endovascular stent using percutaneous transluminal approach
1.KE.55.LA-NR of endovascular stent using open approach

1.KE.56.^^ Removal of foreign body, abdominal arteries NEC

- Includes:** Percutaneous transluminal removal of totally intraluminal (intravascular) foreign body
that for removal of balloon fragment
that for removal of broken catheter (tip)
that for removal of intraluminal (intravascular) foreign body
that for removal of retained guide wire

Excludes: Removal of (therapeutic) device from blood vessel (see specified vessel)

1.KE.56.GQ-GX using percutaneous transluminal approach and device NEC [e.g. pigtail snare, gooseneck snare, basket device]

1.KE.57.^ ^ Extraction, abdominal arteries NEC**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Arteriothrombectomy, abdominal arteries
 Endarterectomy, abdominal arteries
 Removal of atheromatous plaque, abdominal arteries
 that with patch graft to widen vessel lumen following abdominal artery endarterectomy

Excludes: that with partial excision of artery (see [1.KE.87.^ ^](#))

Code Also: Any concomitant stent angioplasty, abdominal arteries NEC (see [1.KE.50.^ ^](#))
 Any dilation, abdominal arteries NEC (see [1.KE.50.^ ^](#))
 Any infusion of thrombolytic agent (see [1.KE.35.^ ^](#))

1.KE.57.GQ using percutaneous transluminal (arterial) approach
 1.KE.57.LA using open approach
 1.KE.57.LA-XX-A using open approach and (widening) autograft
 1.KE.57.LA-XX-K using open approach and (widening) homograft
 1.KE.57.LA-XX-L using open approach and (widening) xenograft
 1.KE.57.LA-XX-N using open approach and (widening) synthetic patch graft

1.KE.58.^ ^ Procurement, abdominal arteries NEC**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Procurement , gastroepiploic artery

1.KE.58.LA-XX-A of (free) autograft using open approach
 1.KE.58.LA-XX-G of pedicled flap using open approach

1.KE.76.^ ^ Bypass, abdominal arteries NEC**S** 5 **E** 76

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
E 76	Optional	Graft Types 3	Extent	1	Single (simple tubular) graft
				2	Branched (bifurcated) graft

Includes: Graft, common hepatic to common iliac to renal
 Graft, gastroduodenal to renal artery
 Graft, hepatorenal
 Graft, iliofemoral (common iliac to femoral artery)
 Graft, iliorenal
 Graft, intra abdominal (arterial) NOS
 Graft, splenorenal
 Iliomesenteric artery bypass (vein graft reversed and anastomosed end to side from iliac to mesenteric artery) that with profundoplasty

Excludes: Aortorenal bypass (see [1.ID.76.^ ^](#))
 External iliac artery to femoral artery bypass graft (see [1.KT.76.^ ^](#))
 Profundoplasty performed at the same time as aortofemoral bypass (see [1.KA.76.^ ^](#))

Note: Produndoplasty is reconstruction of the profunda orifice.

1.KE.76.^ ^ Bypass, abdominal arteries	using autograft	using combined sources of tissue	using homograft	using synthetic material
bypass terminating in abdominal vessels [e.g. celiac, renal, mesenteric]	1.KE.76.MU-XX-A	1.KE.76.MU-XX-Q	1.KE.76.MU-XX-K	1.KE.76.MU-XX-N
bypass terminating in vessels of leg	1.KE.76.MZ-XX-A	1.KE.76.MZ-XX-Q	1.KE.76.MZ-XX-K	1.KE.76.MZ-XX-N

1.KE.80.^ ^ Repair, abdominal arteries NEC**S** 5 **E** 76

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
E 76	Optional	Graft Types 3	Extent	1	Single (simple tubular) graft
				2	Branched (bifurcated) graft

Includes: Aneurysmorrhaphy, renal, celiac and mesenteric arteries
 Repair, renal, celiac and mesenteric arteries
 Replantation, mesenteric artery (orifice moved from aorta onto Dacron graft during AAA repair)

Excludes: Abdominal aortoiliac (aneurysm) repair (see [1.KA.80.^^](#))

1.KE.80.GQ-NR-N	using percutaneous transluminal (arterial) approach and (endovascular) stent graft [e.g. snorkel stent graft]
1.KE.80.LA	using open approach
1.KE.80.LA-XX-A	using open approach and autograft
1.KE.80.LA-XX-K	using open approach and homograft
1.KE.80.LA-XX-N	using open approach and synthetic material

1.KE.87.^^ Excision partial, abdominal arteries NEC

S 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Aneurysmectomy, with angioplasty, abdominal arteries
 Aneurysmorrhaphy, by excision, abdominal arteries
 Excision, aneurysm, with replacement, abdominal arteries
 Resection, with replacement that with or without endarterectomy or removal of atheromatous plaque that with or without extraction or dilation

Code Also: Any concomitant excision of adjacent organ
 Any concomitant renal bench surgery

1.KE.87.LA	using open approach without tissue [anastomosis]
1.KE.87.LA-XX-A	using open approach with autograft [e.g. vein patch angioplasty]

1.KG.^^.^^ Therapeutic Interventions on Arteries of the Leg NEC

Includes: Dorsalis pedis arteries
 Femoral arteries
 Lower limb arteries NEC
 Popliteal arteries
 Tibial arteries [anterior, posterior]

1.KG.26.^ ^ Brachytherapy, arteries of leg NEC**S** 35

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 35	Optional	Implant Status	Status	P M	Permanent implant – Radioactive source left in place permanently
				T M	Temporary implant – Radioactive source removed after course of treatment is complete

Includes: Intravascular brachytherapy, arteries of leg [e.g. femoral, popliteal artery]

Code Also: Any associated angioplasty, arteries of leg (see [1.KG.50.^ ^](#))

1.KG.26.GQ using percutaneous transluminal arterial approach

1.KG.35.^ ^ Pharmacotherapy (local), arteries of leg NEC

Includes: Injection (of agent), lower limb arteries
 Instillation, lower limb arteries
 Pharmacotherapy delivered via drug eluting balloon
 Pharmacotherapy delivered via drug eluting stent, artery of leg that for thrombolytic therapy

Excludes: Systemic pharmacotherapy (see [1.ZZ.35.^ ^](#))

1.KG.35.^ ^ Pharmacotherapy (local), arteries of leg NEC	percutaneous transcatheter approach	percutaneous [needle] approach	elution from implanted device	elution from other device
using antithrombotic agent	1.KG.35.HH-C1 Includes: • warfarin, heparin, enoxaparin, dipyridamole	1.KG.35.HA-C1 Includes: • warfarin, heparin, enoxaparin, dipyridamole,	1.KG.35.HZ-C1	—
using thrombolytic agent	1.KG.35.HH-1C Includes: • anistreplase, alteplase, reteplase, streptokinase, tenecteplase, TNKase (TNK), tissue plasminogen activator (tPA), urokinase	—	—	—
using pharmacological agent NEC	1.KG.35.HH-T9	1.KG.35.HA-T9	—	—
using immunosuppressive agent	—	—	1.KG.35.HZ-M8 Includes: • continuous elution of sirolimus, everolimus (Rapamycin) from drug eluting stent	1.KG.35.H2-M8 Includes: • elution of sirolimus, everolimus (Rapamycin) from balloon
using plant alkaloids and other natural products	—	—	1.KG.35.HZ-M3 Includes: • continuous elution of paclitaxel from drug-coated stent	1.KG.35.H2-M3 Includes: • elution of paclitaxel from balloon

1.KG.50.^ ^ Dilation, arteries of leg NEC**S** ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Angioplasty, lower limb arteries

Excludes: that with partial excision of artery (see [1.KG.87.^ ^](#))

Code Also: Any endarterectomy, femoral, tibial and popliteal arteries (see [1.KG.57.^ ^](#))
Any infusion of thrombolytic agent (see [1.KG.35.^ ^](#))
Pharmacotherapy delivered via drug eluting stent (see [1.KG.35.^ ^](#))

1.KG.50.GQ-BD	using percutaneous transluminal approach and balloon dilator
1.KG.50.GQ-BF	using percutaneous transluminal approach with laser and balloon dilator
1.KG.50.GQ-BP	using percutaneous transluminal approach and dilating device NEC
1.KG.50.GQ-OA	using percutaneous transluminal approach and balloon dilator with (endovascular) stent (insertion)
1.KG.50.LA-BD	using open approach [e.g. arteriotomy] and balloon dilator
1.KG.50.LA-BP	using open approach [e.g. arteriotomy] and dilating device NEC
1.KG.50.LA-OA	using open approach [e.g. arteriotomy] and balloon dilator with (endovascular) stent (insertion)

1.KG.51.^ ^ Occlusion, arteries of leg NEC**S** 5 **L** 2 **E** 53

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)
E 53	Mandatory	Mandatory Coils	Extent	0	Not applicable (no coil used)
				01	One coil
				02	Two coils
				03	Three coils
				04	Four coils
				05	Five coils
				06	Six coils
				07	Seven coils
				08	Eight coils
				09	Nine coils
				10	Ten coils
				G	More than ten coils (11 - 20)
				H	More than twenty coils
				U	Unspecified

Includes: Division (with ligation), lower limb arteries
Embolization, lower limb arteries (transcatheter arterial) (for aneurysm)
Ligation, lower limb arteries (aneurysm)

1.KG.51.^ ^ Occlusion, arteries of leg NEC	open approach [e.g. arteriotomy]	percutaneous transluminal approach	external approach with pressure [compression] technique
using band or clip	1.KG.51.LA-FF	—	—
using direct suture	1.KG.51.LA	1.KG.51.GQ	—
using fibrin glue	1.KG.51.LA-W3	1.KG.51.GQ-W3	—
using thrombosing agent	—	1.KG.51.GQ-C2 Includes: • Aminocaproic acid, aprotinin, phytonadione, thrombin, coagulation factor VIII	—
using (detachable) coils	—	1.KG.51.GQ-GE	—
using device NEC	—	—	1.KG.51.JN-GX
using vascular [nitinol mesh] plug	—	1.KG.51.GQ-GF	—
using synthetic agent [e.g. gelfoam, silicone, microspheres, polystyrene, polyvinyl alcohol, contour particles]	—	1.KG.51.GQ-W0	—

1.KG.55.^ ^ Removal of device, arteries of leg NEC**S⁴ L²**

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

1.KG.55.GQ-NR of endovascular stent using percutaneous transluminal approach
 1.KG.55.LA-NR of endovascular stent using open approach

1.KG.56.^ ^ Removal of foreign body, arteries of leg NEC

Includes: Percutaneous transluminal removal of totally intraluminal (intravascular) foreign body
 that for removal of balloon fragment
 that for removal of broken catheter (tip)
 that for removal of intraluminal (intravascular) foreign body
 that for removal of retained guide wire

Excludes: Removal of (therapeutic) device from blood vessel (see specified vessel)

1.KG.56.GQ-GX using percutaneous transluminal approach and device NEC [e.g. pigtail snare, gooseneck snare, basket device]
 1.KG.56.GQ-NR-N using percutaneous transluminal approach and (endovascular) stent with synthetic graft [e.g. stent graft]

1.KG.57.^ ^ Extraction, arteries of leg NEC**S** ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Arteriothrombectomy, lower limb arteries
 Declotting (graft)
 Endarterectomy, femoral artery
 Removal of atheromatous plaque, lower limb arteries
 that with patch graft to widen vessel lumen following endarterectomy

Excludes: Iliofemoral endarterectomy (see [1.KT.57.^ ^](#))
 that with partial excision of artery of leg (see [1.KG.87.^ ^](#))

Code Also: Any concomitant stent angioplasty, arteries of leg NEC (see [1.KG.50.^ ^](#))
 Any dilation, femoral, tibial and popliteal arteries (see [1.KG.50.^ ^](#))
 Any infusion of thrombolytic agent (see [1.KG.35.^ ^](#))

1.KG.57.GQ using percutaneous transluminal (arterial) approach
 1.KG.57.LA using open approach
 1.KG.57.LA-XX-A using open approach and (widening) autograft
 1.KG.57.LA-XX-K using open approach and (widening) homograft
 1.KG.57.LA-XX-L using open approach and (widening) xenograft
 1.KG.57.LA-XX-N using open approach and (widening) synthetic patch graft

1.KG.58.^ ^ Procurement, arteries of leg NEC**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

1.KG.58.LA using open approach

1.KG.76.^ ^ Bypass, arteries of leg NEC**S** ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Bypass originating in lower limb artery
 Graft, femoral to femoral
 Graft, femoropopliteal arteries [with saphenous vein]
 Graft, femorotibial arteries [with saphenous vein]
 Graft, popliteal
 Shunt, femoropopliteal (arterial)
 that with profundoplasty

Excludes: Creation, hemodialysis fistula (see [1.KY.76.^ ^](#))
 Graft, external iliac artery to femoral artery (see [1.KT.76.^ ^](#))
 Graft, iliofemoral (common iliac artery to femoral artery) (see [1.KE.76.^ ^](#))

Code Also: any associated extracorporeal blood warming (see [1.ZX.07.^ ^](#))

Note: Select the location attribute based on the leg revascularized in the bypass.

1.KG.76.^ ^ Bypass, arteries of leg NEC	using autograft [e.g. saphenous vein]	using synthetic material [e.g. Dacron]	using combined sources of tissue [e.g. autograft and synthetic material]
bypass terminating in lower limb artery [e.g. femoropopliteal]	1.KG.76.MI-XX-A	1.KG.76.MI-XX-N	1.KG.76.MI-XX-Q
bypass terminating in lower limb vein [e.g. femoral artery to saphenous vein for long term hemodialysis]	1.KG.76.MZ-XX-A	1.KG.76.MZ-XX-N	—

1.KG.80.^ Repair, arteries of leg NEC**S** 5 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Aneurysmorrhaphy by suture or ligature alone

Excludes: Aneurysmorrhaphy with partial excision or resection of vessel (see [1.KG.87.^](#))

1.KG.80.GQ-NR-N	using percutaneous transluminal approach and (endovascular) stent with synthetic graft [e.g. stent graft]
1.KG.80.LA	with open approach without tissue [anastomosis]
1.KG.80.LA-XX-A	using open approach with autograft [e.g. vein patch angioplasty]
1.KG.80.LA-XX-N	using open approach with synthetic material

1.KG.82.^ Reattachment, arteries of leg NEC**S** 10 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 10	Optional	Tx Status 5	Status	A	Abandoned after onset
				R	Revision
				S	Staged
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Takedown, bypass lower limb artery

1.KG.82.LA	using open approach
------------	---------------------

1.KG.87.^ ^ Excision partial, arteries of leg NEC**S** 5 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Resection, with replacement
that with endarterectomy

Excludes: Aneurysmorrhaphy with graft replacement (see [1.KG.80.^ ^](#))

1.KG.87.LA	using open approach without tissue [anastomosis]
1.KG.87.LA-XX-A	using open approach with autograft [e.g. vein patch angioplasty]
1.KG.87.LA-XX-L	using open approach with xenograft
1.KG.87.LA-XX-N	using open approach with synthetic material

1.KQ.^ ^.^ ^ Therapeutic Interventions on the Abdominal Veins

Includes: Abdominal veins NEC
Common iliac veins
Hepatic veins
Mesenteric veins [superior, inferior]
Portal veins
Renal veins
Splenic veins
Suprarenal veins
Visceral veins

1.KQ.50.^ ^ Dilation, abdominal veins NEC**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Code Also: Any infusion of thrombolytic agent (see [1.KX.35.^](#))

1.KQ.50.GR-BD using percutaneous transluminal approach and balloon dilator
 1.KQ.50.GR-NR using percutaneous transluminal approach and endovascular stent
 1.KQ.50.LA-BP using open approach [e.g. venotomy] and dilation device NEC

1.KQ.51.^ Occlusion, abdominal veins NEC

S 10 **E** 53

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 10	Optional	Tx Status 5	Status	A	Abandoned after onset
				R	Revision
				S	Staged
E 53	Mandatory	Mandatory Coils	Extent	0	Not applicable (no coil used)
				01	One coil
				02	Two coils
				03	Three coils
				04	Four coils
				05	Five coils
				06	Six coils
				07	Seven coils
				08	Eight coils
				09	Nine coils
				10	Ten coils
				G	More than ten coils (11 - 20)
				H	More than twenty coils
				U	Unspecified

Includes: Embolization, abdominal veins
 Ligation, abdominal veins

Excludes: Control of bleeding within organ (see specific organ)
 Embolization, gastric varices (see [1.NF.13.^](#))
 Occlusion for control of postoperative hemorrhage of spleen (see [1.OB.13.^](#))

1.KQ.51.^ ^ Occlusion, abdominal veins NEC	open approach [e.g. venotomy]	percutaneous transluminal (venous) approach
using direct suture	1.KQ.51.LA	1.KQ.51.GR
using synthetic agent (e.g. gelfoam, silicone, microspheres, polystyrene, polyvinyl alcohol, contour particles)	—	1.KQ.51.GR-W0
using fibrin glue	1.KQ.51.LA-W3	1.KQ.51.GR-W3
using thrombosing agent	—	1.KQ.51.GR-C2 Includes: • aminocaproic acid, aprotinin, phytonadione, thrombin, coagulation factor VIII
using [detachable] coils	—	1.KQ.51.GR-GE
using vascular [nitinol mesh] plug	—	1.KQ.51.GR-GF

1.KQ.56.^ ^ Removal of foreign body, abdominal veins NEC

Includes: Percutaneous transluminal removal of totally intraluminal (intravascular) foreign body that for removal of balloon fragment that for removal of broken catheter (tip) that for removal of intraluminal (intravascular) foreign body that for removal of retained guide wire

Excludes: Removal of (therapeutic) device from blood vessel (see specified vessel)

1.KQ.56.GR-GX using percutaneous transluminal approach and device NEC [e.g. pigtail snare, gooseneck snare, basket device]

1.KQ.57.^ ^ Extraction, abdominal veins NEC**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Thrombectomy, venous, abdominal veins

Code Also: Any infusion of thrombolytic agent (see [1.KX.35.^ ^](#))

1.KQ.57.^ Extraction, abdominal veins NEC	open approach [e.g. venotomy]	percutaneous transluminal approach
using suction catheter	—	1.KQ.57.GR-FV
using device NEC	1.KQ.57.LA-GX	1.KQ.57.GR-GX
using autograft	1.KQ.57.LA-XX-A	—
using synthetic material	1.KQ.57.LA-XX-N	—
without tissue	1.KQ.57.LA	—

1.KQ.58.^ Procurement, abdominal veins NEC**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

1.KQ.58.LA using open approach

1.KQ.76.^ Bypass, abdominal veins NEC**S** 10 **L** 15

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 10	Optional	Tx Status 5	Status	A	Abandoned after onset
				R	Revision
				S	Staged
L 15	Optional	Abdominal veins	Location	1	One vessel
				2	Two vessels

Includes:

- Anastomosis, mesocaval
- Anastomosis, portacaval
- Anastomosis, splenorenal venous
- Decompression, portal
- Shunt, lienorenal
- Shunt, mesocaval
- Shunt, portacaval
- Shunt, splenorenal

Code Also: Any concomitant resection of adjacent organ (e.g. splenectomy)

1.KQ.76.^.^ Bypass, abdominal veins NEC	using open approach with autograft	using open approach with synthetic material	using percutaneous transluminal (venous) approach and stent	using open approach
bypass terminating in abdominal vein	1.KQ.76.MU-XX-A	1.KQ.76.MU-XX-N	1.KQ.76.GR-NR Includes: • Transjugular intrahepatic portosystemic shunt [TIPS]	—
bypass terminating in vena cava	1.KQ.76.ND-XX-A	1.KQ.76.ND-XX-N	—	1.KQ.76.ND Includes: • Portacaval shunt (with side by side anastomosis, no grafting)

1.KQ.80.^.^ Repair, abdominal veins NEC**S** 10

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 10	Optional	Tx Status 5	Status	A	Abandoned after onset
				R	Revision
				S	Staged

Includes: Aneurysmorrhaphy

1.KQ.80.LA using open approach without tissue [suture]
 1.KQ.80.LA-XX-A using open approach with autograft
 1.KQ.80.LA-XX-N using open approach with synthetic material

1.KQ.87.^.^ Excision partial, abdominal veins NEC**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: that for removal of (atheromatous) plaque

1.KQ.87.LA using open approach without tissue [anastomosis]
 1.KQ.87.LA-XX-A using open approach with autograft
 1.KQ.87.LA-XX-N using open approach with synthetic material

1.KR.^.^ Therapeutic Interventions on Veins of Leg NEC

Includes:

- Femoral veins
- Lower limb veins NEC
- Perforator veins
- Peroneal veins
- Popliteal veins
- Saphenous veins
- Tibial veins [anterior, posterior]

1.KR.34.^.^ Compression, veins of leg NEC

Excludes: that concomitant with sclerotherapy (see [1.KR.59.^.](#))

1.KR.34.JF-GN	using direct external pressure device [e.g. compression stockings, dressing] with intermittent technique
1.KR.34.JN-GN	using direct external pressure device [e.g. compression stockings, dressing, Unna's paste boot]

1.KR.50.^.^ Dilation, veins of leg NEC**S** ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Code Also: Any infusion of thrombolytic agent (see [1.KX.35.^.](#))

1.KR.50.GR-BD	using percutaneous transluminal (venous) approach and balloon dilator
1.KR.50.GR-BP	using percutaneous transluminal (venous) approach and dilating device NEC
1.KR.50.GR-OA	using percutaneous transluminal (venous) approach balloon dilator with (endovascular) stent (insertion)
1.KR.50.LA-BP	using open approach [e.g. venotomy] and dilating device NEC

1.KR.51.^ ^ Occlusion, veins of leg NEC**S** 5 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Division (with ligation), lower limb vein
Ligation, lower limb vein

1.KR.51.^ ^ Occlusion, veins of leg NEC	open approach [e.g. venotomy]	percutaneous transluminal approach	endoscopic (subfascial) approach
using direct suture	1.KR.51.LA	1.KR.51.GR	—
using fibrin (glue)	1.KR.51.LA-W3	1.KR.51.GR-W3	—
using thrombosing agent	—	1.KR.51.GR-C2 Includes: • Aminocaproic acid, aprotinin, phytonadione, thrombin, coagulation factor VIII	—
using device NEC	—	—	1.KR.51.DA-GX Includes: • Subfascial endoscopic perforator surgery [SEPS] with or without vein stripping

1.KR.55.^ ^ Removal of device, veins of leg NEC**S** 4 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

1.KR.55.GR-NR of stent using percutaneous transluminal approach
1.KR.55.LA-NR of stent using open approach

1.KR.56.^ ^ Removal of foreign body, veins of leg NEC

Includes: Percutaneous transluminal removal of totally intraluminal (intravascular) foreign body
 that for removal of balloon fragment
 that for removal of broken catheter (tip)
 that for removal of intraluminal (intravascular) foreign body
 that for removal of retained guide wire

Excludes: Removal of (therapeutic) device from blood vessel (see specified vessel)

1.KR.56.GR-GX using percutaneous transluminal venous approach and device NEC [e.g. pigtail snare, gooseneck snare, basket device]

1.KR.57.^ ^ Extraction, veins of leg NEC**S** ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Thrombectomy, lower limb vein

Code Also: Any infusion of thrombolytic agent (see [1.KX.35.^ ^](#))

1.KR.57.^ ^ Extraction, veins of leg NEC	open approach [e.g. venotomy]	percutaneous transluminal approach
using device NEC	—	1.KR.57.GR-GX
using suction catheter	—	1.KR.57.GR-FV
using suction catheter and (followed by) autograft	1.KR.57.LA-FV-A	—
using autograft	1.KR.57.LA-XX-A	—
using synthetic material	1.KR.57.LA-XX-N	—

1.KR.58.^ ^ Procurement, veins of leg NEC**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Procurement, saphenous vein

1.KR.58.DA using endoscopic approach
 1.KR.58.LA using open approach
 1.KR.58.WK using special incisional technique (e.g. Saphlite minimally invasive procurement)

1.KR.59.^ ^ Destruction, veins of leg NEC**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Excludes: Subfascial endoscopic perforator surgery [SEPS] (see [1.KR.51.^ ^](#))

1.KR.59.GR-AG using percutaneous transluminal (venous) approach and laser
Includes: Endovenous laser therapy (EVLT)
 1.KR.59.GR-AW using percutaneous transluminal (venous) approach and radiofrequency probe
Includes: Endovenous thermal ablation
 1.KR.59.HA-X7 using percutaneous injection of chemical agent NEC
Includes: Sclerotherapy (with or without compression)
 1.KR.59.LA-GX using open approach and device NEC (e.g. electrocautery)
Includes: Electrofulguration, varicose veins, lower limb

1.KR.76.^ ^ Bypass, veins of leg NEC**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Bypass, iliac or superficial femoral
Graft, lower limb vein
Venovenostomy, lower limb

Excludes: Creation, temporary arteriovenous fistula (see [1.KG.76.^ ^](#))

1.KR.76.^ ^ Bypass, veins of leg NEC	using autograft [e.g. saphenous vein]	using synthetic material [e.g. Dacron]
bypass terminating in lower limb vein [e.g. femoral to femoral cross over bypass]	1.KR.76.MZ-XX-A	1.KR.76.MZ-XX-N

1.KR.78.^ ^ Repair by decreasing size, veins of leg NEC**S** ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Plication, lower limb veins

1.KR.78.LA using open approach

1.KR.80.^ ^ Repair, veins of leg NEC**S** ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Valvuloplasty, lower limb vein

- 1.KR.80.LA using open approach without tissue
Includes: Suture of cusps of valve by supravulvar approach
 Suture repair of traumatic laceration or injury
- 1.KR.80.LA-FG using open approach and binding device [venocuff]
Includes: Silastic wrap placed around the outside of the vein
- 1.KR.80.LA-XX-A using open approach with autograft
Includes: that with valve procured from another site (e.g. arm valve)
Excludes: Transposition within adjacent site (see [1.KR.83.^ ^](#))
- 1.KR.80.WQ using external suture technique
Includes: Sutures placed through valve cusp insertion from outside of vein

1.KR.83.^ ^ Transfer, veins of leg NEC**S** ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: that from adjacent site
 Transposition, lower limb vein

Excludes: Transfer from distant site (e.g. arm)(see [1.KR.80.^ ^](#))

- 1.KR.83.LA using open approach

1.KR.87.^.^ Excision partial, veins of leg NEC**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Stripping and ligation, varicose veins of leg
Stripping, varicose veins of lower limbs that with hook avulsions

Excludes: Harvesting, lower limb vein (see [1.KR.58.^.](#))
Sclerotherapy (see [1.KR.59.^.](#))

Omit code: when performed with subfascial endoscopic perforator vein surgery (see [1.KR.51.^.](#))

1.KR.87.^.^ Excision partial, veins of leg NEC	with autograft [e.g. patch graft]	without use of tissue
open approach	1.KR.87.LA-XX-A	1.KR.87.LA
open approach with stripping technique	—	1.KR.87.WM
open approach with sympathectomy	1.KR.87.WK-XX-A	1.KR.87.WK
open approach with special (micro) excision technique	—	1.KR.87.WJ Includes: • Micro phlebectomy, leg • Transilluminated Vein Excision (Trivex), leg

1.KT.^.^ Therapeutic Interventions on the Vessels of the Pelvis, Perineum and Gluteal Region

Includes: Epigastric vessels
Internal and external portion of iliac vessels
Internal pudendal artery
Obturator vessels
Pelvic vessels NEC
Penile vessels
Rectal vessels
Uterine vessels
Vaginal vessels
Vesical vessels

Excludes: Common iliac arteries (see [1.KE.^.^](#))
Common iliac arteries with abdominal aorta (see [1.KA.^.^](#))

1.KT.50.^ ^ Dilation, vessels of the pelvis, perineum and gluteal region**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Angioplasty, internal or external portion of iliac artery
 Angioplasty, vessels of pelvis, perineum and gluteal region

Excludes: that with partial excision of artery (see [1.KT.87.^ ^](#))

Code Also: Any endarterectomy, internal and external iliac arteries (see [1.KT.57.^ ^](#))
 Any infusion of thrombolytic agent (see [1.KV.35.^ ^](#) or [1.KX.35.^ ^](#))
 Pharmacotherapy delivered via drug eluting stent (see [1.KV.35.^ ^](#))

1.KT.50.GQ-BD	using percutaneous transluminal approach and balloon dilator
1.KT.50.GQ-BF	using percutaneous transluminal approach with laser and balloon dilator
1.KT.50.GQ-BP	using percutaneous transluminal approach and dilating device NEC
1.KT.50.GQ-OA	using percutaneous transluminal approach and balloon dilator with (endovascular) stent (insertion)
1.KT.50.LA-BD	using open approach [e.g. arteriotomy] and balloon dilator
1.KT.50.LA-BP	using open approach [e.g. arteriotomy] and dilating device NEC

1.KT.51.^ ^ Occlusion, vessels of the pelvis, perineum and gluteal region**S** 5 **E** 53

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
E 53	Mandatory	Mandatory Coils	Extent	0	Not applicable (no coil used)
				01	One coil
				02	Two coils
				03	Three coils
				04	Four coils
				05	Five coils
				06	Six coils
				07	Seven coils
				08	Eight coils
				09	Nine coils
				10	Ten coils
				G	More than ten coils (11 - 20)
				H	More than twenty coils
				U	Unspecified

Includes: Ligation of pelvic vessels (for postpartum hemorrhage)

Excludes: Banding, external hemorrhoids (see [1.NT.87.^ ^](#))
 Banding, internal hemorrhoids (see [1.NQ.87.^ ^](#))
 Control of bleeding within organ (see specified organ)
 Embolization for control of bleeding, bladder (see [1.PM.13.^ ^](#))
 Embolization for control of bleeding, uterus (see [1.RM.13.^ ^](#))
 Embolization for control of bleeding, vagina (see [1.RS.13.^ ^](#))
 Embolization for shrinkage of uterine fibroids (see [1.RM.13.^ ^](#))

1.KT.51.^ ^ Occlusion, vessels of the pelvis, perineum and gluteal region	open approach [e.g. venotomy]	percutaneous transluminal approach	endoscopic [laparoscopic] approach
using direct suture	1.KT.51.LA	1.KT.51.GQ	1.KT.51.DA
using fibrin glue	1.KT.51.LA-W3	1.KT.51.GQ-W3	—
using thrombosing agent	—	1.KT.51.GQ-C2 Includes: • aminocaproic acid, aprotinin, phytonadione, thrombin, coagulation factor VIII	—
using (detachable) coil	—	1.KT.51.GQ-GE	—
using synthetic agent [e.g. gelfoam, silicone, microspheres, polystyrene, polyvinyl alcohol, contour particles]	—	1.KT.51.GQ-W0	—
using vascular [nitinol mesh] plug	—	1.KT.51.GQ-GF	—
using clips	1.KT.51.LA-FF	—	1.KT.51.DA-FF

1.KT.55.^ ^ Removal of device, vessels of the pelvis, perineum and gluteal region**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

1.KT.55.GQ-NR of endovascular stent using percutaneous transluminal (arterial) approach
 1.KT.55.LA-NR of endovascular stent using open approach

1.KT.56.^ ^ Removal of foreign body, vessels of the pelvis, perineum and gluteal region

Includes: Percutaneous transluminal removal of totally intraluminal (intravascular) foreign body
 that for removal of balloon fragment
 that for removal of broken catheter (tip)
 that for removal of intraluminal (intravascular) foreign body
 that for removal of retained guide wire

Excludes: Removal of (therapeutic) device from blood vessel (see specified vessel)

1.KT.56.GQ-GX using percutaneous transluminal (arterial) approach and device NEC [e.g. pigtail snare, gooseneck snare, basket device]

1.KT.57.^ ^ Extraction vessels of the pelvis, perineum and gluteal region**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Endarterectomy, internal and external portions of iliac artery
Removal of atheromatous plaque, vessels of pelvis, perineum and gluteal region that with patch graft to widen vessel lumen following internal and external iliac endarterectomy
Thrombectomy, vessels of pelvis, perineum and gluteal region

Excludes: that involving common iliac artery (see [1.KE.57.^ ^](#))
that with partial excision of artery (see [1.KT.87.^ ^](#))

Code Also: Any concomitant stent angioplasty, internal and external iliac artery (see [1.KT.50.^ ^](#))
Any dilation, vessels of pelvis, perineum and gluteal region (see [1.KT.50.^ ^](#))
Any infusion of thrombolytic agent (see [1.KV.35.^ ^](#) or [1.KX.35.^ ^](#))

1.KT.57.GQ using percutaneous transluminal (arterial) approach
1.KT.57.LA using open approach
1.KT.57.LA-XX-A using open approach and (widening) autograft
1.KT.57.LA-XX-K using open approach and (widening) homograft
1.KT.57.LA-XX-L using open approach and (widening) xenograft
1.KT.57.LA-XX-N using open approach and (widening) synthetic patch graft

1.KT.58.^ ^ Procurement, vessels of the pelvis, perineum and gluteal region**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

1.KT.58.LA using open approach

1.KT.76.^ ^ Bypass, vessels of the pelvis, perineum and gluteal region**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

- Includes:** Arterialization, deep dorsal vein
- Excludes:** Bilateral iliofemoral bypass (see [1.KE.76.^^](#))
Common iliac to femoral artery bypass graft (see [1.KE.76.^^](#))

1.KT.76.^^ Bypass, vessels of the pelvis, perineum and gluteal region	using autograft	using synthetic material	using homograft	using xenograft	using combined sources of tissue
bypass terminating in vessels of pelvis, perineum and gluteal region [e.g. epigastric artery to dorsal penile artery or vein]	1.KT.76.MO-XX-A	1.KT.76.MO-XX-N	1.KT.76.MO-XX-K	—	1.KT.76.MO-XX-Q
bypass terminating in vessels of leg (e.g. external iliac to common femoral artery)	1.KT.76.MZ-XX-A	1.KT.76.MZ-XX-N	1.KT.76.MZ-XX-K	1.KT.76.MZ-XX-L	1.KT.76.MZ-XX-Q

1.KT.80.^^ Repair, vessels of the pelvis, perineum and gluteal region

S 5 **E** 75

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
E 75	Optional	Graft Types 2	Extent	1	Single (simple tubular) graft
				2	Branched (bifurcated) (biiliac) (bifemoral) graft

- Includes:** Aneurysmorrhaphy by suture or ligature alone
Repair, internal and external iliac (iliofemoral) aneurysm
- Excludes:** Aneurysmorrhaphy with partial excision or resection of vessel (see [1.KT.87.^^](#))
Repair, common iliac (iliofemoral) aneurysm (see [1.KE.80.^^](#))

1.KT.80.GQ-NR-N	using percutaneous transluminal (arterial) approach and (endovascular) stent graft
1.KT.80.LA	using open approach without tissue [anastomosis]
1.KT.80.LA-XX-A	using open approach with autograft
1.KT.80.LA-XX-L	using open approach with xenograft
1.KT.80.LA-XX-N	using open approach with synthetic material

1.KT.82.^^ Reattachment, vessels of the pelvis, perineum and gluteal region

S 10

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 10	Optional	Tx Status 5	Status	A	Abandoned after onset
				R	Revision
				S	Staged

Includes: Takedown, bypass

1.KT.82.LA using open approach

1.KT.87.^ ^ Excision partial, vessels of the pelvis, perineum and gluteal region

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Resection, vessel with replacement that with or without extraction or dilation

1.KT.87.LA using open approach without tissue [with or without anastomosis]
 1.KT.87.LA-XX-A using open approach with autograft
 1.KT.87.LA-XX-N using open approach with synthetic material

Therapeutic Interventions on Blood Vessels NEC (1KV - 1KZ)

1.KV.^.^ Therapeutic Interventions on Artery NEC

1.KV.13.^.^ Control of bleeding, artery NEC

Includes:	Compression, artery Embolization, artery Hemostasis, artery Vaso/angioplasty
Excludes:	Control of bleeding within organ (see specified organ) Systemic pharmacotherapy for control of bleeding (see 1.ZZ.35.^.) that done by suturing artery NEC (see 1.KV.80.^.)

1.KV.13.HA-C2	using percutaneous (needle) injection of antihemorrhagic agent
	Includes: aminocaproic acid, aprotinin, phytonadione, thrombin, coagulation factor VIII
1.KV.13.JA-C2	using direct external application of antihemorrhagic agent
1.KV.13.JA-GN	using mechanical device [e.g. angioplasty]
1.KV.13.JN	using direct manual pressure [e.g. external compression]

1.KV.35.^.^ Pharmacotherapy (local), artery NEC

Includes:	Injection (of agent), artery NEC Instillation, artery NEC Pharmacotherapy delivered via drug-eluting stent, artery NEC that for thrombolytic therapy Thrombolysis
Excludes:	Antithrombotic irrigation of intraarterial device (see 1.KV.54.^.) Control of bleeding, artery NEC (see 1.KV.13.^.) Systemic pharmacotherapy (see 1.ZZ.35.^.) Thrombolytic therapy, coronary artery (see 1.II.35.^.) Thrombolytic therapy, intracranial vessels (see 1.JW.35.^.)

1.KV.35.^ ^ Pharmacotherapy (local), artery NEC	percutaneous transcatheter approach	percutaneous [needle] approach	elution from implanted device	elution from other device
using antithrombotic agent	1.KV.35.HH-C1 Includes: • warfarin, heparin, enoxaparin, dipyridamole	1.KV.35.HA-C1 Includes: • warfarin, heparin, enoxaparin, dipyridamole	—	—
using thrombolytic agent	1.KV.35.HH-1C Includes: • anistreplase, alteplase, reteplase, streptokinase, tenecteplase, TNKase (TNK), tissue plasminogen activator (tPA), urokinase	—	—	—
using pharmacological agent NEC	1.KV.35.HH-T9	1.KV.35.HA-T9	—	—
using immunosuppressive agent	—	—	1.KV.35.HZ-M8 Includes: • continuous elution of sirolimus, everolimus (Rapamycin) from drug eluting stent	1.KV.35.H2-M8 Includes: • Elution of sirolimus, everolimus (Rapamycin) from balloon
using plant alkaloids and other natural products	—	—	1.KV.35.HZ-M3 Includes: • continuous elution of paclitaxel from drug-coated stent	1.KV.35.H2-M3 Includes: • Elution of paclitaxel from balloon

1.KV.53.^ ^ Implantation of internal device, artery NEC**S 4**

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Arterial cutdown
Intra arterial catheterization
that for establishing an intraarterial line for infusion, etc.

Excludes: Arterial puncture or catheterization for collection of specimen (see [2.ZZ.13.^ ^](#))
Placement of arteriovenous catheter or cannula (see [1.KG.76.^ ^](#) or [1.JM.76.^ ^](#))

1.KV.53.HA-CH	of intra-arterial needle (e.g. with lead or line) using percutaneous approach
1.KV.53.HA-FT	of intra-arterial catheter using percutaneous approach
1.KV.53.LA-FT	of intra-arterial catheter using open incision approach
Includes:	Intra arterial cutdown

1.KV.54.^ ^ Management of internal device, artery NEC**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Adjustment of device, artery
 Cleansing and dressing of entry site
 Irrigation of intraarterial device
 Removal of intraluminal obstruction from intraarterial device
 Repositioning of device, artery
 that for arterial needle or catheter

Excludes: that for dialysis shunt (see [1.KY.54.^ ^](#))

1.KV.54.GQ-GX of intraarterial device using percutaneous transluminal arterial approach and device NEC
 1.KV.54.HA-FT of intraarterial device using percutaneous (needle) approach (for irrigation [flushing])
 1.KV.54.JA-FT of intraarterial device using external approach (e.g. adjustment, cleansing)

1.KV.55.^ ^ Removal of device, artery NEC**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: that for discontinuing an intra arterial line for infusion, transfusion, etc.

Excludes: Takedown of arteriovenous catheter or cannula (see [1.KG.82.^ ^](#), or [1.JM.82.^ ^](#))

1.KV.55.JA-CH of intra-arterial needle
 1.KV.55.JA-FT of intra-arterial catheter

1.KV.80.^ ^ Repair, artery NEC**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

1.KV.80.LA using open approach
 1.KV.80.LA-XX-A using open approach and autograft
 1.KV.80.LA-XX-K using open approach and homograft

1.KX.^.^ Therapeutic Interventions on Vein NEC**1.KX.07.^.^ Hyperthermy, vein NEC**

Includes: Application of heat, vein
that for thrombophlebitis therapy

1.KX.07.JA-KJ	using hot compresses
1.KX.07.JA-KK	using electrical heating device

1.KX.13.^.^ Control of bleeding, vein NEC

Includes: Compression, vein
Hemostasis, vein

Excludes: Control of bleeding within organ (see specified organ)
Systemic pharmacotherapy for control of bleeding (see [1.ZZ.35.^.](#))
that done with surgical repair of vein (see Repair, vein by site)

1.KX.13.HA-C2	using percutaneous (needle) injection of antihemorrhagic agent
	Includes: aminocaproic acid, aprotinin, phytonadione, thrombin, coagulation factor VIII
1.KX.13.JA-C2	using direct external application of antihemorrhagic agent
1.KX.13.JA-GN	using external pressure device [e.g. dressing]
1.KX.13.JN	using direct manual pressure [e.g. external compression]

1.KX.35.^.^ Pharmacotherapy (local), vein NEC

Includes: Injection (of agent), vein NEC
Instillation, vein NEC
that for thrombolytic therapy

Excludes: Antithrombotic irrigation of intravenous device (see [1.KX.54.^.](#))
Infusion therapy (see [1.LZ.35.^.](#))
Systemic pharmacotherapy (see [1.ZZ.35.^.](#))
that for control of bleeding (see [1.KX.13.^.](#))
Transfusion therapy (see [1.LZ.19.^.](#))

1.KX.35.^ ^ Pharmacotherapy (local), vein NEC	percutaneous transcatheter approach	percutaneous [needle] approach
using antithrombotic agent	1.KX.35.HH-C1 Includes: • warfarin, heparin, enoxaparin, dipyridamole	1.KX.35.HA-C1 Includes: • warfarin, heparin, enoxaparin, dipyridamole
using thrombolytic agent	1.KX.35.HH-1C Includes: • anistreplase, alteplase, reteplase, streptokinase, tenecteplase, TNKase (TNK), tissue plasminogen activator (tPA), urokinase	—
using pharmacological agent NEC	1.KX.35.HH-T9	1.KX.35.HA-T9

1.KX.53.^ ^ Implantation of internal device, vein NEC

Includes: Insertion, intravenous device
Intravenous catheterization (intra cath)
that for establishing an intravenous line for infusion, transfusion, etc.
Venipuncture (to establish venous access)
Venous cutdown

Excludes: Insertion of central venous catheter [CVC] (see [1.IS.53.^ ^](#))
Peripherally inserted central catheter [PICC] via veins of the antecubital fossa [brachial, cephalic, or basilar] (see [1.IS.53.^ ^](#))
Placement of arteriovenous catheter or cannula (see [1.KY.76.^ ^](#))
Venipuncture or catheterization for collection of specimen (see [2.ZZ.13.^ ^](#))

1.KX.53.HA-FT of intravenous catheter using percutaneous approach
1.KX.53.LA-FT of intravenous catheter using open incision approach

Includes: Intravenous cutdown

1.KX.54.^ ^ Management of internal device, vein NEC**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Adjustment of device, vein
 Cleansing and dressing of entry site
 Irrigation of intravenous device
 Removal of intraluminal obstruction from intravenous device [e.g. clot]
 Repositioning, intravenous device

1.KX.54.GR-GX	of intravenous device using percutaneous transluminal approach and device NEC
1.KX.54.HA-LG	of intravenous device using percutaneous (needle) approach (for irrigation [flushing])
1.KX.54.JA-LG	of intravenous device using external approach (for adjustment, cleansing)

1.KX.55.^.^ Removal of device, vein NEC

Includes: Removal of intravenous device
 that for discontinuing an intravenous line for infusion, transfusion, etc.

Excludes: Takedown of arteriovenous catheter or cannula (see [1.KG.82.^.](#) or [1.JM.82.^.](#))

1.KX.55.JA-FT	of intravenous catheter
---------------	-------------------------

1.KX.80.^.^ Repair, vein NEC

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

1.KX.80.LA	using open approach
1.KX.80.LA-XX-A	using open approach and autograft
1.KX.80.LA-XX-K	using open approach and homograft

1.KY.^.^.^ Therapeutic Interventions on the Artery with Vein

1.KY.50.^.^ Dilation, artery with vein

L 70

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 70	Optional	Dialysis fistula	Location	L A	Left arm
				L L	Left leg
				R A	Right arm
				R L	Right leg
				Z	Other site (e.g. jugular, subclavian)

Includes: Angioplasty, arteriovenous fistula
Code Also: Any drug elution from balloon (following dilation of stenosis) (see [1.KV.35.^](#))
 Any endarterectomy, artery with vein (see [1.KY.57.^](#))

1.KY.50.GP-BD using percutaneous transluminal approach and balloon dilator

1.KY.54.^ Management of internal device, artery with vein

L 70

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 70	Optional	Dialysis fistula	Location	L A	Left arm
				L L	Left leg
				R A	Right arm
				R L	Right leg
				Z	Other site (e.g. jugular, subclavian)

Includes: Cleansing and dressing of entry site
 Irrigation [flushing] of dialysis shunt

1.KY.54.HA-SJ of arteriovenous shunt (cannula) using percutaneous (needle) approach (for irrigation [flushing])

1.KY.54.JA-SJ of arteriovenous shunt (cannula) using external approach (for cleansing)

1.KY.57.^ Extraction, artery with vein

L 70

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 70	Optional	Dialysis fistula	Location	L A	Left arm
				L L	Left leg
				R A	Right arm
				R L	Right leg
				Z	Other site (e.g. jugular, subclavian)

- Includes:** Declotting (graft), artery with vein
Endarterectomy, artery with vein
Thrombectomy, artery with vein
- Excludes:** that with repair, artery with vein (see [1.KY.80.^^](#))
- Code Also:** Any dilation, artery with vein (see [1.KY.50.^^](#))

- 1.KY.57.GP using percutaneous transluminal approach
Includes: Mechanical thrombectomy, AV fistula
- 1.KY.57.LA using open approach without tissue

1.KY.76.^^ Bypass, artery with vein**S** 4 **L** 70

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 70	Optional	Dialysis fistula	Location	L A	Left arm
				L L	Left leg
				R A	Right arm
				R L	Right leg
				Z	Other site (e.g. jugular, subclavian)

- Includes:** Complete 'redo' of arteriovenous fistula
Creation, hemodialysis fistula [AV fistula]
Creation, hemodialysis fistula with or without ligation of the distal vein
Insertion, renal dialysis shunt
that with (venovenous) hemofiltration

- Excludes:** Partial revision of arteriovenous fistula (see [1.KY.80.^^](#))

- 1.KY.76.LA using arteriovenous fistula
Includes: surgical joining of an artery to a vein
- 1.KY.76.LA-SJ using arteriovenous shunt (e.g. Quinton Scribner)
Includes: Insertion, cannula for hemodialysis
- 1.KY.76.LA-XX-A using interposition graft made of autologous tissue (e.g. saphenous vein)
- 1.KY.76.LA-XX-L using xenograft (e.g. bovine carotid artery)
- 1.KY.76.LA-XX-N using interposition graft made of synthetic material (e.g. Gore Tex)

1.KY.80.^.^ Repair artery with vein**S** 4 **L** 70

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 70	Optional	Dialysis fistula	Location	L A	Left arm
				L L	Left leg
				R A	Right arm
				R L	Right leg
				Z	Other site (e.g. jugular, subclavian)

Includes: Partial revision of arteriovenous [AV] fistula
Repair arterial or venous limb of AV fistula

Excludes: Complete 'redo' of arteriovenous fistula (see [1.KY.76.^.^](#))
Ligation of arterial limb of AV fistula (see [1.JM.51.^.^](#))
Takedown of AV fistula (see [1.JM.82.^.^](#))

1.KY.80.LA using open approach
1.KY.80.LA-XX-A using open approach and autograft
1.KY.80.LA-XX-K using open approach and homograft
1.KY.80.LA-XX-N using open approach and synthetic material [e.g. mesh]

1.KZ.^.^ Therapeutic Interventions on Blood Vessels NEC

Includes: Blood vessels NOS

1.KZ.50.^.^ Dilation, blood vessels NEC**S** 5 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

1.KZ.50.GP-BP using percutaneous transluminal approach and dilating device NEC

1.KZ.51.^ ^ Occlusion, blood vessels NEC**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Ligation, blood vessel NEC**Excludes:** that for control of bleeding (see specified organ)

1.KZ.51.GP-W3 using percutaneous transluminal approach and fibrin glue
 1.KZ.51.LA using open approach without tissue [suture]

1.KZ.58.^ ^ Procurement, blood vessels NEC**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

1.KZ.58.LA using open approach

1.KZ.59.^ ^ Destruction, blood vessels NEC**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Excludes: Destruction, lower limb vein (see [1.KR.59.^ ^](#))

1.KZ.59.DA-GX using endoscopic approach and device NEC (e.g. electrocautery)
 1.KZ.59.HA-X7 using percutaneous injection and chemical agent
Includes: Sclerotherapy
 1.KZ.59.LA-GX using open approach and device NEC (e.g. electrocautery)
Includes: Electrofulguration, varicose veins, blood vessels NEC

1.KZ.80.^ ^ Repair, blood vessels NEC**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

1.KZ.80.LA using open approach
 1.KZ.80.LA-XX-A using open approach and autograft
 1.KZ.80.LA-XX-K using open approach and homograft

1.KZ.86.^ ^ Closure of fistula, blood vessels NEC**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Correction, arteriovenous malformation, site NEC
 Repair, acquired arteriovenous fistula, site NEC

1.KZ.86.^ ^ Closure of fistula, blood vessels NEC	by direct repair [without tissue]	using autograft	using homograft	using synthetic material
fistula terminating in site NEC	1.KZ.86.MP	1.KZ.86.MP-XX-A	1.KZ.86.MP-XX-K	1.KZ.86.MP-XX-N

Therapeutic Interventions on Combined Sites for Congenital Heart Anomalies (1LA - 1LD)

1.LA.^^.^^ Therapeutic Interventions on the Aorta with Pulmonary Artery with Interventricular Septum

Excludes: Aorta alone (see [1.ID.^^.^^](#))
 Interventricular septum alone (see [1.HR.^^.^^](#))
 Pulmonary artery alone (see [1.IM.^^.^^](#))

1.LA.84.^^ Construction or reconstruction, aorta with pulmonary artery with interventricular septum

S⁹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 9	Optional	Tx Status 4	Status	A	Abandoned after onset
				S	Staged

Includes: Restoration of right ventricular outflow tract continuity that with construction (aortic homograft)(with prosthesis) of a pulmonary artery placed from right ventricle to arteries supplying the lung that with end to end anastomosis of ascending aorta that with repair of ventricular septal defect

Code Also: Any repair of associated interrupted aortic arch (see [1.ID.76.^^](#) or [1.ID.87.^^](#))

Note: Truncus arteriosus is congenital anomaly which is characterized by the presence of one single arterial trunk that arises from the base of both ventricles by way of a single semi-lunar valve and a ventricular septal defect.

1.LA.84.LA-XX-Q using open approach with combined sources of tissue [e.g. aortic homograft and synthetic material for septal defect]

1.LC.^^.^^ Therapeutic Interventions on the Interventricular Septum with Interatrial Septum and Heart Valves

- Includes:** Endocardial cushion
- Excludes:** Heart valves alone (see appropriate valves)
 Inter-atrial septum alone (see [1.HN.^^.^^](#))
 Interventricular septum alone (see [1.HR.^^.^^](#))

1.LC.84.^^ Construction or reconstruction, interventricular septum with interatrial septum and heart valves**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

- Includes:** Repair, atrial septal defect associated with valvular and ventricular septal defect
 Repair, atrioventricular canal, complete
 Repair, atrioventricular canal, partial (persistent)
 Repair, ostium primum defect that with graft to septa
 that with subaortic myectomy
 Valvuloplasty, with repair of atrioventricular septal defect with tissue graft
- Excludes:** Repair, atrial septal defect alone (see [1.HN.80.^^](#))
 Repair, heart valve alone (see Repair, by valve site)
 Repair, ventricular defect alone (see [1.HR.80.^^](#))

- 1.LC.84.LA using open approach without tissue
 1.LC.84.LA-XX-A using open approach with autograft (grafted to septa)
 1.LC.84.LA-XX-K using open approach with homograft (grafted to septa)
 1.LC.84.LA-XX-L using open approach with xenograft (grafted to septa)
 1.LC.84.LA-XX-N using open approach with synthetic material (grafted to septa)
 1.LC.84.LA-XX-Q using open approach with combined sources of tissue

- Includes:** Double patch technique

1.LD.^^.^^ Therapeutic Interventions on the Interventricular Septum with Pulmonary Valve with Aorta with Right Ventricle

Excludes: Interventricular septum alone (see [1.HR.^^.^^](#))

1.LD.84.^^ Construction or reconstruction, interventricular septum with pulmonary valve with aorta with right ventricle**S**⁹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 9	Optional	Tx Status 4	Status	A	Abandoned after onset
				S	Staged

Includes: Outflow tract prosthesis
Patch graft of outflow tract
Repair of ventricular septal defect (with prosthesis)
Repair, total, tetralogy of Fallot
that with infundibulectomy that with resection of ventricular muscle bundles
that with or without commissurotomy of pulmonary valve
that with patch grafting of infundibulum and main pulmonary artery
that with placement of valved extracardiac conduit

Code Also: Any repair of associated atrial septal defect (Pentalogy of Fallot) (see [1.HN.80.^^](#))
Any repair of right or left pulmonary artery (see [1.IM.80.^^](#))
Takedown of previous systemic-to-pulmonary artery shunt [e.g. Blalock-Taussig] (see [1.IM.82.^^](#))

1.LD.84.^^ Construction or reconstruction, interventricular septum with pulmonary valve with aorta with right ventricle	with transannular patch	without transannular patch
with autograft	1.LD.84.XY-XX-A	1.LD.84.LA-XX-A
with combined sources of tissue	1.LD.84.XY-XX-Q	1.LD.84.LA-XX-Q
with homograft	1.LD.84.XY-XX-K	1.LD.84.LA-XX-K
with synthetic material	1.LD.84.XY-XX-N	1.LD.84.LA-XX-N
with xenograft	1.LD.84.XY-XX-L	1.LD.84.LA-XX-L

Therapeutic Interventions on Circulatory System NEC (1LZ)

1.LZ.^^.^^ Therapeutic Interventions on the Circulatory System NEC

Includes: Blood

1.LZ.19.^^ Transfusion, circulatory system NEC

Includes: Autologous transfusion of previously collected blood or blood components
 Blood [blood component] transfusion
 Exchange transfusion via umbilical vein catheter in infant
 Exchange transfusion, blood
 that by percutaneous instillation, injection (bolus) or intravenous drip

Excludes: Bone marrow transfusion ([1.WY.19.^^](#))
 Infusion of fractionated blood products or blood substitutes (see [1.LZ.35.^^](#))
 that done in utero (see [5.FD.72.^^](#))
 Therapeutic apheresis of blood components ([1.LZ.20^^](#))

1.LZ.19.^^ Transfusion, circulatory system NEC	using autologous transfusion	using exchange transfusion technique	using homologous transfusion
of cryoprecipitate	—	—	1.LZ.19.HH-U5-J
of leukocytes	1.LZ.19.HH-U6-A	—	1.LZ.19.HH-U6-J
of plasma [fresh frozen, stored]	1.LZ.19.HH-U2-A	1.LZ.19.HM-U2	1.LZ.19.HH-U2-J
of platelets	—	—	1.LZ.19.HH-U4-J
of red cell concentrates	1.LZ.19.HH-U1-A	1.LZ.19.HM-U1	1.LZ.19.HH-U1-J
of stem cells	1.LZ.19.HH-U7-A	—	1.LZ.19.HH-U7-J
of whole blood	1.LZ.19.HH-U9-A	1.LZ.19.HM-U9	1.LZ.19.HH-U9-J
of cord blood stem cells	1.LZ.19.HH-U8-A Includes: • That which had been previously obtained and stored	—	1.LZ.19.HH-U8-J

1.LZ.20.^ ^ Apheresis, circulatory system NEC

Includes: Extracorporeal photopheresis (with photosensitizing agents)
 Therapeutic erythrocytapheresis
 Therapeutic leukapheresis
 Therapeutic lymphocytophoresis
 Therapeutic plasmapheresis
 Therapeutic plateletpheresis

Excludes: Apheresis as technique for procurement of blood components for later transfusion into same or other patient (see [1.LZ.58.^ ^](#))

Note: Therapeutic apheresis involves removing the component of the patient's blood that contributes to their disease state, and returning the remaining blood volume (and any hydration support required, e.g. normal saline) at the same episode.

1.LZ.20.H1	using percutaneous approach with erythrocyte removal using automated technique
1.LZ.20.HO	using percutaneous approach with lymphocyte removal using automated technique
1.LZ.20.HT	using percutaneous approach with leukocyte removal using automated technique
1.LZ.20.HU	using percutaneous approach with plasma removal using automated technique
1.LZ.20.HW	using percutaneous approach with platelet removal using automated technique

1.LZ.34.^ ^ Compression, circulatory system NEC

Includes: Application of external pressure for antishock treatment
 Application, M.A.S.T.

Excludes: that for varicose vein therapy (see [1.KR.34.^ ^](#))

1.LZ.34.JA-GN	using continuous external compression device [e.g. antishock trouser, mast]
1.LZ.34.JA-PK	using continuous external vaso-pneumatic device
1.LZ.34.JF-GN	using intermittent external compression device [e.g. antishock trouser, mast]
1.LZ.34.JF-PK	using intermittent external vaso-pneumatic device

1.LZ.35.^ ^ Pharmacotherapy (local), circulatory system NEC

Includes: Infusion of manufactured blood products, blood substitutes and intravenous solutions
 Instillation, circulatory system NEC
 Nutrition, parenteral

Excludes: Administration of immunoglobulin (see [8.ZZ.70.^ ^](#))
 Instillation of systemic pharmacological agent (see [1.ZZ.35.^ ^](#))
 Transfusion of blood and blood components (see [1.LZ.19.^ ^](#))

Code Also: Any insertion of central venous catheter [CVC] (see [1.IS.53.^ ^](#))

1.LZ.35.^ ^ Pharmacotherapy (local), circulatory system NEC	percutaneous infusion approach	percutaneous injection approach	percutaneous transcatheter intraosseous approach
of antihemorrhagic agent	1.LZ.35.HH-C2 Includes: • aminocaproic acid, aprotinin, phytonadione, thrombin, coagulation factor VIII	1.LZ.35.HA-C2 Includes: • aminocaproic acid, aprotinin, phytonadione, thrombin, coagulation factor VIII	1.LZ.35.HR-C2 Includes: • aminocaproic acid, aprotinin, phytonadione, thrombin, coagulation factor VIII
of blood and related products	1.LZ.35.HH-C5 Includes: • albumin, dextran, hetastarch	1.LZ.35.HA-C5 Includes: • albumin, dextran, hetastarch	1.LZ.35.HR-C5 Includes: • albumin, dextran, hetastarch
of parenteral nutrition	1.LZ.35.HH-C6 Includes: • amino acids, fat emulsions, carbohydrates and combinations, for parenteral nutrition	1.LZ.35.HA-C6 Includes: • amino acids, fat emulsions, carbohydrates and combinations, for parenteral nutrition	1.LZ.35.HR-C6 Includes: • amino acids, fat emulsions, carbohydrates and combinations, for parenteral nutrition
of electrolyte balance agents	1.LZ.35.HH-C7	1.LZ.35.HA-C7	1.LZ.35.HR-C7
of synthetic blood substitutes	1.LZ.35.HH-T7	1.LZ.35.HA-T7	—
of pharmacological agent NEC	1.LZ.35.HH-T9	1.LZ.35.HA-T9	1.LZ.35.HR-T9
of agent NEC	1.LZ.35.HH-Z9	1.LZ.35.HA-Z9	1.LZ.35.HR-Z9

1.LZ.37.^ ^ Installation of external appliance, circulatory system NEC

1.LZ.37.^ ^ Installation of external appliance, circulatory system NEC	percutaneous transluminal (closed chest) approach	open (chest) approach
cardiopulmonary bypass (intraoperative)	1.LZ.37.GP-GB Note: • Involves cannulation of the femoral artery and vein (with or without use of a guide wire).	1.LZ.37.LA-GB Includes: • Extracorporeal circulation device installed by open (chest) approach Note: • Usually involves cannulation of ascending aorta with cannula passed through right atrial wall or inferior and superior vena cavae (cannulated separately).
extracorporeal blood salvage device (cell saver) (intraoperative)	—	1.LZ.37.LA-FP Includes: • Intraoperatively salvaged autotransfusion
extracorporeal membrane oxygenator [ECMO]	1.LZ.37.GP-QM Includes: • Extracorporeal life support [ECLS]	—

1.LZ.38.^ ^ Management of external appliance, circulatory system NEC

Includes: Adjustment of external appliance, circulatory system
Detachment of external appliance, circulatory system

1.LZ.38.JA-FP	of intraoperative blood salvage device (cell saver)
1.LZ.38.JA-GB	of extracorporeal bypass device, complete [e.g. heart lung machine]
1.LZ.38.JA-GC	of extracorporeal bypass device, partial
1.LZ.38.JA-QM	of extracorporeal pump (membrane) oxygenator

1.LZ.52.^ ^ Drainage, circulatory system NEC

Includes: Drainage, blood
Exsanguination
Therapeutic phlebotomy

Excludes: Collection of blood for autologous/homologous transfusion (see [1.LZ.58.^ ^](#))
Collection of blood sample for diagnostic testing (see [2.ZZ.13.^ ^](#))

1.LZ.52.HA	using percutaneous (needle) drainage by gravity
1.LZ.52.HB	using percutaneous (needle) aspiration

1.LZ.58.^ ^ Procurement, circulatory system NEC

Includes: Collection of blood components via apheresis (leukapheresis, plasmapheresis, plateletpheresis, stem cell apheresis) for transfusion
Collection of blood for transfusion
that for homologous or autologous transfusion

Excludes: Collection of blood specimen for diagnostic testing (see [2.ZZ.13.^ ^](#))
Therapeutic apheresis for removal of disease involved blood component (see [1.LZ.20.^ ^](#))
Therapeutic phlebotomy (see [1.LZ.52.^ ^](#))

1.LZ.58.HH-U9	percutaneous approach with removal of whole blood
1.LZ.58.HT	percutaneous approach with leukocyte collection using automated technique
1.LZ.58.HU	percutaneous approach with plasma collection using automated technique
1.LZ.58.HW	percutaneous approach with platelet collection using automated technique
1.LZ.58.HX	percutaneous approach with stem cell collection using automated technique

Therapeutic Interventions on the Lymphatic System (1MA - 1MZ)

1.MA.^.^ Therapeutic Interventions on the Lymph Nodes, Head Region

- Includes:** Buccal nodes
Facial nodes
Occipital nodes
Parotid nodes
Postauricular [retroauricular] nodes
Preauricular [anterior auricular] nodes
- Excludes:** Head region nodes with other nodes of neck region (see [1.MC.^.^](#))

1.MA.52.^.^ Drainage, lymph node(s), head region

S⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

- Includes:** Aspiration, head region lymph node (drainage of cyst, abscess etc.)
- Excludes:** Aspiration for biopsy (see [2.MA.71.^.](#))
Aspiration or drainage of cystic hygroma of head and neck region (see [1.ML.52.^.](#))

1.MA.52.HA using percutaneous (needle) approach
1.MA.52.LA using open approach

1.MA.87.^.^ Excision partial, lymph node(s), head region

S⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

- Includes:** Excision, some nodes of head region
Lymphadenectomy, head region

1.MA.87.LA using open approach

1.MC.^.^ Therapeutic Interventions on the Cervical Lymph Nodes

Includes: Cervical nodes [superficial and deep]
 Level I nodes [submandibular and submental trigone]
 Level II nodes [upper jugular], level III nodes [middle jugular]
 Level IV nodes [lower jugular]
 Level V nodes [posterior triangle including spinal accessory, transverse cervical and supraclavicular nodes]
 Level VI nodes [anterior/central compartment including paratracheal, pretracheal, parathyroid, precricoid, Delphian and prelaryngeal nodes located above the suprasternal notch]
 Retropharyngeal nodes

1.MC.52.^.^ Drainage, lymph node(s), cervical**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Aspiration, neck lymph node (drainage of cyst, abscess etc.)

Excludes: Aspiration for biopsy (see [2.MC.71.^.](#))

1.MC.52.HA using percutaneous (needle) approach

1.MC.52.LA using open approach

1.MC.59.^.^ Destruction, lymph node(s), cervical**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Ablation, cervical lymph node(s)

Excludes: Ablation, lymphatic vessels of head and neck region (see [1.ML.59.^.](#))

1.MC.59.HA-AG using percutaneous approach and laser

1.MC.59.HA-AW using percutaneous approach and radiofrequency probe

1.MC.59.HA-X7 using percutaneous approach and chemical agent [e.g. alcohol]

1.MC.87.^ ^ Excision partial, lymph node(s), cervical**S** 4 **L** 72

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 72	Mandatory	Bilaterality Mandatory	Location	B	Bilateral
				L	Left
				R	Right
				U	Unilateral unspecified

Includes: Limited neck dissection
 Lymphadenectomy partial, neck region
 Selective level I-III (supraomohyoid) neck dissection
 Selective level I-IV (extended supraomohyoid or anterolateral) neck dissection
 Selective level II-IV (lateral) neck dissection
 Selective level II-V (posterolateral) neck dissection
 Selective level VI (anterior or central compartment) neck dissection
 that with or without graft or flap repair of resulting surgical defect

Excludes: Excision, all nodes [Level I-V] of neck region (see [1.MC.89.^ ^](#) and [1.MC.91.^ ^](#))
 Excision, one or two nodes for biopsy (see [2.MC.71.^ ^](#))
 that with sacrifice of at least one of the following: sternocleidomastoid muscle, internal jugular vein and/or spinal accessory nerve (see [1.MC.91.^ ^](#))

Code Also: Any concomitant parotidectomy (see [1.FM.87.^ ^](#), [1.FM.89.^ ^](#), [1.FM.91.^ ^](#))
 Any intraoperative microscope assistance (see [3.MZ.94.^ ^](#))

Note: Selective neck dissection involves removal of select levels of nodes with preservation of the sternocleidomastoid muscle, internal jugular vein and spinal accessory nerve. The submandibular gland is typically removed in selective neck dissections that involve Level I nodes and is not coded separately.
 If different types of dissections are performed on each side of the neck, code each side separately

1.MC.87.LA	using open approach with no tissue
1.MC.87.LA-XX-A	using open approach with full thickness graft
1.MC.87.LA-XX-E	using open approach with local flap
1.MC.87.LA-XX-F	using open approach with free distant flap
1.MC.87.LA-XX-G	using open approach with pedicled distant flap
1.MC.87.LA-XX-N	using open approach with synthetic tissue

1.MC.89.^ Excision total, lymph node(s), cervical**S** 4 **L** 72

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 72	Mandatory	Bilaterality Mandatory	Location	B	Bilateral
				L	Left
				R	Right
				U	Unilateral unspecified

Includes: Functional neck dissection
Lymphadenectomy total, neck region [Level I-V]
that with or without graft or flap repair of resulting surgical defect

Excludes: "Functional" selective neck dissection (see [1.MC.87.^](#))
Radical dissection of neck region (see [1.MC.91.^](#))
that with sacrifice of the internal jugular vein and/or spinal accessory nerve and/or sternocleidomastoid muscle (see [1.MC.91.^](#))

Code Also: Any concomitant parotidectomy (see [1.FM.87.^](#), [1.FM.89.^](#), [1.FM.91.^](#))
Any intraoperative microscope assistance (see [3.MZ.94.^](#))

Note: Functional neck dissection involves removal of all nodes [Level I-V] on one side of neck with preservation of the sternocleidomastoid muscle, internal jugular vein and spinal accessory nerve. The submandibular gland is typically always removed and is not coded separately.
If different types of dissections are performed on each side of the neck, code each side separately

1.MC.89.LA using open approach with no tissue
1.MC.89.LA-XX-A using open approach with full thickness graft
1.MC.89.LA-XX-E using open approach with local flap
1.MC.89.LA-XX-F using open approach with free distant flap
1.MC.89.LA-XX-G using open approach with pedicled distant flap
1.MC.89.LA-XX-N using open approach with synthetic tissue

1.MC.91.^ Excision radical, lymph node(s), cervical**S** 4 **L** 72

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 72	Mandatory	Bilaterality Mandatory	Location	B	Bilateral
				L	Left
				R	Right
				U	Unilateral unspecified

- Includes:** Extended radical neck dissection
Lymphadenectomy radical, neck region
Modified radical neck dissection
that with tissue graft or flap repair of resulting surgical defect
- Excludes:** Excision, all nodes of neck region [Level I-V] with preservation of internal jugular vein, spinal accessory nerve and sternocleidomastoid muscle (see [1.MC.89.^^](#))
Modified radical neck dissection with preservation of internal jugular vein, spinal accessory nerve and sternocleidomastoid muscle [functional neck dissection] (see [1.MC.89.^^](#))
- Code Also:** Any concomitant parotidectomy (see [1.FM.87.^^](#), [1.FM.89.^^](#), [1.FM.91.^^](#))
Any intraoperative microscope assistance (see [3.MZ.94.^^](#))
- Note:** (1) Radical neck dissection - removes all nodes (Level I-V) on one side of neck, with sacrifice of internal jugular vein, spinal accessory nerve and sternocleidomastoid muscle.
(2) Extended radical neck dissection - involves radical neck dissection with removal of one or more lymph node groups [Level VI, retropharyngeal, superior mediastinal - pre-tracheal, paratracheal, pre-carinal] and/or non-lymphatic structures [carotid artery, hypoglossal nerve, vagus nerve, paraspinal muscles, vertebral body] that are not routinely removed in radical neck dissection.
(3) Modified radical neck dissection - removes all nodes (Level I-V) on one side of neck with sacrifice of at least one (but not all) of the following: internal jugular vein, spinal accessory nerve or sternocleidomastoid muscle.
The submandibular gland is typically removed in any of these dissections and is not coded separately.
If different types of dissections are performed on each side of the neck, code each side separately.

1.MC.91.^^ Excision radical, lymph node(s), cervical	without tissue	using free distant flap	using full thickness graft	using local flap	using pedicled distant flap

1.MD.89.LA-XX-G	using open approach with pedicled distant flap
1.MD.89.LA-XX-N	using open approach with synthetic tissue

1.ME.^.^ Therapeutic Interventions on the Mediastinal Lymph Nodes

Includes: Anterior and posterior mediastinal nodes
Aortic nodes [subaortic and para-aortic nodes of the ascending aorta and aortic arch]
Inferior mediastinal nodes [subcarinal, paraesophageal and pulmonary ligament nodes]
Superior mediastinal nodes [pre-tracheal, upper paratracheal, pre-carinal and lower paratracheal nodes located below the suprasternal notch]
Tracheobronchial nodes [tracheal/paratracheal, deep and inferior tracheobronchial, bronchopulmonary and pulmonary]

Excludes: Mediastinal nodes with other intrathoracic nodes (see [1.MF.^.^](#))

1.ME.52.^ ^ Drainage, lymph node(s), mediastinal**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Aspiration, mediastinal lymph node (drainage of cyst, abscess etc.)

Excludes: Aspiration for biopsy (see [2.ME.71.^ ^](#))

1.ME.52.DA using endoscopic approach
 1.ME.52.HA using percutaneous (needle) approach
 1.ME.52.LA using open approach

1.ME.59.^ ^ Destruction, lymph node(s), mediastinal**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Ablation, mediastinal lymph node(s)

Excludes: Ablation, lymphatic vessels of thoracic region (see [1.MN.59.^ ^](#))

1.ME.59.HA-AG using percutaneous approach and laser
 1.ME.59.HA-AW using percutaneous approach and radiofrequency probe
 1.ME.59.HA-X7 using percutaneous approach and chemical agent [e.g. alcohol]

1.ME.87.^ ^ Excision partial, lymph node(s), mediastinal**S** 4 **L** 64

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 64	Optional	Lymph nodes	Location	A N	Anterior mediastinal
				I F	Inferior tracheobronchial
				P S	Posterior mediastinal
				S E	Superior tracheobronchial
				U	Unspecified

Includes:	Excision, some mediastinal nodes Lymphadenectomy, some mediastinal nodes
Excludes:	Excision, all mediastinal nodes (see 1.ME.89.^^) Excision, one or two mediastinal nodes for biopsy (see 2.ME.71.^^)
Code Also:	Any intraoperative microscope assistance (see 3.MZ.94.^^)
1.ME.87.DA	using endoscopic approach
1.ME.87.LA	using open approach

1.ME.89.^^ Excision total, lymph node(s), mediastinal**S**⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes:	Excision, all mediastinal nodes Lymphadenectomy, all mediastinal nodes
Excludes:	Excision, some mediastinal nodes (see 1.ME.87.^^)
Code Also:	Any intraoperative microscope assistance (see 3.MZ.94.^^)
1.ME.89.DA	using endoscopic approach
1.ME.89.LA	using open approach

1.MF.^^.^^ Therapeutic Interventions on the Intrathoracic Lymph Nodes NEC

Includes:	Diaphragmatic nodes Intercostal nodes Mediastinal nodes with other intrathoracic nodes Nodes of the thoracic organs Parasternal nodes [internal mammary] Parietal nodes of thoracic wall
Excludes:	Mediastinal nodes alone (see 1.ME.^^.^^)

1.MF.27.^^ Radiation, lymph node(s), intrathoracic NEC

Includes:	Teletherapy, intrathoracic/ mediastinal lymph nodes Therapy, radiation, [radiotherapy] intrathoracic/ mediastinal lymph nodes
1.MF.27.JA	using external beam

1.MF.52.^ ^ Drainage, lymph node(s), intrathoracic NEC**S** ⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Ablation, intrathoracic lymph node(s)

Excludes: Ablation, lymphatic vessels of thoracic region (see [1.MN.59.^ ^](#))

1.MF.59.HA-AG using percutaneous approach and laser
 1.MF.59.HA-AW using percutaneous approach and radiofrequency probe
 1.MF.59.HA-X7 using percutaneous approach and chemical agent [e.g. alcohol]

1.MF.87.^ ^ Excision partial, lymph node(s), intrathoracic NEC**S** ⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Excision, some nodes or a group of intrathoracic lymph nodes
 Lymphadenectomy, some intrathoracic nodes

Excludes: Excision of one or two nodes for biopsy (see [2.MF.71.^ ^](#))

Code Also: Any intraoperative microscope assistance (see [3.MZ.94.^ ^](#))

1.MF.87.DA using endoscopic approach
 1.MF.87.LA using open approach

1.MG.^.^ Therapeutic Interventions on Intra Abdominal Lymph Nodes

Includes: Intra aortocaval nodes [preaortic, lateral aortic, periaortic nodes located below the diaphragm]
 Mesenteric nodes
 Nodes of the abdominal organs
 Para caval nodes
 Retrocrural nodes
 Retroperitoneal nodes

1.MG.27.^.^ Radiation, lymph node(s), intra abdominal

Includes: Teletherapy, intra abdominal lymph nodes
 Therapy, radiation [radiotherapy], intra abdominal lymph nodes

1.MG.27.JA using external beam

1.MG.52.^.^ Drainage, lymph node(s), intra abdominal**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Aspiration, intra abdominal lymph node (drainage of cyst, abscess etc.)

Excludes: Aspiration for biopsy (see [2.MG.71.^.](#))

Code Also: Any intraoperative microscope assistance (see [3.MZ.94.^.](#))

1.MG.52.DA using endoscopic approach
 1.MG.52.HA using percutaneous (needle) approach
 1.MG.52.LA using open approach

1.MG.87.^.^ Excision partial, lymph node(s), intra abdominal**S** 4 **L** 65

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 65	Optional	Lymph nodes	Location	A Z	Aortic
				I A	Intra-abdominal
				R P	Retroperitoneal
				U	Unspecified

Includes:	Excision, some intra abdominal nodes Lymphadenectomy, some intra abdominal nodes
Excludes:	Excision, all intra-abdominal nodes (see 1.MG.89.^) Excision, one or two intra-abdominal nodes for biopsy (see 2.MG.71.^)
Code Also:	Any intraoperative microscope assistance (see 3.MZ.94.^)
1.MG.87.DA	using endoscopic approach
1.MG.87.LA	using open approach
1.MG.87.QF	using thoraco abdominal approach

1.MG.89.^ Excision total, lymph node(s), intra abdominal**S** 4 **L** 65

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 65	Optional	Lymph nodes	Location	A Z	Aortic
				I A	Intra-abdominal
				R P	Retroperitoneal
				U	Unspecified

Includes:	Lymphadenectomy, intra abdominal nodes with surrounding tissue Retroperitoneal dissection
Excludes:	Excision, some intra-abdominal nodes (see 1.MG.87.^)
Code Also:	Any intraoperative microscope assistance (see 3.MZ.94.^)

1.MG.89.DA	using endoscopic approach
1.MG.89.LA	using open approach
1.MG.89.QF	using thoraco abdominal approach

1.MH.^.^ Therapeutic Interventions on the Pelvic Lymph Nodes

Includes:	Circumflex nodes Common iliac nodes External iliac nodes Internal iliac nodes Intrapelvic nodes Obturator nodes Paracervical nodes Parametrial nodes Presymphysial nodes Sacral nodes
------------------	--

1.MH.27.^ ^ Radiation, lymph node(s), pelvic

Includes: Teletherapy, pelvic lymph nodes
Therapy, radiation [radiotherapy], pelvic lymph nodes

1.MH.27.JA using external beam

1.MH.52.^ ^ Drainage, lymph node(s), pelvic**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Aspiration, pelvic lymph node (drainage of cyst, abscess etc.)

Excludes: Aspiration for biopsy (see [2.MH.71.^ ^](#))

Code Also: Any intraoperative microscope assistance (see [3.MZ.94.^ ^](#))

1.MH.52.DA using endoscopic approach
1.MH.52.HA using percutaneous (needle) approach
1.MH.52.LA using open approach

1.MH.87.^ ^ Excision partial, lymph node(s), pelvic**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Excision, some pelvic nodes
Lymphadenectomy, some pelvic nodes

Excludes: Excision, all nodes in pelvic region (see [1.MH.89.^ ^](#))
Excision, one or two nodes for biopsy (see [2.MH.71.^ ^](#))
that with radical excision of prostate (see [1.QT.91.^ ^](#))

Code Also: Any intraoperative microscope assistance (see [3.MZ.94.^ ^](#))

1.MH.87.DA using endoscopic approach
1.MH.87.LA using open approach

S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Excision, all nodes in pelvic region
Lymphadenectomy, all pelvic nodes with surrounding tissue

Excludes: Excision, some nodes in pelvic region (see [1.MH.87.^.^](#))
that with radical excision of prostate (see [1.QT.91.^.^](#))
that with radical hysterectomy (see [1.RM.91.^.^](#))

Code Also: Any intraoperative microscope assistance (see [3.MZ.94.^.^](#))

1.MH.89.DA using endoscopic approach
1.MH.89.LA using open approach

1.MJ.^.^ Therapeutic Interventions on the Inguinal Lymph Nodes

Includes: Inguinofemoral nodes
Lymph nodes of groin region
Superficial and deep inguinal nodes

Excludes: Femoral nodes alone (see [1.MK.^.^](#))

1.MJ.27.^.^ Radiation, lymph node(s), inguinal

Includes: Teletherapy, inguinal lymph nodes
Therapy, radiation [radiotherapy], inguinal lymph nodes

1.MJ.27.JA using external beam

1.MJ.52.^.^ Drainage, lymph node(s), inguinal**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Aspiration, inguinal lymph node (drainage of cyst, abscess etc.)

Excludes: Aspiration for biopsy (see [2.MJ.71.^^](#))

Code Also: Any intraoperative microscope assistance (see [3.MZ.94.^^](#))

1.MJ.52.HA using percutaneous (needle) approach
1.MJ.52.LA using open approach

1.MJ.87.^^ Excision partial, lymph node(s), inguinal

S 4 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Excision, some nodes of inguinal region
Lymphadenectomy, some inguinal nodes

Excludes: Excision, all superficial or deep inguinal nodes (see [1.MJ.89.^^](#))
Excision, one or two nodes for biopsy (see [2.MJ.71.^^](#))

Code Also: Any intraoperative microscope assistance (see [3.MZ.94.^^](#))

1.MJ.87.DA using endoscopic approach
1.MJ.87.LA using open approach

1.MJ.89.^^ Excision total, lymph node(s), inguinal

S 4 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes:	Excision radical, all lymph nodes (superficial and/or deep) of inguinal region (reduced margins from that used in standard inguinal lymphadenectomy) Lymphadenectomy, modified inguinal, with surrounding tissue
Excludes:	Excision (extended), all superficial and deep inguinal nodes (see 1.MJ.91.^^)
Code Also:	Any intraoperative microscope assistance (see 3.MZ.94.^^)
1.MJ.89.DA	using endoscopic approach
1.MJ.89.DA-AZ	using endoscopic approach with ultrasound aspiration technique
1.MJ.89.LA	using open approach
1.MJ.89.LA-AZ	using open approach with ultrasound aspiration technique

1.MJ.91.^^ Excision radical, lymph node(s), inguinal**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes:	Excision radical, all superficial and deep inguinal nodes with all node bearing tissue, fascia, saphenous vein, with or without skin Radical excision, groin that with tissue graft/flap repair
Excludes:	(Standard) inguinal lymphadenectomy (with margins greater than modified inguinal lymphadenectomy (see 1.MJ.89.^^) Excision, all superficial or deep inguinal nodes (see 1.MJ.89.^^)
Code Also:	Any intraoperative microscope assistance (see 3.MZ.94.^^)
Omit code:	Lymphadenectomy, incidental to other inguinal surgery

1.MJ.91.LA-XX-A	using open approach with full thickness graft
1.MJ.91.LA-XX-E	using open approach with local flap
1.MJ.91.LA-XX-F	using open approach with free distant flap
1.MJ.91.LA-XX-G	using open approach with pedicled distant flap
1.MJ.91.LA-XX-N	using open approach with synthetic tissue

1.MK.^.^ Therapeutic Interventions on Lymph Nodes of Extremity NEC

Includes: Anterior tibial nodes
 Anti cubital nodes
 Brachial nodes
 Femoral nodes
 Other lower limb nodes
 Other upper limb nodes
 Popliteal nodes
 Tibial nodes

Excludes: Axillary nodes (see [1.MD.^.^](#))
 Inguinofemoral nodes (see [1.MJ.^.^](#))

1.MK.52.^.^ Drainage, lymph node(s), extremity NEC**S** 4 **L** 16

1.MS.52.^ ^ Drainage, lymphatic vessels of leg**S** 4 **L** 18

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 18	Optional	Lower extremities	Location	B L	Bilateral (both) legs
				L L	Left leg
				R L	Right leg

Includes: Aspiration, lymphocele of lower extremity (for drainage of fluid)

1.MS.52.HA using percutaneous (needle) approach
 1.MS.52.LA using open approach

1.MS.59.^ ^ Destruction, lymphatic vessels of leg**S** 4 **L** 18

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 18	Optional	Lower extremities	Location	B L	Bilateral (both) legs
				L L	Left leg
				R L	Right leg

Includes: Sclerotherapy, lymphatic vessels of leg

1.MS.59.HA-X7 using percutaneous needle approach [injection] with chemical agent
 1.MS.59.LA-GX using open approach with device NEC

1.MS.76.^ ^ Bypass, lymphatic vessels of leg**S** 4 **L** 18

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 18	Optional	Lower extremities	Location	B L	Bilateral (both) legs
				L L	Left leg
				R L	Right leg

Includes: Anastomosis, lymphatic vessels of lower extremity
 Bypass (obstruction), lymphatic vessels of lower extremity
 Shunt, lymphaticovenous, lower extremity
 Shunt, lymphnodal venous, lower extremity
 Transplantation, lymph vessel of lower extremity

Code Also: Any intraoperative microscope assistance (see [3.MZ.94.^^](#))

1.MS.76.LA-XX-A using open approach with full thickness graft (e.g. vein or lymph vessel transfer)
 1.MS.76.LA-XX-N using open approach with synthetic shunt (e.g. plastic tubing)
 1.MS.76.NL using open approach with lymphaticovenous or lymphnodal-venous shunt

1.MS.80.^^ Repair, lymphatic vessels of leg

S 5 **L** 18

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 18	Optional	Lower extremities	Location	B L	Bilateral (both) legs
				L L	Left leg
				R L	Right leg

Includes: Closure of simple fistula, lymphatic vessel of lower extremity
 Lymphangioplasty, lower extremity
 Lymphangiorrhaphy, lower extremity

Excludes: that for bypass of obstruction (see [1.MS.76.^^](#))

Code Also: Any intraoperative microscope assistance (see [3.MZ.94.^^](#))

1.MS.80.^^ Repair, lymphatic vessels of leg	no tissue used	using full thickness graft	using synthetic tissue	using xenograft
using no device	1.MS.80.LA	1.MS.80.LA-XX-A	1.MS.80.LA-XX-N	1.MS.80.LA-XX-L
using device NEC	1.MS.80.LA-GX	—	—	—

1.MS.87.^ ^ Excision partial, lymphatic vessels of leg**S** 4 **L** 18

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 18	Optional	Lower extremities	Location	B L	Bilateral (both) legs
				L L	Left leg
				R L	Right leg

Includes: Excision, lymphangioma, lower extremity
 Excision, lymphocele, lower extremity
 Lymphangiectomy, lower extremity
 Lymphoidectomy, lower extremity

Code Also: Any intraoperative microscope assistance (see [3.MZ.94.^ ^](#))

1.MS.87.LA using open approach with no tissue
 1.MS.87.LA-XX-A using open approach with full thickness graft
 1.MS.87.LA-XX-L using open approach with xenograft
 1.MS.87.LA-XX-N using open approach with synthetic tissue

1.MS.91.^ ^ Excision radical, lymphatic vessels of leg**S** 4 **L** 18

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 18	Optional	Lower extremities	Location	B L	Bilateral (both) legs
				L L	Left leg
				R L	Right leg

Includes: Limb reduction, lower extremity (for correction of lymphedema)
 Lymphangiectomy, radical with excision of adjacent tissue or structures, lower extremity

Code Also: Any intraoperative microscope assistance (see [3.MZ.94.^ ^](#))

Note: May involve resection of lymph vessels as well as adjacent soft tissue, vascular and neural tissue with or without a flap or graft repair of resulting surgical defect.

1.MS.91.LA using open approach
 1.MS.91.LA-XX-A using open approach with full thickness graft
 1.MS.91.LA-XX-E using open approach with local flap
 1.MS.91.LA-XX-F using open approach with distant free flap
 1.MS.91.LA-XX-G using open approach with distant pedicle flap

1.MZ.^.^ Therapeutic Interventions on the Lymphatic System NEC**1.MZ.27.^.^ Radiation, lymphatic system NEC**

Includes: Teletherapy, lymphatic system NEC
Therapy, radiation [radiotherapy], lymphatic system NEC

1.MZ.27.JA	using external beam
------------	---------------------

1.MZ.94.^.^ Therapeutic intervention NEC, lymphatic system NEC

1.MZ.94.DA	using endoscopic approach
1.MZ.94.HA	using percutaneous (needle) approach
1.MZ.94.LA	using open approach

Therapeutic Interventions on the Digestive and Hepatobiliary Tracts and Other Sites within the Abdominal Cavity NEC (1NA - 1OZ)

Therapeutic Interventions on the Digestive Tract (1NA - 1NV)

1.NA.^^.^^ Therapeutic Interventions on the Esophagus

- Includes:** Anastomotic site of esophagus to stomach for continuity
Cardiac orifice, ostium, notch
Cardioesophageal junction
Esophagus [cervical, thoracic and abdominal]
- Excludes:** Anastomosis of surgically constructed site [interpositional intestine flap] (see [1.OW.^^.^^](#))
Interventions performed on (previously created) neoesophagus (see [1.OW.^^.^^](#))

1.NA.13.^^ Control of bleeding, esophagus

S 16

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 16	Optional	Tx Status 10	Status	A	Abandoned after onset
				C	Converted (from endoscopic to open approach)

- Includes:** Banding, esophageal varices
Control of hemorrhage, esophagus
Embolization, esophagus [transarterial, transcatheter]
Occlusion, esophageal varices
Sclerotherapy, esophagus
Transection, esophageal (to manage bleeding varices)
- Excludes:** Systemic pharmacotherapy for control of bleeding (see [1.ZZ.35.^^](#))

1.NA.13.BA	using endoscopic per orifice approach
1.NA.13.BA-AG	using endoscopic per orifice approach and laser
1.NA.13.BA-BD	using endoscopic per orifice approach and balloon (or Sengstaken) tube tamponade
1.NA.13.BA-FA	using endoscopic per orifice approach and banding (varices)
1.NA.13.BA-GX	using endoscopic per orifice approach and device NEC (e.g. electrocautery, endoclips)
1.NA.13.BA-KK	using endoscopic per orifice approach and special electrical heat device [e.g. argon beam coagulator, gold probe]
1.NA.13.BA-X7	using endoscopic per orifice approach and chemical agent [e.g. ethanolamine, morrhuate sodium, polidocanol, sclerosants, tetradecyl sulfate]
1.NA.13.DA-E3	using endoscopic [VATS] approach and cardiac stimulant (e.g. epinephrine)
1.NA.13.GQ-C2	using percutaneous transluminal approach [e.g. transarterial] approach and antihemorrhagic agent
	Includes: aminocaproic acid, aprotinin, phytonadione, thrombin, coagulation factor VIII
1.NA.13.LB	using open abdominal approach (for transection)

1.NA.26.^ ^ Brachytherapy, esophagus**S** 35

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 35	Optional	Implant Status	Status	P M	Permanent implant – Radioactive source left in place permanently
				T M	Temporary implant – Radioactive source removed after course of treatment is complete

Includes: Endocurietherapy, esophagus
 Implantation of radioactive material, esophagus
 Intracavitary radiation therapy, esophagus
 Intraluminal radiation therapy, esophagus

Code Also: Any concomitant implantation of brachytherapy applicators or conduits [e.g. needles, catheters] to gain access to treatment site (see [1.NA.53.^ ^](#))

Note: There are typically two distinct phases required to complete the process of brachytherapy. The first phase involves the insertion of non-radioactive applicators or conduits [e.g. hollow needles, catheters, stents, etc.] that receive or transmit the radioactive material into the body. The second phase involves the after loading of the radioactive material [e.g. seeds, pellets, wires, etc.] into the applicator or conduit.

1.NA.26.BA	using endoscopic per orifice approach
1.NA.26.CA	using per orifice approach
1.NA.26.LA	using open approach

1.NA.27.^ ^ Radiation, esophagus

Includes: Teletherapy, esophagus
 Therapy, radiation [radiotherapy], esophagus

Note: Involves external beam irradiation of the lower third of the esophagus which may extend into the stomach.

1.NA.27.JA	using external beam
1.NA.27.JX	using focused beam [e.g. gamma knife, cyber knife stereotactic radiosurgery]

1.NA.35.^ ^ Pharmacotherapy (local), esophagus

Includes: Partial chemodenervation, lower esophageal sphincter

Excludes: Injection of agent, esophagus, for control of bleeding (see [1.NA.13.^ ^](#))
 Tumor mapping [tattooing], esophagus (see [7.SF.13.^ ^](#))

1.NA.35.BA-J2	using endoscopic per orifice approach and corticosteroid agent
1.NA.35.BA-L7	using endoscopic per orifice injection of bacterial toxin (e.g. botulinum toxin or Botox)
1.NA.35.BA-T9	using endoscopic per orifice approach and pharmacological agent NEC

1.NA.50.^ Dilation, esophagus**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Peroral endoscopic myotomy (POEM)

Code Also: Pharmacotherapy delivered locally (see [1.NA.35.^](#))

1.NA.50.^ Dilation, esophagus	endoscopic per orifice approach	endoscopic per orifice approach with incision	per orifice approach
using balloon dilator	1.NA.50.BA-BD	1.NA.50.BT-BD	—
using flexible dilator	1.NA.50.BA-BJ	1.NA.50.BT-BJ	1.NA.50.CA-BJ Includes: • (Unguided) esophageal dilation by Hurst/Maloney bougie
using rigid dilator	1.NA.50.BA-BP	1.NA.50.BT-BP	—
using hydrostatic balloon [or bag]	1.NA.50.BA-BL	1.NA.50.BT-BL	—
using stent	1.NA.50.BA-NR	1.NA.50.BT-NR	—

1.NA.52.^ Drainage, esophagus**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Drainage (with dilation), esophagus
Esophagotomy (for drainage)
Insertion, esophagostomy tube
Insertion, indwelling drainage tube, esophagus
that with or without irrigation

Excludes: Esophagostomy (see [1.NA.77.^](#))
Irrigation of previously implanted device (see [1.NA.54.^](#))

1.NA.52.BA	using endoscopic per orifice approach and aspiration
1.NA.52.CA-NR	using per orifice approach and stent (for dilation and drainage)
1.NA.52.CA-TS	using per orifice approach and leaving indwelling tube
1.NA.52.LP	using open (cervical) approach
1.NA.52.LP-TS	using open (cervical) approach and leaving indwelling drainage tube (esophagostomy tube)

1.NA.53.^ ^ Implantation of internal device, esophagus**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Implantation, brachytherapy applicator, esophagus
Insertion, esophageal obturator airway

Excludes: Insertion of drainage tube into esophagus (see [1.NA.52.^ ^](#))
Insertion of nasogastric drainage tube (see [1.NF.52.^ ^](#))
Insertion of nasogastric feeding tube (see [1.NF.53.^ ^](#))
Intubation with cervical esophagotomy (see [1.NA.52.^ ^](#))
that for tamponade [e.g. balloon or Sengstaken tube] (see [1.NA.13.^ ^](#))

Code Also: Any concomitant loading of brachytherapy applicator (see [1.NA.26.^ ^](#))

1.NA.53.BA-EM	of brachytherapy applicator using endoscopic per orifice approach
1.NA.53.CA-EM	of brachytherapy applicator using per orifice approach
1.NA.53.CA-NB	of airway [esophageal obturator] using per orifice approach
1.NA.53.LA-EM	of brachytherapy applicator using open approach

1.NA.54.^ ^ Management of internal device, esophagus

Includes: Adjustment of device, esophagus
Irrigation or cleansing of device, esophagus

1.NA.54.JA-HG	of esophagostomy tube
1.NA.54.JA-NR	of stent (e.g. silicone)
1.NA.54.JA-TS	of tube (indwelling)

1.NA.55.^ ^ Removal of device, esophagus

Excludes: that with replacement of device (see [1.NA.53.^ ^](#))

1.NA.55.BA-EB	of radioactive implant using endoscopic per orifice approach
1.NA.55.BA-GX	of device NEC [e.g. endoclips] using endoscopic per orifice approach
1.NA.55.CA-EB	of radioactive implant using per orifice approach
1.NA.55.JA-BD	of mechanical balloon (e.g. for tamponade)
1.NA.55.JA-HG	of esophagostomy tube
1.NA.55.JA-NR	of stent (e.g. silicone)
1.NA.55.JA-TS	of tube (permanent)
1.NA.55.LA-EB	of radioactive implant using open approach

1.NA.56.^ ^ Removal of foreign body, esophagus**S** 16

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 16	Optional	Tx Status 10	Status	A	Abandoned after onset
				C	Converted (from endoscopic to open approach)

Includes: Extraction, food bolus, esophagus

Code Also: Any robotic assisted telemanipulation of tools (see [7.SF.14.^ ^](#))
Initial laparoscopy for exploration (see [2.OT.70.^ ^](#))

Note: When initial laparoscopy or thoracoscopy is performed for exploration, and resection is then performed through open incision, use open approach.

1.NA.56.^ ^ Removal of foreign body, esophagus	using apposition technique [e.g. suturing] for closure or no closure required (for tissue regeneration)	using free flap [e.g. free muscle or interpositional intestinal flap] for closure	using pedicled flap [e.g. gastric fundus wrap, fundoplication, pleura, pericardium, diaphragm] for closure
using combined endoscopic thoracoabdominal approach (may involve mixing both open and endoscopic approaches to thorax and abdomen with or without a cervical incision)	1.NA.56.FA	1.NA.56.FA-XX-F	1.NA.56.FA-XX-G
using combined open thoracoabdominal approach	—	1.NA.56.QF-XX-F	1.NA.56.QF-XX-G
using endoscopic abdominal approach [e.g. open cervical with laparoscopic approach]	1.NA.56.DB Includes: • open cervical with laparoscopic approach	1.NA.56.DB-XX-F Includes: • open cervical with laparoscopic approach	1.NA.56.DB-XX-G Includes: • open cervical with laparoscopic approach
using endoscopic per orifice approach	1.NA.56.BA	—	—
using endoscopic thoracic approach [e.g. thoracoscopy, cervical with thoracoscopic]	1.NA.56.EZ	—	1.NA.56.EZ-XX-G
using open abdominal approach [e.g. cervical with abdominal approach, transhiatal approach]	1.NA.56.LB	1.NA.56.LB-XX-F	1.NA.56.LB-XX-G
using open cervical approach	1.NA.56.LP	1.NA.56.LP-XX-F	1.NA.56.LP-XX-G
using open thoracic approach [e.g. open cervicothoracic approach]	1.NA.56.QB	1.NA.56.QB-XX-F	1.NA.56.QB-XX-G

1.NA.59.^ ^ Destruction, esophagus**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

- Includes:** Ablation, esophagus
Debulking [neoplasm], esophagus
Rupture, esophageal web
Takedown, esophageal web
- Excludes:** Sclerotherapy for control of bleeding (see [1.NA.13.^^](#))

- 1.NA.59.BA-AD using endoscopic per orifice approach and cryoprobe
1.NA.59.BA-AG using endoscopic per orifice approach and laser
Includes: Photodynamic therapy (PDT) of the esophagus that with or without photosensitizing agent
- 1.NA.59.BA-AW using endoscopic per orifice approach and radiofrequency
Includes: Radiofrequency ablation, esophagus
- 1.NA.59.BA-GX using endoscopic per orifice approach and device NEC
1.NA.59.BA-X7 using endoscopic per orifice approach and chemical cautery agent [e.g. ethanol, adrenaline, hypertonic solution]

1.NA.72.^^ Release, esophagus**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

- Includes:** Division [for release], lower esophageal sphincter
Heller's Procedure
Myotomy, esophagus
- Excludes:** Myotomy, cricopharyngeal for diverticulectomy (see [1.FX.87.^^](#))
Myotomy, cricopharyngeal for diverticulopexy (see [1.NA.74.^^](#))
Myotomy, esophageal sphincter with fundoplication, gastroesophageal junction (see [1.NA.80.^^](#))
Peroral endoscopic myotomy (POEM) (see [1.NA.50.^^](#))
Release with fundoplication, esophagus (see [1.NA.80.^^](#))

- 1.NA.72.DB using endoscopic abdominal approach
Includes: open cervical with laparoscopic approach
- 1.NA.72.EZ using endoscopic thoracic approach
Includes: thoracoscopic approach
- 1.NA.72.LB using open abdominal approach
Includes: open cervical with abdominal or transhiatal approach
- 1.NA.72.LP using open cervical approach
1.NA.72.QB using open thoracic approach

1.NA.74.^ ^ Fixation, esophagus**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Diverticulopexy, pharyngeal
Diverticulopexy, Zenker's
that with cricopharyngeal myotomy

1.NA.74.BA using endoscopic [per orifice] approach

Includes: Endoscopic stapled diverticulotomy

1.NA.74.LP using open (cervical) approach

1.NA.76.^ ^ Bypass, esophagus**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Diversion, esophagus
Esophagoesophagostomy [for exclusion and diversion]
Esophagogastrostomy [for exclusion and diversion]
Exclusion and diversion, esophagus

Excludes: Esophagoenterostomy [for exclusion and diversion] see [1.NF.76.^ ^](#))
Esophagostomy [to the skin] (see [1.NA.77.^ ^](#))

Note: Use this code when bypass of part of esophagus is performed to promote its healing following perforation trauma or resection.

1.NA.76.^ ^ Bypass, esophagus	thoracic approach (may include cervical with thoracic approach)	thoracoabdominal approach (may include cervical with thoracoabdominal approach)
esophagoesophagostomy	1.NA.76.QD	1.NA.76.QH
esophagogastrostomy	—	1.NA.76.QG

1.NA.77.^ ^ Bypass with exteriorization, esophagus**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Cervical loop esophagostomy
Esophagostomy NOS

Excludes: Insertion of esophagostomy tube only (see [1.NA.52.^ ^](#))

Code Also: Any concomitant implantation of gastrostomy tube (see [1.NF.53.^ ^](#))

Note: Use this code when bypass with exteriorization is performed [through the neck or chest] to promote the healing of the esophagus (e.g. following perforation trauma or resection).

1.NA.77.SQ using chest wall [subcutaneous] tunnel exteriorization technique
1.NA.77.TC using end cervical exteriorization technique

1.NA.80.^ ^ Repair, esophagus**S** 15

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 15	Optional	Tx Status 9	Status	A	Abandoned after onset
				C	Converted (from endoscopic to open approach)
				R	Revision

Includes: Cardioplasty, gastric NOS
Esophagogastroplasty NOS
Fundoplication (e.g. Belsey, Hill, Mark IV, Nissen, Toupet, etc ...)
Fundoplication with lengthening (gastroplasty), esophagus
Myotomy with fundoplication, lower esophageal sphincter
Repair, esophagus, using interpositional flap [patch] with/without diaphragm repair
Repair, lower esophageal sphincter [LES]

Excludes: Repair with removal of foreign body, esophagus (see [1.NA.56.^ ^](#))

Code Also: Any robotic assisted telemanipulation of tools (see [7.SF.14.^ ^](#))
Initial laparoscopy for investigation (see [2.OT.70.^ ^](#))

Note: When initial laparoscopy or thoracoscopy is performed for exploration, and resection is then performed through open incision, use open approach.

1.NA.80.^ ^ Repair, esophagus	using apposition technique [e.g. suturing] for closure	using free flap [e.g. free muscle or interpositional intestinal flap] for closure	using local transposition flap [e.g. gastric fundus wrap, fundoplication] for closure	using pedicled flap [e.g. pleura, diaphragm, pericardium] for closure
using combined endoscopic thoracoabdominal approach (may involve mixing both open and endoscopic approaches to thorax and abdomen with or without cervical incision)	1.NA.80.FA	1.NA.80.FA-XX-F	1.NA.80.FA-XX-E	1.NA.80.FA-XX-G

				06	Six coils
				07	Seven coils
				08	Eight coils
				09	Nine coils
				10	Ten coils
				G	More than ten coils (11 - 20)
				H	More than twenty coils
				U	Unspecified

Includes:	Control of hemorrhage, stomach (e.g. ulcer, varices) Devascularization, gastroesophageal (with splenectomy) Embolization, gastric varices Embolization, stomach [transarterial, transcatheter] Sclerotherapy, gastric Sugiura Procedure that with irrigation and drainage
Excludes:	Oversewing, prepyloric [ulcer] (see 1.NF.80.^^) Oversewing, stomach [ulcer] (see 1.NF.80.^^) Systemic pharmacotherapy for control of bleeding (see 1.ZZ.35.^^)
Note:	The intent is either to seal bleeding points [e.g. ulcer] within the stomach or to interrupt the flow of blood from the vessels to the varices.
1.NF.13.BA	using endoscopic per orifice approach
1.NF.13.BA-AG	using endoscopic per orifice approach and laser
1.NF.13.BA-BD	using endoscopic per orifice approach and balloon dilator (tamponade)
1.NF.13.BA-C2	using endoscopic per orifice approach and antihemorrhagic agent
1.NF.13.BA-FA	using endoscopic per orifice approach and banding (varices)
1.NF.13.BA-GX	using endoscopic per orifice approach and device NEC [e.g. electrocautery, endoclips]
1.NF.13.BA-KK	using endoscopic per orifice approach and special electrical heat device [e.g. argon beam coagulator, gold probe]
1.NF.13.BA-W4	using endoscopic per orifice approach and glue [e.g. superglue, Histoacryl]
1.NF.13.BA-X7	using endoscopic per orifice approach and chemical agent [e.g. ethanol, adrenaline, hypertonic solution, Scleromate, ethanolamine, morrhuate sodium, polidocanol, sclerosants, tetradecyl sulfate]
1.NF.13.GQ-C2	using percutaneous transluminal (arterial) approach and antihemorrhagic agent Includes: aminocaproic acid, aprotinin, phytonadione, thrombin, coagulation factor VIII
1.NF.13.GQ-GE	using percutaneous transluminal (arterial) approach and [detachable] coils
1.NF.13.GQ-W0	using percutaneous transluminal (arterial) approach and other synthetic agent [e.g. gelfoam, polyvinyl chloride, polystyrene particles, contour particles]
1.NF.13.LA	using open approach (for devascularization)

1.NF.27.^^ Radiation, stomach

Includes: Teletherapy, stomach
Therapy, radiation [radiotherapy], stomach

1.NF.27.JA	using external beam
1.NF.27.JX	using focused beam [e.g. gamma knife, cyber knife stereotactic radiosurgery]

1.NF.35.^^ Pharmacotherapy (local), stomach

Includes: Instillation, stomach
Irrigation, stomach
Lavage, gastric
that for local effect (e.g. antisecretory, mucosal defense, etc.)

Excludes: Alimentation (see [1.OZ.17.^^](#))
 Gastric cooling (see [1.NF.06.^^](#))
 Irrigation or lavage with drainage (see [1.NF.52.^^](#))
 Lavage for diagnostic purpose only (see [2.NF.71.^^](#))
 Systemic pharmacotherapy (see [1.ZZ.35.^^](#))
 that for control of bleeding (see [1.NF.13.^^](#))
 Tumor mapping [tattooing], stomach (see [7.SF.13.^^](#))

1.NF.35.CA-D1	using per orifice (or nasogastric tube) approach and antiinfective irrigating solution Includes: chlorhexidine, neomycin
1.NF.35.CA-D2	using per orifice (or nasogastric tube) approach and salt irrigating solution Includes: sodium chloride
1.NF.35.CA-D3	using per orifice (or nasogastric tube) approach and other irrigating solution Includes: sorbitol, mannitol
1.NF.35.CA-T2	using per orifice (or nasogastric tube) approach and other therapeutic product [e.g. ipecac] Includes: for induction of vomiting
1.NF.35.CA-T9	using per orifice (or nasogastric tube) approach and pharmacological agent NEC
1.NF.35.CA-W7	using per orifice (or nasogastric tube) approach and adsorbent agent (e.g. charcoal)

1.NF.38.^^ Management of external appliance, stomach

Includes: Initiation, discontinuance, adjustment and management of external appliance, stomach

Excludes: Measurement of gastric contents (see [2.NF.21.^^](#))

1.NF.38.JA-QN	of suction pump

using apposition technique [e.g. sutures]	1.NF.80.DA	1.NF.80.LA	1.NF.80.BA Includes: • Endoluminal Gastroplication Procedure (ELGP) • Gastroplication (Endocinch Procedure)
using closure device [e.g. endoclip]	—	—	1.NF.80.BA-FF Includes: • Closure of fistula, stomach using endoclip [e.g. Bear Claw]
using local transposition flap [e.g. omentum patch]	1.NF.80.DA-XX-E	1.NF.80.LA-XX-E	—
using synthetic tissue [e.g. mesh, sponge, gortex]	1.NF.80.DA-XX-N	1.NF.80.LA-XX-N	—

1.NF.82.^^ Reattachment, stomach

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

- Includes:** Reversal, vertical banded gastroplasty
Takedown, gastroenterostomy (bypass)
- Excludes:** Closure, esophagogastrostomy (see [1.NA.82.^^](#))
Removal of adjustable laparoscopic gastric band (see [1.NF.55.^^](#))

Note: May involve a secondary gastroenteral anastomosis following previous subtotal gastrectomy (without original primary anastomosis) to finally establish continuity of digestive tract or the takedown of a temporary bypass, thus reestablishing normal continuity of the stomach to small bowel.

1.NF.82.DA	of vertical banded gastroplasty using endoscopic [laparoscopic] approach
1.NF.82.DQ	of gastroenterostomy using endoscopic [laparoscopic] approach
1.NF.82.LA	of vertical banded gastroplasty using open approach
1.NF.82.RJ	of gastroenterostomy using open approach

1.NF.84.^ Construction or reconstruction, stomach**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Construction, gastric pouch, using jejunum

Excludes: When performed concomitantly with gastrectomy (see [1.NF.89.^](#) or [1.NF.91.^](#))

Note: The purpose of this surgery is to increase gastric reservoir function, e.g. following small gastric remnant syndrome [short gut syndrome].

1.NF.84.LA-XX-G using open approach with jejunum (to construct pouch)

1.NF.86.^ Closure of fistula, stomach**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Closure, fistula, gastric
 Closure, fistula, gastrocolic
 Closure, fistula, gastroenteric
 Closure, fistula, gastroenterocolic
 Fistulectomy, stomach
 Repair, fistula, gastrocolic
 Repair, fistula, gastroenterocolic [e.g. gastrojejunocolic]
 Repair, fistula, gastroesophageal
 Repair, fistula, stomach

Excludes: that for (endoclip) closure of perforation within lumen, stomach (see [1.NF.80.^](#))

1.NF.86.^ Closure of fistula, stomach	using autograft [e.g. skin, fascia graft]	using free flap [e.g. free muscle or intestinal flap]	using local flap [e.g. omental transposition flap]	using pedicled flap [e.g. muscle flap]	using simple excision (with or without (suture) closure)
for fistula terminating at skin (or subcutaneous tissue)	1.NF.86.MB-XX-A	1.NF.86.MB-XX-F	1.NF.86.MB-XX-E	1.NF.86.MB-XX-G	1.NF.86.MB
for fistula terminating in abdominal cavity	1.NF.86.ME-XX-A	1.NF.86.ME-XX-F	1.NF.86.ME-XX-E	1.NF.86.ME-XX-G	1.NF.86.ME
for fistula terminating in genital tract	1.NF.86.MH-XX-A	1.NF.86.MH-XX-F	1.NF.86.MH-XX-E	1.NF.86.MH-XX-G	1.NF.86.MH
for fistula terminating in thoracic cavity	1.NF.86.MQ-XX-A	1.NF.86.MQ-XX-F	1.NF.86.MQ-XX-E	1.NF.86.MQ-XX-G	1.NF.86.MQ
for fistula terminating in urinary tract	1.NF.86.MR-XX-A	1.NF.86.MR-XX-F	1.NF.86.MR-XX-E	1.NF.86.MR-XX-G	1.NF.86.MR
for fistula travelling through multiple cavities and terminating in any organ(s) or at skin	1.NF.86.MT-XX-A	1.NF.86.MT-XX-F	1.NF.86.MT-XX-E	1.NF.86.MT-XX-G	1.NF.86.MT

1.NF.87.^ **Excision partial, stomach****S** 5 **E** 81

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
E 81	Optional	Gastrointestinal excision 2	Extent	E M	Cap-assisted endoscopic mucosal resection (Cap-assisted EMR)
				E S	Endoscopic submucosal dissection (ESD)
				P P	Polypectomy

Includes:

Antrectomy with vagotomy
 Gastrectomy, partial (with or without splenectomy)
 Polypectomy, stomach

Excludes:

(Sleeve) gastrectomy for weight reduction (see [1.NF.78.^](#))
 Gastrectomy, subtotal with concomitant resection of adjacent organs (see [1.NF.91.^](#))
 Partial gastrectomy for repair of gastric diverticulum (see [1.NF.80.^](#))
 Proximal gastrectomy with esophagectomy (see [1.NA.91.^](#))

Note:

Subtotal gastrectomy may involve splenectomy, resection of some duodenum and omentum, depending on gastric region targeted. A Roux en Y technique may be used to extend the anastomosis (in order to delay gastric emptying).

1.NF.87.^ ^ Excision partial, stomach	endoscopic [laparoscopic] approach	endoscopic per orifice approach	open approach
without vagotomy			
esophagogastric anastomosis	1.NF.87.DG	—	1.NF.87.RP
gastroduodenal anastomosis	1.NF.87.DH	—	1.NF.87.RG
gastrojejunal (or gastroenteral NEC) anastomosis	1.NF.87.DQ Includes: • May involve fashioning a roux en y limb	—	1.NF.87.RJ Includes: • May involve fashioning a roux en y limb
simple apposition technique or no closure needed for tissue regeneration [e.g. for polypectomy]	1.NF.87.DA	1.NF.87.BA Includes: • Endoscopic mucosal resection (EMR), stomach • Endoscopic polypectomy, stomach • Endoscopic submucosal dissection (ESD), stomach	1.NF.87.LA Includes: • Partial gastrectomy with gastro-gastric anastomosis
with vagotomy			
esophagogastric anastomosis	1.NF.87.GX	—	1.NF.87.SH
gastroduodenal anastomosis	1.NF.87.DJ	—	1.NF.87.RH
gastrojejunal (or gastroenteral NEC) anastomosis	1.NF.87.DL Includes: • May involve fashioning a roux en y limb	—	1.NF.87.RK
simple apposition technique (without anastomosis)	1.NF.87.EL Includes: • Laparoscopic gastric wedge resection with parietal (highly selective) vagotomy	—	—

1.NF.89.^ ^ Excision total, stomach**S** ⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Gastrectomy, total (with or without splenectomy)
 Gastrectomy, total, with distal esophagectomy

Excludes: Gastrectomy en bloc with concomitant resection of adjacent organs (see [1.NF.91.^ ^](#))

Note: Total gastrectomy involves splenectomy and resection of omentum and may involve resection of distal esophagus and proximal duodenum. Jejunum is used to reestablish continuity of the digestive tract with or without Roux en Y.

1.NF.89.DA-XX-F	using endoscopic [laparoscopic] approach with esophagojejunal anastomosis (interposition pouch formation with or without Roux en Y)
1.NF.89.LA-XX-F	using open approach with esophagojejunal anastomosis (interposition pouch formation with or without Roux en Y)

1.NF.91.^.^ Excision radical, stomach**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Gastrectomy, radical [en bloc]
 Gastrectomy, radical [en bloc] subtotal
 Gastrectomy, radical [en bloc] total

Excludes: Proximal [subtotal] gastrectomy when part of en bloc resection of esophagus (see [1.NA.91.^.^](#))

Note: En bloc resection of stomach involves adjacent organs such as: duodenum, arteries, veins, vascular arcade, regional lymph nodes, pancreas, gall bladder in order to establish margins clear of neoplasm.

1.NF.91.LA-XX-F	using open approach with esophagojejunal (pouch formation with or without Roux en Y)
1.NF.91.RG	using open approach with gastroduodenal anastomosis
1.NF.91.RJ-XX-F	using open approach with gastrojejunal anastomosis (pouch formation with or without Roux en Y)
1.NF.91.RP	using open approach with esophagogastric anastomosis

1.NK.^.^ Therapeutic Interventions on the Small Intestine

Includes: Anastomotic site of small intestine to small intestine for continuity and stomach to small intestine for continuity
 Duodenum, jejunum and ileum
 Meckel's diverticulum

Excludes: Ileocecal valve (see [1.NM.^.^](#))
 Ileostomy (Kock, Barnett) pouch (see [1.OW.^.^](#))
 Interventions performed on Roux en Y limb (see [1.OW.^.^](#))
 Small with large intestine (see [1.NP.^.^](#))

1.NK.27.^.^ Radiation, small intestine

Includes: Teletherapy, small intestine
 Therapy, radiation [radiotherapy], small intestine

Note: May involve external beam irradiation of regional lymph nodes.

1.NK.27.JA	using external beam
------------	---------------------

1.NK.50.^ ^ Dilation, small intestine**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Excludes: Stricturoplasty with enterolysis and concomitant repair of intestine ([see 1.NK.80.^ ^](#))

1.NK.50.BA-BD using endoscopic per orifice approach with balloon dilator

1.NK.50.BA-NR using endoscopic per orifice (colonoscopy) approach and stent insertion

1.NK.52.^ ^ Drainage, small intestine**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Decompression, small intestine
Dilation with drainage, small intestine
Enterotomy NOS
Insertion, drainage tube, small intestine

Excludes: Decompression with dilation, ileocecal valve ([see 1.NM.52.^ ^](#))
Drainage, pelvic pouch ([see 1.OW.52.^ ^](#))
Stricturoplasty with enterolysis and concomitant repair of intestine ([see 1.NK.80.^ ^](#))

Note: Involves clearing small intestine of obstruction and may involve dilation when strictures exist within the intestine.

1.NK.52.^ ^ Drainage, small intestine	endoscopic [laparoscopic] approach	endoscopic per orifice approach	open approach	per orifice approach	percutaneous (needle) approach
aspiration [suction] technique	1.NK.52.DA	1.NK.52.BA	1.NK.52.LA	1.NK.52.CA	1.NK.52.HA
leaving drainage/decompression tube in situ	1.NK.52.DA-TS	1.NK.52.BA-TS	1.NK.52.LA-TS	1.NK.52.CA-TS	1.NK.52.HA-TS Includes: • Tube duodenostomy (for decompression and drainage)
manual [milking] technique [e.g. back to stomach for suction drainage]	—	—	1.NK.52.UW	—	—

1.NK.53.^ ^ Implantation of internal device, small intestine**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Insertion, feeding tube, small intestine

Excludes: Insertion of drainage tube, small intestine (see [1.NK.52.^ ^](#))

1.NK.53.BT-TS of feeding tube [jejunal] using endoscopic per orifice approach with percutaneous incision

Includes: Percutaneous endoscopic jejunostomy [PEJ]

1.NK.53.CA-TS of feeding tube [jejunal] using per orifice approach [e.g. naso intestinal]

1.NK.53.DA-TS of feeding tube [jejunal] using endoscopic [laparoscopic] approach

1.NK.53.HA-TS of feeding tube (jejunal) using percutaneous approach

1.NK.53.LA-QB of valved tube using open approach

Includes: Jejunostomy for single stage placement of valved (feeding) tube (e.g. jejunostomy button)

Excludes: Second stage exchange of jejunostomy tube for one-way valved tube (button) (see [1.NK.54.^ ^](#))

1.NK.53.LA-TS of feeding tube [jejunal] using open approach

1.NK.54.^ ^ Management of internal device, small intestine**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Adjustment, irrigation and maintenance of device, small intestine

Replacement of jejunostomy button

Excludes: Gastrostomy with concomitant (single stage) placement of gastrostomy button (see [1.NF.53.^ ^](#))

Code Also: Any concomitant laparoscopic inspection of the insertion site in the small intestine (see [1.OT.70.^ ^](#))

Note: Involves exchanging the original jejunostomy tube for a one-way valved tube (jejunostomy button) or any subsequent maintenance and adjustment of the valved tube (button).

1.NK.54.HA-QB of valved tube

1.NK.54.HA-TS of tube (e.g. drainage, feeding, jejunal)

1.NK.55.^ ^ Removal of device, small intestine

1.NK.55.BA-TS	of jejunal tube [e.g. drainage, feeding] using endoscopic per orifice approach
1.NK.55.CA-TS	of jejunal tube [e.g. drainage, feeding] using per orifice approach
1.NK.55.DA-TS	of jejunal tube [e.g. drainage, feeding] using endoscopic approach
1.NK.55.LA-TS	of jejunal tube [e.g. drainage, feeding] using open approach

1.NK.56.^ ^ Removal of foreign body, small intestine**S** ⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Excludes: Resection of small intestine for removal foreign body (see [1.NK.87.^ ^](#))

Code Also: Any robotic assisted telemanipulation of tools (see [7.SF.14.^ ^](#))

Note: May involve an enterotomy with removal of foreign body and subsequent closure of wound.

1.NK.56.BA	using endoscopic per orifice approach
1.NK.56.DA	using endoscopic [laparoscopic] approach
1.NK.56.LA	using open approach

1.NK.58.^ ^ Procurement, small intestine

Includes: Procurement, ileum for urinary diversion (ileal conduit)
Procurement, small intestine flap (e.g. jejunum for interpositional flap)

Excludes: Procurement, small intestine from deceased donor (see [1.NP.58.^ ^](#))

Omit code: When procurement is for creation of gastric pouch (see [1.NF.84.^ ^](#) or [1.NF.89.^ ^](#)) or pelvic pouch (see [1.NQ.84.^ ^](#) or [1.NQ.89.^ ^](#))

1.NK.58.LA-XX-F	of free flap [e.g. for interpositional flap]
1.NK.58.LA-XX-G	of pedicled flap (e.g. ileum on mesenteric pedicle)

1.NK.59.^ ^ Destruction, small intestine**S** ⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Coagulation (polyp of) small intestine

1.NK.59.BA-GX using endoscopic per orifice approach and device NEC
1.NK.59.BA-KK using endoscopic per orifice approach and electrical heat device (e.g. argon beam)

1.NK.74.^.^ Fixation, small intestine

S 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Enteropexy
Ileopexy
Plication [following release of adhesions], small intestine
that with derotation, small intestine

Excludes: Derotation [without fixation], small intestine (see [1.NP.73.^.^](#))

1.NK.74.LA using suture technique (intestinal loops sewn together to abdominal wall)
1.NK.74.VT using transmesenteric plication technique
1.NK.74.VT-TS using plication technique with intestinal tube in situ

1.NK.76.^.^ Bypass, small intestine

S 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Enterocolostomy [for exclusion and diversion], small intestine
Enteroenterostomy [for exclusion and diversion], small intestine
Gastrojejunostomy [for exclusion and diversion], duodenum
Vagotomy with bypass [for exclusion and diversion], small intestine

Excludes: Bypass, gastric for weight reduction (see [1.NF.78.^.^](#))
Enteroenterostomy [or enterocolostomy] with resection (see [1.NK.87.^.^](#))
Enterostomy, terminal [for feeding or fecal evacuation] (see [1.NK.77.^.^](#))

Code Also: Any robotic assisted telemanipulation of tools (see [7.SF.14.^.^](#))

Note: The purpose of this intervention is to promote healing [and establish intestinal continuity] through diversion around traumatized, diseased or unresectable small intestine.

1.NK.76.^Bypass, small intestine	endoscopic [laparoscopic] approach	open approach
enterocolostomy bypass technique	1.NK.76.DN	1.NK.76.RE
enteroenterostomy bypass technique	1.NK.76.DP	1.NK.76.RF
gastroenterostomy bypass technique	1.NK.76.DQ	1.NK.76.RJ
proximal vagotomy with gastroenterostomy bypass technique	1.NK.76.DR	1.NK.76.SK
truncal vagotomy (or vagotomy NOS) with gastroenterostomy bypass technique	1.NK.76.DS	1.NK.76.SL

1.NK.77.^Bypass with exteriorization, small intestine

S 15

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 15	Optional	Tx Status 9	Status	A	Abandoned after onset
				C	Converted (from endoscopic to open approach)
				R	Revision

Includes: Enterostomy, feeding or terminal
Ileostomy, terminal (loop end or Brooke)
Jejunostomy for feeding
Resiting of ileostomy

Excludes: Conversion ileostomy to continent ileostomy [e.g. Kock or Barnett pouch] (see [1.NK.84.^](#))
Formation of continent stoma using ileal conduit for Malone antegrade continent enema [MACE] (see [1.NM.77.^](#))
Formation of continent stoma using ileal conduit for Mitrofanoff urinary diversion (see [1.PM.77.^](#))
Ileostomy concomitant with resection of small intestine (see [1.NK.87.^](#))
Proctocolectomy with construction of continent ileostomy (see [1.NQ.89.^](#))

1.NK.77.^Bypass with exteriorization, small intestine	endoscopic [laparoscopic] approach	open approach
feeding enterostomy [e.g. jejunostomy]	1.NK.77.EM	1.NK.77.RQ
end enterostomy [e.g. terminal, end or loop ileostomy]	1.NK.77.EN Includes: • terminal end, loop	1.NK.77.RR Includes: • terminal end, loop

1.NK.80.^ ^ Repair, small intestine**S** 15 **L** 28 **E** 13

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 15	Optional	Tx Status 9	Status	A	Abandoned after onset
				C	Converted (from endoscopic to open approach)
				R	Revision
L 28	Optional	Small intestine	Location	D	Duodenum
				Z	Other small intestine (e.g. jejunum, ileum, overlapping or contiguous sites)
E 13	Optional	Intestine	Extent	M	Multiple sites [e.g. de-webbing duodenoplasty at multiple sites]

Includes:

- Dewebbing, small intestine
- Duodenoplasty [e.g. tapering]
- Enteroplasty
- Enterorrhaphy
- Inversion, diverticulum, small intestine
- Jejunoplasty [e.g. tapering]
- Oversewing, small intestine [e.g. ulcer]
- Reinforcement [patch], small intestine
- Repair, duodenal [or enteral] atresia
- Strictureplasty, small intestine

Excludes:

- Derotation, small intestine (see [1.NP.73.^ ^](#))
- that with removal of foreign body (see [1.NK.56.^ ^](#))

Code Also: Any robotic assisted telemanipulation of tools (see [7.SF.14.^ ^](#))

1.NK.80.^ ^ Repair, small intestine	endoscopic [laparoscopic] approach	open approach	endoscopic per orifice approach
using apposition technique [e.g. suturing, stapling]	1.NK.80.DA	1.NK.80.LA	—
using collagen powder	1.NK.80.DA-W2	1.NK.80.LA-W2	—
using fibrin glue	1.NK.80.DA-W3	1.NK.80.LA-W3	—
using closure device [e.g. endoclip]	—	—	1.NK.80.BA-FF Includes: • Closure of fistula, small intestine using endoclip [e.g. Bear Claw]
using local transposition flap [e.g. omental patch]	1.NK.80.DA-XX-E	1.NK.80.LA-XX-E Includes: • Serial transverse enteroplasty (STEP) procedure	—

1.NK.82.^ ^ Reattachment, small intestine**S** 15

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 15	Optional	Tx Status 9	Status	A	Abandoned after onset
				C	Converted (from endoscopic to open approach)
				R	Revision

Includes: Closure, enterocolostomy [diversionary]
 Closure, enteroenterostomy [diversionary]
 Takedown, enterostomy
 Takedown, ileostomy [terminal, loop]
 Takedown, jejunostomy [feeding]

Excludes: Conversion of ileostomy to continent ileostomy (see [1.NK.84.^ ^](#))
 Conversion of ileostomy to pelvic pouch with ileoanal anastomosis (see [1.NQ.84.^ ^](#))
 that for concomitant construction of continent ileostomy (see [1.NK.84.^ ^](#))

Note: May involve trimming the ends of the stoma and distal intestine as well as takedown of adhesions prior to reanastomosis and replacement of bowel in the abdominal cavity.

1.NK.82.^ ^ Reattachment, small intestine	endoscopic [laparoscopic] approach	open approach
of enterocolostomy [diversionary]	1.NK.82.DN	1.NK.82.RE
of enteroenterostomy [diversionary]	1.NK.82.DP	1.NK.82.RF
of jejunostomy [feeding]	1.NK.82.EM	1.NK.82.RQ
of ileostomy	1.NK.82.EN	1.NK.82.RR

1.NK.84.^ ^ Construction or reconstruction, small intestine**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Conversion, ileostomy [loop, permanent or Brooke] to continent ileostomy [Kock or Barnett pouch]
 Ileostomy, continent [e.g. Kock or Barnett pouch]

Excludes: Malone antegrade continent enema [MACE] using ileum (see [1.NK.77.^ ^](#))
 Proctocolectomy with concomitant construction of continent ileostomy (see [1.NQ.89.^ ^](#))

Note: Usually involves takedown of ileostomy or colostomy to refashion a functional continent ileostomy. This may involve conversion of a Hartmann rectal closure by excising remaining rectal and anal tissue and suturing anus closed.

1.NK.84.RR-XX-G using ileum (to construct ileostomy pouch)

1.NK.85.^ ^ Transplant, small intestine**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Excludes: Transplantation , duodenum with pancreas (see [1.OK.85.^ ^](#))
 Transplantation , small with large intestine (see [1.NP.85.^ ^](#))
 Transplantation, small intestine with liver (see [1.OA.85.^ ^](#))
 Transplantation, small intestine with multiple organs (see [1.OA.85.^ ^](#))

Note: Involves transplantation of small intestine to correct short gut syndrome.

1.NK.85.LA-XX-K using deceased donor small intestine

1.NK.87.^ Excision partial, small intestine**S** 63 **L** 91 **E** 81

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 63	Optional	Tx Status 18	Status	A	Abandoned after onset
				C	Converted (from endoscopic to open)
				S	Staged
L 91	Mandatory	Mandatory Small Intestine 2	Location	D	Duodenum
				U	Unqualified, not applicable or of unknown extent (simple excisional technique e.g. polypectomy or excision of lesion)
				Z	Other area of small intestine (e.g. jejunum, ileum, not otherwise specified)
E 81	Optional	Gastrointestinal excision 2	Extent	E M	Cap-assisted endoscopic mucosal resection (Cap-assisted EMR)
				E S	Endoscopic submucosal dissection (ESD)
				P P	Polypectomy

Includes: Diverticulectomy, Meckel's
 Diverticulectomy, small intestine
 Duodenectomy
 Enterectomy NOS
 Ileectomy
 Jejunectomy
 Polypectomy, small intestine
 Repair, omphalomesenteric duct anomaly involving enterectomy
 Resection of small intestine for removal of foreign body
 Resection, subtotal, small intestine (with or without cecum involvement)

Excludes: Duodenectomy with gastrectomy (see [1.NF.91.^](#))
 Duodenectomy with pancreatectomy (see [1.OK.87.^](#))
 Enterectomy for repair of duodenal [or enteral] atresia (see [1.NK.80.^](#))
 Ileocecal resection (see [1.NM.87.^](#))

Code Also: Any concomitant feeding jejunostomy (see [1.NK.77.^](#))
 Any robotic assisted telemanipulation of tools (see [7.SF.14.^](#))

1.NK.87.^ Excision partial, small intestine	endoscopic [laparoscopic] approach	endoscopic per orifice approach	open approach
simple excisional technique	1.NK.87.DA Includes: <ul style="list-style-type: none">Excision (small) lesion, small intestine with simple (suture) closure of defectPolyectomy, small intestine	1.NK.87.BA Includes: <ul style="list-style-type: none">Excision (small) lesion, small intestine with simple (suture) closure of defectPolyectomy, small intestine	1.NK.87.LA Includes: <ul style="list-style-type: none">Excision of (small) lesion, small intestine with simple (suture) closure of defectPolyectomy, small intestine
enterocolostomy anastomosis technique	1.NK.87.DN Code Also: <ul style="list-style-type: none">Any concomitant creation of ileostomy (see 1.NK.77.^) Note: <ul style="list-style-type: none">Involves immediate restoration of continuity to digestive tract once resection has been completed. During healing of anastomosis, a temporary ileostomy may be required.	—	1.NK.87.RE Code Also: <ul style="list-style-type: none">Any concomitant ileostomy (see 1.NK.77.^) Note: <ul style="list-style-type: none">Involves immediate restoration of continuity to digestive tract once resection has been completed. During immediate post-surgical period, healing of the small to large intestinal anastomosis may be facilitated by a temporary ileostomy. (This is generally taken down a few weeks later.)
enteroenterostomy anastomosis technique	1.NK.87.DP Code Also: <ul style="list-style-type: none">Any concomitant creation of ileostomy (see 1.NK.77.^) Note: <ul style="list-style-type: none">Involves immediate restoration of continuity to digestive tract once resection has been completed. During healing of anastomosis, a temporary ileostomy may be required.	—	1.NK.87.RF Code Also: <ul style="list-style-type: none">Any concomitant ileostomy (see 1.NK.77.^) Note: <ul style="list-style-type: none">Involves immediate restoration of continuity to digestive tract (small to small intestinal anastomosis) once resection has been completed.
stoma formation with distal closure	1.NK.87.DX Note: <ul style="list-style-type: none">Involves closing off the distal portion of excised digestive tract by one of two methods: sealing and dropping the distal blind loop of intestine back into the abdomen or sealing and tacking the distal blind loop to the submucosa just under the skin. This is usually a temporary measure to facilitate healing. An enterostomy is always required (for evacuation) and is considered part of this technique.	—	1.NK.87.TF Note: <ul style="list-style-type: none">Involves closing off the distal portion of excised digestive tract by one of two methods: sealing and dropping the distal blind loop of intestine back into the abdomen or sealing and tacking the distal blind loop to the submucosa just under the skin. This is usually a temporary measure to facilitate healing which always involves creation of an enterostomy (for evacuation) which is considered part of the technique.
stoma formation with mucous fistula	1.NK.87.DY Includes: <ul style="list-style-type: none">Resection of small intestine with formation of double barrelled stoma Note: <ul style="list-style-type: none">Involves keeping the distal part of excised digestive tract open during the healing process by creating a mucous fistula directly to the surface of the abdomen. A second stoma (for evacuation) is also created. This technique facilitates the rejoining of the proximal and distal ends of the digestive tract at a later date.	—	1.NK.87.TG Includes: <ul style="list-style-type: none">Resection of small intestine with formation of double barrelled stoma Note: <ul style="list-style-type: none">Involves keeping the distal part of excised digestive tract open during healing by creating a mucous fistula directly to the surface of the abdomen. special excisional (segmental) technique without anastomosis	1.NK.87.GB Note: <ul style="list-style-type: none">Excision of segment of small intestine with temporary closure of resection margins without anastomosisthat for (post traumatic) damage control with temporary closure of resection margins	—	1.NK.87.WJ Note: <ul style="list-style-type: none">Excision of segment of small intestine with temporary closure of resection margins without anastomosisthat for (post traumatic) damage control with temporary closure of resection margins

1.NM.^^.^^ Therapeutic Interventions on the Large Intestine

- Includes:** Anastomotic site of small intestine to large intestine for continuity
 Ascending colon
 Cecum
 Colon [right, left, NOS]
 Descending colon [alone]
 Diaphragmatic flexure
 Hepatic flexure
 Ileocecal valve
 Iliopelvic colon
 Sigmoid colon
 Sigmoid flexure
 Splenic flexure
 Transverse colon
- Excludes:** Interventions performed on pelvic pouch (see [1.OW.^^.^^](#))
 Small with large intestine [any site] (see [1.NP.^^.^^](#))

1.NM.27.^^ Radiation, large intestine

- Includes:** Teletherapy, large intestine
 Therapy, radiation [radiotherapy], large intestine
- Excludes:** Radiation therapy extending into rectum (see [1.NQ.27.^^](#))
- Note:** May involve external beam irradiation of regional lymph nodes

1.NM.27.JA using external beam

1.NM.50.^^ Dilation, large intestine**S**⁵

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

- Excludes:** Dilation leaving drainage/decompression tube in situ, colon (see [1.NM.52.^^](#))

1.NM.50.BA-BD using endoscopic per orifice (colonoscopy) approach with balloon dilator
 1.NM.50.BA-NR using endoscopic per orifice (colonoscopy) approach and stent insertion
 1.NM.50.CA-NR using per orifice approach and stent insertion

Includes: Insertion of colonic stent via rectal guiding tube, for dilation
 Non-endoscopic insertion of colonic stent, for dilation

1.NM.52.^ ^ Drainage, large intestine**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Cecotomy
Colotomy NOS
Decompression with dilation, ileocecal valve
Decompression, large intestine
Dilation with drainage, large intestine
Insertion, drainage tube, large intestine

Excludes: Balloon dilation (without drainage), colon (see [1.NM.50.^ ^](#))
Drainage, pelvic pouch (see [1.OW.52.^ ^](#))
Strictureplasty with enterolysis and concomitant repair of intestine (see [1.NM.80.^ ^](#))

Note: Involves clearing large intestine of obstruction and may involve dilation when strictures exist within the intestine.

1.NM.52.^ ^ Drainage, large intestine	endoscopic [laparoscopic] approach	open approach	per orifice approach	percutaneous approach
aspiration [suction] technique	1.NM.52.DA	1.NM.52.LA	1.NM.52.CA	—
leaving drainage/decompression tube in situ	—	1.NM.52.LA-TS	1.NM.52.CA-TS	1.NM.52.HA-TS Includes: • Percutaneous cecostomy
manual [milking] technique [e.g. to rectum for suction drainage]	—	1.NM.52.UW	—	—

1.NM.54.^ ^ Management of internal device, large intestine**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Adjustment, irrigation and maintenance of device, large intestine

Excludes: Management, stoma bag (see [1.YY.38.^ ^](#))

1.NM.54.CA-NR of stent using per orifice approach
1.NM.54.CA-TS of tube (e.g. intestinal drainage, colorectal) using per orifice approach

1.NM.55.^ ^ Removal of device, large intestine

1.NM.55.BA-NR	of stent using endoscopic per orifice approach
1.NM.55.BA-TS	of (colorectal) tube [e.g. drainage] using endoscopic per orifice approach
1.NM.55.CA-NR	of stent using per orifice approach
1.NM.55.CA-TS	of (colorectal) tube [e.g. drainage] using per orifice approach
1.NM.55.DA-TS	of (colorectal tube) [e.g. drainage] using endoscopic approach
1.NM.55.HA-TS	of (colorectal) tube [e.g. drainage] using percutaneous approach
1.NM.55.LA-TS	of (colorectal) tube [e.g. drainage] using open approach

1.NM.56.^ ^ Removal of foreign body, large intestine**S** ⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Excludes: Resection of large intestine [for removal foreign body] (see [1.NM.87.^ ^](#))

Note: May involve a colotomy with removal of foreign body and subsequent closure of wound.

1.NM.56.BA	using endoscopic per orifice approach
1.NM.56.DA	using endoscopic [laparoscopic] approach
1.NM.56.LA	using open approach

1.NM.58.^ ^ Procurement, large intestine

Includes: Procurement, colon (for interpositional flap)

Excludes: Procurement, large intestine from cadaver (see [1.NP.58.^ ^](#))

1.NM.58.LA-XX-F	of free flap [e.g. transverse, descending, isoperistaltic colon] using open approach
-----------------	--

1.NM.59.^ ^ Destruction, large intestine**S** ⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes:		Debulking [neoplasm], large intestine Recanalization, large intestine
1.NM.59.BA-AG		using endoscopic per orifice approach and laser
1.NM.59.BA-AW		using endoscopic per orifice approach and radiofrequency
		Includes: Radiofrequency ablation (polyp), large intestine
1.NM.59.BA-GX		using endoscopic per orifice approach and device NEC [e.g. electrocautery]
1.NM.59.BA-HB		using endoscopic per orifice approach and heat probe

1.NM.74.^.^ Fixation, large intestine**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Cecocoloplicopexy
Cecopexy
Cecoplication
Colopexy
Coloplication
Plication, cecum
that with derotation, large intestine

Excludes: Derotation [without fixation], large intestine (see [1.NP.73.^.^](#))

1.NM.74.LA		using suture technique [intestinal loops sewn together to abdominal wall]
1.NM.74.VT		using transmesenteric plication technique
1.NM.74.VT-TS		using plication technique with intestinal tube in situ

1.NM.76.^.^ Bypass, large intestine**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Colocolostomy [for exclusion and diversion]
Diversion, large intestine
Enterocolostomy [for exclusion and diversion]
Exclusion and diversion, large intestine

Excludes: Diversion, urinary to large intestine (see [1.PG.76.^.^](#))
that with colectomy (see [1.NM.87.^.^](#) or [1.NM.89.^.^](#))

1.NM.76.^Bypass, large intestine	endoscopic [laparoscopic] approach	open approach
using diversionary colocolostomy	1.NM.76.DF	1.NM.76.RN
using diversionary enterocolostomy	1.NM.76.DN	1.NM.76.RE

1.NM.77.^Bypass with exteriorization, large intestine**S** 15

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 15	Optional	Tx Status 9	Status	A	Abandoned after onset
				C	Converted (from endoscopic to open approach)
				R	Revision

Includes: Colostomy [e.g. permanent, terminal, temporary]
Resiting of colostomy

Excludes: Ileostomy [any type] (see [1.NK.77.^](#))
that with excision of large intestine (see [1.NM.87.^](#))

Code Also: Any concomitant robotic telemanipulation of tools (see [7.SF.14.^](#))

1.NM.77.^Bypass with exteriorization, large intestine	open approach	endoscopic [laparoscopic] approach
non-continent stoma formation (colostomy)	1.NM.77.RS	1.NM.77.EP
non-continent stoma formation with creation of mucous fistula	1.NM.77.TG Note: • Involves keeping the distal part of the transected digestive tract open during healing by creating a mucous fistula directly to the surface of the abdomen. A second stoma (for evacuation) is also created. This technique facilitates the rejoining of the proximal and distal ends of the digestive tract at a later date.	1.NM.77.DY Note: • Involves keeping the distal part of the transected digestive tract open during healing by creating a mucous fistula directly to the surface of the abdomen. A second stoma (for evacuation) is also created. This technique facilitates the rejoining of the proximal and distal ends of the digestive tract at a later date.
continent stoma formation (antegrade) using pedicled flap	1.NM.77.RS-XX-G Includes: • Malone antegrade continent enema [MACE, ACE] Code Also: • Any concomitant formation of continent (Mitrofanoff) urinary stoma (see 1.PM.77.^)	1.NM.77.EP-XX-G Includes: • Laparoscopic Malone antegrade continent enema [MACE, ACE] Code Also: • Any concomitant formation of continent (Mitrofanoff) urinary stoma (see 1.PM.77.^)

1.NM.80.^ ^ Repair, large intestine**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Colorrhaphy
Inversion, diverticulum, large intestine
Stricturoplasty, large intestine

1.NM.80.^ ^ Repair, large intestine	endoscopic [laparoscopic] approach	endoscopic per orifice approach	open approach
using apposition technique [e.g. suturing, stapling]	1.NM.80.DA	—	1.NM.80.LA
using bioabsorbable binding ring	1.NM.80.DA-FH	—	1.NM.80.LA-FH
using collagen powder	1.NM.80.DA-W2	—	1.NM.80.LA-W2
using fibrin glue	1.NM.80.DA-W3	—	1.NM.80.LA-W3
using closure device [e.g. endoclip]	—	1.NM.80.BA-FF Includes: • Closure of fistula, large intestine using endoclip [e.g. Bear Claw]	—
using local transposition flap [e.g. omental patch]	1.NM.80.DA-XX-E	—	1.NM.80.LA-XX-E

1.NM.82.^ ^ Reattachment, large intestine**S** 41

S 41	Optional	Tx Status 12	Status	A	Abandoned after onset
				C	Converted (from endoscopic to open)
				R	Revision
				S	Staged

Includes: Closure, [diversionary] colocolostomy
 Takedown, colostomy [any type]
 Takedown, Hartmann pouch [for reanastomosis colon to rectum]

Excludes: Conversion of colostomy (with Hartmann pouch rectal stump) to continent ileostomy (see [1.NK.84.^ ^](#))

Note: May involve trimming the ends of the stoma and distal intestine/rectal stump and takedown of any adhesions prior to reanastomosis and replacement of bowel in the abdominal cavity.

1.NM.82.^ ^ Reattachment, large intestine	endoscopic [laparoscopic] approach	open approach
of colostomy (may involve reanastomosis of colon to [Hartmann] rectal stump or mucous fistula)	1.NM.82.EP	1.NM.82.RS
of diversionary colocolostomy	1.NM.82.DF	1.NM.82.RN
of temporarily divided [interrupted, resected] colon within abdominal cavity	1.NM.82.DN Note: • Selection of this code requires S = Staged status attribute value	1.NM.82.RE Note: • Selection of this code requires S = Staged status attribute value

1.NM.87.^ ^ Excision partial, large intestine**S** 63 **L** 29 **E** 81

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 63	Optional	Tx Status 18	Status	A	Abandoned after onset
				C	Converted (from endoscopic to open)
				S	Staged
L 29	Mandatory	Mandatory Large intestine	Location	L	Left: transverse, descending and sigmoid colon (multiple sites or continuous e.g. left hemicolon)
				R	Right: cecum, appendix, ascending and transverse – may involve distal portion of ileum (multiple sites or continuous right hemicolon)
				R E	Right extended: cecum, appendix, ascending, transverse and descending – may involve the distal portion of ileum (right extended hemicolon)
				S G	Sigmoid [alone]
				T C	Transverse [alone]
				U	Unqualified, not applicable or of unknown extent
E 81	Optional	Gastrointestinal excision 2	Extent	E M	Cap-assisted endoscopic mucosal resection (Cap-assisted EMR)
				E S	Endoscopic submucosal dissection (ESD)
				P P	Polypectomy

Includes:

- Colectomy, partial
- Colectomy, transverse
- Diverticulectomy, large intestine
- Hemicolectomy [sigmoid, left, transverse, right or extended right]
- Ileocectomy
- Ileocolectomy
- Polypectomy, large intestine
- Resection, ileocecal
- Resection, segmental, large intestine
- Resection, subtotal, large intestine
- Sigmoidectomy

- Excludes:** Debulking, large intestine, using laser (see [1.NM.59.^^](#))
Diverticulectomy, Meckel's (see [1.NK.87.^^](#))
Partial excision of large intestine, 'en bloc', including regional (intraabdominal) lymph node dissection and excision of surrounding soft tissue beyond the mesentery, with or without vascular skeletization (skeletonization) (see [1.NM.91.^^](#))
Proctocolectomy (see [1.NQ.89.^^](#))
Rectosigmoidectomy (see [1.NQ.87.^^](#))
- Code Also:** Any concomitant lymph node excision (see Excision, lymph nodes, by site)
Any robotic assisted telemanipulation of tools (see [7.SF.14.^^](#))
- Note:** Involves anastomosis following colectomy and may involve concomitant mesenteric and distal ileum resection [as necessary].

1.NM.87.^ ^ Excision partial, large intestine	endoscopic [laparoscopic, laparoscopic-assisted, hand-assisted] approach	endoscopic per orifice approach	open approach
simple excisional technique	1.NM.87.DA Includes: <ul style="list-style-type: none"> Excision (small) lesion of large intestine with simple (suture) closure of defect Polypectomy, large intestine 	1.NM.87.BA Includes: <ul style="list-style-type: none"> Endoscopic mucosal resection (EMR), large intestine Endoscopic polypectomy, large intestine Endoscopic submucosal dissection (ESD), large intestine Excision (small) lesion of large intestine with simple (suture) closure of defect Code Also: <ul style="list-style-type: none"> Any colonoscopy or sigmoidoscopy (see 2.NM.70.^ ^) 	1.NM.87.LA Includes: <ul style="list-style-type: none"> Excision (small) lesion of large intestine with simple (suture) closure of defect Polypectomy, large intestine

A second stoma (for evacuation) is also created. This technique facilitates the rejoining of the proximal and distal ends of the digestive tract at a later date. 	1.NM.91.TG Includes: <ul style="list-style-type: none"> Radical colectomy with formation of double barrelled stoma Note: <ul style="list-style-type: none"> Involves keeping the distal part of the excised digestive tract open during healing by creating a mucous fistula directly to the surface of the abdomen. A second stoma (for evacuation) is also created. This technique facilitates the rejoining of the proximal and distal ends of the digestive tract at a later date.

1.NP.^.^ Therapeutic Interventions on the Small and Large Intestine

Includes: Duodenum, jejunum and ileum with colon [any site]
Intestinal tract NOS

Note: Therapeutic interventions within this block frequently involve both small and large intestine. Determining a single appropriate anatomy site can be difficult and is considered less important than stating that the "intestinal tract" is the site. Therefore, a combined anatomy site "small and large intestine" exists to group a select few interventions.

1.NP.12.^.^ Therapy, small and large intestine

1.NP.12.BA-LI	using endoscopic per orifice approach of living organism
Note:	Involves administering normal bacterial flora from stool obtained from a healthy donor via nasogastric tube and/or prepared enema. Also termed fecal bacteriotherapy, fecal transfusion, fecal transplant, or human probiotic infusion (HPI)
1.NP.12.CA-LI	using per orifice (ingestion) of living organism (e.g. Trichuris suis ova [TSO])
Note:	Involves the ingestion of the ova of porcine whip worms to treat ulcerative colitis and Crohn's disease.

1.NP.13.^E Control of bleeding, small and large intestine**E** 53

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 53	Mandatory	Mandatory Coils	Extent	0	Not applicable (no coil used)
				01	One coil
				02	Two coils
				03	Three coils
				04	Four coils
				05	Five coils
				06	Six coils
				07	Seven coils
				08	Eight coils
				09	Nine coils
				10	Ten coils
				G	More than ten coils (11 - 20)
				H	More than twenty coils
				U	Unspecified

Includes: Embolization, small and large intestine
 Sclerotherapy, anastomotic varices, intestine
 Therapy, hemostatic (local), small and large intestine

Excludes: Systemic pharmacotherapy for control of bleeding (see [1.ZZ.35.^E](#))

Code Also: Any colonoscopy or sigmoidoscopy (see [2.NM.70.^E](#))

1.NP.13.BA-C2	using endoscopic per orifice approach and antihemorrhagic agent
	Includes: aminocaproic acid, aprotinin, phytonadione, thrombin, coagulation factor VIII
1.NP.13.BA-GN	using endoscopic per orifice approach and compression device [e.g. gastric balloon or bubble]
1.NP.13.BA-GX	using endoscopic per orifice approach and device NEC [e.g. endoclips]
1.NP.13.BA-KK	using endoscopic per orifice approach and special electrical heat device [e.g. argon beam coagulator, gold probe]
1.NP.13.BA-X7	using endoscopic per orifice approach and chemical agent
	Note: Includes sclerotherapy of anastomotic varices
1.NP.13.GQ-C2	using percutaneous transluminal (transarterial) approach and antihemorrhagic agent
	Includes: Embolization (transarterial), intestine that with angiographic intraarterial vasopressin
1.NP.13.GQ-GE	using percutaneous transluminal (transarterial) approach and [detachable] coils
1.NP.13.GQ-W0	using percutaneous transluminal (transarterial) approach and synthetic agent [e.g. gelfoam, microspheres, polystyrene, polyvinyl alcohol, contour particles]

1.NP.35.^ ^ Pharmacotherapy (local), small and large intestine

Includes: Perfusion, small and large intestine
Excludes: Tumor mapping [tattooing], small and large intestine (see [7.SF.13.^ ^](#))

1.NP.35.CA-C7	using per orifice approach and electrolyte solution
1.NP.35.CA-X9	using per orifice approach and (purified) water
	Includes: Colonic (irrigation) hydrotherapy Colonic cleansing (lavage) therapy
1.NP.35.CA-Z9	using per orifice approach and agent NEC
1.NP.35.HA-C7	using percutaneous (needle) approach and electrolyte solution
1.NP.35.HA-Z9	using percutaneous (needle) approach and agent NEC

1.NP.58.^ ^ Procurement, small and large intestine

Excludes: Procurement, abdominal organs [en bloc] (see [1.OT.58.^ ^](#))

1.NP.58.LA-XX-K	from deceased donor
-----------------	---------------------

1.NP.72.^ ^ Release, small and large intestine**S** 16

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 16	Optional	Tx Status 10	Status	A	Abandoned after onset
				C	Converted (from endoscopic to open approach)

Includes: Lysis [adhesions], intestinal tract [any site]
Takedown [adhesions], intestinal tract [any site]
Excludes: Lysis [adhesions], multiple organs within abdominal [or pelvic] cavity (see [1.OT.72.^ ^](#))
that with derotation or detorsion of intestinal tract (see [1.NP.73.^ ^](#))
Omit code: when performed concomitantly with resection of small intestine or large intestine

1.NP.72.DA	using endoscopic [laparoscopic] approach
1.NP.72.DA-AG	using endoscopic [laparoscopic] approach and laser
1.NP.72.LA	using open approach
1.NP.72.LA-AG	using open approach and laser

1.NP.73.^ Reduction, small and large intestine**S** 15

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 15	Optional	Tx Status 9	Status	A	Abandoned after onset
				C	Converted (from endoscopic to open approach)
				R	Revision

Includes: Derotation, intestinal tract [any site]
 Detorsion, intestinal tract [any site]
 Ladd procedure
 Reduction, hernia (manual)

Excludes: Derotation, stomach (see [1.NF.73.^](#))
 that with abdominal wall repair (see [1.SY.80.^](#))
 that with colopexy [cecopexy] (see [1.NM.74.^](#))
 that with enteropexy [ileopexy] (see [1.NK.74.^](#))

Note: Usually also involves the lysis of adhesions (Ladd's bands).

1.NP.73.BA	using endoscopic per orifice approach
1.NP.73.BA-PK	Includes: Reduction of intestinal volvulus using scope
1.NP.73.CC	endoscopic per orifice approach and pneumatic [air pressure] device
	using per orifice [rectal] approach and [water] pressure
	Includes: Hydrostatic reduction
	Water pressure delivered via enema for reduction of intussusception
1.NP.73.DA	using endoscopic [laparoscopic] approach
1.NP.73.JH	using manual technique (for hernia reduction alone)
1.NP.73.LA	using open approach

1.NP.85.^ Transplant, small and large intestine**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Excludes: that with multiple organ transplant (see [1.OA.85.^](#))

1.NP.85.LA-XX-K	from deceased donor
-----------------	---------------------

1.NP.86.^ ^ Closure of fistula, small and large intestine**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes:

- Closure, fistula, abdominouterine
- Closure, fistula, coloenteric
- Closure, fistula, colovaginal
- Closure, fistula, enterocolic
- Closure, fistula, enterocutaneous
- Closure, fistula, enteropancreatic
- Closure, fistula, enterovaginal
- Closure, fistula, enterovesical
- Closure, fistula, ileosigmoid
- Closure, fistula, intestinal tract [any site]
- Closure, fistula, intestinouterine
- Closure, fistula, intestinovesical
- Closure, fistula, sigmoidovaginal
- Fistulectomy, intestinal tract [any site]
- Repair, fistula, intestinal tract [any site]

Excludes:

- Takedown [for reanastomosis] of surgically created [sub]mucous fistula (small intestine see [1.NK.82.^ ^](#) and large intestine see [1.NM.82.^ ^](#))
- that for (endoclip) closure of perforation within lumen, large intestine (see [1.NM.80.^ ^](#))
- that for (endoclip) closure of perforation within lumen, small intestine (see [1.NK.80.^ ^](#))
- that for aortoduodenal fistula (see [1.ID.86.^ ^](#))
- that for fistula originating in stomach [gastrointestinal] (see [1.NF.86.^ ^](#))

1.NP.86.^ ^ Closure of fistula, small and large intestine	using simple excision (with or without (suture) closure)	using autograft [e.g. skin, fascia graft]	using free flap [e.g. intestinal interpositional flap or free muscle flap]	using local flap [e.g. omental, mesenteric patch]	using pedicled flap [e.g. advancement muscle flap]
for fistula terminating at skin (or subcutaneous tissue)	1.NP.86.MB	1.NP.86.MB-XX-A	1.NP.86.MB-XX-F	1.NP.86.MB-XX-E	1.NP.86.MB-XX-G
for fistula terminating in abdominal cavity [any organ of digestive or biliary tract]	1.NP.86.ME	1.NP.86.ME-XX-A	1.NP.86.ME-XX-F	1.NP.86.ME-XX-E	1.NP.86.ME-XX-G
for fistula terminating in genital tract	1.NP.86.MH	1.NP.86.MH-XX-A	1.NP.86.MH-XX-F	1.NP.86.MH-XX-E	1.NP.86.MH-XX-G
for fistula terminating in thoracic cavity	1.NP.86.MQ	1.NP.86.MQ-XX-A	1.NP.86.MQ-XX-F	1.NP.86.MQ-XX-E	1.NP.86.MQ-XX-G
for fistula terminating in urinary tract	1.NP.86.MR	1.NP.86.MR-XX-A	1.NP.86.MR-XX-F	1.NP.86.MR-XX-E	1.NP.86.MR-XX-G
for fistula travelling through multiple cavities and terminating in any organ(s) or at skin	1.NP.86.MT	1.NP.86.MT-XX-A	1.NP.86.MT-XX-F	1.NP.86.MT-XX-E	1.NP.86.MT-XX-G

1.NQ.^.^ Therapeutic Interventions on the Rectum

Includes:	Anastomotic site of small intestine to rectum for continuity, large intestine to rectum for continuity and rectum to anus for continuity Anorectal juncture above dentate line Pelvirectal juncture
Excludes:	Anorectal juncture (see 1.NT.^.^) Interventions performed on neorectal pouch (see 1.OW.^.^)

1.NQ.12.^.^ Therapy, rectum

Includes:	Massage, rectal
1.NQ.12.JJ	using manual technique

1.NQ.13.^.^ Control of bleeding, rectum

Includes:	Hemostatic therapy, rectum
Excludes:	Sclerotherapy NOS, rectum (see 1.NQ.59.^.) Systemic pharmacotherapy for control of bleeding (see 1.ZZ.35.^.) that for bleeding hemorrhoids (see 1.NQ.59.^.)
Code Also:	Any packing of rectum (see 1.NQ.14.^.)
1.NQ.13.BA-GX	using endoscopic per orifice approach and device NEC [e.g. endoclips]
1.NQ.13.BA-KK	using endoscopic per orifice approach and special electrical heat device [e.g. argon plasma coagulator]
1.NQ.13.CA-C2	using per orifice approach and antihemorrhagic agent
	Includes: aminocaproic acid, aprotinin, phytonadione, thrombin, coagulation factor VIII
1.NQ.13.CA-GN	using per orifice approach and compression device [e.g. gastric balloon or bubble]
1.NQ.13.CJ	using per orifice approach and direct manual pressure

1.NQ.14.^.^ Dressing, rectum

Includes:	Insertion of packing, rectum Packing, rectum Replacement of packing, rectum
1.NQ.14.CA-H1	using per orifice approach and medicated dressing
1.NQ.14.CA-NP	using per orifice approach and packing

1.NQ.26.^ ^ Brachytherapy, rectum**S** 35

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 35	Optional	Implant Status	Status	P M	Permanent implant – Radioactive source left in place permanently
				T M	Temporary implant – Radioactive source removed after course of treatment is complete

Includes: Endocurietherapy, rectum
 Implantation of radioactive material, rectum
 Interstitial radiation therapy, rectum
 Intracavitary radiation therapy, rectum

Code Also: Any concomitant implantation of brachytherapy applicators or conduits [e.g. needles, catheters] to gain access to treatment site (see [1.NQ.53.^ ^](#))

Note: There are typically two distinct phases required to complete the process of brachytherapy. The first phase involves the insertion of non-radioactive applicators or conduits [e.g. hollow needles, catheters, stents, etc.] that receive or transmit the radioactive material into the body. The second phase involves the after loading of the radioactive material [e.g. seeds, pellets, wires, etc.] into the applicator or conduit.

1.NQ.26.BA	using endoscopic per orifice approach
1.NQ.26.CA	using per orifice approach
1.NQ.26.HA	using percutaneous (transcatheter or transneedle) approach
1.NQ.26.LA	using open (incisional) approach

1.NQ.27.^ ^ Radiation, rectum

Includes: Teletherapy, rectum
 Therapy, radiation [radiotherapy], rectum

Excludes: Radiation therapy involving both rectum and female genital tract (see [1.RZ.27.^ ^](#))

1.NQ.27.JA	using external beam
1.NQ.27.JX	using focused beam [e.g. gamma knife, cyber knife stereotactic radiosurgery]

1.NQ.35.^ ^ Pharmacotherapy (local), rectum

- Includes:** Enema, transanal (cleansing)
Irrigation, rectum
Proctoclysis (saline instillation)
- Excludes:** Enema for water pressure reduction of intussusception (see [1.NP.73.^ ^](#))
Sclerotherapy, rectal (e.g. for internal hemorrhoid treatment) (see [1.NQ.59.^ ^](#))
Systemic pharmacotherapy (see [1.ZZ.35.^ ^](#))
Tumor mapping [tattooing], rectum (see [7.SF.13.^ ^](#))

1.NQ.35.CA-A6	using per orifice approach and laxative agent
1.NQ.35.CA-D1	using per orifice approach and antiinfective irrigating solution Includes: chlorhexidine, neomycin
1.NQ.35.CA-D2	using per orifice approach and salt irrigating solution (e.g. saline)
1.NQ.35.CA-D3	using per orifice approach and other irrigating solution Includes: sorbitol, mannitol
1.NQ.35.CA-T9	using per orifice approach and pharmacological agent NEC
1.NQ.35.CA-X9	using per orifice approach and water
1.NQ.35.CA-Z9	using per orifice approach and agent NEC (e.g. oil retention, soap suds)
1.NQ.35.HA-T9	using needle injection and pharmacological agent NEC

1.NQ.50.^ ^ Dilation, rectum**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: that for rectal strictures

1.NQ.50.BA-BD	using endoscopic per orifice approach and balloon dilator
1.NQ.50.BA-NR	using endoscopic per orifice (colonoscopy) approach and stent insertion
1.NQ.50.CA-BP	using per orifice approach and rigid dilator
1.NQ.50.CA-NR	using per orifice approach and stent insertion

1.NQ.52.^ ^ Drainage, rectum**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

- Includes:** Drainage [abscess], anorectal
 Drainage [abscess], ischiorectal
 Drainage [abscess], pelvirectal
 Drainage [abscess], rectovaginal septum
 Proctostomy [for drainage by catheter]
 Proctotomy [for drainage]
 Proctotomy NOS
- Excludes:** Proctotomy for stricture release [or decompression] (see [1.NQ.72.^^](#))
 Proctotomy with removal of foreign body (see [1.NQ.56.^^](#))
- Code Also:** Any concomitant correction of imperforate anus (see [1.NT.84.^^](#))

1.NQ.52.^^ Drainage, rectum	endoscopic per orifice approach	open approach	percutaneous (transgluteal) approach
simple drainage technique	1.NQ.52.BA	1.NQ.52.LA	1.NQ.52.HA
with drainage tube left in situ	1.NQ.52.BA-TS	1.NQ.52.LA-TS	1.NQ.52.HA-TS

1.NQ.53.^^ Implantation of internal device, rectum

S 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 12	Optional	Tx Status 7	Status	R	Revision

- Includes:** Implantation, brachytherapy applicator, rectum
 Replacement of device, rectum
- Code Also:** Any concomitant loading of brachytherapy applicator (see [1.NQ.26.^^](#))

1.NQ.53.BA-EM	of brachytherapy applicator using endoscopic per orifice approach
1.NQ.53.CA-EM	of brachytherapy applicator using per orifice approach
1.NQ.53.CA-TS	of rectal tube using per orifice approach
1.NQ.53.HA-EM	of brachytherapy applicator using percutaneous approach
1.NQ.53.LA-EM	of brachytherapy applicator using open approach

1.NQ.55.^ ^ Removal of device, rectum

Excludes: that for replacement of device (see [1.NQ.53.^ ^](#))

1.NQ.55.BA-EB	of radioactive implant using endoscopic per orifice approach
1.NQ.55.CA-EB	of radioactive implant using per orifice approach
1.NQ.55.JA-EB	of radioactive implant using external approach
1.NQ.55.JA-NP	of packing using external approach
1.NQ.55.JA-TS	of rectal tube using external approach
1.NQ.55.LA-EB	of radioactive implant using open approach
1.NQ.55.LA-FA	of encirclage device [e.g. band, ligature], open approach

1.NQ.56.^ ^ Removal of foreign body, rectum**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Proctotomy with removal of foreign body, rectum

1.NQ.56.BA	using endoscopic per orifice approach
1.NQ.56.CJ	using per orifice approach with manual technique
1.NQ.56.DA	using endoscopic [laparoscopic] approach
1.NQ.56.LA	using open approach

1.NQ.57.^ ^ Extraction, rectum**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Disimpaction, rectum
Removal of impacted feces, rectum

1.NQ.57.CJ	using per orifice approach and manual technique
------------	---

1.NQ.59.^ ^ Destruction, rectum**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Ablation, rectum [tissue of]
Destruction, (internal hemorrhoid of) anorectal junction
Fulguration, rectum [tissue of]
Sclerotherapy, rectum

Excludes: Ligation, internal hemorrhoid (see [1.NQ.87.^ ^](#))

1.NQ.59.^ ^ Destruction, rectum	endoscopic [laparoscopic] approach	endoscopic per orifice approach	open approach	percutaneous (injection) approach
using cryoprobe	1.NQ.59.DA-AD	1.NQ.59.BA-AD	1.NQ.59.LA-AD	—
using device NEC	1.NQ.59.DA-GX	1.NQ.59.BA-GX	1.NQ.59.LA-GX	—

using chemical cautery agent	—	1.NQ.59.BA-X7	—	1.NQ.59.HA-X7 Includes: • Sclerotherapy NOS, (internal hemorrhoids) rectum
using radiofrequency	—	1.NQ.59.BA-AW Includes: • Radiofrequency ablation (polyp), rectum	—	—

1.NQ.72.^ ^ Release, rectum**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Proctotomy [for decompression]
Proctotomy [for release of stricture]
Proctotomy, linear

1.NQ.72.DA	using endoscopic [laparoscopic] approach
1.NQ.72.LA	using open abdominal approach
1.NQ.72.PB	using open perineal approach

1.NQ.73.^ Reduction, rectum**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Manual reduction, rectum (for prolapse)
Reduction, procidentia

Excludes: that with surgical repair (see [1.NQ.80.^](#))

1.NQ.73.CJ using per orifice approach and manual technique

1.NQ.74.^ Fixation, rectum**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: DeLorme operation
Proctosigmoidopexy
Rectopexy
Rectopexy with rectosigmoidectomy [for prolapsed rectum]
Rectosigmoidectomy [for prolapsed rectum]
Rectosigmoidopexy
Repair, rectum, prolapsed
Resection rectopexy

Excludes: Anorectoplasty for atresia (see [1.NT.84.^](#))
Anorectoplasty, posterior sagittal [PSARP] (see [1.NT.84.^](#))
Repair [prolapsed], rectum with uterus (see [1.RM.74.^](#))

Note: May involve a rectal mucosectomy

1.NQ.74.^.^ Fixation, rectum	abdominal approach	endoscopic [abdominal] approach	perineal approach	endoscopic per orifice approach
using circular stapling/suturing technique	1.NQ.74.SS Includes: • Rectosigmoidopexy with resection	1.NQ.74.DW Includes: • Rectosigmoidopexy with resection	1.NQ.74.PC Includes: • Altemeier rectosigmoidectomy with coloanal anastomosis • Rectosigmoidopexy with resection	1.NQ.74.BN Includes: • Circumferential stapled mucosectomy • Procedure for prolapse and hemorrhoids (PPH) • Stapled "hemorrhoidectomy" • Stapled anopexy • Stapled hemorrhoidopexy Excludes: • Surgical (excisional) hemorrhoidectomy (see 1.NQ.87.^.^ or 1.NT.87.^.^)
using plication [imbrication] of anorectal muscle	1.NQ.74.VT	1.NQ.74.EJ	1.NQ.74.PE Includes: • Pull through, DeLorme, transanal	—
using suture or sling fixation [e.g. to sacrum]	1.NQ.74.TV	1.NQ.74.ED	1.NQ.74.PD	—
using simple apposition (e.g. suturing to correct prolapse)	—	—	—	1.NQ.74.BA

1.NQ.80.^.^ Repair, rectum**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

- Includes:** Closure, proctostomy [site]
Proctoplasty
Proctorrhaphy
Rectoplasty
- Excludes:** Anorectoplasty for atresia (see [1.NT.84.^^](#))
PSARP [posterior sacral anorectoplasty] (see [1.NT.84.^^](#))
Repair of current obstetrical laceration of rectum (see [5.PC.80.^^](#))
Repair, rectum, prolapsed (see [1.NQ.74.^^](#))

- 1.NQ.80.BA using endoscopic per orifice approach
1.NQ.80.BA-FF using endoscopic per orifice approach with closure device [e.g. endoclip]
Includes: Closure, fistula of rectum using endoclip [e.g. Bear Claw]
1.NQ.80.LA using open abdominal approach
1.NQ.80.PB using open perineal approach
1.NQ.80.PF using posterior [sagittal] approach

1.NQ.84.^^ Construction or reconstruction, rectum**S** 16

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 16	Optional	Tx Status 10	Status	A	Abandoned after onset
				C	Converted (from endoscopic to open approach)

- Includes:** Construction, neorectum
Construction, pelvic pouch
Conversion, ileostomy [with Hartmann rectal stump] to pelvic pouch
Conversion, ileostomy to pelvic pouch ileoanal anastomosis
Mucosectomy, anorectal with pelvic pouch construction
Proctectomy, remainder with pelvic pouch construction
- Excludes:** Interventions performed on the neorectum (see [1.OW.^^.^^](#))
Proctocolectomy with concomitant pelvic pouch construction (see [1.NQ.89.^^](#))

Note: Usually involves takedown of ileostomy to construct a functional pseudo-rectum using distal ileum. This may involve conversion of a Hartmann rectal closure by excising remaining rectal and anal tissue [e.g. anorectal mucosectomy].

- 1.NQ.84.DA-XX-G using endoscopic [laparoscopic, laparoscopic-assisted, hand-assisted] approach with ileum (to construct pouch)
1.NQ.84.LA-XX-G using open approach with ileum (to construct pouch)

1.NQ.86.^ ^ Closure of fistula, rectum**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes:

Closure, fistula, anorectal
 Closure, fistula, rectolabial
 Closure, fistula, rectourethral
 Closure, fistula, rectouterine
 Closure, fistula, rectovaginal
 Closure, fistula, rectovesical
 Closure, fistula, rectovulvar
 Closure, fistula, vulvorectal
 Fistulectomy, rectum
 Repair, fistula, rectum

Excludes:

that for (endoclip) closure of perforation within lumen, rectum (see [1.NQ.80.^ ^](#))
 that with imperforate anus repair (see [1.NT.84.^ ^](#))

1.NQ.86.^ ^ Closure of fistula, rectum	using simple excision (with or without (suture) closure)	using xenograft [e.g. Surgisis anal plug]	using local transposition flap [e.g. mucosal advancement flap]	using free (myocutaneous) flap	using distant pedicled flap
for fistula terminating at skin or subcutaneous tissue [e.g. anorectal]	1.NQ.86.MB	1.NQ.86.MB-XX-L	1.NQ.86.MB-XX-E	1.NQ.86.MB-XX-F	1.NQ.86.MB-XX-G

for fistula terminating in genital tract	1.NQ.86.MH	1.NQ.86.MH-XX-L	1.NQ.86.MH-XX-E	1.NQ.86.MH-XX-F	1.NQ.86.MH-XX-G
for fistula terminating in urinary tract	1.NQ.86.MR	1.NQ.86.MR-XX-L	1.NQ.86.MR-XX-E	1.NQ.86.MR-XX-F	1.NQ.86.MR-XX-G

1.NQ.87.^ ^ Excision partial, rectum**S** 16 **E** 82

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 16	Optional	Tx Status 10	Status	A	Abandoned after onset
				C	Converted (from endoscopic to open approach)
E 82	Optional	Rectal excision 2	Extent	E M	Cap-assisted endoscopic mucosal resection (Cap-assisted EMR)
				E S	Endoscopic submucosal dissection (ESD)
				P P	Polypectomy
				T A	Transanal minimally invasive surgery (TAMIS)
				T M	Transanal endoscopic microsurgery (TEMS)

Includes:

Hemorrhoidectomy, internal
 Polypectomy, rectal
 Proctectomy, subtotal
 Proctocolectomy, [subtotal rectum]
 Proctosigmoidectomy [subtotal rectum]
 Pull through [perineal], rectum
 Rectosigmoidectomy [subtotal rectum]
 Resection [anterior] [mesorectum], rectum
 Resection [Hartmann], rectum
 Resection [Hartmann], rectum with colon

Excludes:

Excision remainder of rectal stump (see [1.NQ.89.^ ^](#))
 Ligation, external hemorrhoid (see [1.NT.87.^ ^](#))
 Mucosectomy, rectal [or anorectal] with pelvic pouch construction (see [1.NQ.84.^ ^](#))
 Mucosectomy, rectal [or anorectal] with prolapsed rectum repair (see [1.NQ.74.^ ^](#))
 Procedure for prolapse and hemorrhoids (PPH) (see [1.NQ.74.^ ^](#))
 Proctectomy with resection of bladder (see [1.PM.91.^ ^](#))
 Proctocolectomy with anorectal mucosectomy (see [1.NQ.89.^ ^](#))
 Proctocolectomy with pelvic pouch reconstruction (see [1.NQ.89.^ ^](#))
 Proctocolectomy, restorative (see [1.NQ.89.^ ^](#))
 Rectosigmoidectomy for prolapsed rectum (see [1.NQ.74.^ ^](#))
 Resection [abdominoperineal], rectum (see [1.NQ.89.^ ^](#))
 Resection [abdominoperineal], rectum with colon (see [1.NQ.89.^ ^](#))
 Resection [Hartmann], colon alone (see [1.NM.89.^ ^](#))
 Stapled anopexy (see [1.NQ.74.^ ^](#))
 Stapled circumferential mucosectomy (for rectal mucosa prolapse) (see [1.NQ.74.^ ^](#))
 Stapled hemorrhoidectomy (see [1.NQ.74.^ ^](#))
 Stapled hemorrhoidopexy (see [1.NQ.74.^ ^](#))

Code Also:

Any robotic assisted telemanipulation of tools (see [7.SF.14.^ ^](#))

1.NQ.87.^ ^ Excision partial, rectum	open abdominal [e.g. anterior] approach	endoscopic [laparoscopic, laparoscopic-assisted, hand-assisted] approach	endoscopic per orifice approach	per orifice approach [e.g. perineal, pull through, transanal, sacral or sphincteric]	posterior [e.g. entering through incision between coccyx and anal verge with proctotomy] approach
closure by apposition technique [e.g. suturing, stapling] or no closure required (for tissue regeneration)	1.NQ.87.LA	1.NQ.87.DA Includes: <ul style="list-style-type: none">Excision of (small) lesion, rectum with simple (suture) closure of defect	1.NQ.87.BA Includes: <ul style="list-style-type: none">Endoscopic mucosal resection (EMR), rectumEndoscopic polypectomy, rectumEndoscopic submucosal dissection (ESD), rectumExcision of (small) lesion, rectum with simple (suture) closure of defectTransanal minimally invasive surgery (TAMIS) for excision of rectum	1.NQ.87.CA	1.NQ.87.PF Includes: <ul style="list-style-type: none">Kraske procedure
encircage device (banding)	—	—	1.NQ.87.BA-FA Includes: <ul style="list-style-type: none">Ligation (banding), internal hemorrhoid	1.NQ.87.CA-FA	—
colorectal anastomosis	1.NQ.87.RD Code Also: <ul style="list-style-type: none">Any concomitant colostomy formation (see 1.NM.77.^ ^)Any concomitant ileostomy formation (see 1.NK.77.^ ^) Note: <ul style="list-style-type: none">Involves immediate restoration of continuity to digestive tract once resection has been completed. During the immediate post-surgical period, healing of the colorectal/ coloanal anastomosis may be facilitated by a temporary ileostomy or colostomy. (This is generally taken down a few weeks later.)	1.NQ.87.DE Code Also: <ul style="list-style-type: none">Any concomitant colostomy formation (see 1.NM.77.^ ^)Any concomitant ileostomy formation (see 1.NK.77.^ ^) Note: <ul style="list-style-type: none">Involves immediate restoration of continuity to digestive tract once resection has been completed. During the immediate post-surgical period, healing of the colorectal anastomosis may be facilitated by a temporary ileostomy or colostomy. (This is generally taken down a few weeks later.)	—	1.NQ.87.PB Note: <ul style="list-style-type: none">Involves immediate restoration of continuity to digestive tract once resection has been completed.	—
colostomy (or ileostomy) with closure of rectal stump [e.g. Hartmann technique] or submucous fistula	1.NQ.87.TF Note: <ul style="list-style-type: none">Involves closing off the distal portion of the excised digestive tract by suturing/stapling the rectum closed [Hartmann technique]. This may be a temporary measure to facilitate healing or it may be permanent. A colostomy is always required and is considered a part of this technique.	1.NQ.87.DX Note: <ul style="list-style-type: none">Involves closing off the distal portion of excised digestive tract by suturing/stapling the rectum closed [Hartmann technique]. This may be a temporary measure to facilitate healing or it may be permanent. A colostomy is always required and is considered part of this technique.	—	—	—

1.NQ.89.^ Excision total, rectum**S** 9

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 9	Optional	Tx Status 4	Status	A	Abandoned after onset
				S	Staged

Includes: Proctectomy, remainder
 Proctectomy, total (with pouch formation)
 Proctocolectomy, total
 Proctosigmoidectomy [total rectum]
 Rectosigmoidectomy [total rectum]
 Resection [abdominoperineal], rectum
 Resection [abdominoperineal], rectum with colon
 Resection, total mesorectal

Excludes: Excision of remainder of rectal stump for construction of continent ileostomy (considered part of conversion procedure) (see [1.NK.84.^](#))
 Proctectomy, remainder for (second stage) pelvic pouch construction (see [1.NQ.84.^](#))
 Proctectomy, remainder for conversion from ileostomy to continent [Kock, Barnett] ileostomy (see [1.NK.84.^](#))
 Proctectomy, subtotal (see [1.NQ.87.^](#))
 Proctocolectomy, [subtotal rectum] (see [1.NQ.87.^](#))
 Resection [anterior], rectum (see [1.NQ.87.^](#))

Code Also: Any concomitant repair of the pelvic floor (see [1.OT.80.^](#))

Note: If an excision of remainder of the rectal stump [e.g. during same admission, a subtotal proctocolectomy [or proctectomy] is performed using an abdominal anterior approach and, as a second stage, the remainder proctectomy is performed using a perineal approach] then select qualifier for "abdominoperineal approach" for the remainder proctectomy and flag the intervention with a status attribute of "S" to indicate that it was a staged procedure].

1.NQ.89.^.^ Excision total, rectum	abdominal [anterior] approach	abdominoperineal approach	combined endoscopic [abdominal] with perineal approach	combined endoscopic [abdominal] with per orifice approach
coloanal anastomosis technique	1.NQ.89.SF Code Also: <ul style="list-style-type: none"> Any concomitant ileostomy formation (see 1.NK.77.^.) Note: <ul style="list-style-type: none"> Involves immediate restoration of continuity to digestive tract once resection has been completed. During healing of the anastomosis, a temporary ileostomy/colostomy may be required. 	1.NQ.89.KZ Code Also: <ul style="list-style-type: none"> Any concomitant ileostomy formation (see 1.NK.77.^.) Note: <ul style="list-style-type: none"> Involves a transanal sphincter-sparing resection of mesorectum with a total proctectomy followed by immediate restoration of continuity to digestive tract by coloanal anastomosis. During healing of anastomosis, a temporary ileostomy/colostomy may be required. 	1.NQ.89.GV Code Also: <ul style="list-style-type: none"> Any concomitant ileostomy formation (see 1.NK.77.^.) Note: <ul style="list-style-type: none"> Involves immediate restoration of continuity to digestive tract once resection has been completed. During healing of anastomosis, a temporary ileostomy/colostomy may be required. 	1.NQ.89.AG Includes: <ul style="list-style-type: none"> Transanal total mesorectal excision (TaTME) Excludes: <ul style="list-style-type: none"> Transanal endoscopic microsurgery (TEMs) (see 1.NQ.87.^.) Transanal minimally invasive surgery (TAMIS) (see 1.NQ.87.^.)
pouch formation	1.NQ.89.SF-XX-G Includes: <ul style="list-style-type: none"> Restorative proctocolectomy with or without anorectal mucosectomy Code Also: <ul style="list-style-type: none"> Any concomitant ileostomy formation (see 1.NK.77.^.) Note: <ul style="list-style-type: none"> Involves restorative creation of a pouch (e.g. J, S, W) from colon or ileum with anastomosis to the anus. 	1.NQ.89.KZ-XX-G Code Also: <ul style="list-style-type: none"> Any concomitant ileostomy formation (see 1.NK.77.^.) Note: <ul style="list-style-type: none"> Involves a transanal sphincter-sparing resection of mesorectum with a total proctectomy and concomitant formation of a pouch from colon (colonoplasty) anastomosing this pouch to anus. continent ileostomy formation	1.NQ.89.RS-XX-G Includes: <ul style="list-style-type: none"> Total proctocolectomy with concomitant creation of continent (Kock or Barnett) ileostomy 	1.NQ.89.LH-XX-G Includes: <ul style="list-style-type: none"> Total proctocolectomy with concomitant creation of (Kock or Barnett) continent ileostomy 	—	—

1.NT.^^.^^ Therapeutic Interventions on the Anus

- Includes:** Anal cushion
 Anal sphincter
 Hemorrhoidal plexus [lying within anal cushion]
 Levator ani muscle
 Muscularis propria of anal canal
- Excludes:** Anorectal junction above dentate line (see [1.NQ.^^.^^](#))

1.NT.07.^^ Hyperthermy, anus

- 1.NT.07.JA-DU using infrared thermal heat
 1.NT.07.JA-TG using hot/warm sitz bath

1.NT.13.^^ Control of bleeding, anus

- Includes:** Hemostatic therapy, anus
- Excludes:** Sclerotherapy, anus (see [1.NT.59.^^](#))
- 1.NT.13.CA-NP using per orifice approach and packing
 1.NT.13.JA-C2 using topical application of anti-hemorrhagic agent
 Includes: aminocaproic acid, aprotinin, phytonadione, thrombin, coagulation factor VIII
- 1.NT.13.JA-GN using external approach and pressure device

1.NT.26.^^ Brachytherapy, anus**S** 35

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 35	Optional	Implant Status	Status	P M	Permanent implant – Radioactive source left in place permanently
				T M	Temporary implant – Radioactive source removed after course of treatment is complete

Includes:	Endocurietherapy, anus Implantation of radioactive material, anus Interstitial radiation therapy, anus Intracavitary radiation therapy, anus
Code Also:	Any concomitant implantation of brachytherapy applicators or conduits [e.g. needles, catheters] to gain access to treatment site (see 1.NT.53.^^)
Note:	There are typically two distinct phases required to complete the process of brachytherapy. The first phase involves the insertion of non-radioactive applicators or conduits [e.g. hollow needles, catheters, stents, etc.] that receive or transmit the radioactive material into the body. The second phase involves the after loading of the radioactive material [e.g. seeds, pellets, wires, etc.] into the applicator or conduit.
1.NT.26.CA	using per orifice approach
1.NT.26.HA	using percutaneous (transcatheter or transneedle) approach
1.NT.26.LA	using open (incisional) approach

1.NT.27.^^ Radiation, anus

Includes:	Teletherapy, anus Therapy, radiation [radiotherapy], anus
1.NT.27.JA	using external beam

1.NT.35.^^ Pharmacotherapy (local), anus

Includes:	Injection of agent, anal sphincter
1.NT.35.HA-G7	percutaneous (needle) approach using corticosteroid agent
1.NT.35.HA-L7	using percutaneous injection of bacterial toxin (e.g. botulinum toxin or Botox)
1.NT.35.HA-P1	using percutaneous (needle) injection and local anesthetic agent
1.NT.35.JA-P1	using topical application of local anesthetic agent

1.NT.50.^^ Dilation, anus**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Excludes: that with sphincterotomy (see [1.NT.72.^^](#))

1.NT.50.CA-BD	using per orifice approach and balloon dilator
1.NT.50.CA-BP	using per orifice approach and rigid dilator
1.NT.50.CJ	using per orifice manual technique [e.g. digital dilation]

1.NT.52.^ Drainage, anus**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Drainage [abscess], perianal

Excludes: Drainage [abscess], ischiorectal (see [1.NQ.52.^](#))
 Drainage [abscess], pelvirectal (see [1.NQ.52.^](#))
 that with fistulotomy or repair of fistula in ano (see [1.NT.86.^](#))

1.NT.52.HA	using percutaneous (needle) approach and aspiration
1.NT.52.LA	using incisional approach
1.NT.52.LA-TS	using incisional approach leaving [mushroom] catheter in situ (to promote drainage)

1.NT.53.^ Implantation of internal device, anus**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Implantation, artificial anal sphincter
 Implantation, brachytherapy applicator, anus
 Implantation, perianal, electronic stimulation device (for biofeedback)

Code Also: Any concomitant loading of brachytherapy applicator (see [1.NT.26.^](#))

Note: An electronic stimulation device is implanted subcutaneously in the perianal region to provide biofeedback for improved continence control. An inflatable ring (artificial sphincter) is implanted perianally with a control pump implanted in the scrotum or labia

1.NT.53.CA-EM	of brachytherapy applicator using per orifice approach
1.NT.53.HA-EM	of brachytherapy applicator using percutaneous approach
1.NT.53.LA-DV	of electronic stimulation device [e.g. for biofeedback]
1.NT.53.LA-EM	of brachytherapy applicator using open approach
1.NT.53.LA-PM	of inflatable ring with pump and reservoir attachment ("artificial anal sphincter")

1.NT.54.^ Management of internal device, anus**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Adjustment, irrigation and maintenance of device, anus

1.NT.54.HA-DV	of electronic stimulation device using percutaneous approach
1.NT.54.LA-DV	of electrical stimulation device using open approach
1.NT.54.LA-PM	of inflatable ring with pump and reservoir attachment (artificial anal sphincter)

1.NT.55.^ ^ Removal of device, anus

1.NT.55.CA-EB	of radioactive implant using per orifice approach
1.NT.55.JA-EB	of radioactive implant using external approach
1.NT.55.LA-DV	of electronic stimulation device
1.NT.55.LA-EB	of radioactive implant using open (incisional) approach
1.NT.55.LA-FA	of encirclage device [e.g. seton, wire, rubber band, nylon ring]

1.NT.56.^ ^ Removal of foreign body, anus

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Anorrhaphy following removal of foreign body, anus
Extraction of foreign body, anus

1.NT.56.CA	using per orifice approach (for simple removal of intraluminal foreign body)
1.NT.56.JA	using external approach (for simple extraction e.g. forceps)
1.NT.56.LA	using open approach

1.NT.59.^ ^ Destruction, anus

S 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

- Includes:** Ablation, anus
Cauterization, anus
Destruction (external hemorrhoid) below dentate line
Sclerotherapy, anus (for external hemorrhoids)
- Excludes:** Destruction (internal hemorrhoid of) anorectal junction (see [1.NQ.59.^^](#))
Ligation, hemorrhoid, using rubber band (see [1.NT.87.^^](#))
Partial chemodenervation of anal sphincter using botulinum (see [1.NT.35.^^](#))

1.NT.59.CA-AD	using per orifice approach and cryoprobe
1.NT.59.CA-AG	using per orifice approach and laser
1.NT.59.CA-DU	using per orifice approach and infrared probe
1.NT.59.CA-GX	using per orifice approach and device NEC [e.g. electrocautery]
1.NT.59.CA-X7	using per orifice approach and chemical cautery agent (e.g. phenol, quinine)

1.NT.72.^^ Release, anus**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

- Includes:** Fissurectomy, anal with no tissue removed
Sphincterotomy, anal
Sphincterotomy, anal (for fissure repair)
Sphincterotomy, anal with fissurectomy (for stricture release)
- Excludes:** Fissurectomy, anal (with tissue removed) (see [1.NT.87.^^](#))

1.NT.72.LA	using incisional approach
------------	---------------------------

1.NT.73.^^ Reduction, anus**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

- Includes:** Manual reduction, anus (anal prolapse)
Manual reduction, hemorrhoids

1.NT.73.CJ	using per orifice approach and manual technique
------------	---

1.NT.80.^ Repair, anus**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Anoplasty
Anorrhaphy
Encircilage, anal
Levatoroplasty, anal
Repair, fissure, anus
Restoration, continence [fecal]
Sphincteroplasty, anal (e.g. for improved continence)

Excludes: Anoplasty for congenital stenosis or low imperforate anus (see [1.NT.84.^](#))
Anoplasty, perineal pull-through (see [1.NT.84.^](#))
Anorectoplasty for atresia (see [1.NT.84.^](#))
Fistulectomy, anal (see [1.NT.86.^](#))
Implantation, artificial anal sphincter (see [1.NT.53.^](#))
Repair of current obstetrical laceration of anus (see [5.PC.80.^](#))
Repair with concomitant removal of foreign body, anus (see [1.NT.56.^](#))
Repair, fistula- in-ano (see [1.NT.86.^](#))
Sphincterotomy, anal for fissure repair (see [1.NT.72.^](#))

1.NT.80.BA-W0	endoscopic per orifice approach using other synthetic agent[e.g. silicone, macroplastique]
1.NT.80.LA	using open approach and simple suturing [e.g. overlap, oversew] technique
1.NT.80.LA-FA	using open approach and encircilage device [e.g. band, wire, rubber or nylon ring]
1.NT.80.LA-XX-A	using open approach with autograft (e.g. skin graft)
1.NT.80.LA-XX-E	using open approach with local transposition flap [e.g. endorectal advancement flap]
1.NT.80.LA-XX-F	using open approach with free flap [e.g. gracilis muscle flap]
1.NT.80.VT	using plication technique

1.NT.84.^ Construction or reconstruction, anus**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Anoplasty, perineal pull through (for atresia, congenital stenosis)
Anorectoplasty (for atresia or imperforate anus)
Correction, anal atresia (e.g. imperforate anus)
PSARP [posterior sagittal anorectoplasty]

Excludes: Anorectoplasty for rectal prolapse (see [1.NQ.74.^^](#))

Note: May involve concomitant repair of congenital fistula.

1.NT.84.LF	using abdominoperineal approach
	Includes: low anterior approach
1.NT.84.PB	using perineal approach
	Includes: pull through
1.NT.84.PF	using posterior approach
	Includes: sacral, sagittal, PSARP

1.NT.86.^^ Closure of fistula, anus

S 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Fistulotomy, anus
Repair, fistula in ano

Excludes: Closure, fistula, anorectal (see [1.NQ.86.^^](#))
Closure, fistula, anovaginal (see [1.RS.86.^^](#))

1.NT.86.MB	using open approach for fistula terminating at skin
1.NT.86.MB-FA	using open approach for fistula terminating at skin and encircage device [e.g. seton or rubber band]
1.NT.86.MB-W3	using open approach for fistula terminating at skin using fibrin glue
1.NT.86.MB-XX-G	using pedicled flap [e.g. endorectal advancement muscle flap] for fistula terminating at skin
1.NT.86.MB-XX-L	using xenograft [e.g. Surgisis anal plug] for fistula terminating at skin
1.NT.86.ME	open (excisional) approach for fistula terminating in abdominal cavity [e.g. digestive or biliary tract]
1.NT.86.ME-FA	using encircage device [e.g. seton or rubber band] for fistula terminating in abdominal cavity [e.g. digestive or biliary tract]
1.NT.86.ME-XX-G	using pedicled flap [e.g. endorectal advancement muscle flap] for fistula terminating in abdominal cavity [e.g. digestive or biliary tract]

1.NT.87.^^ Excision partial, anus

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

- Includes:** Cryptectomy
Debridement, anus
Diverticulectomy, anal
Excision, anal tag
Fissurectomy, anal with tissue removed
Hemorrhoidectomy, external
Ligation, external hemorrhoid(s)
- Excludes:** Fissurectomy with no tissue removed (see [1.NT.72.^^](#))
Ligation, internal hemorrhoids (see [1.NQ.87.^^](#))
Mucosectomy, anorectal for prolapsed rectum repair (see [1.NQ.74.^^](#))
Mucosectomy, anorectal with pelvic pouch construction (see [1.NQ.84.^^](#))
Mucosectomy, anorectal with proctocolectomy (see [1.NQ.89.^^](#))

1.NT.87.LA	using excisional technique
1.NT.87.UR	using ligature dissection technique
1.NT.87.UR-FA	using ligature dissection and encirclage device [e.g. rubber band ligature]

1.NV.^^.^^ Therapeutic Interventions on the Appendix

- Includes:** Vermiform appendix

1.NV.52.^^ Drainage, appendix

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

- Includes:** Appendicostomy
Fistulization, appendiceal [to intestine]

1.NV.52.DA	using endoscopic [laparoscopic] approach
1.NV.52.HA	using percutaneous (needle) approach
1.NV.52.LA	using open approach and formation of fistula to intestine [for continuous drainage]

1.NV.89.^ ^ Excision total, appendix**S** 13

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 13	Mandatory	Mandatory Tx Status 8	Status	0	Not applicable
				A	Abandoned after onset
				B	Incidental (to another intervention)
				C	Converted (from endoscopic to open approach)

Includes: Appendectomy**Note:** Use Status attribute "B" to specify incidental to another procedure.

1.NV.89.DA using endoscopic [laparoscopic] approach

1.NV.89.LA using open approach

Therapeutic Interventions on the Hepatobiliary Tract and Other Sites within the Abdominal Cavity NEC (1OA - 1OZ)

1.OA.^^.^^ Therapeutic Interventions on the Liver

Includes: Caudate, quadrate of liver
Liver NOS
Lobe of liver
Segment I through VIII of liver
Subphrenic space

1.OA.13.^^ Control of bleeding, liver

E 53

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 53	Mandatory	Mandatory Coils	Extent	0	Not applicable (no coil used)
				01	One coil
				02	Two coils
				03	Three coils
				04	Four coils
				05	Five coils
				06	Six coils
				07	Seven coils
				08	Eight coils
				09	Nine coils
				10	Ten coils
				G	More than ten coils (11 - 20)
				H	More than twenty coils
				U	Unspecified

Includes: Embolization for control of bleeding , liver
Hepatorrhaphy
Hepatotomy with ligation [selected vessels]
Repair, liver
Sclerotherapy, hepatic

Excludes: Systemic pharmacotherapy for control of bleeding (see [1.ZZ.35.^^](#))

Note: May involve leaving perihepatic packing in situ [for hemorrhage control]

1.OA.13.^ [^] Control of bleeding, liver	endoscopic [laparoscopic] approach	open approach	percutaneous transluminal approach
using laser coagulation	1.OA.13.DA-AG	1.OA.13.LA-AG	—
using collagen powder	1.OA.13.DA-W2	1.OA.13.LA-W2	—

1.OA.21.^[^] Dialysis, liver

Includes: Molecular adsorbent recirculation system (MARS)

1.OA.21.HQ-BR by hemofiltration

1.OA.27.^[^] Radiation, liver

Includes: Teletherapy, liver
Therapy, radiation [radiotherapy], liver

1.OA.27.HH-V1 using percutaneous [transcatheter] approach and radioactive pharmaceutical agent [e.g. yttrium-90]

Includes: Selective Internal Radiation Therapy (SIRT)
Transarterial radio-embolization (TARE)

1.OA.27.JA using external approach and beam

1.OA.27.JX using external approach and focused beam [e.g. gamma knife, cyber knife stereotactic radiosurgery]

1.OA.35.^[^] Pharmacotherapy (local), liver

Includes: Injection, liver
Instillation, liver
Perfusion, liver

Excludes: Systemic pharmacotherapy (see [1.ZZ.35.^[^]](#))
that for control of bleeding (see [1.OA.13.^[^]](#))

1.OA.35.^ ^ Pharmacotherapy (local), liver	percutaneous [needle] approach	percutaneous transcatheter approach	open approach
using bile and liver therapeutic agent	1.OA.35.HA-A5 Includes: • ursodiol	1.OA.35.HH-A5 Includes: • ursodiol	—
using alkylating agent	—	—	1.OA.35.LA-M1 Includes: • Liver wafer (implantable) chemotherapy (e.g. carmustine)
using pharmacological agent NEC	1.OA.35.HA-T9	1.OA.35.HH-T9	—

1.OA.52.^ ^ Drainage, liver**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Drainage [abscess], subphrenic
 Fenestration [cysts], liver
 Hepatotomy NOS
 Marsupialization [cyst], liver
 Unroofing [cysts], liver

Excludes: Enucleation [cyst], liver (see [1.OA.87.^ ^](#))
 Resection, liver [cysts] (see [1.OA.87.^ ^](#))

Note: May involve irrigation and debridement

1.OA.52.DA using endoscopic [laparoscopic] approach
 1.OA.52.HA using percutaneous (needle) approach
 1.OA.52.HA-TS using percutaneous [trans abdominal] approach leaving drainage tube in situ
 1.OA.52.LA using open [abdominal] approach
 1.OA.52.QV using open transpleural approach

1.OA.53.^ ^ Implantation of internal device, liver**S** 9

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 9	Optional	Tx Status 4	Status	A	Abandoned after onset
				S	Staged

Includes:	Implantation, of infusion pump, liver
Excludes:	Replacement of device within existing subcutaneous pocket (see 1.YY.54.^^) Second stage creation of subcutaneous pocket for implantation of device within pocket (see 1.YY.53.^^)

1.OA.53.LA-QK	of infusion pump using open approach (with catheter)
---------------	--

1.OA.54.^^ Management of internal device, liver

Includes:	Adjustment of device, liver Irrigation of device, liver
Excludes:	Installation of agent into device for local pharmacotherapy (see 1.OA.35.^^) Intervention on subcutaneous pocket only (see 1.YY.^^.^^)

1.OA.54.JA-QK	of infusion pump
1.OA.54.JA-TS	of drainage tube

1.OA.55.^^ Removal of device, liver

Excludes:	Removal of infusion pump from subcutaneous pocket only (see 1.YY.55.^^)
------------------	--

1.OA.55.HA-TS	of drainage tube [catheter] using percutaneous approach
1.OA.55.LA-QK	of infusion pump using open approach

1.OA.56.^^ Removal of foreign body, liver

1.OA.56.LA	using open approach
------------	---------------------

1.OA.58.^^ Procurement, liver

Includes:	Procurement, liver (alone)
Excludes:	Procurement, multi-visceral organs (en bloc) [e.g. liver with spleen, stomach, pancreas, intestine, kidney, etc.] (see 1.OT.58.^^)

1.OA.58.LA-XX-K	of entire deceased donor liver
1.OA.58.WL-XX-J	of split living donor liver
1.OA.58.WL-XX-K	of split deceased donor liver

1.OA.59.^A Destruction, liver**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Ablation, liver [tissue of]

1.OA.59.^A Destruction, liver	endoscopic [abdominal] approach	open approach	percutaneous approach
using chemical cautery agent [e.g. ethanol]	1.OA.59.DA-X7	1.OA.59.LA-X7	1.OA.59.HA-X7
using cryoprobe	1.OA.59.DA-AD	1.OA.59.LA-AD	—
using device NEC	1.OA.59.DA-GX	1.OA.59.LA-GX	—
using laser	1.OA.59.DA-AG Includes: • Laser interstitial thermal therapy [LITT] (of lesion)	1.OA.59.LA-AG Includes: • Laser interstitial thermal therapy [LITT] (of lesion)	—
using radiofrequency	1.OA.59.DA-AW	1.OA.59.LA-AW	1.OA.59.HA-AW

1.OA.74.^A Fixation, liver**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Hepatopexy

1.OA.74.LA using open approach

1.OA.85.^A Transplant, liver**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Transplantation , liver with intestine

Note: Usually involves a hepatectomy [total or subtotal] with concomitant transplantation and biliary drainage by choledochojejunostomy.

1.OA.85.LA-XX-K	of a deceased donor full size liver
1.OA.85.VC-XX-K	of a deceased donor multi organ liver with intestine/ pancreas/spleen/stomach [or any combination of]
1.OA.85.WL-XX-J	of a living donor split liver
1.OA.85.WL-XX-K	of a deceased donor split liver (or reduced 'paediatric'size liver)

1.OA.87.^ ^ Excision partial, liver

S 10 **L** 78

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 10	Optional	Tx Status 5	Status	A	Abandoned after onset
				R	Revision
				S	Staged
L 78	Mandatory	Mandatory Liver	Location	L	Left (lobectomy, hepatectomy)
				M	Multiple segments (or wedges from)
				R	Right (lobectomy, hepatectomy)
				R E	Right extended (tri-segmental hepatectomy, including cholecystectomy)
				S	Single segment (or wedge from)
				U	Unspecified (unqualified or unknown)

Includes: Enucleation [cyst], liver
Hepatectomy, segmental (single or multiple segments or wedges)
Hepatectomy, subtotal
Lobectomy, hepatic (left, right, right extended)
Resectional debridement, liver
Segmentectomy, liver

Excludes: Debridement with irrigation [cyst], liver (see [1.OA.52.^ ^](#))
that performed concomitantly with transplantation (see [1.OA.85.^ ^](#))

1.OA.87.DA	using endoscopic (laparoscopic) approach
1.OA.87.LA	using open approach
1.OA.87.LA-AZ	using ultrasonic aspirator device (for dissection) and open approach

1.OB.^.^ Therapeutic Interventions on the Spleen**1.OB.13.^.^ Control of bleeding, spleen****E 53**

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 53	Mandatory	Mandatory Coils	Extent	0	Not applicable (no coil used)
				01	One coil
				02	Two coils
				03	Three coils
				04	Four coils
				05	Five coils
				06	Six coils
				07	Seven coils
				08	Eight coils
				09	Nine coils
				10	Ten coils
				G	More than ten coils (11 - 20)
				H	More than twenty coils
				U	Unspecified

Includes: Embolization of splenic artery for control of bleeding
 Ligation of splenic artery for control of bleeding
 Repair, spleen
 Splenoplasty
 Splenorrhaphy (with or without splenic artery ligation)

Excludes: Embolization or ligation of splenic artery for shrinkage of diseased spleen (see [1.KE.51.^.](#))
 Systemic pharmacotherapy for control of bleeding (see [1.ZZ.35.^.](#))
 that with partial splenectomy (see [1.OB.87.^.](#))

1.OB.13.^ ^ Control of bleeding, spleen	open [abdominal] approach	open posterior [subcostal] approach	percutaneous transluminal approach	endoscopic approach
using apposition technique [e.g. suturing or NOS]	1.OB.13.LA	1.OB.13.PF	—	1.OB.13.DA
using chemical cautery [e.g. topical thrombin]	1.OB.13.LA-X7	1.OB.13.PF-X7	—	1.OB.13.DA-X7

1.OB.89.^ ^ Excision total, spleen**S** 16

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 16	Optional	Tx Status 10	Status	A	Abandoned after onset
				C	Converted (from endoscopic to open approach)

Includes:	Splenectomy, remainder Splenectomy, total
Excludes:	Splenectomy with partial gastrectomy (see 1.NF.87.^) Splenectomy with partial pancreatectomy (see 1.OJ.87.^) Splenectomy with partial pancreaticoduodenectomy (see 1.OK.87.^) Splenectomy with radical gastrectomy (see 1.NF.91.^) Splenectomy with radical pancreaticoduodenectomy (see 1.OK.91.^) Splenectomy with total gastrectomy (see 1.NF.89.^) Splenectomy with total pancreatectomy (see 1.OJ.89.^) Splenectomy with total pancreaticoduodenectomy (see 1.OK.89.^) that with autotransplantation of splenic tissue into other site, such as liver or omentum (see 1.OB.83.^)
1.OB.89.DA	using endoscopic approach
1.OB.89.LA	using open [abdominal] approach
1.OB.89.PF	using open posterior [subcostal] approach

1.OD.^.^ Therapeutic Interventions on the Gallbladder

Includes:	Fundus, body, neck of gallbladder Gallbladder with associated bile ducts Luschka's ducts of gallbladder [wall]
Excludes:	Bile ducts [common, cystic or extrahepatic] alone (see 1.OE.^.^)

1.OD.27.^ Radiation, gallbladder

Includes:	Teletherapy, gallbladder Therapy, radiation [radiotherapy], gallbladder
1.OD.27.JA	using external beam
1.OD.27.JX	using focused beam [e.g. gamma knife, cyber knife stereotactic radiosurgery]

1.OD.35.^ Pharmacotherapy (local), gallbladder

1.OD.35.CA-A5	using per orifice approach and bile and liver therapy agent
Includes:	That for dissolution of gallstones usodiol, chenodiol

1.OD.52.^ ^ Drainage, gallbladder**S** 16

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 16	Optional	Tx Status 10	Status	A	Abandoned after onset
				C	Converted (from endoscopic to open approach)

Includes: Cholecystostomy [for drainage]
Cholecystostomy NOS

Excludes: Choledochostomy (see [1.OE.52.^ ^](#))

1.OD.52.DA using endoscopic (laparoscopic) approach
 1.OD.52.HA using percutaneous (needle) approach
 1.OD.52.HA-TS using percutaneous (needle) approach and leaving drainage tube in situ
 1.OD.52.LA using open approach
 1.OD.52.LA-TS using open approach and leaving tube in situ

1.OD.54.^ ^ Management of internal device, gallbladder

Excludes: Removal, drainage device [e.g. indwelling catheter, stent or T tube, gallbladder] (see [1.OD.55.^ ^](#))

Note: May involve adjusting, irrigating, clearing, clamping, repositioning, shortening, lengthening (changing part) of a catheter, stent or (T) tube system.

1.OD.54.HA-TS of tube [e.g. cholecystostomy tube, catheter] using percutaneous approach

1.OD.55.^ ^ Removal of device, gallbladder**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

1.OD.55.HA-TS of tube [e.g. cholecystostomy tube, catheter] using percutaneous approach

1.OD.57.^ ^ Extraction, gallbladder**S** 16

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 16	Optional	Tx Status 10	Status	A	Abandoned after onset
				C	Converted (from endoscopic to open approach)

Includes: Cholecystotomy with removal of calculus
Partial cholecystectomy with concomitant extraction (calculi), gallbladder

Code Also: Any concomitant bile duct catheterization (see [1.OE.52.^ ^](#))

Note: Involves an incision into the gallbladder to extract calculi with simple reapposition.

1.OD.57.DA using endoscopic (laparoscopic) approach

1.OD.57.LA using open approach

1.OD.59.^ ^ Destruction, gallbladder**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

1.OD.59.KQ using extracorporeal shockwave lithotripsy [ESWL]

1.OD.76.^ ^ Bypass, gallbladder**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Cholecystoenterostomy
Cholecystojejunostomy

Excludes: that with bile duct anastomosis [or diversion] (see [1.OE.76.^ ^](#))

1.OD.76.DA using endoscopic [laparoscopic] approach

1.OD.76.LA using open approach

1.OD.80.^ ^ Repair, gallbladder**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Closure, cholecystostomy
Suture [lacerated], gallbladder

Excludes: Repair, cholecystostomy [anastomosis site] (see [1.OW.80.^ ^](#))

1.OD.80.DA using endoscopic [laparoscopic] approach

1.OD.80.LA using open approach

1.OD.86.^ ^ Closure of fistula, gallbladder**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Closure, fistula, cholecystenteric
Closure, fistula, cholecystocolonic
Closure, fistula, cholecystogastroenteric

1.OD.86.ME of fistula terminating in abdominal cavity [e.g. digestive or biliary tract]

1.OD.89.^ ^ Excision total, gallbladder**S** 16

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 16	Optional	Tx Status 10	Status	A	Abandoned after onset
				C	Converted (from endoscopic to open approach)

- Includes:** Cholecystectomy with exploration of common bile duct
Cholecystectomy with extraction [calculi] from common bile duct
Cholecystectomy with extraction [calculi] from cystic duct
Cholecystectomy, total
- Excludes:** Cholecystectomy with hepatectomy [right extended] (see [1.OA.87.^^](#))
Cholecystectomy with pancreaticoduodenectomy (see [1.OK.87.^^](#))
Cholecystectomy with radical gastrectomy (see [1.NF.91.^^](#))
- Code Also:** Any concomitant insertion of T-tube for drainage following cholecystectomy (see [1.OE.52.^^](#))
Any robotic assisted telemanipulation of tools (see [7.SF.14.^^](#))

1.OD.89.^^ Excision total, gallbladder	endoscopic [laparoscopic] approach	open approach
without extraction (of calculi)		
cholecystectomy alone	1.OD.89.DA	1.OD.89.LA
cholecystectomy with bile duct exploration and no stones extracted	1.OD.89.EC	1.OD.89.TP
with extraction (of calculi) from bile ducts		
using balloon device	1.OD.89.DT-BD	1.OD.89.SM-BD
using basket device	1.OD.89.DT-AM	1.OD.89.SM-AM
using device NEC [e.g. forceps, metal probe]	1.OD.89.DT-GX	1.OD.89.SM-GX
using electrohydraulic probe	1.OD.89.DT-AS	1.OD.89.SM-AS
using laser probe	1.OD.89.DT-AG	1.OD.89.SM-AG

1.OE.^^.^^ Therapeutic Interventions of the Bile Ducts

- Includes:** Ampulla and sphincter of Oddi
Common bile duct [CBD]
Cystic duct
Duct of Santorini, Wirsung
Hepatic ducts [intra and extra]
Hepatopancreatic ampulla
Pancreatic duct
Papilla [ampulla] and sphincter of Vater
- Excludes:** Bile ducts [in continuity] with gall bladder (see [1.OD.^^.^^](#))

1.OE.13.^^ Control of bleeding, bile ducts

- Includes:** Control of bleeding at previous biliary papillotomy (sphincterotomy) site
- | | |
|---------------|--|
| 1.OE.13.BA-E3 | using endoscopic per orifice approach and cardiac stimulant (e.g. epinephrine) |
| 1.OE.13.BA-FF | using endoscopic per orifice approach and clips |

1.OE.26.^ ^ Brachytherapy, bile ducts**S** 35

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 35	Optional	Implant Status	Status	P M	Permanent implant – Radioactive source left in place permanently
				T M	Temporary implant – Radioactive source removed after course of treatment is complete

Includes: Endocurietherapy, bile ducts
 Implantation of radioactive material, bile ducts
 Interstitial radiation therapy, bile ducts
 Intracavitary radiation therapy, bile ducts

Code Also: Any concomitant implantation of brachytherapy applicators or conduits [e.g. needles, catheters, stents] to gain access to treatment site (see [1.OE.53.^ ^](#))

Note: There are typically two distinct phases required to complete the process of brachytherapy. The first phase involves the insertion of non-radioactive applicators or conduits [e.g. hollow needles, catheters, stents, etc.] that receive or transmit the radioactive material into the body. The second phase involves the after loading of the radioactive material [e.g. seeds, pellets, wires, etc.] into the applicator or conduit.

1.OE.26.BA	using endoscopic per orifice approach
1.OE.26.CA	using per orifice approach
1.OE.26.HA	using percutaneous (transcatheter or stent) approach
1.OE.26.LA	using open approach

1.OE.27.^ ^ Radiation, bile ducts

Includes: Teletherapy, bile ducts
 Therapy, radiation [radiotherapy], bile ducts

1.OE.27.JA	using external beam
------------	---------------------

1.OE.35.^ ^ Pharmacotherapy (local), bile ducts

Includes: Injection, gallbladder or bile ducts (to dissolve calculi in bile duct)
Instillation, bile ducts

Excludes: Systemic pharmacotherapy (see [1.ZZ.35.^ ^](#))

1.OE.35.BA-Z9 using endoscopic per orifice approach and chemical agent NEC

Includes: monooctanoin
That to dissolve stones within the bile duct

1.OE.35.HA-T9 using percutaneous (needle) approach of pharmacological agent NEC

1.OE.35.HH-Z9 using percutaneous transcatheter approach and chemical agent NEC

Includes: monooctanoin
That to dissolve stones within the bile duct

1.OE.37.^ ^ Installation of external appliance, bile ducts

Includes: Attachment and initiation of external appliance, bile ducts

1.OE.37.JA-QN of suction pump [e.g. Hemovac]

1.OE.38.^ ^ Management of external appliance, bile ducts

Includes: Adjustment, management or removal of external appliance, bile ducts

Excludes: Measurement of drainage (see [2.OE.21.^ ^](#))

1.OE.38.JA-QN of suction pump [e.g. Hemovac]

1.OE.50.^ ^ Dilation, bile ducts**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

- Includes:** Choledochotomy with dilation
Dilation, sphincter of Oddi
Hepaticocholedochotomy with dilation
Insertion, stent, bile duct
Recanalization of bile duct [following stricture or other mechanical blockage]
Release [stricture], bile duct
- Excludes:** Correction of [congenital] biliary atresia (see [1.OE.84.^^](#))
Dilation with concomitant extraction of calculi (see [1.OE.57.^^](#))
Insertion, indwelling T-tube, catheter or endoprosthesis (for drainage), bile duct (see [1.OE.52.^^](#))

1.OE.50.^^ Dilation, bile ducts	endoscopic [retrograde] per orifice approach [ERC]	endoscopic [retrograde] per orifice approach [ERC] with incision	open approach	percutaneous [transhepatic] transluminal approach
using incisional technique only	—	1.OE.50.BT Includes: • Papillotomy NOS • Sphincterotomy, bile duct	—	—
using balloon dilator (with or without stent)	1.OE.50.BA-BD	1.OE.50.BT-BD Includes: • Papillotomy NOS • Sphincterotomy, bile duct	1.OE.50.LA-BD	1.OE.50.HA-BD
using laser (with or without stent)	1.OE.50.BA-AG	1.OE.50.BT-AG Includes: • Papillotomy NOS • Sphincterotomy, bile duct	1.OE.50.LA-AG	1.OE.50.HA-AG
using rigid dilator [e.g. stent]	1.OE.50.BA-NR	1.OE.50.BT-NR Includes: • Papillotomy NOS • Sphincterotomy, bile duct	1.OE.50.LA-NR	1.OE.50.HA-NR

1.OE.52.^^ Drainage, bile ducts

S 16

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 16	Optional	Tx Status 10	Status	A	Abandoned after onset
				C	Converted (from endoscopic to open approach)

- Includes:** Choledocho(s)tomy [for drainage or decompression]
Decompression, bile duct
Hepatocholedocho(s)tomy [for drainage or decompression]
Insertion, bile duct, nasobiliary catheter [for drainage]
Insertion, bile duct, Ttube, stent or catheter [for drainage]

Excludes: Cholelithotomy for dilation (see [1.OE.50.^^](#))
 Dilation with drainage, bile duct (see [1.OE.50.^^](#))
 Drainage, bile duct, using bypass procedure (see [1.OE.76.^^](#))
 Hepatocholedochotomy for dilation (see [1.OE.50.^^](#))
 Insertion, bile duct, indwelling stent or catheter for dilation (see [1.OE.50.^^](#))

1.OE.52.BA-TS	using endoscopic [retrograde] per orifice approach [e.g. ERC or ERCP] leaving catheter (tube) in situ
1.OE.52.DA-TS	using endoscopic [abdominal] approach leaving catheter (tube) in situ
1.OE.52.GP-TS	using percutaneous transluminal approach [e.g. transhepatic] leaving catheter (tube) in situ
1.OE.52.LA-TS	using open approach leaving catheter (tube) in situ

1.OE.53.^^ Implantation of internal device, bile ducts

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Code Also: Any concomitant loading of brachytherapy applicator (see [1.OE.26.^^](#))

1.OE.53.BA-EM	of brachytherapy applicator using endoscopic per orifice approach
1.OE.53.HA-EM	of brachytherapy applicator using percutaneous approach
1.OE.53.LA-EM	of brachytherapy applicator using open approach

1.OE.54.^^ Management of internal device, bile ducts

Includes: Adjustment of device, bile ducts
 Clamping of device, bile ducts
 Clearing, drainage device [e.g. catheter, stent or T tube], bile duct
 Irrigation of device, bile ducts
 Management, drainage device [e.g. catheter, stent or T tube], bile duct

Excludes: Removal, drainage device [e.g. indwelling catheter, stent or T-tube, bile duct (see [1.OE.55.^^](#))

1.OE.54.BA-TS	of drainage device using endoscopic [retrograde] per orifice [e.g. ERC or ERCP] approach
1.OE.54.HA-TS	of drainage device using percutaneous transluminal [transhepatic] approach (over a guide wire)
1.OE.54.JA-NR	of stent or tube (T-tube)
1.OE.54.JA-TS	of naso-biliary tube

1.OE.55.^ ^ Removal of device, bile ducts

Code Also: Any concomitant choledochorrhaphy (see [1.OE.80.^ ^](#))

1.OE.55.BA-EB	of radioactive implant using endoscopic per orifice approach
1.OE.55.BA-NR	of stent using endoscopic per orifice approach
1.OE.55.BA-TS	of drainage device [e.g. tube, catheter, T-tube] using endoscopic per orifice approach
1.OE.55.CA-EB	of radioactive implant using per orifice approach
1.OE.55.HA-TS	of drainage device [e.g. tube, catheter, T-tube] using percutaneous approach
1.OE.55.LA-EB	of radioactive implant using open approach

1.OE.57.^ ^ Extraction, bile ducts**S** 16

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 16	Optional	Tx Status 10	Status	A	Abandoned after onset
				C	Converted (from endoscopic to open approach)

Includes: Choledocholithotomy
Cholelithotomy
Extraction [with or without sphincterotomy], bile duct calculus
Sphincterotomy with extraction [calculus], bile duct
Sphincterotomy with extraction [calculus], hepatic duct
Sphincterotomy with extraction [calculus], pancreatic duct
Sweeping bile ducts for stone(s) and/or debris (with or without extraction)

Excludes: Cholecystectomy with extraction of bile duct calculi (see [1.OD.89.^ ^](#))

Code Also: Any concomitant destruction of bile duct calculi (see [1.OE.59.^ ^](#))
Any concomitant dilation for stricture of another duct (see [1.OE.50.^ ^](#))
Any insertion of catheter or T-tube for continuous drainage (see [1.OE.52.^ ^](#))
Any insertion of stent for (post extraction) continuous dilation (see [1.OE.50.^ ^](#))

Note: Choledochotomy or sphincterotomy incision may be performed to enlarge bile duct lumen in order to aid in extraction of stone(s) and usually involves subsequent simple suture repair. An irrigation is commonly performed following extraction to clear bile duct of calculi debris.

1.OE.57.^ ^ Extraction, bile ducts	endoscopic [laparoscopic] approach	endoscopic [retrograde] per orifice approach [ERC]	open approach	percutaneous transhepatic approach [PTC]
using balloon device	1.OE.57.DA-BD	1.OE.57.BA-BD	1.OE.57.LA-BD	1.OE.57.HA-BD
using basket [dormia] device	1.OE.57.DA-AM	1.OE.57.BA-AM	1.OE.57.LA-AM	1.OE.57.HA-AM
using other device NEC [e.g. forceps, meatome]	1.OE.57.DA-GX	1.OE.57.BA-GX	1.OE.57.LA-GX	1.OE.57.HA-GX

1.OE.59.^ ^ Destruction, bile ducts**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Destruction with irrigation [calculi], bile duct
 ESWL, biliary tract [stones]
 Extracorporeal shockwave lithotripsy, bile duct [stones]
 Lithotripsy, bile duct

Excludes: Cholecystectomy with destruction of bile duct calculi (see [1.OD.89.^ ^](#))

Code Also: Any concomitant extraction of bile duct calculi (see [1.OE.57.^ ^](#))

1.OE.59.^ ^ Destruction, bile ducts	using electrohydraulic device [probe]	using laser	using ultrasonic device [probe]	using other device NEC
endoscopic [retrograde cholangiography] per orifice approach [ERC]	1.OE.59.BA-AS	1.OE.59.BA-AG	1.OE.59.BA-AZ	1.OE.59.BA-GX Includes: • Mechanical lithotripsy Code Also: • Extraction using basket [dormia] device (see 1.OE.57.BA-AM)
extracorporeal shock wave lithotripsy approach [ESWL]	1.OE.59.KQ-AS	—	—	—
percutaneous [transhepatic cholangiography] approach [PTC]	1.OE.59.HA-AS	1.OE.59.HA-AG	1.OE.59.HA-AZ	—
endoscopic [laparoscopic] approach	1.OE.59.DA-AS	1.OE.59.DA-AG	1.OE.59.DA-AZ	—
open approach	1.OE.59.LA-AS	1.OE.59.LA-AG	1.OE.59.LA-AZ	—

1.OE.76.^ ^ Bypass, bile ducts**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Choledochoduodenostomy [for stricture bypass]
 Choledochoenterostomy [for stricture bypass]
 Choledochojejunostomy [for diversion of bile duct]
 Hepatojejunostomy [for diversion of hepatic duct]
 Pancreaticojejunostomy [for diversion of pancreatic duct]

Excludes: Choledochectomy with bilioenteric anastomosis (see [1.OE.89.^^](#))
 Choledochoenterostomy for biliary atresia (see [1.OE.84.^^](#))
 Gastrectomy with biliopancreatic bypass (see [1.NF.78.^^](#))
 Pancreaticoduodenostomy for pancreatic cyst (see [1.OJ.76.^^](#))
 Pancreaticojejunostomy for pancreatic cyst (see [1.OJ.76.^^](#))
 Reimplantation, bile duct with excision of ampulla of Vater (see [1.OE.89.^^](#))

Code Also: Any insertion of stent for dilation during healing (see [1.OE.50.^^](#))
 Any insertion of T-tube or biliary catheter for drainage during healing (see [1.OE.52.^^](#))

Note: Purpose of surgery is to divert flow of bile or pancreatic juices when the normal passage has been blocked by a mechanical obstruction or stricture that cannot be removed by simple dilation or extraction [calculi].

1.OE.76.^^ Bypass, bile ducts	endoscopic [laparoscopic] approach	open approach
choledochoenterostomy	1.OE.76.DV	1.OE.76.SR
hepaticoenterostomy	1.OE.76.EE	1.OE.76.UF
pancreaticoenterostomy	1.OE.76.EG	1.OE.76.VK

1.OE.80.^^ Repair, bile ducts

S 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Choledochoplasty
 Choledochorrhaphy
 Sphincteroplasty, bile duct (with or without pancreatic duct septotomy)

Excludes: Choledochojejunostomy (see [1.OE.76.^^](#))
 Repair, anastomosis site, bile duct (see [1.OW.50.^^](#))
 Repair, Roux en y limb [anastomosis site], bile duct (see [1.OW.80.^^](#))

Code Also: Any concomitant insertion of T-tube for drainage and dilation (see [1.OE.52.^^](#))

1.OE.80.^^ Repair, bile ducts	endoscopic [laparoscopic] approach	open approach
using apposition technique [e.g. suturing]	1.OE.80.DA	1.OE.80.LA
using autograft [e.g. mucosal graft]	1.OE.80.DA-XX-A	1.OE.80.LA-XX-A
using fibrin glue	1.OE.80.DA-W3	1.OE.80.LA-W3

1.OE.84.^ ^ Construction or reconstruction, bile ducts**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Correction, biliary atresia

Excludes: Choledochoenterostomy for acquired stricture repair (see [1.OE.76.^ ^](#))
 Recanalization of bile duct [for stricture] (see [1.OE.50.^ ^](#))

Note: Involves creation of a patent bile duct using a roux en Y choledochoenterostomy or portoenterostomy technique

1.OE.84.LA using open approach

1.OE.86.^ ^ Closure of fistula, bile ducts**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Closure, fistula, choledochocutaneous
 Closure, fistula, choledochoduodenal
 Closure, fistula, hepatopleural
 Closure, fistula, hepatopulmonary
 Fistulectomy, bile duct
 Repair, fistula, bile duct

Excludes: Closure, fistula, cholecystenteric (see [1.OD.86.^ ^](#))

1.OE.86.MB for fistula terminating at skin [or subcutaneous tissue]
 1.OE.86.ME for fistula terminating in abdominal cavity [e.g. digestive or biliary tract]
 1.OE.86.MQ for fistula terminating in thoracic cavity [e.g. pleura, pulmonary space]

1.OE.87.^ ^ Excision partial, bile ducts**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Diverticulectomy, bile duct
Excision, ampulla of Vater with ductoplasty
Excision, ampulla of Vater with replantation of bile duct
Excision, choledochal cyst
Excision, choledochoceles

Excludes: Fistulectomy, bile duct (see [1.OE.86.^^](#))

1.OE.87.BA using endoscopic [retrograde: ERC] per orifice approach
1.OE.87.DA using endoscopic [laparoscopic] approach
1.OE.87.LA using open approach

1.OE.89.^^ Excision total, bile ducts

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Choledochectomy
Excision [remainder], bile duct

Excludes: Diverticulectomy, bile duct (see [1.OE.87.^^](#))
Excision, ampulla of Vater with ductoplasty (see [1.OE.87.^^](#))
Excision, ampulla of Vater with replantation of bile duct (see [1.OE.87.^^](#))
Excision, choledochal cyst (see [1.OE.87.^^](#))
Excision, choledochoceles (see [1.OE.87.^^](#))

Code Also: Any concomitant insertion of T-tube or stent for drainage or decompression (see [1.OE.52.^^](#))

1.OE.89.SR using open approach and choledochojunostomy technique [for anastomosis]
Includes: Anastomosis may involve the use of roux en Y technique
1.OE.89.UF using open approach and hepaticojunostomy technique [for anastomosis]
Includes: Anastomosis may involve the use of roux en Y technique

1.OJ.^^.^^ Therapeutic Interventions on the Pancreas

Includes: Head, body, tail of pancreas
Islets of Langerhans [endocrine pancreas]

Excludes: Duct of Santorini, Wirsung (see [1.OE.^^.^^](#))
Hepatopancreatic ampulla (see [1.OE.^^.^^](#))
Pancreas with duodenum (see [1.OK.^^.^^](#))
Pancreatic duct (see [1.OE.^^.^^](#))

1.OJ.13.^ ^ Control of bleeding, pancreas**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Repair (ruptured) pancreas

Excludes: that with subtotal pancreatectomy (see [1.OJ.87.^ ^](#))

1.OJ.13.LA using open approach and apposition technique (e.g. suturing)

1.OJ.13.LA-W3 using open approach and fibrin (with or without compression)

1.OJ.26.^ ^ Brachytherapy, pancreas**S** 35

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 35	Optional	Implant Status	Status	P M	Permanent implant – Radioactive source left in place permanently
				T M	Temporary implant – Radioactive source removed after course of treatment is complete

Includes: Endocurietherapy, pancreas
 Implantation of radioactive material, pancreas
 Interstitial radiation therapy, pancreas
 Intracavitary radiation therapy, pancreas

Code Also: Any concomitant implantation of brachytherapy applicators or conduits [e.g. needles, catheters] to gain access to treatment site (see [1.OJ.53.^ ^](#))

Note: There are typically two distinct phases required to complete the process of brachytherapy. The first phase involves the insertion of non-radioactive applicators or conduits [e.g. hollow needles, catheters, stents, etc.] that receive or transmit the radioactive material into the body. The second phase involves the after loading of the radioactive material [e.g. seeds, pellets, wires, etc.] into the applicator or conduit.

1.OJ.26.HA using percutaneous (transcatheter or transneedle) approach

1.OJ.26.LA using open approach

1.OJ.27.^ ^ Radiation, pancreas

Includes: Teletherapy, pancreas
 Therapy, radiation [radiotherapy], pancreas

1.OJ.27.JA using external beam

1.OJ.27.JX using focused beam [e.g. gamma knife, cyber knife stereotactic radiosurgery]

1.OJ.52.^ ^ Drainage, pancreas**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

- Includes:** Debridement NOS, pancreas
Debridement with drainage [abscess, hematoma], pancreas
Enucleation with drainage [cyst], pancreas
Marsupialization [cyst], pancreas
- Excludes:** Drainage [cysts], pancreas using gastric [or duodenal] bypass anastomosis (see [1.OJ.76.^ ^](#))
Pancreatectomy with drainage [e.g. for control of hemorrhage] (see [1.OJ.87.^ ^](#))
- Code Also:** Any concomitant biliary tract bypass (see [1.OE.76.^ ^](#))
Any concomitant gastric bypass (see [1.NF.76.^ ^](#))
- Note:** Often involves peripancreatic packing

1.OJ.52.^ ^ Drainage, pancreas	leaving drainage tube in situ	without leaving drainage tube in situ
using combined anterior [abdominal] and retroperitoneal approach	1.OJ.52.LN-TS	1.OJ.52.LN
using endoscopic per orifice [e.g. ERCP] approach	1.OJ.52.BA-TS	1.OJ.52.BA
using open [abdominal] approach	1.OJ.52.LA-TS	1.OJ.52.LA
using percutaneous [needle] approach	1.OJ.52.HA-TS	1.OJ.52.HA

1.OJ.53.^ ^ Implantation of internal device, pancreas**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

- Includes:** Implantation, artificial pancreas [biohybrid], pancreas
- Excludes:** Insertion of intubation device, pancreatic duct (see [1.OE.52.^ ^](#))
Insertion of subcutaneous insulin pump (see [1.YS.53.^ ^](#))
- Code Also:** Any concomitant loading of brachytherapy applicator (see [1.OJ.26.^ ^](#))

1.OJ.53.HA-EM	of brachytherapy applicator using percutaneous approach
1.OJ.53.LA-EM	of brachytherapy applicator using open approach
1.OJ.53.LA-PM	of artificial pancreas [biohybrid]

1.OJ.55.^ ^ Removal of device, pancreas

1.OJ.55.JA-EB	of radioactive implant using external approach
1.OJ.55.LA-EB	of radioactive implant using open approach
1.OJ.55.LA-PM	of artificial pancreas [biohybrid] using open approach

1.OJ.56.^ ^ Removal of foreign body, pancreas**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Excludes: that requiring concomitant pancreatectomy (see [1.OJ.87.^ ^](#))

1.OJ.56.LA using open approach

1.OJ.76.^ ^ Bypass, pancreas**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Cystoduodenostomy, pancreatic
Cystogastrostomy, pancreatic
Pancreaticoduodenostomy
Pancreaticogastrostomy
Pancreaticojejunostomy

Note: Pancreatic cyst is laid open to drain directly into either the stomach or the small intestine and the pancreatic duct is diverted, often using Roux- en-Y technique for anastomosis.

1.OJ.76.^ ^ Bypass, pancreas	endoscopic [laparoscopic] approach	endoscopic [retrograde] per orifice approach	open approach
using pancreaticoenterostomy diversion	1.OJ.76.EG	1.OJ.76.BW	1.OJ.76.VK
using pancreaticogastrostomy diversion	1.OJ.76.EH	1.OJ.76.BX	1.OJ.76.VL

1.OJ.83.^ ^ Transfer, pancreas**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Autotransplantation, islet [of Langerhans] cells, into mesenteric vein
Autotransplantation, pancreas [tissue] following pancreatectomy
Pancreatectomy with concomitant replantation of pancreatic tissue
Replantation, pancreas [tissue], to muscle [e.g. thigh]
Transfer, islet [of Langerhans] cells, to mesenteric vein

Note: Usually involves pancreatectomy (subtotal, total) with concomitant replantation of pancreatic tissue into subcutaneous pocket above muscle of thigh or of islet of Langerhans cells into mesenteric vein.

1.OJ.83.LA-XX-A of pancreatic tissue to muscle [e.g. thigh]

1.OJ.83.WK-XX-A of autograft islet [of Langerhans] cells into vein (e.g. mesenteric, portal) using small incision

1.OJ.85.^ ^ Transplant, pancreas**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Transplant, islet [of Langerhans] cells (from donor)
Xenotransplantation [from other species], pancreatic islet cells

Excludes: Autotransplantation, pancreatic islet cells (see [1.OJ.83.^ ^](#))
Transplant, pancreas with duodenum from donor (see [1.OK.85.^ ^](#))
Transplantation, pancreas with duodenum and kidney from donor (see [1.OK.85.^ ^](#))

1.OJ.85.GR-XX-K of islet [of Langerhans] cells from deceased donor using percutaneous transluminal venous approach (e.g. to mesenteric or portal vein)

1.OJ.85.HA-XX-L of xenogenic islet cells [from other species] using percutaneous needle approach [injection]

1.OJ.85.WK-XX-K of islet [of Langerhans] cells from deceased donor using small incisional approach

1.OJ.87.^ ^ Excision partial, pancreas**S** 16

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 16	Optional	Tx Status 10	Status	A	Abandoned after onset
				C	Converted (from endoscopic to open approach)

Includes: Enucleation, pancreas and duodenum [e.g. insulinoma, gastrinoma]
 Pancreatectomy, distal [with or without splenectomy]
 Pancreatectomy, duodenum preserving
 Pancreatectomy, subtotal
 Resection, pancreas [for debulking of tumor, control of hemorrhage]

Excludes: Pancreatectomy (subtotal, total) with replantation of pancreatic tissue [one stage] to muscle [e.g. thigh] or into mesenteric vein (see [1.OJ.83.^ ^](#))
 that involving en bloc resection of portion of urinary tract e.g. kidney or connective tissue e.g. of retroperitoneal space or abdominal wall (see [1.OT.91.^ ^](#))

Note: Resection of pancreas avoids damage to duodenum by leaving at least a rim of 5% of pancreatic head tissue with pancreaticojejunal anastomosis (as necessary) and may involve creation of a (temporary) feeding jejunostomy.

1.OJ.87.DA using endoscopic (laparoscopic) approach

1.OJ.87.LA using open approach

Code Also: Any concomitant resection of large intestine [e.g. splenic flexure](see [1.NM.87.^ ^](#))

1.OJ.87.VC using open approach and [insulinoma] enucleation technique

Includes: Manual inspection of pancreas and duodenum with [multiple] enucleation(s) and drainage

1.OJ.87.VK using open approach and (temporary feeding) jejunostomy

1.OJ.89.^ ^ Excision total, pancreas**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Excision, remnant, pancreas
 Pancreatectomy, total

Excludes: Pancreaticoduodenectomy (see [1.OK.87.^ ^](#) or [1.OK.89.^ ^](#))
 Whipple Procedure (see [1.OK.87.^ ^](#))

1.OJ.89.LA using open approach

1.OJ.89.VZ using open approach with pylorus preserving technique

1.OK.^.^ Therapeutic Interventions on the Pancreas with Duodenum

Excludes: Duodenum alone (see [1.NK.^.^](#))
Pancreas alone (see [1.OJ.^.^](#))

1.OK.58.^.^ Procurement, pancreas with duodenum**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Procurement, pancreas with duodenum and kidney [en bloc]
Procurement, segmental, pancreas

Excludes: Procurement, en bloc pancreas with duodenum and liver (see [1.OT.58.^.](#))
Procurement, en bloc pancreas with duodenum, kidney and liver (see [1.OT.58.^.](#))

1.OK.58.LA-XX-K of whole deceased donor pancreas with duodenum
1.OK.58.VC-XX-K of deceased donor pancreas with duodenum and kidney
1.OK.58.WL-XX-J of segment of living donor pancreas
1.OK.58.WL-XX-K of segment of deceased donor pancreas

1.OK.85.^.^ Transplant, pancreas with duodenum**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Transplantation, pancreas with duodenum and kidney

Excludes: Transplantation, that with liver (see [1.OA.85.^.](#))

Note: Donor recipient normally retains original organs.

1.OK.85.^.^ Transplant, pancreas with duodenum	multi organ: pancreas with duodenum and kidney	segment of pancreas with duodenum	whole pancreas with duodenum
with exocrine drainage suppressed by injection of polymers (into pancreatic duct)	—	—	1.OK.85.TN-XX-K
with exocrine drainage via bladder [e.g. donor duodenum is grafted to bladder: duodenocystostomy]	1.OK.85.XU-XX-K	1.OK.85.XS-XX-K	1.OK.85.TL-XX-K
with exocrine drainage via intestine with homograft [e.g. donor duodenum is grafted to bowel]	1.OK.85.XV-XX-K	1.OK.85.XT-XX-K	1.OK.85.TM-XX-K

1.OK.87.^ ^ Excision partial, pancreas with duodenum**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Pancreaticoduodenectomy NOS (with or without splenectomy)
Whipple Procedure (with or without splenectomy)

Excludes: Enucleation [insulinoma, gastrinoma], pancreas and duodenum (see [1.OJ.87.^ ^](#))
that with gastrectomy (see [1.NF.91.^ ^](#))

Note: Often involves resection of distal stomach, spleen, head of pancreas, duodenum, proximal jejunum, distal common bile duct and gall bladder.

1.OK.87.^ ^ Excision partial, pancreas with duodenum	with vagotomy	without vagotomy
using open approach	1.OK.87.XN Note: • Standard technique involves 3 anastomoses: pancreaticojejunostomy [pancreatic remnant is either invaginated or intussuscepted to jejunum, or an end to side anastomosis of pancreatic duct to jejunal mucosa is created], gastrojejunostomy and a choledochojejunostomy.	1.OK.87.LA Note: • Standard technique involves 3 anastomoses: pancreaticojejunostomy [pancreatic remnant is either invaginated or intussuscepted to jejunum, or an end to side anastomosis of pancreatic duct to jejunal mucosa is created], gastrojejunostomy and a choledochojejunostomy.
using pylorus preserving technique	1.OK.87.WA Note: • Pylorus preserving technique involves 2 anastomoses: pancreaticojejunostomy and duodenojejunostomy.	1.OK.87.VZ Note: • Pylorus preserving technique involves 2 anastomoses: pancreaticojejunostomy and duodenojejunostomy.

1.OK.89.^ ^ Excision total, pancreas with duodenum**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Pancreaticoduodenectomy, total (with or without splenectomy)

Excludes: that with gastrectomy (see [1.NF.91.^ ^](#))

Note: Usually involves 2 anastomoses: gastrojejunostomy and choledochojejunostomy and may involve splenectomy as required.

1.OK.89.LA using open approach

1.OK.91.^.^ Excision radical, pancreas with duodenum**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Pancreaticoduodenectomy, en bloc
Pancreaticoduodenectomy, extended

Excludes: that with gastrectomy (see [1.NF.91.^.](#))

Note: This involves the en bloc resection of adjacent retroperitoneal soft tissue, regional lymph nodes and the skeletization of blood vessels concomitant with pancreaticoduodenectomy. There are normally 3 anastomoses: pancreaticojejunostomy [pancreatic remnant is either invaginated, intussuscepted to jejunum, or end to side anastomosis of pancreatic duct to jejunal mucosa is created], gastrojejunostomy and choledochojejunostomy

1.OK.91.LA	without vagotomy using open approach
1.OK.91.XN	with vagotomy using open approach

1.OT.^.^ Therapeutic Interventions on the Abdominal Cavity

Includes: Extraperitoneal space
Mesentery
Neoplasm, which occupies the abdominal cavity, whose point of origin cannot easily be assigned to a single point of origin
Omentum
Pelvic cavity
Perisplenic space
Peritoneal [retroperitoneal] cavity
Subdiaphragmatic space

1.OT.07.^.^ Hyperthermy, abdominal cavity

Includes: (Intraoperative) heating of fluid and circulating it through the peritoneal cavity to improve chemotherapy absorption [e.g. as part of the Sugarbaker procedure]

Code Also: Any concomitant administration of intraperitoneal chemotherapy (see [1.OT.35.^.](#))

1.OT.07.HH-KK	using percutaneous transcatheter approach and heating device
1.OT.07.LA-KK	using open approach and heating device

1.OT.13.^ ^ Control of bleeding, abdominal cavity**S** 15

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 15	Optional	Tx Status 9	Status	A	Abandoned after onset
				C	Converted (from endoscopic to open approach)
				R	Revision

Includes: Surgical packing for abdominal hemorrhage

Excludes: Drainage of hematoma, abdominal cavity (see [1.OT.52.^ ^](#))

Code Also: Control of bleeding for specific sites of organs or vessels.

Note: Use this code when the point of origin cannot be ascertained or when there are multiple areas within the abdominal cavity that are contributing to the hemorrhage.

1.OT.13.DA using endoscopic [laparoscopic] approach

1.OT.13.LA using open approach

1.OT.13.LA-NP using open approach and leaving packing in situ

Code Also: Any temporary closure of abdomen to facilitate subsequent removal of packing (see [1.SY.80.^ ^](#))

1.OT.35.^ ^ Pharmacotherapy (local), abdominal cavity

Includes: Heated (intraoperative) intraperitoneal chemotherapy (HIPC) [e.g. Sugarbaker procedure]

Hyperthermic (intraoperative) intraperitoneal chemotherapy (HIIC)

Injection, abdominal cavity

Instillation, abdominal cavity

Intraperitoneal chemohyperthermia

Intraperitoneal hyperthermic chemotherapy perfusion

Lavage, abdominal cavity

Lavage, peritoneal cavity

Toilet, peritoneal

Excludes: Injection of air into peritoneal cavity [pneumoperitoneum] (see [1.GT.33.^ ^](#))

Irrigation with drainage (see [1.OT.52.^ ^](#))

Peritoneal dialysis (see [1.PZ.21.^ ^](#))

Systemic pharmacotherapy (see [1.ZZ.35.^ ^](#))

Code Also: Any concomitant heating of the abdominal cavity [e.g. as part of Sugarbaker procedure] (see [1.OT.07.^ ^](#))

Note: Any concomitant removal of foreign body from within the abdomen should be coded separately. (See Removal, foreign body, by site)

1.OT.35.HA-T9 using percutaneous (needle) approach and pharmacological agent NEC

1.OT.35.HH-M0 using percutaneous (transcatheter) approach and antineoplastic agent

1.OT.35.HH-T9 using percutaneous transcatheter approach and pharmacological agent NEC

1.OT.35.LA-M0 using open approach and antineoplastic agent

1.OT.38.^ ^ Management of external appliance, abdominal cavity

Includes: Management, adjustment and discontinuation of external appliance, abdominal cavity

Excludes: Measurement of drainage (see [2.OT.21.^ ^](#))

1.OT.38.JA-QN of suction pump

1.OT.52.^ ^ Drainage, abdominal cavity**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Abdominal tap
 Abdominocentesis
 Celiocentesis
 Drainage, abdomen
 Drainage, peritoneal cavity
 Drainage, peritoneum (e.g. hemoperitoneum)
 Evacuation, abdominal cavity (hematoma, abscess)
 Paracentesis, abdominal
 Peritoneocentesis
 Replacement of entire shunt system, peritoneovenous
 Shunt, peritoneal venous

Excludes: Dialysis, peritoneal (see [1.PZ.21.^ ^](#))
 Drainage of perirectal abscess by transgluteal insertion of (pigtail) catheter (see [1.NQ.52.^ ^](#))
 Lavage, peritoneal (see [1.OT.35.^ ^](#))
 Partial "revision" for maintenance of peritoneovenous shunt system (see [1.OT.54.^ ^](#))

Code Also: Any concomitant removal of old peritoneovenous shunt system of abdominal cavity (see [1.OT.55.^ ^](#))

1.OT.52.CQ	using per orifice [transvaginal, transrectal] needle aspiration technique
1.OT.52.CQ-TS	using per orifice [transvaginal, transrectal] needle approach and leaving drainage tube in situ Includes: Drainage of deep pelvic abscess by endocavity (transrectal, transvaginal) insertion of (pigtail) catheter
1.OT.52.DA	using endoscopic (laparoscopic) approach
1.OT.52.DA-TS	using endoscopic (laparoscopic) approach and leaving drainage tube in situ
1.OT.52.HA	using percutaneous (transcatheter, transneedle) approach
1.OT.52.HA-TS	using percutaneous (transcatheter, transneedle) approach and leaving drainage tube in situ Includes: using percutaneous tunneling technique [e.g. permanent or semi-permanent tunnelled PleurX catheter] Excludes: Insertion of peritoneal dialysis catheter (see 1.OT.53.^^)
1.OT.52.HH-D1	using percutaneous transcatheter approach and anti infective irrigating solution
1.OT.52.HH-D2	using percutaneous transcatheter approach and salt irrigating solution
1.OT.52.HH-D3	using percutaneous transcatheter approach and other irrigating solution
1.OT.52.LA	using open approach
1.OT.52.LA-TS	using open (incisional) approach and leaving drainage tube in situ
1.OT.52.MF-SJ	using open approach with shunt terminating in circulatory system [e.g. LeVeen Shunt, Denver Shunt] Includes: Peritoneojugular shunt Peritoneovenous shunt Saphenoperitoneal shunt that with (percutaneous) tunneling of shunt catheter terminating in venous system [e.g. jugular vein, subclavian vein, vena cava, right atrium] that with or without subcutaneously implanted pump Excludes: Portacaval shunt (see 1.KQ.76.^^) Transjugular intrahepatic portosystemic shunt [TIPS] (see 1.KQ.76.^^)

1.OT.53.^^ Implantation of internal device, abdominal cavity**S**⁵

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes:	Creation, cutaneoperitoneal fistula [for dialysis] Creation, permanent [catheter] access, peritoneal cavity [for dialysis] Insertion, peritoneal catheter [for dialysis]
Excludes:	Insertion, drainage catheter for abdominocentesis (see 1.OT.52.^^)
Code Also:	Any concomitant subcutaneous pocket creation for burial of catheter (for later retrieval at time of onset for dialysis) (see 1.YY.53.^^)
1.OT.53.DA-LF	of (indwelling) chemotherapy port using endoscopic (laparoscopic) approach
1.OT.53.DA-TS	of catheter (peritoneal dialysis) using endoscopic (laparoscopic) approach
1.OT.53.HA-TS	of catheter (peritoneal dialysis) using percutaneous (incision) approach
	Includes: Insertion, Tenckhoff catheter
1.OT.53.LA-LF	of (indwelling) chemotherapy port using open approach
1.OT.53.LA-TP	of tissue expander using open approach
1.OT.53.LA-TS	of catheter (peritoneal dialysis) using open (laparotomy) approach

1.OT.54.^^ Management of internal device, abdominal cavity

Includes:	Adjustment of device, abdominal cavity Irrigation of device (indwelling), abdominal cavity Partial revision, peritoneal shunt system
Excludes:	Complete replacement of entire abdominal shunt system (see 1.OT.52.^^) Instillation of agent into device for local pharmacotherapy (see 1.OT.35.^^) Management of device [e.g. pump] within existing subcutaneous pocket (see 1.YY.54.^^)
1.OT.54.JA-TS	of tube or catheter
1.OT.54.LA-SJ	of shunt system [e.g. peritoneal-venous]

1.OT.55.^^ Removal of device, abdominal cavity

Excludes:	Removal of peritoneal dialysis catheter (see 1.SY.55.^^)
1.OT.55.JA-TS	of tube or catheter using external approach
1.OT.55.LA-NP	of (surgical) packing using open approach
1.OT.55.LA-SJ	of shunt system [e.g. peritoneal-venous shunt]

1.OT.56.^^ Removal of foreign body, abdominal cavity**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Extraction of errant IUD, pelvic cavity
Removal of foreign body, pelvic cavity

Code Also: Any concomitant lavage (see [1.OT.35.^^](#))
Any concomitant repair to organ by site

1.OT.56.DA using endoscopic [laparoscopic] approach
1.OT.56.LA using open approach

1.OT.58.^^ Procurement, abdominal cavity**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Code Also: Any concomitant procurement of other organs/tissues [e.g. heart, heart with lungs, bones, cornea, etc.]

1.OT.58.LA-XX-F of free flap (e.g. omental flap) using open approach
1.OT.58.LA-XX-K of deceased donor organs using open approach

Includes: Procurement, multi visceral [e.g. liver, spleen, stomach, pancreas, intestine, kidney, etc.]

1.OT.70.^^ Incision NOS, abdominal cavity

Includes: Incision, peritoneal cavity

Excludes: Intervention NEC, digestive and biliary tract (see [1.OZ.94.^^](#))
Laparotomy NOS (see [2.OT.70.^^](#))
that for drainage (see [1.OT.52.^^](#))
that for removal of cutaneous peritoneal dialysis access device (see [1.OT.55.^^](#))
that for removal of foreign body (see [1.OT.56.^^](#))

Note: Use this code when planned intervention could not be completed beyond this point. The planned intervention should also be coded with the status attribute of "A" added to the code.

1.OT.70.LA using open approach

1.OT.72.^^ Release, abdominal cavity**S** 16

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 16	Optional	Tx Status 10	Status	A	Abandoned after onset
				C	Converted (from endoscopic to open approach)

- Includes:** Adhesiolysis, abdominal
 Lysis [adhesions] pelvic cavity
 Lysis [adhesions] peritoneal
 Lysis [adhesions], abdominal cavity
 Lysis [adhesions], multiple organs, abdominal cavity
 Lysis [adhesions], multiple organs, pelvic cavity
- Excludes:** Lysis [adhesions] fallopian tube alone (see [1.RF.72.^^](#))
 Lysis [adhesions] ovary with fallopian tube alone (see [1.RD.72.^^](#))
 Lysis [adhesions], esophagus alone (see [1.NA.72.^^](#))
 Lysis [adhesions], intestinal tract alone (see [1.NP.72.^^](#))
 Lysis [adhesions], urethra (see [1.PQ.72.^^](#))
 that with derotation, intestinal tract (see [1.NP.73.^^](#))
 that with Ladd Procedure for malrotation, intestine (see [1.NP.73.^^](#))

1.OT.72.^^ Release, abdominal cavity	endoscopic [laparoscopic] approach	open approach
using device NEC	1.OT.72.DA	1.OT.72.LA
using laser	1.OT.72.DA-AG	1.OT.72.LA-AG

1.OT.80.^^ Repair, abdominal cavity

S 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

- Includes:** Detorsion, omentum
 Mesenteriopexy
 Omentopexy
 Omentoplasty
 Plication, mesentery
 Repair, mesentery
 Repair, omentum
 Repair, peritoneum
 Reperitonealization, mesh
 Reperitonealization, pelvic [by reinforcing abdominal support for intestines]
- Excludes:** Repair, abdominal wall (see [1.SY.80.^^](#))
 Repair, abdominal wall anomaly (see [1.SY.84.^^](#))

1.OT.80.LA	using open approach without tissue
1.OT.80.LA-XX-E	using open approach with local transposition flap [e.g. omental, mesenteric patch]
1.OT.80.LA-XX-N	using open approach with mesh fixation [for supportive sling]
1.OT.80.LA-XX-Q	using open approach with mesh fixation [for supportive sling] and local transposition flap [e.g. omental patch, muscle advancement]

1.OT.87.^ ^ Excision partial, abdominal cavity**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Mesenterectomy
Omentectomy

Excludes: Excision of abdominal wall (see [1.SZ.87.^ ^](#))
that with enterectomy (see [1.NK.87.^ ^](#))
that with partial colectomy (see [1.NM.87.^ ^](#))
that with partial proctocolectomy (see [1.NQ.87.^ ^](#))
that with total colectomy (see [1.NM.89.^ ^](#))
that with total proctocolectomy (see [1.NQ.89.^ ^](#))

1.OT.87.DA using endoscopic (laparoscopic) approach
1.OT.87.LA using open approach

1.OT.91.^ ^ Excision radical, abdominal cavity**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Excision, space occupying lesion, abdominal cavity
Excision, space occupying lesion, pelvic cavity
Excision, space occupying lesion, peri renal
Excision, space occupying lesion, peri vesical
Excision, space occupying lesion, retroperitoneum

Excludes: Excision, aberrant endometrial tissue throughout pelvis (see [1.RM.87.^ ^](#))
Pelvic exenteration involving bladder (see [1.PM.91.^ ^](#))

Note: Involves excision of space- occupying lesion arising in the abdominal [or pelvic] cavity. This neoplasm may have an indeterminate point of origin or it may impinge upon multiple organs which requires the resection of adjacent tissues to provide adequate [neoplasm- free] surgical margins.

1.OT.91.LA using open approach

1.OW.^.^ Therapeutic Interventions on Surgically Constructed Sites in Digestive and Biliary Tract

Includes:	Colostomy Duodenostomy, jejunostomy, ileostomy Enterostomy Esophagostomy Gastric pouch Gastrostomy Ileal reservoir Kock pouch Neoesophagus Neopharynx Neorectum Pelvic pouch Roux en Y limb [of anastomosis]
Excludes:	(External) stoma (see 1.YY.^.^) Anastomotic site of esophagus to stomach for continuity (see 1.NA.^.^) Anastomotic site of small intestine to large intestine for continuity (see 1.NM.^.^) Anastomotic site of small intestine to rectum for continuity, large intestine to rectum for continuity and rectum to anus for continuity (see 1.NQ.^.^) Anastomotic site of small intestine to small intestine for continuity and stomach to small intestine for continuity (see 1.NK.^.^)

1.OW.13.^.^ Control of bleeding, surgically constructed sites in digestive and biliary tract

Includes:	that done with colonoscopy/esophagoscopy/sigmoidoscopy
1.OW.13.BA-AG	using endoscopic per orifice [or via stoma] approach and laser
1.OW.13.BA-C2	using endoscopic per orifice [or via stoma] approach and antihemorrhagic agent
1.OW.13.BA-GX	using endoscopic per orifice [or via stoma] approach and device NEC (e.g. bicap electrocautery)
1.OW.13.BA-KK	using endoscopic per orifice [or via stoma] approach and special electrical heat device [e.g. argon beam coagulator, Gold Probe]
1.OW.13.DA	using endoscopic [laparoscopic] approach
1.OW.13.LA	using open approach

1.OW.35.^.^ Pharmacotherapy, surgically constructed sites in digestive and biliary tract

Includes:	Irrigation, surgically constructed digestive tract
1.OW.35.CA-D1	using per orifice approach (or via stoma) and antiinfective irrigating solution
1.OW.35.CA-D2	using per orifice approach (or via stoma) and salt irrigating solution
1.OW.35.CA-D3	using per orifice approach (or via stoma) and other irrigating solution
1.OW.35.HA-D1	using percutaneous needle approach [injection] and anti infective irrigating solution
1.OW.35.HA-D2	using percutaneous needle approach [injection] and salt irrigating solution
1.OW.35.HA-D3	using percutaneous needle approach [injection] and other irrigating solution

1.OW.50.^ ^ Dilation, surgically constructed sites in digestive and biliary tract**S** ⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes:

- Dilation, neoesophagus
- Dilation, neopharynx
- Dilation, neorectum
- Dilation, pelvic pouch
- Dilation, stoma

1.OW.50.^ ^ Dilation, surgically constructed sites in digestive and biliary tract	endoscopic per orifice approach	endoscopic per orifice approach with incision	per orifice approach	per orifice approach with incision
no device used	1.OW.50.BA	—	—	—
using balloon dilator	1.OW.50.BA-BD	1.OW.50.BT-BD	—	1.OW.50.CR-BD
using rigid dilator	—	1.OW.50.BT-BP	1.OW.50.CA-BP	1.OW.50.CR-BP
using manual technique	—	—	1.OW.50.CJ	—

1.OW.52.^ ^ Drainage, surgically constructed sites in digestive and biliary tract**S** ⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Decompression with drainage, pelvic pouch

1.OW.52.BA using endoscopic per orifice approach
 1.OW.52.BA-TS using endoscopic per orifice approach and leaving drainage tube in situ
 1.OW.52.CA using per orifice approach
 1.OW.52.CA-TS using per orifice approach and leaving drainage tube in situ

1.OW.73.^ ^ Reduction, surgically constructed sites in digestive and biliary tract**S** ⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Manual reduction, enterostomy prolapse

1.OW.73.CJ using per orifice approach and manual technique

1.OW.80.^ Repair, surgically constructed sites in digestive and biliary tract

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Repair, afferent loop [syndrome]
 Repair, anastomosis of surgically constructed site (for dehiscence, leakage)
 Repair, colostomy tract
 Repair, enterostomy tract [e.g. jejunal]
 Repair, hernia [Petersen's space], following gastrojejunostomy
 Repair, mucous fistula (for prolapse, strangulation)
 Repair, pouch [gastric, pelvic, Barnett or Kock]
 Repair, Roux en Y limb of anastomosis (digestive or biliary tract)

Excludes: Conversion, pouch [gastric, pelvic, Barnett or Kock] to permanent ileostomy (see [1.OW.89.^](#) with [1.NK.77.^](#))
 Reduction or plication of previously constructed gastric pouch for weight loss [e.g. StomaphX, ROSE procedure] (see [1.NF.78.^](#))
 Repair, stoma at skin surface alone (see [1.YY.80.^](#))
 Resiting of colostomy (see [1.NM.77.^](#))
 Resiting of colostomy with excision of intestine (see [1.NM.87.^](#))
 Resiting of ileostomy (see [1.NK.77.^](#))
 Resiting of ileostomy with excision of intestine (see [1.NK.87.^](#))
 Takedown, mucous fistula with reanastomosis of colon to colon (see [1.NM.82.^](#)) or ileum to colon (see [1.NK.82.^](#))

1.OW.80.BA using endoscopic per orifice approach (or via stoma)
 1.OW.80.BA-AG using endoscopic per orifice approach (e.g. through stoma) and laser
 1.OW.80.DA using endoscopic [laparoscopic] approach
 1.OW.80.LA using open approach

1.OW.87.^ Excision partial, surgically constructed sites in digestive and biliary tract

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Debridement [necrotic tissue], surgically constructed site of digestive tract
Debridement, pouch [gastric, pelvic, Barnett or Kock]

Excludes: Debridement, stoma at skin surface alone (see [1.YY.87.^^](#))

1.OW.87.DA using endoscopic [laparoscopic] approach
1.OW.87.LA using open approach

1.OW.89.^^ Excision total, surgically constructed sites in digestive and biliary tract

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Pouchectomy [gastric, pelvic, Barnett or Kock]

Code Also: Any concomitant construction of permanent ileostomy (see [1.NK.77.^^](#))

1.OW.89.DA using endoscopic [laparoscopic] approach
1.OW.89.LA using open approach

1.OZ.^^.^^ Therapeutic Interventions on the Digestive System NEC

1.OZ.17.^^ Alimentation, digestive system NEC

Includes: Enteral therapy
Forced feeding
Forced fluids
Gavage
Rehydration
Superalimentation
Tube feeding

Excludes: Parenteral instillation of fluids (see [1.LZ.35.^^](#))
Peripheral parenteral nutrition [PPN] (see [1.LZ.35.^^](#))
Total parenteral nutrition [TPN] (see [1.LZ.35.^^](#))

1.OZ.17.CD-T4 using per orifice (and NG tube) pump approach and general nutrients
1.OZ.17.CE-T4 using per orifice (and NG tube) syringe approach and general nutrients
1.OZ.17.CF-T4 using per orifice (and NG tube) drip approach and general nutrients
1.OZ.17.CF-X9 using per orifice liquids (e.g. water)
1.OZ.17.HH-T4 using percutaneous (via catheter/gastrostomy tube) and general nutrients

1.OZ.35.^ ^ Pharmacotherapy (local), digestive system NEC

Includes:	Instillation, digestive system NEC
Excludes:	Alimentation (see 1.OZ.17.^ ^)
	Sclerotherapy of esophagus (see 1.NA.13.^ ^)
	Sclerotherapy of stomach (see 1.NF.13.^ ^)
	Systemic pharmacotherapy (see 1.ZZ.35.^ ^)
	that for rectum alone (see 1.NQ.35.^ ^)
	that for stomach alone (see 1.NF.35.^ ^)

1.OZ.35.CA-A2	using per orifice approach, using antacid or drug for treatment of peptic ulcer and flatulence
	Includes: ranitidine, misoprostol, omeprazole, sucralfate, simethicone
1.OZ.35.CA-A6	using per orifice approach, using laxative agent
1.OZ.35.CA-A9	using per orifice approach, using digestive agent
	Includes: pepsin, lactase
1.OZ.35.CA-B7	using per orifice approach, using other alimentary tract and metabolism agent
	Includes: amino acids and derivatives, anetholtrithion
1.OZ.35.CA-T9	using per orifice approach, using pharmacological agent NEC

1.OZ.94.^ ^ Therapeutic intervention NEC, digestive system NEC

1.OZ.94.HA	using percutaneous (needle) approach
1.OZ.94.LA	using open approach

Therapeutic Interventions on the Genitourinary System (1PB - 1RZ)

Therapeutic Interventions on the Urinary System (1PB - 1PZ)

1.PB.^.^ Therapeutic Interventions on the Adrenal Gland

Excludes: Adrenal with kidney (see [1.PC.^.^](#))

1.PB.13.^.^ Control of bleeding, adrenal gland

S 4 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Adrenalorrhaphy
Repair, adrenal gland

Excludes: that with partial adrenalectomy (see [1.PB.87.^.](#))

1.PB.13.LA open approach using apposition technique [e.g. suturing or NOS]

1.PB.27.^.^ Radiation, adrenal gland

Includes: Teletherapy, adrenal gland
Therapy, radiation [radiotherapy], adrenal gland

Excludes: Radiation therapy involving adrenal gland with kidney (see [1.PC.27.^.](#))

1.PB.27.JA using external beam
1.PB.27.JX using focused beam [e.g. gamma knife, cyber knife stereotactic radiosurgery]

1.PB.52.^ Drainage, adrenal gland**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Aspiration, adrenal gland (for drainage of cyst, abscess etc.)
 Drainage of abscess or hematoma, adrenal gland

Excludes: Aspiration for biopsy (see [2.PB.71.^](#))

1.PB.52.DA using endoscopic (percutaneous) approach
 1.PB.52.HA using percutaneous (needle) approach
 1.PB.52.LA using open approach

1.PB.59.^ Destruction, adrenal gland**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Ablation, adrenal gland tissue
 Ablation, adrenal gland tumor

1.PB.59.HA-AW using percutaneous (needle) approach with radiofrequency
 1.PB.59.HA-CG using percutaneous (needle) approach with microwave device
 1.PB.59.HA-GX using percutaneous (needle) approach with device NEC
 1.PB.59.HA-X7 using percutaneous (needle) approach with chemocautery

1.PB.87.^ Excision partial, adrenal gland**S** 4 **L** 89

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 89	Mandatory	Bilaterality Mandatory 2	Location	A T	Aberrant tissue only
				B	Bilateral
				L	Left
				R	Right
				U	Unilateral unspecified

Includes: Adrenalectomy, subtotal
Lobectomy, adrenal

Excludes: Excision remainder adrenal gland (leaving no adrenal tissue behind) (see [1.PB.89.^](#))

Note: May involve subtotal adrenalectomy leaving at least a portion of one gland while removing the contralateral gland entirely.

1.PB.87.DA using endoscopic (percutaneous) approach
1.PB.87.LB using open abdominal approach
1.PB.87.PF using open lumbar [flank] approach
1.PB.87.QF using open thoracoabdominal approach

1.PB.89.^ Excision total, adrenal gland**S** 4 **L** 72

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 72	Mandatory	Bilaterality Mandatory	Location	B	Bilateral
				L	Left
				R	Right
				U	Unilateral unspecified

Includes: Adrenalectomy NOS
Adrenalectomy, remainder [of gland]
Adrenalectomy, total

Excludes: Excision partial of one adrenal gland but all of contralateral gland (see [1.PB.87.^](#))

1.PB.89.DA using endoscopic (percutaneous) approach
1.PB.89.LB using open abdominal approach
1.PB.89.PF using open lumbar [flank] approach
1.PB.89.QF using open thoracoabdominal approach

1.PC.^.^ Therapeutic Interventions on the Kidney

Includes: Ectopic kidney
Kidney NOS
Kidney with adrenal glands
Kidney with renal pelvis
Renal capsule
Renal cortex
Renal medulla
Ureter and renal pelvis

Excludes: Adrenal gland alone (see [1.PB.^.^](#))
Renal arteries alone (see [1.KE.^.^](#))
Renal calyces (see [1.PE.^.^](#))
Renal pelvis alone (see [1.PE.^.^](#))
Renal veins alone (see [1.KQ.^.^](#))

1.PC.13.^.^ Control of bleeding, kidney**E 53**

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 53	Mandatory	Mandatory Coils	Extent	0	Not applicable (no coil used)
				01	One coil
				02	Two coils
				03	Three coils
				04	Four coils
				05	Five coils
				06	Six coils
				07	Seven coils
				08	Eight coils
				09	Nine coils
				10	Ten coils
				G	More than ten coils (11 - 20)
				H	More than twenty coils
				U	Unspecified

- Includes:** Embolization, kidney
Infusion (intra arterial) for control of bleeding, kidney
- Excludes:** Systemic pharmacotherapy for control of bleeding (see [1.ZZ.35.^](#))
that done by surgical repair (see [1.PC.80.^](#))

1.PC.13.GQ-C2	using percutaneous transluminal approach and intraarterial administration of antihemorrhagic agent [e.g. vasopressin]
1.PC.13.GQ-GE	using percutaneous transluminal approach and [detachable] coils
1.PC.13.GQ-W0	using percutaneous (transarterial) approach and synthetic agent [e.g. gelfoam, microspheres, polystyrene, polyvinyl alcohol, contour particles]
1.PC.13.LA	using open approach

1.PC.27.^ Radiation, kidney

- Includes:** Teletherapy, kidney
Therapy, radiation [radiotherapy], kidney (with or without adrenal gland)

1.PC.27.JA	using external beam
1.PC.27.JX	using focused beam [e.g. gamma knife, cyber knife stereotactic radiosurgery]

1.PC.35.^ Pharmacotherapy (local), kidney

- Includes:** Injection (of agent), kidney (cortex or capsule)
Instillation, kidney NEC
Perfusion, kidney
that for renal cooling
- Excludes:** Injection of sclerosing agent (see [1.PC.59.^](#))
Systemic pharmacotherapy (see [1.ZZ.35.^](#))
that for control of bleeding (see [1.PC.13.^](#))

1.PC.35.^ Pharmacotherapy (local), kidney	endoscopic per orifice approach	percutaneous injection approach
using antiinfective agent NEC	1.PC.35.BA-K0	1.PC.35.HA-K0
using pharmacological agent NEC	1.PC.35.BA-T9	1.PC.35.HA-T9
using chemical agent NEC	1.PC.35.BA-Z9	1.PC.35.HA-Z9

1.PC.51.^ ^ Occlusion, kidney

Includes: Ligation, (non functioning) kidney
Excludes: Control of bleeding, kidney (see [1.PC.13.^ ^](#))
 Occlusion of renal artery (see [1.KE.51.^ ^](#))
 Occlusion of renal vein (see [1.KQ.51.^ ^](#))

1.PC.51.DA-LV using endoscopic (percutaneous) approach and ligature
 1.PC.51.LA-LV using open approach with ligature

1.PC.52.^ ^ Drainage, kidney**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Aspiration, kidney (for drainage of cyst, abscess etc.)
 Nephrotomy for drainage (of renal parenchymal cyst)
Excludes: Aspiration for renal biopsy (see [2.PC.71.^ ^](#))
 Aspiration of renal pelvis (see [1.PE.52.^ ^](#))
Omit code: when percutaneous nephrostomy is operative approach

1.PC.52.DA using endoscopic (percutaneous) approach
 1.PC.52.HA using percutaneous (needle) approach
 1.PC.52.LA using open approach

1.PC.56.^ ^ Removal of foreign body, kidney**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Closure of nephrostomy
Takedown, nephrostomy

1.PC.82.LA using open approach

1.PC.83.^ Transfer, kidney**S** 5 **L** 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Autotransplantation, renal

1.PC.83.LA using open approach

1.PC.85.^ Transplant, kidney**S** 5 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Renal transplant**Excludes:** Transplantation, kidney with pancreas (see [1.OK.85.^](#))

1.PC.85.LA-XX-J using living donor (allogenic or syngeneic) kidney

1.PC.85.LA-XX-K using deceased donor kidney

1.PC.86.^.^ Closure of fistula, kidney**S** 5 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Fistulectomy, kidney
 Repair, fistula, nephro cutaneous

1.PC.86.^.^ Closure of fistula, kidney	simple excision and closure	free [random] flap closure	local flap closure
open approach			
fistula terminating at digestive tract	1.PC.86.ME	1.PC.86.ME-XX-F	1.PC.86.ME-XX-E
fistula terminating at skin	1.PC.86.MB	1.PC.86.MB-XX-F	1.PC.86.MB-XX-E
endoscopic [percutaneous] approach			
fistula terminating at digestive tract	1.PC.86.GN	1.PC.86.GN-XX-F	1.PC.86.GN-XX-E
fistula terminating at skin	1.PC.86.GF	1.PC.86.GF-XX-F	1.PC.86.GF-XX-E

1.PC.87.^.^ Excision partial, kidney**S** 16 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 16	Optional	Tx Status 10	Status	A	Abandoned after onset
				C	Converted (from endoscopic to open approach)
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Decortication, kidney
 Heminephrectomy
 Nephrectomy, partial
 Nephrectomy, segmental (polar)
 Nephrectomy, subcapsular [renal enucleation]
 Nephrocapsulectomy [decapsulation of kidney]
 Reimplantation, kidney (after extracorporeal bench surgery)
 Resection, kidney (major transverse, wedge)

Excludes: Nephroureterectomy (see [1.PC.89.^^](#))

Code Also: Any insertion of stent for continuous dilation during healing (see [1.PE.50.^^](#))
 Any robotic assisted telemanipulation of tools (see [7.SF.14.^^](#))

1.PC.87.^^ Excision partial, kidney	open approach	endoscopic [laparoscopic, laparoscopic-assisted, hand-assisted] approach	open bench surgery approach
using apposition technique [e.g. suturing, stapling]	1.PC.87.LA	1.PC.87.DA	1.PC.87.NQ
using local flap closure	1.PC.87.LA-XX-E	—	—
using pedicled flap	1.PC.87.LA-XX-G	—	—

1.PC.89.^^ Excision total, kidney

S 16 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 16	Optional	Tx Status 10	Status	A	Abandoned after onset
				C	Converted (from endoscopic to open approach)
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes:	Excision, (non functioning) kidney Excision, rejected kidney (transplant) Nephrectomy, total Nephroureterectomy Ureter and renal pelvis
Excludes:	Procurement of kidney, living or cadaver for kidney donation (see 1.PC.58.^^) that done concomitant with transplant (see 1.PC.85.^^)
Code Also:	Any robotic assisted telemanipulation of tools (see 7.SF.14.^^)
1.PC.89.DA	using endoscopic (laparoscopic, laparoscopic-assisted, hand-assisted) approach
1.PC.89.LB	using open abdominal approach
1.PC.89.PF	using open lumbar [flank] approach
1.PC.89.QF	using open thoracoabdominal approach

1.PC.91.^^ Excision radical, kidney**S** 16 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 16	Optional	Tx Status 10	Status	A	Abandoned after onset
				C	Converted (from endoscopic to open approach)
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes:	Nephrectomy, radical
Excludes:	Procurement of kidney, living or cadaver for kidney donation (see 1.PC.58.^^) that done concomitant with transplant (see 1.PC.85.^^)
Code Also:	Any excision of lymph nodes (see 1.MH.89.^^) Any intra-operative cardiopulmonary bypass (see 1.LZ.37.^^) Any robotic assisted telemanipulation of tools (see 7.SF.14.^^)
Note:	Involves removal of kidney, adrenal gland, renal artery, renal vein and all perinephric tissue in Gerota's fascia
1.PC.91.DA	using endoscopic [laparoscopic, laparoscopic-assisted, hand-assisted] approach
1.PC.91.LB	using open abdominal approach
1.PC.91.PF	using open lumbar [flank] approach
1.PC.91.QF	using open thoracoabdominal approach

1.PE.^.^ Therapeutic Interventions on the Renal Pelvis

Includes: Renal calyces
Ureteropelvic junction (UPJ)

Excludes: Renal pelvis with kidney (see [1.PC.^.^](#))

1.PE.13.^.^ Control of bleeding, renal pelvis**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

1.PE.13.HA-C2 using percutaneous needle approach [injection] using antihemorrhagic agent

1.PE.13.HA-Z9 using percutaneous needle approach [injection] and agent NEC (e.g. silver nitrate)

1.PE.27.^.^ Radiation, renal pelvis

Includes: Teletherapy, renal pelvis
Therapy, radiation [radiotherapy], renal pelvis

1.PE.27.JA using external beam

1.PE.27.JX using focused beam [e.g. gamma knife, cyber knife stereotactic radiosurgery]

1.PE.35.^.^ Pharmacotherapy (local), renal pelvis

Includes: Injection, renal pelvis
Instillation, renal pelvis
Introduction of therapeutic agent, renal pelvis
Irrigation, renal pelvis

Excludes: Irrigation of device (see [1.PE.54.^.](#))
Irrigation with extraction of calculi (see [1.PE.57.^.](#))
Systemic pharmacotherapy (see [1.ZZ.35.^.](#))

1.PE.35.^ ^ Pharmacotherapy (local), renal pelvis	endoscopic per orifice approach	per orifice approach	percutaneous needle approach [injection]	percutaneous approach [via nephrostomy tube]
using antiinfective irrigating solution	1.PE.35.BA-D1 Includes: • chlorhexidine, neomycin	—	—	1.PE.35.HH-D1
using salt irrigating solution	1.PE.35.BA-D2 Includes: • sodium chloride	—	—	1.PE.35.HH-D2
using other irrigating solution	1.PE.35.BA-D3 Includes: • sorbitol, mannitol	—	—	1.PE.35.HH-D3
using antiseptic or disinfectant agent	1.PE.35.BA-G8	1.PE.35.CA-G8	1.PE.35.HA-G8	1.PE.35.HH-G8
using general antiinfective agent NEC	1.PE.35.BA-K0	1.PE.35.CA-K0	1.PE.35.HA-K0	1.PE.35.HH-K0
using penicillin or beta lactam antibacterial agent	1.PE.35.BA-K3	1.PE.35.CA-K3	1.PE.35.HA-K3	1.PE.35.HH-K3
using antineoplastic or immunomodulating agent NOS	1.PE.35.BA-M0	1.PE.35.CA-M0	1.PE.35.HA-M0	1.PE.35.HH-M0
using alkylating agent	1.PE.35.BA-M1	1.PE.35.CA-M1	1.PE.35.HA-M1	1.PE.35.HH-M1
using cytotoxic antibiotic or related substance	1.PE.35.BA-M4	1.PE.35.CA-M4	1.PE.35.HA-M4	1.PE.35.HH-M4
using immunostimulant agent	1.PE.35.BA-M7	1.PE.35.CA-M7	1.PE.35.HA-M7	1.PE.35.HH-M7
using pharmacological agent NEC	1.PE.35.BA-T9	1.PE.35.CA-T9	1.PE.35.HA-T9	1.PE.35.HH-T9
using agent NEC	1.PE.35.BA-Z9	1.PE.35.CA-Z9	1.PE.35.HA-Z9	1.PE.35.HH-Z9

1.PE.50.^ ^ Dilation, renal pelvis**S 61 L 2**

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 61	Optional	Tx Status 17	Status	A	Abandoned after onset
				I	Intra-operative
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Dilation (with or without incision), ureteropelvic (ureterovesical) junction
 Dilation, pyelocaliceal
 Dilation, pyeloureteral
 Endopyelotomy (for dilation)
 Insertion, ureteral stent (renal pelvis to bladder)
 Manipulation of stone to facilitate drainage through dilation
 Pyelotomy (for removal of ureteropelvic junction obstruction)
 Pyeloureteroendotomy (for UPJ stricture)
 Ureteral catheterization (renal pelvis to bladder)

Excludes: Dilation for extraction of calculi (see [1.PE.57.^](#))
 Dilation, urinary stoma (diversion) tract (see [1.PV.50.^](#))

Code Also: Any concomitant cystoscopy (see [2.PM.70.^](#))
 Any intraoperative fluoroscopy (see [3.PH.12.^](#))

Note: Use a code from this rubric when a stent is inserted into the urinary tract to maintain patency during or after a surgical procedure. A status attribute "I" intraoperative may be used, if desired, to indicate temporary stenting during the operative procedure to prevent damage to the ureter(s). If the stent remains in situ at the end of the operative event, this status attribute does not apply.

1.PE.50.^ Dilation, renal pelvis	endoscopic (percutaneous) approach (endopyelotomy) [antegrade]	endoscopic per orifice approach [retrograde] (dilation alone or urethral meatomy)	open approach
using balloon dilator [with or without cutting wire]	1.PE.50.DA-BD	1.PE.50.BA-BD	—
using flexible dilator [e.g. catheter, stent]	1.PE.50.DA-BJ	1.PE.50.BA-BJ	1.PE.50.LA-BJ
using laser incision and balloon	1.PE.50.DA-BF	1.PE.50.BA-BF	—
using laser incision and flexible dilatator [e.g. catheter, stent]	1.PE.50.DA-BI	1.PE.50.BA-BI	—
using device NEC [e.g. endoshears]	—	1.PE.50.BA-GX	—

1.PE.52.^ Drainage, renal pelvis

S 4 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Aspiration, renal pelvis (for drainage of hematoma, cyst)
Nephrostomy (for drainage)
Pyelostomy (for drainage)
- Excludes:** Drainage of urinary stoma (nephrostomy, pyelostomy, ureterostomy) (see [1.PV.52.^^](#))
- Omit code:** When nephrostomy is the operative approach only

1.PE.52.HA	using needle aspiration
1.PE.52.HH	using percutaneous approach with insertion of tube (e.g. nephrostomy, pyelostomy)

1.PE.54.^^ Management of internal device, renal pelvis

S ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Adjustment, of catheter or stent, renal pelvis
Irrigation, of drainage tube [pyelostomy or nephrostomy tube]
Maintenance of catheter or stent, renal pelvis
- Excludes:** Installation of agent into device for local pharmacotherapy (see [1.PE.35.^^](#))
Removal of device, renal pelvis (see [1.PE.55.^^](#))

1.PE.54.BA-NR	endoscopic per orifice approach management of stent (renal pelvis to bladder)
1.PE.54.DA-NR	endoscopic (percutaneous) approach (nephrostomy) management of stent (renal pelvis to bladder)
1.PE.54.JA-TS	external approach management of drainage catheter [e.g. pyelostomy or nephrostomy]
1.PE.54.LA-NR	open approach management of stent (renal pelvis to bladder)

1.PE.55.^^ Removal of device, renal pelvis

S ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Removal, catheter or stent, renal pelvis
Code Also: Any concomitant takedown of pyelostomy (see [1.PE.82.^^](#))

1.PE.55.^^ Removal of device, renal pelvis	of drainage catheter (e.g. pyelostomy or nephrostomy tube)	of stent (renal pelvis to bladder, ureteral)
per orifice approach	1.PE.55.CA-TS	1.PE.55.CA-NR
external (manual) approach	1.PE.55.JA-TS	—
endoscopic (cystoscopic) per orifice approach	—	1.PE.55.BA-NR
endoscopic (laparoscopic) approach	—	1.PE.55.DA-NR
open approach	—	1.PE.55.LA-NR

1.PE.56.^^ Removal of foreign body, renal pelvis

S ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Excludes: Removal of calculus (see [1.PE.57.^^](#))

1.PE.56.BA using endoscopic per orifice approach
 1.PE.56.DA using endoscopic (percutaneous) approach
 1.PE.56.LA using open approach

1.PE.57.^^ Extraction, renal pelvis

S ⁵ **L** ² **E** ¹⁶

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 16	Optional	Calculus	Extent	L G	Large (> or = 4 mm) - single stone
				M	Multiple stones
				S H	Staghorn
				S M	Small (< 4 mm) - single stone
				U	Unspecified

Includes: Extraction with manipulation [calculi], kidney
Extraction with manipulation [calculi], ureter and ureteropelvic junction (UPJ)
Extraction, kidney stones
Nephrostolithotomy
Nephrotomy for removal of stones [nephrolithotomy]
Pelviolithotomy, renal
Pyelolithotomy
Pyelostolithotomy
Pyelotomy for removal of stones
Removal of calculi [or clot], renal pelvis (or renal calyx)
Removal of calculi [or clot], ureteropelvic junction (UPJ)
Ureteropyelotomy with manipulation [calculi], renal pelvis

Excludes: Extraction with manipulation [calculi], urinary stoma (see [1.PV.57.^^](#))
Removal of calculi from surgically constructed urinary tract (see [1.PV.57.^^](#))

Code Also: Any concomitant destruction of renal calculi (see [1.PE.59.^^](#))
Any concomitant insertion of stent for (post extraction) continuous dilation (see [1.PE.50.^^](#))

Note: Kidney stones originate in the renal pelvis. They get lodged in the collecting system and not in the solid tissue of the renal parenchyma.

1.PE.57.^^ Extraction, renal pelvis	endoscopic per orifice [retrograde] approach	open approach [transrenal pelviotomy or pyelotomy]	open approach [transcapsular nephrotomy]	endoscopic approach [nephrotomy, percutaneous antegrade] with calculi/ stone extraction
using basket device	1.PE.57.BA-AM	—	1.PE.57.LA-AM	1.PE.57.DT-AM
using other device NEC [e.g. forceps, meatome]	1.PE.57.BA-GX	1.PE.57.QW-GX	1.PE.57.LA-GX	1.PE.57.DT-GX
using balloon dilator and (mechanical) device	—	—	—	1.PE.57.DT-BD

E 16	Optional	Calculus	Extent	L G	Large (> or = 4 mm) - single stone
				M	Multiple stones
				S H	Staghorn
				S M	Small (< 4 mm) - single stone
				U	Unspecified

Includes:

Ablation, caliceal diverticulum
 Destruction [calculi], renal pelvis
 Destruction [calculi], ureteropelvic junction (UPJ)
 Destruction with irrigation, renal calculi (kidney stones)
 ESWL, kidney stones
 Fragmentation, renal calculi (kidney stones)
 Lithopaxy, renal
 Lithotripsy (extracorporeal shock wave lithotripsy), renal
 Lithotripsy, kidney stones
 Pyelolithopaxy

Excludes:

Lithotripsy of calculi of surgically created urinary tract [stoma, ileal conduit] (see [1.PV.59.^](#))
 Pyelotomy for destruction of UPJ stricture (see [1.PE.50.^](#))

Code Also:

Any concomitant removal [extraction] of renal calculi (e.g. basket, forcep removal) (see [1.PE.57.^](#))

Note:

Kidney stones originate in the renal pelvis. They get lodged in the collecting system and not in the solid tissue of the renal parenchyma.

1.PE.59.^ Destruction, renal pelvis	endoscopic (percutaneous) approach [endoureterotomy]	endoscopic per orifice approach	extracorporeal approach [ESWL]	open approach [pyeloureterotomy]
using chemical agent	—	1.PE.59.BA-X7	—	—

				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Pyelointestinal anastomosis
Ureterocalicostomy
Ureteropyeloneostomy

Excludes: Calicocalicostomy (see [1.PE.80.^](#))
Pyelopyelostomy (see [1.PE.80.^](#))

Code Also: Any insertion of stent for continuous dilation (see [1.PE.50.^](#))

1.PE.76.DA	using endoscopic (percutaneous) approach with anastomosis technique
1.PE.76.DA-XX-G	using endoscopic (percutaneous) approach with pedicled distant flap [e.g. intestinal segment]
1.PE.76.LA	using open approach with anastomosis technique
1.PE.76.LA-XX-G	using open approach with pedicled distant flap [e.g. intestinal segment]

1.PE.77.^ ^ Bypass with exteriorization, renal pelvis**S** 5 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Calycopyelostomy
 Creation, pyeloileocutaneous stoma
 Pelviostomy, renal
 Pyelocolostomy
 Pyelostomy [Pelviostomy]

Code Also: Any insertion of catheter into stoma (see [1.PZ.37.^ ^](#))

Note: This urinary diversion beginning at the renal pelvis exits at the skin (via stoma).

1.PE.77.^ ^ Bypass with exteriorization, renal pelvis	open approach	endoscopic [percutaneous] approach
stoma formation without stenting or tissue used	1.PE.77.LA	1.PE.77.DA
stoma formation with stenting	1.PE.77.LA-NR	1.PE.77.DA-NR
stoma formation with pedicle flap	1.PE.77.LA-XX-G	1.PE.77.DA-XX-G
stoma formation with stenting and pedicle flap	1.PE.77.LA-NR-G	1.PE.77.DA-NR-G

1.PE.80.^ ^ Repair, renal pelvis**S** 15 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 15	Optional	Tx Status 9	Status	A	Abandoned after onset
				C	Converted (from endoscopic to open approach)
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes:

- Calicocalicostomy
- Calicoplasty
- Calycorrhaphy
- Pyeloplasty (dismembered)(reduction)
- Pyelopyelostomy (for correction of duplicate systems)
- Pyelorrhaphy
- Pyeloureteroplasty
- Ureteropyeloplasty

1.PE.80.^A Repair, renal pelvis	endoscopic [percutaneous] approach	open approach [posterior]	open posterior [flank] approach
using apposition technique [e.g. suturing]	1.PE.80.DA	1.PE.80.LA	1.PE.80.PF

				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Calycectomy
Excision, duplex collecting system
Heminephroureterectomy
Partial nephrectomy with ureterectomy
Pyelectomy
Resection, renal pelvis

Excludes: Nephroureterectomy (see [1.PC.89.^.](#))

Code Also: Any insertion of stent for continuous dilation of UPJ (see [1.PE.50.^.](#))
Any robotic assisted telemanipulation of tools (see [7.SF.14.^.](#))

1.PE.87.DA	using endoscopic [laparoscopic, laparoscopic-assisted, hand-assisted] approach
1.PE.87.LA	using open approach
1.PE.87.LA-XX-E	using open approach with local flap (for closure)
1.PE.87.PF	using open posterior [flank] approach
1.PE.87.PF-XX-E	using open posterior [flank] approach with local flap (for closure)

1.PG.^.^ Therapeutic Interventions on the Ureter

Includes: Ectopic ureter
Ureter NOS
Ureteral meatus
Ureterovesical junction and orifice(s)

Excludes: Ureteropelvic junction alone (see [1.PE.^.^](#))

1.PG.27.^.^ Radiation, ureter

Includes: Teletherapy, ureter
Therapy, radiation [radiotherapy], ureter

1.PG.27.JA	using external beam
------------	---------------------

1.PG.35.^ ^ Pharmacotherapy, ureter

Excludes: Injection of substance to repair uretrovesical junction (see [1.PG.80.^ ^](#))
that with destruction of calculi (see [1.PG.59.^ ^](#))
that with extraction of calculi (see [1.PG.57.^ ^](#))

1.PG.35.BA-D1	using endoscopic per orifice approach and anti infective irrigating solution
1.PG.35.BA-D2	using endoscopic per orifice approach and salt irrigating solution
1.PG.35.BA-D3	using endoscopic per orifice approach and other irrigating solution
1.PG.35.BA-M0	using endoscopic per orifice approach and antineoplastic/immuno-modulating agent NOS
1.PG.35.BA-T9	using endoscopic per orifice approach and pharmacological agent NEC

1.PG.52.^ ^ Drainage, ureter**S** 4 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description

				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Aspiration, ureter
Drainage, ureterocele within bladder
Insertion, ureterostomy tube (for drainage)
Ureterostomy (for drainage)
Ureterotomy (for drainage)

Excludes: Drainage, urinary stoma (nephrostomy, pyelostomy, ureterostomy) (see [1.PV.52.^ ^](#))
that done with dilation (see [1.PE.50.^ ^](#))
Ureteral catheterization (renal pelvis to bladder) (see [1.PE.50.^ ^](#))

1.PG.52.BA	using endoscopic per orifice [retrograde] approach
1.PG.52.DA	using endoscopic approach (e.g. endoureterotomy)

1.PG.54.^ ^ Management of internal device, ureter**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Adjustment of device, ureter
Irrigation of external drainage tube (ureterostomy tube, ureteral catheter)
Maintenance of device, ureter

Excludes: Maintenance of ureteral (renal pelvis to bladder) stent (see [1.PE.54.^ ^](#))

1.PG.54.JA-TS of drainage tube (e.g. ureterostomy tube, ureteral catheter)

1.PG.55.^ ^ Removal of device, ureter**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Ureterotomy for removal of device

Excludes: Removal of catheter or stent from surgically created urinary tract (e.g. ileal conduit, stoma bypass) (see [1.PV.55.^ ^](#))
Removal of ureteral (renal pelvis to bladder) catheter or stent (see [1.PE.55.^ ^](#))
that with ureterostomy takedown (see [1.PG.82.^ ^](#))

Code Also: any concomitant cystoscopy (see [2.PM.70.^ ^](#))

1.PG.55.JA-TS of drainage tube (ureterostomy tube) using external approach

1.PG.55.LA-TS of drainage tube (ureterostomy tube) using open approach (ureterotomy)

1.PG.56.^ ^ Removal of foreign body, ureter**S** 4 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: that using ureteroscope, forceps or basket
Ureterotomy for removal of foreign body

Excludes: Removal of stones [calculi] (see [1.PG.57.^ ^](#))

1.PG.56.BA using endoscopic per orifice approach
1.PG.56.DA using endoscopic (percutaneous) approach
1.PG.56.LA using open approach

1.PG.57.^ ^ Extraction, ureter**S** 5 **L** 2 **E** 16

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)
E 16	Optional	Calculus	Extent	L G	Large (> or = 4 mm) - single stone
				M	Multiple stones
				S H	Staghorn
				S M	Small (< 4 mm) - single stone
				U	Unspecified

- Includes:** Lithotomy with extraction [calculi], ureterovesical
 Manipulation with extraction [calculi], ureter
 Removal of calculi, ureter
 that with subsequent irrigation
 Ureterolithotomy
 Ureterotomy with extraction [calculi, clot], ureter
- Excludes:** Extraction of calculi from ureter and ureteropelvic junction (UPJ) (see [1.PE.57.^^](#))
- Code Also:** Any concomitant destruction of calculi of ureter (see [1.PG.59.^^](#))
 Any insertion of stent for continuous dilation during healing (see [1.PE.50.^^](#))
- Note:** May involve incision into the ureter lumen in order to aid in extraction of stone(s) which may require subsequent suture repair. Extraction is usually followed by irrigation to flush the ureter clear of calculi debris.

1.PG.57.BA-AM	using endoscopic per orifice approach (transurethral) and basket device (dormia)
1.PG.57.BA-GX	using endoscopic per orifice approach (transurethral) and other device [e.g. forceps, meatome]
1.PG.57.DA-GX	using endoscopic (percutaneous)[antegrade] approach [e.g. endoureterotomy] and other device [e.g. forceps, meatome]
1.PG.57.LA-AM	using open approach and basket device (dormia)
1.PG.57.LA-GX	using open approach and other device NEC [e.g. forceps, meatome]

1.PG.59.^^ Destruction, ureter**S** 5 **L** 39 **E** 16

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description

S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Insertion, artificial sphincter, bladder neck**Excludes:** Implantation, device into bulbous urethra (see [1.PQ.53.^ ^](#))
Reconstruction of bladder neck using flap alone (see [1.PL.80.^ ^](#))
that for bladder neck suspension (see [1.PL.74.^ ^](#))**Code Also:** Any concomitant instillation of silicone or teflon synthetic agent (see [1.PL.80.^ ^](#))

1.PL.53.LA-GN using open approach, using compression/pressure device
Includes: ACT [adjustable continence therapy] device, adjustable balloon device

1.PL.53.LB-PZ using open abdominal approach and artificial sphincter
 1.PL.53.LB-PZ-E using open abdominal approach and artificial sphincter with a local flap [e.g. V Y plasty]

1.PL.54.^ ^ Management of internal device, bladder neck**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Adjustment, implanted device, bladder neck
Maintenance, implanted device, bladder neck
Snipping, cutting, dividing of synthetic urethral sling [tension free vaginal tape [TVT] (e.g. SPARC, Monarc)]

Excludes: Installation of agent into device for local pharmacotherapy (see [1.PL.35.^^](#))

1.PL.54.BA-NR of stent using endoscopic per orifice approach
1.PL.54.CA-XX-N of synthetic urethral sling (tension free vaginal tape [TVT]) using per orifice [vaginal] approach
1.PL.54.HA-GN of compression/pressure device using percutaneous (needle) approach (through scrotum)
Includes: Inflation or deflation of ACT (adjustable continence therapy) device
1.PL.54.LA-XX-N of synthetic material (urethral sling) (tension free vaginal tape [TVT]) using open approach
1.PL.54.LB-PZ of artificial sphincter using open approach

1.PL.55.^^ Removal of device, bladder neck

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Removal of synthetic urethral sling [tension free vaginal tape (TVT) e.g. SPARC, Monarc]

Excludes: That with concomitant "redo" of urethral sling (see [1.PL.74.^^](#))
that with replacement of device [e.g. stent or artificial sphincter] (see [1.PL.53.^^](#))

1.PL.55.BA-NR of stent using endoscopic per orifice approach
1.PL.55.CA-XX-N of synthetic urethral sling [tension free vaginal tape] using vaginal approach
1.PL.55.LA-XX-N of synthetic urethral sling [tension free vaginal tape] using open approach
1.PL.55.LB-PZ of artificial sphincter using open abdominal approach

1.PL.59.^^ Destruction, bladder neck

				R	Revision

Includes: Transurethral resection, bladder neck

1.PL.87.BA using endoscopic per orifice approach
 1.PL.87.BA-AG using endoscopic per orifice approach and laser NEC

1.PM.^.^ Therapeutic Interventions on the Bladder

- Includes:** Bladder NOS
Bladder with bladder neck
Dome of bladder
Intraluminous tissue of bladder
Trigone of bladder
Urachus
- Excludes:** Bladder neck alone (see [1.PL.^.^](#))
Ureterovesical junction (UVJ) and orifices (see [1.PG.^.^](#))

1.PM.11.^.^ Anesthetization, bladder

- Includes:** Interruption of innervation (peripheral, central or perivesical), bladder
Nerve block, bladder
Phenol motor point block, bladder
Pudendal nerve manipulation (of spastic bladder)

1.PM.11.HA-X7	using percutaneous (needle) approach and nerve blocking agent [e.g. alcohol, phenol]
1.PM.11.JA-DV	using electrical stimulator

1.PM.13.^.^ Control of bleeding, bladder**E 53**

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 53	Mandatory	Mandatory Coils	Extent	0	Not applicable (no coil used)
				01	One coil
				02	Two coils
				03	Three coils
				04	Four coils
				05	Five coils
				06	Six coils
				07	Seven coils
				08	Eight coils
				09	Nine coils
				10	Ten coils
				G	More than ten coils (11 - 20)
				H	More than twenty coils
				U	Unspecified

- Includes:** Control of hemorrhage, bladder
Embolization, bladder for control of bleeding
- Excludes:** Radiation for control of bleeding (see [1.PM.27.^^](#))
Systemic pharmacotherapy for control of bleeding (see [1.ZZ.35.^^](#))

1.PM.13.^^ Control of bleeding, bladder	endoscopic per orifice approach [transurethral]	open approach	percutaneous transluminal approach
using agent NEC	1.PM.13.BA-Z9	1.PM.13.LA-Z9	—
using antihemorrhagic agent	1.PM.13.BA-C2 Includes: • aminocaproic acid, aprotinin, phytonadione, thrombin, coagulation factor VIII	1.PM.13.LA-C2	—

1.PM.26.^^ Brachytherapy, bladder

S 35

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 35	Optional	Implant Status	Status	P M	Permanent implant – Radioactive source left in place permanently
				T M	Temporary implant – Radioactive source removed after course of treatment is complete

- Includes:** Endocurietherapy, bladder
Insertion [implantation] of radioactive material, bladder
Intracavitary radiation therapy, bladder

Code Also: Any concomitant implantation of brachytherapy applicators or conduits [e.g. needles, catheters] to gain access to treatment site (see [1.PM.53.^^](#))

Note: There are typically two distinct phases required to complete the process of brachytherapy. The first phase involves the insertion of non-radioactive applicators or conduits [e.g. hollow needles, catheters, stents, etc.] that receive or transmit the radioactive material into the body. The second phase involves the after loading of the radioactive material [e.g. seeds, pellets, wires, etc.] into the applicator or conduit.

1.PM.26.BA	using endoscopic per orifice approach
1.PM.26.CA	using per orifice approach
1.PM.26.LA	using open approach

1.PM.27.^ ^ Radiation, bladder

Includes: Teletherapy, bladder
Therapy, radiation [radiotherapy], bladder

Excludes: Brachytherapy, bladder (see [1.PM.26.^ ^](#))

Note: Involves external beam irradiation of bladder with or without other adjacent structures such as urethra or regional lymph nodes.

1.PM.27.JA	using external beam
------------	---------------------

1.PM.35.^ ^ Pharmacotherapy (local), bladder

Includes: Instillation, agent, bladder NEC
Irrigation, bladder

Excludes: Instillation of solution for dilation [distention] (see [1.PM.50.^ ^](#))
Systemic pharmacotherapy (see [1.ZZ.35.^ ^](#))
that for control of bleeding (see [1.PM.13.^ ^](#))

1.PM.35.^ Pharmacotherapy (local), bladder	endoscopic per orifice approach	per orifice approach	percutaneous needle approach [injection]	percutaneous approach [via cystostomy tube]	open approach

				S	Staged

Includes: Appendicovesicostomy between native bladder and skin [e.g. Mitrofanoff procedure]
 Cystostomy
 Diversion, urinary, external (temporary or permanent) originating at the bladder

Excludes: Appendicovesicostomy between augmented bladder reservoir and the skin (see [1.PM.79.^.^](#))

Code Also: Any concomitant creation of antegrade continent enema [MACE, ACE] (see [1.NM.77.^.^](#))
 Any insertion of urinary catheter into the stoma (see [1.PZ.37.^.^](#))
 Any robotic assisted telemanipulation of tools (see [7.SF.14.^.^](#))

Note: This urinary diversion beginning at the bladder may divert through an intestinal segment with the intention of exiting at the skin via stoma.

1.PM.77.^.^ Bypass with exteriorization, bladder	open approach	endoscopic (laparoscopic) approach
for continent stoma formation	1.PM.77.LA-XX-G Includes: • Appendicovesicostomy (Mitrofanoff)	1.PM.77.DA-XX-G Includes: • Laparoscopic appendicovesicostomy (Mitrofanoff)
for non continent stoma formation	1.PM.77.RR Includes: • Cutaneous vesicostomy • Cystostomy non continent (ileal) conduit urinary diversion	1.PM.77.EN Includes: • Laparoscopic cystostomy • Non continent laparoscopic (ileal) conduit urinary diversion

1.PM.79.^.^ Repair by increasing size, bladder**S** 10

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 10	Optional	Tx Status 5	Status	A	Abandoned after onset
				R	Revision
				S	Staged

- Includes:** Augmentation, bladder (ureteral, gastric or intestinal segment)
 Augmentation, bladder, detubularized
 Augmentation, clam bladder
 Cystoplasty, sigmoid
 Gastrocystoplasty
 Ileocecalcystoplasty
 Ileocystoplasty
 Sigmoidcystoplasty
- Excludes:** Cystoplasty without augmentation flap (see [1.PM.80.^](#))
 Subtotal resection of bladder concomitant with repair (see [1.PM.87.^](#))
 that when part of reconstruction of lower urinary tract (see [1.PM.84.^](#))
- Code Also:** Any concomitant cystoscopy (see [2.PM.70.^](#))
 Any robotic assisted telemanipulation of tools (see [7.SF.14.^](#))

1.PM.79.^ Repair by increasing size, bladder	using open approach	using endoscopic (laparoscopic) approach
and local flap [e.g. ureteral]	1.PM.79.LA-XX-E	1.PM.79.DA-XX-E
and combined sources of tissue [e.g. flap and xenograft]	1.PM.79.LA-XX-Q	1.PM.79.DA-XX-Q
and pedicled flap [e.g. ileum, sigmoid, ureteral, or gastric segment]	1.PM.79.RD-XX-G	1.PM.79.EN-XX-G
and pedicled flap with continent [Mitrofanoff] stoma formation	1.PM.79.LA-XX-G	1.PM.79.DA-XX-G

1.PM.80.^ Repair, bladder

S 5 **L** 33

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 33	Optional	Bladder	Location	A N	Anterior wall
				D M	Dome
				L T	Lateral wall
				M	Multiple/contiguous sites
				P S	Posterior wall
				T R	Trigone
				U	Unspecified
				U O	Ureteric orifice
				U R	Urachus

- Includes:** Correction, patent urachus
 Cystoplasty
 Cystorrhaphy

Excludes: Augmentation cystoplasty (see [1.PM.79.^](#))
 Closure, fistula, vesicocervicovaginal, vesicosigmoidovaginal, vesicouterine, vesicovaginal (see [1.PM.86.^](#))
 Closure, vesicocolic fistula (see [1.NP.86.^](#))
 Closure, vesicoenteric fistula (see [1.NP.86.^](#))
 Closure, vesicorectal fistula (see [1.NQ.86.^](#))
 Repair involving bladder neck suspension (see [1.PL.74.^](#))
 Repair of current obstetrical laceration of bladder (see [5.PC.80.^](#))
 Repair, ureterovesical junction (see [1.PG.80.^](#))
 Repair, urethrovesical junction (see [1.PL.80.^](#))

Code Also: Any insertion of drainage catheter (see [1.PM.52.^](#))
 Any insertion of stent for continuous dilation (see [1.PE.50.^](#))

1.PM.80.AF using combined abdominal and endoscopic transvaginal approach
 1.PM.80.BA using endoscopic per orifice [transurethral] approach
 1.PM.80.DA using endoscopic (laparoscopic) approach
 1.PM.80.FJ using endoscopic transvaginal approach
 1.PM.80.LA using open approach and simple apposition

Includes: transabdominal, transvaginal

1.PM.82.^ Reattachment, bladder

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Closure, cystostomy
 Closure, vesicostomy
 Takedown, cystostomy
 Takedown, vesicostomy
 that with or without removal of indwelling tube

1.PM.82.LA using open approach

1.PM.84.^ Reconstruction, bladder

S 10

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 10	Optional	Tx Status 5	Status	A	Abandoned after onset
				R	Revision
				S	Staged

- Includes:** Anastomosis, bladder (with cloacal deformity)
 Reapproximation, bladder halves (cloacal deformity)
 Repair, bladder exstrophy
- Excludes:** Augmentation cystoplasty (to increase size of existing bladder (see [1.PM.79.^^](#))
 Correction, bladder exstrophy [externalized] (see [1.SY.84.^^](#))
 Non- continent urinary diversion (see [1.PG.77.^^](#))
- Code Also:** Any concomitant colostomy for cloacal exstrophy (see [1.NM.77.^^](#))
 Any concomitant pelvic [innominate] osteotomy (see [1.SQ.80.^^](#))
 Any concomitant repair of omphalocele for staged repair of cloacal exstrophy (see [1.SY.84.^^](#))

1.PM.84.LA using open approach

1.PM.86.^^ Closure of fistula, bladder

S 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

- Includes:** Fistulectomy, bladder
 Fulguration, fistulous tract, bladder
 Repair, fistula, vesico cutaneous (bladder to skin), vesico uterine (bladder to uterus), vesico vaginal (bladder to vagina)
- Excludes:** Fulguration, bladder (for destruction of bladder lesion) (see [1.PM.59.^^](#))
 Repair of simple fistula (see [1.PM.80.^^](#))
 Repair, fistula, bladder to colon (see [1.NP.86.^^](#))

1.PM.86.^^ Closure of fistula, bladder	simple excision and closure	local flap closure	pedicled flap closure
open approach			
fistula terminating at skin	1.PM.86.MB	1.PM.86.MB-XX-E	1.PM.86.MB-XX-G
fistula terminating in genital tract	1.PM.86.MH	1.PM.86.MH-XX-E	1.PM.86.MH-XX-G
fistula terminating in urinary tract (e.g. ureterovesical, vesicoureteral)	1.PM.86.MR	1.PM.86.MR-XX-E	1.PM.86.MR-XX-G
endoscopic [percutaneous] approach			
fistula terminating at skin	1.PM.86.GF	—	—
fistula terminating in genital tract	1.PM.86.GH	—	—
open vaginal approach			
fistula terminating in genital tract	1.PM.86.RB	1.PM.86.RB-XX-E	1.PM.86.RB-XX-G

1.PM.87.^ Excision partial, bladder**S** 16 **L** 33

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 16	Optional	Tx Status 10	Status	A	Abandoned after onset
				C	Converted (from endoscopic to open approach)
L 33	Optional	Bladder	Location	A N	Anterior wall
				D M	Dome
				L T	Lateral wall
				M	Multiple/contiguous sites
				P S	Posterior wall
				T R	Trigone
				U	Unspecified
				U O	Ureteric orifice
				U R	Urachus

Includes: Cystectomy, partial (segmental, subtotal)
 Diverticulectomy, bladder
 Excision lesion, bladder
 Excision, bladder dome
 Excision, duplicate bladder
 Excision, urachus [sinus, cyst] with bladder cuff
 Resection, bladder (wedge, supratrigonal, TUR)
 Trigonectomy

Excludes: that for augmentation cystoplasty (see [1.PM.79.^](#))

Code Also: Any robotic assisted telemanipulation of tools (see [7.SF.14.^](#))

1.PM.87.BA using endoscopic per orifice approach
 1.PM.87.BA-AG using endoscopic per orifice approach and laser
 1.PM.87.DA using endoscopic (laparoscopic) approach
 1.PM.87.LA using open approach

1.PM.89.^ Excision total, bladder**S** 10

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 10	Optional	Tx Status 5	Status	A	Abandoned after onset
				R	Revision
				S	Staged

- Includes:** Cystectomy, total (simple, remainder)
Resection, total, bladder
- Excludes:** Cystectomy with urethrectomy (see [1.PM.91.^^](#))
Excision, duplicate bladder (see [1.PM.87.^^](#))
- Code Also:** Any procurement of large intestine (see [1.NM.58.^^](#))
Any procurement of small intestine (see [1.NK.58.^^](#))
Any robotic assisted telemanipulation of tools (see [7.SF.14.^^](#))
- Note:** May involve reconfiguring an intestinal (gastric or rectal) segment to act as a reservoir or neobladder

1.PM.89.^^ Excision total, bladder	open approach	endoscopic [laparoscopic] approach
with creation of neobladder (pouch, reservoir) using pedicled flap	1.PM.89.LA-XX-G	1.PM.89.DA-XX-G
with creation of continent (Mitrofanoff) urinary stoma with (or without) formation of neobladder using pedicled flap	1.PM.89.RR-XX-G	1.PM.89.EN-XX-G
with non continent urinary diversion (e.g. ureteroileostomy)	1.PM.89.RR	1.PM.89.EN

1.PM.91.^^ Excision radical, bladder

S 10

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 10	Optional	Tx Status 5	Status	A	Abandoned after onset
				R	Revision
				S	Staged

- Includes:** Cystectomy, radical
Cystectomy, radical with (non continent) urinary diversion
Cystoprostatectomy
Cystoprostatourethrectomy
Exenteration, pelvic (anterior, total)
- Code Also:** Any concomitant colostomy (see [1.NM.77.^^](#))
Any concomitant insertion of stent in surgically constructed urinary tract (see [1.PV.50.^^](#))
Any procurement of large intestine (see [1.NM.58.^^](#))
Any procurement of small intestine (see [1.NK.58.^^](#))
Any robotic assisted telemanipulation of tools (see [7.SF.14.^^](#))
- Note:** Involves the en bloc resection of bladder with adjacent organs such as: in the female– uterus, vagina, ovaries, fallopian tubes; in the male– prostate, vesicles, urethra with or without the rectum, colon or regional lymph nodes. May involve reconfiguring an intestinal (gastric or rectal) segment to act as a reservoir or neobladder.

1.PM.91.^.^ Excision radical, bladder	open approach	endoscopic [laparoscopic] approach
with simple apposition technique	1.PM.91.LA	1.PM.91.DA
with creation of neobladder (pouch, reservoir) using pedicled flap	1.PM.91.LA-XX-G	1.PM.91.DA-XX-G
with creation of continent (Mitrofanoff) urinary stoma with (or without) formation of neobladder using pedicled flap	1.PM.91.RR-XX-G	1.PM.91.EN-XX-G
with non continent urinary diversion (e.g. ureteroileostomy, ileal conduit, urostomy)	1.PM.91.RR	1.PM.91.EN

1.PQ.^.^ Therapeutic Interventions on the Urethra

Includes: Peri-urethral gland
Skene's gland (duct)
Urethra (bulbous, penile, prostatic)
Urethral meatus
Urethral valves

1.PQ.11.^.^ Anesthetization, urethra

1.PQ.11.HA-P1 using percutaneous needle approach [injection] and anesthetic agent
1.PQ.11.JA-P1 using external approach and anesthetic agent

1.PQ.26.^.^ Brachytherapy, urethra

S 35

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 35	Optional	Implant Status	Status	P M	Permanent implant – Radioactive source left in place permanently
				T M	Temporary implant – Radioactive source removed after course of treatment is complete

Includes:	Endocurietherapy, urethra Implantation [insertion] of radioactive material, urethra Interstitial radiation therapy, urethra Intracavitary radiation therapy, urethra
Code Also:	Any concomitant implantation of brachytherapy applicators or conduits [e.g. needles, catheters] to gain access to treatment site (see 1.PQ.53.^)
Note:	There are typically two distinct phases required to complete the process of brachytherapy. The first phase involves the insertion of non-radioactive applicators or conduits [e.g. hollow needles, catheters, stents, etc.] that receive or transmit the radioactive material into the body. The second phase involves the after loading of the radioactive material [e.g. seeds, pellets, wires, etc.] into the applicator or conduit.
1.PQ.26.BA	using endoscopic per orifice approach
1.PQ.26.CA	using per orifice approach
1.PQ.26.HA	using percutaneous (transcatheter or transneedle) approach
1.PQ.26.LA	using open approach

1.PQ.27.^ Radiation, urethra

Includes:	Teletherapy, urethra Therapy, radiation [radiotherapy], urethra
Excludes:	Brachytherapy (see 1.PQ.26.^) Radiation therapy involving both urethra and bladder (see 1.PM.27.^)
Note:	Involves external beam irradiation of the urethra with or without regional lymph nodes.
1.PQ.27.JA	using external beam

1.PQ.35.^ Pharmacotherapy (local), urethra

Includes:	Injection, urethra Instillation, urethra Irrigation, urethra
Excludes:	Injection of substance to repair urethrovesical junction (see 1.PL.80.^) Systemic pharmacotherapy (see 1.ZZ.35.^)

1.PQ.35.^ ^ Pharmacotherapy (local), urethra	endoscopic per orifice approach	per orifice approach	percutaneous needle [injection] approach
using antiinfective irrigating solution	1.PQ.35.BA-D1 Includes: • chlorhexidine, neomycin	1.PQ.35.CA-D1	—
using salt irrigating solution	1.PQ.35.BA-D2 Includes: • sodium chloride	1.PQ.35.CA-D2	—
using other irrigating solution	1.PQ.35.BA-D3 Includes: • sorbitol, mannitol	1.PQ.35.CA-D3	—
using pharmacological agent NEC	1.PQ.35.BA-T9	—	1.PQ.35.HA-T9
using agent NEC	1.PQ.35.BA-Z9	—	1.PQ.35.HA-Z9

1.PQ.50.^ ^ Dilation, urethra**S** 5 **L** 40

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 40	Optional	Urethra	Location	B P	Bulbous
				M B	Membranous
				P C	Prostatic
				P E	Penile
				U	Unspecified

Includes:

- Dilation, urethral sphincter
- Insertion, stent, urethra (for dilation)
- Meatotomy with dilation, urethral
- Replacement, stent, urethra
- Sphincterotomy, urethral
- Urethrotomy with dilation

Excludes:

- Dilation of prostate (see [1.QT.50.^ ^](#))
- Intermittent catheterization for dilation and drainage (see [1.PM.52.^ ^](#))

1.PQ.50.^ Dilation, urethra	endoscopic per orifice approach	per orifice approach
using incision [e.g. sphincterotomy, urethrotomy]	1.PQ.50.BA	1.PQ.50.CA
using flexible dilator [e.g. bougie, stent, catheter]	1.PQ.50.BA-BJ	1.PQ.50.CA-BJ
using balloon dilator	1.PQ.50.BA-BD	1.PQ.50.CA-BD
with incision [meatotomy or urethrotomy] and rigid dilator [stent]	1.PQ.50.BT-BP	—
using rigid dilator [stent] without incision	1.PQ.50.BA-BP	1.PQ.50.CA-BP
using laser [e.g. urethrotomy]	1.PQ.50.BA-AG	1.PQ.50.CA-AG

1.PQ.52.^ Drainage, urethra**S** 5 **L** 40

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 40	Optional	Urethra	Location	B P	Bulbous
				M B	Membraneous
				P C	Prostatic
				P E	Penile
				U	Unspecified

Includes: Aspiration, Skene's duct
 Aspiration, urethra (cyst)
 Marsupialization, peri urethral gland
 Urethrotomy for drainage

Excludes: Insertion of urinary catheter (see [1.PM.52.^](#))
 Insertion, cystostomy drainage catheter (see [1.PM.52.^](#))

1.PQ.52.CA using per orifice approach
 1.PQ.52.LA using open approach
 1.PQ.52.QY using open transvaginal approach

1.PQ.53.^ Implantation of internal device, urethra**S** 5 **L** 40

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 40	Optional	Urethra	Location	B P	Bulbous
				M B	Membranous
				P C	Prostatic
				P E	Penile
				U	Unspecified

Includes: Implantation, brachytherapy applicator, urethra
 Insertion of device, bulbous urethra
 Insertion of device, urethra NEC

Excludes: Implantation, device, bladder neck (see [1.PL.53.^](#))
 Insertion of drainage tube or indwelling catheter to bladder (see [1.PM.52.^](#))
 Insertion of stent for dilation (see [1.PQ.50.^](#))

Code Also: Any concomitant loading of brachytherapy applicator (see [1.PQ.26.^](#))

1.PQ.53.BA-EM of brachytherapy applicator using endoscopic per orifice approach
 1.PQ.53.CA-EM of brachytherapy applicator using per orifice approach
 1.PQ.53.HA-EM of brachytherapy applicator using percutaneous approach
 1.PQ.53.LA-EM of brachytherapy applicator using open approach
 1.PQ.53.LA-PZ of artificial urinary sphincter using open approach

1.PQ.54.^ Management of internal device, urethra**S** 4 **L** 40

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 40	Optional	Urethra	Location	B P	Bulbous
				M B	Membranous
				P C	Prostatic
				P E	Penile
				U	Unspecified

Includes: Adjustment to device, urethra
Maintenance of device, urethra

Excludes: Installation of agent into device for local pharmacotherapy (see [1.PQ.35.^^](#))

1.PQ.54.BA-BJ	of flexible dilator using endoscopic per orifice approach
1.PQ.54.BA-PZ	of artificial urinary sphincter using endoscopic per orifice approach
1.PQ.54.CA-BJ	of flexible dilator using per orifice approach
1.PQ.54.LA-PZ	of artificial urinary sphincter using open approach

1.PQ.55.^^ Removal of device, urethra

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Excludes: that with replacement of device (see [1.PQ.53.^^](#))

1.PQ.55.^^ Removal of device, urethra	endoscopic per orifice approach	per orifice approach	open approach	external approach
of flexible dilator [e.g. stent, catheter]	1.PQ.55.BA-BJ	1.PQ.55.CA-BJ	1.PQ.55.LA-BJ	—
of radioactive material	1.PQ.55.BA-EC	1.PQ.55.CA-EC	1.PQ.55.LA-EC	1.PQ.55.JA-EC
of artificial urinary sphincter	—	—	1.PQ.55.LA-PZ	—

1.PQ.56.^^ Removal of foreign body, urethra

S 4 **L** 40

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 40	Optional	Urethra	Location	B P	Bulbous
				M B	Membranous
				P C	Prostatic
				P E	Penile
				U	Unspecified

Excludes: Removal of calculus (see [1.PQ.57.^](#))

1.PQ.56.BA using endoscopic per orifice (transurethral) approach
 1.PQ.56.CA using per orifice approach
 1.PQ.56.DA using endoscopic (percutaneous) approach
 1.PQ.56.LA using open approach (abdominal, perineal)
 1.PQ.56.QY using open transvaginal approach

1.PQ.57.^ Extraction, urethra

S 5 **L** 40 **E** 16

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 40	Optional	Urethra	Location	B P	Bulbous
				M B	Membranous
				P C	Prostatic
				P E	Penile
				U	Unspecified
E 16	Optional	Calculus	Extent	L G	Large (> or = 4 mm) - single stone
				M	Multiple stones
				S H	Staghorn
				S M	Small (< 4 mm) - single stone
				U	Unspecified

Includes: Manipulation with extraction [calculi, clot], urethra
 Urethrolithotomy with extraction [calculi]
 Urethrotomy with extraction [calculi]

Code Also: Any concomitant destruction of calculi of urethra (see [1.PQ.59.^](#))
 Any insertion of stent for continuous dilation during healing (see [1.PQ.50.^](#))

Note: May involve incision into the urethra lumen in order to aid in extraction of stone(s) which may require subsequent suture repair. Extraction is usually followed by irrigation to flush urethra clear of calculi debris.

1.PQ.57.BA-AM using endoscopic per orifice approach(transurethral) and basket device (dormia)
 1.PQ.57.BA-GX using endoscopic per orifice approach(transurethral) and device NEC [e.g. forceps, meatome]
 1.PQ.57.LA-AM using open approach and basket device
Includes: perineal, transvaginal, penile
 1.PQ.57.LA-GX using open approach and device NEC [e.g. forceps, meatome]

1.PQ.58.^ Procurement, urethra**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Collection sperm from urethra
Retrieval sperm following electroejaculation into urethra

Code Also: Any (prior) electroejaculation (see [1.BS.09.^](#))

1.PQ.58.CA using per orifice approach

1.PQ.59.^ Destruction, urethra**S** 5 **L** 40 **E** 16

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 40	Optional	Urethra	Location	B P	Bulbous
				M B	Membranous
				P C	Prostatic
				P E	Penile
				U	Unspecified
E 16	Optional	Calculus	Extent	L G	Large (> or = 4 mm) - single stone
				M	Multiple stones
				S H	Staghorn
				S M	Small (< 4 mm) - single stone
				U	Unspecified

Includes: Cauterization, urethral caruncles
Destruction with irrigation [calculi], urethra
Laser therapy
Urethrolithopaxy
Urethrotomy for destruction (valves, tissue)

Excludes: Release of adhesions (see [1.PQ.72.^](#))

Code Also: Any concomitant removal [extraction] of calculi of urethra (e.g. basket, forcep removal) (see [1.PQ.57.^](#))

1.PQ.59.^ Destruction, urethra	endoscopic per orifice approach	endoscopic transvesical approach	open approach
using cryoprobe	1.PQ.59.BA-AD	1.PQ.59.FL-AD	—
using device NEC	1.PQ.59.BA-GX	1.PQ.59.FL-GX	1.PQ.59.LA-GX
using electrohydraulic device	—	1.PQ.59.FL-AS	—
using laser	1.PQ.59.BA-AG	1.PQ.59.FL-AG	—
using ultrasonic probe	1.PQ.59.BA-AZ	1.PQ.59.FL-AZ	1.PQ.59.LA-AZ

1.PQ.72.^ Release, urethra**S** 5 **L** 40

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 40	Optional	Urethra	Location	B P	Bulbous
				M B	Membranous
				P C	Prostatic
				P E	Penile
				U	Unspecified

Includes: Release, adhesions, urethra (periurethral tissue)
Urethrolisis

Excludes: Destruction of urethral tissue (see [1.PQ.59.^](#))
Dilation of urethra (see [1.PQ.50.^](#))

1.PQ.72.AC	using combined open abdominal with vaginal approach
1.PQ.72.LA	using open approach
1.PQ.72.PK	using open retropubic approach
1.PQ.72.QY	using open transvaginal approach
1.PQ.72.QY-AG	using open transvaginal approach and laser

1.PQ.77.^ Bypass with exteriorization, urethra**S** 5 **L** 40

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 40	Optional	Urethra	Location	B P	Bulbous
				M B	Membranous
				P C	Prostatic
				P E	Penile
				U	Unspecified

Includes: Fistulization, urethroperineal
 Urethrostomy, (perineal)

Code Also: Any insertion of urinary catheter into the stoma (see [1.PZ.37.^](#))

Note: This urinary diversion begins at the urethra and exits at the skin via stoma.

1.PQ.77.LA using open approach for stoma formation

1.PQ.77.LA-XX-A using open approach and (skin) autograft for stoma formation

1.PQ.78.^ Repair by decreasing size, urethra**S** 5 **L** 40

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 40	Optional	Urethra	Location	B P	Bulbous
				M B	Membranous
				P C	Prostatic
				P E	Penile
				U	Unspecified

Includes: Reduction urethroplasty for megalourethra
 Urethral plication

1.PQ.78.LA using open approach

1.PQ.80.^ Repair, urethra**S** 5 **L** 40

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 40	Optional	Urethra	Location	B P	Bulbous
				M B	Membranous
				P C	Prostatic
				P E	Penile
				U	Unspecified

Includes: Augmentation, urethra
 Meatoplasty, urethral
 Repair, urethral prolapse (circumcision technique)
 Substitution, urethral (penile, second stage)
 Tubeplasty, urethral
 Urethroplasty (augmented, roof strip, scrotal drop back)
 Urethrorrhaphy
 Vaginal flap urethral reconstruction

Excludes: Repair of current obstetrical laceration of urethra (see [5.PC.80.^](#))
 Repair of fistula: urethrovaginal, urethroperineal, urethroscrotal and urethrocuteaneous (see [1.PQ.86.^](#))
 Repair, epispadias (see [1.QE.80.^](#))
 Repair, hypospadias (see [1.QE.80.^](#))
 that involving reconstruction of penis (see [1.QE.84.^](#))
 Urethrectomy with urethral substitution (one stage) (see [1.PQ.89.^](#))

Code Also: any concomitant pubovaginal sling (see [1.PL.74.^](#))

1.PQ.80.^ Repair, urethra	endoscopic per orifice approach	open approach	percutaneous needle [injection] approach
with autograft	1.PQ.80.BA-XX-A	1.PQ.80.LA-XX-A	—
with cryosurgery	—	1.PQ.80.LA-AD	—
with local flap (e.g. mucosal advancement)	—	1.PQ.80.LA-XX-E	—
with pedicled distant flap [e.g. buck's fascia, penile, scrotal or perineal skin flap]	—	1.PQ.80.LA-XX-G	—
with combined sources of tissue [e.g. graft and flap]	—	1.PQ.80.LA-XX-Q	—
with simple apposition technique	1.PQ.80.BA	1.PQ.80.LA	—
with other synthetic material [e.g. macropastique]	1.PQ.80.BA-W0	—	1.PQ.80.HA-W0

1.PQ.82.^ ^ Reattachment, urethra**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Closure, urethrostomy
Takedown, urethrostomy
that with or without removal of indwelling tube

1.PQ.82.LA using open approach

1.PQ.86.^ ^ Closure of fistula, urethra**S** 5 **L** 40

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 40	Optional	Urethra	Location	B P	Bulbous
				M B	Membranous
				P C	Prostatic
				P E	Penile
				U	Unspecified

Includes: Closure, prostatocutaneous fistula
Closure, prostatoperineal fistula
Fistulectomy, urethra NEC
Repair of fistula, urethra to skin, vagina or scrotum

Code Also: any pubovaginal sling (see [1.PL.74.^ ^](#))

1.PQ.86.^ ^ Closure of fistula, urethra	simple excision and closure	fibrin [glue, Tisseel] closure	free flap closure	local flap closure
terminating at skin [urethrocuteaneous, urethroscrotal, urethroperineal]	1.PQ.86.MB	1.PQ.86.MB-W3	1.PQ.86.MB-XX-F	1.PQ.86.MB-XX-E
terminating in genital tract [urethrovaginal]	1.PQ.86.MH	1.PQ.86.MH-W3	1.PQ.86.MH-XX-F	1.PQ.86.MH-XX-E

1.PQ.87.^ ^ Excision partial, urethra**S** 4 **L** 40

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 40	Optional	Urethra	Location	B P	Bulbous
				M B	Membranous
				P C	Prostatic
				P E	Penile
				U	Unspecified

Includes: Diverticulectomy, urethra
Excision, bulbourethral gland
Excision, Skene's gland
Meatotomy, urethral
Urethrectomy, partial

Excludes: that with glanuloplasty (see [1.QE.80.^ ^](#))

Code Also: Any insertion of stent (mesh cylinder) for continuous dilation (see [1.PQ.50.^ ^](#))

1.PQ.87.^ ^ Excision partial, urethra	open transpenile approach	open transperineal approach	open transvaginal approach	endoscopic per orifice approach
using apposition technique [e.g. suturing] or no apposition required for tissue regeneration	1.PQ.87.NU	1.PQ.87.QU	1.PQ.87.QY	1.PQ.87.BA Includes: • Cystoscopic urethral polypectomy
using autograft [e.g. skin, bladder epithelium]	1.PQ.87.NU-XX-A	1.PQ.87.QU-XX-A	1.PQ.87.QY-XX-A	—
using local flap [e.g. mucosal advancement]	1.PQ.87.NU-XX-E	1.PQ.87.QU-XX-E	1.PQ.87.QY-XX-E	—
using pedicled flap	1.PQ.87.NU-XX-G	1.PQ.87.QU-XX-G	1.PQ.87.QY-XX-G	—

1.PQ.89.^ ^ Excision total, urethra**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Urethrectomy, total (with urethral substitution, tubeplasty)

Code Also: Any concomitant excision of the penis in the male (see [1.QE.89.^](#))
 Any concomitant radical cystectomy (see [1.PM.91.^](#))
 Any concomitant total cystectomy (in the female) (see [1.PM.89.^](#))
 Any insertion of cystostomy drainage tube (see [1.PM.52.^](#))
 Any insertion of stent (mesh cylinder) for continuous dilation (see [1.PQ.50.^](#))

1.PQ.89.LA using open approach with formation of urethrostomy

1.PV.^.^ Therapeutic Interventions on Surgically Constructed Sites in Urinary Tract

Includes: Appendicovesicostomy
 Cystostomy tract
 Ileoconduit
 Neobladder
 Nephrostomy tract
 Pyelointestinal anastomosis site (conduit)
 Pyelostomy tract
 Transureteroureterostomy
 Ureterocalicostomy
 Ureterocutaneostomy
 Ureteropyeloneostomy
 Ureterosigmoidostomy
 Ureterostomy tract
 Urethrostomy tract

Excludes: Skin of urinary stoma (externalized site/opening) (see [1.YY.^.^](#))
 Stomas of surgically constructed sites (see [1.YY.^.^](#))

1.PV.35.^ Pharmacotherapy (local), surgically constructed urinary tract

Includes: Instillation, agent, neobladder
 Irrigation, urinary stoma

1.PV.35.^ Pharmacotherapy (local), surgically constructed sites in the urinary tract	per orifice approach	percutaneous transcatheter approach
using antiinfective irrigating solution	1.PV.35.CA-D1	1.PV.35.HH-D1
using salt irrigating solution	1.PV.35.CA-D2	1.PV.35.HH-D2
using other irrigating solution	1.PV.35.CA-D3	1.PV.35.HH-D3
using pharmacological agent NEC	1.PV.35.CA-T9	1.PV.35.HH-T9
using agent NEC	1.PV.35.CA-Z9	1.PV.35.HH-Z9

1.PV.50.^ ^ Dilation, surgically constructed urinary tract**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Dilation, urinary stoma [cystostomy, nephrostomy, pyelostomy, ureterostomy]

Excludes: Intermittent catheterization for dilation (see [1.PM.52.^ ^](#))

1.PV.50.^ ^ Dilation, surgically constructed urinary tract	endoscopic per orifice approach [via stoma]	endoscopic per orifice approach [via stoma] with incision	per orifice approach	percutaneous approach [via stoma]
using flexible dilator (e.g. bougie, stent, catheter)	1.PV.50.BA-BJ	1.PV.50.BT-BJ	—	—
using balloon dilator (hyperbaric)	1.PV.50.BA-BM	1.PV.50.BT-BM	—	—
using rigid dilator (e.g. wire, sound, telescoping Teflon)	1.PV.50.BA-BP	1.PV.50.BT-BP	—	1.PV.50.HA-BP
using manual technique	—	—	1.PV.50.CJ	—
using device NEC	1.PV.50.BA-GX	1.PV.50.BT-GX	—	1.PV.50.HA-GX

1.PV.52.^ ^ Drainage, surgically constructed urinary tract**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Aspiration of stoma (nephrostomy, pyelostomy, ureterostomy)

Excludes: that with concomitant insertion of stent into stoma (see [1.PV.50.^ ^](#))

1.PV.52.BA	using endoscopic per orifice approach
1.PV.52.DA	using endoscopic approach
1.PV.52.HA	using percutaneous needle aspiration
1.PV.52.HH	using percutaneous approach with insertion of tube (nephrostomy, pyelostomy, ureterostomy)
1.PV.52.JA-TS	using external approach with insertion of tube (nephrostomy, pyelostomy, ureterostomy)

1.PV.54.^ ^ Management of internal device, surgically constructed urinary tract

Includes: Adjustment of catheter or stent, urinary stoma
Irrigation of drainage tube, urinary stoma
Maintenance of catheter or stent, urinary stoma

1.PV.54.BA-NR	endoscopic per orifice approach, management of stent
1.PV.54.JA-TS	external approach, management of drainage catheter

1.PV.55.^ ^ Removal of device, surgically constructed urinary tract**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Removal of cystostomy, nephrostomy, pyelostomy, ureterostomy stent or tube

Excludes: that concomitant with takedown of stoma (see [1.PE.82.^ ^](#), [1.PG.82.^ ^](#), [1.PM.82.^ ^](#))

1.PV.55.^ ^ Removal of device, surgically constructed urinary tract	of catheter, tube	of stent
by endoscopic per orifice approach	1.PV.55.BA-TS	1.PV.55.BA-NR
by per orifice approach	1.PV.55.CA-TS	1.PV.55.CA-NR
by endoscopic (laparoscopic) approach	1.PV.55.DA-TS	1.PV.55.DA-NR
by open approach	1.PV.55.LA-TS	1.PV.55.LA-NR

1.PV.57.^ ^ Extraction, surgically constructed urinary tract**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Extraction [calculi, clot], urinary stoma NOS
 Extraction with manipulation [calculi] ureterostomy
 Extraction with manipulation [calculi] cystostomy
 Extraction with manipulation [calculi] nephrostomy
 Extraction with manipulation [calculi] pyelostomy
 Removal, calculi, from surgically constructed urinary tract

Code Also: Any concomitant destruction of calculi of surgically constructed urinary tract (see [1.PV.59.^ ^](#))
 Any insertion of stent for continuous dilation during healing (see [1.PV.50.^ ^](#))

Note: May involve incision into the stoma in order to aid in extraction of stone(s) which may require subsequent suture repair. Extraction is usually followed by irrigation to flush stoma clear of calculi debris.

1.PV.57.BA-AM	using endoscopic per orifice approach [via stoma] and basket device [dormia]
1.PV.57.BA-GX	using endoscopic per orifice approach [via stoma] and other device [e.g. forceps, meatome]
1.PV.57.LA-GX	using open approach and other device [e.g. forceps, meatome]

1.PV.59.^ ^ Destruction, surgically constructed urinary tract**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Ablation (of tissue), surgically constructed urinary tract
 Ablation (of tissue), urinary stoma [cystostomy, nephrostomy, pyelostomy]
 Destruction with irrigation [calculi], urinary stoma
 ESWL, urinary stoma
 Fragmentation [calculi], urinary stoma
 Lithotripsy, surgically created urinary tract [calculi]
 Lithotripsy, urinary stoma (cystostomy, nephrostomy, pyelostomy, ureterostomy)

Code Also: Any concomitant removal [extraction] of calculi of surgically constructed urinary tract (see [1.PV.57.^ ^](#))

1.PV.59.^ ^ Destruction, surgically constructed urinary tract	endoscopic per orifice approach	open approach
using chemical agent [e.g. chemocautery]	1.PV.59.BA-X7	—
using device NEC	1.PV.59.BA-GX	1.PV.59.LA-GX
using electrohydraulic device for lithotripsy	1.PV.59.BA-AS	—
using electromechanical device [ballistic] for lithotripsy	1.PV.59.BA-AT	—
using laser	1.PV.59.BA-AG	—
using ultrasonic probe for lithotripsy	1.PV.59.BA-AZ	—

1.PV.80.^ ^ Repair, surgically constructed urinary tract**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Repair, ileoconduit diversion of urinary tract
 Repair, urinary stoma (e.g. ureterostomy, cystostomy)
 Repair, urinary tract anastomosis site (for dehiscence, leakage)
 Revision, urinary stoma (anastomosis)

Excludes: Repair, stoma at skin surface alone (see [1.YY.80.^ ^](#))

1.PV.80.^.^ Repair, surgically constructed urinary tract	endoscopic per orifice approach	endoscopic [laparoscopic] approach	open approach
using simple repair (without tissue or agent)	1.PV.80.BA	1.PV.80.DA	1.PV.80.LA
using pedicled flap for stoma formation	—	—	1.PV.80.LA-XX-G Includes: • Formation of ileal conduit for urinary diversion exiting via stoma at skin following excision of (failed) neobladder
using collagen	1.PV.80.BA-W2	—	—
using teflon	1.PV.80.BA-W8	—	—
using bioabsorbable material [e.g. dextranomer microspheres (Deflux)]	1.PV.80.BA-FH	—	—
using other synthetic material [e.g. silicone, macroplastique]	1.PV.80.BA-W0	—	—

1.PZ.^.^ Therapeutic Interventions on Urinary System NEC

Includes: Urinary system and function
Urinary tract NOS
Urinary tract, multi site

1.PZ.21.^.^ Dialysis, urinary system NEC

Includes: Artificial kidney dialysis
CAPD [continuous ambulatory]
Extracorporeal hemodialysis
Extracorporeal hemofiltration
Kidney dialysis
Peritoneal dialysis
that for detoxification

Code Also: Any associated creation of arteriovenous fistula to facilitate hemodialysis (see [1.KY.76.^.](#))
Any concomitant implantation of venous access device for hemodialysis (see [1.IS.53.^.](#))

1.PZ.21.HP-D4	peritoneal dialysis using dialysate Includes: isotonic and hypertonic solutions
1.PZ.21.HQ-BR	hemodialysis Includes: hemodialysis NOS
1.PZ.21.HQ-BS	continuous venovenous hemodialysis Includes: Continuous renal replacement therapy (CRRT) Continuous venovenous hemodiafiltration [e.g. using PRISMA device]

1.PZ.37.^.^ Installation of external appliance, urinary system NEC

Includes:	Insertion, catheter, urinary stoma Replacement of device, urinary system NEC that for natural or artificial urinary tract drainage or control
Excludes:	Insertion of indwelling catheter (see 1.PM.52.^.^)

1.PZ.37.JA-GJ	of urine collection apparatus
1.PZ.37.JA-GP	of condom catheter appliance

1.PZ.38.^.^ Management of external appliance, urinary system NEC

Includes:	Fitting and adjusting of external appliance, urinary system NEC Maintenance of external appliance, urinary system NEC Removal of external device, urinary system NEC
------------------	--

1.PZ.38.JA-GJ	of urine collection apparatus
1.PZ.38.JA-GP	of condom catheter appliance

1.PZ.94.^.^ Therapeutic intervention NEC, urinary system NEC

1.PZ.94.BA	using endoscopic per orifice approach
1.PZ.94.DA	using endoscopic (laparoscopic) approach
1.PZ.94.HA	using percutaneous (needle) approach
1.PZ.94.LA	using open approach

Therapeutic Interventions on the Male Genital Organs (1QD - 1QZ)

1.QD.^.^ Therapeutic Interventions on the Prepuce

Includes: Foreskin

Excludes: Prepuce with body of penis (see [1.QE.^.^](#))

1.QD.72.^.^ Release, prepuce

S 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Incision, prepuce
Lysis of preputial adhesions (with dilation)
Preputiotomy
Slit (dorsal or lateral), prepuce

1.QD.72.LA using open approach

1.QD.73.^.^ Reduction, prepuce

Includes: Reduction, phimosis

1.QD.73.JH using external approach with manual technique

1.QD.89.^.^ Excision total, prepuce

S 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Circumcision
Correction, phimosis
Preputiectomy

1.QD.89.LA using open approach

1.QD.89.LA-FF using open approach and closure device [e.g. Gomco clamp]

1.QE.^.^ Therapeutic Interventions on the Penis

Includes:	Buck's fascia Corpus cavernosa Corpus spongiosum Glans penis Prepuce (foreskin) with body of penis Skin of penis
Excludes:	Prepuce alone (see 1.QD.^.^)

1.QE.06.^.^ Hypothermy, penis

Includes:	Application of cold, penis
------------------	----------------------------

1.QE.06.JA-KL	using ice pack
1.QE.06.JA-KM	using cool/cold compress

1.QE.13.^.^ Control of bleeding, penis

Excludes:	Application of pressure dressing to penis to control bleeding (see 1.QE.14.^.^) Destruction or ablation, skin of penis for control of bleeding (see 1.QE.59.^.^) Systemic pharmacotherapy for control of bleeding (see 1.ZZ.35.^.^) that with surgical repair and suturing (see 1.QE.80.^.^)
------------------	---

1.QE.13.JA-C2	using local application of antihemorrhagic agent Includes: aminocaproic acid, aprotinin, phytonadione, thrombin, coagulation factor VIII
1.QE.13.JN	using external manual compression

1.QE.14.^.^ Dressing, penis

Includes:	Bandage, wound of penis Coverage [temporary], skin of penis Replace [change] dressing, penis that with debridement, skin of penis
------------------	--

1.QE.14.JA-FJ	using occlusive dressing [e.g. hydrocolloid, coal tar, paraffin, gauze, hydrogel]
1.QE.14.JA-FN	using wet/moist dressing
1.QE.14.JA-GN	using pressure dressing
1.QE.14.JA-H1	using medicated dressing
1.QE.14.JA-T6	using dry dressing
1.QE.14.JA-XX-L	using xenogeneic tissue [e.g. porcine xenograft]
1.QE.14.JA-XX-N	using and synthetic tissue [e.g. Dermabrane, Derma Graft]

1.QE.26.^ ^ Brachytherapy, penis**S** 35

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 35	Optional	Implant Status	Status	P M	Permanent implant – Radioactive source left in place permanently
				T M	Temporary implant – Radioactive source removed after course of treatment is complete

Includes: Endocurietherapy, penis
 Implantation of radioactive material, penis
 Interstitial radiation therapy, penis

Code Also: Any concomitant implantation of brachytherapy applicators or conduits [e.g. needles, catheters] to gain access to treatment site (see [1.QE.53.^ ^](#))

Note: There are typically two distinct phases required to complete the process of brachytherapy. The first phase involves the insertion of non-radioactive applicators or conduits [e.g. hollow needles, catheters, stents, etc.] that receive or transmit the radioactive material into the body. The second phase involves the after loading of the radioactive material [e.g. seeds, pellets, wires, etc.] into the applicator or conduit.

1.QE.26.HA	using percutaneous (transcatheter or transneedle) approach
1.QE.26.LA	using open approach

1.QE.27.^ ^ Radiation, penis

Includes: Teletherapy, penis
 Therapy, radiation [radiotherapy], penis

1.QE.27.JA	using external beam
------------	---------------------

1.QE.35.^ ^ Pharmacotherapy (local), penis

Includes: Application of agent, penis NEC
 Injection, penis NEC
 Irrigation, penis

Excludes: Systemic pharmacotherapy (see [1.ZZ.35.^ ^](#))
 that for control of bleeding (see [1.QE.13.^ ^](#))

1.QE.35.^ Pharmacotherapy (local), penis	external [topical] application [e.g. extracorporeal]	percutaneous needle [injection] approach
using antiinfective irrigating solution	1.QE.35.JA-D1 Includes: • chlorhexidine, neomycin	—
using salt irrigating solution	1.QE.35.JA-D2 Includes: • sodium chloride	—
using other irrigating solution	1.QE.35.JA-D3 Includes: • sorbitol, mannitol	—
using vasodilators [e.g. for impotence]	1.QE.35.JA-E4	1.QE.35.HA-E4 Includes: • nitroglycerin, isosorbide dinitrate
using antifungal agent	1.QE.35.JA-G1 Includes: • nystatin, clotrimazole, miconazole, tolnaftate	—
using emollient and protective agent	1.QE.35.JA-G2 Includes: • silicone, dimethicone, zinc oxide, urea, protectives against UV radiation	—
using wound and ulcer treatment agent	1.QE.35.JA-G3 Includes: • sutilains, collagenase, dextranomer	—
using antipruritic agent	1.QE.35.JA-G4 Includes: • diphenhydramine, lidocaine, benzocaine, crotamiton, calamine	—
using antipsoriatic agent	1.QE.35.JA-G5 Includes: • coal tar preparations, anthralin, methoxsalen)	—
using antibiotic and chemotherapeutic agent	1.QE.35.JA-G6 Includes: • fusidic acid, bacitracin, polymyxin, mupirocin, idoxuridine, acyclovir for topical use	—
using dermatological corticosteroid agent	1.QE.35.JA-G7 Includes: • hydrocortisone, triamcinolone, clobetasol, betamethasone	—
using antiseptic and disinfectant agent	1.QE.35.JA-G8 Includes: • chlorhexadine, hexachlorophene, iodine, cllioquinol, isopropyl alcohol	—
using systemic corticosteroid agent	—	1.QE.35.HA-J2 Includes: • prednisone, dexamethasone, fludrocortisone
using local anesthetic agent	1.QE.35.JA-P1	1.QE.35.HA-P1
using pharmacological agent NEC	1.QE.35.JA-T9	1.QE.35.HA-T9
using drying agent [e.g. air, aluminum salts, starch, powders]	1.QE.35.JA-X3	—
using agent NEC	1.QE.35.JA-Z9	1.QE.35.HA-Z9

1.QE.52.^ ^ Drainage, penis**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Aspiration, penis
 Drainage, corpus cavernosa
 Drainage, glans penis
 Penotomy (for drainage)
 Phallotomy (for drainage)
 Shunt, [distal] glans cavernosa (e.g. Winter shunt, Goulding modification, Al Ghorab shunt)

Excludes: Aspiration for biopsy (see [2.QE.71.^ ^](#))
 Cavernosum-dorsal vein shunt (see [1.QE.76.^ ^](#))
 Cavernosum-saphenous vein shunt (see [1.QE.76.^ ^](#))
 Cavernosum-spongiosum [proximal] shunt (see [1.QE.76.^ ^](#))

1.QE.52.HA using percutaneous (needle) approach
 1.QE.52.LA using open approach

1.QE.53.^ ^ Implantation of internal device, penis**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Implantation, brachytherapy applicator, penis
 Implantation, penile prosthesis
 Intracavernous embedding
 that with implantation of reservoir/pump into scrotum

Excludes: Intracavernous injection therapy (see [1.QE.35.^ ^](#))

Code Also: Any concomitant loading of brachytherapy applicator (see [1.QE.26.^ ^](#))

1.QE.53.HA-EM of brachytherapy applicator using percutaneous approach
 1.QE.53.LA-EM of brachytherapy applicator using open approach
 1.QE.53.LA-PM of semi rigid penile prosthesis using open approach
 1.QE.53.LA-PX of inflatable hydraulic penile prosthesis [e.g. inflatable, automated] using open approach

1.QE.54.^ ^ Management of internal device, penis**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: that for repair and adjustment of prosthesis

Excludes: Installation of agent into device for local pharmacotherapy (see [1.QE.35.^ ^](#))

1.QE.54.LA-PM of semi-rigid penile prosthesis using open approach

1.QE.54.LA-PX of hydraulic penile prosthesis using open approach (e.g. inflatable, automated)

1.QE.55.^ ^ Removal of device, penis**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

1.QE.55.JA-EB of radioactive implant using external approach

1.QE.55.LA-EB of radioactive implant using open approach

1.QE.55.LA-PM of semi rigid penile prosthesis using open approach

1.QE.55.LA-PX of hydraulic penile prosthesis using open approach (e.g. inflatable, automated)

1.QE.56.^ ^ Removal of foreign body, penis**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Excludes: that done per orifice (see [1.PQ.56.^ ^](#))

1.QE.56.JA using external approach (for simple extraction)

Includes: Removal of (tight) penile ring

1.QE.56.LA using open approach

1.QE.58.^ ^ Procurement, penis**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Procurement, glans penis
Procurement, skin of penis
that for construction of neo vagina

1.QE.58.LA using open approach

1.QE.59.^ ^ Destruction, penis**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: that for control of bleeding, skin of penis

Excludes: that for destruction of tissue within urethra (see [1.PQ.59.^ ^](#))

1.QE.59.^ ^ Destruction, penis	external approach	open approach
using chemocautery	1.QE.59.JA-X7	1.QE.59.LA-X7
using cryoprobe	1.QE.59.JA-AD	1.QE.59.LA-AD
using device NEC [e.g. electrocautery]	1.QE.59.JA-GX	1.QE.59.LA-GX
using laser	1.QE.59.JA-AG	1.QE.59.LA-AG

1.QE.72.^ ^ Release, penis**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

- Includes:** Correction of webbed penis
Correction, chordee alone
Lysis of penile adhesions
- Excludes:** Correction chordee with concomitant repair of penis (see [1.QE.80.^^](#))
Release of urethral strictures (see [1.PQ.50.^^](#))

1.QE.72.LA using open approach

1.QE.76.^^ Bypass, penis

- Includes:** Shunt, corpus cavernosa to corpus spongiosum [proximal shunt]
Shunt, corpus cavernosa to vein (dorsal or saphenous)
that for priapism
- Excludes:** Shunt, distal glans-cavernosa (see [1.QE.52.^^](#))

1.QE.76.LA with shunt terminating at corpus spongiosum
1.QE.76.NL with shunt terminating at vein (dorsal or saphenous)

1.QE.78.^^ Repair by decreasing size, penis

- Includes:** Reduction, phallus
that for feminine reconstruction of the perineum
- Note:** this intervention should be coded only if it is performed alone.
- Omit code:** When done at same episode as the rest of a feminine reconstruction.

1.QE.78.LA using open approach

1.QE.80.^^ Repair, penis

S 10

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 10	Optional	Tx Status 5	Status	A	Abandoned after onset
				R	Revision
				S	Staged

Includes: Cavernocavernostomy
Correction, epispadias
Correction, fractured penis
Correction, hypospadias
Glanuloplasty
Nesbit procedure
Repair of penis with correction of chordee
Repair, epispadias
Repair, hypospadias
Suture of penis

Excludes: Repair, chordee (see [1.QE.72.^^](#))
Suture, urethra alone (see [1.PQ.80.^^](#))
that with reconstruction of penis (see [1.QE.84.^^](#))

Code Also: Implantation of penile prosthesis if required (see [1.QE.53.^^](#))

1.QE.80.LA	using open approach without tissue
1.QE.80.LA-XX-A	using open approach and full thickness graft
1.QE.80.LA-XX-B	using open approach and split thickness (skin) autograft
1.QE.80.LA-XX-E	using open approach and local flap
1.QE.80.LA-XX-F	using open approach and free flap
1.QE.80.LA-XX-K	using open approach and homograft
1.QE.80.LA-XX-L	using open approach and xenograft [e.g.porcine]
1.QE.80.LA-XX-N	using open approach and synthetic material
1.QE.80.LA-XX-P	using open approach and cultured tissue (e.g. autologous cells seeded on acellular collagen or polymer-based matrix)

1.QE.82.^^ Reattachment, penis

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Reattachment, amputated penis that with venous and arterial and neural reanastomosis

1.QE.82.LA	without tissue
------------	----------------

1.QE.84.^.^ Construction or reconstruction, penis**S** 10

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 10	Optional	Tx Status 5	Status	A	Abandoned after onset
				R	Revision
				S	Staged

Includes: Metoidioplasty
Reconstruction, micropenis
Repair, microphallus
that for congenital anomalies

Note: Correction of bladder exstrophy may involve increasing penile length, correction of dorsal chordee, reconstruction of the urethra and glans penis and flaps or grafts to achieve adequate skin coverage. Correction of micropenis/microphallus is typically done at a later age and may involve the forearm fasciocutaneous flap technique (or a groin flap) with a neourethra that is attached to the patient's native urethra.

1.QE.84.LA-XX-A using full thickness graft
1.QE.84.LA-XX-B using split thickness graft
1.QE.84.LA-XX-E using local flap
1.QE.84.LA-XX-F using free flap (e.g. forearm fasciocutaneous flap, groin flap)
1.QE.84.LA-XX-G using pedicled (distant) flap (e.g. lower abdominal skin flap)
1.QE.84.LA-XX-P using cultured tissue (e.g. autologous cells seeded on acellular collagen or polymer-based matrix)
1.QE.84.LA-XX-Q using combined sources of tissue

1.QE.87.^.^ Excision partial, penis**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Excision, glans penis
Penectomy partial with phalloplasty
Penectomy, partial
Penile flap excision

Code Also: Any inguinal lymph node dissection (see [1.MJ.^.^](#))

1.QE.87.LA using open approach without tissue
1.QE.87.LA-XX-A using open approach and full thickness graft
1.QE.87.LA-XX-E using open approach and local flap (preputial)
1.QE.87.WJ using degloving technique for skin removal

1.QE.89.^ ^ Excision total, penis**S** 10

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 10	Optional	Tx Status 5	Status	A	Abandoned after onset
				R	Revision
				S	Staged

Includes: Amputation of penis
 Penectomy
 Penectomy with or without repair using transfer of tissue

Code Also: Urethral resection (see [1.PQ.89.^ ^](#))

1.QE.89.LA using open approach

1.QG.^ ^.^ ^ Therapeutic Interventions on the Scrotum

Includes: Dartos tunic
 Scrotal skin
 Spermatic fascia

1.QG.03.^ ^ Immobilization, scrotum

Includes: that with elevation

1.QG.03.JA-TD using external supportive device

1.QG.06.^ ^ Hypothermy, scrotum

Includes: Application of cold, scrotum

1.QG.06.JA-KL using ice pack

1.QG.06.JA-KM using cool/cold compress

1.QG.07.^ ^ Hyperthermy, scrotum

Includes: Application of heat, scrotum

1.QG.07.JA-KH using dry heat [e.g. heating pad, hot pack]

1.QG.07.JA-KJ using warm compress

1.QG.13.^ ^ Control of bleeding, scrotum

Excludes: Application of pressure dressing to the scrotum to control bleeding (see [1.QG.14.^ ^](#))
 Destruction or ablation, skin of scrotum for control of bleeding (see [1.QG.59.^ ^](#))
 Systemic pharmacotherapy for control of bleeding (see [1.ZZ.35.^ ^](#))
 that with surgical repair and suturing (see [1.QG.80.^ ^](#))

1.QG.13.JA-C2	using local application of antihemorrhagic agent
	Includes: aminocaproic acid, aprotinin, phytonadione, thrombin, coagulation factor VIII
1.QG.13.JN	using external manual compression

1.QG.14.^ ^ Dressing, scrotum

Includes: Bandage, wound of scrotum
 Coverage [temporary], skin of scrotum
 Replace [change] dressing, scrotum
 that with debridement, skin of scrotum

1.QG.14.JA-FJ	using occlusive dressing [e.g. hydrocolloid, coal tar, paraffin gauze, hydrogel]
1.QG.14.JA-FN	using wet/moist dressing
1.QG.14.JA-GN	using pressure dressing
1.QG.14.JA-H1	using medicated dressing
1.QG.14.JA-NP	using packing
1.QG.14.JA-T6	using dry dressing
1.QG.14.JA-XX-L	using xenogeneic tissue [e.g. porcine xenograft]
1.QG.14.JA-XX-N	using and synthetic tissue [e.g. Dermabran, Derma Graft]

1.QG.26.^ ^ Brachytherapy, scrotum**S** 35

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 35	Optional	Implant Status	Status	P M	Permanent implant – Radioactive source left in place permanently
				T M	Temporary implant – Radioactive source removed after course of treatment is complete

Includes:	Endocurietherapy, scrotum Implantation of radioactive material, scrotum Interstitial radiation therapy, scrotum
Code Also:	Any concomitant implantation of brachytherapy applicators or conduits [e.g. needles, catheters] to gain access to treatment site (see 1.QG.53.^^)
Note:	There are typically two distinct phases required to complete the process of brachytherapy. The first phase involves the insertion of non-radioactive applicators or conduits [e.g. hollow needles, catheters, stents, etc.] that receive or transmit the radioactive material into the body. The second phase involves the after loading of the radioactive material [e.g. seeds, pellets, wires, etc.] into the applicator or conduit.

1.QG.26.HA	using percutaneous (transcatheter or transneedle) approach
1.QG.26.LA	using open approach

1.QG.27.^^ Radiation, scrotum

Includes:	Teletherapy, scrotum Therapy, radiation [radiotherapy], scrotum
------------------	--

1.QG.27.JA	using external beam
------------	---------------------

1.QG.35.^^ Pharmacotherapy (local), scrotum

Includes:	Application of agent, scrotum Injection, scrotum Instillation, scrotum Irrigation, scrotum
Excludes:	Systemic pharmacotherapy (see 1.ZZ.35.^^) that for control of bleeding (see 1.QG.13.^^)

1.QG.35.^ Pharmacotherapy (local), scrotum	external [topical] application	percutaneous needle [injection] approach
using antiinfective irrigating solution	1.QG.35.JA-D1 Includes: • chlorhexidine, neomycin	—
using salt irrigating solution	1.QG.35.JA-D2 Includes: • sodium chloride	—
using other irrigating solution	1.QG.35.JA-D3 Includes: • sorbitol, mannitol	—
using antifungal agent	1.QG.35.JA-G1 Includes: • nystatin, clotrimazole, miconazole, tolnaftate	—
using emollient and protective agent	1.QG.35.JA-G2 Includes: • silicone, dimethicone, zinc oxide, urea, protectives against UV radiation	—
using wound and ulcer treatment agent	1.QG.35.JA-G3 Includes: • sutilains, collagenase, dextranomer	—
using antipruritic agent	1.QG.35.JA-G4 Includes: • diphenhydramine, lidocaine, benzocaine, crotamiton, calamine	—
using antipsoriatic agent	1.QG.35.JA-G5 Includes: • coal tar preparations, anthralin, methoxsalen)	—
using antibiotic and chemotherapeutic agent	1.QG.35.JA-G6 Includes: • fusidic acid, bacitracin, polymyxin, mupirocin, idoxuridine, acyclovir for topical use	—
using corticosteroid agent	1.QG.35.JA-G7 Includes: • hydrocortisone, triamcinolone, clobetasol, betamethasone	—
using antiseptic and disinfectant agent	1.QG.35.JA-G8 Includes: • chlohexadine, hexachlorophene, iodine, cllioquinol, isopropyl alcohol	—
using corticosteroid agent	—	1.QG.35.HA-J2 Includes: • prednisone, dexamethasone, fludrocortisone, for systemic use
using local anesthetic agent	1.QG.35.JA-P1	1.QG.35.HA-P1
using pharmacological agent NEC	1.QG.35.JA-T9	1.QG.35.HA-T9
using augmentation agent	—	1.QG.35.HA-W1
using drying agent [e.g. air, aluminum salts, starch, powders]	1.QG.35.JA-X3	—
using agent NEC	1.QG.35.JA-Z9	1.QG.35.HA-Z9

1.QG.52.^ ^ Drainage, scrotum**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Aspiration, scrotum (e.g. for cyst, abscess, spermatocele)
 Drainage, hematoma
 Scrototomy for drainage

Excludes: Sclerotherapy of scrotum with aspiration of spermatocele (see [1.QG.59.^ ^](#))

1.QG.52.HA using percutaneous (needle) approach
 1.QG.52.LA using open approach

1.QG.53.^ ^ Implantation of internal device, scrotum**S** 10

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 10	Optional	Tx Status 5	Status	A	Abandoned after onset
				R	Revision
				S	Staged

Includes: Implantation, brachytherapy applicator, scrotum
 Implantation, testicular prosthesis, scrotum
 Reconstruction (following ablative surgery), scrotum with testicular prosthetic implant

Excludes: Implantation of penile prosthesis component (see [1.QE.53.^ ^](#)) or urethral control device (see [1.PQ.53.^ ^](#)) into scrotum

Code Also: Any concomitant loading of brachytherapy applicator (see [1.QG.26.^ ^](#))

1.QG.53.HA-EM of brachytherapy applicator using percutaneous approach
 1.QG.53.LA-EM of brachytherapy applicator using open approach
 1.QG.53.LA-PM of testicular prosthesis using open scrotal approach
 1.QG.53.LB-PM of testicular prosthesis using open inguinal approach

1.QG.54.^ ^ Management of internal device, scrotum**S** 9

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 9	Optional	Tx Status 4	Status	A	Abandoned after onset
				S	Staged

1.QG.54.LA-PM of testicular prosthesis using open scrotal approach
 1.QG.54.LB-PM of testicular prosthesis using open inguinal approach

1.QG.55.^ ^ Removal of device, scrotum**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Excludes: Removal of reservoir/pump for penile prosthesis (see [1.QE.55.^ ^](#))

1.QG.55.JA-EB of radioactive implant using external approach
 1.QG.55.JA-TS of wound drain using external approach
 1.QG.55.LA-EB of radioactive implant using open approach
 1.QG.55.LA-PM of testicular prosthesis using open scrotal approach
 1.QG.55.LB-PM of testicular prosthesis using open inguinal approach

1.QG.56.^ ^ Removal of foreign body, scrotum**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

1.QG.56.JA without incision [manual extraction]
 1.QG.56.LA with scrotal incision

1.QG.58.^.^ Procurement, scrotum**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

1.QM.80.LA-XX-E using open approach and local flap

1.QM.87.^^ Excision partial, testis

S ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Excision, appendix testis
Excision, cyst of Morgagni
Orchidectomy, partial

1.QM.87.LA using open approach

1.QM.89.^ ^ Excision total, testis

S 4 **L** 72

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 72	Mandatory	Bilaterality Mandatory	Location	B	Bilateral
				L	Left
				R	Right
				U	Unilateral unspecified

Includes: Cryptorchidectomy
Gonadectomy
Orchidectomy, intraabdominal, undescended testis
Orchidectomy, total (with or without epididymectomy)
Orchiectomy, simple
Orchiectomy, subepididymal/ subcapsular
Removal, ovotestis
that with excision through distal spermatic cord

Excludes: Orchidectomy with spermatic cord to level of inguinal ring, scrotum or lymph nodes (see [1.QM.91.^ ^](#))
Orchidectomy with spermatic cord, scrotum or lymph nodes (see [1.QM.91.^ ^](#))

Note: May involve concomitant implantation of testicular prosthesis.

1.QM.89.^ ^ Excision total, testis	using scrotal incision	using [laparoscopic] endoscopic [inguinal] approach	using special excisional technique
without scrotal implant	1.QM.89.LA	1.QM.89.DA	1.QM.89.WJ Includes: • Orchidectomy using open inguinal approach Note: • May involve concomitant inguinal hernia repair (if testicle is undescended or atrophic)
with scrotal implant	1.QM.89.LA-PM	1.QM.89.DA-PM	1.QM.89.WJ-PM Includes: • Orchidectomy using open inguinal approach with insertion of scrotal implant Note: • May involve concomitant inguinal hernia repair (if testicle is undescended or atrophic)

1.QM.91.^ ^ Excision radical, testis**S 4 L 2**

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Orchidectomy, radical (with spermatic cord)
Orchiectomy, (radical) inguinal

Note: Radical (inguinal) orchiectomy involves surgical removal of a testis and spermatic cord up to the internal inguinal ring. It may also involve excision of the scrotum or lymph nodes.

1.QM.91.LB	using open abdominal approach
1.QM.91.LB-PM	using open abdominal approach with implantation of testicular prosthesis

1.QN.^^.^^ Therapeutic Interventions on the Vas Deferens**1.QN.51.^^ Occlusion, vas deferens****S** ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Division and ligation, vas deferens
 Segmental vasectomy and ligation
 Transection, vas deferens
 Vasectomy, (for sterilization)
 Vasoligation [ligation] of vas deferens

Excludes: Partial vasectomy for reasons other than sterilization (see [1.QN.87.^^](#))

1.QN.51.LA using open scrotal incision with transection and ligation technique using suture
 1.QN.51.LA-FF using open scrotal incision with transection and ligation technique using clips
 1.QN.51.LB using open inguinal approach with cautery and ligation using suture
 1.QN.51.WK using no scalpel technique

Note: When this technique is used there are usually no sutures required to close the scrotal wound.

1.QN.52.^^ Drainage, vas deferens**S** ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Aspiration, vas deferens (for drainage)
Vasotomy for drainage

Excludes: Aspiration for biopsy (see [2.QN.71.^^](#))

1.QN.52.LA using open approach

1.QN.58.^^ Procurement, vas deferens

S ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Collection sperm, vas deferens
Donation, sperm (by aspiration)
that for ovum fertilization or storage
Vasotomy for procurement of sperm

Excludes: Collection of sperm [electroejaculated] from urethra (see [1.PQ.58.^^](#))
Collection of sperm from epididymis (see [1.QJ.58.^^](#))

1.QN.58.HA using percutaneous (needle) aspiration
1.QN.58.LA using open approach
1.QN.58.RW using open approach with micro aspiration technique

1.QN.76.^^ Bypass, vas deferens

S ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Anastomosis of epididymis to vas deferens
Epididymovasostomy
Vasoepididymostomy

Excludes: that for reversal of vasectomy (sterilization) (see [1.QN.82.^^](#))

1.QN.76.LA using open approach

1.QN.80.^^ Repair, vas deferens

S 5 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Vasorrhaphy

Excludes: that for reversal of vasectomy (sterilization) (see [1.QN.82.^^](#))

1.QN.80.LA using open approach

1.QN.82.^^ Reattachment, vas deferens

S 5 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: that by inguinal or scrotal approach
 Vasectomy reversal
 Vasovasorrhaphy
 Vasovasostomy

Excludes: that done as a part of a repair (see [1.QN.80.^^](#))

1.QN.82.LA using open scrotal approach
 1.QN.82.LB using open inguinal approach

1.QN.83.^^ Transfer, vas deferens

S ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Transposition, vas deferens

1.QN.83.LA using open approach

1.QN.87.^^ Excision partial, vas deferens

S ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Excision of valve
Vasectomy, partial
- Excludes:** Segmental vasectomy and ligation (see [1.QN.51.^^](#))
that done concomitant with excision of epididymis (see [1.QJ.89.^^](#))
that done for sterilization (see [1.QN.51.^^](#))

1.QN.87.LA using open approach

1.QP.^^.^^ Therapeutic Interventions on the Spermatic Cord

- Includes:** Spermatic vein

1.QP.51.^^ Occlusion, spermatic cord

S ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Embolization, spermatic vein (varicocele)
Ligation, spermatic vein (varicocele)
Microsurgical spermatic cord denervation
Varicocelectomy

1.QP.51.DA using endoscopic approach
 1.QP.51.GR-GE using percutaneous transluminal approach and [detachable] coils
 1.QP.51.GR-W0 using percutaneous transluminal approach and synthetic agent [e.g. gelfoam, microspheres, polystyrene, polyvinyl alcohol, contour particles]
 1.QP.51.HA-X7 using percutaneous needle approach and sclerosing agent
 1.QP.51.LA using open approach

1.QP.52.^ ^ Drainage, spermatic cord**S** 5 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Aspiration, spermatic cord**Excludes:** Aspiration biopsy (see [2.QP.71.^ ^](#))

1.QP.52.HA using percutaneous (needle) approach
 1.QP.52.LA using open approach

1.QP.72.^ ^ Release, spermatic cord**S** 4 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Lysis of adhesions, spermatic cord

1.QP.72.LA using open approach

1.QP.73.^ ^ Reduction, spermatic cord**S** 4 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Detorsion of spermatic cord**Excludes:** that with orchiopexy (see [1.QM.74.^ ^](#))

1.QP.73.JH using external approach with manual technique

1.QP.73.LA using open approach

1.QP.87.^ ^ Excision partial, spermatic cord**S** 4 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Excision cord cyst, tumors
Hydrocelectomy, spermatic cord**Omit code:** Excision of lipoma from spermatic cord when concomitant with hernia repair (see [1.SY.80.^ ^](#))

1.QP.87.DA using endoscopic approach

1.QP.87.LA using open scrotal approach

1.QP.87.LB using open inguinal approach

1.QQ.^ ^.^ ^ Therapeutic Interventions on the Seminal Vesicles**Includes:** Ejaculatory duct**Excludes:** Seminal vesicles with prostate (see [1.QT.^ ^.^ ^](#))

1.QQ.52.^ ^ Drainage, seminal vesicles**S** 4 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Seminal vesiculotomy for drainage
Spermatocystotomy

1.QQ.52.BA using endoscopic per orifice [transurethral] approach
 1.QQ.52.BP using transrectal needle aspiration technique
 1.QQ.52.HA using percutaneous (needle) approach
 1.QQ.52.LA using open approach

1.QQ.87.^ ^ Excision partial, seminal vesicles**S** 4 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Excision of Mullerian duct (cyst)

1.QQ.87.FF using endoscopic transrectal [anal] approach
 1.QQ.87.PB using perineal approach

1.QQ.89.^ ^ Excision total, seminal vesicles**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Vesiculectomy

1.QQ.89.FF using endoscopic transrectal [anal] approach
 1.QQ.89.PB using perineal approach

1.QT.^ ^.^ Therapeutic Interventions on the Prostate**1.QT.13.^ ^ Control of bleeding, prostate****Includes:** Hemostatic electrocoagulation for hemorrhage**Excludes:** Radiation for control of bleeding (see [1.QT.27.^ ^](#))

1.QT.13.^ ^ Control of bleeding, prostate	using endoscopic per orifice approach	using open [transvesical] approach
and device NEC [e.g. electrocoagulation]	1.QT.13.BA-GX	1.QT.13.QZ-GX
and antihemorrhagic agent	1.QT.13.BA-C2	1.QT.13.QZ-C2
and agent NEC [e.g. silver nitrate]	1.QT.13.BA-Z9	1.QT.13.QZ-Z9
and laser	1.QT.13.BA-AG	1.QT.13.QZ-AG

1.QT.26.^ ^ Brachytherapy, prostate**S** ³⁵

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 35	Optional	Implant Status	Status	P M	Permanent implant – Radioactive source left in place permanently
				T M	Temporary implant – Radioactive source removed after course of treatment is complete

Includes: Endocurietherapy, prostate
 Implantation of radioactive material, prostate
 Interstitial radiation therapy, prostate

Code Also: Any concomitant implantation of brachytherapy applicators or conduits [e.g. needles, catheters] if applicable (see [1.QT.53.^^](#))

Note: There are typically two distinct phases required to complete the process of brachytherapy. The first phase involves the insertion of non-radioactive applicators or conduits [e.g. hollow needles, catheters, stents, etc.] that receive or transmit the radioactive material into the body. The second phase involves the after loading of the radioactive material [e.g. seeds, pellets, wires, etc.] into the applicator or conduit.

1.QT.26.HA	using percutaneous (transcatheter or transneedle) approach
1.QT.26.LA	using open approach

1.QT.27.^^ Radiation, prostate

Includes: Teletherapy, prostate
 Therapy, radiation (radiotherapy), prostate

1.QT.27.JA	using external beam
1.QT.27.JX	using focused beam [e.g. gamma knife, cyber knife stereotactic radiosurgery]

1.QT.35.^^ Pharmacotherapy, prostate

1.QT.35.BA-K8	using endoscopic per orifice approach and antibacterial agent
1.QT.35.BA-L7	using endoscopic per orifice approach and bacterial toxin (e.g. botulinum toxin or Botox)
1.QT.35.HA-L7	using percutaneous injection and bacterial toxin (e.g. botulinum toxin or Botox)

1.QT.50.^^ Dilation, prostate**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Dilation with incision, prostate
 that with insertion of stent
 Transurethral balloon dilation [TUBD]
 Transurethral incision of prostate [TUIP]

1.QT.50.BA-BC	using endoscopic per orifice approach and balloon dilator
1.QT.50.BA-BP	using endoscopic per orifice approach and rigid dilator
1.QT.50.BT-AG	using endoscopic per orifice approach with incisional technique and laser
1.QT.50.BT-GX	using endoscopic per orifice approach with incisional technique and device NEC

1.QT.52.^ ^ Drainage, prostate**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Prostatotomy for drainage

1.QT.52.BA using endoscopic per orifice approach
 1.QT.52.CA using per orifice [transrectal] approach
 1.QT.52.HA using percutaneous (needle) approach
 1.QT.52.LA using open approach
 1.QT.52.PB using open perineal approach

1.QT.53.^ ^ Implantation of internal device, prostate**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Implantation, brachytherapy applicator, prostate
 Implantation, thermal rods

Code Also: Any concomitant ablation of the prostate via external activation of thermal rod (see [1.QT.59.^ ^](#))
 Any concomitant loading of brachytherapy applicator (see [1.QT.26.^ ^](#))

1.QT.53.HA-EA of thermal heat rods using percutaneous [transperineal] approach
 1.QT.53.HA-EM of brachytherapy applicator using percutaneous approach
 1.QT.53.LA-EM of brachytherapy applicator using open approach

1.QT.55.^ ^ Removal of device, prostate**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

1.QT.55.JA-EB of radioactive implant using external approach
 1.QT.55.LA-EA of thermal rods using open approach
 1.QT.55.LA-EB of radioactive implant using open approach

1.QT.57.^ ^ Extraction, prostate**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Prostatolithotomy
Removal of calculi, prostate

1.QT.57.BA-AM using endoscopic per orifice approach and basket device

1.QT.59.^ ^ Destruction, prostate**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Cryoablation, prostate
Cryoprostatectomy
Destruction, prostatic bed
Fulguration, [ablation] prostate
Thermoablation
Thermotherapy, prostate

Excludes: that done with excisional prostatectomy (see [1.QT.87.^ ^](#))
that done with stent or balloon (see [1.QT.50.^ ^](#))

1.QT.59.^ Destruction, prostate	endoscopic per orifice approach [e.g. transurethral]	percutaneous [transperineal] approach	external approach	per orifice [transrectal] approach
using cryosurgery	1.QT.59.BA-AD	1.QT.59.HA-AD	—	—
using device NEC	1.QT.59.BA-GX Includes: <ul style="list-style-type: none"> Bipolar electrovaporization [plasmakinetic surgery with Gyrus system] Electrocautery Electrovaporization [TVP, TUEVAP, TUVF] Evaporization [TUEP] Rollerball diathermy Water induced thermotherapy [WITT] 	—	—	—
using laser (with or without photosensitizing agent)	1.QT.59.BA-AG Includes: <ul style="list-style-type: none"> Contact laser ablation [CLAP] Holmium laser ablation [HoLAP] Hybrid laser Interstitial laser coagulation [ILCP] Laser interstitial thermal therapy [LITT] Photodynamic therapy [PDT] with laser ablation Photovaporization [PVP] Potassium titanyl phosphate [KTP] laser PVP prostatectomy Transurethral ultrasound guided laser induced prostatectomy [TULIP] Visual laser ablation [non contact laser] [VLAP] 	1.QT.59.HA-AG Includes: <ul style="list-style-type: none"> Laser interstitial thermal therapy [LITT] Photodynamic therapy (PDT) with laser ablation Transperineal laser ablation [TLAP] 	—	—
using microwave device	1.QT.59.BA-CG Includes: <ul style="list-style-type: none"> Interstitial microwave thermoablation [IMTP] Transurethral microwave thermoablation [TUMT] 	1.QT.59.HA-CG Includes: <ul style="list-style-type: none"> Interstitial microwave thermoablation [IMTP] 	—	1.QT.59.CA-CG Includes: <ul style="list-style-type: none"> Interstitial microwave thermoablation [IMTP]
using radiofrequency	1.QT.59.BA-AW Includes: <ul style="list-style-type: none"> Radiofrequency interstitial thermoablation [RITA] Transurethral needle ablation [TUNA] 	1.QT.59.HA-AW Includes: <ul style="list-style-type: none"> Transperineal radiofrequency ablation [TRAP] 	—	—

using laser	1.QT.87.BA-AG Includes: • Holmium laser enucleation of the prostate (HoLEP)	—	1.QT.87.QZ-AG Includes: • Holmium laser enucleation of the prostate (HoLEP)	—	—
using loop electrode	1.QT.87.BA-AK	—	—	—	—

1.QT.91.^ ^ Excision radical, prostate**S** 16

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 16	Optional	Tx Status 10	Status	A	Abandoned after onset
				C	Converted (from endoscopic to open approach)

- Includes:** Prostatectomy, radical
Prostatovesiculectomy
Radical nerve-sparing prostatectomy
- Excludes:** Cystoprostatectomy (see [1.PM.91.^^](#))
Prostatectomy with (sub)total bladder resection (see [1.PM.91.^^](#))
- Code Also:** Any concomitant orchidectomy (see [1.QM.89.^^](#))
Any robotic assisted telemanipulation of tools (see [7.SF.14.^^](#))
- Note:** Radical prostatectomy includes removal of the prostate with its capsule along with adjacent tissue such as: seminal vesicles, ductus deferens, pelvic fascia, pelvic lymph nodes.

1.QT.91.DA	using endoscopic (laparoscopic) approach
1.QT.91.PB	using open perineal approach
1.QT.91.PK	using open retropubic approach

1.QZ.^^.^^ Therapeutic Interventions on the Male Genital Tract NEC

- Includes:** Male genital tract NOS

1.QZ.89.^^ Excision total, male genital tract NEC

S 10

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 10	Optional	Tx Status 5	Status	A	Abandoned after onset
				R	Revision
				S	Staged

- Includes:** Excision (staged), male genitalia (for sex change to female)
Excision, (pseudo)male genitalia (e.g. for correction of hermaphroditism)

1.QZ.89.LA	using open approach
1.QZ.89.LA-XX-A	using open approach and skin autograft
1.QZ.89.LA-XX-E	using open approach and local (skin transposition) flap

1.QZ.94.^^ Therapeutic intervention NEC, male genital tract NEC

1.QZ.94.BA	using endoscopic per orifice approach
1.QZ.94.DA	using endoscopic (laparoscopic) approach
1.QZ.94.HA	using percutaneous (needle) approach
1.QZ.94.LA	using open approach

Therapeutic Interventions on the Female Genital Organs (1RB - 1RZ)

1.RB.^.^ Therapeutic Interventions on the Ovary

Includes: Ligaments of ovary
Ovary, NOS

1.RB.27.^.^ Radiation, ovary

Includes: Teletherapy, ovary
that with or without fallopian tube
Therapy, radiation [radiotherapy], ovary

Excludes: Radiation therapy to fallopian tube alone (see [1.RF.27.^.](#))

1.RB.27.JA	using external beam
1.RB.27.JX	using focused beam [e.g. gamma knife, cyber knife stereotactic radiosurgery]

1.RB.52.^.^ Drainage, ovary

S ⁴ **L** ²

L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Aspiration, ovum
 Procurement of oocyte [ovum] (for in vivo or in vitro fertilization)
 Removal of oocyte [gamete, zygote] or embryo for transfer [in vitro fertilization and embryo transfer IVT ET] or transplant [donation]
 Retrieval oocyte, by follicle puncture

Excludes: Harvest, ovary (see [1.RB.58.^ ^](#))

Code Also: Transfer of autologous embryo to uterus (see [1.RM.83.^ ^](#))
 Transplant of homologous embryo to uterus (see [1.RM.83.^ ^](#))

1.RB.57.BA using endoscopic per orifice [transvaginal] approach
 1.RB.57.CQ using per orifice (transvaginal) approach with needle aspiration
 1.RB.57.DA using endoscopic [laparoscopic] approach
 1.RB.57.HA using percutaneous (needle) approach
 1.RB.57.LA using open approach

1.RB.58.^ ^ Procurement, ovary**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Harvest, ovary
that for autologous transfer or homologous transplant

Excludes: Procurement of ovum from ovary (see [1.RB.57.^ ^](#))

1.RB.58.DA	using endoscopic (laparoscopic) approach
1.RB.58.LA	using open approach

1.RB.59.^ ^ Destruction, ovary**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Denervation of ovary [nerve destruction]
Drilling, ovary

Excludes: that for release of ovarian adhesions (see [1.RD.72.^ ^](#))

1.RB.59.^ ^ Destruction, ovary	endoscopic [laparoscopic] approach	open approach
using device NEC (e.g. electrocautery or electrocoagulation)	1.RB.59.DA-GX	1.RB.59.LA-GX
using laser	1.RB.59.DA-AG	1.RB.59.LA-AG

1.RB.74.^ Fixation, ovary**S** 5 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Oophoropexy
Suspension, ovary

1.RB.74.DA using endoscopic (laparoscopic) approach
1.RB.74.LA using open approach

1.RB.80.^ Repair, ovary**S** 5 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description

L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Autotransplantation, ovary
 Reimplantation, ovary
 Transposition [reimplantation], ovary

Excludes: Transplant of homologous ovary (see [1.RB.85.^](#))

1.RB.83.DA using endoscopic [laparoscopic] approach

1.RB.83.LA using open approach

1.RB.85.^ Transplant, ovary**S** 4 **L** 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Homotransplantation, ovary

Excludes: Transplantation of autologous ovary (see [1.RB.83.^](#))

1.RB.85.DA using endoscopic (laparoscopic) approach

1.RB.85.LA using open approach

1.RB.87.^ Excision partial, ovary**S** 16 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 16	Optional	Tx Status 10	Status	A	Abandoned after onset
				C	Converted (from endoscopic to open approach)
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Cystectomy, ovary
 Debulking, ovary
 Decortication [capsulectomy] ovary
 Oophorectomy, partial
 Oophorocystectomy [ovarian cystectomy] [enucleation of cyst]
 Removal, adnexal (ovarian) structures
 Wedge resection, ovary

Code Also: Any concomitant hysterectomy (see [1.RM.89.^](#))
 Any concomitant lysis of pelvic adhesions (see [1.OT.72.^](#))

1.RB.87.DA using endoscopic (laparoscopic) approach
 1.RB.87.LA using open approach
 1.RB.87.RA using open vaginal approach

1.RB.89.^ Excision total, ovary**S** 16 **L** 72

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 16	Optional	Tx Status 10	Status	A	Abandoned after onset
				C	Converted (from endoscopic to open approach)
L 72	Mandatory	Bilaterality Mandatory	Location	B	Bilateral
				L	Left
				R	Right
				U	Unilateral unspecified

Includes: Oophorectomy
Removal, remaining ovary

Excludes: excision of ovary with fallopian tubes (see [1.RD.89.^^](#))

Code Also: Any concomitant hysterectomy (see [1.RM.89.^^](#))

1.RB.89.DA using endoscopic (laparoscopic) approach
1.RB.89.LA using open approach
1.RB.89.RA using open vaginal approach

1.RD.^^.^^ Therapeutic Interventions on the Ovary with Fallopian Tube

1.RD.52.^^ Drainage, ovary with fallopian tube

S 16 **L** 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 16	Optional	Tx Status 10	Status	A	Abandoned after onset
				C	Converted (from endoscopic to open approach)
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Salpingo oophorotomy
Salpingooophorotomy

Excludes: Drainage, fallopian tube alone (see [1.RF.52.^^](#))
Drainage, ovary alone (see [1.RB.52.^^](#))

1.RD.52.BA using endoscopic per orifice approach [transvaginal]
1.RD.52.DA using endoscopic [laparoscopic] approach
1.RD.52.LA using open approach

1.RD.72.^ ^ Release, ovary with fallopian tube**S** 15 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 15	Optional	Tx Status 9	Status	A	Abandoned after onset
				C	Converted (from endoscopic to open approach)
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Adhesiolysis, tubal
 Detorsion, ovary
 Fimbriolysis
 Lysis of adhesions, ovary and fallopian tube
 Ovariolysis
 Salpingolysis

Excludes: that with lysis of other abdominal or pelvic organs (see [1.OT.72.^ ^](#))

1.RD.72.DA-AG using endoscopic [laparoscopic] approach and laser NEC
 1.RD.72.DA-GX using endoscopic [laparoscopic] approach and device NEC (e.g. electrocautery, electrocoagulation)
 1.RD.72.LA-AG using open approach and laser NEC
 1.RD.72.LA-GX using open approach and device NEC (e.g. electrocautery, electrocoagulation)

1.RD.89.^ ^ Excision total, ovary with fallopian tube**S** 16 **L** 72

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 16	Optional	Tx Status 10	Status	A	Abandoned after onset
				C	Converted (from endoscopic to open approach)
L 72	Mandatory	Bilaterality Mandatory	Location	B	Bilateral

				R	Right
				U	Unilateral unspecified

Includes: Salpingoophorectomy (bilateral)(unilateral)
Excludes: that for removal of ectopic pregnancy (see [5.CA.93.^](#))
Code Also: Any concomitant hysterectomy (see [1.RM.89.^](#))
 Any robotic assisted telemanipulation of tools (see [7.SF.14.^](#))

1.RD.89.DA using endoscopic [laparoscopic] approach
 1.RD.89.LA using open approach
 1.RD.89.RA using open vaginal approach

1.RF.^.^ Therapeutic Interventions on the Fallopian Tube

Includes: Fallopian tube
 Fimbria of fallopian tube
 Hydadiid of Morgagni

1.RF.27.^ Radiation, fallopian tube

Includes: Teletherapy, fallopian tube
 Therapy, radiation [radiotherapy], fallopian tube
Excludes: that with ovary (see [1.RB.27.^](#))

1.RF.27.JA using external beam

1.RF.50.^ Dilation, fallopian tube

S ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: that for treatment of stricture
 that to maintain patency
Code Also: Any concomitant lysis of pelvic adhesions (see [1.OT.72.^](#))

1.RF.50.^ Dilatation, fallopian tube	endoscopic per orifice approach	endoscopic [laparoscopic] approach	open approach
using device NEC	1.RF.50.BA-GX	1.RF.50.DA-GX	1.RF.50.LA-GX
using flexible dilator [e.g. catheter, Teflon cannula]	1.RF.50.BA-BJ	1.RF.50.DA-BJ	1.RF.50.LA-BJ
using insertion of tube/stent	1.RF.50.BA-NR	1.RF.50.DA-NR	1.RF.50.LA-NR
using insertion of hood [e.g. Mulligan, Rock]	1.RF.50.BA-KR	1.RF.50.DA-KR	1.RF.50.LA-KR

1.RF.51.^ Occlusion, fallopian tube**S** 15 **L** 72

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 15	Optional	Tx Status 9	Status	A	Abandoned after onset
				C	Converted (from endoscopic to open approach)
				R	Revision
L 72	Mandatory	Bilaterality Mandatory	Location	B	Bilateral
				L	Left
				R	Right
				U	Unilateral unspecified

Includes:

- Ligation (and division), fallopian tube (for sterilization)
- Ligation (with crushing or destruction), fallopian tube
- Ligation (with segmental resection), fallopian tube

1.RF.51.^ Occlusion, fallopian tube	endoscopic [laparoscopic] approach	endoscopic vaginal [culdoscopy, hysteroscopy] approach	open approach
using band [ring]	1.RF.51.DA-FA	1.RF.51.FJ-FA	1.RF.51.LA-FA
using bipolar electrode	1.RF.51.DA-AL	1.RF.51.FJ-AL	1.RF.51.LA-AL
using clips [e.g. plastic]	1.RF.51.DA-FF	1.RF.51.FJ-FF	1.RF.51.LA-FF
using ligature (and transection or resection)	1.RF.51.DA-LV	1.RF.51.FJ-LV	1.RF.51.LA-LV
using coil [e.g. micro-insert]	—	1.RF.51.FJ-GE	—

1.RF.52.^ ^ Drainage, fallopian tube**S** 5 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Aspiration, fallopian tube (for drainage)
Salpingotomy (for drainage)

Excludes: Aspiration biopsy, fallopian tube (see [2.RF.71.^ ^](#))
Drainage, tubo ovarian (see [1.RD.52.^ ^](#))
Salpingotomy for removal of ectopic pregnancy (see [5.CA.93.^ ^](#))

1.RF.52.BA using endoscopic per orifice [transvaginal]
1.RF.52.DA using endoscopic (laparoscopic) approach
1.RF.52.HA using percutaneous (needle) aspiration
1.RF.52.LA using open approach

1.RF.55.^ ^ Removal of device, fallopian tube**S** 4 **L** 2

				S	Unilateral (unspecified if right or left)

1.RF.55.^ ^ Removal of device, fallopian tube	endoscopic [laparoscopic] approach	endoscopic per orifice approach [e.g. transvaginal]	open approach
of hood [e.g. Mulligan, Rock]	1.RF.55.DA-KR	1.RF.55.BA-KR	1.RF.55.LA-KR
of stent	1.RF.55.DA-NR	1.RF.55.BA-NR	1.RF.55.LA-NR
of tube [prosthesis] [e.g. silastic]	1.RF.55.DA-PM	1.RF.55.BA-PM	1.RF.55.LA-PM
of closure device [e.g. clip]	1.RF.55.DA-FF	—	1.RF.55.LA-FF

1.RF.56.^ ^ Removal of foreign body, fallopian tube**S** 4 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Salpingotomy for removal of foreign body**Excludes:** Salpingotomy for removal of ectopic pregnancy (see [5.CA.93.^ ^](#))

1.RF.56.DA using endoscopic (laparoscopic) approach

1.RF.56.LA using open approach

1.RF.59.^ ^ Destruction, fallopian tube**S** 4 **L** 72

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 72	Mandatory	Bilaterality Mandatory	Location	B	Bilateral
				L	Left
				R	Right
				U	Unilateral unspecified

Excludes: that for release of adhesions (see [1.RD.72.^ ^](#))
that for sterilization (see [1.RF.51.^ ^](#))

1.RF.59.^ ^ Destruction, fallopian tube	endoscopic [percutaneous] approach	endoscopic per orifice approach [e.g. transvaginal]	open approach
using device NEC [e.g. electrocoagulation]	1.RF.59.DA-GX	1.RF.59.BA-GX	1.RF.59.LA-GX
using laser	1.RF.59.DA-AG	1.RF.59.BA-AG	1.RF.59.LA-AG

1.RF.72.^ ^ Release, fallopian tube**S** ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Adhesiolysis, tubal [Lysis, tubal adhesions]
 Fimbriolysis
 Freeing of adhesions of fallopian tube (only)
 Salpingolysis

Excludes: Destruction of intra-luminous strictures (see [1.RF.59.^ ^](#))
 Detorsion ovary with fallopian tube (see [1.RD.72.^ ^](#))
 that with lysis of other abdominal or pelvic organs (see [1.OT.72.^ ^](#))

1.RF.72.^ ^ Release, fallopian tube	endoscopic [percutaneous] approach	open approach
using device NEC [e.g. electrocautery]	1.RF.72.DA-GX	1.RF.72.LA-GX
using laser	1.RF.72.DA-AG	1.RF.72.LA-AG

1.RF.74.^ ^ Fixation, fallopian tube**S** ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Salpingopexy

1.RF.74.DA using endoscopic (laparoscopic) approach
 1.RF.74.LA using open approach

1.RF.80.^ Repair, fallopian tube**S** 5 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Correction, fistula (simple), fallopian tube
 Fimbrioplasty
 Salpingoneostomy
 Salpingoplasty
 Salpingorrhaphy
 Salpingosalpingostomy
 Salpingostomy for repair of blocked/occluded fallopian tube
 Suture, fallopian tube
 Tuboplasty, fallopian

Excludes: Reattachment, divided tube for reversal of sterilization (see [1.RF.82.^](#))
 Salpingostomy for removal of ectopic pregnancy (see [5.CA.93.^](#))
 Simple dilation of fallopian tube for improved patency (see [1.RF.50.^](#))
 that with excision of diseased (or occluded) portion of fallopian tube (see [1.RF.87.^](#))

Code Also: Any intraoperative microscope assistance (see [3.RZ.94.^](#))
 Any lysis of tubo ovarian adhesions (see [1.RD.72.^](#))

1.RF.80.DA using endoscopic [laparoscopic] approach
 1.RF.80.DA-PM using endoscopic [laparoscopic] approach and tubal prosthesis
 1.RF.80.FJ-XX-A using endoscopic trans vaginal approach and full thickness graft
 1.RF.80.LA using open approach
 1.RF.80.LA-PM using open approach and tubal prosthesis

1.RF.82.^ ^ Reattachment, fallopian tube**S** 16 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 16	Optional	Tx Status 10	Status	A	Abandoned after onset
				C	Converted (from endoscopic to open approach)
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Reattachment, divided tube for reversal of sterilization
that with ampullary salpingostomy
that with trimming (partial excision) of fallopian tube in preparation for reanastomosis
that with tubotubal anastomosis
that with tubouterine implantation

Excludes: Anastomosis done as part of a repair (see [1.RF.80.^ ^](#))

Code Also: Any removal of closure device, fallopian tube (see [1.RF.55.^ ^](#))
Any robotic assisted telemanipulation of tools (see [7.SF.14.^ ^](#))

1.RF.82.DA using endoscopic (laparoscopic) approach
1.RF.82.LA using open approach
1.RF.82.RA using open vaginal approach

1.RF.83.^ ^ Transfer, fallopian tube**S** 4 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Gamete intrafallopian transfer [GIFT]

1.RF.83.DA-XX-A using endoscopic [laparoscopic] approach and autograft (of oocytes)

1.RF.87.^ ^ Excision partial, fallopian tube**S** 16 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 16	Optional	Tx Status 10	Status	A	Abandoned after onset
				C	Converted (from endoscopic to open approach)
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Excision, hydatid of Morgani
 Fimbriectomy, fallopian tube
 Resection cornual, fallopian tube
 Salpingectomy, partial [segmental]
 that with reanastomosis or reattachment to uterus
 that with tubocornual anastomosis (following tubal transection for proximal tubal disease)
 Transection, fallopian tube

Excludes: Reattachment, divided tube for reversal of sterilization (see [1.RF.82.^ ^](#))
 Segmental tubal excision with ligation for sterilization (see [1.RF.51.^ ^](#))
 that with removal of ectopic pregnancy (see [5.CA.93.^ ^](#))

1.RF.87.DA using endoscopic (laparoscopic) approach
 1.RF.87.LA using open approach
 1.RF.87.RA using open vaginal approach

1.RF.89.^ ^ Excision total, fallopian tube**S** 16 **L** 72

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 16	Optional	Tx Status 10	Status	A	Abandoned after onset
				C	Converted (from endoscopic to open approach)
L 72	Mandatory	Bilaterality Mandatory	Location	B	Bilateral
				L	Left
				R	Right
				U	Unilateral unspecified

Includes: Removal of solitary tube
Salpingectomy NOS

Excludes: that with removal of ectopic pregnancy (see [5.CA.93.^^](#))
that with simultaneous excision of ovary (see [1.RD.89.^^](#))

1.RF.89.DA using endoscopic (laparoscopic) approach
1.RF.89.LA using open approach
1.RF.89.RA using open vaginal approach

1.RM.^^.^^ Therapeutic Interventions on the Uterus and Surrounding Structures

Includes: Body of uterus
Cervix with body of uterus
Endometrium
Uterine ligaments (cardinal, broad, round, uterosacral)
Uterus NOS

Excludes: Cervix alone (see [1.RN.^^.^^](#))

1.RM.13.^^ Control of bleeding, uterus and surrounding structures

E 53

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 53	Mandatory	Mandatory Coils	Extent	0	Not applicable (no coil used)
				01	One coil
				02	Two coils
				03	Three coils
				04	Four coils
				05	Five coils
				06	Six coils
				07	Seven coils
				08	Eight coils
				09	Nine coils
				10	Ten coils
				G	More than ten coils (11 - 20)
				H	More than twenty coils
				U	Unspecified

- Includes:** Embolization (transarterial), uterus (for postpartum hemorrhage)
Packing, uterus
Tamponade, uterus
that for shrinkage of uterine fibroids
- Excludes:** packing, uterus for postpartum hemorrhage (see [5.PC.91.^^](#))
systemic pharmacotherapy for control of bleeding (see [1.ZZ.35.^^](#))
tamponade, uterus for postpartum hemorrhage (see [5.PC.91.^^](#))
that done by curettage (see [1.RM.87.^^](#))
that done by destruction or ablation of endometrium (see [1.RM.59.^^](#))
that done by ligation of the uterine artery or pelvic vessels (see [1.KT.51.^^](#))

- 1.RM.13.CA-BC using per orifice approach and balloon
Excludes: that for control of postpartum hemorrhage (see [5.PC.91.^^](#))
- 1.RM.13.CA-EP using per orifice approach and bag
Excludes: that for control of postpartum hemorrhage (see [5.PC.91.^^](#))
- 1.RM.13.CA-NP using per orifice approach and packing
Excludes: that for control of postpartum hemorrhage (see [5.PC.91.^^](#))
- 1.RM.13.GQ-C2 using percutaneous transluminal (transarterial) approach and antihemorrhagic agent
Includes: aminocaproic acid, aprotinin, phytonadione, thrombin, coagulation factor VIII
- 1.RM.13.GQ-GE using percutaneous (transarterial) approach and [detachable] coils
- 1.RM.13.GQ-W0 using percutaneous (transarterial) approach and synthetic agent [e.g. gelfoam, microspheres, polystyrene, polyvinyl alcohol, contour particles]

1.RM.26.^^ Brachytherapy, uterus and surrounding structures

S 35

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 35	Optional	Implant Status	Status	P M	Permanent implant – Radioactive source left in place permanently
				T M	Temporary implant – Radioactive source removed after course of treatment is complete

Includes:	Endocurietherapy, uterus Implantation of radioactive material, uterus Interstitial radiation therapy, uterus Intracavitary radiation therapy, uterus
Code Also:	Any concomitant implantation of brachytherapy applicators or conduits [e.g. needles, catheters] if applicable (see 1.RM.53.^^)
Note:	There are typically two distinct phases required to complete the process of brachytherapy. The first phase involves the insertion of non-radioactive applicators or conduits [e.g. hollow needles, catheters, stents, etc.] that receive or transmit the radioactive material into the body. The second phase involves the after loading of the radioactive material [e.g. seeds, pellets, wires, etc.] into the applicator or conduit.
1.RM.26.BA	using endoscopic per orifice (hysteroscopic) approach
1.RM.26.CA	using per orifice (vaginal) approach
1.RM.26.DA	using endoscopic (laparoscopic) approach
1.RM.26.HA	using percutaneous (transcatheter or transneedle) approach
1.RM.26.LA	using open approach

1.RM.27.^^ Radiation, uterus and surrounding structures

Includes:	Teletherapy, uterus and surrounding structures Therapy, radiation [radiotherapy], uterus and surrounding structures
1.RM.27.JA	using external beam
1.RM.27.JX	using focused beam [e.g. gamma knife, cyber knife stereotactic radiosurgery]

1.RM.35.^^ Pharmacotherapy (local), uterus and surrounding structures

Includes:	Injection, uterus Instillation, uterus Irrigation, uterus and surrounding structures
Excludes:	Irrigation with drainage (see 1.RM.52.^^) Systemic pharmacotherapy (see 1.ZZ.35.^^) that for control of bleeding (see 1.RM.13.^^) that for radiography (see Section 3)

1.RM.35.^ ^ Pharmacotherapy (local), uterus and surrounding structures	per orifice approach [vaginal]	percutaneous [needle] approach
using blood related products	1.RM.35.CA-C5 Includes: • albumin, dextran, hetastarch	1.RM.35.HA-C5 Includes: • albumin, dextran, hetastarch
using antiinfective irrigating solution	1.RM.35.CA-D1 Includes: • chlorhexidine, neomycin	—
using salt irrigating solution	1.RM.35.CA-D2 Includes: • sodium chloride	—
using other irrigating solution	1.RM.35.CA-D3 Includes: • sorbitol, mannitol	—
using antiinfective and antiseptic agent	1.RM.35.CA-I1 Includes: • nystatin, metronidazole, clotrimazole, povidone iodine	1.RM.35.HA-I1 Includes: • nystatin, metronidazole, clotrimazole, povidone iodine
using uterotonic agent	1.RM.35.CA-I2 Includes: • oxytocin, ergometrine, dinoprostone	1.RM.35.HA-I2 Includes: • oxytocin, ergometrine, dinoprostone
using pharmacological agent NEC	1.RM.35.CA-T9	1.RM.35.HA-T9

1.RM.52.^ ^ Drainage, uterus and surrounding structures**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Aspiration, uterus (for drainage of cyst)
 Hysteromyotomy (for drainage)
 Hysterotomy (for drainage)
 That or without irrigation

Excludes: Aspiration biopsy (see [2.RM.71.^ ^](#))
 that using aspiration curettage (see [1.RM.87.^ ^](#))

1.RM.52.BA	using endoscopic per orifice (hysteroscopic) approach
1.RM.52.DA	using endoscopic (laparoscopic) approach
1.RM.52.HA	using percutaneous (needle) aspiration
1.RM.52.LA	using open approach

1.RM.53.^ ^ Implantation of internal device, uterus and surrounding structures**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Implantation, brachytherapy applicator, uterus
 Insertion of device, uterus
 Reinsertion [replacement] of device, uterus

Excludes: Insertion of compression device or material for control of bleeding (see [1.RM.13.^ ^](#))

Code Also: Any concomitant loading of brachytherapy applicator (see [1.RM.26.^ ^](#))

1.RM.53.BA-EM	of brachytherapy applicator using endoscopic per orifice (hysteroscopic) approach
1.RM.53.CA-BH	of intrauterine contraceptive device [IUD] using per orifice approach
1.RM.53.CA-EM	of brachytherapy applicator using per orifice (vaginal) approach
1.RM.53.DA-EM	of brachytherapy applicator using endoscopic (laparoscopic) approach
1.RM.53.HA-EM	of brachytherapy applicator using percutaneous approach
1.RM.53.LA-EM	of brachytherapy applicator using open approach

1.RM.55.^ ^ Removal of device, uterus and surrounding structures**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Excludes: Removal of errant IUD, pelvic cavity (see [1.OT.56.^ ^](#))
 Removal of Shirodkar suture (see [5.LD.25.^ ^](#))

1.RM.55.^ ^ Removal of device, uterus and surrounding structures	per orifice approach	endoscopic per orifice approach [hysteroscopic]	endoscopic [laparoscopic] approach	open approach	external approach
of intrauterine contraceptive device [IUD]	1.RM.55.CA-BH	1.RM.55.BA-BH	1.RM.55.DA-BH	1.RM.55.LA-BH	—
of hemostatic device [e.g. packing]	1.RM.55.CA-NP	—	—	1.RM.55.LA-NP	—
of radioactive implants	1.RM.55.CA-EB	1.RM.55.BA-EB	1.RM.55.DA-EB	1.RM.55.LA-EB	1.RM.55.JA-EB

1.RM.56.^ ^ Removal of foreign body, uterus and surrounding structures**S** ⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Hysterotomy for removal of foreign body

Excludes: Removal of IUD (see [1.RM.55.^ ^](#))

1.RM.56.BA using endoscopic per orifice (hysteroscopic) approach
 1.RM.56.CA using per orifice approach
 1.RM.56.DA using endoscopic (laparoscopic) approach
 1.RM.56.LA using open approach

1.RM.57.^ ^ Extraction, uterus and surrounding structures**S** ⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Removal, menstrual material

Excludes: Extraction of hydatidiform mole (see [5.CA.89.^ ^](#))
 that related to retained products of conception within 6 weeks following delivery or abortion (see [5.PC.91.^ ^](#))
 that related to the state of pregnancy (see [5.CA.89.^ ^](#))
 that with curettage (see [1.RM.87.^ ^](#))
 that with positive Hcg test (see [5.CA.89.^ ^](#))

1.RM.57.CA-GX using per orifice approach and device NEC
 1.RM.57.CA-TK using per orifice approach and suction device

1.RM.59.^ ^ Destruction, uterus and surrounding structures**S** 5 **L** 85

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 85	Optional	Uterus 3	Location	A T	Aberrant tissue
				B D	Body
				E N	Endometrium
				M	Multiple sites
				U	Unspecified
				U L	Uterine ligaments

Includes: Ablation, uterus or endometrium
Clearance, intra luminous tissue, uterus
Destruction, endometrial tissue (aberrant)

Excludes: that for release of uterine adhesions [external] (see [1.RM.72.^ ^](#))

1.RM.59.^ ^ Destruction, uterus and surrounding structures	endoscopic [laparoscopic] approach	endoscopic per orifice approach [hysteroscopic]	per orifice [vaginal] approach	open approach	external approach
using device NEC [e.g. electrocautery, rollerball diathermy]	1.RM.59.DA-GX	1.RM.59.BA-GX	1.RM.59.CA-GX	1.RM.59.LA-GX	—
using laser	1.RM.59.DA-AG	1.RM.59.BA-AG	1.RM.59.CA-AG	1.RM.59.LA-AG	—
using microwave	—	—	1.RM.59.CA-CG Includes: • microwave endometrial ablation (MEA)	—	—
using thermal fluid [e.g. heated saline or thermal fluid-filled balloon]	—	1.RM.59.BA-EA	1.RM.59.CA-EA	—	—
using radiofrequency probe [e.g. Novasure system]	1.RM.59.DA-AW	—	1.RM.59.CA-AW	—	—
using cryoprobe [e.g. cryotherapy]	—	—	1.RM.59.CA-AD	—	—
using ultrasound device [e.g. high intensity focused ultrasound [HIFU]]	1.RM.59.DA-AZ	1.RM.59.BA-AZ	1.RM.59.CA-AZ	—	1.RM.59.JA-AZ Includes: • Magnetic resonance-guided focused ultrasound surgery [MRgFUS] Code Also: • Magnetic resonance guidance (see 3.OT.40.^ ^)

1.RM.72.^.^ Release, uterus and surrounding structures**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Adhesiolysis, uterus [external]
 Hysterolysis
 Synechotomy, endometrial (intraluminal)

1.RM.72.^.^ Release, uterus and surrounding structures	endoscopic [laparoscopic] approach	endoscopic per orifice approach [hysteroscopic]	open approach	vaginal approach
using bipolar diathermy	1.RM.72.DA-HB	1.RM.72.BA-HB	1.RM.72.LA-HB	1.RM.72.CA-HB
using device NEC	1.RM.72.DA-GX	1.RM.72.BA-GX	1.RM.72.LA-GX	1.RM.72.CA-GX
using laser	1.RM.72.DA-AG	1.RM.72.BA-AG	1.RM.72.LA-AG	1.RM.72.CA-AG

1.RM.73.^.^ Reduction, uterus and surrounding structures**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Reduction, manual, uterus
 Replacement, manual, uterus
 that for prolapsed, retroverted or inverted uterus

Excludes: that within 6 weeks postpartum (see [5.PC.91.^.](#))

Code Also: Any placement of vaginal pessary (see [1.RS.53.^.](#))

1.RM.73.CA-CD using per orifice approach and manual action

1.RM.74.^.^ Fixation, uterus and surrounding structures**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Hysteropexy
 Interposition, uterus
 Plication, uterosacral ligaments
 Shortening, uterine ligaments (e.g. modified Gilliam procedure)
 Suspension uterus
 that with or without presacral sympathectomy
 that with suspension of rectum
 Ventrohysteropexy

Code Also: Any concomitant bladder neck suspension (see [1.PL.74.^^](#))
 Any concomitant pelvic floor repair (see [1.RS.80.^^](#))
 Any concomitant vaginal repair (see [1.RS.80.^^](#))

1.RM.74.CA using transvaginal approach
 1.RM.74.DA using endoscopic [laparoscopic] approach
 1.RM.74.LA using open approach
 1.RM.74.LA-XX-N using open approach and synthetic material [mesh]

1.RM.80.^^ Repair, uterus and surrounding structures

S 15 **L** 44

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 15	Optional	Tx Status 9	Status	A	Abandoned after onset
				C	Converted (from endoscopic to open approach)
				R	Revision
L 44	Optional	Uterus	Location	A T	Aberrant tissue
				B D	Body
				E N	Endometrium
				U	Unspecified

Includes: Hysteroplasty
 Hysterorrhaphy
 Metroplasty [for bicornuate and septate uterus]
 Suture, uterus [non obstetrical]
 that with or without tissue transfer

Excludes: Closure fistula, abdominouterine (see [1.NP.86.^^](#))
 Closure fistula, uteroenteric (see [1.NP.86.^^](#))
 Closure fistula, uterorectal (see [1.NQ.86.^^](#))
 Closure, fistula, ureterovaginal (see [1.PG.86.^^](#))
 Closure, fistula, vesicouterine (see [1.PM.86.^^](#))
 Repair, pelvic floor (see [1.RS.80.^^](#))
 that for obstetrical laceration within 6 weeks postpartum (see [5.PC.80.^^](#))

1.RM.80.^ ^ Repair, uterus and surrounding structures	endoscopic [laparoscopic] approach	endoscopic per orifice approach [hysteroscopic]	open approach
without tissue	1.RM.80.DA	1.RM.80.BA	1.RM.80.LA
using combined sources of tissue	—	—	1.RM.80.LA-XX-Q
using free distant flap	—	—	1.RM.80.LA-XX-F
using full thickness graft	—	—	1.RM.80.LA-XX-A
using local flap	—	—	1.RM.80.LA-XX-E
using synthetic tissue	—	—	1.RM.80.LA-XX-N

1.RM.83.^ ^ Transfer, uterus and surrounding structures**S** 5 **L** 37

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 37	Optional	Ovary	Location	E M	Embryo
				G A	Gamete
				Z Y	Zygote

Includes: In vitro fertilization
Intrauterine transfer, embryo

1.RM.83.CA-XX-A using per orifice approach and autologous embryo
1.RM.83.CA-XX-J using per orifice approach and homologous embryo

1.RM.87.^ ^ Excision partial, uterus and surrounding structures**S** 16 **L** 85 **E** 52

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 16	Optional	Tx Status 10	Status	A	Abandoned after onset
				C	Converted (from endoscopic to open approach)
L 85	Optional	Uterus 3	Location	A T	Aberrant tissue
				B D	Body
				E N	Endometrium
				M	Multiple sites
				U	Unspecified
				U L	Uterine ligaments

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 52	Mandatory	Mandatory Uterus	Extent	0	Not applicable (e.g. Other type of excision)
				P	Myomectomy/fibromectomy
				S U	Subtotal hysterectomy

Includes: Bisection, uterus
Dilation and curettage [D & C], uterus
Endometrectomy (with dilation)
Excision, congenital septum of uterus
Excision, endometrial tissue (aberrant)
Fibroidectomy
Fundectomy, uterine
Hysterectomy, partial [subtotal, supra cervical, supra vaginal]
Myomectomy

Excludes: Biopsy, endometrial sampling (see [2.RM.71.^](#))
Cesarean hysterectomy (see [5.MD.60.^](#))
D & C following delivery (see [5.PC.91.^](#))
D & C for termination of pregnancy (see [5.CA.89.^](#))
that for termination of pregnancy (see [5.CA.89.^](#))

Code Also: Any concomitant removal of ovaries and fallopian tubes (see [1.RD.89.^](#))
Any endometrial ablation (see [1.RM.59.^](#))
Any repair of vagina (see [1.RS.80.^](#))

1.RM.87.^ Excision partial, uterus and surrounding structures	endoscopic [laparoscopic] approach	endoscopic per orifice approach [hysteroscopic]	per orifice [transvaginal] approach	open approach
using aspiration curettage	—	—	1.RM.87.CA-AF	—
using curette [D & C]	—	—	1.RM.87.CA-AE	—
using device NEC	1.RM.87.DA-GX	1.RM.87.BA-GX	1.RM.87.CA-GX	1.RM.87.LA-GX
using loop electrode [LEEP]	1.RM.87.DA-AK	1.RM.87.BA-AK	1.RM.87.CA-AK	1.RM.87.LA-AK
using laser	1.RM.87.DA-AG	1.RM.87.BA-AG	—	—

1.RM.89.^ Excision total, uterus and surrounding structures

S 16

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 16	Optional	Tx Status 10	Status	A	Abandoned after onset
				C	Converted (from endoscopic to open approach)

Includes:	Hysterectomy Panhysterectomy Total hysterectomy
Excludes:	Cesarean hysterectomy (see 5.MD.60.^^) Cesarean hysterectomy for termination of pregnancy (see 5.CA.89.^^)
Code Also:	Any bladder neck suspension (see 1.PL.74.^^) Any concomitant removal of fallopian tubes without ovaries (see 1.RF.89.^^) Any concomitant removal of ovaries with fallopian tubes (see 1.RD.89.^^) Any concomitant suspension of vaginal vault (see 1.RS.74.^^) Any pelvic floor repair (see 1.RS.80.^^) Any robotic assisted telemanipulation of tools (see 7.SF.14.^^)
1.RM.89.AA	using combined laparoscopic and vaginal approach
1.RM.89.CA	using vaginal approach
1.RM.89.DA	using endoscopic (laparoscopic) approach
1.RM.89.LA	using open approach

1.RM.91.^^ Excision radical, uterus and surrounding structures**S** 16

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 16	Optional	Tx Status 10	Status	A	Abandoned after onset
				C	Converted (from endoscopic to open approach)

Includes:	Colpohysterectomy Hysterectomy, radical Hysterocolpectomy
Excludes:	Hysterectomy with bladder resection (see 1.PM.91.^^)
Code Also:	Any concomitant bladder neck suspension (see 1.PL.74.^^) Any concomitant creation of colostomy (see 1.NM.77.^^) Any concomitant removal of ovaries and fallopian tubes (see 1.RD.89.^^) Any para-aortic lymph node dissection (see 1.MG.^^.^^) Any robotic assisted telemanipulation of tools (see 7.SF.14.^^)
Note:	A classic radical hysterectomy may include: wide resection of the parametrium, dissection of the terminal ureter from the vesicouterine ligament and wide resection of the uterosacral ligaments, upper 2 to 3 centimetres of the vagina and paravaginal tissues along with a pelvic lymphadenectomy.
1.RM.91.AA	using combined laparoscopic and vaginal approach Includes: Laparoscopic radical vaginal hysterectomy [LVRH]
1.RM.91.CA	using vaginal approach (e.g. Schauta operation)
1.RM.91.DA	using endoscopic (laparoscopic) approach
1.RM.91.LA	using abdominal approach (e.g. Wertheim operation) Includes: modified radical hysterectomy

1.RN.^.^ Therapeutic Interventions on the Cervix

- Includes:** Canal of cervix
Cervix NEC
Supra vaginal cervix
Uterine orifice (external os)
- Excludes:** Cervix with uterus (see [1.RM.^.^](#))

1.RN.13.^.^ Control of bleeding, cervix

- Includes:** Packing, cervical canal
- Excludes:** Postpartum repair of cervix (see [5.PC.80.^.](#))
Systemic pharmacotherapy for control of bleeding (see [1.ZZ.35.^.](#))

1.RN.13.CA-C2	using per orifice approach and antihemorrhagic agent
	Includes: aminocaproic acid, aprotinin, phytonadione, thrombin, coagulation factor VIII
1.RN.13.CA-NP	using per orifice approach and packing

1.RN.26.^.^ Brachytherapy, cervix**S** 35

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 35	Optional	Implant Status	Status	P M	Permanent implant – Radioactive source left in place permanently
				T M	Temporary implant – Radioactive source removed after course of treatment is complete

- Includes:** Endocurietherapy, cervix
Implantation of radioactive material, cervix
Interstitial radiation therapy, cervix
Intracavitary radiation therapy, cervix
- Code Also:** Any concomitant implantation of brachytherapy applicators or conduits [e.g. needles, catheters, stents, ovoids, tandems] if applicable (see [1.RN.53.^.](#))
- Note:** There are typically two distinct phases required to complete the process of brachytherapy. The first phase involves the insertion of non-radioactive applicators or conduits [e.g. hollow needles, catheters, stents, etc.] that receive or transmit the radioactive material into the body. The second phase involves the after loading of the radioactive material [e.g. seeds, pellets, wires, etc.] into the applicator or conduit.

1.RN.26.CA	using per orifice (vaginal) approach
1.RN.26.HA	using percutaneous (transcatheter or transneedle) approach
1.RN.26.LA	using open approach

1.RN.27.^ ^ Radiation, cervix

Includes: Teletherapy, cervix
Therapy, radiation [radiotherapy], cervix

1.RN.27.JA using external beam
1.RN.27.JX using focused beam [e.g. gamma knife, cyber knife stereotactic radiosurgery]

1.RN.50.^ ^ Dilation, cervix**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: that with or without incision

Excludes: that concomitant with curettage (see [1.RM.87.^ ^](#))
that done in preparation for termination of pregnancy (see [5.CA.24.^ ^](#))

1.RN.50.CA-BP using per orifice approach and rigid dilator [e.g. sounds]
1.RN.50.CA-EP using per orifice approach and bag or bougie dilator
1.RN.50.CA-NR using per orifice approach and stent
1.RN.50.CA-W6 using per orifice approach and laminaria
1.RN.50.CR using per orifice approach and incision technique

1.RN.52.^ ^ Drainage, cervix**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Aspiration, cervix (for drainage)
Trachelotomy for drainage

Excludes: Aspiration biopsy (see [2.RN.71.^ ^](#))

1.RN.52.CQ using per orifice [vaginal] needle aspiration technique
1.RN.52.LA using open approach

1.RN.53.^ ^ Implantation of internal device, cervix**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Insertion or brachytherapy applicator (needles, catheters, stents, ovoids, tandems), cervix

1.RN.53.CA-EM of brachytherapy applicator using per orifice (vaginal) approach
 1.RN.53.HA-EM of brachytherapy applicator using percutaneous approach
 1.RN.53.LA-EM of brachytherapy applicator using open approach

1.RN.55.^ ^ Removal of device, cervix**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Excludes: Removal of obstetrical cerclage (see [5.LD.25.^ ^](#))

1.RN.55.CA-EB of radioactive implant using per orifice [vaginal] approach
 1.RN.55.CA-FF of closure device [e.g. sutures] using per orifice [vaginal] approach
 1.RN.55.CA-NP of packing using per orifice [vaginal] approach
 1.RN.55.JA-EB of radioactive implant using external approach
 1.RN.55.LA-EB of radioactive implant using open approach
 1.RN.55.LA-FA of cerclage device [ligature, ring or loop] using open approach

1.RN.56.^ ^ Removal of foreign body, cervix**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

1.RN.56.CA using per orifice [vaginal] approach [incisional]
 1.RN.56.CJ using per orifice [vaginal] approach [extraction]

1.RN.59.^.^ Destruction, cervix**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Ablation, cervix
Cauterization (electric), cervix

1.RN.59.CA-AD using per orifice approach [vaginal] and cryosurgery [probe or topical]
 1.RN.59.CA-AG using per orifice approach and laser NEC
 1.RN.59.CA-GX using per orifice approach [vaginal] and device NEC (e.g. electrocautery)
 1.RN.59.CA-X7 using per orifice approach [vaginal] and chemical cautery agent

1.RN.74.^.^ Fixation, cervix**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Cervicopexy
Trachelopexy

Excludes: that concomitant with other repair (see Repair, by site)

1.RN.74.CA using per orifice approach
 1.RN.74.LA using open approach

1.RN.80.^.^ Repair, cervix**S** 5 **L** 45

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 45	Optional	Cervix	Location	B D	Body
				C X	Cervical canal [internal os]
				U	Unspecified

- Includes:**
- Cervicoplasty
 - Repair of obstetrical laceration more than 6 weeks postpartum
 - Repair of simple fistula
 - Repair, internal os
 - Restriction, cervix (non obstetrical cerclage)
 - Suture, cervix (non obstetrical)
 - Tracheloplasty [uterine stomatoplasty]
 - Trachelorrhaphy
 - Trachelotomy [hysterotrachelotomy]
- Excludes:**
- Cervical cerclage following delivery (see [5.PC.91.^^](#))
 - Cervical cerclage, antepartum (see [5.AC.80.^^](#))
 - Closure, cervico-sigmoidal fistula (see [1.NP.86.^^](#))
 - Repair of obstetrical laceration within 6 weeks post partum (see [5.PC.80.^^](#))

1.RN.80.^^ Repair, cervix	endoscopic [percutaneous] approach	open approach	per orifice [vaginal] approach with incision
without tissue	1.RN.80.DA	1.RN.80.LA	1.RN.80.CR
using full thickness autograft	—	1.RN.80.LA-XX-A	1.RN.80.CR-XX-A
using local flap	—	1.RN.80.LA-XX-E	1.RN.80.CR-XX-E
using restrictive cerclage device [e.g. ligature]	1.RN.80.DA-FA	1.RN.80.LA-FA	1.RN.80.CR-FA

1.RN.87.^^ Excision partial, cervix

S 4 **L** 45

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 45	Optional	Cervix	Location	B D	Body
				C X	Cervical canal [internal os]
				U	Unspecified

Includes:	Amputation partial, cervix Cervicectomy, partial Conization, cervix Polypectomy, endocervical Trachelectomy, partial
Excludes:	Dilation and curettage [D & C] (see 1.RM.87.^^) Excision remainder of cervix (cervical stump) (see 1.RN.89.^^)
Code Also:	Any colposcopic examination, if desired (see 3.RZ.94.^^)
1.RN.87.CR-AC	using per orifice [vaginal] approach with incision using cold knife (scalpel)
1.RN.87.CR-AG	using per orifice [vaginal] approach with incision and laser NEC
1.RN.87.CR-AK	using per orifice [vaginal] approach with incision using loop electrode (LEEP)
	Includes: Loop electrosurgical excision procedure [LEEP] (biopsy), cervix
1.RN.87.CR-GX	using per orifice [vaginal] approach with incision using device NEC

1.RN.89.^^ Excision total, cervix**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes:	Amputation, cervix Cervicectomy Excision remainder of cervix (cervical stump) Trachelectomy [hysterotrachelectomy]
Excludes:	that done as part of Manchester operation (see 1.RS.80.^^) that with anterior or posterior repair of vagina (see 1.RS.80.^^)

1.RN.89.^^ Excision total, cervix	open approach	per orifice [vaginal] approach with incision
without tissue	1.RN.89.LA	1.RN.89.CR
using combined sources of tissue	1.RN.89.LA-XX-Q	1.RN.89.CR-XX-Q
using full thickness autograft	1.RN.89.LA-XX-A	1.RN.89.CR-XX-A
using full thickness autograft and stent	1.RN.89.LA-NR-A	1.RN.89.CR-NR-A
using local flap [paracervical fascial]	1.RN.89.LA-XX-E	1.RN.89.CR-XX-E
using local flap and stent	1.RN.89.LA-NR-E	1.RN.89.CR-NR-E

1.RN.91.^.^ Excision radical, cervix**S** 16

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 16	Optional	Tx Status 10	Status	A	Abandoned after onset
				C	Converted (from endoscopic to open approach)

Includes: Radical cervicectomy
 Radical trachelectomy
 that with or without placement of cervical cerclage and cervical balloon
 that with pelvic lymphadenectomy

Code Also: Any robotic assisted telemanipulation of tools (see [7.SF.14^^](#))

Note: A radical trachelectomy is performed when it is desirable to preserve fertility in patients with surgically treatable cervical pathology. The intervention includes a pelvic [parametrial] lymphadenectomy, and may include application of a cervical cerclage with a temporary endocervical indwelling balloon to assist in postoperative retention of the cerclage

1.RN.91.AA using combined endoscopic (laparoscopic) and per orifice (vaginal) approach

Includes: Laparoscopically assisted vaginal approach

1.RN.91.CR using per orifice [vaginal] approach with incision

1.RN.91.LA using open [abdominal] approach

1.RS.^.^ Therapeutic Interventions on the Vagina

Includes: Fornix (anterior, posterior, cul-de-sac)
 Vaginal orifice
 Vaginal vault
 Vaginal wall (anterior, posterior)

1.RS.13.^ ^ Control of bleeding, vagina**E** 53

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 53	Mandatory	Mandatory Coils	Extent	0	Not applicable (no coil used)
				01	One coil
				02	Two coils
				03	Three coils
				04	Four coils
				05	Five coils
				06	Six coils
				07	Seven coils
				08	Eight coils
				09	Nine coils
				10	Ten coils
				G	More than ten coils (11 - 20)
				H	More than twenty coils
				U	Unspecified

Includes: Embolization (transarterial), vagina
Packing, vagina
Tamponade, vagina

Excludes: Systemic pharmacotherapy for control of bleeding (see [1.ZZ.35.^ ^](#))

1.RS.13.CA-C2 using per orifice approach and antihemorrhagic agent
1.RS.13.CA-NP using per orifice approach and packing

Excludes: that done postpartum [immediately following delivery] (see [5.PC.91.^ ^](#))

1.RS.13.GQ-C2 using percutaneous transarterial approach and antihemorrhagic agent [e.g. vasopressin]

Includes: aminocaproic acid, aprotinin, phytonadione, thrombin, coagulation factor VIII

1.RS.13.GQ-GE using percutaneous transluminal (transarterial) approach and (detachable) coils

1.RS.13.GQ-W0 using percutaneous transluminal (transarterial) approach and synthetic agent [e.g. gelfoam, microspheres, polystyrene, polyvinyl alcohol, contour particles]

1.RS.26.^ ^ Brachytherapy, vagina**S** 35

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 35	Optional	Implant Status	Status	P M	Permanent implant – Radioactive source left in place permanently
				T M	Temporary implant – Radioactive source removed after course of treatment is complete

Includes: Endocurietherapy, vagina
 Implantation of radioactive material, vagina
 Insertion of radioactive material, vagina
 Interstitial radiation therapy, vagina
 Intracavitary radiation therapy, vagina

Code Also: Any concomitant implantation of brachytherapy applicators or conduits [e.g. needles, catheters, stents, ovoids, tandems] if applicable (see [1.RS.53.^ ^](#))

Note: There are typically two distinct phases required to complete the process of brachytherapy. The first phase involves the insertion of non-radioactive applicators or conduits [e.g. hollow needles, catheters, stents, etc.] that receive or transmit the radioactive material into the body. The second phase involves the after loading of the radioactive material [e.g. seeds, pellets, wires, etc.] into the applicator or conduit.

1.RS.26.CA	using per orifice approach
1.RS.26.HA	using percutaneous (transcatheter or transneedle) approach
1.RS.26.LA	using open approach

1.RS.27.^ ^ Radiation, vagina

Includes: Teletherapy, vagina
 Therapy, radiation [radiotherapy], vagina

1.RS.27.JA	using external beam
------------	---------------------

1.RS.35.^ ^ Pharmacotherapy (local), vagina

- Includes:** Douche (therapeutic), vagina
Injection, vagina
Insertion (of therapeutic agent), vagina
Instillation, vagina
Irrigation, vagina
- Excludes:** Systemic pharmacotherapy (see [1.ZZ.35.^ ^](#))
that for control of bleeding (see [1.RS.13.^ ^](#))

1.RS.35.CA-D1	using antiinfective irrigating solution and per orifice approach Includes: chlorhexidine, neomycin
1.RS.35.CA-D2	using salt irrigating solution and per orifice approach Includes: sodium chloride
1.RS.35.CA-D3	using other irrigating solution and per orifice approach Includes: sorbitol, mannitol
1.RS.35.CA-I1	using gynecological antiinfectives and antiseptics and per orifice approach Includes: nystatin, metronidazole, clotrimazole, povidone iodine
1.RS.35.CA-M2	using antimetabolite agent and per orifice approach Includes: methotrexate, cytarabine, fluorouracil, cladribine
1.RS.35.CA-T9	using pharmacological agent NEC and per orifice approach
1.RS.35.CA-Z9	using soapy water and per orifice approach

1.RS.50.^ ^ Dilation, vagina**S** 5 **L** 46

Any concomitant colporrhaphy (see [1.RS.80.^.](#))

1.RS.89.CR	using per orifice (vaginal) approach and incision
1.RS.89.LA	using open abdominal approach

1.RW.^.^ Therapeutic Interventions on the Vulva

Includes: Bartholin's glands (greater vestibular glands)
Bulb of vestibule
Clitoris
Hymen
Labia, minora and majora
Mons pubis
Vestibule
Vulva with perineum

Excludes: Urethral meatus alone (see [1.PQ.^.^](#))
Vulva with vagina (see [1.RS.^.^](#))

1.RW.06.^.^ Hypothermy, vulva

Includes: Application of cold, vulva

1.RW.06.JA-KL	using ice pack
1.RW.06.JA-KM	using cool/cold compress

1.RW.07.^ ^ Hyperthermy, vulva**Includes:** Application of heat, vulva

1.RW.07.JA-KJ	using warm/hot compress
1.RW.07.JA-KK	using heating (dry) device
1.RW.07.JA-LU	using lamp
1.RW.07.JA-TG	using sitz bath (warm/hot)

1.RW.13.^ ^ Control of bleeding, vulva**Includes:** that for hemorrhage control, vulva

Excludes: Application of pressure dressing to vulva to control bleeding (see [1.RW.14.^ ^](#))
Destruction or ablation skin of vulva for control of bleeding (see [1.RW.59.^ ^](#))
Systemic pharmacotherapy for control of bleeding (see [1.ZZ.35.^ ^](#))
that with surgical repair or suturing (see [1.RW.80.^ ^](#))

1.RW.13.JA-C2	using antihemorrhagic agent Includes: aminocaproic acid, aprotinin, phytonadione, thrombin, coagulation factor VIII
1.RW.13.JN	using external manual pressure

1.RW.14.^ ^ Dressing, vulva

Includes: Bandage, (wound of) vulva
Coverage [temporary], (skin of) vulva
Replace (change) dressing, vulva

1.RW.14.JA-FJ	using occlusive dressing [e.g. hydrocolloid, coal tar, paraffin, gauze, hydrogel]
1.RW.14.JA-FN	using wet/moist dressing
1.RW.14.JA-GN	using pressure dressing
1.RW.14.JA-H1	using medicated dressing
1.RW.14.JA-T6	using dry dressing
1.RW.14.JA-XX-N	using synthetic tissue [e.g. Biobrane, Dermagraft]

1.RW.26.^ ^ Brachytherapy, vulva**S** 35

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 35	Optional	Implant Status	Status	P M	Permanent implant – Radioactive source left in place permanently
				T M	Temporary implant – Radioactive source removed after course of treatment is complete

Includes:	Endocurietherapy, vulva Implantation of radioactive material, vulva Interstitial radiation NOS, vulva
Code Also:	Any concomitant implantation of brachytherapy applicators or conduits [e.g. needles, catheters] to gain access to treatment site (see 1.RW.53.^^)
Note:	There are typically two distinct phases required to complete the process of brachytherapy. The first phase involves the insertion of non-radioactive applicators or conduits [e.g. hollow needles, catheters, stents, etc.] that receive or transmit the radioactive material into the body. The second phase involves the after loading of the radioactive material [e.g. seeds, pellets, wires, etc.] into the applicator or conduit.

1.RW.26.HA	using percutaneous (transcatheter or transneedle) approach
1.RW.26.LA	using open approach

1.RW.27.^^ Radiation, vulva

Includes:	Teletherapy, vulva Therapy, radiation [radiotherapy], vulva
------------------	--

1.RW.27.JA	using external beam
------------	---------------------

1.RW.35.^^ Pharmacotherapy (local), vulva

Includes:	Application of agent, vulva Cleansing (wound), vulva Injection, vulva Instillation, vulva Irrigation, vulva
Excludes:	Systemic pharmacotherapy (see 1.ZZ.35.^^) that for control of bleeding (see 1.RW.13.^^)

1.RW.35.^ ^ Pharmacotherapy (local), vulva	external [topical] application	percutaneous needle [injection] approach
using antiinfective irrigating solution	1.RW.35.JA-D1 Includes: • chlorhexidine, neomycin	—
using salt irrigating solution	1.RW.35.JA-D2 Includes: • sodium chloride	—
using other irrigating solution	1.RW.35.JA-D3 Includes: • sorbitol, mannitol	—
using antifungal agent	1.RW.35.JA-G1 Includes: • nystatin, clotrimazole, miconazole, tolnaftate	—
using emollient and protective agent	1.RW.35.JA-G2 Includes: • silicone, dimethicone, zinc oxide, urea, protectives against UV radiation	—
using wound and ulcer treatment agent	1.RW.35.JA-G3 Includes: • sutilains, collagenase, dextranomer	—
using antipruritic agent	1.RW.35.JA-G4 Includes: • diphenhydramine, lidocaine, benzocaine, crotamiton, calamine	—
using antipsoriatic agent	1.RW.35.JA-G5 Includes: • coal tar preparations, anthralin, methoxsalen)	—
using antibiotic and chemotherapeutic agent	1.RW.35.JA-G6 Includes: • fusidic acid, bacitracin, polymyxin, mupirocin, idoxuridine, acyclovir for topical use	1.RW.35.HA-G6 Includes: • fusidic acid, bacitracin, polymyxin, mupirocin, idoxuridine, acyclovir for topical use
using dermatological corticosteroid agent	1.RW.35.JA-G7 Includes: • hydrocortisone, triamcinolone, clobetasol, betamethasone	—
using antiseptic and disinfectant agent	1.RW.35.JA-G8 Includes: • chlorhexadine, hexachlorophene, iodine, cllioquinol, isopropyl alcohol	—
using systemic corticosteroid agent	—	1.RW.35.HA-J2 Includes: • prednisone, dexamethasone, fludrocortisone
using pharmacological agent NEC	1.RW.35.JA-T9	1.RW.35.HA-T9
using augmentation agent	—	1.RW.35.HA-W1
using drying agent [e.g. air, aluminum salts, starch, powders]	1.RW.35.JA-X3	—
using agent NEC	1.RW.35.JA-Z9	1.RW.35.HA-Z9

				L M	Labia minora
				M	Multiple sites
				U	Unspecified

Includes:

Clitoroplasty
Hymenorrhaphy
Hymenotomy
Plastic repair, introitus
Reduction clitoroplasty
Suture, vulva
that with or without transfer of tissue

Excludes:

Closure, fistula, rectolabial, rectovulvar or vulvorectal (see [1.NQ.86.^ ^](#))
Repair of current obstetrical laceration of vulva (see [5.PC.80.^ ^](#))

1.RW.80.LA using open approach and no tissue
1.RW.80.LA-W4 using open approach and glue
1.RW.80.LA-XX-A using open approach and full thickness graft
1.RW.80.LA-XX-B using open approach and split thickness (skin) autograft
1.RW.80.LA-XX-E using open approach and local flap
1.RW.80.LA-XX-F using open approach and free distant flap
1.RW.80.LA-XX-G using open approach and pedicled distant flap
1.RW.80.LA-XX-K using open approach and homograft (e.g. GRAFTJACKET)
1.RW.80.LA-XX-P using open approach and using cultured tissue

1.RW.84.^ ^ Construction or reconstruction, vulva**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Clitoroplasty, feminization
Construction, external female genitalia (for sex change or congenital absence)
Labiaplasty, feminization
that following radical vulvectomy

Excludes: Single stage (feminization) construction of vagina and vulva (see [1.RS.84.^^](#))

1.RW.84.LA-XX-A using open approach and full thickness graft
1.RW.84.LA-XX-E using open approach and local flap
1.RW.84.LA-XX-F using open approach and free distant flap
1.RW.84.LA-XX-G using open approach and pedicled distant flap

1.RW.87.^^ Excision partial, vulva

S 4 **L** 47

				H Y	Hymen
				L G	Labia majora
				L M	Labia minora
				M	Multiple sites
				U	Unspecified

Includes: Hemivulvectomy with reconstruction
 Labiectomy with reconstruction
 Modified radical vulvectomy with reconstruction
 Partial vulvectomy with reconstruction

Code Also: any partial excision of anus (see [1.NT.87.^ ^](#))
 any partial urethrectomy (see [1.PQ.87.^ ^](#))

1.RW.88.LA-XX-A using open approach with full thickness graft
 1.RW.88.LA-XX-E using open approach and local flap
 1.RW.88.LA-XX-F using open approach and free flap
 1.RW.88.LA-XX-G using open approach and pedicled flap

1.RW.91.^ ^ Excision radical, vulva**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

- Includes:** Vulvectomy, radical
Vulvoperineoectomy, radical
- Excludes:** Hemi vulvectomy (see [1.RW.87.^](#))
Modified radical vulvectomy (see [1.RW.87.^](#))
- Code Also:** Any concomitant urethrectomy (see [1.PQ.87.^](#))
Any partial excision of anus (see [1.NT.87.^](#))
Vulvectomy with urethra and bladder resection (see [1.PM.91.^](#))
- Note:** Involves inguinofemoral lymph node dissection with or without excision of mons pubis

1.RW.91.LA without tissue repair
1.RW.91.LA-XX-F vulvectomy, radical using free distant flap [e.g. myocutaneous or fasciocutaneous]

1.RW.92.^ Excision radical with reconstruction, vulva**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

- Includes:** that with bilateral inguinofemoral lymphadenectomy
- Excludes:** Modified radical vulvectomy (see [1.RW.87.^](#))
Modified radical vulvectomy with reconstruction (see [1.RW.88.^](#))

1.RW.92.LA-XX-A using open approach with full thickness graft
1.RW.92.LA-XX-E using open approach and local flap
1.RW.92.LA-XX-F using open approach and free flap
1.RW.92.LA-XX-G using open approach and pedicled flap

1.RY.^ Therapeutic Interventions on the Perineum

- Includes:** Male perineum

1.RY.06.^ Hypothermy, perineum

- Includes:** Application of cold, perineum

1.RY.06.JA-KL using ice pack
1.RY.06.JA-KM using cool/cold compress

1.RY.07.^.^ Hyperthermy, perineum

Includes: Application of heat, perineum

1.RY.07.JA-KJ	using warm/hot compress
1.RY.07.JA-KK	using heating (dry) device
1.RY.07.JA-LU	using lamp
1.RY.07.JA-TG	using sitz bath (warm/hot)

1.RY.12.^.^ Therapy, perineum

Includes: Light therapy, perineum (with or without vulva)

1.RY.12.JA-DQ	using ultraviolet light
1.RY.12.JA-DU	using light NEC [e.g. long wave red light]

1.RY.13.^.^ Control of bleeding, perineum

Includes: that for hemorrhage control, perineum

Excludes: Application of pressure dressing to perineum to control bleeding (see [1.RY.14.^.^](#))
Destruction or ablation, skin of perineum for control of bleeding (see [1.RY.59.^.^](#))
Systemic pharmacotherapy for control of bleeding (see [1.ZZ.35.^.^](#))
that using surgical repair or suturing (see [1.RY.80.^.^](#))

1.RY.13.JA-C2	using antihemorrhagic agent
	Includes: aminocaproic acid, aprotinin, phytonadione, thrombin, coagulation factor VIII
1.RY.13.JN	using external manual pressure

1.RY.14.^.^ Dressing, perineum

Includes: Bandage, wound, perineum
Coverage [temporary], skin of perineum
Replace [change] dressing, perineum

Excludes: Dressing, vulva with perineum (see [1.RW.14.^.^](#))
Vulva with perineum (see [1.RW.14.^.^](#))

1.RY.14.JA-FJ	using occlusive dressing [e.g. hydrocolloid, coal tar, paraffin, gauze, hydrogel]
1.RY.14.JA-FN	using wet/moist dressing
1.RY.14.JA-GN	using pressure dressing
1.RY.14.JA-H1	using medicated dressing
1.RY.14.JA-T6	using dry dressing
1.RY.14.JA-XX-N	using synthetic tissue [e.g. Dermabrane, Derma Graft]

1.RY.35.^ ^ Pharmacotherapy (local), perineum

Includes: Application of agent, perineum
Cleansing (wound), perineum
Injection, perineum
Instillation, perineum
Irrigation, perineum

Excludes: post partum care of perineum (cleansing) (irrigation) (see [5.PB.01.^ ^](#))
Systemic pharmacotherapy (see [1.ZZ.35.^ ^](#))
that for control of bleeding (see [1.RY.13.^ ^](#))

1.RY.35.^ ^ Pharmacotherapy (local), perineum	external [topical] application	percutaneous needle [injection] approach
using antiinfective irrigating solution	1.RY.35.JA-D1 Includes: • chlorhexidine, neomycin	—
using salt irrigating solution	1.RY.35.JA-D2 Includes: • sodium chloride	—
using other irrigating solution	1.RY.35.JA-D3 Includes: • sorbitol, mannitol	—
using antifungal agent	1.RY.35.JA-G1 Includes: • nystatin, clotrimazole, miconazole, tolinaftate	—
using emollient and protective agent	1.RY.35.JA-G2 Includes: • silicone, dimethicone, zinc oxide, urea, protectives against UV radiation	—
using wound and ulcer treatment agent	1.RY.35.JA-G3 Includes: • sutilains, collagenase, dextranomer	—
using antipruritic agent	1.RY.35.JA-G4 Includes: • diphenhydramine, lidocaine, benzocaine, crotamiton, calamine	—
using antipsoriatic agent	1.RY.35.JA-G5 Includes: • coal tar preparations, anthralin, methoxsalen	—
using antibiotic and chemotherapeutic agent	1.RY.35.JA-G6 Includes: • fusidic acid, bacitracin, polymyxin, mupirocin, idoxuridine, acyclovir for topical use	1.RY.35.HA-G6 Includes: • fusidic acid, bacitracin, polymyxin, mupirocin, idoxuridine, acyclovir for topical use

1.RY.35.^ ^ Pharmacotherapy (local), perineum	external [topical] application	percutaneous needle [injection] approach
using dermatological corticosteroid agent	1.RY.35.JA-G7 Includes: • hydrocortisone, triamcinolone, clobetasol, betamethasone	—
using antiseptic and disinfectant agent	1.RY.35.JA-G8 Includes: • chlorhexadine, hexachlorophene, iodine, clloquinol, isopropyl alcohol	—
using systemic corticosteroid agent	—	1.RY.35.HA-J2 Includes: • prednisone, dexamethasone, fludrocortisone
using pharmacological agent NEC	1.RY.35.JA-T9	1.RY.35.HA-T9
using augmentation agent	—	1.RY.35.HA-W1
using drying agent [e.g. air, aluminum salts, starch, powders]	1.RY.35.JA-X3	—
using agent NEC	1.RY.35.JA-Z9	1.RY.35.HA-Z9
using local anesthetic agent	1.RY.35.JA-P1	1.RY.35.HA-P1

1.RY.52.^ ^ Drainage, perineum**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Aspiration, perineum (for cyst, abscess, hematoma)**Excludes:** Aspiration biopsy (see [2.RY.71.^ ^](#))

1.RY.52.HA using percutaneous (needle) approach
 1.RY.52.LA using open approach

1.RY.55.^ ^ Removal of device, perineum**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

1.RY.55.JA-FF of sutures using external approach
 1.RY.55.JA-NP of packing using external approach

1.RY.56.^ ^ Removal of foreign body, perineum**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

1.RY.56.JA using external approach [extraction]
 1.RY.56.LA using open (incisional) approach

1.RY.59.^ ^ Destruction, perineum**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

1.RY.59.JA-AD using cryoprobe
 1.RY.59.JA-AG using laser
 1.RY.59.JA-GX using device NEC (e.g. electrocautery)

1.RY.80.^ ^ Repair, perineum**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

- Includes:** Episiotomy (after 6 weeks postpartum)
Perineoplasty
Perineorrhaphy
Suture, perineum
- Excludes:** Closure, fistula, perineorectal (see [1.NQ.86.^](#))
Closure, fistula, perineosigmoidal (see [1.NP.86.^](#))
Colpoperineorrhaphy (see [1.RS.80.^](#))
Episiorrhaphy of obstetrical laceration within 6 weeks of delivery (see [5.PC.80.^](#))
Perineoproctotomy for repair of rectovaginal fistula (see [1.NQ.86.^](#))
That following radical vulvectomy (see [1.RW.92.^](#))
That with concomitant vulvectomy (see [1.RW.88.^](#))

1.RY.80.LA	using open approach without tissue [suturing]
1.RY.80.LA-XX-A	using open approach and full thickness autograft
1.RY.80.LA-XX-E	using open approach and local flap
1.RY.80.LA-XX-F	using open approach and free distant flap
1.RY.80.LA-XX-G	using open approach and pedicled distant flap
1.RY.80.LA-XX-K	using open approach and homograft (e.g. GRAFTJACKET)
1.RY.80.LA-XX-P	using open approach and cultured tissue

1.RY.87.^ Excision partial, perineum**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

- Includes:** Excision, perineal (warts)

1.RY.87.LA	using open approach
1.RY.87.LA-XX-A	using open approach and full thickness autograft
1.RY.87.LA-XX-B	using open approach and split thickness autograft
1.RY.87.LA-XX-E	using open approach and local flap

1.RZ.^.^ Therapeutic Interventions on the Female Genital Tract NEC

- Includes:** Pelvic (female), region

1.RZ.06.^ Hypothermy, female genital tract NEC

- Includes:** Application of cold, pelvic (female) region

1.RZ.06.JA-KM	using cold (dry) device
---------------	-------------------------

1.RZ.07.^.^ Hyperthermy, female genital tract NEC

Includes: Application of heat, pelvic region
that for pain management and other therapeutic effect

1.RZ.07.JA-KJ using warm/hot compress

1.RZ.07.JA-KK using heating (dry) device

1.RZ.12.^.^ Therapy, female genital tract NEC

Includes: Insemination, artificial
Therapy, fertility NEC

Excludes: Fertility pharmacotherapy (see [1.ZZ.35.^.^](#))
Intrauterine introduction of gamete, zygote or embryo (see [1.RM.83.^.^](#))

1.RZ.12.CA-C9 using insemination per orifice approach (intracervical)

1.RZ.27.^.^ Radiation, female genital tract NEC

Includes: Teletherapy, female (pelvic) genital tract NEC
Therapy, radiation [radiotherapy], female pelvic genital tract NEC

Note: May involve irradiation of overlapping organs of the female genital tract as well as regional lymph nodes and rectum, as required.

1.RZ.27.JA using external beam

1.RZ.94.^.^ Therapeutic intervention NEC, female genital tract NEC

1.RZ.94.BA using endoscopic per orifice approach

1.RZ.94.DA using endoscopic (laparoscopic) approach

1.RZ.94.HA using percutaneous (needle) approach

1.RZ.94.LA using open approach

Therapeutic Interventions on the Musculoskeletal System (1SA - 1WZ)

Therapeutic Interventions on the Spine, Trunk and Pelvis (1SA - 1SZ)

1.SA.^^.^^ Therapeutic Interventions on the Atlas and Axis

Includes:

- Atlantoaxial joint
- Cervical spinal vertebrae: C1 and C2 [with or without C3]
- Occipitoatlantal (occipitocervical) joint
- Odontoid process, (dens) axis
- Superior and anterior facet (zygapophyseal) joint(s), atlas
- Transverse ligament of occipitoatlantal joint

1.SA.03.^^ Immobilization, atlas and axis

S 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 12	Optional	Tx Status 7	Status	R	Revision

Includes:

- Application of external immobilization device, atlas with axis
- Immobilization with traction, atlas and axis
- Reduction with traction, C1 and C2 (subluxation)
- Replacement of external immobilization device atlas with axis
- Traction, atlanto occipital joint

Excludes: Application of external immobilization device, cervical spine NEC (see [1.SC.03.^^](#))

1.SA.03.^^ Immobilization, atlas and axis	immobilization alone	immobilization with traction
with external bracing device	1.SA.03.JA-EQ	—
with external sling/halter device	—	1.SA.03.JZ-SQ
with external splinting device [e.g. collar]	1.SA.03.JA-SR	—
with percutaneous fixator device [e.g. tongs, halo]	1.SA.03.HA-KC	1.SA.03.JZ-KC

1.SA.04.^^ Mobilization, atlas and axis

Includes: Traction, C1 and C2 spinal vertebrae

Excludes: Mobilization with concomitant manipulation of atlas and axis (see [1.SA.05.^^](#))
Traction for immobilization of fracture of atlas and axis (see [1.SA.03.^^](#))

Note: May involve continuous or intermittent application of traction for strains and sprains of spinal ligaments (e.g. whiplash).

1.SA.04.JH using external approach with manual technique

1.SA.05.^ ^ Manipulation, atlas and axis

Includes: Mobilization with concomitant manipulation, atlas and axis (C1 and C2) spinal vertebrae

1.SA.05.JH using external approach with manual technique

1.SA.55.^ ^ Removal of device, atlas and axis**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

1.SA.55.^ ^ Removal of device, atlas and axis	open anterior approach	open posterior approach
of screw, screw with plate, staple or pin [e.g. odontoid screw]	1.SA.55.LL-NW	1.SA.55.PF-NW
of wire, staple, button, cabling, hook	1.SA.55.LL-KD	1.SA.55.PF-KD

1.SA.59.^ ^ Destruction, atlas and axis**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Denervation, facet joint, atlas and axis
Rhizotomy, facet joint, atlas and axis

1.SA.59.HA-AW using percutaneous (needle) approach with radiofrequency

Includes: Radiofrequency ablation, facet joint

1.SA.74.^ ^ Fixation, atlas and axis**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Application, of halo (or tongs), for atlas and axis reduction
 Instrumentation without bone grafting, atlas and axis
 Instrumentation without bone grafting, occipitoatlantal (occipitocervical) joint
 Laminectomy with instrumentation, atlas and axis
 Laminotomy with instrumentation, atlas and axis
 Reduction with fixation, atlas and axis

Code Also: Any application of external fixation [e.g. halo ring] (see [1.SA.03.^^](#))
 Any concomitant decompression of spinal cord (see [1.AW.72.^^](#))

1.SA.74.^^ Fixation, atlas and axis	combined open anterior with posterior approach	open anterior approach	open posterior approach
using device NEC	1.SA.74.LN-GX	1.SA.74.LL-GX Includes: • anterolateral, transoral and retropharyngeal approaches	1.SA.74.PF-GX Includes: • posterolateral approach
using screw, screw with plate, staple or pin [e.g. odontoid screw]	1.SA.74.LN-NW	1.SA.74.LL-NW Includes: • anterolateral, transoral and retropharyngeal approaches	1.SA.74.PF-NW Includes: • posterolateral approach
using wire, staple, button, cabling, hook	1.SA.74.LN-KD	1.SA.74.LL-KD Includes: • anterolateral, transoral and retropharyngeal approaches	1.SA.74.PF-KD Includes: • posterolateral approach

1.SA.75.^^ Fusion, atlas and axis

Includes: Fusion, atlas to occipital bone
 Fusion, occipitoatlantal (occipitocervical)
 Instrumentation with concomitant bone grafting, atlas and axis
 Internal fixation with concomitant bone grafting, atlas and axis
 Laminectomy with fusion, atlas and axis
 Laminotomy with fusion, atlas and axis

Excludes: Fusion following vertebrectomy [corpectomy], atlas and axis (see [1.SA.89.^^](#))
 Fusion, atlas and axis without bone grafting (see [1.SA.74.^^](#))

Code Also: Any concomitant decompression of spinal cord (see [1.AW.72.^^](#))

1.SA.75.^ Fusion, atlas and axis	with autograft	with combined sources of tissue	with homograft [e.g. from bone bank]	with synthetic tissue [e.g. bone cement, paste, bioglass]
anterior approach [anterolateral, retropharyngeal and transoral approaches]

using wire, staple, button, cabling, hook	1.SA.75.LN-KD-A	1.SA.75.LN-KD-Q	1.SA.75.LN-KD-K	1.SA.75.LN-KD-N

1.SA.80.^ Repair, atlas and axis**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Excision, fragment, atlas and axis
Facetectomy, atlas and axis
Hemilaminectomy, atlas and axis
Laminectomy, atlas and axis

Excludes: Laminectomy with fusion, atlas and axis (see [1.SA.75.^](#))
Laminectomy with internal fixation, atlas and axis (see [1.SA.74.^](#))
that with instrumentation (see [1.SA.74.^](#))
Vertebrectomy with instrumentation and bone grafting, atlas and axis (see [1.SA.89.^](#))

Code Also: Any concomitant decompression of spinal cord or nerve root where nerve root is damaged to effect release (see [1.AW.72.^](#))

Note: Involves reshaping vertebrae, widening the foramen or enlarging epidural space for the prevention of spinal cord/ nerve root compression

1.SA.80.LL	using anterior approach
	Includes: Anterolateral, retropharyngeal or transoral approach
1.SA.80.PF	using posterior approach
	Includes: Posterolateral approach

1.SA.89.^ ^ Excision total, atlas and axis**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Corpectomy [vertebral] with concomitant fusion, atlas and axis
 Odontoidectomy with fusion, atlas and axis
 Vertebrectomy with fusion, atlas and axis
 Vertebrectomy with instrumentation and bone grafting, atlas and axis

Excludes: Laminectomy with fusion, atlas and axis (see [1.SA.75.^ ^](#))
 Laminectomy with instrumentation and bone grafting, atlas and axis (see [1.SA.75.^ ^](#))
 Vertebrectomy with internal fixation, atlas and axis [no bone grafting] (see [1.SA.74.^ ^](#))

Code Also: Any concomitant decompression of spinal cord (see [1.AW.72.^ ^](#))

Note: Use this code when the definitive intervention is the excision of diseased [e.g. tumorous] or traumatized [e.g. totally fragmented] vertebrae which usually requires reconstructive bone grafting and instrumentation to repair the surgical defect and stabilize the vertebrae.

1.SA.89.^ ^ Excision total, atlas and axis	with autograft	with combined sources of tissue	with homograft [e.g. from bone bank]	with synthetic tissue [e.g. bone cement, paste, bioglass]

1.SC.^.^ Therapeutic Interventions on the Spinal Vertebrae

- Includes:** Lumbosacral spinal vertebrae [vertebrae L1-S2]
 Spine NOS
 Transverse process of vertebrae
 Vertebral column
 Vertebral joints (facet, interspinous ligament)
- Excludes:** Atlas and axis alone (see [1.SA.^.^](#))
 Atlas and axis: C1 and C2 [with or without C3] (see [1.SA.^.^](#))
 Sacroiliac joint (see [1.SI.^.^](#))
 Sacrum and coccyx (see [1.SF.^.^](#))

1.SC.02.^.^ Exercise, spinal vertebrae

- Excludes:** Manipulation, spinal vertebrae (see [1.SC.05.^.](#))
-
- 1.SC.02.YD using exercise NOS
 1.SC.02.YH using mobility exercise (joint motion)
 1.SC.02.YK using passive motion exercise
 1.SC.02.YN using active range of motion exercise
 1.SC.02.ZA using aquatic exercise
- Includes:** Hydrotherapy (for) spine (dysfunction)
- 1.SC.02.ZB using balance training exercise
-

1.SC.03.^.^ Immobilization, spinal vertebrae**S** 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 12	Optional	Tx Status 7	Status	R	Revision

- Includes:** Application, halopelvic traction, spinal vertebrae
 Application, immobilization device, spinal vertebrae
 Removal with replacement of immobilization device, spinal vertebrae
 Traction with immobilization, spinal vertebrae
- Excludes:** Application of external immobilization device, atlas with axis [C1-C2 with or without C3] (see [1.SA.03.^.](#))

1.SC.03.^ ^ Immobilization, spinal vertebrae	immobilization alone	immobilization with traction
with bracing device [brace, jacket]	1.SC.03.JA-EQ	—
with cast	1.SC.03.JA-FQ	—
with functional/dynamic orthoses device	1.SC.03.JA-MJ	—
with hyperextension orthoses device	1.SC.03.JA-ML	—
with percutaneous fixator device [tongs, halo]	1.SC.03.HA-KC	1.SC.03.JZ-KC
with pneumatic orthoses device	1.SC.03.JA-MM	—
with sling/halter device	—	1.SC.03.JZ-SQ
with splinting device [e.g. cervical collar, spinal corset]	1.SC.03.JA-SR	—

1.SC.04.^ ^ Mobilization, spinal vertebrae

Includes: Traction, spine

Excludes: Mobilization of C1 and C2 spinal vertebrae (see [1.SA.04.^ ^](#))
 Mobilization with concomitant manipulation of spinal vertebrae (see [1.SC.05.^ ^](#))
 Traction for immobilization of fracture, spine (see [1.SC.03.^ ^](#))

Note: May involve continuous or intermittent application of traction for strains and sprains of spinal ligaments (e.g. whiplash).

1.SC.04.JH using external approach with manual technique

1.SC.05.^ ^ Manipulation, spinal vertebrae

Includes: Mobilization with concomitant manipulation, spinal vertebrae and ligaments
 Skeletal manipulation, spine
 Spinal adjustment

Excludes: Manipulation, atlas and axis [C1-C2 with or without C3] (see [1.SA.05.^ ^](#))
 Massage, back (see [1.SJ.12.^ ^](#))

1.SC.05.JH using external approach with manual technique

1.SC.27.^ ^ Radiation, spinal vertebrae

Includes: Teletherapy, spinal vertebrae
 Therapy, radiation [radiotherapy], spinal vertebrae

Excludes: Radiation therapy involving spinal cord (see [1.AW.27.^ ^](#))
 Radiation therapy of soft tissues of back alone (see [1.SH.27.^ ^](#))

1.SC.27.JA using external beam

1.SC.35.^ ^ Pharmacotherapy (local), spinal vertebrae

Includes: Facet block
Injection, facet joint
Injection, spinal vertebrae

Excludes: Epidural (steroid) injection (see [1.AX.35.^ ^](#))
Injection, spinal canal and meninges (see [1.AX.35.^ ^](#))
Medial branch block (to act on) spinal meninges (see [1.AX.35.^ ^](#))
Pharmacotherapy, local, sacroiliac joint (see [1.SI.35.^ ^](#))
Systemic pharmacotherapy (see [1.ZZ.35.^ ^](#))

1.SC.35.HA-J2	using corticosteroid agent with percutaneous (needle) approach
	Includes: prednisone, dexamethasone, fludrocortisone
1.SC.35.HA-P1	using local anesthetic agent with percutaneous (needle) approach
1.SC.35.HA-P2	using analgesic agent with percutaneous (needle) approach
	Includes: opioids (morphine, meperidine), acetylsalicylic acid, acetaminophen, ergotamine, sumatriptan
1.SC.35.HA-T9	using pharmacological agent NEC with percutaneous (needle) approach

1.SC.38.^ ^ Management of external appliance, spinal vertebrae

Includes: Adjustment of appliance, spine
Applying and removing traction weights
Removal of appliance, spine

Excludes: Fitting of appliance, spine (see [7.SF.18.^ ^](#))
Removal of immobilizing device with replacement (see [1.SC.03.^ ^](#))
Skills training for use of appliance, spine (see [6.VA.50.^ ^](#))

1.SC.38.HA-KC	of percutaneous fixated device [halo, tongs, pin]
1.SC.38.JA-EQ	of bracing device [e.g. brace, plastic jacket]
1.SC.38.JA-FQ	of cast
1.SC.38.JA-MJ	of functional/dynamic orthotic device
1.SC.38.JA-ML	of hyperextension orthotic device
1.SC.38.JA-MM	of pneumatic orthotic device
1.SC.38.JA-SR	of splinting device [e.g. cervical collar, spinal corset]
1.SC.38.JA-TA	of skin fixated traction device

1.SC.54.^ ^ Management of internal device, spinal vertebrae**S** 5 **L** 76

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

				4	Four levels (five vertebrae)
				5	Five levels (six vertebrae)
				6	Six levels (seven vertebrae)
				7	Seven levels (eight vertebrae)
				8	Eight levels (nine vertebrae)
				9	Nine levels (ten vertebrae)
				G	Ten or more levels

- Includes:** Facetectomy with instrumentation, spinal vertebrae
 Fixation, lumbar vertebra to ilium (lumboiliac)
 Fusion without bone grafting, spinal vertebrae
 Instrumentation, spinal vertebrae
 Laminectomy and disectomy with instrumentation, spinal vertebrae
 Laminectomy with instrumentation, spinal vertebrae
 Laminoplasty with fixation
 Laminotomy with instrumentation, spinal vertebrae
 Osteotomy, spinal vertebrae with instrumentation (no bone grafting)
- Excludes:** Fixation, atlas and axis [C1-C2 with or without C3] (see [1.SA.74.^^](#))
 Rib to lamina insertion of vertical expandible prosthetic titanium rib (VEPTR) (see [1.SL.79.^^](#))
 that with bone grafting (see fusion [1.SC.75.^^](#))
 Vertebrectomy with instrumentation (see [1.SC.89.^^](#))
- Code Also:** Any application of external fixator [e.g. halo, tongs] (see [1.SC.03.^^](#))
 Any concomitant decompression of spinal cord where nerve root is damaged to affect release (see [1.AW.72.^^](#))
 Any concomitant interbody (intradiscal) insertion of spacer device (cage) (see [1.SE.53.^^](#))

1.SC.74.^^ Fixation, spinal vertebrae	open anterior (anterolateral) approach	open posterior (posterolateral) approach	percutaneous approach
using device NEC	1.SC.74.LL-GX	1.SC.74.PF-GX	—
using rod with hook or wire [e.g. Phoenix magnetic rod]	1.SC.74.LL-TC	1.SC.74.PF-TC	—

				6	Six levels (seven vertebrae)
				7	Seven levels (eight vertebrae)
				8	Eight levels (nine vertebrae)
				9	Nine levels (ten vertebrae)
				G	Ten or more levels

Includes:

Arthrodesis, spine
 Bone grafting for fusion, spine
 Correction, spine deformity [e.g. scoliosis, kyphosis] by fusion
 Correction, spine deformity [e.g. scoliosis, kyphosis] by instrumentation
 Facetectomy with fusion, spinal vertebrae
 Fixation with bone grafting, spinal vertebrae
 Instrumentation with bone grafting, spinal vertebrae
 Laminectomy and disectomy with multi level fusion, spinal vertebrae
 Laminectomy with fusion, spinal vertebrae
 Laminotomy with fusion, spinal vertebrae
 Osteotomy with bone grafting, spinal vertebrae
 Release (ligament) with fusion, spinal vertebrae

- Excludes:** Fusion by fixation alone (see [1.SC.74.^^](#))
 Fusion with vertebrectomy, spinal vertebrae (see [1.SC.89.^^](#))
 Fusion without bone grafting spinal vertebrae (see [1.SC.74.^^](#))
 Intervertebral spacer device [cage] inserted with bone graft/substitute for interbody fusion alone (see [1.SE.75.^^](#))
 Osteotomy with fixation alone for fusion, spine (see [1.SC.74.^^](#))
 Vertebroplasty (cement) (see [1.SC.80.^^](#))
- Code Also:** Any concomitant decompression of spinal cord where nerve root is damaged to affect release (see [1.AW.72.^^](#))
 Any concomitant single or multi-level interbody [intradiscal] fusion (see [1.SE.75.^^](#))

1.SC.75.^^ Fusion, spinal vertebrae	with autograft	with combined sources of tissue	with homograft [e.g. from bone bank]	with synthetic tissue [e.g. bone cement, paste, bioglass]

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Debridement, sacrum and coccyx
Resection [neoplasm], sacrum
Sequestrectomy, sacrum and coccyx

Excludes: that of soft tissue alone (see [1.SH.87.^ ^](#))
that with reduction (see [1.SF.73.^ ^](#))

Code Also: Any concomitant proctectomy (see [1.NQ.87.^ ^](#))

1.SF.87.^ ^ Excision partial, sacrum and coccyx	posterior approach	combined anterior with posterior approach
without tissue	1.SF.87.PF	1.SF.87.LN
using full thickness graft	1.SF.87.PF-XX-A	1.SF.87.LN-XX-A
using local flap	1.SF.87.PF-XX-E	1.SF.87.LN-XX-E
using pedicled flap	1.SF.87.PF-XX-G	1.SF.87.LN-XX-G

1.SF.89.^.^ Excision total, sacrum and coccyx**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Coccygectomy

1.SF.89.PF using posterior approach

1.SF.91.^.^ Excision radical, sacrum and coccyx**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Resection, sacrum and coccyx with adjacent soft tissue

Note: May involve excision of (sacral or coccygeal) abscess, ulcer or neoplasm arising in soft tissue but extending into bone

1.SF.91.LA using open approach
 1.SF.91.LA-XX-A using open approach and autograft
 1.SF.91.LA-XX-F using open approach and free flap
 1.SF.91.LA-XX-G using open approach and pedicled flap
 1.SF.91.LA-XX-K using open approach and homograft
 1.SF.91.LA-XX-Q using open approach and combined sources of tissue

1.SG.^.^ Therapeutic Interventions on Muscles of the Back

Includes: Erector spinal vertebrae, iliocostalis, latissimus dorsi, longissimus thoracis and colli, rhomboid, semi spinalis and serratus posterior muscles
 Muscles and tendons of back NOS
 Thoracolumbar fascia
 Transversus aponeurosis

1.SG.04.^ ^ Mobilization, muscles of the back

- Includes:** Myofascial release, muscles of back
- Excludes:** Fasciotomy or fasciectomy for release of muscles of back (see [1.SG.72.^ ^](#))
that concomitant with manipulation/adjustment of spine (see [1.SC.05.^ ^](#))
that concomitant with mobilization of spinal vertebrae (see [1.SC.04.^ ^](#))
- Note:** Involves moving, stretching or elongating soft tissue of back.

1.SG.04.JH using external approach with manual technique

1.SG.09.^ ^ Stimulation, muscles of the back

- Includes:** Electrostimulation, muscles of back
Implantation of electrodes (for stimulation), muscles of back
that to promote healing and reduce pain
Transcutaneous electrical stimulation, muscles of back

1.SG.09.HA-CH using percutaneous approach and needle
Includes: Dry needling for (trigger point) intramuscular stimulation, back

1.SG.09.HA-JA using percutaneously implanted electrodes

1.SG.09.JA-AG using laser

1.SG.09.JA-AZ using ultrasound

1.SG.09.JA-DV using external transcutaneous electrical nerve stimulation [TENS]

1.SG.09.JA-DW using external electrical neuromuscular nerve stimulation [EMS]

1.SG.09.JA-DX using external interferential stimulation

1.SG.55.^ ^ Removal of device, muscles of the back**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

1.SG.55.LA-DV of electronic stimulation device using open approach

1.SG.55.LA-KD of wire/staple using open approach

1.SG.55.LA-XX-N of mesh using open approach

1.SG.58.^ ^ Procurement, muscles of the back**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Procurement, latissimus dorsi musculocutaneous (LDM) free flap

Excludes: Procurement, gluteus maximus free flap (see [1.VD.58.^ ^](#))

1.SG.58.LA-XX-A of autograft [e.g. muscle, fascia] using open approach
 1.SG.58.LA-XX-F of free flap using open approach

1.SG.72.^ ^ Release, muscles of the back**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Aponeurotomy, transversus
 Disruption (transcutaneous), muscles of back [adhesions]
 Fasciectomy, thoracolumbar
 Fasciotomy, thoracolumbar

1.SG.72.WJ using excisional technique [e.g. fasciectomy]
 1.SG.72.WK using incisional technique [e.g. aponeurotomy, fasciotomy]

1.SG.80.^ ^ Repair, muscles of the back**S** 28

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 28	Optional	Treatment Status 3A	Status	D	Delayed (closure occurs > 24 hrs post trauma)
				R	Revision
				S	Staged

Includes: Aponeurorrhaphy, transversus
Fascioplasty, thoracolumbar
Fasciorrhaphy, thoracolumbar
Myoplasty, back
Myorrhaphy, back
Rotation plasty, muscle [or tendon] of back

1.SG.80.LA using open approach and simple apposition [e.g. suturing or 'vest-over-pants' closure]
1.SG.80.LA-XX-A using open approach and autograft [e.g. fascia or skin] (for closure of surgical defect)
1.SG.80.LA-XX-E using open approach and local [transposition] flap [e.g. rotation plasty, advancement]
1.SG.80.LA-XX-G using open approach and pedicled flap [e.g. gluteus maximus flap]
1.SG.80.LA-XX-N using open approach and synthetic tissue [e.g. mesh, gortex]
1.SG.80.LA-XX-Q using open approach and combined sources of tissue [e.g. skin graft with flap] (for closure of defect)

1.SG.87.^.^ Excision partial, muscles of the back

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Excision, (non viable) muscle or composite flap of back
Excludes: Debridement of soft tissue (wound) of back (see [1.SH.59.^.](#))
Excision, muscle or tendon of back (see [1.SH.87.^.](#))
Procurement, muscle of back (see [1.SG.58.^.](#))
Resection of neoplasm of soft tissue of back (see [1.SH.87.^.](#))
Note: Involves the excision of necrotic (non- viable) flap tissue

1.SG.87.LA using simple apposition technique [e.g. suture, staple] (for closure of surgical defect)
1.SG.87.LA-XX-A using autograft [e.g. fascia or skin] (for closure of surgical defect)
1.SG.87.LA-XX-E using local transposition flap [e.g. advancement muscle or Z-plasty skin flap] (for closure of defect)
1.SG.87.LA-XX-F using free flap [e.g. myocutaneous free flap] (for closure of defect)
1.SG.87.LA-XX-Q using combined sources of tissue [e.g. skin graft with flap] (for closure of defect)

1.SH.^.^ Therapeutic Interventions on Soft Tissue of Back

Includes: Abscess arising in or extending as deep as muscle or tendon of back
Hematoma arising in or extending as deep as muscle or tendon of back
Neoplasm arising in or extending as deep as muscle or tendon of back
Soft tissue wound of back
Excludes: Skin and subcutaneous tissue alone (see [1.YS.^.^](#))

1.SH.13.^ ^ Control of bleeding, soft tissue of the back

Includes: Control of bleeding (wound) extending into soft tissue (muscle or tendon) of back

Excludes: Application of pressure dressing to control bleeding from soft tissue of back (see [1.YS.14.^ ^](#))
 Control of bleeding that requires a suture/staple repair of muscle or tendon of back (see [1.SY.80.^ ^](#))
 Systemic pharmacotherapy for control of bleeding (see [1.ZZ.35.^ ^](#))
 that for skin wound of trunk (see [1.YS.13.^ ^](#))

1.SH.13.HA-C2	using percutaneous injection of antihemorrhagic agent
	Includes: aminocaproic acid, aprotinin, phytonadione, thrombin, coagulation factor VIII
1.SH.13.JA-C2	using topical antihemorrhagic agent
1.SH.13.JN	using external manual compression

1.SH.26.^ ^ Brachytherapy, soft tissue of back**S** 35

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 35	Optional	Implant Status	Status	P M	Permanent implant – Radioactive source left in place permanently
				T M	Temporary implant – Radioactive source removed after course of treatment is complete

Includes: Endocurietherapy, soft tissue of the back
 Implantation of radioactive material, soft tissue of the back
 Interstitial radiation therapy, soft tissue of the back

Code Also: Any concomitant implantation of brachytherapy applicators or conduits [e.g. needles, catheters] to gain access to treatment site (see [1.SH.53.^ ^](#))

Note: There are typically two distinct phases required to complete the process of brachytherapy. The first phase involves the insertion of non-radioactive applicators or conduits [e.g. hollow needles, catheters, stents etc.] that receive or transmit the radioactive material into the body. The second phase involves the after loading of the radioactive material [e.g. seeds, pellets, wires, etc.] into the applicator or conduit.

1.SH.26.HA	using percutaneous (transcatheter or transneedle) approach
1.SH.26.LA	using open approach

1.SH.27.^.^ Radiation, soft tissue of the back

- Includes:** Teletherapy, soft tissue of back
Therapy, radiation [radiotherapy], soft tissue of back alone
- Excludes:** Radiation therapy involving skin of back alone (see [1.YS.27.^.](#))
Radiation therapy involving spinal cord (see [1.AW.27.^.](#))
Radiation therapy involving spinal vertebrae (see [1.SC.27.^.](#))
- Note:** Involves irradiation of muscle, fascia or tendon

1.SH.27.JA using external beam

1.SH.35.^.^ Pharmacotherapy (local), soft tissue of the back

- Includes:** Instillation, wound of back
Irrigation, soft tissue (wound) of back
Trigger point injection, soft tissue of back
- Excludes:** Irrigation concomitant drainage (see [1.SH.52.^.](#))
Irrigation for removal of foreign body (see [1.SH.56.^.](#))
Systemic pharmacotherapy (see [1.ZZ.35.^.](#))
that for control of bleeding (see [1.SH.13.^.](#))

1.SH.35.^.^ Pharmacotherapy (local), soft tissue of the back	direct instillation [into wound]	percutaneous approach
antiinfective irrigating solution	1.SH.35.JA-D1 Includes: • chlorhexidine, neomycin	—
salt irrigating solution	1.SH.35.JA-D2 Includes: • sodium chloride	—
other irrigating solution	1.SH.35.JA-D3 Includes: • sorbitol, mannitol	—
using antiinfective NEC	1.SH.35.JA-K0	1.SH.35.HA-K0
using bacterial toxin [e.g. botulinum toxin or Botox]	—	1.SH.35.HA-L7
using corticosteroid agent	—	1.SH.35.HA-J2
using local anesthetic agent	1.SH.35.JA-P1	1.SH.35.HA-P1
using analgesic agent	1.SH.35.JA-P2 Includes: • opioids (morphine, meperidine), acetylsalicylic acid, acetaminophen, ergotamine, sumatriptan	1.SH.35.HA-P2 Includes: • opioids (morphine, meperidine), acetylsalicylic acid, acetaminophen, ergotamine, sumatriptan
using pharmacological agent NEC	1.SH.35.JA-T9	1.SH.35.HA-T9

1.SH.52.^ ^ Drainage, soft tissue of the back**S** ⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Drainage [abscess or hematoma], soft tissue of back
that for vertebral abscess
that with or without irrigation

Excludes: Aspiration biopsy (see [2.SH.71.^ ^](#))

1.SH.52.HA using percutaneous (needle) approach
1.SH.52.HA-TS using percutaneous approach with drainage tube left in situ
1.SH.52.LA using open (incisional) approach

1.SH.53.^ ^ Implantation of internal device, soft tissue of the back**S** ⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Implantation, brachytherapy applicator, soft tissue of the back

Code Also: Any concomitant loading of brachytherapy applicator (see [1.SH.26.^ ^](#))

1.SH.53.HA-EM of brachytherapy applicator using percutaneous approach
1.SH.53.LA-EM of brachytherapy applicator using open approach

1.SH.55.^ ^ Removal of device, soft tissue of the back**S** ⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Removal of device, wound of back

1.SH.55.JA-EB of radioactive implant using external approach
1.SH.55.JA-FF of closure device (e.g. suture) using external approach
1.SH.55.JA-GX of device NEC using external approach
1.SH.55.JA-TS of wound drain or drainage catheter using external approach
1.SH.55.LA-EB of radioactive implant using open approach

1.SH.56.^ ^ Removal of foreign body, soft tissue of the back**S** ⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Extraction of (superficial, embedded) foreign body, soft tissue of back

Note: May involve the use of pulsatile jet lavage or irrigation to facilitate the complete removal of foreign body debris.

1.SH.56.JA using external approach (for simple extraction)

1.SH.56.LA using open (incisional) approach

1.SH.59.^ ^ Destruction, soft tissue of the back**S** ⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Debridement, extending into soft tissue (fascia, muscle or tendon) of back
Myoclasia, back

Excludes: Debridement with concomitant repair of muscle, back (see [1.SG.80.^ ^](#))
Debridement, skin of back alone (see [1.YS.59.^ ^](#))

1.SH.59.LA using open approach

1.SH.87.^ ^ Excision partial, soft tissue of the back**S** ⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Resection [neoplasm], soft tissue of back

Excludes: Debridement of ischium with concomitant excision of soft tissue of back or buttock (see [1.SQ.91.^^](#))
 Debridement of soft tissue (wound) of back (see [1.SH.59.^^](#))
 Excision of non-viable muscle (or composite) flap (see [1.SG.87.^^](#))
 Excision of skin of back only (see [1.YS.87.^^](#))
 Procurement, muscle of back (see [1.SG.58.^^](#))

Note: Use this code when the definitive intervention is the excision of diseased (e.g. neoplastic) or traumatised (e.g. burned) soft tissue of back.

1.SH.87.LA	using open approach and simple apposition [e.g. suturing] (to close surgical defect)
1.SH.87.LA-XX-A	using open approach and autograft [e.g. skin] (to close surgical defect)
1.SH.87.LA-XX-E	using open approach and local (transposition) flap [e.g. rotation plasty, Z-plasty, advancement flap] (to close surgical defect)
1.SH.87.LA-XX-G	using open approach and pedicled flap [e.g. gluteus maximus flap] (to close surgical defect)
1.SH.87.LA-XX-Q	using open approach and combined sources of tissue [e.g. skin graft with flap] (to close surgical defect)

1.SI.^^.^^ Therapeutic Interventions on the Sacroiliac Joint

Excludes: Lumbosacral vertebrae L1-S2 (see [1.SC.^^.^^](#))

1.SI.02.^^ Exercise, sacroiliac joint

Includes: Assisting and supervising client in performing exercise, sacroiliac joint

1.SI.02.YD	using exercise NOS
1.SI.02.YK	using passive motion exercise
1.SI.02.YL	using postural (training) exercise
1.SI.02.ZA	using aquatic exercise
	Includes: Hydrotherapy, (for) sacroiliac joint (dysfunction)
1.SI.02.ZB	using balance training exercise

1.SI.04.^^ Mobilization, sacroiliac joint

1.SI.04.JH	using external approach with manual technique
------------	---

1.SI.05.^^ Manipulation, sacroiliac joint

Includes: Joint adjustment, sacroiliac
 Mobilization with concomitant manipulation, sacroiliac joint
 Skeletal manipulation, sacrum and coccyx

Excludes: Adjustment, lumbosacral (see [1.SC.05.^^](#))

1.SI.05.JH	using external approach with manual technique
------------	---

1.SI.35.^ ^ Pharmacotherapy (local), sacroiliac joint**Includes:** Injection, sacroiliac joint

1.SI.35.HA-J2 using percutaneous needle injection of corticosteroid
 1.SI.35.HA-P1 using percutaneous needle injection of local anesthetic agent

1.SI.74.^ ^ Fixation, sacroiliac joint**S** 5 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Reduction with fixation, sacroiliac joint

Excludes: External fixation applied to ilium for immobilization / stabilization of sacroiliac joint or sacrum (see [1.SQ.03.^ ^](#))
 Fixation with bone grafting (fusion) (see [1.SI.75.^ ^](#))
 Fixation, lumbar vertebrae to ilium (see [1.SC.74.^ ^](#))

Code Also: Any concomitant release of piriformis tendon (see [1.VE.72.^ ^](#))

1.SI.74.HA-NW using percutaneous approach and screw
 1.SI.74.PF-KD using posterior approach and wire or staple
 1.SI.74.PF-NW using posterior approach and plate, screw device

1.SI.75.^ ^ Fusion, sacroiliac joint**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Excludes: Fixation (alone) sacroiliac joint (see [1.SI.74.^^](#))
Fusion, lumbosacral vertebrae (see [1.SC.75.^^](#))

1.SI.75.PF-KD-A	using posterior approach and wire or staple with bone autograft
1.SI.75.PF-KD-K	using posterior approach and wire or staple with bone homograft
1.SI.75.PF-NW-A	using posterior approach and screw with bone autograft
1.SI.75.PF-NW-K	using posterior approach and screw with bone homograft

1.SJ.^^.^^ Therapeutic Interventions on the Back NEC

Includes: Spine with muscles and ligaments of back

1.SJ.02.^^ Exercise, back NEC

Includes: Assisting and supervising client in performing exercise
Hydrotherapy, back
that using active or passive exercise techniques

Excludes: that for sacroiliac joint dysfunction (see [1.SI.02.^^](#))

Code Also: Any use of biofeedback (see [7.SP.59.^^](#))

1.SJ.02.YD	using exercise NOS
1.SJ.02.YK	using passive motion exercise
1.SJ.02.YL	using postural exercise [e.g. positioning]
1.SJ.02.YN	using active range of motion exercise
1.SJ.02.YP	using mobility exercise [functional]
1.SJ.02.YQ	using resistive exercise
1.SJ.02.ZA	using aquatic exercise
1.SJ.02.ZB	using balance training exercise

1.SJ.06.^^ Hypothermy, back NEC

Includes: Application of cold, back
that to reduce swelling, pain, etc.

Excludes: destruction of tissue by cryotherapy (see [1.YS.59.^^](#))

1.SJ.06.JA-KL	using external cold (dry) device (e.g. cold pack)
1.SJ.06.JA-KM	using external cold (moist) device (e.g. compress, bath)

1.SJ.07.^.^ Hyperthermy, back NEC

Includes:	Application of heat, back Diathermy, back
Excludes:	Hyperthermy, multiple body sites (see 1.ZX.07.^.^) Stimulation for pain relief (see 1.SG.09.^.^)

1.SJ.07.JA-DU	using infrared device [e.g. lamp, baker]
1.SJ.07.JA-HB	using diathermy device [e.g. microwave, short-wave]
1.SJ.07.JA-KH	using external dry heat device
1.SJ.07.JA-KJ	using external moist heat [e.g. compress, bath]
1.SJ.07.JA-KQ	using paraffin bath
1.SJ.07.JA-TQ	using tank [e.g. Hubbard]
1.SJ.07.JA-TR	using whirlpool

1.SJ.12.^.^ Therapy, back NEC

Includes:	Phototherapy, back Physiotherapy NOS, back
Excludes:	Exercise therapy, back (see 1.SJ.02.^.^) Hydrotherapy, back (see 1.SJ.02.^.^) Hyperthermy treatment alone, back (see 1.SJ.07.^.^) Hypothermy treatment alone, back (see 1.SJ.06.^.^) Mobilization, spine (see 1.SC.04.^.^)

1.SJ.12.JA	using other technique NEC
1.SJ.12.JA-AG	using laser NEC (with or without photosensitizing chemicals)
1.SJ.12.JA-DQ	using ultraviolet light
1.SJ.12.JA-DU	using light NEC [e.g. long wave red light]
1.SJ.12.JA-UE	using vibrating device
1.SJ.12.JD	using acupressure technique
1.SJ.12.JJ	using massage technique
	Excludes: Massage, back with chest (and arms) (see 1.ZX.12.^.^) Massage, upper body (see 1.ZX.12.^.^)
1.SJ.12.JP	using therapeutic touch technique

1.SK.^.^.^ Therapeutic Interventions on the Sternum

Includes:	Manubrium, Sternebrae body, Xiphoid process
Excludes:	Bone marrow (see 1.WY.^.^.^)

1.SK.35.^ ^ Pharmacotherapy (local), sternum*Includes:* Injection, xiphisternal joint

1.SK.35.HA-T9 using pharmacological agent NEC with percutaneous (needle) approach

1.SK.55.^ ^ Removal of device, sternum**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Removal, pectus bar

1.SK.55.LA-KD of wire/mesh/staple using open approach
 1.SK.55.LA-NV of pin/nail using open approach
 1.SK.55.LA-NW of screw/screw and plate/bar using open approach

1.SK.73.^ ^ Reduction, sternum**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Debridement, fracture of sternum, with reduction
Reduction [with removal of bony fragments], sternum*Excludes:* that with fixation, sternum (see [1.SK.74.^ ^](#))

1.SK.73.JA using closed (external) approach
 1.SK.73.LA using open approach (with or without removal of bone fragments)

1.SK.74.^ ^ Fixation, sternum**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Reduction with fixation, sternum

1.SK.74.LA-KD using open approach and wire/mesh/staple
 1.SK.74.LA-NW using open approach and screw/screw with plate

1.SK.80.^.^ Repair, sternum

S 28

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 28	Optional	Treatment Status 3A	Status	D	Delayed (closure occurs > 24 hrs post trauma)
				R	Revision
				S	Staged

Includes: Chondrosternoplasty
 Chondrotomy with osteotomy, sternum
 Correction, funnel chest
 Correction, pectus carinatum
 Correction, pectus excavatum
 Expansion, chest wall (with or without sternotomy)
 Osteotomy, sternum
 Sternoplasty

Excludes: Distraction, ribs using vertical expandable prosthetic titanium rib [VEPTR] (see [1.SL.79.^.^](#))
 Expansion, chest wall by rib distraction (see [1.SL.79.^.^](#))

1.SK.80.^ ^ Repair, sternum	open approach with bone autograft	open approach with synthetic tissue [e.g. substernal mesh bands]	open approach without tissue (for repair)	endoscopic approach without tissue (for repair)	percutaneous needle approach [injection]
using pin/nail	1.SK.80.LA-NV-A	1.SK.80.LA-NV-N	1.SK.80.LA-NV	—	—
using plate/bar/screw	1.SK.80.LA-NW-A	1.SK.80.LA-NW-N	1.SK.80.LA-NW	1.SK.80.DA-NW	—
using wire	1.SK.80.LA-KD-A	1.SK.80.LA-KD-N	1.SK.80.LA-KD	1.SK.80.DA-KD	—
with no device used (in repair)	1.SK.80.LA-XX-A	1.SK.80.LA-XX-N	1.SK.80.LA	1.SK.80.DA	—
using synthetic agent [e.g. Bio Alcamid]	—	—	—	—	1.SK.80.HA-W0 Includes: • Correction of pectus excavatum using injection of synthetic material to fill defect between sternum and skin
using prosthetic [silicone] implant	—	—	1.SK.80.LA-PM Includes: • Correction of pectus excavatum using prosthetic implant made of synthetic material to fill defect between sternum and skin	—	—

1.SK.87.^ ^ Excision partial, sternum**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Debridement, sternum
Sequestrectomy, sternum
Sternectomy, partial

Excludes: Debridement with reduction, sternum (see [1.SK.73.^ ^](#))

Note: Use this code when definitive intervention is the excision of diseased or neoplastic sternum which may require a bone graft to close the surgical defect.

Omit code: When excision [or splitting] of sternum is part of operative approach to spinal vertebrae or thorax.

1.SK.87.LA	using open approach without tissue [for repair]
1.SK.87.LA-KD-A	using open approach and bone autograft with wire or staples
1.SK.87.LA-XX-A	using open approach and bone autograft

1.SL.^.^ Therapeutic Interventions on the Ribs

Includes: Cartilage and ligaments (intercostal and sternocostal) of ribs

1.SL.03.^.^ Immobilization, ribs**S** 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 12	Optional	Tx Status 7	Status	R	Revision

Includes: Application, external immobilization device, ribs
Replacement, external immobilization device, ribs

1.SL.03.JA-FG using binding device [e.g. restrictive dressing, taping, strapping]

1.SL.04.^.^ Mobilization, ribs

Includes: Traction, costal chondral and costal vertebral joints
Excludes: Manual myofascial release only of chest (see [1.SY.04.^.](#)) or of back (see [1.SG.04.^.](#))
Mobilization with concomitant manipulation, costal chondral/vertebral joints (see [1.SL.05.^.](#))

1.SL.04.JH using external approach with manual technique

1.SL.05.^.^ Manipulation, ribs

Includes: Joint adjustment, ribs
Mobilization with concomitant manipulation, costal chondral
Skeletal manipulation, costal chondral and vertebral joints
Excludes: Massage, chest (see [1.SZ.12.^.](#))

1.SL.05.JH using external approach with manual technique

1.SL.27.^.^ Radiation, ribs

Includes: Teletherapy, ribs
Therapy, radiation [radiotherapy], ribs
Therapy, radiation [radiotherapy], ribs, with or without sternum
Therapy, radiation [radiotherapy], sternum alone
Excludes: Radiation therapy of soft tissue of chest and abdomen (see [1.SZ.27.^.](#))

1.SL.27.JA using external beam

1.SL.38.^ ^ Management of external appliance, ribs

Includes: Adjustment, external device or appliance, ribs
Removal, external device or appliance, ribs

Excludes: Removal with replacement of immobilization device (see [1.SL.03.^ ^](#))

1.SL.38.JA-FG of external binding device [e.g. taping]

1.SL.54.^ ^ Management of internal device, ribs**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Excludes: Costectomy, for rib deformity (see [1.SL.80.^ ^](#))
Removal of prosthetic device, ribs (see [1.SL.55.^ ^](#))

1.SL.54.PF-TC using open posterior approach and rod with hook (prosthetic) device
Includes: Adjustment (jackup) and expansion, prosthetic rib
Distraction, vertical expandable prosthetic titanium rib (VEPTR)
Maintenance of implanted vertical expandable prosthetic titanium rib (VEPTR) device

1.SL.55.^ ^ Removal of device or appliance, ribs**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Excludes: Removal of pectus bar (see [1.SK.55.^ ^](#))

1.SL.55.LA-KD of wire/mesh/staple using open approach
1.SL.55.LA-NW of plate/screw using open approach
1.SL.55.PF-TC of rod with hook (prosthetic) device using open posterior approach
Includes: Removal of vertical expandable prosthetic titanium rib (VEPTR)

1.SL.58.^ Procurement, ribs**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

1.SL.58.LL-XX-A of graft using anterior approach
 1.SL.58.LL-XX-F of free flap using anterior approach
 1.SL.58.PF-XX-A of graft using posterior approach
 1.SL.58.PF-XX-F of free flap using posterior approach

1.SL.73.^ Reduction, ribs**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Debridement, fracture of rib(s) with reduction
 Reduction [with removal of bony fragments], ribs

Excludes: that with fixation, ribs (see [1.SL.74.^](#))

1.SL.73.JA using closed (external) approach
 1.SL.73.LA using open approach (with or without removal of bony fragments)

1.SL.74.^ Fixation, ribs**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Reduction with fixation, ribs

Excludes: Scapulocostal fusion (see [1.SN.75.^](#))
 Scapulothoracic fusion of ribs to scapula (see [1.SN.75.^](#))

1.SL.74.LL-KD using anterior approach and wire/mesh/staple
 1.SL.74.LL-NW using anterior approach and plate, screw
 1.SL.74.PF-KD using posterior approach and wire/mesh/staple
 1.SL.74.PF-NW using posterior approach and plate, screw

1.SL.79.^ Repair by increasing size, ribs**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Distraction, ribs (for treatment of thoracic insufficiency syndrome [TIS])
Expansion thoracoplasty

1.SL.79.PF-TC using open posterior approach and rod with hook (prosthetic) device
Includes: Vertical expandable prosthetic titanium rib (VEPTR)

1.SL.80.^ Repair, ribs**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Correction, chest wall [and rib] deformity
Costectomy, for rib deformity
Costoplasty
Grafting, contralateral rib (for bony thorax defect)
Osteotomy, rib [e.g. concave]
Repair, rib deformity

Excludes: Chondrosternoplasty (see [1.SK.80.^](#))
Correction, funnel chest (see [1.SK.80.^](#))
Correction, pectus carinatum (see [1.SK.80.^](#))
Correction, pectus excavatum (see [1.SK.80.^](#))
Costal chondrotomy for pectus excavatum or carinatum (see [1.SK.80.^](#))
Scapulocostal fusion (see [1.SN.75.^](#))
Scapulothoracic fusion of ribs to scapula (see [1.SN.75.^](#))
Thoracoplasty (see [1.GV.52.^](#))

1.SL.80.^ ^ Repair, ribs	no tissue used (in repair)	using autograft [e.g. bone]	using combined sources of tissue [e.g. bone graft or muscle flap]	using synthetic tissue

1.SQ.83.^ ^ Transfer, pelvis**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

- Includes:** Debridement with bone graft, pelvis
Sequestrectomy with bone graft (alone), pelvis
- Excludes:** Ostectomy with bone graft, pelvis (see [1.SQ.87.^^](#))
Sequestrectomy with fixation, pelvis (see [1.SQ.87.^^](#))
that with fixation, pelvis (see [1.SQ.74.^^](#))
that with osteotomy, pelvis (see [1.SQ.80.^^](#))

1.SQ.83.LA-XX-K	using bone homograft
1.SQ.83.LA-XX-N	using synthetic material [e.g. bone cement, paste]
1.SQ.83.LA-XX-Q	using combined sources of tissue [e.g. bone graft, cement/paste]

1.SQ.87.^^ Excision partial, pelvis**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

- Includes:** Debridement, ischium
Debridement, pelvis
Ostectomy, pelvic
Sequestrectomy, pelvis
- Excludes:** Debridement with fixation, pelvis (see [1.SQ.74.^^](#))
Debridement/resection of pelvis with resection of soft tissue [e.g. ischial ulcer, neoplasm] (see [1.SQ.91.^^](#))
Hemipelvectomy [limb sparing] (see [1.SQ.91.^^](#))
Ostectomy, pelvis with radical resection of adjacent soft tissue (see [1.SQ.91.^^](#))

Note: Involves resection of the pelvis [e.g. for neoplasm] which often requires concomitant stabilization of the surgical defect by grafting and applying fixative devices and rarely by bone flap reconstruction. (The definitive intervention is the resection, however, there may be a significant salvage component to manage the surgical wound).

1.SQ.87.^ ^ Excision partial, pelvis	no tissue used (for closure of surgical defect)	using bone autograft	using bone homograft	using combined sources of tissue [e.g. graft, flap, bone cement]	using pedicled flap	using synthetic tissue [e.g. bone cement or paste]
using endoprosthesis [to replace hip joint]	1.SQ.87.LA-PM	1.SQ.87.LA-PM-A	1.SQ.87.LA-PM-K	1.SQ.87.LA-PM-Q	1.SQ.87.LA-PM-G	1.SQ.87.LA-PM-N
using pin, nail	1.SQ.87.LA-NV	1.SQ.87.LA-NV-A	1.SQ.87.LA-NV-K	1.SQ.87.LA-NV-Q	1.SQ.87.LA-NV-G	1.SQ.87.LA-NV-N

Sequestrectomy, pubis

Excludes: that with fixation of pubis (see [1.SW.74.^.^](#))
that with reduction (fracture) of pubis (see [1.SW.73.^.^](#))

1.SW.87.LA using open approach

1.SY.^.^ Therapeutic Interventions on Muscles of the Chest and Abdomen

Includes: Abdominal wall NOS
Chest wall NOS
Deep fascia [endo suprapleural membrane, transversalis, obturator internus]
Internal and external oblique, rectus abdominis, transversus abdominis [internal and external], inguinal ligament, linea alba and semilunaris
Internal intercostal, pectoralis major (medial and lateral), serratus anterior, transversus thoracis and teres muscles
Muscles and tendons of abdomen NOS
Muscles and tendons of chest NOS

Excludes: Breast (see [1.YM.^.^](#))
Neoplasm arising/extending into chest or abdominal wall (see [1.SZ.^.^](#))
Skin and subcutaneous tissue of chest and abdomen (see [1.YS.^.^](#))

1.SY.02.^.^ Exercise, muscles of the chest and abdomen

Includes: Assisting and supervising client in performing exercise
Hydrotherapy, muscles of the chest and abdomen
that using active or passive exercise techniques

Excludes: Breathing exercises (see [1.GZ.02.^.^](#))

Code Also: Any use of biofeedback (see [7.SP.59.^.^](#))

1.SY.02.YD using exercise NOS
1.SY.02.YK using passive motion exercise
1.SY.02.YL using postural exercise [e.g. positioning, stabilizing]
1.SY.02.YN using active range of motion exercise
1.SY.02.YQ using resistive exercise
1.SY.02.ZA using aquatic exercise
1.SY.02.ZB using balance training exercise

1.SY.04.^ ^ Mobilization, muscles of the chest and abdomen

- Includes:** Myofascial release, muscles of the chest and abdomen
- Excludes:** Fasciotomy or fasciectomy for release of muscles of chest and abdomen (see [1.SY.72.^ ^](#))
- Note:** Involves moving, stretching or elongating soft tissue of the chest and abdomen.

1.SY.04.JH using external approach with manual technique

1.SY.09.^ ^ Stimulation, muscles of the chest and abdomen

- Includes:** Cutaneous stimulation, muscles of chest and abdomen
Electrostimulation, muscles of chest and abdomen
Implantation of electrodes, muscles of chest and abdomen
Low intensity laser stimulation, muscles of chest and abdomen
that to promote healing and reduce pain

1.SY.09.HA-JA using percutaneous insertion of electrodes
1.SY.09.JA-AG using laser
1.SY.09.JA-AZ using ultrasound
1.SY.09.JA-DV using transcutaneous electric nerve stimulation [TENS]
1.SY.09.JA-DW using electrical neuromuscular stimulation nerve stimulation [EMS]
1.SY.09.JA-DX using interferential stimulation
1.SY.09.JA-EE using functional electrical stimulation [FES]

1.SY.55.^ ^ Removal of device, muscles of the chest and abdomen**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

- Excludes:** Removal of device from subcutaneous pocket (see [1.YY.55.^ ^](#))
Removal of pectus bar (see [1.SK.55.^ ^](#))
Removal of wound drain (see [1.SZ.55.^ ^](#))

1.SY.55.DA-XX-N of mesh using endoscopic [laparoscopic] approach
1.SY.55.LA-FT of permanent catheter [peritoneal dialysis] using open approach
1.SY.55.LA-JA of electrical stimulation device [e.g. electrodes] using open approach
1.SY.55.LA-XX-N of mesh using open approach

1.SY.57.^ ^ Extraction, muscles of the chest and abdomen**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Removal [calcium deposits], muscles of chest and abdomen

1.SY.57.LA using open approach

1.SY.58.^ ^ Procurement, muscles of the chest and abdomen**S** 4 **L** 35

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 35	Optional	Trunk	Location	L W	Lower trunk (e.g. rectus abdominis)
				U P	Upper (e.g. pectoralis major)

Includes: Procurement, transverse rectus abdominis myocutaneous [TRAM] flap

Excludes: Procurement of fasciocutaneous free flap (see Procurement, skin, by site)
Procurement of gluteus maximus (gluteal) free flap (see [1.VD.58.^ ^](#))
Procurement of latissimus dorsi musculocutaneous (LDM) free flap (see [1.SG.58.^ ^](#))

1.SY.58.LA-XX-A of muscle (or fascia or tendon) graft

1.SY.58.LA-XX-F of free flap

Includes: Composite myocutaneous flap
Transverse rectus abdominis myocutaneous [TRAM] free flap

1.SY.58.LA-XX-G of (distant) pedicled flap

Includes: Procurement, delayed transverse rectus abdominis myocutaneous [TRAM] pedicled flap

Note: This code is for use alone when it is the first stage of a planned staged intervention

Omit code: When pedicled flap procurement is performed concomitantly with reconstructive or repair surgery

1.SY.72.^ ^ Release, muscles of the chest and abdomen**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Fasciectomy, chest and abdomen
 Fasciotomy, chest and abdomen
 Myotomy, chest and abdomen

1.SY.72.WJ using open excisional technique [e.g. fasciectomy]
 1.SY.72.WK using open incisional technique [e.g. fasciotomy, myotomy]

1.SY.80.^ ^ Repair, muscles of the chest and abdomen

S 59 **L** 36

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 59	Mandatory	Mandatory Tx Status 13	Status	0	Not applicable
				A	Abandoned after onset
				C	Converted (from endoscopic to open)
				D P	Delayed primary (repair occurring 2 to 14 days post-trauma)
				D S	Delayed secondary (repair occurring > 14 days post-trauma)
				R	Revision
L 36	Mandatory	Mandatory Hernias 2	Location	0	Not applicable
				B	Lower abdominal region includes: femoral, inguinal, pudendal, retroperitoneal - bilateral sites (hernias)
				L W	Lower abdominal region includes: femoral, inguinal, pudendal, retroperitoneal – unilateral site (hernia)
				U	Unspecified (or multiple or overlapping regions/hernias)
				U P	Upper abdominal region includes: umbilical site (hernia)

- Includes:**
- Abdominoplasty
 - Closure [temporary], abdominal wall (for continuous access to abdomen)
 - Correction, prune belly (by vertical plication or transverse excision and closure)
 - Fascioplasty, chest and abdomen
 - Fasciorrhaphy, chest and abdomen
 - Hernioplasty, abdominal, incisional, umbilical, ventral
 - Hernioplasty, inguinal, femoral, retroperitoneal, pudendal
 - Herniorrhaphy, abdominal, incisional, umbilical, ventral
 - Herniorrhaphy, direct or indirect [inguinal, femoral]
 - Herniorrhaphy, inguinal, femoral, retroperitoneal, pudendal
 - Myoplasty, abdomen or chest
 - Myorrhaphy, abdomen or chest
 - Panniculectomy with repair of abdominal muscles
 - Repair, abdominal or chest wall
 - Repair, hernia [femoral, incisional, inguinal, pudendal, umbilical, ventral]
 - Repair, muscle [or tendon], abdominal wall (with or without fascia repair)
 - Repair, muscle [or tendon], chest wall (with or without fascia repair)
 - Repair, prune belly (by vertical plication or transverse excision and closure)
- Excludes:**
- Herniorrhaphy, diaphragmatic, hiatal, paraesophageal (see [1.GX.80.^](#))
 - Mini abdominoplasty (see [1.YS.78.^](#))
 - Panniculectomy alone (see [1.YS.78.^](#))
 - Repair, abdominal wall for omphalocele (or gastroschisis) (see [1.SY.84.^](#))
 - Repair, pectus deformity (see [1.SK.80.^](#))
 - Umbilicoplasty (see [1.SY.84.^](#))
- Code Also:**
- Any robotic telemanipulation of tools (see [7.SF.14.^](#))
 - Any transection of ilioinguinal or iliohypogastric nerve (see [1.BS.87.^](#))
 - If desired, any concomitant contralateral exploration for bilateral hernia done with a unilateral hernia repair (see [2.OT.70.^](#))

1.SY.80.^ Repair, muscles of the chest and abdomen	endoscopic [laparoscopic] approach	open approach	endoscopic [laparoscopic] approach with special incisional technique
without tissue [e.g. suturing or stapling]	1.SY.80.DA	1.SY.80.LA Includes: • Bassini hernioplasty	—
using synthetic tissue [e.g. mesh, sponge]	1.SY.80.DA-XX-N Includes: • Transabdominal preperitoneal repair (TAPP)	1.SY.80.LA-XX-N	1.SY.80.GD-XX-N Includes: • Hybrid hernia repair • Totally extraperitoneal repair (TEP) • Transabdominal extraperitoneal repair (TEPP)
using special excisional technique	—	1.SY.80.WJ Includes: • Shouldice hernioplasty Note: • Involves division/dissection of the cremaster muscle and opening of the posterior wall of the inguinal canal with reconstruction of the deep ring (myopectineal orifice). May also involve fasciectomy (transversalis fascia dissection) for "triple layer repair" and removal of any lipoma from either the inner ring or spermatic cord.	—
using autograft [e.g. fascia, skin]	1.SY.80.DA-XX-A	1.SY.80.LA-XX-A	—
using homograft [e.g. tissue from deceased donor]	—	1.SY.80.LA-XX-K	—

using free flap [e.g. free myocutaneous flap]	1.SY.80.DA-XX-F	1.SY.80.LA-XX-F	—
using pedicled flap [e.g. abdominis rectus or deltopectoral]	1.SY.80.DA-XX-G	1.SY.80.LA-XX-G	—
using zipper [temporary] [for repeat access to abdomen]	—	1.SY.80.LA-TZ	—
using combined sources of tissue [e.g. mesh with autograft]	—	1.SY.80.LA-XX-Q	—
using temporary abdominal closure device	—	1.SY.80.LA-FF Includes: • ABRA system (gradual low tension) • Bogota bag	—

1.SY.84.^ ^ Construction or reconstruction, muscles of the chest and abdomen**S** 10 **E** 15

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 10	Optional	Tx Status 5	Status	A	Abandoned after onset
				R	Revision
				S	Staged
E 15	Optional	Laceration	Extent	E	5 to 10 cm
				G	Greater than 10 cm
				L	Less than 5 cm

Includes: Correction, bladder exstrophy
 Reconstruction, abdominal wall [anomaly]
 Reduction, gastroschisis
 Reduction, omphalocele
 Repair, omphalocele (or gastroschisis)
 that for staged cloacal exstrophy repair
 Umbilicoplasty [for birth anomaly]

Excludes: Herniorrhaphy, umbilical (see [1.SY.80.^ ^](#))
 Repair, omphalomesenteric duct anomaly by enterectomy (see [1.NK.87.^ ^](#))

Code Also: Anastomosis, bladder halves (with cloacal deformity)(see [1.PM.84.^ ^](#))
 Osteotomy, innominate bone (see [1.SQ.80.^ ^](#))

Note: Involves reconstructing an intact abdominal wall in those infants born with an abdominal defect through which both hollow and solid abdominal viscera can pass. Closure of the abdomen is performed following a reduction of any protruding organs. This may take place in one stage or over multiple stages (depending on size of defect).

1.SY.84.LA using apposition technique [e.g. suturing]
 1.SY.84.LA-XX-A using autograft [e.g. umbilical patch]
 1.SY.84.LA-XX-K using homograft
 1.SY.84.LA-XX-L using xenograft
 1.SY.84.LA-XX-N using synthetic tissue [e.g. mesh, silastic sheath, silo]
 1.SY.84.LA-XX-Q using combined synthetic tissue and local transposition flap [e.g. gortex or mesh with advancement skin flap]

1.SY.87.^ ^ Excision partial, muscles of the chest and abdomen**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes:	Excision, (non viable) (or necrotic) muscle or composite flap, chest (breast) or abdomen
Excludes:	Debridement (extending into) soft tissue (fascia, muscle or tendon) of chest and abdomen (see 1.SZ.59.^^)
	Excision, soft tissue of chest and abdomen (see 1.SZ.87.^^)
	Procurement, muscle flap of chest and abdomen (see 1.SY.58.^^)
	Resection [neoplasm], soft tissue of chest and abdomen (see 1.SZ.87.^^)
1.SY.87.LA	using simple apposition technique [e.g. suture, staple] (for closure of surgical defect)
1.SY.87.LA-XX-A	using autograft [e.g. fascia or skin] (for closure of surgical defect)
1.SY.87.LA-XX-E	using local transposition flap [e.g. advancement muscle or Z-plasty skin flap] (for closure of defect)
1.SY.87.LA-XX-F	using free flap [e.g. myocutaneous free flap] (for closure of defect)
1.SY.87.LA-XX-Q	using combined sources of tissue [e.g. skin graft with flap] (for closure of defect)

1.SZ.^^.^^ Therapeutic Interventions on Soft Tissue of Chest and Abdomen

Includes:	Abscess arising in or extending as deep as chest or abdominal wall
	Hematoma arising in or extending as deep as chest or abdominal wall
	Neoplasm arising in or extending as deep as chest or abdominal wall
	Wound of soft tissue of chest and abdomen
Excludes:	Breast (see 1.YM.^^.^^)
	Skin and subcutaneous tissue of chest and abdomen (see 1.YS.^^.^^)

1.SZ.06.^^ Hypothermy, soft tissue of the chest and abdomen

Includes:	Application of cold, soft tissue of chest and abdomen
	Cryotherapy, soft tissue of chest and abdomen
	that to reduce swelling, pain, etc.
1.SZ.06.JA-KL	using external cold (dry) device [e.g. cold pack]
1.SZ.06.JA-KM	using external cold (moist) device [e.g. compress]

1.SZ.07.^^ Hyperthermy, soft tissue of the chest and abdomen

Includes:	Application of heat, soft tissue of chest and abdomen
	Diathermy, soft tissue of chest and abdomen
Excludes:	Hyperthermy, multiple body sites (see 1.ZX.07.^^)
1.SZ.07.JA-DU	using infrared device [e.g. lamp, baker]
1.SZ.07.JA-HB	using diathermy device [e.g. microwave, shortwave]
1.SZ.07.JA-KH	using external dry heat device
1.SZ.07.JA-KJ	using external moist heat [e.g. compress, bath]
1.SZ.07.JA-KQ	using paraffin
1.SZ.07.JA-TQ	using tank [e.g. Hubbard]
1.SZ.07.JA-TR	using whirlpool

1.SZ.12.^ ^ Therapy, soft tissue of the chest and abdomen

- Includes:** Phototherapy, soft tissue of chest and abdomen
 Physiotherapy NOS, soft tissue of chest and abdomen
- Excludes:** Chest physiotherapy to improve respiration (see [1.GZ.12.^ ^](#))
 Hyperthermy treatment alone (see [1.SZ.07.^ ^](#))
 Hypothermy treatment alone (see [1.SZ.06.^ ^](#))

1.SZ.12.JA	using other technique NEC
1.SZ.12.JA-AG	using laser NEC (with or without photosensitizing chemical)
1.SZ.12.JA-DQ	using ultraviolet light
1.SZ.12.JA-DU	using light NEC [e.g. long wave red light]
1.SZ.12.JD	using acupressure technique
1.SZ.12.JJ	using massage technique
	Excludes: Massage, chest with back (and arms) (see 1.ZX.12.^ ^)
1.SZ.12.JP	using therapeutic touch technique

1.SZ.13.^ ^ Control of bleeding, soft tissue of the chest and abdomen

- Includes:** Control of bleeding (wound) extending into soft tissue (muscle or tendon) of chest and abdomen (wall) that for open wound or contusion of muscle/soft tissue of chest and abdomen
- Excludes:** Application of pressure dressing for control of bleeding soft tissue of chest and abdomen (see [1.YS.14.^ ^](#))
 Control of bleeding involving skin wound of trunk only (see [1.YS.13.^ ^](#))
 Control of bleeding requiring suture/staple repair to muscle or tendon of chest and abdomen (see [1.SY.80.^ ^](#))
 Systemic pharmacotherapy for control of bleeding (see [1.ZZ.35.^ ^](#))

1.SZ.13.HA-C2	using percutaneous injection of antihemorrhagic agent
	Includes: aminocaproic acid, aprotinin, phytonadione, thrombin, coagulation factor VIII
1.SZ.13.JA-C2	using topical antihemorrhagic agent
1.SZ.13.JN	using external manual compression

1.SZ.26.^ ^ Brachytherapy, soft tissue of the chest and abdomen**S** 35

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 35	Optional	Implant Status	Status	P M	Permanent implant – Radioactive source left in place permanently
				T M	Temporary implant – Radioactive source removed after course of treatment is complete

Includes:	Endocurietherapy, soft tissue of the chest and abdomen Implantation of radioactive material, soft tissue of the chest and abdomen Interstitial radiation therapy, soft tissue of the chest and abdomen
Excludes:	Brachytherapy of breast (see 1.YM.26.^^) Brachytherapy of skin of abdomen and chest alone (see 1.YS.26.^^)
Code Also:	Any concomitant implantation of brachytherapy applicators or conduits [e.g. needles, catheters] to gain access to treatment site (see 1.SZ.53.^^)
Note:	There are typically two distinct phases required to complete the process of brachytherapy. The first phase involves the insertion of non-radioactive applicators or conduits [e.g. hollow needles, catheters, stents etc.] that receive or transmit the radioactive material into the body. The second phase involves the after loading of the radioactive material [e.g. seeds, pellets, wires, etc.] into the applicator or conduit.
1.SZ.26.HA	using percutaneous (transcatheter or transneedle) approach
1.SZ.26.LA	using open approach

1.SZ.27.^^ Radiation, soft tissue of the chest and abdomen

Includes:	Teletherapy, soft tissue of chest and abdomen Therapy, radiation [radiotherapy], soft tissue of chest and abdomen alone
Excludes:	Radiation therapy of breast (see 1.YM.27.^^) Radiation therapy of skin of abdomen and chest alone (see 1.YS.27.^^) that involving deeper sites in thorax or abdomen (see Radiation, by site)
Note:	Involves irradiation of muscle, fascia or tendon.
1.SZ.27.JA	using external beam

1.SZ.35.^ ^ Pharmacotherapy (local), soft tissue of the chest and abdomen

Includes: Injection of agent, soft tissue of chest or abdomen
 Instillation, wound of chest or abdomen
 Irrigation, soft tissue (wound) of chest or abdomen
 Trigger point injection, soft tissue of chest and abdomen

Excludes: Irrigation of wound, skin of trunk (see [1.YS.35.^ ^](#))
 Irrigation with drainage, soft tissue of chest or abdomen (see [1.SZ.52.^ ^](#))
 Systemic pharmacotherapy (see [1.ZZ.35.^ ^](#))
 that for control of bleeding (see [1.SZ.13.^ ^](#))
 that for removal of foreign body (see [1.SZ.56.^ ^](#))

1.SZ.35.^ ^ Pharmacotherapy (local), soft tissue of the chest and abdomen	direct instillation [into wound]	percutaneous approach
using antiinfective irrigating agent	1.SZ.35.JA-D1 Includes: • chlorhexidine, neomycin	—
using salt irrigating solution	1.SZ.35.JA-D2 Includes: • sodium chloride	—
using other irrigating solution	1.SZ.35.JA-D3 Includes: • sorbitol, mannitol	—
using antiinfective	—	1.SZ.35.HA-K0
using analgesic agent	1.SZ.35.JA-P2 Includes: • opioids (morphine, meperidine), acetylsalicylic acid, acetaminphen, ergotamine, sumatriptan	1.SZ.35.HA-P2 Includes: • opioids (morphine, meperidine), acetylsalicylic acid, acetaminphen, ergotamine, sumatriptan
using pharmacological agent NEC	1.SZ.35.JA-T9	1.SZ.35.HA-T9
using local anesthetic agent	1.SZ.35.JA-P1	1.SZ.35.HA-P1
using corticosteroid agent	—	1.SZ.35.HA-J2

1.SZ.52.^ ^ Drainage, soft tissue of the chest and abdomen**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Drainage [abscess, hematoma], groin or inguinal region
 Drainage [abscess, hematoma], soft tissue of chest and abdomen
 Drainage, abdominal wall (abscess)
 Drainage, chest wall (abscess)
 that with or without irrigation

1.SZ.52.HA using percutaneous (needle) approach
 1.SZ.52.HA-TS using percutaneous approach with drainage tube left in situ
 1.SZ.52.LA using open (incisional) approach

1.SZ.53.^ ^ Implantation of internal device, soft tissue of the chest and abdomen**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Implantation, brachytherapy applicator, soft tissue of the chest and abdomen

Code Also: Any concomitant loading of brachytherapy applicator (see [1.SZ.26.^ ^](#))

1.SZ.53.HA-EM of brachytherapy applicator using percutaneous approach
 1.SZ.53.LA-EM of brachytherapy applicator using open approach

1.SZ.55.^ ^ Removal of device, soft tissue of the chest and abdomen

Includes: Removal of device, abdominal wall
 Removal of device, chest wall

Excludes: Removal, pectus bar (see [1.SK.55.^ ^](#))

1.SZ.55.JA-EB of radioactive implant using external approach
 1.SZ.55.JA-FF of closure device (e.g. sutures) using external approach
 1.SZ.55.JA-GX of device NEC using external approach
 1.SZ.55.JA-HD of wound drain using external approach
 1.SZ.55.LA-EB of radioactive implant using open approach
 1.SZ.55.LA-XX-N of mesh using open approach

1.SZ.56.^.^ Removal of foreign body, soft tissue of the chest and abdomen**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Extraction of (superficial, embedded) foreign body, soft tissue of chest and abdomen
Removal of foreign body, abdominal wall
Removal of foreign body, chest wall

Note: May involve the use of pulsatile jet lavage or irrigation to facilitate complete removal of foreign body debris.

1.SZ.56.JA using external approach (for simple extraction)

1.SZ.56.LA using open (incisional) approach

1.SZ.59.^.^ Destruction, soft tissue of the chest and abdomen**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Debridement, (extending into soft tissue (fascia, muscle or tendon) of abdominal or chest
Debridement, soft tissue (wound, hematoma) of abdomen
Debridement, soft tissue (wound, hematoma) of chest (wall)
Myoclasia, chest and abdomen

Excludes: Debridement, skin of chest and abdomen alone (see [1.YS.59.^.^](#))
Repair with debridement, skin of chest and abdomen (see [1.YS.80.^.^](#))

Code Also: Any concomitant skin grafting (see [1.YS.80.^.^](#))

1.SZ.59.HA-AW using percutaneous needle approach [injection] and radiofrequency probe

1.SZ.59.LA using open approach

1.SZ.87.^ ^ Excision partial, soft tissue of the chest and abdomen**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

- Includes:** Excision partial, abdominal wall
Excision partial, chest wall
Resection [neoplasm], soft tissue of chest and abdomen
Revision, total mastectomy (secondary resection of soft tissues of chest)
- Excludes:** Abdominal wall resection involving structures (or organs) within abdominal cavity (see [1.OT.91.^ ^](#))
Excision of space occupying lesion, abdominal cavity (see [1.OT.91.^ ^](#))
Procurement, muscles of chest and abdomen (see [1.SY.58.^ ^](#))
Radical rib resection involving rib and soft tissue (see [1.SL.91.^ ^](#))
Radical soft tissue resection involving rib ostectomy (see [1.SL.91.^ ^](#))
Radical soft tissue resection involving scapula ostectomy (see [1.SN.91.^ ^](#))
Resection of non-viable muscle flap of chest and abdomen (see [1.SY.87.^ ^](#))
- Note:** Use this code when the definitive intervention is the excision of diseased (e.g. neoplastic) or traumatised (e.g. burned) soft tissue of chest and abdomen.
- Omit code:** When excision facilitates or is in aid of a hernia repair (see [1.SY.80.^ ^](#))

1.SZ.87.DA	using endoscopic (laparoscopic) approach
1.SZ.87.LA	using open approach and apposition [suture, staple] (to close surgical defect)
1.SZ.87.LA-XX-A	using open approach and autograft [e.g. fascia or skin] (to close surgical defect)
1.SZ.87.LA-XX-E	using open approach and local transposition flap [e.g. advancement muscle or Z-plasty skin flap] (to close surgical defect)
1.SZ.87.LA-XX-F	using open approach and free flap (to close surgical defect)
1.SZ.87.LA-XX-G	using open approach and pedicled flap (to close surgical defect)
1.SZ.87.LA-XX-N	using open approach and synthetic tissue [e.g. mesh] (to close surgical defect)
1.SZ.87.LA-XX-Q	using open approach and combined sources of tissue [e.g. flaps and grafts or mesh with graft/flap] (to close surgical defect)

Therapeutic Interventions on the Shoulder and Arm (excluding hand and wrist) (1TA - 1TZ)

1.TA.^.^ Therapeutic Interventions on the Shoulder Joint

- Includes:** Bursa, capsule, cartilage, ligament and synovial lining of coracohumeral and glenohumeral joints
 Glenoid cavity, labrum
 Greater tuberosity [tubercle] of humerus
 Humeral head and surgical neck
 Shoulder joint NOS
 Shoulder ligaments: coracohumeral, glenohumeral, glenoid labrum, humeral and rotator interval
- Excludes:** Acromioclavicular and sternoclavicular joints (see [1.TB.^.^](#))

1.TA.02.^.^ Exercise, shoulder joint

- Includes:** Continuous passive motion, shoulder joint
 Hydrotherapy, shoulder joint
 that for rotator cuff and shoulder muscle rehabilitation
- Code Also:** Any use of biofeedback (see [7.SP.59.^.](#))
- Note:** Involves assisting and supervising client in performing exercises.

1.TA.02.YD	using exercise NOS
1.TA.02.YG	using exertional rotation exercise
1.TA.02.YK	using passive motion exercise
1.TA.02.YL	using postural exercise
1.TA.02.YN	using active range of motion exercise
1.TA.02.YQ	using resistive exercise
1.TA.02.ZA	using aquatic exercise
1.TA.02.ZB	using balance training exercise

1.TA.03.^.^ Immobilization, shoulder joint

S 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 12	Optional	Tx Status 7	Status	R	Revision

- Includes:** Application, external immobilization device, shoulder joint
 Application, percutaneous external fixator, shoulder (with or without scapula)
 Removal with replacement, external immobilization device, shoulder joint
- Note:** May involve concomitant immobilization of neck and upper arm.

1.TA.03.HA-KC	using percutaneous external fixator
1.TA.03.JA-EQ	using brace
1.TA.03.JA-FG	using binding device [e.g. restrictive dressing, figure of 8 strap]
1.TA.03.JA-FQ	using cast [e.g. cummerbund handshake cast]
1.TA.03.JA-MM	using pneumatic orthotic device [e.g. air cast]
1.TA.03.JA-SQ	using sling
1.TA.03.JA-SR	using splinting device [e.g. modified shoulder spica]

1.TA.04.^ Mobilization, shoulder joint**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Traction, shoulder

Excludes: Manual myofascial release only around shoulder (see [1.TF.04.^](#))
 Mobilization with concomitant manipulation, shoulder (see [1.TA.05.^](#))
 Traction for immobilization of fracture of shoulder (see [1.TA.03.^](#))

1.TA.04.JH using external approach with manual technique

1.TA.05.^ Manipulation, shoulder joint**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Joint adjustment, shoulder
 Mobilization with concomitant manipulation, shoulder
 Skeletal manipulation, shoulder

Excludes: Massage, shoulder (see [1.TA.12.^](#))

1.TA.05.JH using external approach with manual technique

1.TA.06.^ Hypothermy, shoulder joint

Includes: Application of cold, shoulder
Cryotherapy, shoulder joint
that to reduce swelling, pain, etc.

1.TA.06.JA-KL	using external cold (dry) device [e.g. cold pack]
1.TA.06.JA-KM	using external cold (moist) device [e.g. compress, bath]

1.TA.07.^ Hyperthermy, shoulder joint

Includes: Application, heat, soft tissue of shoulder
Diathermy, shoulder joint

Excludes: Hyperthermy, multiple body sites (see [1.ZX.07.^](#))

1.TA.07.JA-CG	using microwave
1.TA.07.JA-DU	using infrared device [e.g. lamp, baker]
1.TA.07.JA-DZ	using short wave
1.TA.07.JA-EA	using conductive heat device
1.TA.07.JA-HB	using other diathermy device NEC
1.TA.07.JA-KH	using externally applied dry heat [e.g. heating pad]
1.TA.07.JA-KJ	using externally applied moist heat [e.g. compress, soak]
1.TA.07.JA-KQ	using paraffin
1.TA.07.JA-TQ	using tank [e.g. Hubbard]
1.TA.07.JA-TR	using whirlpool

1.TA.12.^ Therapy, shoulder joint

Includes: Phototherapy, shoulder
Physiotherapy NOS, shoulder
Therapy, laser, shoulder (for pain reduction and promotion of healing)

Excludes: Exercise therapy, shoulder (see [1.TA.02.^](#))
Hydrotherapy, shoulder (see [1.TA.02.^](#))
Hyperthermy, shoulder (see [1.TA.07.^](#))
Hypothermy, shoulder (see [1.TA.06.^](#))
Therapy (photo, laser massage) of soft tissue of arm (see [1.TX.12.^](#))

1.TA.12.JA-AG	using laser NEC (with or without photosensitizing chemicals)
1.TA.12.JA-DQ	using ultraviolet light
1.TA.12.JA-DU	using light NEC [e.g. long wave red light]
1.TA.12.JJ	using massage technique

1.TA.35.^ ^ Pharmacotherapy (local), shoulder joint**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Injection, shoulder joint
 Instillation, shoulder joint
 Irrigation (arthroscopic), shoulder joint

Excludes: Ablation of synovium of shoulder joint (see [1.TA.59.^ ^](#))
 Pharmacotherapy, soft tissue arm (see [1.TX.35.^ ^](#))
 Radiation or medical synovectomy or synoviorthesis of shoulder joint (see [1.TA.59.^ ^](#))
 Systemic pharmacotherapy (see [1.ZZ.35.^ ^](#))

1.TA.35.^ ^ Pharmacotherapy (local), shoulder joint	endoscopic (arthroscopic) approach	percutaneous (needle) approach	open approach
using antiinfective irrigating solution	1.TA.35.DA-D1 Includes: • chlorhexidine, neomycin	—	—
using salt irrigating solution	1.TA.35.DA-D2 Includes: • sodium chloride	—	—
using other irrigating solution	1.TA.35.DA-D3 Includes: • sorbitol, mannitol	—	—
using corticosteroid agent	—	1.TA.35.HA-J2 Includes: • prednisone, dexamethasone, fludrocortisone	—
using antiinfective agent NEC	—	1.TA.35.HA-K0	—
using antiinflammatory agent	—	1.TA.35.HA-N1 Includes: • NSAIDs (indomethacin, ibuprofen, diclofenac), chloroquine, aurothioglucose, D penicillamine	—
using local anaesthetic agent	1.TA.35.DA-P1	1.TA.35.HA-P1	—
using analgesic agent	—	1.TA.35.HA-P2	—
using pharmacological agent NEC	—	1.TA.35.HA-T9	—
using antibacterial agent (e.g. gentamycin beads)	—	—	1.TA.35.LA-K8

1.TA.38.^ ^ Management of external appliance, shoulder joint

Includes: Adjusting appliance, shoulder
Removal of immobilization device, shoulder

Excludes: Removal with replacement, external immobilization device (see [1.TA.03.^ ^](#))

1.TA.38.HA-KC	of percutaneous external fixator device
1.TA.38.JA-EQ	of brace
1.TA.38.JA-FG	of binding device [e.g. restrictive dressing, figure of 8 strap]
1.TA.38.JA-FQ	of cast [e.g. Cummertbund handshake cast]
1.TA.38.JA-MM	of pneumatic orthotic device [e.g. air cast]
1.TA.38.JA-SQ	of sling

1.TA.80.^ ^ Repair, shoulder joint**S** ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes:

Advancement, shoulder capsule
 Arthroplasty interpositional [fascial], shoulder
 Arthroplasty resection, shoulder
 Arthroplasty, shoulder
 Bankart operation
 Capsuloplasty with ligament repair, shoulder
 Capsulorrhaphy, shoulder [glenohumeral joint]
 Imbrication, glenoid labrum
 Release, shoulder capsule with tendon transfer (for rebalancing)
 Release, shoulder ligament with interpositional graft (to prevent adhesions)
 Repair, shoulder [laxity] with tendon transfer
 Repair, shoulder ligaments: coracohumeral, glenohumeral, glenoid labrum, humeral and rotator interval
 Revascularization, humeral head
 Revascularization, shoulder joint [humeral head]
 Shift, capsular, shoulder joint
 Slide, shoulder capsule, with tendon fixation
 Suture, capsule, shoulder

Excludes:

Arthroplasty with internal fixation, shoulder joint (see [1.TA.74.^ ^](#))
 Arthroplasty with prosthetic replacement, shoulder (see [1.TA.53.^ ^](#))

Code Also:

Any concomitant acromioplasty (see [1.TB.80.^ ^](#))
 Any rotator cuff repair (see [1.TC.80.^ ^](#))

Note:

May involve multiple interventions on shoulder joint (such as: joint excision [synovectomy, arthrectomy or chondrectomy], loose body extraction, remodelling humeral head [or tuberosity], ligament resection [repair or release].

1.TA.80.^ Repair, shoulder joint	endoscopic [arthroscopic] approach	open approach
using autograft [e.g. bone, interpositional fascia, muscle graft]	1.TA.80.DA-XX-A	1.TA.80.LA-XX-A
using combined sources of tissue [autograft with synthetic tissue]	1.TA.80.DA-XX-Q	1.TA.80.LA-XX-Q
using laser (alone) [to shrink tissue]	1.TA.80.DA-AG	—
using local tendon transfer [rebalancing]	1.TA.80.DA-XX-E	1.TA.80.LA-XX-E
using simple apposition technique only [e.g. suturing, anchors]	1.TA.80.DA	1.TA.80.LA
using special incisional technique [e.g. multiple burr holes for humeral head revascularization]	1.TA.80.GZ	1.TA.80.WK
using synthetic tissue [e.g. mesh, gortex, silastic sheath]	1.TA.80.DA-XX-N	1.TA.80.LA-XX-N
using bioabsorbable binding device [e.g. biostinger, fastener, anchor, arrow, LactoSorb plate, staple or dart]	1.TA.80.DA-FH	1.TA.80.LA-FH
using device NEC [e.g. electrocautery] [to shrink tissue]	1.TA.80.DA-GX Includes: • Thermal capsulorrhaphy	—

1.TA.83.^ Transfer, shoulder joint**S** 5 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Autotransplantation, cultured chondrocyte cells, shoulder joint
Therapy, chondrocyte gene, shoulder joint

1.TA.83.DA-XX-P	of cultured chondrocyte cells using endoscopic [arthroscopic] approach
1.TA.83.HA-XX-P	of cultured chondrocyte cells using percutaneous approach

1.TA.87.^ ^ Excision partial, shoulder joint**S** ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Arthroectomy, shoulder
 Chondrectomy, shoulder
 Debridement, shoulder joint
 Extraction deposits, fragments, loose bodies
 Ganglionectomy, shoulder joint
 Ostectomy, partial, humeral head, surgical neck or tuberosity
 Synovectomy, shoulder joint

Excludes: Debridement with reduction, shoulder joint (see [1.TA.73.^ ^](#))
 Extraction, calcium deposits, rotator cuff (see [1.TC.57.^ ^](#))
 Radiosynovectomy, shoulder joint (see [1.TA.59.^ ^](#))
 that with internal fixation, shoulder joint (see [1.TA.74.^ ^](#))

Omit code: When any of the following interventions – ligament resection, repair or release – are performed concomitantly with any type of joint excision(s) such as arthroectomy, chondrectomy, extraction (deposits, fragments, loose bodies), synovectomy (see [1.TA.80.^ ^](#))

1.TA.87.^ ^ Excision partial, shoulder joint	endoscopic [arthroscopic] approach	open approach
other joint excision [e.g. arthroectomy, chondrectomy, débridement] with or without synovectomy	1.TA.87.DA	1.TA.87.LA
synovectomy or ganglionectomy alone	1.TA.87.GB	1.TA.87.WJ

1.TA.93.^ ^ Amputation, shoulder joint**S** ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Amputation, through shoulder joint

Excludes: Forequarter amputation [through scapula/ clavicle and humerus] (see [1.SN.93.^ ^](#))

1.TA.93.LA using simple apposition [e.g. suturing] (for closure of stump)
 1.TA.93.LA-XX-A using skin graft (for closure of stump)
 1.TA.93.LA-XX-E using local flap myoplasty or myodesis (for closure of stump)

1.TB.^ ^.^ Therapeutic Interventions on Acromioclavicular and Sternoclavicular Joints

Includes: Acromioclavicular, coracoacromial, coracoclavicular, coracohumeral ligaments
 Acromion
 Coracoid process
 Distal end of clavicle with acromion
 Sternoclavicular articular disc
 Sternoclavicular, costoclavicular and interclavicular ligaments
 Subacromial bursa, and capsule
 Subacromial space

1.TB.04.^ ^ Mobilization, acromioclavicular and sternoclavicular joints**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Traction, acromioclavicular and sternoclavicular joints (acromion, clavicle, sternum)
- Excludes:** Manual myofascial release only around shoulder (see [1.TF.04.^^](#))
 Mobilization with manipulation of AC and SC (clavicle and sternum) joints (see [1.TB.05.^^](#))
 Traction for immobilization of fracture AC and SC joints (with or without shoulder) (see [1.TA.03.^^](#))

1.TB.04.JH using external approach with manual technique

1.TB.05.^^ Manipulation, acromioclavicular and sternoclavicular joints

L ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Joint adjustment, AC and SC joints
 Mobilization with concomitant manipulation, AC and SC joints
 Skeletal manipulation, acromion, clavicle and scapula joints

1.TB.05.JH using external approach with manual technique

1.TB.07.^^ Hyperthermy, acromioclavicular and sternoclavicular joints

- Excludes:** Hyperthermy, multiple body sites (see [1.ZX.07.^^](#))

1.TB.07.JA-HB using transcutaneous diathermy
 1.TB.07.JA-TQ using tank [e.g. Hubbard]
 1.TB.07.JA-TR using whirlpool

1.TB.52.^^ Drainage, acromioclavicular and sternoclavicular joints

S ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Bursectomy, subacromial
 Bursotomy, subacromial
 Incision with subsequent repair, subacromial bursa

1.TB.52.GB	using endoscopic excisional technique (arthroscopic bursectomy)
1.TB.52.GD	using endoscopic incisional technique (arthroscopic bursotomy)
1.TB.52.HA	using percutaneous (needle) aspiration
1.TB.52.WJ	using open excisional technique [e.g. bursectomy]
1.TB.52.WK	using open incisional technique [e.g. bursotomy]

1.TB.55.^.^ Removal of device, acromioclavicular and sternoclavicular joints

S ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

1.TB.55.^.^ Removal of device, acromioclavicular and sternoclavicular joints	endoscopic [arthroscopic] approach	open approach
of mesh, gortex, silastic sheath	1.TB.55.DA-XX-N	1.TB.55.LA-XX-N
of pin, nail	1.TB.55.DA-NV	1.TB.55.LA-NV
of screw, plate	1.TB.55.DA-NW	1.TB.55.LA-NW
of wire, staple	1.TB.55.DA-KD	1.TB.55.LA-KD

1.TB.59.^.^ Destruction, acromioclavicular and sternoclavicular joints

S ⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

1.TB.59.HA-AW using percutaneous approach and radiofrequency probe

1.TB.72.^ ^ Release, acromioclavicular and sternoclavicular joints**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Arthrolysis, acromioclavicular and sternoclavicular joints
 Release, acromioclavicular, coracohumeral or coracoacromial ligaments
 Release, sternoclavicular, costoclavicular and interclavicular ligaments

Excludes: Ligament release with acromionectomy or resection of distal [or proximal] clavicle (see [1.TB.80.^ ^](#))
 Manual rupture of AC and SC joint adhesions (see [1.TB.05.^ ^](#))

Omit code: When joint ligaments are released for access to operative site.

1.TB.72.DA using endoscopic [arthroscopic] approach

1.TB.72.LA using open approach

1.TB.73.^ ^ Reduction, acromioclavicular and sternoclavicular joints**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Reduction with debridement, acromioclavicular and sternoclavicular joints

Excludes: that with fixation (see [1.TB.74.^ ^](#))

1.TB.73.JA using closed (external) approach

1.TB.73.LA using open approach

1.TB.74.^.^ Fixation, acromioclavicular and sternoclavicular joints**S** 5 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes:

- Fixation distal clavicle into coracoid process
- Reduction with fixation, distal or proximal clavicle, acromion
- Repair acromioclavicular joint subluxation [fixing clavicle into coracoid process]
- Repair sternoclavicular joint subluxation [may involve resecting clavicle to correct alignment]

1.TB.74.^.^ Fixation, acromioclavicular and sternoclavicular joints	fixation device [alone]	loop stabilization technique [e.g. ligament, tendon or fascia]	tenodesis technique [e.g. fixation of tendon or ligament to bone]
using mesh	1.TB.74.LA-XX-N	1.TB.74.UU-XX-N	1.TB.74.WU-XX-N
using pin, nail	1.TB.74.LA-NV	1.TB.74.UU-NV	1.TB.74.WU-NV
using screw, plate and screw	1.TB.74.LA-NW	1.TB.74.UU-NW	1.TB.74.WU-NW
using wire, staple, endobutton	1.TB.74.LA-KD	1.TB.74.UU-KD	1.TB.74.WU-KD
with no device used	—	1.TB.74.UU	1.TB.74.WU

1.TB.80.^.^ Repair, acromioclavicular and sternoclavicular joints**S** 5 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Acromioplasty
Capsular release or arthroectomy with tendon transfer, acromioclavicular and sternoclavicular joints, for rebalancing
Ligament release with autograft [tendon, muscle, fascia], acromioclavicular and sternoclavicular joints, for prevention of adhesions
Suture ligaments, acromioclavicular joint
Suture ligaments, sternoclavicular joint
- Excludes:** Subacromial debridement alone (see [1.TB.87.^^](#))
- Code Also:** Any concomitant rotator cuff repair (see [1.TC.80.^^](#))
Any concomitant subacromial bursotomy/bursectomy (see [1.TB.52.^^](#))
- Note:** May involve multiple interventions performed concomitantly on the AC/SC joint(s) such as: ligament division (resection or repair), acromionectomy, subacromial decompression, excision of distal clavicle.

1.TB.80.^^ Repair, acromioclavicular and sternoclavicular joints	endoscopic [arthroscopic] approach	open approach
using apposition technique [e.g. suturing]	1.TB.80.DA	1.TB.80.LA
using autograft [e.g. fascia, muscle]	1.TB.80.DA-XX-A	1.TB.80.LA-XX-A
using combined sources of tissue [e.g. synthetic tissue with transfer]	1.TB.80.DA-XX-Q	1.TB.80.LA-XX-Q
using local tendon transfer	1.TB.80.DA-XX-E	1.TB.80.LA-XX-E
using synthetic tissue [e.g. gortex, mesh, silastic sheath]	1.TB.80.DA-XX-N	1.TB.80.LA-XX-N
using homograft [e.g. donor tendon for ligament repair]	1.TB.80.DA-XX-K	1.TB.80.LA-XX-K

1.TB.87.^^ Excision partial, acromioclavicular and sternoclavicular joints

1.TF.^.^ Therapeutic Interventions on Muscles of Arm [around shoulder]

- Includes:** Coracobrachialis, deltoid, levator, scapulae, teres major, trapezius
Fascia of upper arm
Muscles of shoulder
Muscles of upper arm NEC
- Excludes:** Latissimus dorsi (see [1.SG.^.^](#))
Muscles of forearm [around elbow] (see [1.TQ.^.^](#))
Neoplasm arising in or extending into arm muscles [around elbow] (see [1.TX.^.^](#))
Pectoralis major (see [1.SY.^.^](#))
Rhomboid (see [1.SG.^.^](#))
Rotator cuff: supraspinatus, infraspinatus, teres minor and subscapularis (see [1.TC.^.^](#))
Serratus anterior (see [1.SY.^.^](#))

1.TF.04.^ ^ Mobilization, muscles of the arm [around shoulder]**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Myofascial release, arm [around shoulder]

Excludes: Fasciotomy or fasciectomy for release of muscles, arm (around shoulder) (see [1.TF.72.^ ^](#)) that concomitant with manipulation/adjustment of shoulder (see [1.TA.05.^ ^](#)) that concomitant with mobilization of shoulder (see [1.TA.04.^ ^](#))

Note: Involves moving, stretching or elongating soft tissue of arm (around shoulder).

1.TF.04.JH using external approach with manual technique

1.TF.09.^ ^ Stimulation, muscles of the arm [around shoulder]**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Application of electrodes, muscles of upper arm
Electrostimulation, muscles of upper arm

1.TF.09.HA-CH using percutaneous approach and needle
Includes: Dry needling for (trigger point) intramuscular stimulation, upper arm muscles

1.TF.09.HA-JA using percutaneous insertion of electrodes

1.TF.09.JA-AG using laser

1.TF.09.JA-AZ using ultrasound

1.TF.09.JA-DV using transcutaneous electric nerve stimulation [TENS]

1.TF.09.JA-DW using electrical neuromuscular stimulation [EMS]

1.TF.09.JA-DX using interferential stimulation

1.TF.09.JA-EE using functional electrical stimulation [FES]

1.TF.57.^.^ Extraction, muscles of the arm [around shoulder]**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Removal [calcium deposits], arm muscles [around shoulder]

1.TF.57.LA using open approach

1.TF.58.^.^ Procurement, muscles of the arm [around shoulder]**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

1.TF.58.LA-XX-F of free flap [e.g. deltoid flap] using open approach

1.TF.72.^.^ Release, muscles of the arm [around shoulder]**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Fasciectomy, arm [around shoulder]
 Fasciotomy, arm [around shoulder]
 Myotomy, arm [around shoulder]
 Release, contracture, arm muscles [around shoulder]

1.TF.72.WJ using excisional technique [e.g. fasciectomy]
 1.TF.72.WK using incisional technique [e.g. fasciotomy, myotomy]

1.TF.80.^.^ Repair, muscles of the arm [around shoulder]

S 28 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 28	Optional	Treatment Status 3A	Status	D	Delayed (closure occurs > 24 hrs post trauma)
				R	Revision
				S	Staged
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Fascioplasty, arm [around shoulder]
 Fasciorrhaphy, arm [around shoulder]
 Myoplasty, arm muscles [around shoulder]
 Myorrhaphy, arm muscles [around shoulder]
 Rotation flap, arm muscles [around shoulder]
 Suture, arm muscles [around shoulder]

1.TF.80.LA using open approach and simple apposition technique [e.g. suture, staple]
 1.TF.80.LA-XX-A using open approach and autograft [e.g. fascia]
 1.TF.80.LA-XX-E using open approach and local transposition flap [e.g. realignment, advancement]
 1.TF.80.LA-XX-F using open approach and free flap
 1.TF.80.LA-XX-N using open approach and synthetic tissue [e.g. gortex, mesh, silastic sheath]
 1.TF.80.LA-XX-Q using open approach and combined sources of tissue [e.g. graft/flap, mesh]

1.TF.87.^.^ Excision partial, muscles of the arm [around shoulder]**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Excision, (non viable) muscle or composite flap of arm [around shoulder]

Excludes: Excision, (lesion) of soft tissue of arm (see [1.TX.87.^.^](#))
 Excision, muscle or tendon of arm (see [1.TX.87.^.^](#))
 Procurement, muscle flap of arm [around shoulder] (see [1.TX.87.^.^](#))
 Resection [neoplasm], soft tissue of arm (see [1.TX.87.^.^](#))

1.TF.87.LA	using simple apposition technique [e.g. suture, staple] (for closure of surgical defect)
1.TF.87.LA-XX-A	using autograft [e.g. fascia or skin] (for closure of surgical defect)
1.TF.87.LA-XX-E	using local transposition flap [e.g. advancement muscle or Z-plasty skin flap] (for closure of defect)
1.TF.87.LA-XX-F	using free flap [e.g. myocutaneous free flap] (for closure of defect)
1.TF.87.LA-XX-Q	using combined sources of tissue [e.g. flap with skin graft] (for closure of defect)

1.TH.^.^.^ Therapeutic Interventions on Tendons of Arm [around shoulder]

Includes: Biceps, conjoined, pectoralis major, scapularis and triceps tendons
 Tendons of shoulder NEC
 Tendons of upper arm NEC

Excludes: Rotator cuff: supraspinatus, infraspinatus, teres minor and subscapularis (see [1.TC.^.^.^](#))

1.TH.58.^ ^ Procurement, tendons of the arm [around shoulder]**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

1.TH.58.LA-XX-A of autograft using open approach

1.TH.72.^ ^ Release, tendons of the arm [around shoulder]**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Tenolysis, arm tendons [around shoulder]
 Tenosynovectomy [for release], arm tendons [around shoulder]

Omit code: When tendon release is part of tendon transfer or repair (see [1.TH.80.^ ^](#))

1.TH.72.DA using endoscopic [arthroscopic] approach

1.TH.72.LA using open approach

1.TH.80.^ ^ Repair, tendons of the arm [around shoulder]**S** ⁷ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 7	Optional	Tx Status 3	Status	A	Abandoned after onset
				D P	Delayed primary (repair occurring 2 to 14 days post trauma)
				D S	Delayed secondary (repair occurring >14 days post trauma)
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Suture, [ruptured] tendon muscle unit, arm tendons [around shoulder]
 Tendinoplasty with tenodesis, arm tendons [around shoulder]
 Tendinoplasty, arm tendons [around shoulder]
 Tendinorrhaphy, arm tendons [around shoulder]
 Tenodesis, arm tendons [around shoulder]
 Transfer, tendon, arm [around shoulder]

Excludes: Repair, arm tendons around elbow/forearm (see [1.TS.80.^ ^](#))
 that for rotator cuff repair (see [1.TC.80.^ ^](#))

1.TH.80.^ ^ Repair, tendons of the arm [around shoulder]	using apposition technique [e.g. tendon sutured to tendon]	using tenodesis technique [e.g. tendon looped or sutured [anchored] to or through bone]	using tenodesis with screw fixation [e.g. tendon with a bone plug fixed to bone with screw]	using tenodesis with bioabsorbable (binding) device
open approach				
simple repair (without graft or transfer involved)	1.TH.80.LA	1.TH.80.WU	1.TH.80.WU-NW	1.TH.80.WU-FH
with autograft [e.g. tendon, fascia]	1.TH.80.LA-XX-A	1.TH.80.WU-XX-A	1.TH.80.WU-NW-A	1.TH.80.WU-FH-A
with homograft [e.g. tendon allograft]	1.TH.80.LA-XX-K	—	—	1.TH.80.WU-FH-K
with synthetic tissue [e.g. gortex, mesh]	1.TH.80.LA-XX-N	1.TH.80.WU-XX-N	1.TH.80.WU-NW-N	1.TH.80.WU-FH-N
with combined sources of tissue [e.g. autograft, tendon transfer, gortex]	1.TH.80.LA-XX-Q	1.TH.80.WU-XX-Q	1.TH.80.WU-NW-Q	1.TH.80.WU-FH-Q
with tendon transfer for realignment [e.g. advancement, transposition]	1.TH.80.LA-XX-E	1.TH.80.WU-XX-E	1.TH.80.WU-NW-E	1.TH.80.WU-FH-E
endoscopic [arthroscopic] approach				
simple repair (without graft or transfer involved)	1.TH.80.DA	—	—	1.TH.80.GC-FH

1.TK.^^.^^ Therapeutic Interventions on the Humerus

- Includes:** Epiphysis and periosteum of humerus
Supracondylar ridge (lateral and medial), humerus
- Excludes:** Articular surface of distal humerus (elbow) (see [1.TM.^^.^^](#))
Articular surface of proximal humerus (shoulder) (see [1.TA.^^.^^](#))
Capitulum of humerus (see [1.TM.^^.^^](#))
Epicondyles (lateral and medial), humerus (see [1.TM.^^.^^](#))
Greater tuberosity [tubercle], humerus (see [1.TA.^^.^^](#))
Head of humerus (see [1.TA.^^.^^](#))
Surgical neck of humerus (see [1.TA.^^.^^](#))
Trochlea of humerus (see [1.TM.^^.^^](#))

1.TK.03.^^ Immobilization, humerus**S** 12 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 12	Optional	Tx Status 7	Status	R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Application, external immobilization device, humerus
Immobilization with traction, humerus
Removal with replacement, external immobilization device, humerus
Traction, humerus (with or without suspension)

Note: May involve immobilization of entire arm to stabilize the humerus.

1.TK.03.^^ Immobilization, humerus	immobilization alone	with external traction [e.g. skin]	with percutaneous traction [e.g. skeletal]
using bracing device	1.TK.03.JA-EQ	—	—
using cast [spica, cylinder]	1.TK.03.JA-FQ	1.TK.03.JZ-FQ	1.TK.03.HA-FQ
using percutaneous external fixator	—	—	1.TK.03.HA-KC
using pneumatic orthoses device	1.TK.03.JA-MM	—	—
using splinting device	1.TK.03.JA-SR	1.TK.03.JZ-SR	1.TK.03.HA-SR
using traction alone	—	1.TK.03.JZ-TA	1.TK.03.HA-TA
using sling	1.TK.03.JA-SQ	—	—

1.TK.09.^ ^ Stimulation, humerus**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Cutaneous stimulation, humerus
Insertion, bone growth stimulator, humerus

1.TK.09.HA-JA using percutaneously inserted electrodes [e.g. bone growth stimulator]
 1.TK.09.JA-AQ using external magnets (pulsating electro magnetic field [PEMF])
 1.TK.09.JA-JA using externally applied electrodes (e.g. under cast)

1.TK.35.^ ^ Pharmacotherapy (local), humerus**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Cleansing, humerus (open wound fracture)
Irrigation, humerus

Excludes: that concomitant with (open) reduction of humerus (see [1.TK.73.^ ^](#))
that concomitant with fixation of humerus (see [1.TK.74.^ ^](#))

1.TK.35.HA-J2 using percutaneous [needle] approach and corticosteroid agent
 1.TK.35.JA-D1 using external approach and antiinfective irrigating solution
 Includes: chlorhexidine, neomycin
 1.TK.35.JA-D2 using external approach and salt irrigating solution
 Includes: sodium chloride
 1.TK.35.JA-D3 using external approach and other irrigating solution
 Includes: sorbitol, mannitol
 1.TK.35.LA-K8 using open approach and antibacterial agent (e.g. gentamycin beads)

1.TK.38.^ ^ Management of external appliance, humerus

Includes: Adjusting appliance, humerus
Removal of immobilization device, humerus

Excludes: Removal with replacement, external immobilization device (see [1.TK.03.^ ^](#))

1.TK.38.HA-KC	of percutaneous external fixator
1.TK.38.HA-TA	of skeletal traction
1.TK.38.JA-EQ	of brace
1.TK.38.JA-FQ	of cast
1.TK.38.JA-MM	of pneumatic orthoses
1.TK.38.JA-SQ	of sling
1.TK.38.JA-SR	of splinting device
1.TK.38.JZ-TA	of skin traction

1.TK.52.^ ^ Drainage, humerus**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Drainage, humeral cyst

1.TK.52.HA	using percutaneous (needle) approach
1.TK.52.HA-J2	using percutaneous (needle) approach and steroid infiltration
1.TK.52.HA-XX-A	using percutaneous (needle) approach and bone marrow packing

1.TK.55.^ ^ Removal of device, humerus**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

1.TK.55.LA-DV	of electronic stimulation device [e.g. bone growth stimulator] using open approach
1.TK.55.LA-K8	of antibacterial agent (e.g. gentamycin beads) using open approach
1.TK.55.LA-KD	of wire/mesh/staple using open approach
1.TK.55.LA-LQ	of intramedullary nail using open approach
1.TK.55.LA-NV	of pin/nail using open approach
1.TK.55.LA-NW	of plate/screw using open approach
1.TK.55.LA-PM	of endoprosthesis using open approach

1.TK.56.^ ^ Removal of foreign body, humerus**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Removal of missile (e.g. bullet, metal fragment, carpenter's nail), humerus that with debridement of site

Excludes: Removal of fixative device, humerus (see [1.TK.55.^ ^](#))

1.TK.56.JA	using external (manual extraction) approach
1.TK.56.LA	using open approach

1.TK.58.^ ^ Procurement, humerus**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

1.TK.58.LA-XX-K of bone graft from deceased donor

1.TK.59.^ ^ Destruction, humerus**S** ⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Sclerotherapy, humerus, intralesional [e.g. aneurysmal bone cyst]**Excludes:** Osteoclasts, humerus (see [1.TK.80.^ ^](#))

1.TK.59.HA-AW using percutaneous (needle) approach with radiofrequency probe

Includes: Radiofrequency ablation (RFA), humerus

1.TK.59.HA-X7 using percutaneous (needle) approach with chemical agents (e.g. Ethibloc, zein)

1.TK.73.^ ^ Reduction, humerus**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Reduction with debridement, humerus
that with irrigation of open fracture wound, humerus
- Excludes:** Reduction, humeral head or neck (see shoulder [1.TA.73.^^](#))
Reduction, humeral trochlea or epicondyle (see elbow [1.TM.73.^^](#))
that with fixation, humerus (see [1.TK.74.^^](#))
- Code Also:** Any concomitant application of skeletal traction (see [1.TK.03.^^](#))
Any concomitant cast immobilization (see [1.TK.03.^^](#))

1.TK.73.JA using closed [external] approach
1.TK.73.LA using open approach

1.TK.74.^^ Fixation, humerus

S 5 **L** 50

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 50	Optional	Long bones 1	Location	B	Bilateral
				L	Left [shaft or NOS]
				L D	Left distal
				L E	Left epiphysis
				L P	Left proximal (trochanter)
				R	Right [shaft or NOS]
				R C	Right epiphysis
				R D	Right distal
				R P	Right proximal (trochanter)

- Includes:** Debridement with fixation, humerus
Epiphysiodesis, humerus
Reduction with fixation, humerus
that for non union repair, humerus
that to arrest bone growth, humerus (i.e. physeal arrest)
that to repair slipped capital fracture, humerus
that with irrigation of open fracture wound, humerus
- Excludes:** Fixation, humeral head or neck (see shoulder [1.TA.74.^^](#))
Fixation, humeral trochlea or epicondyle (see elbow [1.TM.74.^^](#))
- Code Also:** Any immobilization, humerus (see [1.TK.03.^^](#))

1.TK.74.^.^ Fixation, humerus	no tissue used	with bone autograft	with bone homograft	with combined sources of tissue [e.g. bone graft, cement/paste]	with synthetic tissue [e.g. bone cement or paste]
open approach					
using pin, nail	1.TK.74.LA-NV	1.TK.74.LA-NV-A	1.TK.74.LA-NV-K	1.TK.74.LA-NV-Q	1.TK.74.LA-NV-N
using plate, screw	1.TK.74.LA-NW	1.TK.74.LA-NW-A	1.TK.74.LA-NW-K	1.TK.74.LA-NW-Q	1.TK.74.LA-NW-N
using wire, mesh, staple	1.TK.74.LA-KD	1.TK.74.LA-KD-A	1.TK.74.LA-KD-K	1.TK.74.LA-KD-Q	1.TK.74.LA-KD-N
using intramedullary nail	1.TK.74.LA-LQ	1.TK.74.LA-LQ-A	1.TK.74.LA-LQ-K	1.TK.74.LA-LQ-Q	1.TK.74.LA-LQ-N
no device used (e.g. for epiphysiodesis)	1.TK.74.LA	—	—	—	—
percutaneous approach [e.g. with closed or no reduction]					
using pin, nail	1.TK.74.HA-NV	—	—	—	—
using wire, staple, mesh	1.TK.74.HA-KD	—	—	—	—
using intramedullary nail	1.TK.74.HA-LQ	—	—	—	—
using plate, screw	1.TK.74.HA-NW	—	—	—	—

1.TK.79.^.^ Repair by increasing size, humerus**S** 5 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Corticotomy with distraction, humerus
Distraction, humerus
Lengthening, humerus
Osseodistraction, humerus
Osteotomy (transverse) with distraction, humerus (for lengthening)

Excludes: Osteotomy, lengthening, humerus using bone graft (see [1.TK.80.^.^](#))

1.TK.79.HA-MG	using percutaneous approach and distraction device [e.g. hinged, Ilizarov]
1.TK.79.LA-MG	using open approach and distraction device [e.g. hinged, Ilizarov]

1.TK.80.^ ^ Repair, humerus**S** 5 **L** 51

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 51	Optional	Long bones 2	Location	B	Bilateral
				L	Left [shaft or NOS]
				L D	Left distal
				L P	Left proximal (trochanter)
				R	Right [shaft or NOS]
				R D	Right distal
				R P	Right proximal (trochanter)

Includes: Osteoclasia, humerus
 Osteotomy (lengthening, shortening), humerus
 Osteotomy [rotation], proximal humerus

Code Also: Any concomitant tendon transfer to reestablish joint alignment (see [1.TC.80.^ ^](#), [1.TH.80.^ ^](#) or [1.TS.80.^ ^](#))

1.TK.80.^ ^ Repair, humerus	no tissue used (for repair)	with bone autograft [e.g. bone, tendon]	with bone homograft	with combined sources of tissue [e.g. bone graft, cement/paste]	with synthetic tissue [e.g. bone cement, paste]
using pin, nail	1.TK.80.LA-NV	1.TK.80.LA-NV-A	1.TK.80.LA-NV-K	1.TK.80.LA-NV-Q	1.TK.80.LA-NV-N
using screw, plate and screw	1.TK.80.LA-NW	1.TK.80.LA-NW-A	1.TK.80.LA-NW-K	1.TK.80.LA-NW-Q	1.TK.80.LA-NW-N
using wire, mesh, staple	1.TK.80.LA-KD	1.TK.80.LA-KD-A	1.TK.80.LA-KD-K	1.TK.80.LA-KD-Q	1.TK.80.LA-KD-N
with no device used	—	—	—	—	1.TK.80.LA-XX-N

1.TK.82.^ ^ Reattachment, humerus**S** 4 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Reattachment, above elbow

Note: Involves microsurgical technique to reestablish vascular and neural function.

1.TK.82.LA	using open approach and simple apposition technique [e.g. suturing]
1.TK.82.LA-NW	using open approach and plate/screw fixation with apposition [suturing]
1.TK.82.LA-NW-A	using open approach and plate/screw fixation with bone autograft
1.TK.82.LA-NW-N	using open approach and plate/screw fixation with synthetic tissue [e.g. bone cement or paste]
1.TK.82.LA-XX-F	using open approach and free flap [e.g. myocutaneous, osseocutaneous flap]

1.TK.83.^ Transfer, humerus

S ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Cementing only, humerus (for repair of non union)
Debridement with bone graft, humerus
Graft (bone), humerus (for repair of non union)
Sequestrectomy with bone graft (alone), humerus

Excludes: Ostectomy with concomitant bone graft, humerus (see [1.TK.87.^](#))
Sequestrectomy with fixation, humerus (see [1.TK.87.^](#))
that with fixation, humerus (see [1.TK.74.^](#))
that with reduction and fixation, humerus (see [1.TK.74.^](#))

1.TK.83.HA-XX-N	using percutaneous approach and synthetic tissue [bone cement, paste]
1.TK.83.LA-XX-A	using open approach and bone autograft
1.TK.83.LA-XX-K	using open approach and bone homograft
1.TK.83.LA-XX-N	using open approach and synthetic tissue [bone cement, paste]
1.TK.83.LA-XX-Q	using open approach and combined sources of tissue [e.g. bone graft, cement/paste]

1.TK.87.^ ^ Excision partial, humerus**S** 4 **L** 51

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 51	Optional	Long bones 2	Location	B	Bilateral
				L	Left [shaft or NOS]
				L D	Left distal
				L P	Left proximal (trochanter)
				R	Right [shaft or NOS]
				R D	Right distal
				R P	Right proximal (trochanter)

Includes: Debridement, humerus
Ostectomy, humerus
Sequestrectomy NOS, humerus

Excludes: Debridement with (reduction and) fixation, humerus (see [1.TK.74.^ ^](#))
Debridement with bone graft, humerus (see [1.TK.83.^ ^](#))
Debridement with reduction, humerus (see [1.TK.73.^ ^](#))
Ostectomy of humerus with radical resection of adjacent soft tissue (see [1.TK.91.^ ^](#))
Resection, limb sparing, humerus (see [1.TK.91.^ ^](#))
Sequestrectomy with bone grafting (alone), humerus (see [1.TK.83.^ ^](#))

Note: Involves resection of the humerus [e.g. neoplasm] which usually requires concomitant stabilization of the surgical defect often by grafting and applying fixative devices but occasionally by bone flap reconstruction. (The definitive intervention is the resection however there may be a significant salvage component to manage the surgical wound)

Omit code: When ostectomy is specifically done for prosthetic replacement of shoulder joint (see [1.TA.53.^ ^](#))

1.TK.87.^ ^ Excision partial, humerus	no tissue used (for closure of defect)	with bone autograft	with bone homograft [e.g. from bone bank]	with combined sources of tissue [e.g. graft, flap, bone cement]	with free flap [e.g. fibular flap]	with synthetic tissue [e.g. bone cement or paste]
using endoprosthesis [humeral head]	1.TK.87.LA-PM	1.TK.87.LA-PM-A	1.TK.87.LA-PM-K	1.TK.87.LA-PM-Q	1.TK.87.LA-PM-F	1.TK.87.LA-PM-N
using intramedullary nail	1.TK.87.LA-LQ	1.TK.87.LA-LQ-A	1.TK.87.LA-LQ-K	1.TK.87.LA-LQ-Q	1.TK.87.LA-LQ-F	1.TK.87.LA-LQ-N
using pin, nail	1.TK.87.LA-NV	1.TK.87.LA-NV-A	1.TK.87.LA-NV-K	1.TK.87.LA-NV-Q	1.TK.87.LA-NV-F	1.TK.87.LA-NV-N

no fixative device	1.TK.87.LA	—	—	—	—	—

1.TK.91.^ ^ Excision radical, humerus**S** 4 **L** 51

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 51	Optional	Long bones 2	Location	B	Bilateral
				L	Left [shaft or NOS]
				L D	Left distal
				L P	Left proximal (trochanter)
				R	Right [shaft or NOS]
				R D	Right distal
				R P	Right proximal (trochanter)

Includes: Excision, radical, soft tissue of upper arm with ostectomy of humerus
 Ostectomy, partial, humerus, with radical resection of adjacent soft tissue and concomitant graft/ flap reconstruction
 Resection, limb sparing, above elbow

Excludes: Debridement with bone graft [e.g. for non union], humerus (see [1.TK.83.^ ^](#))

Note: Involves radical resection of both the humerus and adjacent soft tissue (sometimes referred to as "limb-sparing local resection") which usually requires concomitant stabilization of the surgical defect often by grafting and applying fixative devices but occasionally by bone flap reconstruction. (The definitive intervention is the resection however there may be a significant salvage component to manage the surgical wound).

1.TK.91.^ ^ Excision radical, humerus	no tissue used (for closure of defect)	with bone autograft	with bone homograft [e.g. from bone bank]	with combined sources of tissue [e.g. graft, flap, bone cement]	with free flap [e.g. fibular flap]	with synthetic tissue [e.g. bone cement or paste]

				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Amputation, above elbow

Excludes: Disarticulation, through shoulder joint (see [1.TA.93.^.^](#))
Limb-sparing resection, humerus (see [1.TK.91.^.^](#))

1.TK.93.LA	using simple apposition technique [e.g. suturing] (for closure of stump)
	Includes: Guillotine technique
1.TK.93.LA-RV	using bone-anchored prosthetic bridge or stem implant device
1.TK.93.LA-XX-A	using skin graft (for closure of stump)
1.TK.93.LA-XX-E	using local flap [e.g. myoplasty, osteoperiosteal flap or myodesis] (for closure of stump)

1.TM.^.^ Therapeutic Interventions on the Elbow Joint

Includes: Bursa, capsule, cartilage, ligaments and synovial lining of articular surface of distal humerus
Bursa, capsule, cartilage, ligaments and synovial lining of articular surface of proximal radius and ulna
Bursa, capsule, cartilage, ligaments and synovial lining of distal humerus: capitulum, epicondyles [medial and lateral], trochlea
Bursa, capsule, cartilage, ligaments and synovial lining of elbow joint NOS
Bursa, capsule, cartilage, ligaments and synovial lining of radial head and neck
Bursa, capsule, cartilage, ligaments and synovial lining of radiohumeral joint
Bursa, capsule, cartilage, ligaments and synovial lining of ulnar: coronoid process, olecranon, tubercle
Bursa, capsule, cartilage, ligaments and synovial lining of ulnohumeral joint

1.TM.02.^ ^ Exercise, elbow joint**L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Continuous passive motion, elbow joint
Hydrotherapy, elbow joint

Code Also: Any use of biofeedback (see [7.SP.59.^ ^](#))

Note: Involves assisting and supervising client in performing exercises.

1.TM.02.YD using exercise NOS
1.TM.02.YK using passive motion exercise
1.TM.02.YN using active range of motion exercise
1.TM.02.YQ using resistive exercise
1.TM.02.ZA using aquatic exercise
1.TM.02.ZB using balance training exercise

1.TM.03.^ ^ Immobilization, elbow joint**S** 12 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 12	Optional	Tx Status 7	Status	R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Application, external immobilization device, elbow joint
Removal with replacement, external immobilization device, elbow joint

1.TM.03.HA-KC using percutaneous external fixator
1.TM.03.JA-EQ using brace
1.TM.03.JA-FG using binding device [e.g. restrictive dressing, elastic bandage]
1.TM.03.JA-FQ using cast
1.TM.03.JA-MM using pneumatic orthotic device (e.g. air cast)
1.TM.03.JA-SQ using sling
1.TM.03.JA-SR using splinting device

1.TM.04.^ ^ Mobilization, elbow joint**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Traction, elbow

Excludes: Manual myofascial release only around elbow (see [1.TQ.04.^ ^](#))
 Massage, elbow joint only (see [1.TM.12.^ ^](#))
 Mobilization with concomitant manipulation, elbow (see [1.TM.05.^ ^](#))
 Traction for immobilization of fracture of elbow joint (see [1.TM.03.^ ^](#))

1.TM.04.JH using external approach with manual technique

1.TM.05.^ ^ Manipulation, elbow joint**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Joint adjustment, elbow
 Mobilization with concomitant manipulation, elbow
 Skeletal manipulation, elbow

Excludes: Massage, elbow (see [1.TM.12.^ ^](#))

1.TM.05.JH using external approach with manual technique

1.TM.07.^ ^ Hyperthermy, elbow joint

Includes: Application, heat, elbow joint
Diathermy, elbow joint

Excludes: Hyperthermy, multiple body sites (see [1.ZX.07.^ ^](#))

1.TM.07.JA-CG	using microwave
1.TM.07.JA-DU	using infrared device [e.g. heating lamp, baker]
1.TM.07.JA-DZ	using short wave
1.TM.07.JA-EA	using conductive heat device
1.TM.07.JA-HB	using other diathermy device NEC
1.TM.07.JA-KH	using externally applied dry heat [e.g. heating pad]
1.TM.07.JA-KJ	using externally applied moist heat [e.g. soak, compress]
1.TM.07.JA-KQ	using paraffin
1.TM.07.JA-TR	using whirlpool

1.TM.12.^ ^ Therapy, elbow joint

Includes: Phototherapy, elbow
Physiotherapy NOS, elbow
Therapy, laser, elbow (for pain reduction and promotion of healing)

Excludes: Exercise therapy, elbow (see [1.TM.02.^ ^](#))
Hydrotherapy, elbow (see [1.TM.02.^ ^](#))
Hyperthermy, elbow joint (see [1.TM.07.^ ^](#))
Hypothermy, soft tissue of elbow (see [1.TX.06.^ ^](#))
Massage, elbow and arm (see [1.TX.12.^ ^](#))
Therapy (photo, laser, massage) for soft tissue of arm (see [1.TX.12.^ ^](#))

1.TM.12.JA-AG	using laser NEC (with or without photosensitizing chemicals)
1.TM.12.JA-DQ	using ultraviolet light
1.TM.12.JA-DU	using light NEC [e.g. long wave red light]
1.TM.12.JJ	using massage technique

1.TM.35.^ ^ Pharmacotherapy (local), elbow joint**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes:	Injection, elbow joint Instillation, elbow joint Irrigation (arthroscopic), elbow joint
Excludes:	Ablation of synovium of elbow joint (see 1.TM.59.^^) Radiation or medical synovectomy or synoviorthesis of elbow joint (see 1.TM.59.^^) Systemic pharmacotherapy (see 1.ZZ.35.^^) That for soft tissue of arm (see 1.TX.35.^^)
1.TM.35.DA-D1	using endoscopic (arthroscopic) approach and antiinfective irrigating solution Includes: chlorhexidine, neomycin
1.TM.35.DA-D2	using endoscopic (arthroscopic) approach and salt irrigating solution Includes: sodium chloride
1.TM.35.DA-D3	using endoscopic (arthroscopic) approach and other irrigating solution Includes: sorbitol, mannitol
1.TM.35.HA-J2	using percutaneous (needle) approach and corticosteroid agent Includes: prednisone, dexamethasone, fludrocortisone
1.TM.35.HA-K0	using percutaneous (needle) approach and antiinfective agent NOS
1.TM.35.HA-N1	using percutaneous (needle) approach and antiinflammatory agent Includes: NSAIDS (indomethacin, ibuprofen, diclofenac), chloroquine, aurothioglucose, D penicillamine
1.TM.35.HA-P1	using percutaneous (needle) approach and local anesthetic agent
1.TM.35.HA-P2	using percutaneous (needle) approach and analgesic Includes: opioids (morphine, meperidine), acetylsalicylic acid, acetaminophen, ergotamine, sumatriptan
1.TM.35.HA-T9	using percutaneous (needle) approach and pharmacological agent NEC
1.TM.35.LA-K8	using open approach and antibacterial agent (e.g. gentamycin beads)

1.TM.38.^^ Management of external appliance, elbow joint

Includes:	Adjusting appliance, elbow Applying and removing traction weights, (for) elbow joint Removal of immobilization or traction device, elbow joint
Excludes:	Removal with replacement of external immobilization device (see 1.TM.03.^^)
1.TM.38.HA-KC	of percutaneous external fixator
1.TM.38.JA-EQ	of bracing device
1.TM.38.JA-FG	of binding device
1.TM.38.JA-FQ	of cast
1.TM.38.JA-SQ	of sling
1.TM.38.JA-SR	of splinting device

1.TM.52.^ Drainage, elbow joint**S** 4 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Bursectomy, elbow
Bursotomy, elbow

1.TM.52.DA using endoscopic [arthroscopic] approach
 1.TM.52.HA using percutaneous (needle) aspiration
 1.TM.52.WJ using open excisional approach [e.g. bursectomy]
 1.TM.52.WK using open incisional approach [e.g. bursotomy]

1.TM.53.^ Implantation of internal device, elbow joint**S** 5 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Arthroplasty with implantation of prosthetic device, elbow
 Hemiarthroplasty with implantation of prosthetic device, elbow
 Replacement, elbow, using [temporary] cement spacer
 Replacement, elbow, using prosthetic device

Excludes: Osteotomy (for neoplasm) of distal humerus (see [1.TK.87.^](#))
 Osteotomy (for neoplasm) of proximal radius/ ulna (see [1.TV.87.^](#))

1.TM.53.^ Implantation of internal device, elbow joint	with synthetic material (e.g. bone paste, cement)	uncemented	with bone autograft [uncemented]	with bone homograft [uncemented]	with combined sources of tissue (e.g. bone graft, cement, paste)
cement spacer [temporary] [impregnated with antibiotics]	1.TM.53.LA-SL-N	—	—	—	—
dual component prosthetic device [e.g. capitellocondylar, humeral and ulnar]	1.TM.53.LA-PN-N	1.TM.53.LA-PN	1.TM.53.LA-PN-A	1.TM.53.LA-PN-K	1.TM.53.LA-PN-Q
single component prosthetic device [e.g. silastic radial head]	1.TM.53.LA-PM-N	1.TM.53.LA-PM	1.TM.53.LA-PM-A	1.TM.53.LA-PM-K	1.TM.53.LA-PM-Q

1.TM.55.^ Removal of device, elbow joint**S** 4 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Excludes: Removal of percutaneous fixator device (for immobilization) (see [1.TM.38.^](#))

1.TM.55.DA-NW	of plate/screw using endoscopic approach
1.TM.55.JA-GX	of device NEC using external approach
1.TM.55.LA-K8	of antibacterial agent (e.g. gentamycin beads) using open approach
1.TM.55.LA-KD	of wire/staple using open approach
1.TM.55.LA-NV	of pin/nail using open approach
1.TM.55.LA-NW	of plate/screw using open approach
1.TM.55.LA-PM	of uncemented single component prosthetic device using open approach
1.TM.55.LA-PM-N	of cemented single component prosthetic device using open approach
1.TM.55.LA-PN	of uncemented dual component prosthetic device using open approach
1.TM.55.LA-PN-N	of cemented dual component prosthetic device using open approach
1.TM.55.LA-XX-N	of mesh using open approach

1.TM.58.^ ^ Procurement, elbow joint**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Harvesting, elbow joint osteochondral tissue (cartilage)

1.TM.58.DA using endoscopic [laparoscopic] approach

1.TM.58.HA using percutaneous (needle) approach

1.TM.59.^ ^ Destruction, elbow joint**S** ⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Ablation, elbow joint using radionuclide
 Medical synoviorthesis, elbow joint
 Radiation synoviorthesis, elbow joint
 Radionuclide synovectomy, elbow joint
 Radiosynovectomy, elbow joint
 Radiosynoviorthesis, elbow joint

1.TM.59.HA-AW using percutaneous (needle) approach with radiofrequency probe

Includes: Radiofrequency ablation (RFA), elbow joint

1.TM.59.HA-V1 using percutaneous (needle) approach with radioactive pharmaceutical agent [e.g. erbium 169, yttrium-90, P32]

1.TM.59.HA-X7 using percutaneous (needle) approach with chemical agent NEC

1.TM.72.^ Release, elbow joint**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Arthrolysis, elbow
 Capsulotomy, elbow joint
 Lysis [adhesions], elbow joint
 Release, ligament, elbow

Excludes: Exercise therapy [passive or active] alone (see [1.TM.02.^](#))
 Manual rupture of joint adhesions, elbow (see [1.TM.05.^](#))
 Reduction of dislocated elbow (see [1.TM.73.^](#))
 Release with concomitant interpositional graft (see [1.TM.80.^](#))

Omit code: When any of the following interventions are performed concomitantly with capsular release: synovectomy, arthroectomy [chondrectomy], loose body extraction, ligament resection [or repair] (see [1.TM.80.^](#))

1.TM.72.DA using endoscopic [arthroscopic] approach
 1.TM.72.LA using open (incisional) approach

1.TM.73.^ Reduction, elbow joint**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Debridement with reduction, elbow joint

Code Also: Any immobilization (see [1.TM.03.^](#))

1.TM.73.JA using closed (external) approach
 1.TM.73.LA using open approach

1.TM.74.^ ^ Fixation, elbow joint**S** 5 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes:

- Fixation, humeral condyle, capitulum, epicondyle, trochlea
- Fixation, olecranon
- Fixation, radial head and neck
- Fixation, ulnar coronoid process and tubercle
- Reduction with fixation, elbow joint

1.TM.74.^ ^ Fixation, elbow joint	fixation device alone	with bone autograft	with bone homograft	with combined sources of tissue [e.g. bone graft, cement/paste]	with synthetic tissue [e.g. bone cement, or paste]
open approach

S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Autotransplantation, cultured chondrocyte cells, elbow joint
Therapy, chondrocyte gene, elbow joint

1.TM.83.DA-XX-P of cultured chondrocyte cells using endoscopic [arthroscopic] approach
1.TM.83.HA-XX-P of cultured chondrocyte cells using percutaneous approach

1.TM.87.^ Excision partial, elbow joint**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Arthrectomy, elbow
Chondrectomy, elbow joint
Debridement, elbow joint
Extraction deposits, fragments, loose bodies
Ganglionectomy, elbow joint

Excludes: Debridement with reduction, elbow joint (see [1.TM.73.^](#))
Radiosynovectomy, elbow joint (see [1.TM.59.^](#))
that with fixation of elbow joint (see [1.TM.74.^](#))

Omit code: When any of the following interventions – ligament resection or repair, capsular release – are performed concomitantly with any type of joint excision(s) such as arthrectomy, condrectomy, extraction (deposits, fragments, loose bodies), synovectomy (see [1.TM.80.^](#))

1.TM.87.^ ^ Excision partial, elbow joint	endoscopic [arthroscopic] approach	open approach
other joint excision [e.g. arthrectomy, chondrectomy, debridement] with or without synovectomy	1.TM.87.DA	1.TM.87.LA
synovectomy or ganglionectomy alone	1.TM.87.GB	1.TM.87.WJ

1.TM.93.^ ^ Amputation, elbow joint**S** ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Amputation, through elbow joint

1.TM.93.LA using simple apposition technique [e.g. suturing] (for closure of stump)
 1.TM.93.LA-XX-A using skin graft (for closure of stump)
 1.TM.93.LA-XX-E using local flap myoplasty or myodesis (for closure of stump)

1.TQ.^ ^.^ Therapeutic Interventions on Muscles of Forearm [around elbow]

Excludes: Muscles of hand and wrist (see [1.UY.^ ^.^](#))
 Neoplasm arising in or extending into forearm muscles [around elbow] (see [1.TX.^ ^.^](#))
 Rotator cuff muscles (see [1.TC.^ ^.^](#))

1.TQ.04.^ ^ Mobilization, muscles of the forearm [around elbow]**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Myofascial release, forearm [around elbow]
- Excludes:** Fasciotomy or fasciectomy for release of muscles of forearm (see [1.TQ.72.^^](#)) that concomitant with manipulation/adjustment of elbow (see [1.TM.05.^^](#)) that concomitant with mobilization of elbow (see [1.TM.04.^^](#))
- Note:** Involves moving, stretching or elongating soft tissue of forearm (around elbow).

1.TQ.04.JH using external approach with manual technique

1.TQ.09.^^ Stimulation, muscles of the forearm [around elbow]

L ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Application of electrodes, muscles of arm NEC
Electrostimulation, muscles of arm NEC
- Excludes:** Stimulation, muscles of upper arm [around shoulder] (see [1.TF.09.^^](#))

1.TQ.09.HA-CH using percutaneous approach and needle
Includes: Dry needling for (trigger point) intramuscular stimulation, forearm muscles

1.TQ.09.HA-JA using percutaneous insertion of electrodes

1.TQ.09.JA-AG using laser

1.TQ.09.JA-AZ using ultrasound

1.TQ.09.JA-DV using transcutaneous electric nerve stimulation [TENS]

1.TQ.09.JA-DW using electrical neuromuscular stimulation [EMS]

1.TQ.09.JA-DX using interferential stimulation

1.TQ.09.JA-EE using functional electrical stimulation [FES]

1.TQ.57.^ ^ Extraction, muscles of the forearm [around elbow]**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Removal [calcium deposits], forearm muscles [around elbow]

1.TQ.57.LA using open approach

1.TQ.58.^ ^ Procurement, muscles of the forearm [around elbow]**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

1.TQ.58.LA-XX-F free flap using open approach

1.TQ.72.^ ^ Release, muscles of the forearm [around elbow]**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Fasciectomy, forearm muscles [around elbow]
 Fasciotomy, forearm muscles [around elbow]
 Myotomy, forearm
 Release, Volkmann's contracture, forearm muscles [around elbow]

1.TQ.72.WJ using excisional technique [e.g. fasciectomy]
 1.TQ.72.WK using incisional technique [e.g. fasciotomy]

1.TQ.80.^ ^ Repair, muscles of the forearm [around elbow]

S 28 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 28	Optional	Treatment Status 3A	Status	D	Delayed (closure occurs > 24 hrs post trauma)
				R	Revision
				S	Staged
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Fascioplasty, forearm
 Fasciorrhaphy, forearm
 Myoplasty, forearm muscles [around elbow]
 Myorrhaphy, forearm muscles [around elbow]
 Repair, fascia of forearm, using "vest over pants" apposition
 Rotation flap, forearm muscles [around elbow]
 Suture, forearm muscles [around elbow]

1.TQ.80.LA using open approach and simple apposition technique [e.g. suture, staple]
 1.TQ.80.LA-XX-A using open approach and autograft [e.g. fascia, muscle]
 1.TQ.80.LA-XX-E using open approach and local muscle transposition flap
 1.TQ.80.LA-XX-F using open approach and free flap
 1.TQ.80.LA-XX-N using open approach and synthetic tissue [e.g. gortex, mesh or Silastic sheath]
 1.TQ.80.LA-XX-Q using open approach and combined sources of tissue [e.g. graft/flap, mesh]

1.TQ.87.^.^ Excision partial, muscles of the forearm [around elbow]**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Excision, (non viable) muscle or composite flap of forearm

Excludes: Excision, (lesion) of soft tissue of forearm (see [1.TX.87.^.^](#))
 Excision, muscle or tendon of arm (see [1.TX.87.^.^](#))
 Procurement, muscle flap of forearm (see [1.TQ.58.^.^](#))
 Resection [neoplasm], soft tissue of arm (see [1.TX.87.^.^](#))

1.TQ.87.LA	using simple apposition technique [e.g. suture, staple] (for closure of surgical defect)
1.TQ.87.LA-XX-A	using autograft [e.g. fascia or skin] (for closure of surgical defect)
1.TQ.87.LA-XX-E	using local transposition flap [e.g. advancement muscle or Z-plasty skin flap] (for closure of defect)
1.TQ.87.LA-XX-F	using free flap [e.g. myocutaneous free flap] (for closure of defect)
1.TQ.87.LA-XX-Q	using combined sources of tissue [e.g. skin graft with flap] (for closure of defect)

1.TS.^.^.^ Therapeutic Interventions on Tendons of Forearm [around elbow]

Includes: Biceps brachii [distal third head at elbow]
 Brachioradialis [proximal at elbow]
 Common extensor and pronator teres [at elbow]
 Tendons of forearm NEC

Excludes: Biceps and triceps brachii tendons [long and short head at shoulder] (see [1.TH.^.^.^](#))
 Tendons around wrist (see [1.UV.^.^.^](#))
 Tendons of arm [around shoulder] NEC (see [1.TH.^.^.^](#))

1.TS.58.^ ^ Procurement, tendons of the forearm [around elbow]**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

1.TS.58.LA-XX-A of tendon autograft using open approach

1.TS.58.LA-XX-F of free flap (innervated with artery pedicle) using open approach

1.TS.72.^ ^ Release, tendons of the forearm [around elbow]**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Tenolysis, tendons of forearm [around elbow]
 Tenosynovectomy [for release], tendons of forearm [around elbow]

Omit code: When tendon release is part of tendon transfer (see [1.TS.80.^ ^](#)) or when tendon release is part of tendinoplasty (see [1.TS.80.^ ^](#))

1.TS.72.DA using endoscopic [arthroscopic] approach

1.TS.72.LA using open approach

1.TS.80.^ ^ Repair, tendons of the forearm [around elbow]**S** ⁷ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 7	Optional	Tx Status 3	Status	A	Abandoned after onset
				D P	Delayed primary (repair occurring 2 to 14 days post trauma)
				D S	Delayed secondary (repair occurring >14 days post trauma)
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Suture, [ruptured] tendon muscle unit, tendons of forearm [around elbow]
 Tendinoplasty with tenodesis, tendons of forearm [around elbow]
 Tendinoplasty, tendons of forearm [around elbow]
 Tendinorrhaphy, tendons of forearm [around elbow]
 Tenodesis with or without endobutton, tendons of forearm [around elbow]
 Tenodesis with tendon graft, tendons of forearm [around elbow]

Excludes: Repair, tendons around wrist/hand (see [1.UV.80.^ ^](#))

1.TS.80.^ ^ Repair, tendons of the forearm [around elbow]	using apposition technique [e.g. tendon sutured to tendon]	using tenodesis technique [e.g. tendon looped or sutured [anchored] to or through bone]	using tenodesis with screw fixation [e.g. tendon with a bone plug fixed to bone with screw]	using tenodesis with bioabsorbable (binding) device
simple repair (without graft or transfer involved)	1.TS.80.LA	1.TS.80.WU	1.TS.80.WU-NW	1.TS.80.WU-FH
with autograft [e.g. tendon, fascia]	1.TS.80.LA-XX-A	1.TS.80.WU-XX-A	1.TS.80.WU-NW-A	1.TS.80.WU-FH-A
with combined sources of tissue [e.g. autograft, tendon transfer, gortex]	1.TS.80.LA-XX-Q	1.TS.80.WU-XX-Q	1.TS.80.WU-NW-Q	1.TS.80.WU-FH-Q
with synthetic tissue [e.g. gortex, mesh]	1.TS.80.LA-XX-N	1.TS.80.WU-XX-N	1.TS.80.WU-NW-N	1.TS.80.WU-FH-N
with tendon transfer for realignment, [e.g. advancement, transposition]	1.TS.80.LA-XX-E	1.TS.80.WU-XX-E	1.TS.80.WU-NW-E	1.TS.80.WU-FH-E

1.TV.^^.^^ Therapeutic Interventions on the Radius and Ulna

- Includes:** Epiphysis or periosteum of radius and ulna
 Radius NOS
 Tuberosity of radius
 Tuberosity of ulna
 Ulna NOS
- Excludes:** Articular surface of distal radius and ulna (see [1.UC.^^.^^](#))
 Articular surface of proximal radius and ulna (see [1.TM.^^.^^](#))
 Olecranon (see [1.TM.^^.^^](#))
 Radius: head and neck (see [1.TM.^^.^^](#))
 Ulna: coronoid process and tubercle (see [1.TM.^^.^^](#))

1.TV.03.^^ Immobilization, radius and ulna**S** 12 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 12	Optional	Tx Status 7	Status	R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Application, external immobilization device, radius and ulna
 Immobilization with traction, radius and ulna
 Removal with replacement, external immobilization device, radius and ulna
 Traction, radius and ulna (with or without suspension)

Note: May involve immobilization of elbow and hand to stabilize radius and ulna.

1.TV.03.HA-KC	using percutaneous external fixator
1.TV.03.HA-TA	using skeletal traction
1.TV.03.JA-EQ	using brace
1.TV.03.JA-FQ	using cast [includes spica]
1.TV.03.JA-SQ	using sling
1.TV.03.JA-SR	using splinting device [support]

1.TV.09.^ ^ Stimulation, radius and ulna**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Cutaneous stimulation, radius and ulna
Insertion, of bone growth stimulator, radius and ulna

1.TV.09.HA-JA using percutaneously inserted electrodes [e.g. bone growth stimulator]
1.TV.09.JA-AQ using external magnets (e.g. pulsating electro magnet field-[PEMF])
1.TV.09.JA-JA using externally applied electrodes (e.g. under cast)

1.TV.35.^ ^ Pharmacotherapy (local), radius and ulna**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Cleansing, radius and ulna (open wound fracture)
Irrigation, radius and ulna

Excludes: that concomitant with (open) reduction of radius and ulna (see [1.TV.73.^ ^](#))
that concomitant with fixation of radius and ulna (see [1.TV.74.^ ^](#))

1.TV.35.JA-D1 using external approach and antiinfective irrigating solution
Includes: chlorhexidine, neomycin
1.TV.35.JA-D2 using external approach and salt irrigating solution
Includes: sodium chloride
1.TV.35.JA-D3 using external approach and other irrigating solution
Includes: sorbitol, mannitol
1.TV.35.LA-K8 using open approach and antibacterial agent (e.g. gentamycin beads)

1.TV.38.^ ^ Management of external appliance, radius and ulna

- Includes:** Adjusting appliance, radius and ulna
Removal of immobilization device, radius and ulna
- Excludes:** Percutaneous pin [wound] site care (see [1.YT.35.^ ^](#))
Removal with replacement, external immobilization device (see [1.TV.03.^ ^](#))

1.TV.38.HA-KC	of percutaneous external fixator
1.TV.38.JA-EQ	of brace
1.TV.38.JA-FQ	of cast
1.TV.38.JA-MM	of pneumatic orthoses
1.TV.38.JA-SQ	of sling
1.TV.38.JA-SR	of splinting device

1.TV.52.^ ^ Drainage, radius and ulna**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Drainage, radial and ulnar cyst

1.TV.52.HA	using percutaneous (needle) approach
1.TV.52.HA-J2	using percutaneous (needle) approach and steroid infiltration
1.TV.52.HA-XX-A	using percutaneous (needle) approach and bone marrow packing

1.TV.55.^ ^ Removal of device, radius and ulna**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Excludes: Removal of percutaneous fixator device (see [1.TV.38.^^](#))

1.TV.55.LA-DV	of electronic stimulation device [e.g. bone growth stimulator] using open approach
1.TV.55.LA-K8	of antibacterial agent (e.g. gentamycin beads) using open approach
1.TV.55.LA-KD	of wire/mesh/staple using open approach
1.TV.55.LA-LQ	of intramedullary nail using open approach
1.TV.55.LA-NV	of pin/nail using open approach
	Includes: Removal of skeletal traction pin
1.TV.55.LA-NW	of plate/screw using open approach
1.TV.55.LA-PM	of endoprosthesis using open approach

1.TV.56.^^ Removal of foreign body, radius and ulna

S 4 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Removal of missile (e.g. bullet, metal fragment, carpenter's nail), radius and ulna that with debridement of site

Excludes: Removal of fixative device, radius and ulna (see [1.TV.55.^^](#))

1.TV.56.JA	using external (manual extraction) approach
1.TV.56.LA	using open approach

1.TV.58.^ ^ Procurement, radius and ulna**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

1.TV.58.LA-XX-A of autograft using open approach
 1.TV.58.LA-XX-G of pedicled flap using open approach
 1.TV.58.LA-XX-K of bone graft (from deceased donor) using open approach

1.TV.59.^ ^ Destruction, radius and ulna**S** ⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Sclerotherapy, radius and ulna, intralesional [e.g. aneurysmal bone cyst]

Excludes: Osteoclasts, radius and ulna (see [1.TV.80.^ ^](#))

1.TV.59.HA-AW using percutaneous (needle) approach with radiofrequency probe
Includes: Radiofrequency ablation (RFA), radius and ulna
 1.TV.59.HA-X7 using percutaneous (needle) approach with chemical agents (e.g. Ethibloc, zein)

1.TV.73.^ ^ Reduction, radius and ulna**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Reduction with debridement, radius and ulna
that with irrigation of open fracture wound, radius and ulna

Excludes: Reduction, radial head or neck (see elbow [1.TM.73.^^](#))
that with fixation, radius and ulna (see [1.TV.74.^^](#))

Code Also: Any application of skeletal traction or immobilization (see [1.TV.03.^^](#))

1.TV.73.JA using closed (external) approach
1.TV.73.LA using open approach

1.TV.74.^^ Fixation, radius and ulna

S 5 **L** 50

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description

				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Phototherapy, arm
Physiotherapy NOS, arm
- Excludes:** Exercise assistance (see [1.TZ.02.^^](#))
Therapy (photo, laser, massage) specifically for joints of arm (shoulder [1.TA.12.^^](#), elbow [1.TM.12.^^](#) and wrist [1.UB.12.^^](#))

1.TX.12.JA	using other technique
1.TX.12.JA-AG	using laser NEC (with or without photosensitizing chemicals)
1.TX.12.JA-DQ	using ultraviolet light
1.TX.12.JA-DU	using light NEC [e.g. long wave red light]
1.TX.12.JA-UE	using vibrating device
1.TX.12.JD	using acupressure technique
1.TX.12.JJ	using massage technique
	Excludes: Upper body massage (see 1.ZX.12.^^)
1.TX.12.JP	using therapeutic touch technique

1.TX.13.^ ^ Control of bleeding, soft tissue of arm NEC**L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes:

Control of bleeding (wound) extending into soft tissue (muscle or tendon) of arm

Excludes:Application of pressure dressing for control of bleeding soft tissue of arm (see [1.YT.14.^ ^](#))Control of bleeding (wound) of skin of arm only (see [1.YT.13.^ ^](#))Control of bleeding by suture/staple repair of muscle of forearm around elbow (see [1.TQ.80.^ ^](#))Control of bleeding by suture/staple repair of muscle of forearm around wrist (see [1.UY.80.^ ^](#))Control of bleeding by suture/staple repair of muscle of upper arm around shoulder (see [1.TF.80.^ ^](#))Control of bleeding involving suture/staple repair of tendon of forearm around elbow (see [1.TS.80.^ ^](#))Control of bleeding involving suture/staple repair of tendon of forearm around wrist (see [1.UV.80.^ ^](#))Control of bleeding involving suture/staple repair of tendon of upper arm around shoulder (see [1.TH.80.^ ^](#))Repair of artery (bleeder) of arm (see [1.JM.80.^ ^](#))Repair of vein of arm to control bleeding (see [1.JU.80.^ ^](#))Systemic pharmacotherapy for control of bleeding (see [1.ZZ.35.^ ^](#))

1.TX.13.HA-C2	using percutaneous injection of antihemorrhagic agent
	Includes: aminocaproic acid, aprotinin, phytonadione, thrombin, coagulation factor VIII
1.TX.13.JA-C2	using topical antihemorrhagic agent
1.TX.13.JN	using external manual compression

1.TX.26.^ ^ Brachytherapy, soft tissue of arm NEC**S** 35

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 35	Optional	Implant Status	Status	P M	Permanent implant – Radioactive source left in place permanently
				T M	Temporary implant – Radioactive source removed after course of treatment is complete

Includes: Endocurietherapy, soft tissue of arm
 Implantation of radioactive material, soft tissue of arm
 Interstitial radiation therapy, soft tissue of arm

Excludes: Brachytherapy of skin of arm alone (see [1.YT.26.^^](#))

Note: There are typically two distinct phases required to complete the process of brachytherapy. The first phase involves the insertion of non-radioactive applicators or conduits [e.g. hollow needles, catheters, stents etc.] that receive or transmit the radioactive material into the body. The second phase involves the after loading of the radioactive material [e.g. seeds, pellets, wires, etc.] into the applicator or conduit.

1.TX.26.HA using percutaneous (transcatheter or transneedle) approach

1.TZ.94.HA using percutaneous (needle) approach
1.TZ.94.LA using open approach

Therapeutic Interventions on the Hand and Wrist (1UB - 1UZ)

1.UB.^.^ Therapeutic Interventions on the Wrist Joint

Includes: Articular disc, bursa, capsule, cartilage, ligament and synovial lining
 Radial tubercle
 Radiocarpal, ulnocarpal joints
 Styloid process: radius and ulna
 Ulnar head

Excludes: Carpal joint(s) or bones alone (see [1.UC.^.^](#))
 Distal radioulnar joint alone (see [1.UC.^.^](#))

1.UB.02.^.^ Exercise, wrist joint

L²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Dynamic splinting, wrist joint
 Hydrotherapy, wrist joint

Excludes: Exercise of joints of fingers and hand (see [1.UL.02.^.](#))

Code Also: Any use of biofeedback (see [7.SP.59.^.](#))

Note: Involves assisting and supervising client in performing exercise

1.UB.02.YD using exercise NOS
 1.UB.02.YK using passive motion exercise
 1.UB.02.YN using active range of motion exercise
 1.UB.02.YQ using resistive exercise
 1.UB.02.ZA using aquatic exercise
 1.UB.02.ZB using balance training exercise

1.UB.03.^ ^ Immobilization, wrist joint**S** ¹² **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 12	Optional	Tx Status 7	Status	R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Application, external immobilization device, wrist
Removal with replacement, external immobilization device, wrist

1.UB.03.HA-KC using percutaneous external fixator
 1.UB.03.JA-FG using binding device (e.g. restrictive dressing, taping)
 1.UB.03.JA-FQ using cast
 1.UB.03.JA-MM using pneumatic orthotic device (e.g. air cast)
 1.UB.03.JA-SQ using sling
 1.UB.03.JA-SR using splinting device
 1.UB.03.JA-TA using skin traction

1.UB.04.^ ^ Mobilization, wrist joint**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Traction, wrist

Excludes: Manual myofascial release only of wrist and hand (see [1.UY.04.^ ^](#))
 Mobilization with concomitant manipulation, wrist (see [1.UB.05.^ ^](#))
 Traction for immobilization of fracture of wrist joint (see [1.UB.03.^ ^](#))

1.UB.04.JH using external approach with manual technique

1.UB.05.^ ^ Manipulation, wrist joint**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Joint adjustment, wrist
Mobilization with concomitant manipulation, wrist
Skeletal manipulation, wrist

Excludes: Massage, wrist and hand (see [1.UY.12.^ ^](#))

1.UB.05.JH using external approach with manual technique

1.UB.07.^ ^ Hyperthermy, wrist joint**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Application, heat, wrist joint
Diathermy, wrist joint

Excludes: Hyperthermy, multiple body sites (see [1.ZX.07.^ ^](#))

1.UB.07.JA-CG using microwave
1.UB.07.JA-DU using infrared device [e.g. heat lamp, baker]
1.UB.07.JA-DZ using short wave
1.UB.07.JA-EA using conductive heat device
1.UB.07.JA-HB using other diathermy device NEC
1.UB.07.JA-KH using externally applied dry heat [e.g. heating pad]
1.UB.07.JA-KJ using externally applied moist heat [e.g. compress, soak]
1.UB.07.JA-KQ using paraffin
1.UB.07.JA-TR using whirlpool

1.UB.12.^ ^ Therapy, wrist joint**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Phototherapy, wrist
 Physiotherapy NOS, wrist joint
 Therapy, laser, wrist (for pain reduction and promotion of healing)

Excludes: Exercise therapy of wrist (see [1.UB.02.^ ^](#))
 Hydrotherapy, wrist joint (see [1.UB.02.^ ^](#))
 Hyperthermy of wrist joint (see [1.UB.07.^ ^](#))
 Hypothermy of soft tissue surrounding wrist (see [1.UY.06.^ ^](#))
 Therapy (photo, laser, massage) soft tissue of wrist and hand (see [1.UY.12.^ ^](#))

1.UB.12.JA-AG using laser NEC (with or without photosensitizing chemicals)
 1.UB.12.JA-DQ using ultraviolet light
 1.UB.12.JA-DU using light NEC [e.g. long wave red light]
 1.UB.12.JJ using massage technique

1.UB.35.^ ^ Pharmacotherapy (local), wrist joint**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Injection, wrist joint
 Instillation, wrist joint
 Irrigation (arthroscopic), wrist joint
- Excludes:** Systemic pharmacotherapy (see [1.ZZ.35.^^](#))
 That for soft tissue of arm (see [1.UY.35.^^](#))

1.UB.35.DA-D1	using endoscopic (arthroscopic) approach and antiinfective irrigating solution Includes: chlorexidine, neomycin
1.UB.35.DA-D2	using endoscopic (arthroscopic) approach and salt irrigating solution Includes: sodium chloride
1.UB.35.DA-D3	using endoscopic (arthroscopic) approach and other irrigating solution Includes: sorbitol, mannitol
1.UB.35.HA-J2	using percutaneous (needle) approach and corticosteroid solution
1.UB.35.HA-K0	using percutaneous (needle) approach and antiinfective agent NEC
1.UB.35.HA-N1	using percutaneous (needle) approach and antiinflammatory agent Includes: NSAIDS (indomethacin, ibuprofen, mefenamic acid), chloroquine, aurothioglucose, D penicillamine
1.UB.35.HA-P1	using percutaneous (needle) approach and local anesthetic agent
1.UB.35.HA-P2	using percutaneous (needle) approach and analgesic agent
1.UB.35.HA-T9	using percutaneous (needle) approach and pharmacological agent NEC
1.UB.35.LA-K8	using open approach and antibacterial agent (e.g. gentamycin beads)

1.UB.38.^^ Management of external appliance, wrist joint

L ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Adjusting appliance, wrist
- Excludes:** Percutaneous pin [wound] site care (see [1.YT.35.^^](#))
 Removal with replacement, external immobilization device, wrist (see [1.UB.03.^^](#))

1.UB.38.HA-KC	of percutaneous external fixator
1.UB.38.JA-EQ	of bracing device
1.UB.38.JA-FQ	of cast
1.UB.38.JA-MM	of pneumatic orthotic device (e.g. air cast)
1.UB.38.JA-SQ	of sling
1.UB.38.JA-SR	of splinting device

1.UB.52.^ ^ Drainage, wrist joint**S** 4 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Bursectomy, wrist joint
Bursotomy, wrist joint

1.UB.52.DA using endoscopic [arthroscopic] approach
 1.UB.52.HA using percutaneous (needle) approach for aspiration
 1.UB.52.WJ using open excisional approach [e.g. bursectomy]
 1.UB.52.WK using open incisional approach [e.g. bursotomy]

1.UB.53.^ ^ Implantation of internal device, wrist joint**S** 5 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Arthroplasty with implantation of prosthetic device, wrist
 Hemiarthroplasty with implantation of prosthetic device, wrist
 Replacement, wrist, using [temporary] cement spacer
 Replacement, wrist, using prosthetic device

Excludes: Ostectomy of radius or ulna (for neoplasm) with concomitant reconstruction, using an endoprosthesis and bone graft (see [1.TV.87.^ ^](#))

1.UB.53.^ ^ Implantation of internal device, wrist joint	with synthetic material (e.g. bone paste, cement)	uncemented	with bone autograft [uncemented]	with bone homograft [uncemented]	with combined sources of tissue (e.g. bone graft, cement, paste)
dual component prosthetic device [e.g. proximal radius and ulnar head with or without scaphoid or lunate component]	1.UB.53.LA-PN-N	1.UB.53.LA-PN	1.UB.53.LA-PN-A	1.UB.53.LA-PN-K	1.UB.53.LA-PN-Q
single component prosthetic device [e.g. styloid process of radius]	1.UB.53.LA-PM-N	1.UB.53.LA-PM	1.UB.53.LA-PM-A	1.UB.53.LA-PM-K	1.UB.53.LA-PM-Q
temporary cement spacer [impregnated with antibiotics]	1.UB.53.LA-SL-N	—	—	—	—

1.UB.55.^ ^ Removal of device, wrist joint**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

1.UB.55.JA-GX	of device NEC using external approach
1.UB.55.LA-K8	of antibacterial agent (e.g. gentamycin beads) using open approach
1.UB.55.LA-KD	of wire/staple using open approach
1.UB.55.LA-NV	of pin/nail using open approach
1.UB.55.LA-NW	of plate/screw using open approach
1.UB.55.LA-PM	of uncemented single component prosthetic device using open approach
1.UB.55.LA-PM-N	of cemented single component prosthetic device using open approach
1.UB.55.LA-PN	of uncemented dual component prosthetic device using open approach
1.UB.55.LA-PN-N	of cemented dual component prosthetic device using open approach
1.UB.55.LA-XX-N	of mesh using open approach

1.UB.58.^ ^ Procurement, wrist joint**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Harvesting, wrist joint osteochondral tissue (cartilage)

1.UB.58.DA using endoscopic [arthroscopic] approach
 1.UB.58.HA using percutaneous (needle) approach

1.UB.72.^ ^ Release, wrist joint**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Arthrolysis, wrist joint
 Capsulotomy, wrist joint
 Lysis [adhesions], wrist joint
 Release, ligament, wrist joint

Excludes: Exercise therapy of wrist [passive or active] alone (see [1.UB.02.^ ^](#))
 Manual rupture of joint adhesions, wrist (see [1.UB.05.^ ^](#))
 Reduction of dislocated wrist ([1.UB.73.^ ^](#))

Omit code: When any of the following interventions are performed concomitantly with release: joint excision [synovectomy, arthrectomy, chondrectomy], loose body extraction, ligament repair or release (see [1.UB.80.^ ^](#))

1.UB.72.DA using endoscopic [arthroscopic] approach
 1.UB.72.LA using open [incisional] approach

1.UB.73.^ Reduction, wrist joint**S** 4 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Debridement with reduction, wrist joint

Excludes: that with fixation, carpal joint(s) or bones (see [1.UC.74.^](#))
that with fixation, wrist joint (see [1.UB.74.^](#))

Code Also: Any immobilization (see [1.UB.03.^](#))

1.UB.73.JA using closed (external) approach

1.UB.73.LA using open approach

1.UB.74.^ Fixation, wrist joint**S** 5 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Fixation, radial styloid process with scaphoid or lunate
Fixation, radial styloid process, tubercle
Fixation, ulnar head and styloid process
Reduction with fixation, wrist joint

Excludes: Fixation, carpal bones alone [scaphoid, lunate, triquetrum, pisiform, hamate, capitate, trapezium, trapezoid] (see [1.UC.74.^](#))

Code Also: Any immobilization (see [1.UB.03.^](#))

1.UB.74.^ Fixation, wrist joint	fixation device alone	with bone autograft	with bone homograft	with combined sources of tissue [e.g. bone graft, cement/paste]	with synthetic tissue [e.g. bone cement, or paste]
open approach					
using pin, nail	1.UB.74.LA-NV	1.UB.74.LA-NV-A	1.UB.74.LA-NV-K	1.UB.74.LA-NV-Q	1.UB.74.LA-NV-N
using plate, screw	1.UB.74.LA-NW	1.UB.74.LA-NW-A	1.UB.74.LA-NW-K	1.UB.74.LA-NW-Q	1.UB.74.LA-NW-N
using wire, mesh, staple	1.UB.74.LA-KD	1.UB.74.LA-KD-A	1.UB.74.LA-KD-K	1.UB.74.LA-KD-Q	1.UB.74.LA-KD-N
using intramedullary nail	1.UB.74.LA-LQ	1.UB.74.LA-LQ-A	1.UB.74.LA-LQ-K	1.UB.74.LA-LQ-Q	1.UB.74.LA-LQ-N
endoscopic [arthroscopic] approach					
using pin, nail	1.UB.74.DA-NV	1.UB.74.DA-NV-A	1.UB.74.DA-NV-K	1.UB.74.DA-NV-Q	1.UB.74.DA-NV-N
using plate, screw	1.UB.74.DA-NW	1.UB.74.DA-NW-A	1.UB.74.DA-NW-K	1.UB.74.DA-NW-Q	1.UB.74.DA-NW-N
using wire, mesh, staple	1.UB.74.DA-KD	1.UB.74.DA-KD-A	1.UB.74.DA-KD-K	1.UB.74.DA-KD-Q	1.UB.74.DA-KD-N
percutaneous approach [e.g. with closed or no reduction]					
using pin, nail	1.UB.74.HA-NV	—	—	—	—
using wire, mesh, staple	1.UB.74.HA-KD	—	—	—	1.UB.74.HA-KD-N
using plate, screw	1.UB.74.HA-NW	—	—	—	—
using intramedullary nail	1.UB.74.HA-LQ	—	—	—	—

1.UB.75.^ Fusion, wrist joint**S** 5 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Arthrodesis, radiocarpal joint
Arthrodesis, wrist

Excludes: Arthrodesis, radioulnar joint only (see [1.UC.75.^](#))

Code Also: Any immobilization (see [1.UB.03.^](#))

1.UB.75.^ Fusion, wrist joint	no tissue used (for fusion)	with bone autograft	with bone homograft	with combined sources of tissue [e.g. bone graft, cement/paste]	with synthetic tissue [e.g. bone cement, paste]
using intramedullary nail	1.UB.75.LA-LQ	1.UB.75.LA-LQ-A	1.UB.75.LA-LQ-K	1.UB.75.LA-LQ-Q	1.UB.75.LA-LQ-N
using pin, nail	1.UB.75.LA-NV	1.UB.75.LA-NV-A	1.UB.75.LA-NV-K	1.UB.75.LA-NV-Q	1.UB.75.LA-NV-N
using plate, screw	1.UB.75.LA-NW	1.UB.75.LA-NW-A	1.UB.75.LA-NW-K	1.UB.75.LA-NW-Q	1.UB.75.LA-NW-N
with no device used (for fusion)	—	1.UB.75.LA-XX-A	1.UB.75.LA-XX-K	1.UB.75.LA-XX-Q	—

1.UB.80.^ Repair, wrist joint**S** ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Arthrectomy with interpositional graft, wrist (to prevent adhesions)

Arthroplasty, wrist

Capsular release with interpositional graft, wrist

Capsulodesis, wrist [radius to scaphoid]

Capsulorrhaphy with ligament repair, wrist joint [e.g. for laxity repair]

Suture of joint capsule or ligament, wrist

Excludes: Arthroplasty for reduction and internal fixation, wrist (see [1.UB.74.^](#))
Arthroplasty with implantation of prosthetic device, wrist (see [1.UB.53.^](#))**Note:** May involve multiple interventions on wrist joint, such as the following: joint excision [synovectomy, arthrectomy or chondrectomy], loose body extraction, ligament resection [or repair], capsular release.

1.UB.80.^ Repair, wrist joint	endoscopic [arthroscopic] approach	open approach
using autograft [e.g. bone, interpositional fascia lata, muscle graft, rolled anchovy graft]	1.UB.80.DA-XX-A	1.UB.80.LA-XX-A
using combined sources of tissue [autograft with synthetic tissue]	1.UB.80.DA-XX-Q	1.UB.80.LA-XX-Q
using local tendon transfer [rebalancing]	1.UB.80.DA-XX-E	1.UB.80.LA-XX-E
using simple apposition technique only [e.g. suturing]	1.UB.80.DA	1.UB.80.LA
using synthetic tissue [e.g. mesh, gortex, silastic sheath]	1.UB.80.DA-XX-N	1.UB.80.LA-XX-N

1.UB.83.^ ^ Transfer, wrist joint**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Autotransplantation, cultured chondrocyte cells, wrist joint
Therapy, chondrocyte gene, wrist joint

1.UB.83.DA-XX-P of cultured chondrocyte cells using endoscopic [arthroscopic] approach
1.UB.83.HA-XX-P of cultured chondrocyte cells using percutaneous approach

1.UB.87.^ ^ Excision partial, wrist joint**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Arthrectomy, wrist
Chondrectomy, wrist
Debridement, wrist joint
Extraction deposits, fragments, loose bodies
Synovectomy, wrist joint

Excludes: Arthrectomy, radioulnar joint (see [1.UC.87.^ ^](#))
Debridement with reduction, wrist joint (see [1.UB.73.^ ^](#))
Hemiarthrectomy, trapezial (see [1.UC.87.^ ^](#))
Hemiresection, radioulnar joint with interpositional graft (see [1.UC.80.^ ^](#))
Ostectomy, carpal (see [1.UC.87.^ ^](#))
Styloidectomy, radial (see [1.UC.87.^ ^](#))

Omit code: When any of the following interventions – ligament resection or repair, capsular release – are performed concomitantly with any type of joint excision(s) such as arthrectomy, chondrectomy, extraction (deposits, fragments, loose bodies), synovectomy (see [1.UB.80.^ ^](#))

1.UB.87.^ ^ Excision partial, wrist joint	endoscopic [arthroscopic] approach	open approach
other joint excision [e.g. arthrectomy, chondrectomy, debridement] with or without synovectomy	1.UB.87.DA	1.UB.87.LA
synovectomy [dissection] alone	1.UB.87.GB	1.UB.87.WJ

1.UB.93.^ ^ Amputation, wrist joint**S** ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Amputation, through wrist joint

1.UB.93.LA	using simple apposition technique [e.g. suturing] (for closure of stump)
1.UB.93.LA-XX-A	using skin graft (for closure of stump)
1.UB.93.LA-XX-E	using local flap myoplasty or myodesis (for closure of stump)

1.UC.^ ^ Therapeutic Interventions on the Distal Radioulnar and Carpal Joints and Bones

Includes:

- Capitate [os magnum]
- Capsule, cartilage, ligament and synovial lining of carpal and radioulnar joints
- Carpal bones
- Carpal joints
- Carpometacarpal joint
- Hamate [unciform]
- Intercarpal joints
- Lunate [semilunar]
- Midcarpal joints
- Navicular [scaphoid]
- Pisiform
- Radioulnar joint
- Trapezoid
- Triquetrum [cuneiform of carpus]
- Volar wrist ligaments

Excludes: Radiocarpal and ulnocarpal joints of wrist (see [1.UB.^ ^](#))

1.UC.53.^ ^ Implantation of internal device, distal radioulnar joint and carpal joints and bones**S** ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Arthroplasty with implantation of [carpal] spacer device, carpal joint
 Arthroplasty with implantation of prosthetic device, scaphotrapezial
 Arthroplasty with implantation of prosthetic device, trapeziometacarpal
 Carpectomy (proximal row) with implantation of prosthetic device(s)
 Implantation, carpal spacer device
 Replacement, carpal bone, using spacer device

Excludes: Arthroplasty with implantation of prosthetic device, wrist joint (see [1.UB.53.^ ^](#))
 Arthroplasty with interpositional graft, carpal joint (see [1.UC.80.^ ^](#))
 Implantation, radioulnar heads, prosthetic device (see [1.UB.53.^ ^](#))

1.UC.53.LA-PM of single-component prosthetic device using open approach
 1.UC.53.LA-PN of dual-component prosthetic device using open approach
 1.UC.53.LA-QD of single-component prosthetic device with (additional) wire fixation using open approach
 1.UC.53.LA-QH of dual-component prosthetic device with (additional) wire fixation (for stabilization) using open approach
 1.UC.53.LA-SL of spacer device [e.g. Silastic spacer] using open approach

1.UC.55.^ ^ Removal of device, distal radioulnar joint and carpal joints and bones**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Removal of spacer device, carpal

1.UC.55.LA-KD	of wire/staple using open approach
1.UC.55.LA-NV	of pin/nail using open approach
1.UC.55.LA-NW	of plate/screw using open approach
1.UC.55.LA-PM	of single-component prosthetic device using open approach
1.UC.55.LA-PN	of dual-component prosthetic device using open approach
1.UC.55.LA-QD	of single-component prosthetic device with (additional) wire fixation (for stabilization) using open approach
1.UC.55.LA-QH	of dual-component prosthetic device with (additional) wire fixation (for stabilization) using open approach
1.UC.55.LA-SL	of spacer device [e.g. Silastic] using open approach

1.UC.58.^^ Procurement, distal radioulnar joint and carpal joints and bones

S 4 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Excludes: Procurement radius and ulna bone (see [1.TV.58.^^](#))

1.UC.58.LA-XX-A of bone autograft using open approach

1.UC.59.^^ Destruction, distal radioulnar joint and carpal joints and bones

S 4 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Arthroplasty with interpositional spacer, carpal
 Arthroplasty, interpositional [tendon] with ligament reconstruction, trapeziometacarpal joint
 Arthroplasty, radioulnar joint
 Centralization of hand (over distal ulna, for congenital radial dysplasia or "radial clubhand" deformity)
 Hemi resection, radioulnar joint with interpositional graft
 Hemiarthroplasty, trapezium
 Osteotomy, carpal
 Repair, volar wrist ligaments
 Resection, distal ulna with interpositional graft
 Suture of joint capsule or ligament

Note: May involve multiple interventions on radioulnar or carpal joints, such as: joint excision [arthrectomy, chondrectomy, ganglionectomy or synovectomy], loose body extraction, ligament resection [or repair] capsular release.

1.UC.80.^^ Repair, distal radioulnar joint and carpal joints and bones	endoscopic [arthroscopic] approach	open approach	open approach with wire/staple	open approach with screw/plate device
using simple apposition technique only [e.g. suturing]	1.UC.80.DA	1.UC.80.LA	1.UC.80.LA-KD	1.UC.80.LA-NW

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)
E 64	Optional	Bones/Joints	Extent	1	1 bone/joint
				2	2 bones/joints
				3	3 bones/joints
				4	4 bones/joints
				5	5 bones/joints
				6	6 bones/joints
				7	7 bones/joints
				8	8 bones/joints (or more)

Includes: Reattachment, hand or thumb , at metacarpal bones

Code Also: Reattachment, 1st metacarpal bone (see [1.UF.82.^ ^](#))

Note: Involves microsurgical technique to reestablish vascular and neural function.

1.UF.82.LA	using simple apposition technique [e.g. suturing]
1.UF.82.LA-KD	using wire/staple fixation with apposition technique
1.UF.82.LA-NW	using plate/screw fixation with apposition technique
1.UF.82.LA-NW-A	using plate/screw fixation with bone autograft
1.UF.82.LA-NW-N	using plate/screw fixation with synthetic tissue [e.g. bone cement or paste]
1.UF.82.LA-XX-F	using free flap [e.g. myocutaneous, osseocutaneous flap]

1.UF.84.^ ^ Construction or reconstruction, other metacarpal bones**S** 4 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Closure, cleft hand
 Longitudinal osteotomy of the hand (for synostosis repair)
 Reconstruction, hand (for cleft deformity)

Code Also: Any concomitant toe-to-finger transfer, 1st phalanx of hand (see [1.UI.80.^ ^](#))
 Any concomitant toe-to-finger transfer, other phalanx of hand (see [1.UJ.80.^ ^](#))

Note: May involve release of syndactyly, repair of thumb adduction and delta phalanx and resection of bony deformity as necessary.

1.UF.84.LA-XX-E using open approach and local flap [for closure]
 1.UF.84.LA-XX-Q using open approach and local flap with skin autograft [for closure]

1.UF.87.^ ^ Excision partial, other metacarpal bones**S** 4 **L** 2 **E** 64

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)
E 64	Optional	Bones/Joints	Extent	1	1 bone/joint
				2	2 bones/joints
				3	3 bones/joints
				4	4 bones/joints
				5	5 bones/joints
				6	6 bones/joints
				7	7 bones/joints
				8	8 bones/joints (or more)

Includes: Debridement, metacarpal bones
Sequestrectomy, metacarpal bones

Excludes: Debridement with reduction, metacarpal bones (see [1.UF.73.^^](#))
Shortening, metacarpal (see [1.UF.80.^^](#))

Code Also: Any concomitant arthrectomy, 1st metacarpal bone (see [1.UE.87.^^](#))

Note: Involves metacarpal resection [e.g. for neoplasm] which usually requires stabilization of the surgical defect often by grafting and applying fixative devices. (The definitive intervention is the resection, however, there may be a significant salvage component to manage the surgical wound)

1.UF.87.^^ Excision partial, other metacarpal bones	no tissue used (for closure of defect)	with bone autograft (to close defect)	with bone homograft (to close defect)	with combined sources of tissue [e.g. bone graft, cement/paste]	with synthetic tissue [e.g. bone cement, or paste]
no device used	1.UF.87.LA	1.UF.87.LA-XX-A	1.UF.87.LA-XX-K	1.UF.87.LA-XX-Q	1.UF.87.LA-XX-N

 Arthrodesis, metacarpophalangeal joints
 Fusion, metacarpophalangeal joint with metacarpal osteotomy

Code Also: Any concomitant fusion of 1st MCP joint (see [1.UH.75.^ ^](#))

1.UG.75.^ ^ Fusion, other metacarpophalangeal joint(s)	no tissue used (for fusion)	with bone autograft	with bone homograft	with combined sources of tissue [e.g. bone graft, cement/paste]	with synthetic tissue [e.g. bone cement, paste]
joint fusion alone					
no device used (for fusion)	—	1.UG.75.LA-XX-A	1.UG.75.LA-XX-K	1.UG.75.LA-XX-Q	1.UG.75.LA-XX-N
using pin, nail	1.UG.75.LA-NV	1.UG.75.LA-NV-A	1.UG.75.LA-NV-K	1.UG.75.LA-NV-Q	1.UG.75.LA-NV-N
using screw, plate and screw	1.UG.75.LA-NW	1.UG.75.LA-NW-A	1.UG.75.LA-NW-K	1.UG.75.LA-NW-Q	1.UG.75.LA-NW-N
using wire, staple, tension band	1.UG.75.LA-KD	1.UG.75.LA-KD-A	1.UG.75.LA-KD-K	1.UG.75.LA-KD-Q	1.UG.75.LA-KD-N
joint fusion with metacarpal osteotomy					
no device used (for fusion)	—	1.UG.75.VJ-XX-A	1.UG.75.VJ-XX-K	1.UG.75.VJ-XX-Q	1.UG.75.VJ-XX-N
using pin, nail	1.UG.75.VJ-NV	1.UG.75.VJ-NV-A	1.UG.75.VJ-NV-K	1.UG.75.VJ-NV-Q	1.UG.75.VJ-NV-N
using screw, plate and screw	1.UG.75.VJ-NW	1.UG.75.VJ-NW-A	1.UG.75.VJ-NW-K	1.UG.75.VJ-NW-Q	1.UG.75.VJ-NW-N
using wire, staple, tension band	1.UG.75.VJ-KD	1.UG.75.VJ-KD-A	1.UG.75.VJ-KD-K	1.UG.75.VJ-KD-Q	1.UG.75.VJ-KD-N

1.UG.80.^ ^ Repair, other metacarpophalangeal joint(s)**S** 5 **L** 2 **E** 64

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)
E 64	Optional	Bones/Joints	Extent	1	1 bone/joint
				2	2 bones/joints
				3	3 bones/joints
				4	4 bones/joints
				5	5 bones/joints
				6	6 bones/joints
				7	7 bones/joints
				8	8 bones/joints (or more)

Includes: Arthrectomy, metacarpophalangeal, with metacarpal osteotomy
 Arthroplasty, metacarpophalangeal joints
 Arthroplasty, metacarpophalangeal, with metacarpal osteotomy
 Arthroplasty, resection, metacarpophalangeal joint
 Capsular release, metacarpophalangeal joint with metacarpal osteotomy
 Capsulodesis, metacarpophalangeal joints
 Capsuloplasty, metacarpophalangeal
 Capsulorrhaphy, metacarpophalangeal joints
 Repair, ligament, metacarpophalangeal joints
 Suture of joint capsule, metacarpophalangeal joints

Excludes: Metacarpophalangeal fusion with metacarpal osteotomy (see [1.UG.75.^ ^](#))
 that with implantation prosthesis, metacarpophalangeal joint(s) (see [1.UG.53.^ ^](#))

Code Also: Any concomitant repair of 1st MCP joint (see [1.UH.80.^ ^](#))
 Any concomitant tendon release (see [1.UV.72.^ ^](#))
 Any concomitant tendon transfer or repair (see [1.UV.80.^ ^](#))

Note: May involve multiple interventions such as the following: joint excision [arthrectomy, chondrectomy or synovectomy], loose body extraction, ligament repair or capsular release, with or without metacarpal osteotomy to improve joint mobility (or alignment) or to manage pain.

1.UG.80.^.^ Repair, other metacarpophalangeal joint(s)	no tissue used (for repair)	with autograft [e.g. bone, interpositional tendon, fascia]	with bone homograft	with combined sources of tissue [e.g. bone graft, synthetic tissue]	with synthetic tissue [e.g. silastic sheath]
joint repair alone					
no device used (for repair)	1.UG.80.LA	1.UG.80.LA-XX-A	1.UG.80.LA-XX-K	1.UG.80.LA-XX-Q	1.UG.80.LA-XX-N
using pin, nail	1.UG.80.LA-NV	1.UG.80.LA-NV-A	1.UG.80.LA-NV-K	1.UG.80.LA-NV-Q	1.UG.80.LA-NV-N
using screw, plate and screw	1.UG.80.LA-NW	1.UG.80.LA-NW-A	1.UG.80.LA-NW-K	1.UG.80.LA-NW-Q	1.UG.80.LA-NW-N
using wire, staple, tension band	1.UG.80.LA-KD	1.UG.80.LA-KD-A	1.UG.80.LA-KD-K	1.UG.80.LA-KD-Q	1.UG.80.LA-KD-N
joint repair with metacarpal osteotomy					
no device used (for repair)	1.UG.80.VJ	1.UG.80.VJ-XX-A	1.UG.80.VJ-XX-K	1.UG.80.VJ-XX-Q	1.UG.80.VJ-XX-N
using pin, nail	1.UG.80.VJ-NV	1.UG.80.VJ-NV-A	1.UG.80.VJ-NV-K	1.UG.80.VJ-NV-Q	1.UG.80.VJ-NV-N

using wire, staple, tension band	1.UG.80.VJ-KD	1.UG.80.VJ-KD-A	1.UG.80.VJ-KD-K	1.UG.80.VJ-KD-Q	1.UG.80.VJ-KD-N
open approach and special incisional technique [e.g. microfracturing]					
no device used (for repair)	1.UG.80.WK	—	—	—	—

1.UG.87.^.^ Excision partial, other metacarpophalangeal joint(s)**S 4 L 2 E 64**

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)
E 64	Optional	Bones/Joints	Extent	1	1 bone/joint
				2	2 bones/joints
				3	3 bones/joints
				4	4 bones/joints
				5	5 bones/joints
				6	6 bones/joints
				7	7 bones/joints
				8	8 bones/joints (or more)

Includes:	Arthrectomy, metacarpophalangeal joints Chondrectomy, metacarpophalangeal joints Debridement, metacarpophalangeal joints Extraction deposits, fragments, loose bodies Synovectomy, metacarpophalangeal joints
Excludes:	arthroplasty, resection, metacarpophalangeal joints (see 1.UG.80.^^) debridement with fixation, metacarpophalangeal joints (see 1.UG.74.^^) that with implantation of prosthetic device (see 1.UG.53.^^)
Code Also:	Any concomitant arthrectomy, 1st MCP joint (see 1.UH.87.^^)
Omit code:	When any of the following interventions – ligament repair or capsular release – are performed concomitantly with any type of joint excision (s) such as arthrectomy, chondrectomy, extraction (deposits, fragments, loose bodies), synovectomy (see 1.UG.80.^^)
1.UG.87.LA	using other excisional technique [e.g. arthrectomy, chondrectomy] (with or without synovectomy)
1.UG.87.WJ	using synovectomy dissection only

1.UG.93.^^ Amputation, other metacarpophalangeal joint(s)**S** 5 **L** 2 **E** 64

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)
E 64	Optional	Bones/Joints	Extent	1	1 bone/joint
				2	2 bones/joints
				3	3 bones/joints
				4	4 bones/joints
				5	5 bones/joints
				6	6 bones/joints
				7	7 bones/joints
				8	8 bones/joints (or more)

Includes: Amputation, through metacarpophalangeal joint(s)

Code Also: Any concomitant amputation, 1st MCP joint (see [1.UH.93.^^](#))

1.UG.93.LA	using simple apposition technique [e.g. suturing] (for closure of stump)
1.UG.93.LA-XX-A	using skin graft (for closure of stump)
1.UG.93.LA-XX-E	using local flap myoplasty or myodesis (for closure of stump)

1.UH.^^.^^ Therapeutic Interventions on the First Metacarpophalangeal Joint

- Includes:** 1st metacarpal head
Articular surface of 1st metacarpophalangeal joint
Capsule, cartilage and ligament of 1st metacarpophalangeal joint
- Excludes:** 1st metacarpal neck (see [1.UE.^^.^^](#))

1.UH.52.^^ Drainage, first metacarpophalangeal joint**S** 4 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Bursectomy, 1st metacarpophalangeal joint
Bursotomy, 1st metacarpophalangeal joint

Code Also: Any concomitant drainage, other metacarpophalangeal joint(s) (see [1.UG.52.^^](#))

- 1.UH.52.HA using percutaneous (needle) aspiration
1.UH.52.WJ using open excisional approach [e.g. bursectomy]
1.UH.52.WK using open incisional approach [e.g. bursotomy]

1.UH.53.^^ Implantation of internal device, first metacarpophalangeal joint**S** 5 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Arthrectomy with implantation of prosthetic device, 1st MCP joint
 Arthroplasty with implantation of prosthetic device, 1st metacarpophalangeal joint
 Metacarpal osteotomy of thumb with implantation of prosthetic device
 Replacement, 1st metacarpophalangeal joint, using prosthetic device

Code Also: Any concomitant implantation of internal device, other metacarpophalangeal joint (see [1.UG.53.^^](#))

1.UH.53.LA-PM of uncemented single-component prosthetic device using open approach
 1.UH.53.LA-PM-N of cemented single-component prosthetic device using open approach
 1.UH.53.LA-PN of uncemented dual-component prosthetic device using open approach
 1.UH.53.LA-PN-N of cemented dual-component prosthetic device using open approach

1.UH.55.^^ Removal of device, first metacarpophalangeal joint

S ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Code Also: Any concomitant removal of device, other metacarpophalangeal joint(s) see [1.UG.55.^^](#)

1.UH.55.LA-K8 of antibacterial agent (e.g. gentamycin beads) using open approach
 1.UH.55.LA-KD of wire, staple using open approach
 1.UH.55.LA-NV of pin, nail using open approach
 1.UH.55.LA-NW of screw, plate using open approach
 1.UH.55.LA-PM of uncemented single-component prosthetic device using open approach
 1.UH.55.LA-PM-N of cemented single-component prosthetic device using open approach
 1.UH.55.LA-PN of uncemented dual-component prosthetic device using open approach
 1.UH.55.LA-PN-N of cemented dual-component prosthetic device using open approach

1.UH.72.^ ^ Release, first metacarpophalangeal joint**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Arthrolysis, 1st metacarpophalangeal joint
 Capsulotomy, 1st metacarpophalangeal joint
 Lysis [adhesions], 1st metacarpophalangeal joint
 Release, capsule, 1st metacarpophalangeal joint

Excludes: 1st Metacarpophalangeal release with 1st metacarpal osteotomy (see [1.UH.80.^ ^](#))
 Exercise therapy alone, joints of hand (see [1.UL.02.^ ^](#))
 Manual rupture of (any) MCP joint adhesions (see [1.UL.05.^ ^](#))
 Reduction (dislocation of), 1st metacarpophalangeal joint (see [1.UH.73.^ ^](#))

Omit code: When any of the following interventions are performed concomitantly with joint release: joint excision [arthrectomy, chondrectomy or synovectomy], loose body extraction, ligament repair or metacarpal osteotomy (see [1.UH.80.^ ^](#))

1.UH.72.LA using open (incisional) approach

1.UH.73.^ ^ Reduction, first metacarpophalangeal joint**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Debridement with reduction, 1st metacarpophalangeal joint

Excludes: that with fixation, 1st metacarpophalangeal joint (see [1.UH.74.^ ^](#))

Code Also: Any concomitant reduction, other metacarpophalangeal joint(s) (see [1.UG.73.^ ^](#))

1.UH.73.JA using closed (external) approach

1.UH.73.LA using open approach

1.UH.74.^ ^ Fixation, first metacarpophalangeal joint**S** 5 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Fixation, 1st metacarpal head
Reduction with fixation, 1st MCP joint

Excludes: Fixation, 1st metacarpal base (e.g. Bennett, Rolando fracture) (see [1.UC.74.^ ^](#))
fixation, 1st metacarpal neck (see [1.UE.74.^ ^](#))

Code Also: Any concomitant fixation, other metacarpophalangeal joint(s) (see [1.UG.74.^ ^](#))

1.UH.74.^ ^ Fixation, first metacarpophalangeal joint(s)	fixation device alone	with bone autograft	with synthetic tissue [bone cement, paste]	with combined sources of tissue [e.g. bone graft, cement/paste]
open approach				
using intramedullary nail	1.UH.74.LA-LQ	1.UH.74.LA-LQ-A	1.UH.74.LA-LQ-N	1.UH.74.LA-LQ-Q
using pin, nail	1.UH.74.LA-NV	1.UH.74.LA-NV-A	1.UH.74.LA-NV-N	1.UH.74.LA-NV-Q

1.UH.80.^ ^ Repair, first metacarpophalangeal joint**S** ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes:

Arthrectomy, 1st MCP joint with 1st metacarpal osteotomy
 Arthroplasty, 1st MCP with 1st metacarpal osteotomy
 Arthroplasty, 1st metacarpophalangeal joint
 Capsular release, metacarpophalangeal joint with metacarpal osteotomy
 Capsulodesis, metacarpophalangeal joints
 Capsuloplasty, metacarpophalangeal
 Capsulorrhaphy, metacarpophalangeal joints
 Repair, ligament, metacarpophalangeal joint
 Resection arthroplasty 1st metacarpophalangeal joint
 Suture of joint capsule, metacarpophalangeal joint

Excludes:

1st MCP fusion with 1st metacarpal osteotomy (see [1.UH.75.^ ^](#))
 that with implantation prosthesis, 1st MCP joint (see [1.UH.53.^ ^](#))

Code Also:

Any concomitant repair other MCP joint(s) (see [1.UG.80.^ ^](#))
 Any concomitant tendon release (see [1.UV.72.^ ^](#))
 Any concomitant tendon repair or transfer (see [1.UV.80.^ ^](#))

Note:

May involve multiple interventions such as the following: joint excision [arthrectomy, chondrectomy or synovectomy], loose body extraction, ligament repair or capsular release, with or without metacarpal osteotomy to improve joint mobility (or alignment) or to manage pain.

1.UH.80.^ ^ Repair, first metacarpophalangeal joint	no tissue used (for repair)	with autograft [e.g. bone, interpositional tendon, fascia]	with bone homograft	with combined sources of tissue [e.g. bone graft, cement/ paste]	with synthetic tissue [e.g. silastic sheath]
joint repair alone					
no device used (for repair)	1.UH.80.LA	1.UH.80.LA-XX-A	1.UH.80.LA-XX-K	1.UH.80.LA-XX-Q	1.UH.80.LA-XX-N

				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Application, external immobilization device, 1st phalanx of hand
 Immobilization, thumb
 Removal with replacement, external immobilization device, thumb

1.UI.03.HA-KC using percutaneous external fixator
 1.UI.03.JA-FG using binding device [e.g. restrictive dressing, tape]
 1.UI.03.JA-FQ using cast
 1.UI.03.JA-SR using splinting device

1.UI.38.^ Management of external appliance, first phalanx of hand

L²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Adjustment, external device or appliance, 1st phalanx of hand
 Removal, external device or appliance, 1st phalanx of hand

Excludes: Removal with replacement, external immobilization device, thumb (see [1.UI.03.^](#))

1.UI.38.HA-KC of percutaneous external fixator
 1.UI.38.JA-FQ of cast
 1.UI.38.JA-SR of splinting device

1.UI.55.^ Removal of device, first phalanx of hand

S⁴ L²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

1.UI.55.HA-KD of wire/staple using percutaneous approach
 1.UI.55.LA-KD of wire/staple using open approach
 1.UI.55.LA-NV of pin/nail using open approach
 1.UI.55.LA-NW of plate/screw using open approach

1.UI.56.^ ^ Removal of foreign body, first phalanx of hand**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Removal of missile (e.g. bullet, metal fragment, carpenter's nail), thumb that with debridement of thumb

Excludes: Removal of fixative device, phalanx of hand (see [1.UI.55.^ ^](#))

1.UI.56.JA using external (manual extraction) approach
 1.UI.56.LA using open approach

1.UI.59.^ ^ Destruction, first phalanx of hand**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Sclerotherapy, 1st phalanx of hand, intralesional [e.g. aneurysmal bone cyst]

Excludes: Osteoclasts, 1st phalanx of hand (see [1.UI.80.^ ^](#))

1.UI.59.HA-AW using percutaneous (needle) approach with radiofrequency probe
Includes: Radiofrequency ablation (RFA), first phalanx of hand
 1.UI.59.HA-X7 using percutaneous (needle) approach with chemical agents (e.g. Ethibloc, zein)

1.UI.71.^.^ Division, first phalanx of hand**S** 4 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Dewebbing, 1st (and 2nd) phalanx of hand
Release, syndactyly 1st (and 2nd) phalanx of hand

1.UI.71.^.^ Division, 1st phalanx of hand	division involving bone or joint [complex syndactyly]	division involving skin and soft tissue only [simple syndactyly]
using combination of local flap and skin autograft	1.UI.71.WK-XX-Q	1.UI.71.LA-XX-Q
using local flap [e.g. volar, dorsal]	1.UI.71.WK-XX-E	1.UI.71.LA-XX-E

1.UI.73.^.^ Reduction, first phalanx of hand**S** 4 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Debridement with reduction, 1st phalanx of hand
Excludes: that involving 1st interphalangeal joint (see [1.UM.73.^.^](#))
that with fixation of 1st IP joint surface (see [1.UM.74.^.^](#))
that with fixation, 1st phalanx of hand (see [1.UI.74.^.^](#))

1.UI.73.JA	using closed (external) approach
1.UI.73.LA	using open approach

1.UI.74.^ ^ Fixation, first phalanx of hand**S** ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Reduction with fixation, 1st phalanx of hand**Excludes:** Application of percutaneous external fixator (see [1.UI.03.^ ^](#))
that with fixation of 1st interphalangeal joint surface (see [1.UM.74.^ ^](#))

1.UI.74.^ ^ Fixation, 1st phalanx of hand	fixation device alone	with bone autograft	with synthetic tissue [bone cement, paste]	with combined sources of tissue [e.g. bone graft, cement/paste]
open approach				
using intramedullary nail	1.UI.74.LA-LQ	1.UI.74.LA-LQ-A	1.UI.74.LA-LQ-N	1.UI.74.LA-LQ-Q
using pin, nail	1.UI.74.LA-NV	1.UI.74.LA-NV-A	1.UI.74.LA-NV-N	1.UI.74.LA-NV-Q
using plate, screw	1.UI.74.LA-NW	1.UI.74.LA-NW-A	1.UI.74.LA-NW-N	1.UI.74.LA-NW-Q
using wire, staple, tension band	1.UI.74.LA-KD	1.UI.74.LA-KD-A	1.UI.74.LA-KD-N	1.UI.74.LA-KD-Q
percutaneous approach [e.g. with closed or no reduction]				
using intramedullary nail	1.UI.74.HA-LQ	—	—	—
using pin, nail	1.UI.74.HA-NV	—	—	—
using plate, screw	1.UI.74.HA-NW	—	—	—
using wire, staple, tension band	1.UI.74.HA-KD	—	—	—

1.UI.80.^ Repair, first phalanx of hand**S** ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes:

- Lengthening [osteotomy], 1st phalanx of hand
- Osteoclasis, 1st phalanx of hand
- Osteotomy, 1st phalanx of hand
- Osteotomy, lengthening, 1st phalanx of hand
- Osteotomy, shortening, 1st phalanx of hand
- Pollicization
- Rotation finger flap, to 1st phalanx of hand
- Shortening [osteotomy], 1st phalanx of hand
- Toe to finger transfer, to 1st phalanx of hand
- Transposition flap, to 1st phalanx of hand

Excludes:

- Amputation, 1st phalanx with finger transposition flap (see [1.UI.93.^](#))
- Amputation, 1st phalanx with toe-to-finger free flap reconstruction (see [1.UI.93.^](#))
- Osteotomy, 1st phalanx of hand with interphalangeal fusion (see [1.UM.75.^](#))
- Osteotomy, 1st phalanx with capsular release, interphalangeal joint (see [1.UM.80.^](#))
- Osteotomy, 1st phalanx with interphalangeal arthroectomy (see [1.UM.80.^](#))
- Osteotomy, 1st phalanx with interphalangeal arthroplasty (see [1.UM.80.^](#))

Code Also:

- Any concomitant pollicis tendon release (see [1.UU.72.^](#))
- Any concomitant pollicis tendon repair or transfer (see [1.UU.80.^](#))
- Any concomitant repair of other phalanx (see [1.UJ.80.^](#))

1.UI.80.^ Repair, 1st phalanx of hand	no tissue used (for repair)	using autograft [e.g. bone peg]	using bone homograft	using free flap [e.g. toe to finger flap]	using pedicled transposition flap [finger rotation flap, pollicization]
no device used	1.UI.80.LA	1.UI.80.LA-XX-A	1.UI.80.LA-XX-K	1.UI.80.LA-XX-F Note: • When an absent 1st phalanx (thumb) is repaired (replaced) with a toe to finger free flap, or pedicled transposition flap of one finger (e.g. index) to the site of the absent phalanx, the microsurgical technique involved to re-establish vascular, physical, and neural function is included in the code. The 'code also'note for tendon release or tendon transfer/ repair does not apply to this code.	1.UI.80.LA-XX-G Note: • When an absent 1st phalanx (thumb) is repaired (replaced) with a toe to finger free flap, or pedicled transposition flap of one finger (e.g. index) to the site of the absent phalanx, the microsurgical technique involved to re-establish vascular, physical, and neural function is included in the code. The 'code also'note for tendon release or tendon transfer/ repair does not apply to this code.
using wire, staple	1.UI.80.LA-KD	1.UI.80.LA-KD-A	1.UI.80.LA-KD-K	1.UI.80.LA-KD-F Note: • When an absent 1st phalanx (thumb) is repaired (replaced) with a toe to finger free flap, or pedicled transposition flap of one finger (e.g. index) to the site of the absent phalanx, the microsurgical technique involved to re-establish vascular, physical, and neural function is included in the code. The 'code also'note for tendon release or tendon transfer/ repair does not apply to this code.	1.UI.80.LA-KD-G Note: • When an absent 1st phalanx (thumb) is repaired (replaced) with a toe to finger free flap, or pedicled transposition flap of one finger (e.g. index) to the site of the absent phalanx, the microsurgical technique involved to re-establish vascular, physical, and neural function is included in the code. The 'code also'note for tendon release or tendon transfer/ repair does not apply to this code.
using plate, screw	1.UI.80.LA-NW	1.UI.80.LA-NW-A	1.UI.80.LA-NW-K	1.UI.80.LA-NW-F Note: • When an absent 1st phalanx (thumb) is repaired (replaced) with a toe to finger free flap, or pedicled transposition flap of one finger (e.g. index) to the site of the absent phalanx, the microsurgical technique involved to re-establish vascular, physical, and neural function is included in the code. The 'code also'note for tendon release or tendon transfer/ repair does not apply to this code.	1.UI.80.LA-NW-G Note: • When an absent 1st phalanx (thumb) is repaired (replaced) with a toe to finger free flap, or pedicled transposition flap of one finger (e.g. index) to the site of the absent phalanx, the microsurgical technique involved to re-establish vascular, physical, and neural function is included in the code. The 'code also'note for tendon release or tendon transfer/ repair does not apply to this code.

1.UI.82.^ ^ Reattachment, first phalanx of hand**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Reattachment, thumb**Excludes:** Amputation of thumb with finger flap or cross-hand flap (see [1.UI.93.^ ^](#))
Reattachment thumb at metacarpal level (see [1.UE.82.^ ^](#))**Note:** Involves microsurgical technique to reestablish vascular and neural function.

1.UI.82.LA using simple apposition technique [e.g. suture]
 1.UI.82.LA-KD using wire/staple fixation with apposition technique

1.UI.87.^ ^ Excision partial, first phalanx of hand**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
