L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Debridement, 1st phalanx of hand
Excision, 1st phalanx of hand, supernumerary
Excision, osteophyte, 1st phalanx of hand
Ligation, 1st phalanx of hand, supernumerary**Excludes:** Amputation, 1st phalanx of hand at any level (see [1.UI.93.^ ^](#))
Debridement with reduction, 1st phalanx of hand (see [1.UI.73.^ ^](#))

1.UI.87.LA using open approach
 1.UI.87.LA-XX-A using open approach and autograft
 1.UI.87.LA-XX-Q using open approach and combined sources of tissue

1.UI.93.^.^ Amputation, first phalanx of hand**S** 5 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Amputation with rotational flap, to 1st phalanx of hand
 Amputation with transpositional flap, to 1st phalanx of hand
 Amputation, 1st phalanx with pollicization (finger or toe to thumb flap)

Code Also: Any procurement of free flap, 1st phalanx of foot (great toe) (see [1.WK.58.^.](#))
 Any procurement of free flap, other phalanx of hand (see [1.UJ.58.^.](#))
 Any procurement of free flap, phalanx of foot (see [1.WL.58.^.](#))

Note: When an amputated 1st phalanx (thumb) is replaced with a (great) toe to finger free flap, or transposition flap of one finger (e.g. index) to the site of the amputated 1st phalanx, the microsurgical technique involved to re-establish vascular, physical, and neural function is included in the code.

1.UI.93.LA	using simple apposition technique [e.g. suturing] (for closure of stump)
1.UI.93.LA-XX-A	using autograft [e.g. full-thickness skin graft or bone graft] (for closure of stump)
1.UI.93.LA-XX-B	using split-thickness skin graft (for closure of stump)
1.UI.93.LA-XX-E	using local flap [e.g. V-Y plasty]
1.UI.93.LA-XX-F	using free flap [e.g. toe-to-finger flap]
1.UI.93.LA-XX-G	using pedicled transposition flap [e.g. finger rotation flap]

1.UJ.^.^ Therapeutic Interventions on Other Phalanx of Hand

Includes: Bones of fingers NOS
 Phalanx of hand
 Tuft of distal phalanx

Excludes: Therapeutic interventions on the 1st phalanx of hand (see [1.UI.^.^](#))

1.UJ.03.^ ^ Immobilization, other phalanx of hand**S** ¹² **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 12	Optional	Tx Status 7	Status	R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Application, external immobilization device, phalanx of hand
 Immobilization, finger NOS
 Removal with replacement, external immobilization device, phalanx of hand

Code Also: Any concomitant immobilization of 1st phalanx of hand (see [1.UI.03.^ ^](#))

1.UJ.03.HA-KC using percutaneous external fixator
 1.UJ.03.JA-FG using binding device [e.g. restrictive dressing, tape]
 1.UJ.03.JA-FQ using cast
 1.UJ.03.JA-SR using splinting device

1.UJ.38.^ ^ Management of external appliance, other phalanx of hand**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Adjustment, external device or appliance, phalanx of hand
 Removal, external device or appliance, phalanx of hand

Excludes: Removal with replacement, external immobilization device, phalanx of hand (see [1.UJ.03.^ ^](#))

Code Also: Any concomitant management of appliance, 1st phalanx of hand (see [1.UI.38.^ ^](#))

1.UJ.38.HA-KC of percutaneous external fixator
 1.UJ.38.JA-FQ of cast
 1.UJ.38.JA-SR of splinting device

1.UJ.55.^ ^ Removal of device, other phalanx of hand**S** 4 **L** 2 **E** 64

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

E 64	Optional	Bones/Joints	Extent	1	1 bone/joint
				2	2 bones/joints
				3	3 bones/joints
				4	4 bones/joints
				5	5 bones/joints
				6	6 bones/joints
				7	7 bones/joints
				8	8 bones/joints (or more)

Includes: Procurement, phalanx [for cross hand finger flap]**Note:** May involve procurement of phalanx from traumatically amputated limb for cross-hand salvage.**Omit code:** Procurement, phalanx for same-hand transposition flap

1.UJ.58.LA-XX-F of free flap using open approach

1.UJ.59.^ ^ Destruction, other phalanx of hand**S** 4 **L** 2 **E** 64

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 64	Optional	Bones/Joints	Extent	1	1 bone/joint
				2	2 bones/joints
				3	3 bones/joints
				4	4 bones/joints
				5	5 bones/joints
				6	6 bones/joints
				7	7 bones/joints
				8	8 bones/joints (or more)

Includes: Sclerotherapy, phalanx of hand, intralesional [e.g. aneurysmal bone cyst]

Excludes: Osteoclasts, phalanx of hand (see [1.UJ.80.^^](#))

1.UJ.59.HA-AW using percutaneous (needle) approach with radiofrequency probe

Includes: Radiofrequency ablation (RFA), other phalanx of hand

1.UJ.59.HA-X7 using percutaneous (needle) approach with chemical agents [e.g. Ethibloc, zein]

1.UJ.71.^ ^ Division, other phalanx of hand**S** 9 **L** 2 **E** 64

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 9	Optional	Tx Status 4	Status	A	Abandoned after onset
				S	Staged
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)
E 64	Optional	Bones/Joints	Extent	1	1 bone/joint
				2	2 bones/joints
				3	3 bones/joints
				4	4 bones/joints
				5	5 bones/joints
				6	6 bones/joints
				7	7 bones/joints
				8	8 bones/joints (or more)

Includes:

- Dewebbing, phalanx of hand
- Release of surgically created syndactyl of hand (cross finger flap)
- Release, syndactyly, phalanx of hand

1.UJ.71.^ ^ Division, other phalanx of hand	division involving bone or joint [complex syndactyly]	division involving skin and soft tissue only [simple syndactyly]
using combination of local flap and skin autograft	1.UJ.71.WK-XX-Q	1.UJ.71.LA-XX-Q
using local flap [e.g. volar, dorsal]	1.UJ.71.WK-XX-E	1.UJ.71.LA-XX-E

1.UJ.73.^ ^ Reduction, other phalanx of hand**S** 4 **L** 2 **E** 64

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left

				2	2 bones/joints
				3	3 bones/joints
				4	4 bones/joints
				5	5 bones/joints
				6	6 bones/joints
				7	7 bones/joints
				8	8 bones/joints (or more)

Includes:

- Lengthening [osteotomy], phalanx of hand
- Osteoclasia, phalanx of hand
- Osteotomy, lengthening, phalanx of hand
- Osteotomy, phalanx of hand
- Osteotomy, shortening, phalanx of hand
- Rotation finger flap, phalanx of hand
- Shortening [osteotomy], phalanx of hand
- Toe to finger transfer, phalanx of hand
- Transposition flap, phalanx of hand

Excludes:

- Amputation with finger transposition flap (see [1.UJ.93.^ ^](#))
- Amputation with toe- to- finger free flap reconstruction (see [1.UJ.93.^ ^](#))
- Osteotomy, phalanx of hand with capsular release, interphalangeal joint (see [1.UK.80.^ ^](#))
- Osteotomy, phalanx of hand with interphalangeal arthrectomy (see [1.UK.80.^ ^](#))
- Osteotomy, phalanx of hand with interphalangeal arthroplasty (see [1.UK.80.^ ^](#))
- Osteotomy, phalanx of hand with interphalangeal fusion (see [1.UK.75.^ ^](#))
- Pollicization, 1st phalanx of hand (see [1.UI.80.^ ^](#))

Code Also:

- Any concomitant repair, 1st phalanx of hand (see [1.UI.80.^ ^](#))
- Any concomitant tendon release (see [1.UT.72.^ ^](#))
- Any concomitant tendon transfer or repair (see [1.UT.80.^ ^](#))

1.UJ.80.^ Repair, other phalanx of hand	no tissue used in repair	using autograft [e.g. bone peg]	using bone homograft	using free flap [e.g. toe to finger flap]	using pedicled transposition flap [finger rotation flap]
no device used	1.UJ.80.LA	1.UJ.80.LA-XX-A	1.UJ.80.LA-XX-K	1.UJ.80.LA-XX-F Note: • When an absent phalanx is repaired (replaced) with a toe to finger free flap or pedicled transposition flap of one finger to the site of the absent phalanx, the microsurgical technique involved to re-establish vascular, physical, and neural function is included in the code. The 'code also'note for tendon release or tendon transfer/repair does not apply to this code.	1.UJ.80.LA-XX-G Note: • When an absent phalanx is repaired (replaced) with a toe to finger free flap or pedicled transposition flap of one finger to the site of the absent phalanx, the microsurgical technique involved to re-establish vascular, physical, and neural function is included in the code. The 'code also'note for tendon release or tendon transfer/repair does not apply to this code.
using wire, staple	1.UJ.80.LA-KD	1.UJ.80.LA-KD-A	1.UJ.80.LA-KD-K	1.UJ.80.LA-KD-F Note: • When an absent phalanx is repaired (replaced) with a toe to finger free flap or pedicled transposition flap of one finger to the site of the absent phalanx, the microsurgical technique involved to re-establish vascular, physical, and neural function is included in the code. The 'code also'note for tendon release or tendon transfer/repair does not apply to this code.	1.UJ.80.LA-KD-G Note: • When an absent phalanx is repaired (replaced) with a toe to finger free flap or pedicled transposition flap of one finger to the site of the absent phalanx, the microsurgical technique involved to re-establish vascular, physical, and neural function is included in the code. The 'code also'note for tendon release or tendon transfer/repair does not apply to this code.

1.UJ.82.^ Reattachment, other phalanx of hand

S 4 L 2 E 64

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right

1.UK.53.LA-QH	of dual-component prosthetic device with (additional) wire fixation (for stabilization) using open approach

1.UK.55.^ ^ Removal of device, other interphalangeal joints of hand**S** 4 **L** 2 **E** 64

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)
E 64	Optional	Bones/Joints	Extent	1	1 bone/joint
				2	2 bones/joints
				3	3 bones/joints
				4	4 bones/joints
				5	5 bones/joints
				6	6 bones/joints
				7	7 bones/joints
				8	8 bones/joints (or more)

Excludes: Removal of external appliance [e.g. percutaneous external fixator] (see [1.UL.38.^ ^](#))

Code Also: Any concomitant removal of device, 1st IP joint of hand (see [1.UM.55.^ ^](#))

1.UK.55.^ ^ Removal of device, other interphalangeal joints of hand	open approach	percutaneous approach
of wire/staple/tension band	1.UK.55.LA-KD	1.UK.55.HA-KD
of pin/nail	1.UK.55.LA-NV	—
of screw	1.UK.55.LA-NW	—
of uncemented single-component prosthetic device	1.UK.55.LA-PM	—
of cemented single-component prosthetic device	1.UK.55.LA-PM-N	—
of uncemented dual-component prosthetic device	1.UK.55.LA-PN	—
of cemented dual-component prosthetic device	1.UK.55.LA-PN-N	—
of dual-component prosthetic device with (additional) wire fixation (for stabilization)	1.UK.55.LA-QH	—
of single-component prosthetic device with (additional) wire fixation (for stabilization)	1.UK.55.LA-QD	—

1.UK.72.^ ^ Release, other interphalangeal joints of hand**S** 4 **L** 2 **E** 64

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)
E 64	Optional	Bones/Joints	Extent	1	1 bone/joint
				2	2 bones/joints
				3	3 bones/joints
				4	4 bones/joints
				5	5 bones/joints
				6	6 bones/joints
				7	7 bones/joints
				8	8 bones/joints (or more)

Includes: Arthrolysis, interphalangeal joint of hand
 Capsulotomy, interphalangeal joint of hand
 Lysis [adhesions], interphalangeal joint of hand

Excludes: Exercise therapy alone, interphalangeal joints of hand (see [1.UL.02.^ ^](#))
 Manual rupture of IP joint adhesions, finger (see [1.UL.05.^ ^](#))
 Reduction (dislocation of), interphalangeal joint of hand (see [1.UK.73.^ ^](#))
 Release concomitant with other joint repair (such as arthrectomy, synovectomy, phalangeal osteotomy, capsulorrhaphy) (see [1.UK.80.^ ^](#))

Code Also: Any concomitant release of 1st IP joint of hand (see [1.UM.72.^ ^](#))

1.UK.72.LA using open (incisional) approach

1.UK.73.^ Reduction, other interphalangeal joints of hand**S** 4 **L** 2 **E** 64

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)
E 64	Optional	Bones/Joints	Extent	1	1 bone/joint
				2	2 bones/joints
				3	3 bones/joints
				4	4 bones/joints
				5	5 bones/joints
				6	6 bones/joints
				7	7 bones/joints
				8	8 bones/joints (or more)

Includes: Debridement with reduction, interphalangeal joint of hand

Excludes: that with fixation, interphalangeal joint surface of hand (see [1.UK.74.^](#))

Code Also: Any concomitant reduction of 1st IP joint of hand (see [1.UM.73.^](#))

1.UK.73.JA using closed (external) approach

1.UK.73.LA using open approach

1.UK.74.^ ^ Fixation, other interphalangeal joints of hand**S** 5 **L** 2 **E** 64

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)
E 64	Optional	Bones/Joints	Extent	1	1 bone/joint
				2	2 bones/joints
				3	3 bones/joints
				4	4 bones/joints
				5	5 bones/joints
				6	6 bones/joints
				7	7 bones/joints
				8	8 bones/joints (or more)

Includes: Reduction with fixation, interphalangeal joint of hand**Code Also:** Any concomitant fixation, 1st IP joint of hand (see [1.UM.74.^ ^](#))

1.UK.74.HA-KD	using percutaneous (closed) approach and wire
1.UK.74.HA-NV	using percutaneous (closed) approach and pin or nail
1.UK.74.HA-NW	using percutaneous (closed) approach and plate/screw
1.UK.74.LA-KD	using open approach and wire
1.UK.74.LA-NV	using open approach and pin or nail
1.UK.74.LA-NW	using open approach and screw

1.UK.75.^ ^ Fusion, other interphalangeal joints of hand**S** 5 **L** 2 **E** 64

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left

				S	Unilateral (unspecified if right or left)
E 64	Optional	Bones/Joints	Extent	1	1 bone/joint
				2	2 bones/joints
				3	3 bones/joints
				4	4 bones/joints
				5	5 bones/joints
				6	6 bones/joints
				7	7 bones/joints
				8	8 bones/joints (or more)

Includes: Arthrodesis, interphalangeal joint of hand
 Arthrodesis, interphalangeal with osteotomy, phalanx of hand

Code Also: Any concomitant fusion, 1st IP joint of hand (see [1.UM.75.^ ^](#))

1.UK.75.^ ^ Fusion, other interphalangeal joints of hand	no tissue used	with bone autograft
open approach		
using screw	1.UK.75.LA-NW	1.UK.75.LA-NW-A
using wire, tension band	1.UK.75.LA-KD	1.UK.75.LA-KD-A
using pin, nail	1.UK.75.LA-NV	1.UK.75.LA-NV-A
percutaneous approach		
using screw	1.UK.75.HA-NW	—
using wire, tension band	1.UK.75.HA-KD	—
using pin, nail	1.UK.75.HA-NV	—

1.UK.80.^ ^ Repair, other interphalangeal joints of hand**S** 5 **L** 2 **E** 64

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)
E 64	Optional	Bones/Joints	Extent	1	1 bone/joint
				2	2 bones/joints
				3	3 bones/joints
				4	4 bones/joints
				5	5 bones/joints
				6	6 bones/joints
				7	7 bones/joints
				8	8 bones/joints (or more)

- Includes:**
- Arthrectomy, interphalangeal joint of hand, with phalangeal osteotomy
 - Arthroplasty, interphalangeal joint of hand
 - Arthroplasty, interphalangeal joint of hand, with interpositional graft
 - Arthroplasty, interphalangeal joint of hand, with phalangeal osteotomy
 - Arthroplasty, resection, interphalangeal joint of hand
 - Capsular release, interphalangeal joint of hand, with phalangeal osteotomy
 - Capsulodesis, interphalangeal joint of hand
 - Capsuloplasty, interphalangeal joint of hand (with or without ligament graft)
 - Capsulorrhaphy, interphalangeal joint of hand
 - Repair, ligament, interphalangeal joint of hand
 - Suture of joint capsule, interphalangeal joint of hand
- Excludes:**
- Arthroplasty with prosthetic replacement, interphalangeal (see [1.UK.53.^ ^](#))
- Code Also:**
- Any concomitant repair of 1st IP joint of hand (see [1.UM.80.^ ^](#))
 - Any concomitant tendon release (see [1.UT.72.^ ^](#))
 - Any concomitant tendon transfer or repair with or without release (see [1.UT.80.^ ^](#))

1.UK.80.^.^ Repair, other interphalangeal joints of hand	no tissue used (for repair)	with autograft [e.g. bone, interpositional tendon, fascia]	with bone homograft	with combined sources of tissue [e.g. bone graft, synthetic tissue]	with synthetic tissue [e.g. silastic sheath]
joint repair alone					
no device used (for repair)	1.UK.80.LA	1.UK.80.LA-XX-A	1.UK.80.LA-XX-K	1.UK.80.LA-XX-Q	1.UK.80.LA-XX-N

L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Application, heat, hand NOS
 Application, heat, joints of fingers
 Diathermy, joints of fingers and hand
 Hyperthermy, hand NOS
 Reversal, hypothermia, hand

Excludes: Hyperthermy, multiple body sites (see [1.ZX.07.^ ^](#))
 Hyperthermy, wrist joint (see [1.UB.07.^ ^](#))

1.UL.07.JA-CG using microwave
 1.UL.07.JA-DU using infrared device [e.g. lamp, baker]
 1.UL.07.JA-DZ using short wave
 1.UL.07.JA-HB using other diathermy device NEC
 1.UL.07.JA-KH using externally applied dry heat [e.g. heating pad]
 1.UL.07.JA-KJ using externally applied moist heat [e.g. compress, soak]
 1.UL.07.JA-KQ using paraffin
 1.UL.07.JA-TR using whirlpool

1.UL.12.^ ^ Therapy, joints of fingers and hand NEC**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Phototherapy, joints of fingers and hand
 Physiotherapy NOS, joints of finger and hand
 Therapy, laser, joints of fingers and hands (for pain reduction and promotion of healing)

Excludes: Exercise therapy of joints of fingers and hand (see [1.UL.02.^](#))
 Hydrotherapy (see [1.UL.02.^](#))
 Hyperthermy, joints of fingers and hand (see [1.UL.07.^](#))
 Hypothermy soft tissue of fingers and hand (see [1.UY.06.^](#))
 Therapy (photo, laser, massage) of soft tissue of wrist and hand (see [1.UY.12.^](#))
 Therapy (photo, laser, massage) of wrist alone (see [1.UB.12.^](#))

1.UL.12.JA-AG using laser NEC (with or without photosensitizing chemicals)
 1.UL.12.JA-DQ using ultraviolet light
 1.UL.12.JA-DU using light NEC [e.g. long wave red light]
 1.UL.12.JJ using massage technique

1.UL.35.^ Pharmacotherapy (local), joints of fingers and hand NEC

L²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right

Includes:

Suture, tendon of the wrist and hand
 Tendinoplasty with tendon graft, tendons of the wrist and hand
 Tendinoplasty with tenodesis, tendons of the wrist and hand
 Tendinoplasty, tendons of the wrist and hand
 Tendinorrhaphy, tendons of the wrist and hand
 Tenodesis, tendons of the wrist and hand
 Transfer, flexor carpi ulnaris to extensor carpi radialis brevis
 Transfer, tendons of the wrist and hand (to improve function of wrist)

Excludes:

Transfer, tendon of wrist and hand to flexor finger tendons to improve "pinch, grasp" function (see [1.UT.80.^ ^](#))
 Transfer, tendon of wrist and hand to improve thumb function (see [1.UU.80.^ ^](#))
 Transfer, tendon of wrist and hand to restore intrinsic function (see [1.US.80.^ ^](#))

1.UV.80.^ ^ Repair, tendons of wrist and hand	using apposition technique [e.g. tendon sutured to tendon]	using tenodesis technique [tendon looped or sutured [anchored] to or through bone]	using tenodesis with screw fixation [tendon with a bone plug fixed to bone with screw]
simple repair (without graft or transfer involved)	1.UV.80.LA	1.UV.80.WU	1.UV.80.WU-NW
with autograft [e.g. tendon, fascia]	1.UV.80.LA-XX-A	1.UV.80.WU-XX-A	1.UV.80.WU-NW-A
with combined sources of tissue [e.g. autograft, tendon transfer, gortex]	1.UV.80.LA-XX-Q	1.UV.80.WU-XX-Q	1.UV.80.WU-NW-Q
with synthetic tissue [e.g. gortex, mesh]	1.UV.80.LA-XX-N	1.UV.80.WU-XX-N	1.UV.80.WU-NW-N
with tendon transfer for realignment [e.g. advancement, transposition]	1.UV.80.LA-XX-E	1.UV.80.WU-XX-E	1.UV.80.WU-NW-E

1.UY.^^.^^ Therapeutic Interventions on Soft Tissue of Wrist and Hand

- Includes:**
- Abductor pollicis longus and brevis
 - Adductor pollicis
 - Deep palmar space
 - Dorsal extensor [fascial] compartments
 - Extensor digitorum communis, extensor indicis proprius, extensor pollicis longus and brevis
 - Extensor wad of three [extensor carpi radialis longus and brevis, brachioradialis]
 - Extrinsic muscles of hand and wrist:
 - Fascia of hand NOS
 - Flexor pollicis longus
 - Flexor wad of five [flexor carpi ulnaris and radialis, palmaris longus, flexor digitorum superficialis and profundus, pronator teres and quadratus, supinator]
 - Hypothenar [opponens digiti minimi, flexor digiti quinti brevis, abductor digiti quinti or minimi]
 - Intrinsic muscles of hand:
 - Lumbricales, dorsal interossei, volar interossei
 - Muscles of hand, thumb and fingers NOS
 - Neoplasm of soft tissue [arising in or extending into muscle] of hand or wrist
 - Palmar fascia
 - Retinacula [digital, flexor and extensor]
 - Thenar [opponens pollicis, abductor pollicis brevis, flexor pollicis brevis]
 - Thenar space
 - Wounds of soft tissue of wrist and hand
- Excludes:**
- Muscle-tendon unit when mutually involved (see [1.UT.^^.^^](#))
 - Skin and subcutaneous tissue of wrist and hand (see [1.YU.^^.^^](#))

1.UY.04.^^ Mobilization, soft tissue of the wrist and hand**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:**
- Myofascial release, wrist and hand
- Excludes:**
- Fasciotomy or fasciectomy for release of muscles of wrist and hand (see [1.UY.72.^^](#)) that concomitant with manipulation/adjustment of joints of fingers and hand (see [1.UL.05.^^](#)) that concomitant with mobilization of joints of fingers and hand (see [1.UL.04.^^](#))
- Note:**
- Involves moving, stretching or elongating soft tissue of the wrist and hand.

1.UY.04.JH using external approach with manual technique

1.UY.06.^ ^ Hypothermy, soft tissue of the wrist and hand**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Application of cold, soft tissue of wrist and hand
Cryotherapy, soft tissue of wrist and hand
that to reduce swelling, pain, etc.

1.UY.06.JA-KL using external cold (dry) device [e.g. cold pack]
1.UY.06.JA-KM using external cold (moist) device [e.g. compress, soak]

1.UY.07.^ ^ Hyperthermy, soft tissue of the wrist and hand**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Application of heat, soft tissue of wrist and hand
Diathermy, soft tissue of wrist and hand
that for treatment of hypothermia

Excludes: Hyperthermy of joints of wrist and hand alone (see [1.UL.07.^ ^](#))
Hyperthermy, multiple body sites (see [1.ZX.07.^ ^](#))

1.UY.07.JA-DU using infrared device [e.g. lamp, baker]
1.UY.07.JA-HB using diathermy device [e.g. microwave, short-wave]
1.UY.07.JA-KH using external dry heat device [e.g. heated bandaging]
1.UY.07.JA-KJ using external moist heat device [e.g. compress, soak]
1.UY.07.JA-KQ using paraffin
1.UY.07.JA-TR using whirlpool

1.UY.12.^ ^ Therapy, soft tissue of the wrist and hand**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Phototherapy, soft tissue of wrist and hand
 Physiotherapy NOS, soft tissue of wrist and hand

Excludes: Exercise therapy of joints of fingers and hand (see [1.UL.02.^ ^](#))
 Hyperthermy treatment alone (see [1.UY.07.^ ^](#))
 Hypothermy treatment alone (see [1.UY.06.^ ^](#))
 Therapy (laser, photo, massage) specifically for joints of hand (see [1.UL.12.^ ^](#) or wrist [1.UB.12.^ ^](#))

1.UY.12.JA using other technique NEC
 1.UY.12.JA-AG using laser NEC (with or without photosensitizing chemicals)
 1.UY.12.JA-DQ using ultraviolet light
 1.UY.12.JA-DU using light NEC [e.g. long wave red light]
 1.UY.12.JD using acupressure technique
Includes: Reflexology, hand
 1.UY.12.JJ using massage technique

1.UY.13.^ ^ Control of bleeding, soft tissue of the wrist and hand**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Control of bleeding (wound) extending into soft tissue (muscle or tendon) of wrist and hand

Excludes: Application of pressure dressing for control of bleeding soft tissue of hand (see [1.YT.13.^^](#))
 Control of bleeding (wound) of skin of hand only (see [1.YT.13.^^](#))
 Control of bleeding by suture repair of (any) pollicis tendon (thumb) (see [1.UU.80.^^](#))
 Control of bleeding by suture repair of extensor tendon of finger (see [1.US.80.^^](#))
 Control of bleeding by suture repair of flexor tendon of finger (see [1.UT.80.^^](#))
 Control of bleeding by suture repair of muscle of wrist and hand (see [1.UY.80.^^](#))
 Control of bleeding by suture repair of tendon of wrist and hand (see [1.UV.80.^^](#))
 Repair of artery (bleeder) of wrist and hand (see [1.JM.80.^^](#))
 Repair of vein of wrist and hand to control bleeding (see [1.JU.80.^^](#))
 Systemic pharmacotherapy for control of bleeding (see [1.ZZ.35.^^](#))

1.UY.13.HA-C2 using percutaneous injection of antihemorrhagic agent
Includes: aminocaproic acid, aprotinin, phytonadione, thrombin, coagulation factor VIII
 1.UY.13.JA-C2 using topical antihemorrhagic agent
 1.UY.13.JN using external manual compression

1.UY.35.^^ Pharmacotherapy (local), soft tissue of the wrist and hand

L²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Injection of agent, carpal tunnel (region)
 Injection of agent, soft tissue of wrist and hand
 Instillation, wound of wrist and hand
 Irrigation, soft tissue (wound) of wrist and hand
 Trigger point injection, soft tissue of the wrist and hand

Excludes: Irrigation of skin (wound), hand (see [1.YT.35.^^](#))
 Irrigation with concomitant drainage (see [1.UY.52.^^](#))
 Systemic pharmacotherapy (see [1.ZZ.35.^^](#))
 that for control of bleeding (see [1.UY.13.^^](#))
 that for removal of foreign body (see [1.UY.56.^^](#))

1.UY.35.^ ^ Pharmacotherapy (local), soft tissue of the wrist and hand	direct instillation [into wound]	percutaneous approach
using antiinfective irrigating solution	1.UY.35.JA-D1 Includes: • chlorexidine, neomycin	—
using salt irrigating solution	1.UY.35.JA-D2 Includes: • sodium chloride	—
using other irrigating solution	1.UY.35.JA-D3 Includes: • sorbitol, mannitol	—
using analgesic agent	1.UY.35.JA-P2 Includes: • opioids (morphine, meperidine), acetylsalicylic acid, acetaminophen, ergotamine, sumatriptan	1.UY.35.HA-P2 Includes: • opioids (morphine, meperidine), acetylsalicylic acid, acetaminophen, ergotamine, sumatriptan
using antiinfective	—	1.UY.35.HA-K0
using pharmacological agent NEC	1.UY.35.JA-T9	1.UY.35.HA-T9
using bacterial toxin (e.g. botulinum toxin or Botox)	—	1.UY.35.HA-L7
using local anesthetic agent	1.UY.35.JA-P1	1.UY.35.HA-P1
using corticosteroid agent	—	1.UY.35.HA-J2

1.UY.52.^ ^ Drainage, soft tissue of the wrist and hand**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Drainage [abscess, hematoma], soft tissue of wrist and hand
 Drainage, tendon (or muscle) of wrist and hand

1.UY.52.HA	using percutaneous (needle) approach
1.UY.52.HA-TS	using percutaneous approach with drainage tube left in situ
1.UY.52.LA	using open (incisional) approach

1.UY.55.^ ^ Removal of device, soft tissue of the wrist and hand**S** 4 **L** 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Removal of device, wound of wrist and hand

1.UY.55.JA-FF of closure device (e.g. suture)
 1.UY.55.JA-GX of device NEC
 1.UY.55.JA-TS of wound drain or drainage catheter

1.UY.56.^ ^ Removal of foreign body, soft tissue of the wrist and hand**S** 4 **L** 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Extraction of [superficial, embedded] foreign body, muscle of wrist and hand

Excludes: Removal of foreign body, skin of hand (see [1.YU.56.^ ^](#))

Note: May involve the use of pulsatile jet lavage or irrigation to facilitate complete removal of foreign body debris.

1.UY.56.JA using external (for simple extraction) approach
 1.UY.56.LA using open (incisional) approach

1.UY.57.^ ^ Extraction, soft tissue of the wrist and hand**S** 4 **L** 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Extraction, rice bodies, tendon sheath of wrist and hand

1.UY.57.LA using open approach

1.UY.59.^ ^ Destruction, soft tissue of the wrist and hand**S** 5 **L** 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Ablation, soft tissue [neoplasm] of wrist and hand
 Debridement, amputation stump, wrist and hand
 Debridement, extending into soft tissue (fascia, muscle or tendon) of hand and arm
 Myoclasia, wrist and hand
 Trimming, amputation stump, of wrist and hand

Excludes: Ablation, skin or subcutaneous tissue of hand (see [1.YU.59.^ ^](#))
 Partial chemodenervation of muscles of hand (e.g. for hyperhydrosis) using botulinum (see [1.UY.35.^ ^](#))
 Reamputation, hand (see [1.UG.93.^ ^](#))
 Reamputation, phalanx of hand (see [1.UJ.93.^ ^](#))

1.UY.59.LA-AG using laser
 1.UY.59.LA-GX using device NEC
 1.UY.59.LA-X7 using chemical cautery agent

1.UY.72.^ ^ Release, soft tissue of the wrist and hand**S** 4 **L** 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Fasciectomy, muscles of wrist and hand
 Fasciotomy, muscles of wrist and hand
 Release, contracture, muscles of wrist and hand [e.g. intrinsic contracture]
 Release, Dupuytren contracture, hand
 Retinaculotomy, phalangeal

Excludes: Dewebbing [syndactyly] of hand (see [1.UJ.71.^ ^](#))

1.UY.72.HA using percutaneous needle approach [e.g. needle aponeurotomy]
 1.UY.72.HA-T9 using percutaneous needle approach and pharmacological agent NEC
Includes: injection of collagenase for enzymatic fasciotomy
 1.UY.72.WJ using excisional technique [e.g. fasciectomy]
 1.UY.72.WJ-XX-E using excisional technique [e.g. fasciectomy] and local flap (Z-plasty)
 1.UY.72.WK using incisional technique [e.g. fasciotomy, myotomy]

1.UY.80.^ ^ Repair, soft tissue of the wrist and hand**S** 28 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 28	Optional	Treatment Status 3A	Status	D	Delayed (closure occurs > 24 hrs post trauma)
				R	Revision
				S	Staged
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Fascioplasty, soft tissue of the wrist and hand
 Fasciorrhaphy, soft tissue of the wrist and hand
 Myoplasty, soft tissue of wrist and hand
 Myorrhaphy, soft tissue of wrist and hand
 Repair, palmar aponeurosis
 Repair, retinaculum of wrist
 Suture, fascia of wrist and hand,
 Transposition, muscle of wrist and hand

Excludes: that involving tendon repair or tenodesis (see [1.UV.80.^^](#))

1.UY.80.LA	using open approach and simple apposition [e.g. suture, staple]
1.UY.80.LA-XX-A	using open approach and autograft [e.g. fascia, muscle]
1.UY.80.LA-XX-E	using open approach and local muscle transposition flap
1.UY.80.LA-XX-F	using open approach and free flap
1.UY.80.LA-XX-N	using open approach and synthetic tissue [e.g. gortex, mesh or Silastic sheath]

1.UY.87.^^ Excision partial, soft tissue of the wrist and hand

S 4 **L** 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Resection, lesion of soft tissue [extending into fascia, muscle or tendon] of hand with or without arm involvement

Excludes: Debridement only of soft tissue (wound) (amputation stump) of wrist and hand (see [1.UY.59.^^](#))
 Fasciectomy for release of Dupuytren contracture (see [1.UY.72.WJ](#))
 Ganglionectomy, carpal joints (see [1.UC.87.^^](#))
 Ganglionectomy, metacarpal joints (see [1.UG.87.^^](#))
 Ganglionectomy, wrist (see [1.UC.87.^^](#))

1.UY.87.LA	using open approach and simple apposition technique [e.g. suture, staple] (for closure of surgical defect)
1.UY.87.LA-XX-A	using open approach and autograft [e.g. fascia or skin] (for closure of defect)
1.UY.87.LA-XX-B	using open approach and split thickness skin graft (for closure of defect)
1.UY.87.LA-XX-E	using open approach and local transposition flap [e.g. advancement muscle or Z-plasty skin flap] (for closure of defect)
1.UY.87.LA-XX-F	using open approach and free flap [e.g. myocutaneous free flap] (for closure of defect)
1.UY.87.LA-XX-Q	using open approach and combined sources of tissue [e.g. skin graft with flap] (for closure of defect)

1.UZ.^^.^^ Therapeutic Interventions on the Hand with Wrist

Includes: hand NEC

1.UZ.02.^ ^ Exercise, hand with wrist**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Assisting and supervising client in performing exercise, hand with wrist
hand NEC
Hydrotherapy, hand with wrist
that using active or passive exercise techniques

Excludes: Range of motion exercise (see [1.UL.02.^ ^](#))

Code Also: Any use of biofeedback (see [7.SP.59.^ ^](#))

1.UZ.02.YD	using exercise NOS
1.UZ.02.YK	using passive motion exercise
1.UZ.02.YP	using functional exercise
1.UZ.02.YQ	using resistive exercise
1.UZ.02.ZA	using aquatic exercise
1.UZ.02.ZB	using balance training exercise

Therapeutic Interventions on the Hip and Leg (1VA - 1VZ)

1.VA.^^.^^ Therapeutic Interventions on the Hip Joint

Includes:	Acetabulum with femoral head or neck and supporting joint structures (bursa, capsule, cartilage, labrum, synovium, ligament, ligamentum teres) Hip joint NOS
Excludes:	Acetabulum alone (see 1.SQ.^^.^^) Hip joint with entire pelvis (see 1.SQ.^^.^^) Sacroiliac joint (see 1.SI.^^.^^) Trochanter of femur alone (see 1.VC.^^.^^)

1.VA.02.^^ Exercise, hip joint

Includes:	Continuous passive motion, hip joint Hydrotherapy, hip joint
Code Also:	Any use of biofeedback (see 7.SP.59.^^)
Note:	Involves assisting and supervising client in performing exercises.

1.VA.02.YD	using exercise NOS
1.VA.02.YG	using exertional rotation exercise
1.VA.02.YK	using passive motion exercise
1.VA.02.YN	using active range of motion exercise
1.VA.02.YQ	using resistive exercise
1.VA.02.ZA	using aquatic exercise
1.VA.02.ZB	using balance training exercise

1.VA.03.^^ Immobilization, hip joint

Includes:	Application, external immobilization device, hip joint Application, percutaneous external fixator, hip joint Removal with replacement, external immobilization device, hip joint
Note:	May involve immobilization of lower extremity to stabilize hip joint

1.VA.03.^ ^ Immobilization, hip joint	immobilization alone	with external traction [e.g. skin]	with percutaneous traction [e.g. skeletal]
using bracing device [e.g. adjustable support]	1.VA.03.JA-EQ	—	—
using cast [e.g. spica]	1.VA.03.JA-FQ	1.VA.03.JZ-FQ	1.VA.03.HA-FQ
using percutaneous external fixator	—	—	1.VA.03.HA-KC
using splinting device [e.g. Pavlik harness, Russell]	1.VA.03.JA-SR	1.VA.03.JZ-SR	1.VA.03.HA-SR
using traction alone	—	1.VA.03.JZ-TA	1.VA.03.HA-TA
using sling	1.VA.03.JA-SQ	—	—

1.VA.04.^ ^ Mobilization, hip joint**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Traction, hip

Excludes: Manual myofascial release only around hip, gluteal and thigh region (see [1.VD.04.^ ^](#))
 Mobilization with concomitant manipulation, hip (see [1.VA.05.^ ^](#))
 Traction for immobilization of fracture, hip (see [1.VA.03.^ ^](#))

 1.VA.04.JH using external approach with manual technique

1.VA.05.^ ^ Manipulation, hip joint**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Joint adjustment, hip
Mobilization with concomitant manipulation, hip
Skeletal manipulation, hip

Excludes: Massage, hip (see [1.VA.12.^^](#))

1.VA.05.JH using external approach with manual technique

1.VA.06.^^ Hypothermy, hip joint

Includes: Application of cold, hip
Cryotherapy, hip joint
that to reduce swelling, pain, etc.

1.VA.06.JA-KL using cold (dry) device [e.g. cold pack]

1.VA.06.JA-KM using cold (moist) device [e.g. compress]

1.VA.07.^^ Hyperthermy, hip joint

Includes: Application, heat, hip joint
Diathermy, hip joint

Excludes: Hyperthermy, multiple body sites (see [1.ZX.07.^^](#))

1.VA.07.JA-CG using microwave

1.VA.07.JA-DU using infrared light [e.g. heat lamp, baker]

1.VA.07.JA-DZ using short wave

1.VA.07.JA-EA using conductive heat device

1.VA.07.JA-HB using other diathermy device NEC

1.VA.07.JA-KH using externally applied dry heat [e.g. heating pad]

1.VA.07.JA-KJ using externally applied moist heat [e.g. compress, soak]

1.VA.07.JA-KQ using paraffin

1.VA.07.JA-TQ using tank [e.g. Hubbard]

1.VA.07.JA-TR using whirlpool

1.VA.12.^ ^ Therapy, hip joint**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Phototherapy, hip
 Physiotherapy NOS, hip
 Therapy, laser, hip (for pain reduction and promotion of healing)

Excludes: Exercise therapy, hip (see [1.VA.02.^ ^](#))
 Hydrotherapy, hip (see [1.VA.02.^ ^](#))
 Hyperthermy, hip only (see [1.VA.07.^ ^](#))
 Hypothermy, hip only (see [1.VA.06.^ ^](#))
 Therapy (photo, laser, massage) of soft tissue of leg (see [1.VX.12.^ ^](#))

1.VA.12.JA-AG using laser NEC (with or without photosensitizing chemicals)
 1.VA.12.JA-DQ using ultraviolet light
 1.VA.12.JA-DU using light NEC [e.g. long wave red light]
 1.VA.12.JJ using massage technique

1.VA.35.^ ^ Pharmacotherapy (local), hip joint**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Injection, hip joint
 Instillation, hip joint
 Irrigation (arthroscopic), with solution (or water), hip joint
 Washout, hip joint

Excludes: Ablation of synovium of hip joint (see [1.VA.59.^ ^](#))
 Radiation or medical synovectomy or synoviorthesis of hip joint (see [1.VA.59.^ ^](#))
 Systemic pharmacotherapy (see [1.ZZ.35.^ ^](#))
 That for soft tissue of leg (see [1.VX.35.^ ^](#))

1.VA.35.DA-D1	using endoscopic (arthroscopic) approach and antiinfective irrigating solution Includes: chlorhexidine, neomycin
1.VA.35.DA-D2	using endoscopic (arthroscopic) approach and salt irrigating solution Includes: sodium chloride
1.VA.35.DA-D3	using endoscopic (arthroscopic) approach and other irrigating solution Includes: sorbitol, mannitol
1.VA.35.HA-J2	using percutaneous (needle) approach and corticosteroid agent Includes: prednisone, dexamethasone, fludrocortisone
1.VA.35.HA-K0	using percutaneous (needle) approach and antiinfective agent NEC
1.VA.35.HA-N1	using percutaneous (needle) approach and antiinflammatory agent Includes: NSAIDS (indomethacin, ibuprofen, mefenamic acid), chloroquine, aurothioglucose, D penicillamine
1.VA.35.HA-P1	using percutaneous (needle) approach and local anesthetic agent
1.VA.35.HA-P2	using percutaneous (needle) approach and analgesic Includes: opioids (morphine, meperidine), acetylsalicylic acid, acetaminophen, ergotamine, sumatriptan
1.VA.35.HA-T9	using percutaneous (needle) approach and pharmacological agent NEC
1.VA.35.LA-D3	using open approach and other irrigating solution
1.VA.35.LA-K8	using open approach and antibacterial agent (e.g. gentamycin beads)

1.VA.38.^ ^ Management of external appliance, hip joint

Includes: Adjusting appliance, hip
Application and removal, traction weights
Removal, external immobilization device, hip

Excludes: Removal with replacement, external immobilization device (see [1.VA.03.^ ^](#))

1.VA.38.HA-KC of percutaneous external fixator
1.VA.38.HA-TA of skeletal traction device
1.VA.38.JA-EQ of brace
1.VA.38.JA-FQ of cast
1.VA.38.JA-SQ of sling
1.VA.38.JA-SR of splinting device
1.VA.38.JZ-TA of skin traction device

1.VA.52.^ ^ Drainage, hip joint**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Bursectomy, hip joint
Bursotomy, hip joint

1.VA.52.DA using endoscopic [arthroscopic] approach
1.VA.52.HA using percutaneous (needle) aspiration
1.VA.52.WJ using open excisional approach [e.g. bursectomy]
1.VA.52.WK using open incisional approach [e.g. bursotomy]

1.VA.53.^ ^ Implantation of internal device, hip joint**S** 66 **L** 72 **E** 71

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 66	Mandatory	Mandatory Tx Status 15	Status	A	Abandoned after onset
				P	Primary (first insertion of prosthesis component(s) within the joint)
				R	Revision (replacement of previous prosthesis component(s) within the joint)
L 72	Mandatory	Bilaterality Mandatory	Location	B	Bilateral
				L	Left
				R	Right
				U	Unilateral unspecified
E 71	Mandatory	Mandatory Femoral Component 2	Extent	C S	Cement spacer
				F H	Modular ball (with or without modular neck) with stem remaining in situ [this component value requires Status value R=Revision]
				M1	Modular hemiarthroplasty, unipolar femoral component [Includes: Femoral head and stem for partial hip replacement; fits into (native) acetabulum without a liner]
				M2	Modular hemiarthroplasty, bipolar femoral component [Includes: Femoral head with larger outer head (ball in ball) with a plastic acetabular liner for partial hip replacement; articulates with the (native) acetabulum]
				M O	Monoblock (all one piece) ball and stem (e.g. Austin-Moore, Thompson) [Includes: that used in total arthroplasty or hemiarthroplasty]
				M U	Modular total arthroplasty [Includes: Total hip replacement (femoral and acetabular)]
				R E	Joint resurfacing only (anatomical head not resected) (e.g. Birmingham, Finsbury)
				U N	Unknown [select this value only when there is no information to select from the list above]

- Includes:** Arthroplasty with implantation prosthetic device, hip
Hemiarthroplasty with implantation prosthetic device, hip
Reduction with fixation and implantation of prosthetic device, hip
Replacement, hip, using prosthetic device
Resurfacing arthroplasty (no resection of femoral head)
- Excludes:** Implantation, prosthetic device to acetabulum alone (see [1.SQ.53.^^](#))
Replacement of plastic acetabular liner alone (see [1.SQ.53.^^](#))
- Code Also:** Any robotic assisted telemanipulation of tools (see [7.SF.14.^^](#))
Removal of cement spacer (see [1.VA.55.^^](#)) when the cement spacer is removed and replaced with a prosthetic device
Removal of hip prosthesis (see [1.VA.55.^^](#)) when the prosthesis is removed and replaced with a cement spacer
- Note:** Unipolar and bipolar are both types of femoral components used in a hemiarthroplasty. A unipolar (monopolar) hemiarthroplasty is when the size of the femoral head placed onto the stem is the same as the native femoral head (typically 44 to 56 mm in diameter). A bipolar hemiarthroplasty is when a regular femoral head is first placed onto the stem (typically 28 or 32 mm), and then a larger head with a plastic acetabular liner (cup) are placed onto the regular femoral head. The larger head is the same size as the native femoral head (typically 44 to 56 mm in diameter). This larger head articulates with both the regular (28 or 32 mm) head on the stem, and the native acetabulum - hence it is "bipolar". The bipolar head is similar to a total hip acetabular component, except that it is not fixed to the native acetabulum - it articulates with it.
The plastic acetabular liner is not considered a separate component. It is not attached to the bone. The liner may be used with a single femoral component to line the native acetabulum, or with a total hip replacement to line the acetabular cup component. When the plastic acetabular liner is replaced alone, it is considered a partial component (see [1.SQ.53.^^](#)).

1.VA.53.^ Implantation of internal device, hip joint	uncemented	using bone autograft [uncemented]	using bone homograft [uncemented]	using synthetic material (e.g. bone paste, cement)	using combined sources of tissue (e.g. bone graft, cement, paste)

				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Removal of missile (e.g. bullet, metal fragment, carpenter's nail), femur that with debridement of site

Excludes: Removal of fixative device, femur (see [1.VC.55.^ ^](#))

1.VC.56.JA using external (manual extraction) approach
 1.VC.56.LA using open approach

1.VC.58.^ ^ Procurement, femur**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

1.VC.58.LA-XX-A of [bone] autograft using open approach
 1.VC.58.LA-XX-K of bone graft (from deceased donor) using open approach

1.VC.59.^ ^ Destruction, femur**S** ⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Sclerotherapy, femur, intralesional [e.g. aneurysmal bone cyst]

Excludes: Osteoclasia, femur (see [1.VC.80.^^](#))

1.VC.59.HA-AW using percutaneous (needle) approach with radiofrequency probe

Includes: Radiofrequency ablation (RFA), femur

1.VC.59.HA-X7 using percutaneous (needle) approach with chemical agents (e.g. Ethibloc, zein)

1.VC.73.^^ Reduction, femur

S 4 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Reduction with debridement, femur
that with irrigation, open fracture wound, femur

Excludes: Reduction, femoral head and neck (see [1.VA.73.^^](#))
that with fixation, femur (see [1.VC.74.^^](#))

Code Also: Any concomitant application of skeletal traction (see [1.VC.03.^^](#))
Any concomitant cast immobilization (see [1.VC.03.^^](#))

1.VC.73.JA using closed (external) approach

1.VC.73.LA using open approach

1.VC.74.^ ^ Fixation, femur**S** 5 **L** A1

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L A1	Mandatory	Mandatory long bones 1	Location	B	Bilateral
				L	Left [shaft or NOS]
				L D	Left distal
				L E	Left epiphysis
				L P	Left proximal (trochanter)
				R	Right [shaft or NOS]
				R C	Right epiphysis
				R D	Right distal
				R P	Right proximal (trochanter)

Includes: Debridement with fixation, femur
 Epiphysiodesis, femur
 Fixation, trochanter
 Reduction with fixation, femur
 Stapling, epiphyseal, femur
 that for guided growth
 that for non union repair, femur
 that to arrest bone growth, femur (i.e. physeal arrest)
 that with irrigation, open fracture wound, femur

Excludes: Fixation, femoral head or neck (see [1.VA.74.^ ^](#))

1.VC.74.^.^ Fixation, femur	no tissue used	with bone autograft	with bone homograft	with combined sources of tissue [e.g. bone grafts, cement/paste]	with synthetic tissue [e.g. bone cement, or paste]
open approach					
using pin, nail	1.VC.74.LA-NV	1.VC.74.LA-NV-A	1.VC.74.LA-NV-K	1.VC.74.LA-NV-Q	1.VC.74.LA-NV-N

using no fixative device [e.g. for epiphysiodesis]	1.VC.74.HA	—	—	—	—

1.VC.79.^.^ Repair by increasing size, femur**S** 5 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Corticotomy with distraction, femur
Lengthening, femur
Osseodistraction, femur
Osteotomy (transverse) with distraction, femur (for lengthening)

Excludes: Osteotomy, lengthening, femur using bone graft (see [1.VC.80.^.^](#))

1.VC.79.HA-MG	using percutaneous approach and distraction device [e.g. hinged, Ilizarov]
1.VC.79.LA-MG	using open approach and distraction device [e.g. hinged, Ilizarov]

1.VC.80.^ ^ Repair, femur**S** 5 **L** 51

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 51	Optional	Long bones 2	Location	B	Bilateral
				L	Left [shaft or NOS]
				L D	Left distal
				L P	Left proximal (trochanter)
				R	Right [shaft or NOS]
				R D	Right distal
				R P	Right proximal (trochanter)

Includes: Advancement, greater trochanteric
 Osteoclasia, femur
 Osteoplasty, femoral
 Osteotomy, (lengthening, shortening), femur
 Osteotomy, distal femur [for bone growth asymmetry]
 Osteotomy, intertrochanteric
 Osteotomy, proximal femur (for proximal femoral focal deficiency)
 Osteotomy, shaft femur [for deformity]
 Trochanterplasty, hip [for improved joint alignment]
 Van Nes rotation plasty (osteotomy for PFFD)

Excludes: Femoral head osteotomy for avascular necrosis (see [1.VA.80.^ ^](#))
 Osteotomy, femoral neck [femoral shortening osteotomy] (see [1.VA.80.^ ^](#))
 Osteotomy, femur for lengthening using distraction (see [1.VC.79.^ ^](#))
 Revascularization, femoral head (see [1.VA.80.^ ^](#))
 Van Nes rotation plasty concomitant with (limb-sparing) resection of femur (see [1.VC.91.^ ^](#))

Code Also: Any concomitant tendon [tubercle] transfer (see [1.VS.80.^ ^](#))

1.VC.80.^ ^ Repair, femur	no tissue used (for repair)	with autograft [e.g. bone, tendon]	with bone homograft	with combined sources of tissue [e.g. bone graft, flap or paste]	with synthetic tissue [e.g. bone cement, paste]	with pedicled flap [e.g. rotation plasty]
no device used (for repair)	—	—	—	—	1.VC.80.LA-XX-N	1.VC.80.LA-XX-G
using pin, nail	1.VC.80.LA-NV	1.VC.80.LA-NV-A	1.VC.80.LA-NV-K	1.VC.80.LA-NV-Q	1.VC.80.LA-NV-N	1.VC.80.LA-NV-G
using plate, screw	1.VC.80.LA-NW	1.VC.80.LA-NW-A	1.VC.80.LA-NW-K	1.VC.80.LA-NW-Q	1.VC.80.LA-NW-N	1.VC.80.LA-NW-G
using wire, mesh, staple	1.VC.80.LA-KD	1.VC.80.LA-KD-A	1.VC.80.LA-KD-K	1.VC.80.LA-KD-Q	1.VC.80.LA-KD-N	1.VC.80.LA-KD-G
using intramedullary nail	1.VC.80.LA-LQ	—	—	—	—	—

1.VC.82.^ ^ Reattachment, femur**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Reattachment, above knee**Note:** Involves microsurgical technique to reestablish vascular and neural function.

-
- 1.VC.82.LA using simple apposition technique [e.g. suturing]
 1.VC.82.LA-NW using screw/plate fixation with apposition technique
 1.VC.82.LA-NW-A using screw/plate fixation with bone autograft
 1.VC.82.LA-NW-N using screw/plate fixation with synthetic tissue [e.g. bone cement or paste]
 1.VC.82.LA-XX-F using free flap [e.g. myocutaneous or composite bone flap]
-

1.VC.83.^ ^ Transfer, femur**S** ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Debridement with bone graft, femur
 Graft (bone), femur [e.g. for repair non union]
 Sequestrectomy with bone graft (alone), femur

Excludes: Osteotomy with bone graft, femur (see [1.VC.87.^^](#))
 Sequestrectomy with fixation, femur (see [1.VC.87.^^](#))
 that for avascular necrosis of femoral head (see [1.VA.80.^^](#))
 that with fixation, femur (see [1.VC.74.^^](#))
 that with osteotomy, femur (see [1.VC.80.^^](#))

1.VC.83.LA-XX-A using bone autograft
 1.VC.83.LA-XX-K using bone homograft
 1.VC.83.LA-XX-N using synthetic tissue [e.g. bone cement, paste]
 1.VC.83.LA-XX-Q using combined sources of tissue [e.g. bone graft, cement/paste]

1.VC.87.^^ Excision partial, femur

S 4 **L** 51

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 51	Optional	Long bones 2	Location	B	Bilateral
				L	Left [shaft or NOS]
				L D	Left distal
				L P	Left proximal (trochanter)
				R	Right [shaft or NOS]
				R D	Right distal
				R P	Right proximal (trochanter)

Includes: Debridement, femur
 Excision, femur (physeal bar of)
 Osteotomy, femur
 Sequestrectomy NOS, femur

Excludes: Debridement with bone graft [e.g. for non union] femur (see [1.VC.83.^^](#))
 Debridement with fixation, femur (see [1.VC.74.^^](#))
 Debridement with reduction and fixation, femur (see [1.VC.74.^^](#))
 Debridement with reduction, femur (see [1.VC.73.^^](#))
 Femoral osteotomy with radical resection of adjacent soft tissue (see [1.VC.91.^^](#))
 Femoral osteotomy (see [1.VC.80.^^](#))
 Sequestrectomy with bone grafting (alone), femur (see [1.VC.83.^^](#))

Note: Involves resection of the femur [e.g. neoplasm] which usually requires concomitant stabilization of the surgical defect often by grafting and applying fixative devices but occasionally by bone flap reconstruction. (The definitive intervention is the resection however there may be a significant salvage component to manage the surgical wound).

Omit code: When osteotomy is done for prosthetic replacement of femoral head (see [1.VA.53.^^](#))

1.VC.87.^ ^ Excision partial, femur	no tissue used (for closure of defect)	with bone autograft	with bone homograft	with combined sources of tissue [e.g. graft, flap, bone cement]	with free flap [e.g. fibular flap]	with pedicled flap [myocutaneous flap]	with synthetic tissue [bone cement, paste]
no device used (for closure)	1.VC.87.LA	1.VC.87.LA-XX-A	1.VC.87.LA-XX-K	1.VC.87.LA-XX-Q	—	1.VC.87.LA-XX-G	1.VC.87.LA-XX-N

1.VC.91.^ ^ Excision radical, femur**S 4 L 51**

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 51	Optional	Long bones 2	Location	B	Bilateral
				L	Left [shaft or NOS]
				L D	Left distal
				L P	Left proximal (trochanter)
				R	Right [shaft or NOS]
				R D	Right distal
				R P	Right proximal (trochanter)

Includes: Amputation (above knee) with Van Nes rotation plasty (reconstruction)
 Excision, radical, soft tissue of leg with ostectomy of femur
 Ostectomy, femur with radical resection of adjacent soft tissue
 Resection, limb sparing, femur that with fixation or implant of prosthesis

Excludes: Adjustment of expandable [growing] prosthesis (see [1.WZ.54.^ ^](#))
 Debridement with bone graft [e.g. for non union], femur (see [1.VC.83.^ ^](#))

Note: Involves the radical resection of both the femur and adjacent soft tissue (sometimes referred to as "limb-sparing local resection") which usually requires concomitant stabilization of the surgical defect often by grafting and applying fixative devices but occasionally by bone flap reconstruction. (The definitive intervention is the resection, however, there may be a significant salvage component to manage the surgical wound).

				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Amputation, above knee**Excludes:** Disarticulation, through knee (see [1.VG.93.^](#))
Limb-sparing resection, femur (see [1.VC.91.^](#))

1.VC.93.LA	using simple apposition technique [e.g. suturing] (for closure of stump) Includes: Guillotine technique
1.VC.93.LA-RV	using bone-anchored prosthetic bridge (or stem implant device)
1.VC.93.LA-XX-A	using skin graft (for closure of stump)
1.VC.93.LA-XX-E	using local flap [e.g. myoplasty, osteoperiosteal flap or myodesis] (for closure of stump)
1.VC.93.LA-XX-Q	using combined sources of tissue [e.g. myoplasty or myodesis with free bone autograft] (to retain bony length and for closure of stump)

1.VD.^^.^^ Therapeutic Interventions on Muscles of Hip and Thigh

- Includes:** Adductor [brevis, gracilis, longus, magnus, pectineus]
 External and internal rotators [obturator gemellus superior and inferior, quadratus femoris, piriformis, tensor fascia lata muscle]
 Gluteus [maximus, medius, minimi]
 Iliopsoas
 Muscles of buttock NOS
 Muscles of hip NOS
 Muscles of thigh NEC
 Rectus femoris
 Sartorius
 Tensor fascia lata muscle
- Excludes:** Neoplasm arising in or extending into muscles of hip and thigh (see [1.VX.^^.^^](#))
 Quadriceps femoris muscle (see [1.VR.^^.^^](#))

1.VD.04.^^ Mobilization, muscles of the hip and thigh**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Myofascial release, hip, gluteus and thigh
- Excludes:** Fasciotomy or fasciectomy for release of muscles of hip and thigh (see [1.VD.72.^^](#))
 that concomitant with manipulation/adjustment of hip joint (see [1.VA.05.^^](#))
 that concomitant with mobilization of hip joint (see [1.VA.04.^^](#))
- Note:** Involves moving, stretching or elongating soft tissue of hip, gluteal and thigh region.

1.VD.04.JH using external approach with manual technique

1.VD.09.^^ Stimulation, muscles of hip and thigh**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Application of electrodes, muscles of hip and thigh
Electrostimulation, muscles of buttocks

1.VD.09.HA-JA	using percutaneous insertion of electrodes
1.VD.09.JA-AG	using laser
1.VD.09.JA-AZ	using ultrasound
1.VD.09.JA-DV	using transcutaneous electric nerve stimulation [TENS]
1.VD.09.JA-DW	using electrical neuromuscular stimulation [EMS]
1.VD.09.JA-DX	using interferential stimulation
1.VD.09.JA-EE	using functional electrical stimulation [FES]

1.VD.57.^.^ Extraction, muscles of hip and thigh

S 4 **L** 2

				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Fasciectomy, hip and thigh
 Fasciotomy, hip and thigh
 Myotomy, hip and thigh
 Operation, hanging hip
 Release, adductor magnus and rectus femoris muscles
 Release, contracture, muscles of hip and thigh

1.VD.72.WJ using excisional technique [e.g. fasciectomy]
 1.VD.72.WK using incisional technique [e.g. fasciotomy, myotomy]

1.VD.80.^ Repair, muscles of hip and thigh**S** 28 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 28	Optional	Treatment Status 3A	Status	D	Delayed (closure occurs > 24 hrs post trauma)
				R	Revision
				S	Staged
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Fascioplasty, hip and thigh
 Fasciorrhaphy, hip and thigh
 Myoplasty, muscles of hip and thigh
 Myorrhaphy, muscles of hip and thigh
 Rotation flap, muscles of hip and thigh
 Suture, muscles of hip and thigh

Excludes: Herniorrhaphy, inguinal or femoral (see [1.SY.80.^](#))

1.VD.80.LA using open approach and apposition [suture, staple]
 1.VD.80.LA-XX-A using open approach and autograft [e.g. fascia, muscle]
 1.VD.80.LA-XX-E using open approach and local muscle transposition flap [e.g. advancement flap]
 1.VD.80.LA-XX-F using open approach and free flap
 1.VD.80.LA-XX-N using open approach and synthetic tissue [e.g. gortex, mesh or Silastic sheath]
 1.VD.80.LA-XX-Q using open approach and combined sources of tissue [e.g. graft/flap, mesh]

1.VD.87.^ Excision partial, muscles of hip and thigh**S** 4 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Excision of (non viable) muscle or composite flap of hip and thigh
- Excludes:** Excision, muscle or tendon of buttock, hip and thigh (see [1.VX.87.^^](#))
 Excision, muscle or tendon of hip and thigh (see [1.VX.87.^^](#))
 Procurement, muscles of hip and thigh (see [1.VD.58.^^](#))
 Resection [neoplasm], soft tissue of leg any site (see [1.VX.87.^^](#))

1.VD.87.LA	using simple apposition technique [e.g. suture, staple] (for closure of surgical defect)
1.VD.87.LA-XX-A	using autograft [e.g. fascia or skin] (for closure of surgical defect)
1.VD.87.LA-XX-E	using local transposition flap [e.g. advancement muscle or Z-plasty skin flap] (for closure of defect)
1.VD.87.LA-XX-F	using free flap [e.g. myocutaneous free flap] (for closure of defect)
1.VD.87.LA-XX-Q	using combined sources of tissue [e.g. skin graft with flap] (for closure of defect)

1.VE.^^.^^ Therapeutic Interventions on the Tendons of Hip and Thigh

- Includes:** Tendons [aponeuroses] of hip NOS
 Tendons [aponeuroses] of thigh NOS
- Excludes:** Quadriceps tendon (see [1.VS.^^.^^](#))

1.VE.58.^^ Procurement, tendons of hip and thigh

S 4 **L** 2

				2C	Bicompartmental, lateral with patellofemoral: bicondylar
				2D	Bicompartmental, unspecified
				3	Tricompartmental, medial with lateral & patellofemoral

Includes: Arthroplasty with implantation of prosthetic device, knee
Hemiarthroplasty with implantation of prosthetic device, knee
Replacement, knee, using prosthetic device that with/without insertion of metal augments

Excludes: Patellaplasty alone using prosthetic device (see [1.VP.53.^ ^](#))
Replacement, patellofemoral alone (see [1.VP.53.^ ^](#))

Code Also: Any robotic assisted telemanipulation of tools (see [7.SF.14.^ ^](#))
Removal of cement spacer (see [1.VG.55.^ ^](#)) when the cement spacer is removed and replaced with a prosthetic device
Removal of knee prosthesis (see [1.VG.55.^ ^](#)) when the prosthesis is removed and replaced with a cement spacer

Note:

See the Knee Replacement diagram.

A partial knee replacement involves just a single compartment (medial or lateral) of the joint. More than one prosthetic component is typically used because the medial (or lateral) aspect of both the tibia and femur are replaced. Sometimes a plastic support bearing is also used to act as the meniscus joining the tibial tray and the femoral component – this is considered part of the tibial component and is not counted separately.

A total knee replacement always involves both the medial and the lateral compartments (bicompartamental, bicondylar) but may also involve the patellofemoral compartment (tricompartamental). When a bicompartamental knee replacement is performed, two prosthetic components (e.g. femoral and tibial) will be used and when a tricompartamental knee replacement is performed, three prosthetic components (i.e. femoral, tibial and patellofemoral or a patellar button) will be used. In the case of a revision arthroplasty, a single component may be removed and replaced. This is considered a revision of a partial or total knee replacement (bicompartamental or tricompartamental) using a single component prosthetic device.

1.VG.53.^ Implantation of internal device, knee joint	with synthetic material (e.g. bone paste, cement)	uncemented	with bone autograft	with bone homograft	with combined sources of tissue (e.g. bone graft, cement, paste)

 Thermal shrinkage, cruciate ligament of knee (see [1.VL.78.^](#))

Code Also: Any concomitant tendon repair to rebalance or realign knee (see [1.VS.80.^](#))
 Any debridement of patella with or without retinacular release (see [1.VP.80.^](#))
 Any excision or repair of cruciate or collateral ligaments (see [1.VL.^](#), [1.VM.^](#) and [1.VN.^](#))

Note: May involve multiple interventions on knee joint such as the following: joint excision loose body extraction, meniscectomy, meniscoplasty, and capsular release.

1.VG.80.^ ^ Repair, knee joint	no tissue used (for repair)	with autograft [e.g. bone, cartilage, or tendon]	with combined sources of tissue [e.g. bone graft, synthetic tissue]	with homograft [e.g. bone or cartilage]	with synthetic tissue [e.g. gortex, artificial polymer cartilage]
open approach					
joint repair without meniscus involvement	1.VG.80.LA	1.VG.80.LA-XX-A	1.VG.80.LA-XX-Q	1.VG.80.LA-XX-K	1.VG.80.LA-XX-N
with meniscectomy [or meniscopectomy]	1.VG.80.UY	1.VG.80.UY-XX-A	1.VG.80.UY-XX-Q	1.VG.80.UY-XX-K	1.VG.80.UY-XX-N
using special incisional technique [e.g. multiple burr holes for tibial head revascularization]	1.VG.80.WK Includes: • Tibial head revascularization	—	—	1.VG.80.WK-XX-K Includes: • Osteochondral bone implant plugs	—
endoscopic [arthroscopic] approach					
joint repair without meniscus involvement	1.VG.80.DA	1.VG.80.DA-XX-A	1.VG.80.DA-XX-Q	1.VG.80.DA-XX-K	1.VG.80.DA-XX-N
with meniscectomy [or meniscopectomy]	1.VG.80.FY	1.VG.80.FY-XX-A	1.VG.80.FY-XX-Q	1.VG.80.FY-XX-K	1.VG.80.FY-XX-N
using special incisional technique [e.g. multiple burr holes for tibial head revascularization]	1.VG.80.GZ Includes: • Tibial head revascularization	—	—	1.VG.80.GZ-XX-K Includes: • Osteochondral bone implant plugs	—

1.VG.83.^ ^ Transfer, knee joint**S 4 L 2**

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Autotransplantation, cultured chondrocyte cells, knee joint
Therapy, chondrocyte gene, knee joint

1.VG.83.DA-XX-A of autograft (e.g. osteochondral tissue, bone plug) using endoscopic [arthroscopic] approach

Includes: Mosaicplasty, knee joint
Osteochondral autograft transfer system [OATS], knee joint

1.VG.83.DA-XX-P of cultured chondrocyte cells using endoscopic [arthroscopic] approach

1.VG.83.HA-XX-P of cultured chondrocyte cells using percutaneous approach

1.VG.87.^ ^ Excision partial, knee joint**S** 15 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 15	Optional	Tx Status 9	Status	A	Abandoned after onset
				C	Converted (from endoscopic to open approach)
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Arthroectomy, knee joint
 Chondrectomy, knee joint
 Condylectomy, femoral
 Condylectomy, tibial
 Debridement, knee joint
 Extraction deposits, fragments, loose bodies
 Synovectomy, knee joint

Excludes: Debridement with reduction, knee joint (see [1.VG.73.^ ^](#))
 Debridement/resurfacing of patella alone (see [1.VP.80.^ ^](#))

Code Also: Debridement, patella with or without retinacular release or medial patellar plication/reefing (see [1.VP.80.^ ^](#))

Omit code: When any of the following interventions – meniscectomy, meniscoplasty, capsular release – are performed concomitantly with any type of joint excision(s) such as arthroectomy, chondrectomy, condylectomy, extraction (deposits, fragments, loose bodies), synovectomy (see [1.VG.80.^ ^](#))

1.VG.87.^ ^ Excision partial, knee joint	endoscopic [arthroscopic] approach	open approach
other joint excision [e.g. arthroectomy, chondrectomy, debridement] with or without synovectomy	1.VG.87.DA	1.VG.87.LA
synovectomy [dissection] alone	1.VG.87.GB	1.VG.87.WJ

1.VG.93.^.^ Amputation, knee joint**S** ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Amputation, through knee joint

1.VG.93.LA using simple apposition technique [e.g. suturing] for closure of stump)
 1.VG.93.LA-XX-A using skin graft (for closure of stump)
 1.VG.93.LA-XX-E using local flap myoplasty or myodesis (for closure of stump)

1.VK.^.^.^ Therapeutic Interventions on the Meniscus of the Knee

Includes: Lateral, medial meniscus
 Posterior meniscomfemoral ligament
 Semilunar cartilage

Excludes: Meniscus with collateral ligament (see [1.VM.^.^.^](#))
 Meniscus with cruciate and collateral ligaments (see [1.VN.^.^.^](#))
 Meniscus with cruciate ligament (see [1.VL.^.^.^](#))

1.VK.80.^ ^ Repair, meniscus of knee**S** ⁷ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 7	Optional	Tx Status 3	Status	A	Abandoned after onset
				D P	Delayed primary (repair occurring 2 to 14 days post trauma)
				D S	Delayed secondary (repair occurring >14 days post trauma)
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Meniscopectomy (with/without concomitant debridement of meniscus), knee
Suturing, meniscus of knee

Excludes: that with collateral ligament repair (see [1.VM.80.^ ^](#))
that with collateral ligament resection (see [1.VM.87.^ ^](#))
that with cruciate and collateral ligament repair (see [1.VN.80.^ ^](#))
that with cruciate and collateral ligament resection (see [1.VN.87.^ ^](#))
that with cruciate ligament repair (see [1.VL.80.^ ^](#))
that with cruciate ligament resection (see [1.VL.87.^ ^](#))
that with other repair of knee joint (see [1.VG.80.^ ^](#))

Omit code: When meniscopectomy is performed concomitantly with any of the following interventions on the knee: arthroplasty, joint excision [arthrectomy, chondrectomy, condylectomy, synovectomy], loose body extraction, or capsular release (see [1.VG.80.^ ^](#))

1.VK.80.^ ^ Repair, meniscus of knee	endoscopic [arthroscopic] approach	open approach
with simple apposition technique (for tissue regeneration) [e.g. suturing]	1.VK.80.DA	1.VK.80.LA
with autograft [e.g. fascia]	1.VK.80.DA-XX-A	1.VK.80.LA-XX-A
with fibrin 'glue'clot	1.VK.80.DA-W3	1.VK.80.LA-W3
with homograft [e.g. meniscal allograft with bone plug] with or without wire guidance	1.VK.80.DA-XX-K	1.VK.80.LA-XX-K
with bioabsorbable (binding) device [e.g. biostinger, fastener, anchor, arrow, staple or dart]	1.VK.80.DA-FH	1.VK.80.LA-FH
with special incisional technique [e.g. multiple burr holes for revascularization] with no tissue used (for repair)	1.VK.80.GZ Includes: • Trephination, meniscus	1.VK.80.WK Includes: • Trephination, meniscus

1.VK.87.^ ^ Excision partial, meniscus of knee**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Meniscectomy, partial, knee

Excludes: Debridement of meniscus with concomitant meniscoplasty (see [1.VK.80.^ ^](#))
that with collateral ligament repair (see [1.VM.80.^ ^](#))
that with collateral ligament resection (see [1.VM.87.^ ^](#))
that with cruciate and collateral ligament repair (see [1.VN.80.^ ^](#))
that with cruciate and collateral ligament resection (see [1.VN.87.^ ^](#))
that with cruciate ligament repair (see [1.VL.80.^ ^](#))
that with cruciate ligament resection (see [1.VL.87.^ ^](#))
that with other repair of knee joint (see [1.VG.80.^ ^](#))

Omit code: When meniscectomy is performed concomitantly with any of the following interventions on the knee: arthroplasty, joint excision [arthrectomy, chondrectomy, condylectomy, debridement, synovectomy], loose body extraction, or capsular release (see [1.VG.80.^ ^](#))

1.VK.87.DA using endoscopic [arthroscopic] approach
1.VK.87.LA using open approach

1.VK.89.^ ^ Excision total, meniscus of knee**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Meniscectomy, total, knee

Excludes: that with collateral ligament repair (see [1.VM.80.^](#))
 that with collateral ligament resection (see [1.VM.87.^](#))
 that with cruciate and collateral ligament repair (see [1.VN.80.^](#))
 that with cruciate and collateral ligament resection (see [1.VN.87.^](#))
 that with cruciate ligament repair (see [1.VL.80.^](#))
 that with cruciate ligament resection (see [1.VL.87.^](#))
 that with other repair of knee joint (see [1.VG.80.^](#))

Omit code: When meniscectomy is performed concomitantly with any of the following interventions on the knee: arthroplasty, joint excision [arthrectomy, chondrectomy, condylectomy, synovectomy], loose body extraction, or capsular release (see [1.VG.80.^](#))

1.VK.89.DA using endoscopic [arthroscopic] approach
 1.VK.89.LA using open approach

1.VL.^.^ Therapeutic Interventions on Cruciate Ligaments of Knee

Includes: Anterior and posterior cruciate ligament of knee
 Cruciate ligament with meniscus of knee

Excludes: Cruciate with collateral ligaments of knee (see [1.VN.^.^](#))

1.VL.78.^ Repair by decreasing size, cruciate ligaments of knee

S 5 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Thermal shrinkage, cruciate ligaments of knee

Excludes: Thermal shrinkage, cruciate with collateral ligaments of knee (see [1.VN.78.^](#))

1.VL.78.DA-KK using endoscopic approach and electrical heat (probe) device
Includes: Electrothermal shrinkage, ACL of knee
 1.VL.78.FY-KK using endoscopic approach with meniscectomy [or meniscoplasty] and electrical heat (probe) device

1.VL.80.^ ^ Repair, cruciate ligaments of knee**S** 17 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 17	Optional	Tx Status 11	Status	A	Abandoned after onset
				C	Converted (from endoscopic to open approach)
				D P	Delayed primary (repair occurring 2 to 14 days post-trauma)
				D S	Delayed secondary (repair occurring > 14 days post-trauma)
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Reconstruction, cruciate ligaments
That with or without meniscectomy/meniscoplasty

Excludes: Cruciate with collateral ligament repair, knee (see [1.VN.80.^ ^](#))
Thermal shrinkage, cruciate ligaments of knee (see [1.VL.78.^ ^](#))

Code Also: Any concomitant capsular repair of knee (see [1.VG.80.^ ^](#))
Any procurement of tendon used for repair

Note: Involves creating femoral and tibial tunnel with bone plug reaming to correctly align tendon graft reconstruction of the ligament(s).
Select the device qualifier based on the following hierarchy (from highest to lowest): bioabsorbable device of any type / screw / endobutton or staple / sutures or suture anchors.

1.VL.80.^ ^ Repair, cruciate ligaments of knee	open approach	open approach with meniscectomy or meniscoplasty	endoscopic (and open) approach	endoscopic (and open) approach with meniscectomy or meniscoplasty
using autograft [e.g. tendon with bone plug]				
and bioabsorbable binding device	1.VL.80.LA-FH-A	1.VL.80.UY-FH-A	1.VL.80.DA-FH-A	1.VL.80.FY-FH-A

Select the device qualifier based on the following hierarchy (from highest to lowest): bioabsorbable device of any type / screw / endobutton or staple / sutures or suture anchors.

1.VN.80.^ Repair, cruciate with collateral ligaments of knee	open approach	open approach with meniscectomy or meniscoplasty	endoscopic (and open) approach	endoscopic (and open) approach with meniscectomy or meniscoplasty
using autograft [e.g. tendon with bone plug]				
and bioabsorbable binding device	1.VN.80.LA-FH-A	1.VN.80.UY-FH-A	1.VN.80.DA-FH-A	1.VN.80.FY-FH-A
and screw [and washer]	1.VN.80.LA-NW-A	1.VN.80.UY-NW-A	1.VN.80.DA-NW-A	1.VN.80.FY-NW-A
and endobutton or [table] staple	1.VN.80.LA-KD-A	1.VN.80.UY-KD-A	1.VN.80.DA-KD-A	1.VN.80.FY-KD-A
and sutures [or suture anchors]	1.VN.80.LA-XX-A	1.VN.80.UY-XX-A	1.VN.80.DA-XX-A	1.VN.80.FY-XX-A
using homograft [e.g. tendon allograft with bone plug]				
and bioabsorbable binding device	1.VN.80.LA-FH-K	1.VN.80.UY-FH-K	1.VN.80.DA-FH-K	1.VN.80.FY-FH-K
and screw [and washer]	1.VN.80.LA-NW-K	1.VN.80.UY-NW-K	1.VN.80.DA-NW-K	1.VN.80.FY-NW-K
and endobutton or [table] staple	1.VN.80.LA-KD-K	1.VN.80.UY-KD-K	1.VN.80.DA-KD-K	1.VN.80.FY-KD-K
and sutures [or suture anchors]	1.VN.80.LA-XX-K	1.VN.80.UY-XX-K	1.VN.80.DA-XX-K	1.VN.80.FY-XX-K
using synthetic ligament augmentation device [LAD]				
and bioabsorbable binding device	1.VN.80.LA-FH-N	1.VN.80.UY-FH-N	1.VN.80.DA-FH-N	1.VN.80.FY-FH-N
and screw [and washer]	1.VN.80.LA-NW-N	1.VN.80.UY-NW-N	1.VN.80.DA-NW-N	1.VN.80.FY-NW-N
and endobutton or [table] staple	1.VN.80.LA-KD-N	1.VN.80.UY-KD-N	1.VN.80.DA-KD-N	1.VN.80.FY-KD-N
and sutures [or suture anchors]	1.VN.80.LA-XX-N	1.VN.80.UY-XX-N	1.VN.80.DA-XX-N	1.VN.80.FY-XX-N
using combined sources of tissue [e.g. autograft with LAD]				
and bioabsorbable binding device	1.VN.80.LA-FH-Q	1.VN.80.UY-FH-Q	1.VN.80.DA-FH-Q	1.VN.80.FY-FH-Q
and screw [and washer]	1.VN.80.LA-NW-Q	1.VN.80.UY-NW-Q	1.VN.80.DA-NW-Q	1.VN.80.FY-NW-Q
and endobutton or [table] staple	1.VN.80.LA-KD-Q	1.VN.80.UY-KD-Q	1.VN.80.DA-KD-Q	1.VN.80.FY-KD-Q
and sutures [or suture anchors]	1.VN.80.LA-XX-Q	1.VN.80.UY-XX-Q	1.VN.80.DA-XX-Q	1.VN.80.FY-XX-Q
using other techniques				
and bioabsorbable binding device only	1.VN.80.LA-FH	1.VN.80.UY-FH	1.VN.80.DA-FH	1.VN.80.FY-FH
and no fixative device or tissue (e.g. suture alone)	1.VN.80.LA Includes: • Needling, cruciate and collateral ligaments (to provoke healing response) using open approach	—	1.VN.80.DA Includes: • Needling, cruciate and collateral ligaments (to provoke healing response) using endoscopic approach	—

1.VN.87.^ ^ Excision partial, cruciate with collateral ligaments of knee**S** 4 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Resection, cruciate with collateral ligaments of knee (with or without meniscectomy or meniscoplasty)

1.VN.87.DA using endoscopic [arthroscopic] approach
 1.VN.87.GB using endoscopic (arthroscopic) approach with meniscectomy (or meniscoplasty)
 1.VN.87.LA using open approach
 1.VN.87.UY using open approach with meniscectomy [or meniscoplasty]

1.VP.^ ^.^ Therapeutic Interventions on the Patella

Includes: Knee cap
 Patellar ligaments
 Patellofemoral joint

1.VP.53.^ ^ Implantation of internal device, patella**S** 67 **L** 72

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 67	Mandatory	Mandatory Tx Status 16	Status	A	Abandoned after onset
				P	Primary (first insertion of a prosthetic component, patella or patellofemoral)
				R	Revision (replacement of previous prosthetic component, patella or patellofemoral)
L 72	Mandatory	Bilaterality Mandatory	Location	B	Bilateral
				L	Left
				R	Right
				U	Unilateral unspecified

- Includes:** Patellaplasty, using prosthetic implant device
Replacement, patella (only), using prosthetic device
Replacement, patellofemoral (only), using prosthetic device
- Excludes:** Replacement, patella with knee joint [femoral and tibial surfaces], using multi-component prosthetic device (see [1.VG.53.^^](#))
- Code Also:** Any robotic assisted telemanipulation of tools (see [7.SF.14.^^](#))

- 1.VP.53.LA-PM of uncemented single-component [patella only] prosthetic device using open approach
1.VP.53.LA-PM-N of cemented single-component [patella only] prosthetic device using open approach
1.VP.53.LA-PN of uncemented dual-component [patellofemoral] prosthetic device using open approach
Includes: Avon rigid patellofemoral arthroplasty [patellar prosthesis with femoral trochlear component]
1.VP.53.LA-PN-N of cemented dual-component [patellofemoral] prosthetic device using open approach
Includes: Avon rigid patellofemoral arthroplasty [patellar prosthesis with femoral trochlear component]

1.VP.55.^^ Removal of device, patella**S** 4 **L** 72

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 72	Mandatory	Bilaterality Mandatory	Location	B	Bilateral
				L	Left
				R	Right
				U	Unilateral unspecified

- 1.VP.55.LA-KD of wire/tension band (encirclage) using open approach
1.VP.55.LA-NW of screw/plate using open approach
1.VP.55.LA-PM of uncemented single-component prosthetic device using open approach
1.VP.55.LA-PM-N of cemented single-component prosthetic device using open approach

1.VP.56.^^ Removal of foreign body, patella**S** 4 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Removal of missile (e.g. bullet, metal fragment, carpenter's nail), patella that with debridement of site

Excludes: Removal of fixative device, patella (see [1.VP.55.^^](#))

1.VP.56.JA using external (manual extraction) approach
1.VP.56.LA using open approach

1.VP.72.^^ Release, patella

S 4 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Release, (lateral) retinaculum for patellar realignment

Excludes: that with chondroplasty of patellofemoral joint (see [1.VP.80.^^](#))
that with medial (patellar) plication or reefing (see [1.VP.80.^^](#))
that with patellar resurfacing (debridement) (see [1.VP.80.^^](#))

1.VP.72.DA using endoscopic (arthroscopic) approach
1.VP.72.LA using open approach

1.VP.73.^^ Reduction, patella

S 5 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Excludes: Reduction with fixation, patella (see [1.VP.74.^^](#))

1.VP.73.JA using closed [external] approach
1.VP.73.LA using open approach

1.VP.74.^.^ Fixation, patella**S** ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Debridement with fixation, patella
Reduction with fixation, patella

1.VP.74.HA-NW using percutaneous approach and plate, screw
 1.VP.74.LA-KD using open approach and wire, tension band (encirclage)
 1.VP.74.LA-KD-N using open approach and synthetic tissue with wire, tension band
 1.VP.74.LA-NW using open approach and screw/plate
 1.VP.74.LA-XX-N using open approach and synthetic tissue [e.g. bone cement or paste]

1.VP.80.^.^ Repair, patella**S** ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Chondroplasty, patellofemoral joint
Debridement, patella with retinacular release
Debridement, patellofemoral joint (compartment)
Patellaplasty with interpositional graft
Plication, (medial) patellar with or without debridement
Reefing, medial patellar with or without debridement
Resurfacing, patella
Shaving, patella (to resurface)
Trochleoplasty
- Excludes:** Retinacular release alone (see [1.VP.72.^^](#))
- Code Also:** Any concomitant medial patellofemoral ligament reconstruction by tendon graft/transfer (see [1.VS.80.^^](#))
Any concomitant patellar tendon transfer used for cruciate ligament repair (see [1.VL.80.^^](#))
Any concomitant stabilization, patella using tendon transfer (see [1.VS.80.^^](#))
Any concomitant tibial tubercle transfer (see [1.VS.80.^^](#))
- Omit code:** when resurfacing/shaving of patella is in preparation for tri-component knee replacement (see [1.VG.53.^^](#)) or patellar/patellofemoral replacement (see [1.VP.53.^^](#))

1.VP.80.DA using endoscopic [arthroscopic] approach
1.VP.80.LA using open approach and simple repair (for tissue regeneration)
1.VP.80.LA-XX-A using open approach and autograft [e.g. bone, interpositional fascia]

1.VP.87.^^ Excision partial, patella

S ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Patellectomy, partial
- Excludes:** Debridement, patellofemoral joint (compartment) (see [1.VP.80.^^](#))
Resurfacing, patella [shaving] (see [1.VP.80.^^](#))

1.VP.87.DA using endoscopic [arthroscopic] approach
1.VP.87.LA using open approach

1.VP.89.^.^ Excision total, patella**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Patellectomy, total**Excludes:** Patellectomy with prosthetic replacement (see [1.VP.53.^.^](#))

1.VP.89.LA using open approach

1.VQ.^.^.^ Therapeutic Interventions on the Tibia and Fibula

Includes: Epiphysis of tibia and fibula
 Fibula NOS
 Neck of fibula
 Periosteum of tibia and fibula
 Skeletal tissue below knee and above ankle
 Tibia NOS
 Tuberosity of tibia

Excludes: Articular surface of distal tibia and fibula (ankle) (see [1.WA.^.^.^](#))
 Articular surface of proximal tibia and fibula (knee) (see [1.VG.^.^.^](#))
 Condyle [medial and lateral] of tibia (see [1.VG.^.^.^](#))
 Head of tibia and fibula (see [1.VG.^.^.^](#))
 Malleolus [medial and lateral] (see [1.WA.^.^.^](#))
 Tibial plateau (see [1.VG.^.^.^](#))

1.VQ.03.^ ^ Immobilization, tibia and fibula**S** ¹² **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 12	Optional	Tx Status 7	Status	R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Application, external immobilization device, tibia and fibula
Removal with replacement, external immobilization device, tibia and fibula

1.VQ.03.^ ^ Immobilization, tibia and fibula	immobilization alone	with external traction [e.g. skin]	with percutaneous traction [e.g. skeletal]
using bracing device	1.VQ.03.JA-EQ	—	—
using cast [e.g. support, weight bearing]	1.VQ.03.JA-FQ	1.VQ.03.JZ-FQ	1.VQ.03.HA-FQ
using external fixator [percutaneous pin, wire]	—	—	1.VQ.03.HA-KC
using pneumatic orthoses device	1.VQ.03.JA-MM	—	—
using splinting device	1.VQ.03.JA-SR	1.VQ.03.JZ-SR	1.VQ.03.HA-SR
using traction alone	—	1.VQ.03.JZ-TA	1.VQ.03.HA-TA

1.VQ.09.^ ^ Stimulation, tibia and fibula**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Cutaneous stimulation, tibia and fibula
Insertion, bone growth stimulator, tibia and fibula

1.VQ.09.HA-JA	using percutaneously inserted electrodes [e.g. bone growth stimulator]
1.VQ.09.JA-AQ	using external magnets [e.g. pulsating electro magnet field-PEMF]
1.VQ.09.JA-JA	using externally applied electrodes (e.g. under cast)

1.VQ.35.^.^ Pharmacotherapy (local), tibia and fibula**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Cleansing, tibia and fibula (open wound fracture)
Irrigation, tibia and fibula

Excludes: that concomitant with (open) reduction of tibia and fibula (see [1.VQ.73.^.](#))
that concomitant with fixation of tibia and fibula (see [1.VQ.74.^.](#))

1.VQ.35.JA-D1	using external approach and anti infective irrigating solution
	Includes: chlorhexidine, neomycin
1.VQ.35.JA-D2	using external approach and salt irrigating solution
	Includes: sodium chloride
1.VQ.35.JA-D3	using external approach and other irrigating solution
	Includes: sorbitol, mannitol
1.VQ.35.LA-K8	using open approach and antibacterial agent (e.g. gentamycin beads)

1.VQ.38.^.^ Management of external appliance, tibia and fibula**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Adjusting appliance, tibia and fibula
 Applying and removing traction weights, (for) tibia and fibula
 Removal, external immobilization or traction device, tibia and fibula

Excludes: Removal with replacement, external immobilization device (see [1.VQ.03.^^](#))

1.VQ.38.HA-KC of percutaneous external fixator
 1.VQ.38.HA-TA of skeletal traction device
 1.VQ.38.JA-EQ of bracing device
 1.VQ.38.JA-FQ of cast
 1.VQ.38.JA-MM of pneumatic orthoses device
 1.VQ.38.JA-SR of splinting device
 1.VQ.38.JZ-TA of skin traction device

1.VQ.52.^^ Drainage, tibia and fibula

S ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Drainage, tibial and fibular cyst

1.VQ.52.HA using percutaneous (needle) approach
 1.VQ.52.HA-J2 using percutaneous (needle) approach and steroid infiltration
 1.VQ.52.HA-XX-A using percutaneous (needle) approach and bone marrow packing

1.VQ.55.^ ^ Removal of device, tibia and fibula**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

1.VQ.55.LA-DV of electronic stimulation device using open approach
 1.VQ.55.LA-K8 of antibacterial agent (e.g. gentamycin beads) using open approach
 1.VQ.55.LA-KD of wire/mesh/staple using open approach
 1.VQ.55.LA-LQ of intramedullary nail using open approach
 1.VQ.55.LA-NV of pin/nail using open approach
 1.VQ.55.LA-NW of plate/screw using open approach
 1.VQ.55.LA-PM of endoprosthesis using open approach

1.VQ.56.^ ^ Removal of foreign body, tibia and fibula**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Removal of missile (e.g. bullet, metal fragment, carpenter's nail), tibia that with debridement of site

Excludes: Removal of fixative device, tibia and fibula (see [1.VQ.55.^ ^](#))

1.VQ.56.JA using external (manual extraction) approach
 1.VQ.56.LA using open approach

1.VQ.58.^ ^ Procurement, tibia and fibula**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

1.VQ.58.LA-XX-A of bone autograft using open approach
 1.VQ.58.LA-XX-F of free flap [e.g. fibular flap] using open approach

1.VQ.59.^ ^ Destruction, tibia and fibula**S** ⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Sclerotherapy, tibia and fibula, intralesional [e.g. aneurysmal bone cyst]

Excludes: Osteoclasia, tibia and fibula (see [1.VQ.80.^ ^](#))

1.VQ.59.HA-AW using percutaneous (needle) approach with radiofrequency probe
Includes: Radiofrequency ablation (RFA), tibia and fibula
 1.VQ.59.HA-X7 using percutaneous (needle) approach with chemical agents (e.g. Ethibloc, zein)

1.VQ.73.^ ^ Reduction, tibia and fibula**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Reduction with debridement, tibia and fibula that with irrigation, open fracture wound, tibia and fibula
- Excludes:** Reduction, head and neck of tibia and fibula (see [1.VG.73.^^](#)) that with fixation, tibia and fibula (see [1.VQ.74.^^](#))
- Code Also:** Any concomitant application of traction (see [1.VQ.03.^^](#)) Any concomitant cast immobilization (see [1.VQ.03.^^](#))

1.VQ.73.JA using closed (external) approach
1.VQ.73.LA using open approach

1.VQ.74.^^ Fixation, tibia and fibula**S 5 L 50**

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 50	Optional	Long bones 1	Location	B	Bilateral
				L	Left [shaft or NOS]
				L D	Left distal
				L E	Left epiphysis
				L P	Left proximal (trochanter)
				R	Right [shaft or NOS]
				R C	Right epiphysis
				R D	Right distal
				R P	Right proximal (trochanter)

- Includes:** Debridement with fixation, tibia and fibula
Epiphysiodesis, tibia and fibula
Reduction with fixation, tibia and fibula that for non union repair, tibia and fibula that to arrest bone growth, tibia and fibula (i.e. physeal arrest) that with irrigation, open fracture wound, tibia and fibula
- Excludes:** Fixation, head and neck of tibia and fibula (see [1.VG.74.^^](#))
Fixation, tibial condyle or plateau (see [1.VG.74.^^](#))

1.VQ.74.^ Fixation, tibia and fibula	no tissue used	with bone autograft	with bone homograft	with combined sources of tissue [e.g. bone graft, cement/paste]	with synthetic tissue [e.g. bone cement, or paste]
open approach					
using intramedullary nail	1.VQ.74.LA-LQ	1.VQ.74.LA-LQ-A	1.VQ.74.LA-LQ-K	1.VQ.74.LA-LQ-Q	1.VQ.74.LA-LQ-N
using pin, nail	1.VQ.74.LA-NV	1.VQ.74.LA-NV-A	1.VQ.74.LA-NV-K	1.VQ.74.LA-NV-Q	1.VQ.74.LA-NV-N
using plate, screw	1.VQ.74.LA-NW	1.VQ.74.LA-NW-A	1.VQ.74.LA-NW-K	1.VQ.74.LA-NW-Q	1.VQ.74.LA-NW-N
using wire, mesh, staple	1.VQ.74.LA-KD	1.VQ.74.LA-KD-A	1.VQ.74.LA-KD-K	1.VQ.74.LA-KD-Q	1.VQ.74.LA-KD-N
using no fixative device [e.g. for epiphysiodesis]	1.VQ.74.LA	—	—	—	—
percutaneous approach [e.g. with closed or no reduction]					
using pin, nail	1.VQ.74.HA-NV	—	—	—	—
using intramedullary nail	1.VQ.74.HA-LQ	—	—	—	—
using plate, screw	1.VQ.74.HA-NW	—	—	—	—
using wire	1.VQ.74.HA-KD	—	—	—	—
using no fixative device [e.g. for epiphysiodesis]	1.VQ.74.HA	—	—	—	—

1.VQ.79.^ Repair by increasing size, tibia and fibula**S** 5 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Corticotomy with distraction, tibia and fibula
Distraction, tibia and fibula
Lengthening, tibia and fibula
Osseodistraction, tibia and fibula
Osteotomy (transverse) with distraction, tibia and fibula

Excludes: Osteotomy, lengthening, tibia and fibula using bone graft (see [1.VQ.80.^](#))

1.VQ.79.HA-MG	using percutaneous approach and distraction device [e.g. hinged, Ilizarov]
1.VQ.79.LA-MG	using open approach and distraction device [e.g. hinged, Ilizarov]

1.VQ.80.^ Repair, tibia and fibula**S** 5 **L** 51

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 51	Optional	Long bones 2	Location	B	Bilateral
				L	Left [shaft or NOS]
				L D	Left distal
				L P	Left proximal (trochanter)
				R	Right [shaft or NOS]
				R D	Right distal
				R P	Right proximal (trochanter)

Includes: Correction, [congenital] absence of tibia using fibula transfer [to femoral intercondylar notch]
 Osteoclasia, tibia and fibula
 Osteotomy, high tibial
 Osteotomy, tibia and fibula

Excludes: Osteotomy, lengthening, tibia and fibula using distraction (see [1.VQ.79.^](#))
 Rotation flap, tibia and fibula concomitant with limb- sparing resection (see [1.VQ.91.^](#))
 Van Nes derotational osteotomy (see [1.VC.80.^](#))

Code Also: Any concomitant tendon transfer [e.g. patellar with or without tubercle] (see [1.VS.80.^](#))

1.VQ.80.^ Repair, tibia and fibula	no tissue used (for repair)	with autograft [e.g. bone, tendon]	with bone homograft	with combined sources of tissue [e.g. bone graft, cement/paste]	with synthetic tissue [e.g. bone cement, paste]
no device used	1.VQ.80.LA	—	—	—	1.VQ.80.LA-XX-N
using pin, nail	1.VQ.80.LA-NV	1.VQ.80.LA-NV-A	1.VQ.80.LA-NV-K	1.VQ.80.LA-NV-Q	1.VQ.80.LA-NV-N
using plate, screw	1.VQ.80.LA-NW	1.VQ.80.LA-NW-A	1.VQ.80.LA-NW-K	1.VQ.80.LA-NW-Q	1.VQ.80.LA-NW-N
using wire, mesh, staple	1.VQ.80.LA-KD	1.VQ.80.LA-KD-A	1.VQ.80.LA-KD-K	1.VQ.80.LA-KD-Q	1.VQ.80.LA-KD-N
using intramedullary nail	1.VQ.80.LA-LQ	—	—	—	—

1.VQ.82.^ ^ Reattachment, tibia and fibula**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Reattachment, below knee**Note:** Involves microsurgical technique to reestablish vascular and neural function.

1.VQ.82.LA using simple apposition technique [e.g. suturing]
 1.VQ.82.LA-NW using screw/plate fixation with apposition technique
 1.VQ.82.LA-NW-A using screw/plate fixation with bone autograft
 1.VQ.82.LA-NW-N using screw/plate fixation with synthetic tissue [e.g. bone cement or paste]
 1.VQ.82.LA-XX-F using free flap [e.g. myocutaneous or composite bone flap]

1.VQ.83.^ ^ Transfer, tibia and fibula**S** ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Cementing only, tibia and fibula [e.g. for repair of non union]
 Debridement with bone graft, tibia and fibula
 Graft (bone/paste) only, tibia and fibula [e.g. for repair of non union]
 Sequestrectomy with bone graft (alone), tibia and fibula

Excludes: Osteotomy with bone graft, tibia and fibula (see [1.VQ.87.^^](#))
 Sequestrectomy with fixation, tibia and fibula (see [1.VQ.87.^^](#))
 that with fixation, tibia and fibula (see [1.VQ.74.^^](#))
 that with osteotomy, tibia and fibula (see [1.VQ.87.^^](#))
 that with osteotomy, tibia (see [1.VQ.80.^^](#))
 that with reduction and fixation (see [1.VQ.74.^^](#))

1.VQ.83.LA-XX-A using bone autograft
 1.VQ.83.LA-XX-K using bone homograft
 1.VQ.83.LA-XX-N using synthetic tissue [e.g. bone cement, paste]
 1.VQ.83.LA-XX-Q using combined sources of tissue [e.g. bone graft, cement/paste]

1.VQ.87.^^ Excision partial, tibia and fibula

S 4 **L** 51

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 51	Optional	Long bones 2	Location	B	Bilateral
				L	Left [shaft or NOS]
				L D	Left distal
				L P	Left proximal (trochanter)
				R	Right [shaft or NOS]
				R D	Right distal
				R P	Right proximal (trochanter)

Includes: Debridement, tibia and fibula
 Osteotomy, tibia and fibula
 Sequestrectomy NOS, tibia and fibula

Excludes: Debridement with bone graft, tibia and fibula [e.g. for non union] (see [1.VQ.83.^^](#))
 Debridement with reduction and fixation, tibia and fibula (see [1.VQ.74.^^](#))
 Debridement with reduction, tibia and fibula (see [1.VQ.73.^^](#))
 Resection, limb sparing, tibia and fibula (see [1.VQ.91.^^](#))
 Sequestrectomy with bone graft (alone), tibia and fibula (see [1.VQ.83.^^](#))

Note: Involves resection of the tibia/fibula [e.g. neoplasm] which usually requires concomitant stabilization of the surgical defect often by grafting and applying fixative devices but occasionally by bone flap reconstruction. (The definitive intervention is the resection however there may be a significant salvage component to manage the surgical wound).

Omit code: When osteotomy is done for prosthetic replacement of knee joint (see [1.VG.53.^^](#)) or ankle joint (see [1.WA.53.^^](#))

1.VQ.87.^ ^ Excision partial, tibia and fibula	no tissue used (for closure of defect)	with bone autograft	with bone homograft	with combined sources of tissue [e.g. graft, flap, bone cement]	with free flap [e.g. fibular flap]	with pedicled flap [e.g. myocutaneous flap]	with synthetic tissue [e.g. bone cement or paste]

				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Amputation, below knee

Excludes: Amputation with concomitant Van Nes rotation plasty (see [1.VC.91.^ ^](#))
 Disarticulation, through ankle joint (see [1.WA.93.^ ^](#))
 Disarticulation, through knee joint (see [1.VG.93.^ ^](#))
 Limb-sparing resection, tibia and fibula (see [1.VQ.91.^ ^](#))

1.VQ.93.LA	using simple apposition technique [e.g. suturing] (for closure of stump)
	Includes: Guillotine technique
1.VQ.93.LA-RV	using bone-anchored prosthetic bridge or stem implant device
1.VQ.93.LA-XX-A	using skin graft (for closure of stump)
1.VQ.93.LA-XX-E	using local flap [e.g. myoplasty, osteoperiosteal flap or myodesis] (for closure of stump)
1.VQ.93.LA-XX-Q	using combined sources of tissue [e.g. myoplasty or myodesis with free bone autograft] (to retain bony length and for closure of stump)

1.VR.^^.^^ Therapeutic Interventions on Muscles of Lower Leg [around knee]

- Includes:** Gastrocnemius, soleus muscles
Hamstring [biceps femoris, semitendinosus, semimembranosus]
Muscles of lower leg [around knee] NEC
Popliteus, quadriceps femoris, vastus medialis
- Excludes:** Muscles of ankle and foot (see [1.WV.^^.^^](#))
Muscles of hip and thigh (see [1.VD.^^.^^](#))
Neoplasm arising in or extending into muscles of lower leg [around knee] (see [1.VX.^^.^^](#))

1.VR.04.^^ Mobilization, muscles of lower leg [around knee]**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Myofascial release, lower leg [around knee and calf]
- Excludes:** Fasciotomy or fasciectomy for release of muscles of leg (see [1.VR.72.^^](#))
that concomitant with manipulation/adjustment of knee joint (see [1.VG.05.^^](#))
that concomitant with mobilization of knee joint (see [1.VG.04.^^](#))
- Note:** Involves moving, stretching and elongating soft tissue around knee and calf.

1.VR.04.JH using external approach with manual technique

1.VR.09.^^ Stimulation, muscles of lower leg [around knee]**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Application of electrodes, muscles of leg NEC
Electrostimulation, muscles of leg NEC

Excludes: Stimulation, muscles of hip and thigh (see [1.VD.09.^^](#))

1.VR.09.HA-CH using percutaneous approach and needle
Includes: Dry needling for (trigger point) intramuscular stimulation, leg muscles

1.VR.09.HA-JA using percutaneous insertion of electrodes

1.VR.09.JA-AG using laser

1.VR.09.JA-AZ using ultrasound

1.VR.09.JA-DV using transcutaneous electric nerve stimulation [TENS]

1.VR.09.JA-DW using electrical neuromuscular stimulation [EMS]

1.VR.09.JA-DX using inferential stimulation

1.VR.09.JA-EE using functional electrical stimulation [FES]

1.VR.57.^^ Extraction, muscles of lower leg [around knee]**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Procurement, of gastrocnemius flap

1.VR.58.LA-XX-A of muscle graft using open approach

1.VR.58.LA-XX-F of free flap using open approach

Includes: Composite myocutaneous flap

1.VR.72.^.^ Release, muscles of lower leg [around knee]

S 4 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Fasciectomy, muscles of lower leg [around knee]
 Fasciotomy, muscles of lower leg [around knee]
 Release, compartment
 Release, contracture, muscles of lower leg [around knee]

1.VR.72.WJ using excisional technique [e.g. fasciectomy]

1.VR.72.WK using incisional technique [e.g. fasciotomy, myotomy]

1.VR.80.^.^ Repair, muscles of lower leg [around knee]

S 28 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 28	Optional	Treatment Status 3A	Status	D	Delayed (closure occurs > 24 hrs post trauma)
				R	Revision
				S	Staged
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Fascioplasty, muscles of lower leg [around knee]
 Fasciorrhaphy, muscles of lower leg [around knee]
 Myoplasty, muscles of lower leg [around knee]
 Myorrhaphy, muscles of lower leg [around knee]
 Rotation flap, muscles of lower leg [around knee]
 Suture, muscles of lower leg [around knee]

1.VR.80.LA	using open approach and apposition [suture, staple]
1.VR.80.LA-XX-A	using open approach and autograft [e.g. fascia]
1.VR.80.LA-XX-E	using open approach and local transposition flap [e.g. realignment, advancement]
1.VR.80.LA-XX-F	using open approach and free flap
1.VR.80.LA-XX-G	using open approach and pedicled flap
1.VR.80.LA-XX-N	using open approach and synthetic tissue [e.g. gortex, mesh, Silastic sheath]
1.VR.80.LA-XX-Q	using open approach and combined sources of tissue [e.g. graft/flap, mesh]

1.VR.87.^.^ Excision partial, muscles of lower leg [around knee]

S ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Excision of (non viable) muscle or composite flap of lower leg [around knee]

Excludes: Excision, muscle or tendon of leg (see [1.VX.87.^.](#))
 Procurement, muscles of lower leg [around knee] (see [1.VR.58.^.](#))
 Resection [neoplasm], soft tissue of leg any site (see [1.VX.87.^.](#))

1.VR.87.LA	using simple apposition technique [e.g. suture, staple] (for closure of surgical defect)
1.VR.87.LA-XX-A	using autograft [e.g. fascia or skin] (for closure of surgical defect)
1.VR.87.LA-XX-E	using local transposition flap [e.g. advancement muscle or Z-plasty skin flap] (for closure of defect)
1.VR.87.LA-XX-F	using free flap [e.g. myocutaneous free flap] (for closure of defect)
1.VR.87.LA-XX-Q	using combined sources of tissue [e.g. skin graft with flap] (for closure of defect)

1.VS.^.^ Therapeutic Interventions on Tendons of Lower Leg [around knee]

Includes: Patellar, quadriceps, semitendinosus, gastrocnemius and soleus

Excludes: Tendons of foot and ankle (see [1.WT.^.^](#))
 Tendons of thigh [around hip] (see [1.VE.^.^](#))

1.VS.58.^ Procurement, tendons of lower leg [around knee]**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Procurement, patellar tendon (with or without bone plug)
Procurement, quadriceps tendon

1.VS.58.LA-XX-A of autograft using open approach

1.VS.72.^ Release, tendons of lower leg [around knee]**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Tenolysis, lower leg
Tenosynovectomy [for release], lower leg

Omit code: When release is part of tendon transfer or repair (see [1.VS.80.^](#))

1.VS.72.DA using endoscopic approach

1.VS.72.LA using open approach

1.VS.80.^.^ Repair, tendons of lower leg [around knee]**S** ⁷ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 7	Optional	Tx Status 3	Status	A	Abandoned after onset
				D P	Delayed primary (repair occurring 2 to 14 days post trauma)
				D S	Delayed secondary (repair occurring >14 days post trauma)
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Advancement, vastus medialis obliquus (VMO)
 Quadricepsplasty
 Reconstruction, medial patellofemoral ligament using tendon graft/transfer
 Stabilization, Roux Goldthwait
 Suture, [ruptured] tendon of lower leg
 Tendinoplasty with tenodesis, lower leg
 Tendinoplasty, lower leg
 Tendinorrhaphy, lower leg
 Tenodesis, lower leg
 Transfer, tendon (patellar)
 Transfer, tendon of lower leg
 Transfer, tibial tubercle [involving patellar tendon]

Excludes: that for reconstruction of collateral ligaments (see [1.VN.80.^.^](#))
 that for reconstruction of cruciate and collateral ligaments (see [1.VN.80.^.^](#))
 that for reconstruction of cruciate ligaments (see [1.VL.80.^.^](#))

1.VS.80.^.^ Repair, tendons of lower leg [around knee]	using apposition technique [tendon sutured to tendon]	using tenodesis technique [tendon looped or sutured [anchored] to or through bone]	using tenodesis with screw fixation [tendon with a bone plug fixed to bone with screw]
simple repair (without graft or transfer involved)	1.VS.80.LA	1.VS.80.WU	1.VS.80.WU-NW
with autograft [e.g. tendon, fascia]	1.VS.80.LA-XX-A	1.VS.80.WU-XX-A	1.VS.80.WU-NW-A
with combined sources of tissue [autograft, tendon transfer, gortex]	1.VS.80.LA-XX-Q	1.VS.80.WU-XX-Q	1.VS.80.WU-NW-Q
with synthetic tissue [e.g. gortex, mesh]	1.VS.80.LA-XX-N	1.VS.80.WU-XX-N	1.VS.80.WU-NW-N
with tendon transfer for realignment [e.g. advancement, transposition]	1.VS.80.LA-XX-E	1.VS.80.WU-XX-E	1.VS.80.WU-NW-E
with homograft	1.VS.80.LA-XX-K	1.VS.80.WU-XX-K	1.VS.80.WU-NW-K

1.VX.^.^ Therapeutic Interventions on Soft Tissue of Leg

- Includes:** Neoplasm arising in or extending as deep as muscle or tendon, lower leg
Soft tissue of buttock, hip, thigh and leg
Soft tissue of leg (any site)
Wound of leg
- Excludes:** Skin and subcutaneous tissue of leg alone (see [1.YV.^.^](#))
Soft tissue neoplasm extending into bone (see femur [1.VC.^.^](#) or tibia and fibula [1.VQ.^.^](#))
Soft tissue of foot only (see [1.WV.^.^](#))

1.VX.06.^.^ Hypothermy, soft tissue of leg**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Application of cold, soft tissue of leg
Cryotherapy, soft tissue of leg
that to reduce swelling, pain, etc.

1.VX.06.JA-KL using cold (dry) device [e.g. cold pack]
1.VX.06.JA-KM using cold (moist) device [e.g. compress]

1.VX.07.^.^ Hyperthermy, soft tissue of leg**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Application, heat, soft tissue of leg
Diathermy, soft tissue of leg
- Excludes:** Hyperthermy, ankle joint (see [1.WA.07.^](#))
Hyperthermy, hip joint (see [1.VA.07.^](#))
Hyperthermy, knee joint (see [1.VG.07.^](#))
Hyperthermy, multiple body sites (see [1.ZX.07.^](#))

1.VX.07.JA-CG	using microwave
1.VX.07.JA-DU	using infrared device [e.g. lamp, baker]
1.VX.07.JA-DZ	using short wave
1.VX.07.JA-HB	using other diathermy device NEC
1.VX.07.JA-KH	using externally applied dry heat [e.g. heating pad]
1.VX.07.JA-KJ	using externally applied moist heat [e.g. compress, bath]
1.VX.07.JA-KQ	using paraffin
1.VX.07.JA-TR	using whirlpool

1.VX.12.^ Therapy, soft tissue of leg

L²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Phototherapy, leg
Physiotherapy NOS, soft tissue of leg

Excludes: Exercise therapy of knee (see [1.VG.02.^](#)) of hip (see [1.VA.02.^](#))
 Exercise therapy of leg NOS (see [1.VZ.02.^](#))
 Hyperthermy treatment alone (see [1.VX.07.^](#))
 Hypothermy treatment alone (see [1.VX.06.^](#))
 Phototherapy or laser therapy of hip alone (see [1.VA.12.^](#))
 Phototherapy or laser therapy of knee alone (see [1.VG.12.^](#))
 Therapy (photo, laser, massage) specifically for joints (hip [1.VA.12.^](#) or knee [1.VG.12.^](#))

1.VX.12.JA using other technique NEC
 1.VX.12.JA-DQ using ultraviolet light
 1.VX.12.JA-DU using light NEC [e.g. long wave red light]
 1.VX.12.JA-UE using vibrating device
 1.VX.12.JD using acupressure technique
Includes: Reflexology, piriformis muscle (syndrome) adjustment
 1.VX.12.JJ using massage technique
Excludes: Massage (lower) body (see [1.ZX.12.^](#))
 1.VX.12.JP using therapeutic touch technique

1.VX.13.^ Control of bleeding, soft tissue of leg

L²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Control of bleeding (wound) extending into soft tissue (muscle or tendon) of leg

Excludes: Application of pressure dressing for control of bleeding soft tissue wound of leg (see [1.YV.14.^^](#))
 Control of bleeding by suture/staple repair of muscle of hip and thigh (see [1.VD.80.^^](#))
 Control of bleeding by suture/staple repair of muscle of leg around knee (see [1.VR.80.^^](#))
 Control of bleeding by suture/staple repair of muscle of lower leg around ankle (see [1.WV.80.^^](#))
 Control of bleeding involving suture repair of tendon of hip and thigh (see [1.VE.80.^^](#))
 Control of bleeding involving suture repair of tendon of leg around knee (see [1.VS.80.^^](#))
 Control of bleeding involving suture repair of tendon of lower leg around ankle (see [1.WT.80.^^](#))
 Control of bleeding skin (wound) of leg only (see [1.YV.13.^^](#))
 Repair of artery (bleeder) of leg (see [1.KG.80.^^](#))
 Repair of vein of leg for control of bleeding (see [1.KR.80.^^](#))
 Systemic pharmacotherapy for control of bleeding (see [1.ZZ.35.^^](#))

1.VX.13.HA-C2 using percutaneous injection of antihemorrhagic agent
Includes: aminocaproic acid, aprotinin, phytonadione, thrombin, coagulation factor VIII
 1.VX.13.JA-C2 using topical antihemorrhagic agent
 1.VX.13.JN using external manual compression

1.VX.26.^^ Brachytherapy, soft tissue of leg

S 35

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 35	Optional	Implant Status	Status	P M	Permanent implant – Radioactive source left in place permanently
				T M	Temporary implant – Radioactive source removed after course of treatment is complete

Includes: Endocurietherapy, soft tissue of leg
 Implantation of radioactive material, soft tissue of leg
 Interstitial radiation therapy, soft tissue of leg

Excludes: Brachytherapy of skin of leg alone (see [1.YV.26.^^](#))

Code Also: Any concomitant implantation of brachytherapy applicators or conduits [e.g. needles, catheters] to gain access to treatment site (see [1.VX.53.^^](#))

Note: There are typically two distinct phases required to complete the process of brachytherapy. The first phase involves the insertion of non-radioactive applicators or conduits [e.g. hollow needles, catheters, stents etc.] that receive or transmit the radioactive material into the body. The second phase involves the after loading of the radioactive material [e.g. seeds, pellets, wires, etc.] into the applicator or conduit.

1.VX.26.HA using percutaneous (transcatheter or transneedle) approach
 1.VX.26.LA using open approach

1.VX.27.^ ^ Radiation, soft tissue of leg**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Teletherapy, soft tissue of leg and foot
Therapy, radiation [radiotherapy], soft tissue of leg and foot

Excludes: Radiation therapy involving bones of leg and foot (see [1.VZ.27.^ ^](#))
Radiation therapy involving skin of leg and foot alone (see [1.YV.27.^ ^](#))

Note: Involves irradiation of muscle, fascia or tendon

1.VX.27.JA using external beam

1.VX.35.^ ^ Pharmacotherapy (local), soft tissue of leg**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Cleanse, wound of leg
Injection of agent, soft tissue of leg
Instillation, wound of leg
Irrigation, soft tissue (wound) of leg
Trigger point injection, soft tissue of leg

Excludes: Irrigation concomitant with drainage (see [1.VX.52.^ ^](#))
Irrigation for removal of foreign body (see [1.VX.56.^ ^](#))
Systemic pharmacotherapy (see [1.ZZ.35.^ ^](#))
that for control of bleeding (see [1.VX.13.^ ^](#))
that for skin of leg (see [1.YV.35.^ ^](#))

1.VX.35.^ ^ Pharmacotherapy (local), soft tissue of leg	direct instillation [into wound]	percutaneous approach
using antiinfective irrigating solution	1.VX.35.JA-D1 Includes: • chlorexidine, neomycin	—
using salt irrigating solution	1.VX.35.JA-D2 Includes: • sodium chloride	—
using other irrigating solution	1.VX.35.JA-D3 Includes: • sorbitol, mannitol	—
using analgesic agent	1.VX.35.JA-P2 Includes: • opioids (morphine, meperidine), acetylsalicylic acid, acetaminophen, ergotamine, sumatriptan	1.VX.35.HA-P2 Includes: • opioids (morphine, meperidine), acetylsalicylic acid, acetaminophen, ergotamine, sumatriptan
using antiinfective NEC	1.VX.35.JA-K0	1.VX.35.HA-K0
using pharmacological agent NEC	1.VX.35.JA-T9	1.VX.35.HA-T9
using bacterial toxin (e.g. botulinum toxin or Botox)	—	1.VX.35.HA-L7
using local anesthetic agent	1.VX.35.JA-P1	1.VX.35.HA-P1
using corticosteroid agent	—	1.VX.35.HA-J2

1.VX.52.^ ^ Drainage, soft tissue of leg**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Drainage of abscess or hematoma, soft tissue of leg
Marsupialization [cyst], leg

1.VX.52.HA	using percutaneous (needle) approach
1.VX.52.HA-TS	using percutaneous approach with drainage tube left in situ
1.VX.52.LA	using open (incisional) approach

1.VX.53.^ ^ Implantation of internal device, soft tissue of leg**S**⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Implantation, brachytherapy applicator, soft tissue of leg

Code Also: Any concomitant loading of brachytherapy applicator (see [1.VX.26.^ ^](#))

1.VX.53.HA-EM of brachytherapy applicator using percutaneous approach
 1.VX.53.LA-EM of brachytherapy applicator using open approach

1.VX.55.^ ^ Removal of device, soft tissue of leg**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Removal of device, wound of leg

1.VX.55.JA-EB of radioactive implant using external approach
 1.VX.55.JA-FF of closure device (e.g. suture) using external approach
 1.VX.55.JA-GX of device NEC using external approach
 1.VX.55.JA-TS of wound drain or drainage catheter using external approach
 1.VX.55.LA-EB of radioactive implant using open approach

1.VX.56.^ ^ Removal of foreign body, soft tissue of leg**S**⁴ **L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Extraction of (superficial, embedded) foreign body, soft tissue of leg

Note: May involve the use of pulsatile jet lavage or irrigation to facilitate complete removal of foreign body debris.

1.VX.56.JA using external (for simple extraction) approach
1.VX.56.LA using open (incisional) technique

1.VX.59.^ ^ Destruction, soft tissue of leg

S ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Ablation, soft tissue [neoplasm] of leg
Debridement, amputation stump, of leg
Debridement, extending into soft tissue (fascia, muscle or tendon) of leg
Myoclasia, lower leg [around knee]
Trimming, amputation stump, of leg

Excludes: Debridement, soft tissue wound or amputation stump involving foot and ankle (see [1.WV.59.^ ^](#))
Partial chemodenervation of muscles of leg (e.g. for clubfoot relaxation) using botulinum (see [1.VX.35.^ ^](#))
Reamputation, above knee (see [1.VC.93.^ ^](#))
Reamputation, below knee (see [1.VQ.93.^ ^](#))

1.VX.59.LA-AG using laser
1.VX.59.LA-GX using device NEC
1.VX.59.LA-X7 using chemical cautery agent

1.VX.87.^.^ Excision partial, soft tissue of leg**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Resection lesion of soft tissue (extending into fascia, muscle or tendon) of leg

Excludes: Debridement, amputation stump, of leg (see [1.VX.59.^.](#))
 Debridement, soft tissue wound or amputation stump of foot (see [1.WV.59.^.](#))
 Excision of lesion of soft tissue (extending into fascia, muscle or tendon) involving foot with leg (see [1.WV.87.^.](#))
 Radical excision of soft tissue lesion of leg involving resection of femur (see [1.VC.91.^.](#))
 Radical excision of soft tissue lesion of leg involving resection of tibia or fibula (see [1.VQ.91.^.](#))
 Resection, soft tissue [fascia, muscle, tendon] of leg with concomitant osteotomy of femur (see [1.VC.91.^.](#))
 Resection, soft tissue [fascia, muscle, tendon] of leg with concomitant osteotomy of tibia or fibula (see [1.VQ.91.^.](#))
 Simple debridement, soft tissue wound (extending into fascia, muscle, tendon) of leg (see [1.VX.59.^.](#))

Omit code: Whenever resection is extended to include bone.

1.VX.87.LA	using simple apposition technique [e.g. suture, staple] (for closure of surgical defect)
1.VX.87.LA-XX-A	using autograft [e.g. fascia or skin] (for closure of surgical defect)
1.VX.87.LA-XX-E	using local transposition flap [e.g. advancement muscle or Z-plasty skin flap] (for closure of defect)
1.VX.87.LA-XX-F	using free flap [e.g. myocutaneous free flap] (for closure of defect)
1.VX.87.LA-XX-Q	using combined sources of tissue [e.g. skin graft with flap] (for closure of defect)

1.VZ.^.^ Therapeutic Interventions on the Leg NEC**1.VZ.02.^.^ Exercise, leg NEC****L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes:	Dynamic splinting, leg Exercise, foot and leg Gait training Hydrotherapy, leg
Excludes:	that specifically for therapy of hip (see 1.VA.02.^) or knee (see 1.VG.02.^) or ankle (see 1.WA.02.^)
Code Also:	Any use of biofeedback (see 7.SP.59.^)
Note:	Involves assisting and supervising client in performing exercise that may or may not include using active or passive exercise techniques
1.VZ.02.YD	using exercise NOS
1.VZ.02.YK	using passive motion exercise
1.VZ.02.YN	using active range of motion exercise
1.VZ.02.YP	using functional training exercise [e.g. ambulation]
1.VZ.02.YQ	using resistive exercise
1.VZ.02.ZA	using aquatic exercise
1.VZ.02.ZB	using balance training exercise

1.VZ.27.^ Radiation, leg NEC**L**²

L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Traction, ankle

Excludes: Manual myofascial release only around ankle (see [1.WV.04.^ ^](#))
 Mobilization with concomitant manipulation, ankle (see [1.WA.05.^ ^](#))
 Traction for immobilization of fracture, ankle (see [1.WA.03.^ ^](#))

1.WA.04.JH using external approach with manual technique

1.WA.05.^ ^ Manipulation, ankle joint**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Joint adjustment, ankle
Mobilization with concomitant manipulation, ankle
Skeletal manipulation, ankle

Excludes: Massage, ankle (see [1.WA.12.^ ^](#))

1.WA.05.JH using external approach with manual technique

1.WA.07.^ ^ Hyperthermy, ankle joint**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Application, heat, ankle joint
Diathermy, ankle joint

Excludes: Hyperthermy, multiple body sites (see [1.ZX.07.^ ^](#))

1.WA.07.JA-CG	using microwave
1.WA.07.JA-DU	using infrared device [e.g. heat lamp, baker]
1.WA.07.JA-DZ	using short wave
1.WA.07.JA-EA	using conductive heat device
1.WA.07.JA-HB	using other diathermy device NEC
1.WA.07.JA-KH	using externally applied dry heat [e.g. heating pad]
1.WA.07.JA-KJ	using externally applied moist heat [e.g. soak, compress]
1.WA.07.JA-KQ	using paraffin
1.WA.07.JA-TR	using whirlpool

1.WA.12.^ ^ Therapy, ankle joint**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Phototherapy, ankle
 Physiotherapy NOS, ankle
 Therapy, laser, ankle joint (for pain reduction and promotion of healing)

Excludes: Exercise therapy, ankle joint (see [1.WA.02.^ ^](#))
 Hydrotherapy, ankle (see [1.WA.02.^ ^](#))
 Hyperthermy treatment of ankle joint (see [1.WA.07.^ ^](#))
 Hypothermy treatment of soft tissue of ankle (see [1.WV.06.^ ^](#))
 Therapy (photo, laser, massage) of soft tissue of ankle and foot (see [1.WV.12.^ ^](#))

1.WA.12.JA other technique NEC
 1.WA.12.JA-AG using laser NEC (with or without photosensitizing chemicals)
 1.WA.12.JA-DQ using ultraviolet light
 1.WA.12.JA-DU using light NEC [e.g. long wave red light]
 1.WA.12.JJ using massage technique

1.WA.35.^ ^ Pharmacotherapy (local), ankle joint**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description

				S	Unilateral (unspecified if right or left)

1.WA.55.DA-NW	of plate and/or screw using endoscopic approach
1.WA.55.JA-GX	of device NEC using external approach
1.WA.55.LA-K8	of antibacterial agent (e.g. gentamycin beads) using open approach
1.WA.55.LA-KD	of wire/staple using open approach
1.WA.55.LA-NV	of pin/nail using open approach
1.WA.55.LA-NW	of plate/screw using open approach
1.WA.55.LA-PM	of uncemented single-component prosthetic device using open approach
1.WA.55.LA-PM-N	of cemented single-component prosthetic device using open approach
1.WA.55.LA-PN	of uncemented dual-component [e.g. tibial and talar] prosthetic device using open approach
1.WA.55.LA-PN-N	of cemented dual-component [e.g. tibial and talar] prosthetic device using open approach
1.WA.55.LA-PP	of uncemented tri-component prosthetic device using open approach
1.WA.55.LA-PP-N	of cemented tri-component prosthetic device using open approach

1.WA.58.^ ^ Procurement, ankle joint**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Harvesting, ankle joint osteochondral tissue (cartilage)

1.WA.58.DA	using endoscopic [arthroscopic] approach
1.WA.58.HA	using percutaneous (needle) approach
1.WA.58.LA-XX-A	using open approach of (bone) autograft

1.WA.59.^ ^ Destruction, ankle joint**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes:

- Ablation, ankle joint using radionuclide
- Medical synoviorthesis, ankle joint
- Radiation synoviorthesis, ankle joint
- Radionuclide synovectomy, ankle joint
- Radiosynovectomy, ankle joint
- Radiosynoviorthesis, ankle joint

1.WA.59.HA-AW using percutaneous (needle) approach with radiofrequency probe
Includes: Radiofrequency ablation (RFA), ankle joint
 1.WA.59.HA-V1 using percutaneous (needle) approach with radioactive pharmaceutical agent [e.g. erbium 169, yttrium-90, P32]
 1.WA.59.HA-X7 using percutaneous (needle) approach with chemical agent NEC

1.WA.72.^ ^ Release, ankle joint**S** 4 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes:

- Arthrolysis, ankle joint
- Capsulotomy, ankle joint
- Lysis [adhesions], ankle joint
- Release, ligaments, ankle joint

Excludes:

- Exercise therapy [passive or active] of ankle alone (see [1.WA.02.^ ^](#))
- Ligament release with interpositional graft, ankle to prevent joint adhesions (see [1.WA.80.^ ^](#))
- Manual rupture of joint adhesions, ankle (see [1.WA.05.^ ^](#))
- Reduction of dislocated ankle (see [1.WA.73.^ ^](#))
- Release, ankle tendon [e.g. Achilles] (see [1.WT.72.^ ^](#))

Omit code: When any of the following interventions are performed concomitantly with the capsular release: joint excision [arthrectomy, chondrectomy, synovectomy], loose body extraction, ligament repair (see [1.WA.80.^ ^](#))

1.WA.72.DA using endoscopic [arthroscopic] approach
 1.WA.72.LA using open (incisional) approach

1.WA.73.^ ^ Reduction, ankle joint**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Debridement with reduction alone, ankle joint

Excludes: that with fixation, ankle joint (see [1.WA.74.^ ^](#))

1.WA.73.JA using closed (external) approach

1.WA.73.LA using open approach

1.WA.74.^ ^ Fixation, ankle joint**S** ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description

endoscopic [arthroscopic] approach					
using screw	1.WA.75.DA-NW	1.WA.75.DA-NW-A	—	1.WA.75.DA-NW-N	—

1.WA.80.^^ Repair, ankle joint

S 15 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 15	Optional	Tx Status 9	Status	A	Abandoned after onset
				C	Converted (from endoscopic to open approach)
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Arthroplasty, ankle joint
Capsulorrhaphy, ankle joint
Osteotomy, malleolar
Suture, capsule, ankle joint

Excludes: Arthroplasty for reduction and internal fixation, ankle (see [1.WA.74.^^](#))
Arthroplasty with implantation of prosthetic device, ankle (see [1.WA.53.^^](#))
Drilling of talus/dome of talus (see [1.WE.80.^^](#))

Code Also: Any concomitant repair of ankle ligaments (see [1.WB.80.^^](#))

Note: May involve multiple interventions on ankle joint, such as the following: joint excision [arthrectomy, chondrectomy or synovectomy], loose body extraction, capsular release or ligament resection

1.WA.80.^^ Repair, ankle joint	no tissue used (for joint repair)	with autograft [e.g. bone, cartilage, or tendon]
open approach		
using no fixative device	1.WA.80.LA	1.WA.80.LA-XX-A
using screw fixation (for malleolar osteotomy)	1.WA.80.LA-NW	1.WA.80.LA-NW-A
endoscopic [arthroscopic] approach		
using no fixative device	1.WA.80.DA	1.WA.80.DA-XX-A
using screw fixation (for malleolar osteotomy)	1.WA.80.DA-NW	1.WA.80.DA-NW-A
endoscopic [arthroscopic] approach using special incisional technique only [e.g. multiple burr holes for bone revascularization]		
using no fixative device	1.WA.80.GZ Includes: • Drilling of medial malleolus (for revascularization)	—

1.WA.83.^^ Transfer, ankle joint

S ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Autotransplantation, cultured chondrocyte cells, ankle joint
Therapy, chondrocyte gene, ankle joint

1.WA.83.DA-XX-P of cultured chondrocyte cells using endoscopic [arthroscopic] approach
1.WA.83.HA-XX-P of cultured chondrocyte cells using percutaneous approach

1.WA.87.^ ^ Excision partial, ankle joint**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Arthrectomy, ankle joint
 Cheilectomy, ankle joint
 Chondrectomy, ankle joint
 Debridement, ankle joint
 Extraction deposits, fragments, loose bodies
 Ganglionectomy, ankle joint
 Synovectomy, ankle joint

Excludes: Debridement with reduction alone, ankle joint (see [1.WA.73.^ ^](#))
 Radiosynovectomy, ankle joint (see [1.WA.59.^ ^](#))
 that with fixation, ankle joint (see [1.WA.74.^ ^](#))

Omit code: When any of the following interventions – ligament resection, capsular release – are performed concomitantly with any type of joint excision(s) such as arthrectomy, chondrectomy, extraction (deposits, fragments, loose bodies), synovectomy (see [1.WA.80.^ ^](#))

1.WA.87.^ ^ Excision partial, ankle joint	endoscopic [arthroscopic] approach	open approach
other joint excision [arthrectomy, chondrectomy, débridement] with or without synovectomy	1.WA.87.DA	1.WA.87.LA
synovectomy or ganglionectomy alone	1.WA.87.GB	1.WA.87.WJ

1.WA.93.^.^ Amputation, ankle joint**S** 10 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 10	Optional	Tx Status 5	Status	A	Abandoned after onset
				R	Revision
				S	Staged
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Amputation, Syme's
Amputation, through ankle joint

1.WA.93.LA	using simple apposition technique [e.g. suturing] (for closure of stump)
1.WA.93.LA-XX-A	using skin graft (for closure of stump)
1.WA.93.LA-XX-E	using local flap [myoplasty or myodesis] (for closure of stump)

1.WB.^.^ Therapeutic Interventions on the Foot Ligaments

Includes: Ankle ligaments
Calcaneofibular ligament
Deltoid ligament
Internal collateral, lateral, lateral collateral ligaments
Plantar ligament
Talocalcaneal ligament
Talofibular ligament
Tibiocalcaneal ligament
Tibiofibular ligament
Tibionavicular ligament

1.WB.80.^.^ Repair, foot ligaments**S** 5 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Augmentation, ligament of ankle (using peroneus brevis tendon)
 Repair, ligament of ankle [e.g. for laxity or instability]
 Tenodesis, peroneus brevis (for ankle instability)

1.WB.80.^.^ Repair, foot ligaments	using apposition technique [ligament sutured to ligament or tendon]	using tenodesis technique [tendon looped or sutured [anchored] to or through bone]	using tenodesis with screw fixation [tendon with a bone plug fixed to bone with screw]
simple repair (without graft or transfer involved)	1.WB.80.LA	1.WB.80.WU	1.WB.80.WU-NW
with autograft [e.g. tendon, fascia] for added length	1.WB.80.LA-XX-A	1.WB.80.WU-XX-A	1.WB.80.WU-NW-A
with homograft [e.g. tendon] for added length	1.WB.80.LA-XX-K	1.WB.80.WU-XX-K	1.WB.80.WU-NW-K
with tendon transfer for realignment [e.g. advancement, transposition]	1.WB.80.LA-XX-E	1.WB.80.WU-XX-E	1.WB.80.WU-NW-E

1.WB.87.^.^ Excision partial, foot ligaments**S** 4 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Excludes: that for capsular release of joint (see joint, release by site)

1.WB.87.LA using open approach

1.WE.^.^ Therapeutic Interventions on Tarsal Bones and Intertarsal Joints [hindfoot, midfoot]

- Includes:**
- Calcaneocuboid joint
 - Calcaneus
 - Capsule, cartilage and ligamentous attachments of intertarsal joints:
 - Cuboid
 - Cuboideonavicular joint
 - Cuneiform
 - Cuneocuboid joint
 - Cuneonavicular joint
 - Hindfoot NOS
 - Intercuneiform joint
 - Midfoot NOS
 - Midtarsal joint NEC
 - Navicular
 - Subtalar joint
 - Talar joint
 - Talocalcaneonavicular joint
 - Talus
 - Tarsal bones of midfoot (or hindfoot)
- Excludes:**
- Tarsal joint NOS (see tarsometatarsal joint [1.WJ.^.^](#))

1.WE.04.^.^ Mobilization, tarsal bones and intertarsal joints [hindfoot, midfoot]**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:**
- Traction, tarsal joints
- Excludes:**
- Manual myofascial release only of foot and ankle (see [1.WV.04.^.](#))
 - Mobilization with concomitant manipulation of tarsal joints (see [1.WE.05.^.](#))
 - Traction for immobilization of fracture, any part of foot and ankle (see [1.WA.03.^.](#))

1.WE.04.JH using external approach with manual technique

1.WE.05.^ ^ Manipulation, tarsal bones and intertarsal joints [hindfoot, midfoot]**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Joint adjustment, tarsal
Mobilization with concomitant manipulation, tarsal
Skeletal manipulation, tarsal joints

1.WE.05.JH using external approach with manual technique

1.WE.35.^ ^ Pharmacotherapy (local), tarsal bones and intertarsal joints [hindfoot, midfoot]**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Injection, intertarsal joint

1.WE.35.HA-J2 using percutaneous needle approach and corticosteroid agent
1.WE.35.HA-P1 using percutaneous needle approach and anesthetic agent
1.WE.35.HA-P2 using percutaneous needle approach and analgesic agent
1.WE.35.HA-T9 using percutaneous needle approach and pharmacological agent NEC
1.WE.35.LA-K8 using open approach and antibacterial agent (e.g. gentamycin beads)

1.WE.52.^ ^ Drainage, tarsal bones and intertarsal joints [hindfoot, midfoot]**S** ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Bursectomy, retrocalcaneal
Bursotomy, tendocalcaneal

1.WE.52.WJ using open excisional approach (e.g. bursectomy)
1.WE.52.WK using open incisional approach (e.g. bursotomy)

1.WE.53.^ ^ Implantation of internal device, tarsal bones and intertarsal joints [hindfoot, midfoot]**S** ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Arthroereisis, subtalar
Arthroplasty with implantation, [tarsal] spacer device, intertarsal joint
Implantation, midtarsal spacer device
Replacement, tarsal bone, using spacer device

1.WE.53.LA-SL of spacer device [e.g. Silastic spacer] using open approach

1.WE.55.^ ^ Removal of device, tarsal bones and intertarsal joints [hindfoot, midfoot]**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Removal, spacer device, midtarsal

1.WE.55.LA-KD of wire, staple using open approach
 1.WE.55.LA-NV of pin, nail using open approach
 1.WE.55.LA-NW of screw, plate and screw using open approach
 1.WE.55.LA-SL of spacer device [e.g. Silastic spacer] using open approach

1.WE.58.^ ^ Procurement, tarsal bones and intertarsal joints [hindfoot, midfoot]**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Procurement, calcaneus bone

1.WE.58.LA-XX-A of autograft using open approach

1.WE.59.^ ^ Destruction, tarsal bones and intertarsal joints [hindfoot, midfoot]**S** ⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Sclerotherapy, tarsal bone, intralesional [e.g. aneurysmal bone cyst]

1.WE.59.HA-AW using percutaneous (needle) approach with radiofrequency probe

Includes: Radiofrequency ablation (RFA), tarsal bones and intertarsal bones [hindfoot, midfoot]

1.WE.59.HA-X7 using percutaneous (needle) approach with chemical agents (e.g. Ethibloc, zein)

1.WE.72.^.^ Release, tarsal bones and intertarsal joints [hindfoot, midfoot]

S ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Release, capsule, hindfoot
Release, capsule, midtarsal joint(s)
Release, club foot

Excludes: Manual rupture of midtarsal joint adhesions (see [1.WE.05.^.](#))
that with arthroctomy (see [1.WE.80.^.](#))
that with other joint repair (see [1.WE.80.^.](#))
that with tarsal osteotomy (see [1.WE.80.^.](#))

Code Also: Any concomitant tendon release, (see [1.WT.72.^.](#))
Any concomitant tendon transfer or graft (see [1.WT.80.^.](#))

Omit code: When any of the following interventions are performed concomitantly with capsular release: joint excision [arthrectomy, chondrectomy], loose body extraction or ligament resection (see [1.WE.80.^.](#))

1.WE.72.LA using open approach

1.WE.73.^.^ Reduction, tarsal bones and intertarsal joints [hindfoot, midfoot]

S ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Debridement with reduction, tarsal bones or intertarsal joints
Excludes: that with fixation, tarsal bones or intertarsal joints (see [1.WE.74.^^](#))

1.WE.73.JA using closed (external) approach
 1.WE.73.LA using open approach

1.WE.74.^^ Fixation, tarsal bones and intertarsal joints [hindfoot, midfoot]

S ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Debridement with reduction and fixation, tarsal bones or intertarsal joints
 Fixation, calcaneus
 Fixation, talus
 Reduction with fixation, tarsal bones and intertarsal joints
Excludes: that resulting in midfoot/hindfoot fusion (see [1.WE.75.^^](#))

1.WE.74.^^ Fixation, tarsal bones and intertarsal joints [hindfoot, midfoot]	no tissue used	with autograft	with homograft	with combined sources of tissue [e.g. bone graft, cement/paste]	with synthetic tissue [e.g. bone cement or paste]
open approach					
using pin, nail	1.WE.74.LA-NV	1.WE.74.LA-NV-A	1.WE.74.LA-NV-K	1.WE.74.LA-NV-Q	1.WE.74.LA-NV-N

percutaneous approach					
using pin, nail	1.WE.74.HA-NV	—	—	—	—
using screw, plate and screw	1.WE.74.HA-NW	—	—	—	—
using wire, staple, tension band	1.WE.74.HA-KD	—	—	—	—

1.WE.75.^ Fusion, tarsal bones and intertarsal joints [hindfoot, midfoot]**S** ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes:

Arthrodesis, hindfoot
 Arthrodesis, midfoot
 Arthrodesis, pantalar
 Arthrodesis, subtalar
 Arthrodesis, talonavicular
 Arthrodesis, tibiocalcaneal
 Arthrodesis, tibiotalar
 Arthrodesis, triple
 Astragalectomy with arthrodesis, intertarsal
 Fusion, hindfoot
 Fusion, midfoot
 Fusion, midtarsal
 Talcotomy with arthrodesis, intertarsal

Excludes:

Arthrodesis, forefoot (see metatarsophalangeal joint [1.WJ.75.^](#))
 Arthrodesis, tibiotalar (see ankle joint [1.WA.75.^](#))

Code Also:

Any concomitant tendon release (see [1.WT.72.^](#))
 Any concomitant tendon transfer or graft (see [1.WT.80.^](#))

Note:

May involve removal of tarsal bone [e.g. astragalus or talus] with articular denuding and reinsertion of the tarsal bone as a bone graft for midfoot fusion.

1.WE.75.^.^ Fusion, tarsal bones and intertarsal joints [hindfoot, midfoot]	no tissue used (for fusion) [simple denuding of joint]	with bone autograft	with bone homograft	with synthetic tissue [e.g. bone cement or paste]	with combined sources of tissue
joint fusion alone					
no device used	1.WE.75.LA	1.WE.75.LA-XX-A	1.WE.75.LA-XX-K	1.WE.75.LA-XX-N	1.WE.75.LA-XX-Q

using wire, staple	1.WE.75.VJ-KD	1.WE.75.VJ-KD-A	1.WE.75.VJ-KD-K	1.WE.75.VJ-KD-N	1.WE.75.VJ-KD-Q

1.WE.80.^.^ Repair, tarsal bones and intertarsal joints [hindfoot, midfoot]**S** ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Arthroplasty with interpositional graft, intertarsal joints
 Osteotomy with arthrectomy, hindfoot (or midfoot)
 Osteotomy with arthroplasty, hindfoot (or midfoot)
 Osteotomy with capsular release, hindfoot (or midfoot)
 Osteotomy with ligament release, hindfoot (or midfoot)
 Osteotomy with other joint repair, tarsal bones and intertarsal joints
 Osteotomy, calcaneal
 Osteotomy, lengthening, calcaneal
 Osteotomy, medial cuneiform
 Osteotomy, subtalar
 Osteotomy, tarsal
- Excludes:** that with fusion, intertarsal (see [1.WE.75.^^](#))
 that with implantation of tarsal spacer device (see [1.WE.53.^^](#))
- Code Also:** Any concomitant tendon release (see [1.WT.72.^^](#))
 Any concomitant tendon transfer or graft (see [1.WT.80.^^](#))
- Note:** May involve multiple interventions on the intertarsal joints such as: joint excision [arthrectomy, chondrectomy], loose body extraction, reshaping arthroplasty, capsular or ligament release with or without osteotomy.

1.WE.80.^^ Repair, tarsal bones and intertarsal joints [hindfoot, midfoot]	no tissue used (for repair)	with autograft [e.g. bone, interpositional tendon or fascia]	with bone homograft	with combined sources of tissue [e.g. bone graft, cement/paste]
osteotomy alone (e.g. calcaneal, medial cuneiform osteotomy)				
no device used (for repair)	1.WE.80.LA	1.WE.80.LA-XX-A	1.WE.80.LA-XX-K	1.WE.80.LA-XX-Q
using pin, nail	1.WE.80.LA-NV	1.WE.80.LA-NV-A	1.WE.80.LA-NV-K	1.WE.80.LA-NV-Q
using screw, plate and screw	1.WE.80.LA-NW	1.WE.80.LA-NW-A	1.WE.80.LA-NW-K	1.WE.80.LA-NW-Q
using wire, staple	1.WE.80.LA-KD	1.WE.80.LA-KD-A	1.WE.80.LA-KD-K	1.WE.80.LA-KD-Q
osteotomy with arthrectomy/arthroplasty (e.g. anterior wedge and V-shaped tarsal osteotomies)				
no device used (for repair)	1.WE.80.RV	1.WE.80.RV-XX-A	1.WE.80.RV-XX-K	1.WE.80.RV-XX-Q
using pin, nail	1.WE.80.RV-NV	1.WE.80.RV-NV-A	1.WE.80.RV-NV-K	1.WE.80.RV-NV-Q
using screw, plate and screw	1.WE.80.RV-NW	1.WE.80.RV-NW-A	1.WE.80.RV-NW-K	1.WE.80.RV-NW-Q
using wire, staple	1.WE.80.RV-KD	1.WE.80.RV-KD-A	1.WE.80.RV-KD-K	1.WE.80.RV-KD-Q
endoscopic approach and special incisional technique (e.g. microfracturing)				
no device used (for repair)	1.WE.80.GZ Includes: • Osteochondral (micro) drilling, tarsal bones (talus, talar dome)	—	—	—

1.WE.82.^ ^ Reattachment, tarsal bones and intertarsal joints [hindfoot, midfoot]**S** ⁴ **L** ²

				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Distraction, first metatarsal bone
 Lengthening, first metatarsal bone
 Osseodistraction, first metatarsal bone
- Excludes:** Osteotomy, lengthening, 1st metatarsal, using bone graft (see [1.WI.80.^^](#))

1.WI.79.HA-MG using percutaneous approach distraction device

1.WI.80.^ Repair, first metatarsal bone and first metatarsophalangeal joint**S** ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Arthroplasty, 1st metatarsophalangeal
 Bunionectomy, 1st metatarsal (MTP)
 Osteoclasia, 1st metatarsal
 Osteotomy with arthroplasty, 1st metatarsal
 Osteotomy with capsular or ligament release, 1st metatarsal
 Osteotomy, 1st metatarsocuneiform
 Osteotomy, shortening, 1st metatarsal
 Resection, 1st metatarsal head (for improved joint alignment)

Excludes: Cheilectomy (simple), 1st metatarsal (see [1.WI.87.^](#))
 that with fusion, 1st metatarsal or metatarsophalangeal joint (see [1.WI.75.^](#))
 that with implantation of prosthetic device (see [1.WI.53.^](#))

Code Also: Akin osteotomy, 1st (proximal) phalanx (see [1.WK.80.^](#))
 Any concomitant repair, other metatarsal and metatarsophalangeal joints (see [1.WJ.80.^](#))
 Any concomitant shortening osteotomy, other metatarsal bones (see [1.WJ.80.^](#))
 Any concomitant tendon release (see [1.WT.72.^](#))
 Any concomitant tendon transfer or graft (see [1.WT.80.^](#))

Note: Select "osteotomy with arthroplasty" when separate incisions are made to the MTP joint (e.g. for a bunionectomy, sesamoidectomy) and to the metatarsal bone (e.g. for a distal or proximal osteotomy) to repair a deformity that cannot be corrected by resection arthroplasty alone.

1.WI.80.^ ^ Repair, first metatarsal bone and first metatarsophalangeal joint	no tissue used (for repair)	with autograft [e.g. bone, interpositional tendon or fascia]	with bone homograft	with combined sources of tissue
osteotomy (e.g. distal or proximal metatarsal: basal, chevron, crescentic, scarf) alone

				7	7 bones/joints
				8	8 bones/joints (or more)

Includes: Sclerotherapy, phalanx of foot, intralesional [e.g. aneurysmal bone cyst]

Excludes: Osteoclasia, phalanx of foot (see [1.WL.80.^](#))

Code Also: Any concomitant destruction, 1st phalanx of foot (see [1.WK.59.^](#))

1.WL.59.HA-AW using percutaneous (needle) approach with radiofrequency probe

Includes: Radiofrequency ablation (RFA), other phalanx of foot

1.WL.59.HA-X7 using percutaneous (needle) approach with chemical agents (e.g. Ethibloc, zein)

1.WL.71.^ Division, other phalanx of foot**S** 4 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Dewebbing, phalanx of foot
Release, syndactyly, phalanx of foot
- Note:** Division involves separating muscle, tendon and bone

1.WL.71.^ Division, other phalanges of foot	division involving bone or joint [complex syndactyly]	division involving skin and soft tissue only [simple syndactyly]
using combined local flap and skin autograft	1.WL.71.WK-XX-Q	1.WL.71.LA-XX-Q
using local flap [e.g. volar, dorsal]	1.WL.71.WK-XX-E	1.WL.71.LA-XX-E

1.WL.74.^ Fixation, other phalanx of foot**S** 5 **L** 2 **E** 64

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)
E 64	Optional	Bones/Joints	Extent	1	1 bone/joint
				2	2 bones/joints
				3	3 bones/joints
				4	4 bones/joints
				5	5 bones/joints
				6	6 bones/joints
				7	7 bones/joints
				8	8 bones/joints (or more)

- Includes:** Fixation, interphalangeal [IP] joint of toe
Reduction with fixation, interphalangeal joint of toe
Reduction with fixation, phalanx of foot
- Excludes:** Reduction alone, phalanx or interphalangeal joint of toe (see [1.WM.73.^](#))
- Code Also:** Any concomitant fixation, 1st phalanx of foot (see [1.WK.74.^](#))
Any immobilization of phalanx of foot (see [1.WL.03.^](#))

1.WL.74.^.^ Fixation, other phalanx of foot	open approach	percutaneous approach [e.g. with closed or no reduction]
using pin, nail	1.WL.74.LA-NV	1.WL.74.HA-NV
using screw, plate and screw	1.WL.74.LA-NW	1.WL.74.HA-NW
using wire, staple	1.WL.74.LA-KD	1.WL.74.HA-KD

1.WL.75.^.^ Fusion, other phalanx of foot**S** 5 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Syndactylization, toes [2 or more together]**Note:** Involves bringing bony surfaces of 2 or more toes together for fusion as a type of permanent splint to provide greater stability and support in the foot.

1.WL.75.^.^ Fusion, other phalanx of foot	no tissue used (for fusion)	with bone autograft	with bone homograft	with synthetic tissue [e.g. bone cement, or paste]
no device used (for fusion)	1.WL.75.LA	1.WL.75.LA-XX-A	1.WL.75.LA-XX-K	1.WL.75.LA-XX-N
using screw, plate and screw	1.WL.75.LA-NW	1.WL.75.LA-NW-A	1.WL.75.LA-NW-K	1.WL.75.LA-NW-N
using wire, staple	1.WL.75.LA-KD	1.WL.75.LA-KD-A	1.WL.75.LA-KD-K	1.WL.75.LA-KD-N

1.WL.80.^.^ Repair, other phalanx of foot**S** 5 **L** 2 **E** 64

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 64	Optional	Bones/Joints	Extent	1	1 bone/joint
				2	2 bones/joints
				3	3 bones/joints
				4	4 bones/joints
				5	5 bones/joints
				6	6 bones/joints
				7	7 bones/joints
				8	8 bones/joints (or more)

Includes: Osteoclasia, phalanx of foot
 Osteotomy, phalanx of foot
 Rotation flap, phalanx of foot
 Shortening [osteotomy], phalanx of foot
 Transposition flap, phalanx of foot

Excludes: Amputation with toe transposition flap (see [1.WL.93.^^](#))

Code Also: Any concomitant repair, 1st phalanx of foot (see [1.WK.80.^^](#))
 Any concomitant tendon release (see [1.WT.72.^^](#))
 Any concomitant tendon transfer or repair (see [1.WT.80.^^](#))

1.WL.80.^^ Repair, other phalanx of foot	no tissue used (for repair)	with bone autograft	with bone homograft	with synthetic tissue [e.g. bone cement, or paste]	with combined sources of tissue [e.g. bone graft, cement/paste]
no device used (for repair)	1.WL.80.LA	1.WL.80.LA-XX-A	1.WL.80.LA-XX-K	1.WL.80.LA-XX-N	1.WL.80.LA-XX-Q
using wire, staple	1.WL.80.LA-KD	1.WL.80.LA-KD-A	1.WL.80.LA-KD-K	1.WL.80.LA-KD-N	1.WL.80.LA-KD-Q

1.WL.82.^^ Reattachment, other phalanx of foot

S 4 **L** 2 **E** 64

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 64	Optional	Bones/Joints	Extent	1	1 bone/joint
				2	2 bones/joints
				3	3 bones/joints
				4	4 bones/joints
				5	5 bones/joints
				6	6 bones/joints
				7	7 bones/joints
				8	8 bones/joints (or more)

Includes: Reattachment, toe

Excludes: Amputation of phalanx with toe rotation flap (see [1.WL.93.^^](#))

Code Also: Any concomitant reattachment, 1st phalanx of foot (see [1.WK.82.^^](#))

Note: Involves microsurgical technique to reestablish vascular and neural function

1.WL.82.LA using simple apposition technique [e.g. suturing]

1.WL.82.LA-KD using open approach and wire/staple fixation with apposition

1.WL.87.^ ^ Excision partial, other phalanx of foot**S** 4 **L** 2 **E** 64

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)
E 64	Optional	Bones/Joints	Extent	1	1 bone/joint
				2	2 bones/joints
				3	3 bones/joints
				4	4 bones/joints
				5	5 bones/joints
				6	6 bones/joints
				7	7 bones/joints
				8	8 bones/joints (or more)

Includes: Debridement, phalanx of foot
 Excision [bone spur, exostosis, osteophyte, sequestrum], phalanx of foot
 Ligation, phalanx of foot (supernumerary toe)

Code Also: Any concomitant partial excision of 1st phalanx of foot (see [1.WK.87.^ ^](#))

1.WL.87.LA	using open approach
1.WL.87.LA-XX-A	using open approach and autograft (for closure of surgical defect)
1.WL.87.LA-XX-K	using open approach and homograft (for closure of defect)
1.WL.87.LA-XX-N	using open approach and synthetic tissue (for closure of defect)
1.WL.87.UR	using ligature dissection technique

1.WL.93.^ ^ Amputation, other phalanx of foot**S** 5 **L** 2 **E** 64

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)
E 64	Optional	Bones/Joints	Extent	1	1 bone/joint
				2	2 bones/joints
				3	3 bones/joints
				4	4 bones/joints
				5	5 bones/joints
				6	6 bones/joints
				7	7 bones/joints
				8	8 bones/joints (or more)

Includes: Amputation with transposition (toe) flap
Phalangectomy

Excludes: Amputation through joint of toe (see [1.WM.93.^ ^](#))

Code Also: Any concomitant amputation, 1st phalanx of foot (see [1.WK.93.^ ^](#))

1.WL.93.LA using simple apposition technique [e.g. suturing] (for closure of stump)
 1.WL.93.LA-XX-A using skin graft (for closure of stump)
 1.WL.93.LA-XX-G using pedicled transposition flap [e.g. toe rotation flap]

1.WM.^.^ Therapeutic Interventions on Other Interphalangeal Joints of Toe

Includes: Phalangeal joint(s) of toe (IP, DIP, PIP) NOS

Excludes: Therapeutic Interventions on 1st phalangeal joint of (great) toe (see [1.WN.^.^](#))

1.WM.04.^.^ Mobilization, other interphalangeal joints of toe**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Traction, IP joints of toe(s)

Excludes: Mobilization with manipulation, interphalangeal joints of toe(s) (see [1.WM.05.^.](#))

Code Also: Any concomitant mobilization, 1st IP joint (hallux) (see [1.WN.04.^.](#))

1.WM.04.JH using external approach with manual technique

1.WM.05.^.^ Manipulation, other interphalangeal joints of toe**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Joint adjustment, IP joints of foot
Mobilization with concomitant manipulation, IP joints of foot
Skeletal manipulation, IP joints of foot

Code Also: Any concomitant manipulation, 1st IP joint (hallux) (see [1.WN.05.^.](#))

1.WM.05.JH using external approach with manual technique

1.WM.35.^ ^ Pharmacotherapy (local), other interphalangeal joints of toe**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Injection, interphalangeal joint of toe
 Instillation, interphalangeal joint of toe

Excludes: Systemic pharmacotherapy (see [1.ZZ.35.^ ^](#))

Code Also: Any concomitant pharmacotherapy, 1st IP joint of (hallux or great) toe (see [1.WN.35.^ ^](#))

1.WM.35.HA-J2	of corticosteroid agent using needle approach
	Includes: prednisone, dexamethasone, fludrocortisone
1.WM.35.HA-P1	using percutaneous needle approach and anesthetic agent
1.WM.35.HA-P2	of analgesic agent using needle approach
	Includes: opioids (morphine, meperidine), acetylsalicylic acid, acetaminophen, ergotamine, sumatriptan
1.WM.35.HA-T9	of pharmacological agent NEC using needle approach
1.WM.35.LA-K8	using open approach and antibacterial agent (e.g. gentamycin beads)

1.WM.52.^ ^ Drainage, other interphalangeal joints of toe**S** 4 **L** 2 **E** 64

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)
E 64	Optional	Bones/Joints	Extent	1	1 bone/joint
				2	2 bones/joints
				3	3 bones/joints
				4	4 bones/joints
				5	5 bones/joints
				6	6 bones/joints
				7	7 bones/joints
				8	8 bones/joints (or more)

Includes: Bursectomy, interphalangeal joint of toe
 Bursotomy, interphalangeal joint of toe

Code Also: Any concomitant drainage 1st IP joint of (hallux or great) toe (see [1.WN.52.^ ^](#))

1.WM.52.HA using percutaneous (needle) aspiration
 1.WM.52.WJ using open excisional approach [e.g. bursectomy]
 1.WM.52.WK using open incisional approach [e.g. bursotomy]

1.WM.53.^ ^ Implantation of internal device, other interphalangeal joints of toe**S** 5 **L** 2 **E** 64

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)
E 64	Optional	Bones/Joints	Extent	1	1 bone/joint
				2	2 bones/joints
				3	3 bones/joints
				4	4 bones/joints
				5	5 bones/joints
				6	6 bones/joints
				7	7 bones/joints
				8	8 bones/joints (or more)

Includes: Implantation of device, phalangeal joint**Code Also:** Any concomitant implantation of internal device, 1st IP joint of (hallux or great) toe (see [1.WN.53.^ ^](#))**1.WM.53.LA-PN** of uncemented dual component prosthetic device using open approach

1.WM.55.^ ^ Removal of device, other interphalangeal joints of toe**S** 4 **L** 2 **E** 64

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)
E 64	Optional	Bones/Joints	Extent	1	1 bone/joint
				2	2 bones/joints
				3	3 bones/joints
				4	4 bones/joints
				5	5 bones/joints
				6	6 bones/joints
				7	7 bones/joints
				8	8 bones/joints (or more)

Includes: Removal of device, phalangeal joint**Code Also:** Any concomitant removal of device, 1st IP joint of (hallux or great) toe (see [1.WN.55.^ ^](#))

1.WM.55.LA-K8	of antibacterial agent (e.g. gentamycin beads) using open approach
1.WM.55.LA-PN	of uncemented dual component prosthetic device using open approach

1.WM.72.^ ^ Release, other interphalangeal joints of toe**S** 4 **L** 2 **E** 64

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)
E 64	Optional	Bones/Joints	Extent	1	1 bone/joint
				2	2 bones/joints
				3	3 bones/joints
				4	4 bones/joints
				5	5 bones/joints
				6	6 bones/joints
				7	7 bones/joints
				8	8 bones/joints (or more)

Includes: Arthrolysis, interphalangeal joint of toe
 Capsulotomy, interphalangeal joint of toe
 Lysis [adhesions], interphalangeal joint of toe
 Release, ligaments, interphalangeal joint of toe

Excludes: Capsular release with osteotomy of phalanx (see [1.WM.80.^ ^](#))
 Manual rupture of IP joint adhesions, toe (see [1.WM.05.^ ^](#))

Code Also: Any concomitant release, 1st IP joint of (hallux or great) toe (see [1.WN.72.^ ^](#))

Omit code: When any of the following interventions are performed concomitantly with capsular or ligament release: joint excision [arthrectomy, chondrectomy, synovectomy], loose body extraction, osteotomy of phalanx (see [1.WM.80.^ ^](#))

1.WM.72.LA using open (incisional) approach

1.WM.73.^ ^ Reduction, other interphalangeal joints of toe**S** 4 **L** 2 **E** 64

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)
E 64	Optional	Bones/Joints	Extent	1	1 bone/joint
				2	2 bones/joints
				3	3 bones/joints
				4	4 bones/joints
				5	5 bones/joints
				6	6 bones/joints
				7	7 bones/joints
				8	8 bones/joints (or more)

Includes: Debridement with reduction, interphalangeal joint of toe
Reduction, phalanx of foot

Excludes: Reduction with fixation, interphalangeal joint of toe (see [1.WL.74.^ ^](#))

Code Also: Any concomitant reduction, 1st IP joint of (hallux or great) toe (see [1.WN.73.^ ^](#))
Any immobilization of foot (see [1.WG.03.^ ^](#)) or immobilization of phalanx of foot (see [1.WL.03.^ ^](#))

1.WM.73.JA using closed (external) approach
1.WM.73.LA using open approach

1.WM.75.^ ^ Fusion, other interphalangeal joints of toe**S** 5 **L** 2 **E** 64

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)
E 64	Optional	Bones/Joints	Extent	1	1 bone/joint
				2	2 bones/joints
				3	3 bones/joints
				4	4 bones/joints
				5	5 bones/joints
				6	6 bones/joints
				7	7 bones/joints
				8	8 bones/joints (or more)

Includes: Arthrodesis, interphalangeal joint
Arthrodesis, phalangeal joint

Excludes: Arthrodesis metatarsophalangeal joint (see [1.WJ.75.^ ^](#))

Code Also: Any concomitant fusion, 1st IP joint of (hallux or great) toe (see [1.WN.75](#))
Any concomitant tendon release, transfer or graft repair (see [1.WT.^ ^,^ ^](#))

1.WM.75.LA-KD using open approach and wire, staple

1.WM.75.LA-KD-A using open approach and wire, staple with bone autograft

1.WM.75.LA-LQ using open approach and intramedullary nail

Includes: Smart Toe, Pro-Toe and StayFuse IM compression devices for fusion of PIP joints of lesser toes

1.WM.75.LA-NV using open approach and pin, nail

1.WM.75.LA-NV-A using open approach and pin, nail with bone autograft

1.WM.75.LA-NW using open approach and screw

1.WM.75.LA-NW-A using open approach and screw with bone autograft

1.WM.80.^ ^ Repair, other interphalangeal joints of toe**S** 5 **L** 2 **E** 64

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)
E 64	Optional	Bones/Joints	Extent	1	1 bone/joint
				2	2 bones/joints
				3	3 bones/joints
				4	4 bones/joints
				5	5 bones/joints
				6	6 bones/joints
				7	7 bones/joints
				8	8 bones/joints (or more)

Includes: Arthroplasty, interphalangeal joint of toe
 Capsular release, interphalangeal joint(s) of toe
 Capsulodesis, interphalangeal joint of toe
 Capsuloplasty, interphalangeal joint of toe
 Capsulorrhaphy, interphalangeal joint of toe
 Repair, ligament, interphalangeal joint of toe
 Suture of joint capsule, interphalangeal joint of toe

Excludes: that with arthroectomy, other (2nd to 5th) interphalangeal joint(s) of toe (see [1.WM.87.^ ^](#))
 that with fusion of interphalangeal joint (see [1.WM.75.^ ^](#))
 that with implantation of interphalangeal prosthetic device (see [1.WM.53.^ ^](#))

Code Also: Any concomitant phalangeal osteotomy of other (2nd to 5th) toe(s) (see [1.WL.80.^ ^](#))
 Any concomitant repair of 1st IP joint of (hallux or great) toe (see [1.WN.80.^ ^](#))
 Any concomitant tendon release (see [1.WT.72.^ ^](#))
 Any concomitant tendon transfer or graft (see [1.WT.80.^ ^](#))

1.WM.80.LA using open approach

1.WM.87.^ ^ Excision partial, other interphalangeal joints of toe**S** 4 **L** 2 **E** 64

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)
E 64	Optional	Bones/Joints	Extent	1	1 bone/joint
				2	2 bones/joints
				3	3 bones/joints
				4	4 bones/joints
				5	5 bones/joints
				6	6 bones/joints
				7	7 bones/joints
				8	8 bones/joints (or more)

Includes: Arthroectomy, interphalangeal joint of other (2nd to 5th) toe(s)
 Debridement, other interphalangeal joints of toe
 Excision [bone spur, osteophyte, sequestrum], other interphalangeal joints of toe
 Resection arthroplasty, articular surface of phalanges [to improve joint alignment], other (2nd to 5th) toes

Excludes: Debridement with reduction of interphalangeal joint of toe (see [1.WM.73.^ ^](#))
 that with fusion, interphalangeal joint (see [1.WM.75.^ ^](#))

Code Also: Any concomitant excision of 1st IP joint of (hallux or great) toe (see [1.WN.87.^ ^](#))

1.WM.87.LA using open approach
 1.WM.87.LA-KD using open approach and wire, staple

1.WM.93.^ ^ Amputation, other interphalangeal joints of toe**S** 5 **L** 2 **E** 64

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)
E 64	Optional	Bones/Joints	Extent	1	1 bone/joint
				2	2 bones/joints
				3	3 bones/joints
				4	4 bones/joints
				5	5 bones/joints
				6	6 bones/joints
				7	7 bones/joints
				8	8 bones/joints (or more)

Includes: Amputation, through interphalangeal joint(s) of toe
Disarticulation, toe NOS

Excludes: Disarticulation, through metatarsophalangeal joint of toe (see [1.WJ.93.^ ^](#))

Code Also: Any concomitant disarticulation through 1st IP joint of (hallux or great) toe (see [1.WN.93.^ ^](#))

1.WM.93.LA using simple apposition technique [e.g. suturing] (for closure of stump)
1.WM.93.LA-XX-E using local flap (for closure of stump)

1.WN.^ ^ Therapeutic Interventions on the First Interphalangeal Joint of Toe

Includes: Phalangeal joint of hallux (or great toe)

1.WN.04.^ ^ Mobilization, first interphalangeal joint of toe**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Traction, 1st IP joint of hallux**Excludes:** Mobilization with manipulation, 1st IP joint of hallux (see [1.WN.05.^ ^](#))**Code Also:** Any concomitant mobilization, other IP joints of toe (see [1.WM.04.^ ^](#))

1.WN.04.JH using external approach with manual technique

1.WN.05.^ ^ Manipulation, first interphalangeal joint of toe**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Joint adjustment, 1st IP joint of (hallux or great) toe
Mobilization with concomitant manipulation, 1st IP joint of (hallux or great) toe
Skeletal manipulation, 1st IP joint of (hallux or great) toe

1.WN.05.JH using external approach with manual technique

1.WN.35.^ ^ Pharmacotherapy (local), first interphalangeal joint of toe**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Injection, 1st IP joint of (hallux or great) toe
 Instillation, 1st IP joint of (hallux or great) toe

Excludes: Systemic pharmacotherapy (see [1.ZZ.35.^](#))

Code Also: Any concomitant pharmacotherapy, other IP joints of toe (see [1.WM.35.^](#))

1.WN.35.HA-J2 of corticosteroid agent using needle approach
Includes: prednisone, dexamethasone, fludrocortisone

1.WN.35.HA-P1 using percutaneous needle approach and anesthetic agent

1.WN.35.HA-P2 of analgesic agent using needle approach
Includes: opioids (morphine, meperidine), acetylsalicylic acid, acetaminophen, ergotamine, sumatriptan

1.WN.35.HA-T9 of pharmacological agent NEC using needle approach

1.WN.35.LA-K8 using open approach and antibacterial agent (e.g. gentamycin beads)

1.WN.52.^ Drainage, first interphalangeal joint of toe

S ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Bursectomy, 1st IP joint of (hallux or great) toe
 Bursotomy, 1st IP joint of (hallux or great) toe

Code Also: Any concomitant drainage, other IP joints of toe (see [1.WM.52.^](#))

1.WN.52.HA using percutaneous (needle) aspiration

1.WN.52.WJ using open excisional approach [e.g. bursectomy]

1.WN.52.WK using open incisional approach [e.g. bursotomy]

1.WN.53.^ ^ Implantation of internal device, first interphalangeal joint of toe**S** ⁵ **L** ²

S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Arthrolysis, 1st IP joint of (hallux or great) toe
 Capsulotomy, IP joint of (hallux or great) toe
 Lysis [adhesions], 1st IP joint of (hallux or great) toe
 Release, ligaments, 1st IP joint of (hallux or great) toe

Excludes: Capsular release with osteotomy of 1st phalanx (hallux) (see [1.WN.80.^ ^](#))
 Manual rupture of 1st IP joint adhesions, (hallux or great) toe (see [1.WN.05.^ ^](#))

Code Also: Any concomitant release, other IP joints of toe (see [1.WM.72.^ ^](#))

Omit code: When any of the following interventions are performed concomitantly with capsular or ligament release: joint excision [arthrectomy, chondrectomy, synovectomy], loose body extraction, osteotomy of phalanx (see [1.WN.80.^ ^](#))

1.WN.72.LA using open (incisional) approach

1.WN.73.^ ^ Reduction, first interphalangeal joint of toe**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Debridement with reduction, 1st IP joint of (hallux or great) toe
 Reduction, 1st phalanx (hallux or great) toe

Excludes: Reduction with fixation, 1st IP joint of toe (see [1.WK.74.^ ^](#))

Code Also: Any concomitant reduction, other IP joints of toe (see [1.WM.73.^ ^](#))
 Any immobilization of foot (see [1.WG.03.^ ^](#)) or immobilization of 1st phalanx of foot (see [1.WK.03.^ ^](#))

1.WN.73.JA using closed (external) approach

1.WN.73.LA using open approach

1.WN.75.^ ^ Fusion, first interphalangeal joint of toe**S** ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Arthrodesis, 1st IP joint of (hallux or great) toe
Arthrodesis, hallux

Excludes: Arthrodesis 1st MTP joint (see [1.WI.75.^ ^](#))

Code Also: Any concomitant fusion, other IP joints of toe (see [1.WM.75.^ ^](#))
Any concomitant tendon release, transfer or graft repair (see [1.WT.72.^ ^](#))

1.WN.75.LA-KD using open approach and wire, staple

1.WN.75.LA-KD-A using open approach and wire, staple with bone autograft

1.WN.75.LA-LQ using open approach and intramedullary nail

Includes: Smart Toe intramedullary compression device for fusion of interphalangeal joint of hallux

1.WN.75.LA-NV using open approach and pin, nail

1.WN.75.LA-NV-A using open approach and pin, nail with bone autograft

1.WN.75.LA-NW using open approach and screw

1.WN.75.LA-NW-A using open approach and screw with bone autograft

1.WN.80.^ ^ Repair, first interphalangeal joint of toe**S** ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Capsular release, 1st IP joint of (great) toe
 Capsulodesis, 1st IP joint of (great) toe
 Capsuloplasty, 1st IP joint of (great) toe
 Capsulorrhaphy, 1st IP joint of (great) toe
 Repair, ligament, 1st IP joint of (great) toe
 Suture of joint capsule, 1st IP joint of (great) toe
- Excludes:** that with arthroectomy, 1st interphalangeal joint of toe (see [1.WN.87.^^](#))
 that with fusion of 1st IP joint (see [1.WN.75.^^](#))
 that with implantation of interphalangeal prosthetic device (see [1.WN.53.^^](#))
- Code Also:** Any concomitant osteotomy of 1st phalanx of toe (see [1.WK.80.^^](#))
 Any concomitant repair, other IP joints of toe (see [1.WM.80.^^](#))
 Any concomitant tendon release (see [1.WT.72.^^](#))
 Any concomitant tendon transfer or graft (see [1.WT.80.^^](#))

1.WN.80.LA using open approach

1.WN.87.^^ Excision partial, first interphalangeal joint of toe

S ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Arthroectomy, 1st IP joint of (hallux or great) toe
 Debridement, 1st IP joint of (hallux or great) toe
 Excision [bone spur, osteophyte, sequestrum], 1st IP joint of (hallux or great) toe
 Resection arthroplasty, articular surface of 1st phalanx [to improve joint alignment]
- Excludes:** Debridement with reduction of 1st IP joint of (hallux or great) toe (see [1.WN.73.^^](#))
 that with fusion, 1st IP joint (of hallux or great) toe (see [1.WN.75.^^](#))
- Code Also:** Any concomitant partial excision of other IP joints of toe (see [1.WM.87.^^](#))

1.WN.87.LA using open approach
 1.WN.87.LA-KD using open approach and wire, staple

1.WN.93.^.^ Amputation, first interphalangeal joint of toe**S** ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Amputation through 1st IP joint of (hallux or great) toe
Disarticulation, hallux or great toe NOS

Excludes: Disarticulation, through 1st MTP joint of (hallux or great) toe (see [1.WI.93.^.](#))

Code Also: Any concomitant disarticulation through other IP joints of toe (see [1.WM.93.^.](#))

1.WN.93.LA using simple apposition technique [e.g. suturing] (for closure of stump)
1.WN.93.LA-XX-E using local flap (for closure of stump)

1.WT.^.^ Therapeutic Interventions on the Tendons of the Ankle and Foot

Includes: Achilles tendon
Fibular peroneal retinaculum
Peroneus (brevis, longus) tendon
Pes anserinus tendon
Plantar aponeurosis of foot
Tendocalcaneus tendon
Tendons of ankle
Tendons of foot

1.WT.58.^.^ Procurement, tendons of ankle and foot**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Procurement, extensor digitorum longus of toe
Procurement, plantaris tendon of foot

1.WT.58.LA-XX-A of autograft using open approach

1.WT.72.^ ^ Release, tendons of ankle and foot

S 4 **L** 60

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 60	Optional	Tendons of foot	Location	B	Bilateral
				B1	Bilateral 1st hallucis
				L	Left
				L1	Left 1st hallucis
				R	Right
				R1	Right 1st hallucis

Includes: Release, tendon, Achilles
Tenolysis, ankle and foot
Tenotomy, ankle and foot

Omit code: When concomitant with lengthening of Achilles'tendon (see [1.WT.79.^ ^](#))
When release is part of tendon transfer or graft (see [1.WT.80.^ ^](#))

1.WT.72.LA using open approach

1.WT.79.^ ^ Repair by increasing size, tendons of ankle and foot

S 5 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Lengthening, tendon of ankle and foot
Lengthening, tendon, Achilles

Excludes: Lengthening of tendon of ankle and foot with transfer or tenodesis (see [1.WT.80.^^](#))

1.WT.79.LA-XX-A using open approach and autograft [e.g. fascia, tendon]
1.WT.79.LA-XX-E using open approach and local flap (e.g. Z-plasty)
1.WT.79.WK using special (percutaneous multiple) incisional technique

1.WT.80.^^ Repair, tendons of ankle and foot

S 7 **L** 60

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 7	Optional	Tx Status 3	Status	A	Abandoned after onset
				D P	Delayed primary (repair occurring 2 to 14 days post trauma)
				D S	Delayed secondary (repair occurring >14 days post trauma)
				R	Revision
L 60	Optional	Tendons of foot	Location	B	Bilateral
				B1	Bilateral 1st hallucis
				L	Left
				L1	Left 1st hallucis
				R	Right
				R1	Right 1st hallucis

Includes: Suture, tendon of ankle and foot
Tendinoplasty, ankle and foot
Tendinorrhaphy, ankle and foot
Tenodesis, ankle and foot
that with or without endobutton
Transfer, tendon, ankle and foot

Excludes: Repair, ankle ligament (for laxity) (see [1.WB.80.^^](#))
Tendon transfer to repair foot ligament (see [1.WB.80.^^](#))
Tenodesis, peroneus brevis (for ankle ligament instability) (see [1.WB.80.^^](#))

1.WT.80.^ ^ Repair, tendons of ankle and foot	using apposition technique [tendon sutured to tendon]	using tenodesis technique [tendon looped or sutured [anchored] to or through bone]	using tenodesis with screw fixation [tendon with a bone plug fixed to bone with screw]
simple repair (without graft or transfer)	1.WT.80.LA	1.WT.80.WU	1.WT.80.WU-NW
with autograft [e.g. tendon, fascia]	1.WT.80.LA-XX-A	1.WT.80.WU-XX-A	1.WT.80.WU-NW-A
with homograft [e.g. GRAFTJACKET regenerative tissue matrix]	1.WT.80.LA-XX-K	1.WT.80.WU-XX-K	1.WT.80.WU-NW-K
with combined sources of tissue [e.g. autograft, tendon transfer, gortex]	1.WT.80.LA-XX-Q	1.WT.80.WU-XX-Q	1.WT.80.WU-NW-Q
with synthetic tissue [e.g. gortex, mesh]	1.WT.80.LA-XX-N	1.WT.80.WU-XX-N	1.WT.80.WU-NW-N
with tendon transfer for realignment [e.g. advancement, transposition]	1.WT.80.LA-XX-E	1.WT.80.WU-XX-E	1.WT.80.WU-NW-E

1.WV.^ ^ Therapeutic Interventions on Soft Tissue of the Foot and Ankle

- Includes:**
- [Quadratus] plantaris
 - Abductor and adductor hallucis muscles
 - Abductor digiti muscle of foot
 - Extensor digitorum brevis muscle of foot
 - Interossei, intrinsic and extrinsic muscles of foot
 - Peroneus [longus, brevis, tertius] muscles
 - Plantar fascia
 - Soft tissue [neoplasm] arising in or extending into foot
 - Tibialis posterior, flexor digitorum longus, flexor hallucis longus muscles
 - Wound, soft tissue of foot and ankle
- Excludes:**
- Gastrocnemius and soleus muscles (see [1.VS.^ ^](#))

1.WV.04.^ ^ Mobilization, soft tissue of the foot and ankle

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

L 2

Includes: Myofascial release, foot

Excludes: Fasciotomy or fasciectomy for release of muscles of foot (see [1.WV.72.^^](#)) that concomitant with manipulation/adjustment of ankle (see [1.WA.05.^^](#)) or tarsal joints (see [1.WE.05.^^](#)) or metatarsal/MTP (see [1.WJ.05.^^](#)) or IP joints of toe(s) (see [1.WM.05.^^](#)) that concomitant with mobilization of ankle (see [1.WA.04.^^](#)) or tarsal joints (see [1.WE.04.^^](#)) or metatarsal/MTP (see [1.WJ.04.^^](#)) or IP joints of toe(s) (see [1.WM.04.^^](#))

Note: Involves moving, stretching or elongating soft tissue of foot and ankle.

1.WV.04.JH using external approach with manual technique

1.WV.06.^^ Hypothermy, soft tissue of the foot and ankle

L²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Application of cold, soft tissue of foot and ankle
Cryotherapy, soft tissue of foot and ankle that to reduce swelling, pain, etc.

1.WV.06.JA-KL using cold (dry) device [e.g. cold pack, ice]

1.WV.06.JA-KM using cold (moist) device [e.g. compress]

1.WV.07.^^ Hyperthermy, soft tissue of the foot and ankle

L²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Application, heat, soft tissue of foot
Diathermy, soft tissue of foot
Reversal, hypothermia, foot
- Excludes:** Hyperthermy, ankle joint alone (see [1.WA.07.^^](#))
Hyperthermy, multiple body sites (see [1.ZX.07.^^](#))

1.WV.07.JA-CG	using microwave
1.WV.07.JA-DU	using infrared device [e.g. lamp, baker]
1.WV.07.JA-DZ	using short wave
1.WV.07.JA-HB	using other diathermy device NEC
1.WV.07.JA-KH	using externally applied dry heat [e.g. heating pad]
1.WV.07.JA-KJ	using externally applied moist heat [e.g. compress, soak]
1.WV.07.JA-KQ	using paraffin
1.WV.07.JA-TR	using whirlpool

1.WV.12.^^ Therapy, soft tissue of the foot and ankle

L 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Foot care NEC
Phototherapy, foot and ankle
Physiotherapy NOS, soft tissue of foot and ankle
- Excludes:** Exercise, ankle alone (see [1.WA.02.^^](#)) or foot with ankle (see [1.WG.02.^^](#)) or foot and leg (see [1.VZ.02.^^](#))
Foot skin care (e.g. callous, ulcer) debridement (see [1.YW.59.^^](#))
Foot skin care (e.g. callous, ulcer) dressing (see [1.YW.14.^^](#))
Therapy (photo, laser, massage) specifically for ankle joint (see [1.WA.12.^^](#))
Therapy for ankle joint alone (see [1.WA.12.^^](#))
Toe nail care (see [1.YX.12.^^](#))

1.WV.12.JA	using other technique NEC
1.WV.12.JA-AG	using laser NEC (with or without photosensitizing chemicals)
1.WV.12.JA-DQ	using ultraviolet light
1.WV.12.JA-DU	using light NEC[e.g. long wave red light]
1.WV.12.JA-UE	using vibrating device
1.WV.12.JD	using acupressure technique
	Includes: Reflexology, foot
1.WV.12.JJ	using massage technique
1.WV.12.JP	using therapeutic touch technique

1.WV.13.^ ^ Control of bleeding, soft tissue of the foot and ankle**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Control of bleeding (wound) extending into soft tissue (muscle or tendon) of foot and ankle

Excludes: Application of pressure dressing for control of bleeding soft tissue (wound) of ankle and foot (see [1.YT.14.^ ^](#))
 Control of bleeding (wound) of skin of ankle and foot only (see [1.YV.13.^ ^](#))
 Control of bleeding by suture repair of muscle around ankle and foot (see [1.WV.80.^ ^](#))
 Control of bleeding involving suture repair of tendon of ankle and foot (see [1.WT.80.^ ^](#))
 Repair artery (bleeder) of foot (see [1.KG.80.^ ^](#))
 Repair vein of leg to control bleeding (see [1.KR.80.^ ^](#))
 Systemic pharmacotherapy for control of bleeding (see [1.ZZ.35.^ ^](#))

- 1.WV.13.HA-C2 using percutaneous injection of antihemorrhagic agent
Includes: aminocaproic acid, aprotinin, phytonadione, thrombin, coagulation factor VIII
 1.WV.13.JA-C2 using topical antihemorrhagic agent
 1.WV.13.JN using external manual compression

1.WV.35.^ ^ Pharmacotherapy (local), soft tissue of the foot and ankle**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Injection of agent, soft tissue of foot and ankle
 Instillation, wound of foot and ankle
 Irrigation, soft tissue foot and ankle
 Trigger point injection, soft tissue of the foot and ankle

Excludes: Irrigation for removal of foreign body (see [1.WV.56.^^](#))
 Irrigation, concomitant with drainage (see [1.WV.52.^^](#))
 Systemic pharmacotherapy (see [1.ZZ.35.^^](#))
 that for control of bleeding, soft tissue of foot and ankle (see [1.WV.13.^^](#))
 that for skin of foot (with or without leg) (see [1.YV.35.^^](#))
 that with removal of foreign body (see [1.WV.56.^^](#))

1.WV.35.^^ Pharmacotherapy (local), soft tissue of the foot and ankle	direct instillation [into wound]	percutaneous approach
using antiinfective irrigating solution	1.WV.35.JA-D1 Includes: • chlorexidine, neomycin	—
using salt irrigating solution	1.WV.35.JA-D2 Includes: • sodium chloride	—
using other irrigating solution	1.WV.35.JA-D3 Includes: • sorbitol, mannitol	—
using analgesic agent	1.WV.35.JA-P2 Includes: • opioids (morphine, meperidine), acetylsalicylic acid, acetaminophen, ergotamine, sumatriptan	1.WV.35.HA-P2 Includes: • opioids (morphine, meperidine), acetylsalicylic acid, acetaminophen, ergotamine, sumatriptan
using antiinfective NEC	1.WV.35.JA-K0	1.WV.35.HA-K0
using pharmacological agent NEC	1.WV.35.JA-T9	1.WV.35.HA-T9
using local anesthetic agent	1.WV.35.JA-P1	1.WV.35.HA-P1
using corticosteroid agent	—	1.WV.35.HA-J2

1.WV.52.^^ Drainage, soft tissue of the foot and ankle

S ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Drainage of abscess or hematoma, soft tissue of foot and ankle

Excludes: Marsupialization, cyst, of foot and ankle (see [1.YW.52.^^](#))

1.WV.52.HA using percutaneous (needle) approach
 1.WV.52.HA-TS using percutaneous approach with drainage tube left in situ
 1.WV.52.LA using open (incisional) approach

1.WV.55.^^ Removal of device, soft tissue of the foot and ankle

				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Ablation, soft tissue [neoplasm] of foot
Debridement, amputation stump, foot and ankle
Debridement, extending into soft tissue (fascia, muscle or tendon) of foot and ankle
Destruction, multiple or overlapping sites of soft tissue (extending into fascia, muscle or tendon) of foot and ankle
Myoclasia, foot
Trimming, amputation stump, of foot and ankle
- Excludes:** Destruction of skin of foot alone (see [1.YW.59.^^](#))
Reamputation, foot (see [1.WJ.93.^^](#))
Reamputation, phalanx of foot (see [1.WL.93.^^](#))
- Code Also:** Any concomitant lesioning (destruction) of nerve (see [1.BT.59.^^](#))

- 1.WV.59.LA-AD using cryoprobe
1.WV.59.LA-AG using laser
1.WV.59.LA-AW using radiofrequency probe
Includes: that using Coblation radiofrequency probe
1.WV.59.LA-GX using device NEC
1.WV.59.LA-X7 using chemical cautery agent

1.WV.72.^^ Release, soft tissue of the foot and ankle**S** 4 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Fasciectomy, plantar
Fasciotomy, plantar
Myotomy, foot and ankle
Release, contracture, muscles of foot and ankle

Code Also: Any concomitant neurolysis (see [1.BT.72.^^](#))

- 1.WV.72.DA using endoscopic approach
1.WV.72.DA-AG using endoscopic approach and laser
1.WV.72.WJ using excisional technique [e.g. fasciectomy]
1.WV.72.WK using incisional technique [e.g. fasciotomy, myotomy]

1.WV.80.^ ^ Repair, soft tissue of the foot and ankle**S** 28 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 28	Optional	Treatment Status 3A	Status	D	Delayed (closure occurs > 24 hrs post trauma)
				R	Revision
				S	Staged
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Fascioplasty, plantar
 Fasciorrhaphy, plantar
 Myoplasty, foot and ankle
 Myorrhaphy, foot and ankle
 Suture, muscle of foot and ankle

Excludes: Repair of skin of foot alone (see [1.YW.80.^ ^](#))

1.WV.80.LA	using simple apposition technique [e.g. suture, staple]
1.WV.80.LA-XX-A	using autograft [e.g. skin or fascia]
1.WV.80.LA-XX-E	using local flap [e.g. Z- plasty or rotation flap]

1.WV.87.^ ^ Excision partial, soft tissue of the foot and ankle**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Resection, lesion of soft tissue (extending into fascia, muscle or tendon) of foot with or without leg involvement

Excludes: Excision, skin lesion (not invading fascia) of foot (see [1.YW.87.^ ^](#))
Simple debridement, soft tissue wound or amputation stump of foot and ankle only (see [1.WV.59.^ ^](#))

1.WV.87.LA	using simple apposition technique [e.g. suture, staple] for closure of defect
1.WV.87.LA-XX-A	using autograft [e.g. skin or fascia] for closure of defect
1.WV.87.LA-XX-E	using local flap [e.g. Z- plasty or rotation flap] for closure of defect
1.WV.87.LA-XX-F	using free flap for closure of defect
1.WV.87.LA-XX-Q	using combined sources of tissue (e.g. flap and graft) for closure of defect

Therapeutic Interventions on the Musculoskeletal System NEC (1WX - 1WZ)

1.WX.^.^ Therapeutic Interventions on Bone NEC

1.WX.09.^.^ Stimulation, bone NEC

Includes: Insertion, bone growth stimulator, bone NEC
Percutaneous stimulation, bone NEC

1.WX.09.HA-JA	using percutaneously inserted electrodes (e.g. bone growth stimulator)
1.WX.09.JA-AQ	using external magnets (e.g. pulsating electro magnet field-PEMF)
1.WX.09.JA-JA	using external electrodes (e.g. under cast)

1.WX.58.^.^ Procurement, bone NEC

Includes: Procurement, bone, from multiple sites of deceased donor

1.WX.58.LA-XX-A	of autograft using open approach
1.WX.58.LA-XX-K	of deceased donor homograft using open approach

1.WX.59.^.^ Destruction, bone NEC

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Sclerotherapy, bone NEC, intralesional [e.g. aneurysmal bone cyst]

1.WX.59.HA-AW	using percutaneous (needle) approach with radiofrequency probe
	Includes: Radiofrequency ablation (RFA), bone NEC
1.WX.59.HA-X7	using percutaneous (needle) approach with chemical agents (e.g. Ethibloc, zein)

1.WY.^.^ Therapeutic Interventions on Bone Marrow**1.WY.19.^.^ Transfusion, bone marrow****S** 57

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 57	Mandatory	Mandatory Transplant Status	Status	0	Not applicable -Note: valid value for autologous bone marrow only
				M1	Allogeneic (homologous) related matched
				M2	Allogeneic (homologous) related mismatched
				M3	Allogeneic (homologous) unrelated matched
				M4	Allogeneic (homologous) unrelated mismatched
				Y	Syngenic (allogeneic (homologous)) matched (from identical twin donor)

Includes: Transplant, bone marrow (autologous/ homologous)

Excludes: Interosseous transfusion (see [1.LZ.35.^.](#))
 Transplant, blood stem cell (peripheral) (see [1.LZ.19.^.](#))
 Transplant, cord blood stem cell (see [1.LZ.19.^.](#))

Note: Purging is a process in which the bone marrow is treated with drugs, antibodies, or irradiation to eliminate any residual malignant cells

1.WY.19.HH-XX-A	infusion of autologous bone marrow
	Includes: That with extracorporeal purging of malignant cells
1.WY.19.HH-XX-J	infusion of homologous bone marrow, without purging
	Includes: Allogeneic transplant
1.WY.19.HH-XX-M	infusion of purged homologous bone marrow

1.WY.35.^.^ Pharmacotherapy (local), bone marrow

Includes: Injection of agent, bone marrow
 Instillation of agent, bone marrow

Excludes: Systemic pharmacotherapy (see [1.ZZ.35.^.](#))

1.WY.35.HA-T9	of pharmacological agent NEC using needle approach
---------------	--

1.WY.58.^ ^ Procurement, bone marrow**S** ⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Aspiration, bone marrow (for autologous or homologous transfusion)

Excludes: Aspiration biopsy (see [2.WY.71.^ ^](#))

1.WY.58.HA using percutaneous needle approach

1.WY.58.HN using percutaneous needle approach and multi-site technique

1.WZ.^.^ Therapeutic Interventions on Musculoskeletal System NEC**1.WZ.27.^.^ Radiation, musculoskeletal system NEC****E** 21

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 21	Optional	Teletherapy 2	Extent	S S	Surgical specimen only (extracorporeal)
				U	Not applicable

Includes: Teletherapy, musculoskeletal system NEC
 Therapy, radiation [radiotherapy], bone
 Therapy, radiation [radiotherapy], bone marrow
 Therapy, radiation [radiotherapy], musculoskeletal system NEC

Excludes: Radiation therapy involving bones of arm, hand and shoulder (see [1.TZ.27.^.](#))
 Radiation therapy involving bones of cranium (see [1.EA.27.^.](#))
 Radiation therapy involving bones of leg and foot (see [1.VZ.27.^.](#))
 Radiation therapy involving bones of pelvis and hip (see [1.SQ.27.^.](#))
 Radiation therapy involving ribs (see [1.SL.27.^.](#))
 Radiation therapy involving soft tissue alone (see Radiation, by site)

1.WZ.27.JA using external beam

1.WZ.54.^.^ Management of internal device, musculoskeletal system NEC**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Adjustment of expandable [growing] prosthesis

1.WZ.54.JA-AQ external approach using electromagnetic field

1.WZ.94.^.^ Therapeutic intervention NEC, musculoskeletal system NEC

1.WZ.94.HA using percutaneous (needle) approach
 1.WZ.94.LA using open approach

Therapeutic Interventions on the Skin, Subcutaneous Tissue and Breast (1YA - 1YZ)

1.YA.^.^ Therapeutic Interventions on Scalp

- Includes:** Hair and hair follicles
Hair bearing skin of scalp
- Excludes:** Overlapping sites involving skin of scalp with skin of face (see [1.YF.^.^](#))
Overlapping sites involving skin of scalp with skin of neck (see [1.YG.^.^](#))

1.YA.06.^.^ Hypothermy, scalp

- Includes:** Application of cold, scalp
-
- | | |
|---------------|--|
| 1.YA.06.JA-KL | using ice pack |
| 1.YA.06.JA-KM | using cool/cold compress or water soak |
-

1.YA.07.^.^ Hyperthermy, scalp

- Includes:** Application of heat, scalp
-
- | | |
|---------------|--|
| 1.YA.07.JA-KH | using dry heat [e.g. heating pad, hot pack] |
| 1.YA.07.JA-KJ | using warm compress (intermittent or constant) |
-

1.YA.09.^.^ Stimulation, scalp

- Includes:** Electrostimulation, scalp (wound)
Involves stimulation at surface of skin wound to produce collagen deposit
-
- | | |
|---------------|--|
| 1.YA.09.JA-DV | using external electrical stimulating device |
|---------------|--|
-

1.YA.12.^.^ Therapy, scalp

- Includes:** Leech therapy
Phototherapy, scalp
Therapy, laser, scalp (for hyperpigmentation)
- Excludes:** Destruction [lesion], scalp (see [1.YA.59.^.](#))
Massage, scalp (see [1.EQ.12.^.](#))
-
- | | |
|---------------|--|
| 1.YA.12.JA-AG | using laser NEC [e.g. green light laser] |
| 1.YA.12.JA-DQ | using ultraviolet light |
| 1.YA.12.JA-LI | using external application of living organism (e.g. leeches) |
-

1.YA.13.^ ^ Control of bleeding, scalp

Excludes: Application of pressure dressing (see [1.YA.14.^ ^](#))
 Destruction or ablation, scalp for control of bleeding (see [1.YA.59.^ ^](#))
 Systemic pharmacotherapy for control of bleeding (see [1.ZZ.35.^ ^](#))
 that with surgical repair and suturing (see [1.YA.80.^ ^](#))

1.YA.13.JA-C2	using local application of antihemorrhagic agent
	Includes: aminocaproic acid, aprotinin, phytonadione, thrombin, coagulation factor VIII
1.YA.13.JN	using external manual compression

1.YA.14.^ ^ Dressing, scalp

Includes: Bandaging, scalp (wound)
 Change dressing, scalp
 Coverage [temporary tissue], scalp
 Debridement [simple] with temporary coverage, scalp
 Maggot (larval) therapy

Excludes: Control of bleeding scalp (wound) by simple manual compression (see [1.YA.13.^ ^](#))
 Dressing scalp with overlapping sites of face (see [1.YF.14.^ ^](#))
 Dressing, scalp with forehead (see [1.YF.14.^ ^](#))
 Dressing, scalp with nape of neck (see [1.YG.14.^ ^](#))

1.YA.14.JA-FJ	using occlusive dressing [e.g. hydrocolloid, coal tar, paraffin gauze, hydrogel]
1.YA.14.JA-FN	using wet/moist dressing
1.YA.14.JA-GN	using pressure dressing
1.YA.14.JA-H1	using medicated dressing
1.YA.14.JA-LI	using external application of living organism (e.g. maggots)
1.YA.14.JA-NP	using packing
1.YA.14.JA-T6	using dry dressing
1.YA.14.JA-XX-L	using xenogeneic tissue [e.g. porcine xenograft]
1.YA.14.JA-XX-N	using synthetic tissue [e.g. Biobrane, Dermagraft]

1.YA.35.^ ^ Pharmacotherapy (local), scalp

- Includes:** Application of agent, scalp
Injection, scalp
Irrigation, skin of scalp
Rubbing [massage] of skin with agent
Shampooing (and combing), scalp for removal of lice or other arthropod
Skin care, topical treatment
Tattoo, scalp
- Excludes:** Extraction of arthropods without irrigation (see [1.YA.56.^ ^](#))
Hair washing for personal care (see [7.SC.01.^ ^](#))
Irrigation with drainage, scalp (see [1.YA.52.^ ^](#))
Systemic pharmacotherapy (see [1.ZZ.35.^ ^](#))
that for control of bleeding (see [1.YA.13.^ ^](#))
- Omit code:** When skin preparation is a part of another intervention

1.YA.35.^ Pharmacotherapy (local), scalp	percutaneous [needle] approach	topical application or direct instillation into wound
using antiinfective irrigating solution	—	1.YA.35.JA-D1 Includes: • chlorexidine, neomycin
using salt irrigating solution	—	1.YA.35.JA-D2 Includes: • sodium chloride
using other irrigating solution	—	1.YA.35.JA-D3 Includes: • sorbitol, mannitol
using antifungal agent	—	1.YA.35.JA-G1 Includes: • nystatin, clotrimazole, miconazole, tolnaftate
using emollient and protective agent	—	1.YA.35.JA-G2 Includes: • silicone, dimethicone, zinc oxide, urea, protectives against UV radiation
using wound and ulcer treatment agent	—	1.YA.35.JA-G3 Includes: • sutilains, collagenase, dextranomer
using antipruritic agent	—	1.YA.35.JA-G4 Includes: • diphenhydramine, lidocaine, benzocaine, crotonitron, calamine
using antipsoriatic agent	—	1.YA.35.JA-G5 Includes: • coal tar preparations, anthralin, methoxsalen)
using antibiotic and chemotherapeutic agent	1.YA.35.HA-G6 Includes: • fusidic acid, bacitracin, polymyxin, mupirocin, idoxuridine, acyclovir for topical use	1.YA.35.JA-G6 Includes: • fusidic acid, bacitracin, polymyxin, mupirocin, idoxuridine, acyclovir for topical use
using corticosteroid agent	1.YA.35.HA-G7 Includes: • hydrocortisone, triamcinolone, clobetasol, betamethasone	1.YA.35.JA-G7 Includes: • hydrocortisone, triamcinolone, clobetasol, betamethasone
using antiseptic and disinfectant	—	1.YA.35.JA-G8 Includes: • chlorhexadine, hexachlorophene, iodine, cilioquinol, isopropyl alcohol
using other dermatological preparation	—	1.YA.35.JA-H3
using immunomodulating agent	1.YA.35.HA-M7 Includes: • BCG, interferon alpha, filgastrim, interferon beta 1B, levamisole	—
using local anesthetic agent	1.YA.35.HA-P1	1.YA.35.JA-P1
using ectoparasiticide	—	1.YA.35.JA-Q3
using pharmacological agent NEC	1.YA.35.HA-T9	1.YA.35.JA-T9

1.YA.35.^ ^ Pharmacotherapy (local), scalp	percutaneous [needle] approach	topical application or direct instillation into wound
using augmentation agent	1.YA.35.HA-W1	—
using bleaching agent [e.g. liquid nitrogen for hyperpigmentation]	—	1.YA.35.JA-X1
using drying agent [e.g. air, aluminum salts, starch, powders]	—	1.YA.35.JA-X3
using dye	1.YA.35.HA-X4	—
using agent NEC [e.g. synthetic peptides for scar formation]	1.YA.35.HA-Z9	1.YA.35.JA-Z9

1.YA.52.^ ^ Drainage, scalp**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Aspiration, scalp
Drainage [abscess, hematoma], scalp

Excludes: Aspiration biopsy (see [2.YA.71.^ ^](#))

1.YA.52.HA using needle aspiration
1.YA.52.HA-TS using percutaneous approach with drainage tube left in situ
1.YA.52.JA using external manual expression (or separation of infected wound)
1.YA.52.LA using incisional approach

1.YA.53.^ ^ Implantation of internal device, scalp**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Excludes: Expansion of device already in place (see [1.YA.54.^ ^](#))

1.YA.53.DA-TP of tissue expander using endoscopic approach
1.YA.53.LA-TP of tissue expander using open approach
1.YA.53.LA-TS of wound drain using open approach

1.YA.54.^ ^ Management of internal device, scalp**S** ⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Expansion/reduction of tissue expander
Inflation/adjustment of tissue expander

-
- 1.YA.54.HA-G2 using percutaneous (needle) approach and synthetic agent
Includes: silicone, dimethicone, zinc oxide, urea, protectives against UV radiation
- 1.YA.54.HA-W1 using percutaneous (needle) approach and augmentation agent [e.g. saline, soya]
-

1.YA.55.^ ^ Removal of device, scalp**S** ⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Removal of sutures (clips etc.), scalp

Excludes: that done as part of more definitive reparative intervention

-
- 1.YA.55.DA-TP of tissue expander using endoscopic approach
- 1.YA.55.JA-FF of closure device [e.g. suture, clip, etc]
- 1.YA.55.JA-NP of packing (wound)
- 1.YA.55.JA-TS of wound drain using external approach
- 1.YA.55.LA-TP of tissue expander using open approach
-

1.YA.56.^ ^ Removal of foreign body, scalp**S** ⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Extraction of (superficial, embedded) foreign body, scalp (e.g. gravel, tic)

Excludes: Debridement with removal of debris, scalp (see [1.YA.59.^](#))
Evacuation of lice from hair and scalp (see [1.YA.35.^](#))

Note: May involve the use of pulsatile jet lavage or irrigation to facilitate complete removal of foreign body debris.

1.YA.56.JA using external approach [for simple extraction]
1.YA.56.LA using (open) incisional approach

1.YA.58.^ Procurement, scalp

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

1.YA.58.LA-XX-A of full thickness autograft using open approach
1.YA.58.LA-XX-B of split thickness autograft using open approach
1.YA.58.LA-XX-F of free flap using open approach

1.YA.59.^ Destruction, scalp**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes:

Ablation, skin (lesion) of scalp only
 Debridement (simple), scalp
 Dermabrasion [planing], scalp
 Electrolysis, hair of scalp
 Epilation [removal or extraction], scalp
 Laser therapy for treatment of strawberry hemangioma, port wine stain, rosacea, etc., scalp
 Removal (non surgical) of tattoo, scalp
 that for control of bleeding, scalp

Excludes:

Debridement (simple), multiple (or overlapping) sites involving skin of scalp with face (see [1.YF.59.^](#))
 Debridement (simple), skin of scalp with face (see [1.YF.59.^](#))
 Debridement with concomitant graft/flap repair, skin of scalp (see [1.YA.80.^](#))
 Debridement with temporary coverage (graft), scalp (e.g. dermagraft, cadaver graft, xenograft) (see [1.YA.14.^](#))
 Destruction, skin of scalp with skin of face (see [1.YF.59.^](#))
 Destruction, skin of scalp with skin of neck (see [1.YG.59.^](#))
 Laser therapy (green light) for hyperpigmentation, skin of scalp (see [1.YF.12.^](#))
 Phototherapy, skin of scalp (see [1.YF.12.^](#))

1.YA.59.JA-AD	using cryoprobe
1.YA.59.JA-AG	using laser [e.g. carbon dioxide for ablation]
1.YA.59.JA-AL	using electrolysis device
1.YA.59.JA-CF	using mechanical device [sandpaper, wire brush]
1.YA.59.JA-DM	using ruby laser [e.g. for tattoo removal]
1.YA.59.JA-DN	using dye or tunable dye laser
1.YA.59.JA-DP	using yellow light or copper vapor laser
1.YA.59.JA-GX	using device NEC [electrocautery]
1.YA.59.JA-LV	using ligature
1.YA.59.JA-X2	using cold inducing agent/cryorefrigerant [liquid nitrogen]
1.YA.59.JA-X7	using chemical cautery agent

1.YA.80.^ ^ Repair, scalp**S** 28 **E** 15

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 28	Optional	Treatment Status 3A	Status	D	Delayed (closure occurs > 24 hrs post trauma)
				R	Revision
				S	Staged
E 15	Optional	Laceration	Extent	E	5 to 10 cm
				G	Greater than 10 cm
				L	Less than 5 cm

Includes: Debridement [to prepare recipient site] for skin graft/flap repair, scalp
 Repair, skin of head NOS
 Suture, skin of scalp

Excludes: Repair of scalp with forehead (see [1.YF.80.^ ^](#))
 Repair of scalp with nape of neck (see [1.YG.80.^ ^](#))
 Repair of scalp with overlapping areas of face (see [1.YF.80.^ ^](#))
 Temporary tissue coverage only of scalp (see [1.YA.14.^ ^](#))

1.YA.80.JA-FF using closure device (e.g. clip, adhesive skin closure [Steri-Strips])
 1.YA.80.JA-XX-K using homograft (e.g. GRAFTJACKET regenerative tissue matrix)
 1.YA.80.JA-XX-P using cultured tissue
 1.YA.80.LA using apposition technique [e.g. suture, staple]
 1.YA.80.LA-W4 using glue for apposition (e.g. crazy glue, glustitch)
 1.YA.80.LA-XX-A using full-thickness autograft
 1.YA.80.LA-XX-B using split-thickness autograft
 1.YA.80.LA-XX-E using local flap [e.g. rotation, advancement, juri, Z-plasty]
 1.YA.80.LA-XX-F using free flap [e.g. fasciocutaneous]

1.YA.83.^ ^ Transfer, scalp**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Transplant, scalp

1.YA.83.LA-XX-A using open approach and autograft [e.g. hair follicles]

1.YA.87.^ ^ Excision partial, scalp**S** 4 **E** 80

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
E 80	Optional	Mohs Micrographic Surgery	Extent	0	Not applicable (e.g. other type of excision)
				01	One layer removed
				02	Two layers removed
				03	Three layers removed
				04	Four layers removed
				05	Five layers removed
				06	Six layers removed
				D	Greater than 6 layers removed

Includes: Release [excision] scar contracture
Resection, skin (lesion) of scalp only
Scalp reduction

Excludes: Debridement (simple), of skin of scalp only (see [1.YA.59.^ ^](#))
Debridement (simple), skin of scalp with face (see [1.YF.59.^ ^](#))
Debridement (simple), with temporary tissue coverage, scalp (see [1.YA.14.^ ^](#))
Debridement (to prepare recipient site) with graft/flap repair, scalp (see [1.YA.80.^ ^](#))
Excision, overlapping or multiple sites of skin of scalp with face (see [1.YF.87.^ ^](#))
Excision, overlapping or multiple sites of skin of scalp with neck (see [1.YG.87.^ ^](#))

Note: Use this code when the definitive intervention is the (extensive) excision of diseased [e.g. neoplastic] skin which may or may not require a reconstructive skin graft/flap to repair the surgical defect.

1.YA.87.^ ^ Excision partial, scalp	open [excisional] approach	open [excisional] approach and dermatome	open [excisional] approach and laser
without tissue repair	1.YA.87.LA	1.YA.87.LA-AY	1.YA.87.LA-AG
using free flap	1.YA.87.LA-XX-F	1.YA.87.LA-AY-F	1.YA.87.LA-AG-F
using full thickness autograft	1.YA.87.LA-XX-A	1.YA.87.LA-AY-A	1.YA.87.LA-AG-A
using local flap [e.g. rotation, advancement, transposition, Z plasty]	1.YA.87.LA-XX-E	1.YA.87.LA-AY-E	1.YA.87.LA-AG-E
using split thickness autograft	1.YA.87.LA-XX-B	1.YA.87.LA-AY-B	1.YA.87.LA-AG-B

1.YB.^.^ Therapeutic Interventions on Skin of Forehead

- Includes:** Eyebrow (alone)
Forehead (alone)
Forehead and eyebrow
- Excludes:** Overlapping sites involving skin of forehead with skin of face (see [1.YF.^.^](#))

1.YB.12.^.^ Therapy, skin of forehead

- Includes:** Leech therapy
-
- 1.YB.12.JA-LI using external application of living organism (e.g. leeches)
-

1.YB.13.^.^ Control of bleeding, skin of forehead

- Excludes:** Application of pressure dressing (see [1.YB.14.^.](#))
Control of bleeding, skin of forehead with skin of face (see [1.YF.13.^.](#))
Destruction or ablation, skin of forehead for control of bleeding (see [1.YB.59.^.](#))
Systemic pharmacotherapy for control of bleeding (see [1.ZZ.35.^.](#))
that with surgical repair and suturing (see [1.YB.80.^.](#))
-
- 1.YB.13.JA-C2 using local application of antihemorrhagic agent
Includes: aminocaproic acid, aprotinin, phytonadione, thrombin, coagulation factor VIII
-
- 1.YB.13.JN using external manual compression
-

1.YB.14.^.^ Dressing, skin of forehead

- Includes:** Bandaging, forehead (wound)
Change dressing, forehead
Coverage, (temporary tissue), forehead
Debridement [simple] with temporary coverage, skin of forehead
Maggot (larval) therapy
- Excludes:** Dressing, forehead with overlapping sites of face (see [1.YF.14.^.](#))
Dressing, forehead with scalp (see [1.YF.14.^.](#))
-
- 1.YB.14.JA-FJ using occlusive dressing [e.g. hydrocolloid, coal tar, paraffin gauze, hydrogel]
1.YB.14.JA-FN using wet/moist dressing
1.YB.14.JA-GN using pressure dressing
1.YB.14.JA-H1 using medicated dressing
1.YB.14.JA-LI using external application of living organism (e.g. maggots)
1.YB.14.JA-T6 using dry dressing
1.YB.14.JA-XX-L using xenogeneic tissue [e.g. porcine xenograft]
1.YB.14.JA-XX-N using synthetic tissue [e.g. Biobrane, Dermagraft]
-

1.YB.52.^ ^ Drainage, skin of forehead**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Aspiration, skin of forehead
Drainage [abscess, hematoma], skin of forehead

Excludes: Aspiration biopsy (see [2.YB.71.^ ^](#))

1.YB.52.HA using needle aspiration
1.YB.52.HA-TS using percutaneous approach with drainage tube left in situ
1.YB.52.JA using external manual expression (or separation of infected wound)
1.YB.52.LA using incisional approach

1.YB.53.^ ^ Implantation of internal device, skin of forehead**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Excludes: Expansion of device already in place (see [1.YB.54.^ ^](#))

1.YB.53.DA-TP of tissue expander using endoscopic approach
1.YB.53.LA-TP of tissue expander using open approach
1.YB.53.LA-TS of wound drain using open approach

1.YB.54.^ ^ Management of internal device, skin of forehead**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Expansion/reduction of tissue expander
Inflation/adjustment of tissue expander

1.YB.54.HA-G2 using percutaneous (needle) approach and synthetic agent
Includes: silicone, dimethicone, zinc oxide, urea, protectives against UV radiation
1.YB.54.HA-W1 using percutaneous (needle) approach and augmentation agent [e.g. saline, soya]

1.YB.55.^ ^ Removal of device, skin of forehead**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Removal of sutures (clips etc.), skin of forehead

Excludes: removal of synthetic sling material used for ptosis repair [e.g. silicone rod, Mersilene mesh] (see [1.CV.55.^ ^](#)) that done as part of more definitive reparative intervention

1.YB.55.DA-GX	of device NEC using endoscopic approach
1.YB.55.DA-TP	of tissue expander using endoscopic approach
1.YB.55.JA-FF	of closure device [e.g. suture, clip, etc]
1.YB.55.JA-TS	of wound drain using external approach
1.YB.55.LA-GX	of device NEC using open approach
1.YB.55.LA-TP	of tissue expander using open approach

1.YB.56.^ ^ Removal of foreign body, skin of forehead**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Extraction of (superficial, embedded) foreign body, skin of forehead (e.g. gravel, tic)

Excludes: that requiring debridement of skin of forehead to remove debris (see [1.YB.59.^ ^](#))

Note: May involve the use of pulsatile jet lavage or irrigation to facilitate complete removal of foreign body debris.

1.YB.56.JA	using external approach [for simple extraction]
1.YB.56.LA	using incisional approach

1.YB.58.^ ^ Procurement, skin of forehead**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

1.YB.58.LA-XX-A	of full thickness autograft using open approach
1.YB.58.LA-XX-B	of split thickness autograft using open approach
1.YB.58.LA-XX-F	of free flap using open approach

1.YB.59.^ Destruction, skin of forehead**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Ablation, skin (lesion) of forehead only
 Debridement (simple), skin of forehead
 Dermabrasion [planing], skin of forehead
 Destruction, skin (lesion) of forehead only
 Laser therapy for treatment of strawberry hemangioma, port wine stain, rosacea, etc.
 Removal (non surgical) of tattoo, skin of forehead
 that for control of bleeding, skin of forehead

Excludes: Debridement (simple), multiple (or overlapping) sites involving skin of forehead, face or scalp (see [1.YF.59.^](#))
 Debridement (simple), skin of forehead with face (see [1.YF.59.^](#))
 Debridement with concomitant graft/flap repair, skin of forehead (see [1.YB.80.^](#))
 Debridement with concomitant temporary (Dermagraft, cadaver graft, xenograft) coverage, skin of forehead (see [1.YB.14.^](#))
 Destruction, skin of forehead with scalp (see [1.YF.59.^](#))
 Destruction, skin of forehead with skin of face (see [1.YF.59.^](#))
 Laser therapy (green light) for hyperpigmentation, skin of forehead (see [1.YF.12.^](#))
 Phototherapy, skin of forehead (see [1.YF.12.^](#))

1.YB.59.JA-AD using cryoprobe
 1.YB.59.JA-AG using laser [e.g. carbon dioxide for ablation]
 1.YB.59.JA-CF using mechanical device [sandpaper, wire brush]
 1.YB.59.JA-DM using ruby laser [e.g. for tattoo removal]
 1.YB.59.JA-DN using dye or tunable dye laser
 1.YB.59.JA-DP using yellow light or copper vapor laser
 1.YB.59.JA-GX using device NEC
 1.YB.59.JA-X2 using cold inducing agent/cryorefrigerant [liquid nitrogen]
 1.YB.59.JA-X7 using chemical cautery agent

1.YB.74.^ Fixation, skin of forehead**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Coronal forehead [eyebrow] lift
 Eyebrow lift (by direct excision)

1.YB.74.DA using endoscopic approach
 1.YB.74.LA using open approach

1.YB.80.^ Repair, skin of forehead**S** 28 **E** 15

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 28	Optional	Treatment Status 3A	Status	D	Delayed (closure occurs > 24 hrs post trauma)
				R	Revision
				S	Staged
E 15	Optional	Laceration	Extent	E	5 to 10 cm
				G	Greater than 10 cm
				L	Less than 5 cm

Includes: Debridement [to prepare recipient site] for skin graft/flap repair
Suture, skin of forehead
that with or without removal of tissue expanders
that with or without tissue graft/flap

Excludes: Repair, forehead with overlapping sites of face (see [1.YF.80.^](#))
Repair, forehead with scalp (see [1.YF.80.^](#))
Temporary tissue coverage of forehead (see [1.YB.14.^](#))

1.YB.80.JA-FF using closure device (e.g. clip, adhesive skin closure [Steri-Strips])
1.YB.80.JA-XX-K using homograft (e.g. GRAFTJACKET regenerative tissue matrix)
1.YB.80.JA-XX-P using cultured tissue
1.YB.80.LA using apposition technique [e.g. suturing, stapling]
1.YB.80.LA-W4 using glue (e.g. crazy glue, glustitch)
1.YB.80.LA-XX-A using full-thickness autograft
1.YB.80.LA-XX-B using split-thickness autograft
1.YB.80.LA-XX-E using local flap [e.g. rotation, advancement, transposition, Z-plasty]
1.YB.80.LA-XX-F using free flap [e.g. microvascular free flap]

1.YB.87.^ ^ Excision partial, skin of forehead**S** 5 **E** 80

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
E 80	Optional	Mohs Micrographic Surgery	Extent	0	Not applicable (e.g. other type of excision)
				01	One layer removed
				02	Two layers removed
				03	Three layers removed
				04	Four layers removed
				05	Five layers removed
				06	Six layers removed
				D	Greater than 6 layers removed

Includes: Release [excision] scar contracture, forehead
Resection, skin (lesion) of forehead only

Excludes: Debridement (simple), skin of forehead with other sites of face (see [1.YF.59.^ ^](#))
Debridement (to prepare recipient site) for skin graft or flap repair, forehead (see [1.YB.80.^ ^](#))
Debridement with temporary (Dermagraft, cadaver allograft, xenograft) coverage, skin of forehead (see [1.YB.14.^ ^](#))
Dermabrasion [planing], skin of forehead (see [1.YB.59.^ ^](#))
Excision, overlapping or multiple sites of skin of forehead with face or scalp (see [1.YF.87.^ ^](#))
Procurement, skin of forehead for skin graft or free flap (see [1.YB.58.^ ^](#))
Simple debridement (with or without foreign body removal), skin of forehead (see [1.YB.59.^ ^](#))

Code Also: Any intraoperative microscope assistance (see [3.YZ.94.^ ^](#))

Note: Use this code when the definitive intervention is the (extensive) excision of diseased [e.g. neoplastic] skin which may or may not require a reconstructive skin graft or flap to repair the surgical defect.

1.YB.87.^ ^ Excision partial, skin of forehead	open [excisional] approach	open [excisional] approach and dermatome	open [excisional] approach and laser
without tissue repair	1.YB.87.LA	1.YB.87.LA-AY	1.YB.87.LA-AG
using cultured tissue	1.YB.87.LA-XX-P	1.YB.87.LA-AY-P	1.YB.87.LA-AG-P
using free flap	1.YB.87.LA-XX-F	1.YB.87.LA-AY-F	1.YB.87.LA-AG-F
using full thickness autograft	1.YB.87.LA-XX-A	1.YB.87.LA-AY-A	1.YB.87.LA-AG-A
using local flap [e.g. rotation, advancement, transposition, Z plasty]	1.YB.87.LA-XX-E	1.YB.87.LA-AY-E	1.YB.87.LA-AG-E
using split thickness autograft	1.YB.87.LA-XX-B	1.YB.87.LA-AY-B	1.YB.87.LA-AG-B

1.YC.^.^ Therapeutic Interventions on Skin of Ear

- Includes:** Ear lobe (lobule)
External auricular canal
- Excludes:** Overlapping sites involving skin of ear with skin of face (see [1.YF.^.^](#))

1.YC.12.^.^ Therapy, skin of ear

- Includes:** Leech therapy
-
- 1.YC.12.JA-LI using external application of living organism (e.g. leeches)
-

1.YC.13.^.^ Control of bleeding, skin of ear

- Excludes:** Application of pressure dressing (see [1.YC.14.^.](#))
Control of bleeding, skin of ear with skin of face (see [1.YF.13.^.](#))
Destruction or ablation, skin of ear for control of bleeding (see [1.YC.59.^.](#))
Systemic pharmacotherapy for control of bleeding (see [1.ZZ.35.^.](#))
that with surgical repair and suturing (see [1.YC.80.^.](#))
-
- 1.YC.13.JA-C2 using local application of antihemorrhagic agent
Includes: aminocaproic acid, aprotinin, phytonadione, thrombin, coagulation factor VIII
-
- 1.YC.13.JN using external manual compression
-

1.YC.14.^.^ Dressing, skin of ear

- Includes:** Bandaging, ear (wound)
Change dressing, skin of ear
Coverage [temporary tissue], ear
Debridement [simple] with temporary tissue coverage, skin of ear
Maggot (larval) therapy
- Excludes:** Binding or mould dressing, ear (see [1.DA.14.^.](#))
Dressing, ear with overlapping sites of face (see [1.YF.14.^.](#))
Dressing, ear with scalp (see [1.YB.14.^.](#))
-
- 1.YC.14.JA-FJ using occlusive dressing [e.g. hydrocolloid, coal tar, paraffin gauze, hydrogel]
1.YC.14.JA-FN using wet/moist dressing
1.YC.14.JA-GN using pressure dressing
1.YC.14.JA-H1 using medicated dressing
1.YC.14.JA-LI using external application of living organism (e.g. maggots)
1.YC.14.JA-T6 using dry dressing
1.YC.14.JA-XX-L using xenogeneic tissue [e.g. porcine xenograft]
1.YC.14.JA-XX-N using synthetic tissue [e.g. Biobrane, Derma Graft]
-

1.YC.52.^ ^ Drainage, skin of ear**S** ⁴ **L** ¹²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Aspiration, skin of ear lobe
Drainage [abscess, hematoma], skin of ear lobe

Excludes: Aspiration biopsy (see [2.YC.71.^ ^](#))
Drainage (abscess, hematoma) of auricle or cartilage of ear (see [1.DA.52.^ ^](#))

1.YC.52.HA using needle aspiration
1.YC.52.HA-TS using percutaneous approach with drainage tube left in situ
1.YC.52.JA using external manual expression (or separation of infected wound)
1.YC.52.LA using incisional approach

1.YC.56.^ ^ Removal of foreign body, skin of ear**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Extraction of (infected) earring, lobe of ear
Extraction of (superficial, embedded) foreign body, skin of ear
Removal of staple, ear lobe

Excludes: Debridement for removal of debris, skin of ear (see [1.YC.59.^ ^](#))
Extraction of (infected) earring, auricle of ear (see [1.DA.56.^ ^](#))

Note: May involve the use of irrigation to facilitate complete removal of foreign body debris.

1.YC.56.JA using external approach [for simple extraction]
1.YC.56.LA using incisional approach

1.YC.58.^.^ Procurement, skin of ear**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Procurement of subcutaneous tissue of ear
Procurement, fat from ear lobe

Excludes: that with cartilage (see [1.DA.58.^.^](#))

1.YC.58.LA-XX-A of autograft [e.g. fat] using open approach

1.YC.59.^.^ Destruction, skin of ear**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Ablation, skin (lesion) of ear lobe
Debridement, skin of ear (lobe)
Dermabrasion [planing], skin of ear
Electrolysis, skin of ear
Epilation [removal or extraction], skin of ear
Laser therapy for treatment of strawberry hemangioma, port wine stain, rosacea, etc., skin of ear
that for control of bleeding, skin of ear

Excludes: Debridement (simple), multiple (or overlapping sites) involving skin of ear and face (see [1.YF.59.^^](#))
 Debridement with concomitant graft/flap repair, skin of ear (see [1.YC.80.^^](#))
 Debridement with concomitant temporary (Dermagraft, cadaver graft, xenograft) coverage, skin of ear (see [1.YC.14.^^](#))
 Destruction, lesion extending into cartilage of ear (see [1.DA.59.^^](#))
 Destruction, skin of ear with skin of face (see [1.YF.59.^^](#))

1.YC.59.JA-AD using cryoprobe
 1.YC.59.JA-AG using laser [e.g. carbon dioxide for ablation]
 1.YC.59.JA-AL using electrolysis device
 1.YC.59.JA-CF using mechanical device [sandpaper, wire brush]
 1.YC.59.JA-DN using dye or tunable dye laser
 1.YC.59.JA-DP using yellow light or copper vapor laser
 1.YC.59.JA-GX using device NEC [electrocautery]
 1.YC.59.JA-X2 using cold inducing agent/cryorefrigerant [liquid nitrogen]
 1.YC.59.JA-X7 using chemical cautery agent

1.YC.80.^^ Repair, skin of ear

S 28 **L** 2 **E** 15

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 28	Optional	Treatment Status 3A	Status	D	Delayed (closure occurs > 24 hrs post trauma)
				R	Revision
				S	Staged
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)
E 15	Optional	Laceration	Extent	E	5 to 10 cm
				G	Greater than 10 cm
				L	Less than 5 cm

Includes: Debridement [to prepare recipient site] for skin graft/flap repair
Repair, (bifid) ear lobe
Suture, skin of ear

Excludes: Repair of auricular cartilage (pinna) of ear (see [1.DA.80.^^](#))
Repair, skin of ear with overlapping sites of face (see [1.YF.80.^^](#))
Repair, skin of ear with scalp (see [1.YB.80.^^](#))
Temporary tissue coverage only, skin of ear (see [1.YC.14.^^](#))

1.YC.80.JA-FF	using closure device (e.g. clip, adhesive skin closure [Steri-Strips])
1.YC.80.JA-XX-K	using homograft (e.g. GRAFTJACKET regenerative tissue matrix)
1.YC.80.JA-XX-P	using cultured tissue
1.YC.80.LA	using apposition technique [e.g. suture]
1.YC.80.LA-W4	using glue for apposition (e.g. crazy glue, glustitch)
1.YC.80.LA-XX-A	using full-thickness autograft
1.YC.80.LA-XX-B	using split-thickness autograft
1.YC.80.LA-XX-E	using local flap [e.g. rotation, advancement, transposition, Z-plasty]

1.YC.87.^^ Excision partial, skin of ear

S 4 **L** 2 **E** 80

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)
E 80	Optional	Mohs Micrographic Surgery	Extent	0	Not applicable (e.g. other type of excision)
				01	One layer removed
				02	Two layers removed
				03	Three layers removed
				04	Four layers removed
				05	Five layers removed
				06	Six layers removed
				D	Greater than 6 layers removed

Includes: Release [excision] scar contracture, ear
Resection, skin (lesion) of ear

Excludes: Debridement (simple), with temporary coverage, skin of ear (see [1.YC.14.^^](#))
 Debridement [to prepare recipient site] for skin graft/flap, ear (see [1.YC.80.^^](#))
 Dermabrasion [planing], skin of ear (see [1.YC.59.^^](#))
 Excision of overlapping or multiple sites of skin of ear and face (see [1.YF.87.^^](#))
 Resection of lesion extending into cartilage of ear (see [1.DA.87.^^](#))
 Simple debridement, skin of ear lobe (see [1.YC.59.^^](#))

Code Also: Any intraoperative microscope assistance (see [3.YZ.94.^^](#))

Note: Use this code when the definitive intervention is the (extensive) excision of diseased [e.g. neoplastic] skin which may or may not require a reconstructive skin graft/flap to repair the surgical defect.

1.YC.87.^^ Excision partial, skin of ear	open [excisional] approach	open [excisional] approach and laser
using apposition technique [e.g. suture, glue] for closure	1.YC.87.LA	1.YC.87.LA-AG
using split thickness autograft	1.YC.87.LA-XX-B	1.YC.87.LA-AG-B
using full thickness autograft	1.YC.87.LA-XX-A	1.YC.87.LA-AG-A
using local flap [e.g. advancement flap]	1.YC.87.LA-XX-E	1.YC.87.LA-AG-E

1.YD.^^.^^ Therapeutic Interventions on Skin of Nose

Excludes: Nasal cartilage (see [1.ES.^^.^^](#))
 Nose (internal structures) (see [1.ET.^^.^^](#))
 Overlapping sites involving skin of nose with skin of face (see [1.YF.^^.^^](#))

1.YD.12.^^ Therapy, skin of nose

Includes: Leech therapy

1.YD.12.JA-LI	using external application of living organism (e.g. leeches)
---------------	--

1.YD.13.^^ Control of bleeding, skin of nose

Excludes: Application of pressure dressing (see [1.YD.14.^^](#))
 Control of bleeding, skin of nose with skin of face (see [1.YF.13.^^](#))
 Control of epistaxis (nosebleed) (see [1.ET.13.^^](#))
 Destruction or ablation, skin of nose for control of bleeding (see [1.YD.59.^^](#))
 Systemic pharmacotherapy for control of bleeding (see [1.ZZ.35.^^](#))
 that with surgical repair and suturing (see [1.YD.80.^^](#))

1.YD.13.JA-C2	using local application of antihemorrhagic agent
	Includes: aminocaproic acid, aprotinin, phytonadione, thrombin, coagulation factor VIII
1.YD.13.JN	using external manual compression

1.YD.14.^ ^ Dressing, skin of nose

Includes: Bandaging, nose (wound)
 Change dressing, skin of nose
 Coverage [temporary tissue], skin of nose
 Debridement [simple] with temporary tissue coverage, skin of nose

1.YD.14.JA-FJ	using occlusive dressing [e.g. hydrocolloid, coal tar, paraffin gauze, hydrogel]
1.YD.14.JA-FN	using wet/moist dressing
1.YD.14.JA-GN	using pressure dressing
1.YD.14.JA-H1	using medicated dressing
1.YD.14.JA-T6	using dry dressing
1.YD.14.JA-XX-L	using xenogeneic tissue [e.g. porcine xenograft]
1.YD.14.JA-XX-N	using synthetic tissue [e.g. Biobrane, Dermagraft]

1.YD.52.^ ^ Drainage, skin of nose**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Aspiration, skin of nose
 Drainage [abscess, hematoma], skin of nose

Excludes: Aspiration biopsy (see [2.YD.71.^ ^](#))

1.YD.52.HA	using needle aspiration
1.YD.52.HA-TS	using percutaneous approach with drainage tube left in situ
1.YD.52.JA	using external manual expression (or separation of infected wound)
1.YD.52.LA	using incisional approach

1.YD.56.^ ^ Removal of foreign body, skin of nose**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Extraction of (superficial, embedded) foreign body, skin of nose (e.g. gravel, tic)

Excludes: Debridement with removal of debris, skin of nose (see [1.YD.59.^ ^](#))

Note: May involve the use of pulsatile jet lavage or irrigation to facilitate complete removal of foreign body debris.

1.YD.56.JA	using external approach [for simple extraction]
1.YD.56.LA	using incisional approach

1.YD.59.^ Destruction, skin of nose**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Ablation, skin (lesion) of nose
 Debridement (simple), skin of nose
 Dermabrasion [planing], skin of nose
 Destruction, skin (lesion) of nose only
 Laser therapy for treatment of strawberry hemangioma, port wine stain, rosacea, etc., skin of nose

Excludes: Debridement (simple), multiple or overlapping sites involving skin of nose with skin of face (see [1.YF.59.^](#))
 Debridement (simple), skin of nose with face (see [1.YF.59.^](#))
 Debridement with concomitant graft/flap repair, skin of nose (see [1.YD.80.^](#))
 Debridement with concomitant temporary (Dermagraft, cadaver graft, xenograft) coverage, skin of nose (see [1.YD.14.^](#))
 Destruction, skin (lesion) of nose with skin of face (see [1.YF.59.^](#))
 Laser therapy (green light) for hyperpigmentation, skin of nose (see [1.YF.12.^](#))
 Phototherapy, skin of nose (see [1.YF.12.^](#))

1.YD.59.JA-AD using cryoprobe
 1.YD.59.JA-AG using laser [e.g. carbon dioxide for ablation]
 1.YD.59.JA-CF using mechanical device [sandpaper, wire brush]
 1.YD.59.JA-DN using dye or tunable dye laser
 1.YD.59.JA-DP using yellow light or copper vapor laser
 1.YD.59.JA-GX using device NEC
 1.YD.59.JA-X2 using cold inducing agent/cryorefrigerant [liquid nitrogen]
 1.YD.59.JA-X7 using chemical cautery agent

1.YD.80.^ Repair, skin of nose**S** 28 **E** 15

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 28	Optional	Treatment Status 3A	Status	D	Delayed (closure occurs > 24 hrs post trauma)
				R	Revision
				S	Staged

1.YD.80.LA-XX-B using split-thickness autograft
1.YD.80.LA-XX-E using local flap [e.g. rotation, advancement, transposition, Z-plasty]
1.YD.80.LA-XX-F using free flap

1.YD.87.^ Excision partial, skin of nose

S 5 **E** 80

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
E 80	Optional	Mohs Micrographic Surgery	Extent	0	Not applicable (e.g. other type of excision)
				01	One layer removed
				02	Two layers removed
				03	Three layers removed
				04	Four layers removed
				05	Five layers removed
				06	Six layers removed
				D	Greater than 6 layers removed

Includes: Release [excision] scar contracture, nose
Resection, skin (lesion) of nose only

Excludes: Debridement (simple), skin of nose (see [1.YD.59.^^](#))
 Debridement (simple), with temporary tissue coverage, skin of nose (see [1.YD.14.^^](#))
 Debridement [to prepare recipient site] for skin graft/flap, nose (see [1.YD.80.^^](#))
 Dermabrasion [planing], skin of nose (see [1.YD.59.^^](#))
 Excision, overlapping or multiple sites of skin of nose with face or scalp (see [1.YF.87.^^](#))
 Resection, skin lesion extending into cartilage of nose (see [1.ES.87.^^](#))

Code Also: Any intraoperative microscope assistance (see [3.YZ.94.^^](#))

Note: Use this code when the definitive intervention is the extensive excision of diseased [e.g. neoplastic] or traumatized [e.g. burned] skin which may or may not require a reconstructive skin graft/flap to repair the surgical defect.

1.YD.87.^^ Excision partial, skin of nose	open [excisional] approach	open [excisional] approach and dermatome	open [excisional] approach and laser
using apposition technique [e.g. suture, glue] for closure	1.YD.87.LA	1.YD.87.LA-AY	1.YD.87.LA-AG
using full thickness autograft	1.YD.87.LA-XX-A	1.YD.87.LA-AY-A	1.YD.87.LA-AG-A
using split thickness autograft	1.YD.87.LA-XX-B	1.YD.87.LA-AY-B	1.YD.87.LA-AG-B
using local flap [e.g. advancement flap]	1.YD.87.LA-XX-E	1.YD.87.LA-AY-E	1.YD.87.LA-AG-E

1.YE.^^.^^ Therapeutic Interventions on Lip

Includes: Mucosa of lip

Excludes: Oral cavity (and surrounding structures) (see [1.FK.^^.^^](#))
 Oral mucosa (see [1.FG.^^.^^](#))
 Overlapping sites involving skin of lip with skin of face (see [1.YF.^^.^^](#))

1.YE.14.^^ Dressing, lip

Includes: Bandaging, wound of lip
 Change dressing, lip
 Coverage [temporary tissue], lip
 Debridement with [temporary tissue] coverage, lip

Excludes: Dressing, lip with overlapping sites of face (see [1.YF.14.^^](#))

1.YE.14.JA-FJ	using occlusive dressing [e.g. hydrocolloid, coal tar, paraffin gauze, hydrogel]
1.YE.14.JA-FN	using wet/moist dressing
1.YE.14.JA-GN	using pressure dressing
1.YE.14.JA-H1	using medicated dressing
1.YE.14.JA-T6	using dry dressing
1.YE.14.JA-XX-L	using xenogeneic tissue [e.g. porcine xenograft]
1.YE.14.JA-XX-N	using synthetic tissue [e.g. Biobrane, Dermagraft]

1.YE.52.^ Drainage, lip**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Aspiration, lip
Drainage [abscess, hematoma], lip

Excludes: Aspiration biopsy (see [2.YE.71.^](#))

1.YE.52.HA using needle aspiration
1.YE.52.HA-TS using percutaneous approach with drainage tube left in situ
1.YE.52.JA using external manual expression (or separation of infected wound)
1.YE.52.LA using incisional approach

1.YE.56.^ Removal of foreign body, lip**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Extraction of (superficial, embedded) foreign body, lip

Excludes: Debridement with removal of debris, lip (see [1.YE.59.^](#))
Removal of foreign body, buccal mucosa (see [1.FG.56.^](#))

Note: May involve the use of pulsatile jet lavage or irrigation to facilitate complete removal of foreign body debris.

1.YE.56.JA using external approach [extraction]
1.YE.56.LA using incisional approach

1.YE.59.^ Destruction, lip**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Ablation, skin (lesion) of lip only
Debridement (simple), skin of lip
Dermabrasion [planing], lip
Laser therapy (for removal of strawberry hemangioma, port wine stain, rosacea) skin of lip only

Excludes: Debridement (simple), multiple (or overlapping) sites involving skin of lip with skin of face (see [1.YF.59.^^](#))
 Debridement (simple), skin of lip with face (see [1.YF.59.^^](#))
 Debridement with concomitant temporary (Dermagraft, cadaver graft, xenograft) coverage, skin of lip (see [1.YE.14.^^](#))
 Destruction, (lesion) skin of lip with skin of face (see [1.YF.59.^^](#))
 Laser therapy (green light) for hyperpigmentation, skin of lip (see [1.YF.12.^^](#))
 Phototherapy, skin of lip (see [1.YF.12.^^](#))

1.YE.59.JA-AD using cryoprobe
 1.YE.59.JA-AG using laser
 1.YE.59.JA-CF using mechanical device [sandpaper, wire brush]
 1.YE.59.JA-GX using device NEC
 1.YE.59.JA-X2 using cold inducing agent/cryorefrigerant [liquid nitrogen]
 1.YE.59.JA-X7 using chemical cautery agent

1.YE.74.^^ Fixation, lip**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Lip lift

1.YE.74.LA using open approach

1.YE.78.^^ Repair by decreasing size, lip**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Lip shave
 Reduction cheiloplasty
 Sculpting, lip (without augmentation)

1.YE.78.LA using open (excisional) approach
 1.YE.78.LA-AG using open (excisional) approach and laser

1.YE.79.^.^ Repair by increasing size, lip**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Augmentation cheiloplasty
Fat graft, lip

1.YE.79.^.^ Repair by increasing size, lip	open [excisional] approach	percutaneous [needle] approach
using autograft [e.g. autogenic fat graft]	1.YE.79.LA-XX-A	1.YE.79.HA-XX-A
using synthetic tissue [e.g. silicone]	1.YE.79.LA-XX-N	1.YE.79.HA-XX-N
using xenogeneic tissue [e.g. bovine collagen xenograft]	1.YE.79.LA-XX-L	1.YE.79.HA-XX-L
using homograft [e.g. alloderm]	1.YE.79.LA-XX-K	—

1.YE.80.^.^ Repair, lip**S** 28 **E** 15

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 28	Optional	Treatment Status 3A	Status	D	Delayed (closure occurs > 24 hrs post trauma)
				R	Revision
				S	Staged
E 15	Optional	Laceration	Extent	E	5 to 10 cm
				G	Greater than 10 cm
				L	Less than 5 cm

Includes: Cheiloplasty
Debridement [to prepare recipient site] for skin graft/flap repair, lip
Repair, cleft lip
Suture, skin and mucosa of lip
Switch, lip

Excludes: Augmentation, lip (see [1.YE.79.^](#))
 Reduction cheiloplasty (see [1.YE.78.^](#))
 Repair of buccal mucosa (see [1.FG.80.^](#))
 Repair, skin of lip and scalp (see [1.YF.80.^](#))
 Repair, skin of lip with overlapping sites of face (see [1.YF.80.^](#))
 Temporary tissue coverage, skin of lip (see [1.YE.14.^](#))

Code Also: any reconstruction of nasolabial musculature (for example, in cleft repair cheilorhinoplasty) (see [1.EP.80.^](#))

1.YE.80.LA using apposition technique [e.g. suture]
 1.YE.80.LA-W4 using glue for apposition (e.g. crazy glue, glustitch)
 1.YE.80.LA-XX-A using full thickness autograft
 1.YE.80.LA-XX-B using split thickness autograft
 1.YE.80.LA-XX-E using local flap [e.g. rotation, advancement, transposition, Zplasty, Millard]
 1.YE.80.LA-XX-K using homograft (e.g. alloderm)

1.YE.87.^ Excision partial, lip

S 5 **E** 80

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
E 80	Optional	Mohs Micrographic Surgery	Extent	0	Not applicable (e.g. other type of excision)
				01	One layer removed
				02	Two layers removed
				03	Three layers removed
				04	Four layers removed
				05	Five layers removed
				06	Six layers removed
				D	Greater than 6 layers removed

Includes: Release [excision] scar contracture, lip
 Resection, skin (lesion) of lip only
 Vermilionectomy

Excludes: Debridement (simple), skin of lip (see [1.YE.59.^^](#))
 Debridement (simple), skin of lip with other sites of face (see [1.YF.59.^^](#))
 Debridement [to prepare recipient site] for skin graft/flap repair, lip (see [1.YE.80.^^](#))
 Dermabrasion [planing], lip (see [1.YE.59.^^](#))
 Excision, buccal mucosa lesion involving inner aspect of lip only (see [1.FG.87.^^](#))
 Excision, overlapping or multiple sites of skin of lip with face (see [1.YF.87.^^](#))

Code Also: Any intraoperative microscope assistance (see [3.YZ.94.^^](#))

Note: Use this code when the definitive intervention is the (extensive) excision of diseased [e.g. neoplastic] skin which may or may not require a reconstructive skin graft/flap to repair the surgical defect.

1.YE.87.^^ Excision partial, lip	open [excisional] approach	open [excisional] approach and laser	open with wedge resection
without tissue repair	1.YE.87.LA	1.YE.87.LA-AG	1.YE.87.WJ
using local flap [e.g. rotation, advancement, transposition, Z plasty]	1.YE.87.LA-XX-E	1.YE.87.LA-AG-E	1.YE.87.WJ-XX-E

1.YF.^^.^^ Therapeutic Interventions on Skin of Face

Includes: Skin of cheek
 Skin of chin
 Skin of overlapping sites of face
 Skin of overlapping sites of face, neck and scalp
 Skin of temple

Excludes: Overlapping sites involving skin of neck with skin of scalp alone (see [1.YG.^^.^^](#))
 Skin of ear alone (see [1.YC.^^.^^](#))
 Skin of eyelid alone (see [1.CX.^^.^^](#))
 Skin of forehead alone (see [1.YB.^^.^^](#))
 Skin of lip alone (see [1.YE.^^.^^](#))
 Skin of neck alone (see [1.YG.^^.^^](#))
 Skin of nose alone (see [1.YD.^^.^^](#))
 Skin of scalp alone (see [1.YA.^^.^^](#))

1.YF.06.^^ Hypothermy, skin of face

Includes: Application of cold, skin of face
 that for skin of forehead, nose, ear, neck and/or overlapping sites

1.YF.06.JA-KL	using ice pack
1.YF.06.JA-KM	using cool/cold compress or water soak

1.YF.07.^.^ Hyperthermy, skin of face

Includes: Application of heat, skin of forehead
that for skin of forehead, nose, ear, neck and/or overlapping sites

1.YF.07.JA-KH	using dry heat [e.g. heating pad, hot pack]
1.YF.07.JA-KJ	using warm compress (intermittent or constant)

1.YF.09.^.^ Stimulation, skin of face

Includes: Electrostimulation, skin of face
Radiothermoplasty, skin of face

Note: Involves stimulation at surface of skin (wound) to produce collagen deposit

1.YF.09.JA-AW	using radiofrequency probe [e.g. Thermage, ThermoCool, ThermoLift]
1.YF.09.JA-DV	using external electrical stimulating device

1.YF.12.^.^ Therapy, skin of face

Includes: Leech therapy
Phototherapy, skin of face
Phototherapy, skin of neck
Therapy, laser, skin of face (for hyperpigmentation)
Therapy, laser, skin of neck (for hyperpigmentation)

Excludes: Destruction [lesion], skin of face or neck (see [1.YF.59.^.](#))
Therapy, skin of scalp (see [1.YA.12.^.](#))

1.YF.12.JA-AG	using laser NEC[e.g. green light laser]
1.YF.12.JA-DQ	using ultraviolet light
1.YF.12.JA-LI	using external application of living organism (e.g. leeches)

1.YF.13.^.^ Control of bleeding, skin of face

Excludes: Application of pressure dressing (see [1.YF.14.^.](#))
Destruction or ablation, skin of face for control of bleeding (see [1.YF.59.^.](#))
Systemic pharmacotherapy for control of bleeding (see [1.ZZ.35.^.](#))
that with surgical repair and suturing (see [1.YF.80.^.](#))

1.YF.13.JA-C2	using local application of antihemorrhagic agent Includes: aminocaproic acid, aprotinin, phytonadione, thrombin, coagulation factor VIII
1.YF.13.JN	using external manual compression

1.YF.14.^ ^ Dressing, skin of face

Includes: Application, pressure dressing to control bleeding, skin
 Bandaging, face (wound)
 Change dressing, face
 Coverage [temporary tissue], face
 Debridement [simple] with temporary tissue coverage, face
 Dressing, skin of face with neck or scalp
 Maggot (larval) therapy

Excludes: Dressing (topical) , nose alone (see [1.YD.14.^ ^](#))
 Dressing, forehead alone (see [1.YB.14.^ ^](#))
 Dressing, lip alone (see [1.YE.14.^ ^](#))
 Dressing, scalp alone (see [1.YA.14.^ ^](#))
 Dressing, skin of ear lobe alone (see [1.YC.14.^ ^](#))

1.YF.14.JA-FJ	using occlusive dressing [e.g. hydrocolloid, coal tar, paraffin gauze, hydrogel]
1.YF.14.JA-FN	using wet/moist dressing
1.YF.14.JA-GN	using pressure dressing
1.YF.14.JA-H1	using medicated dressing
1.YF.14.JA-LI	using external application of living organism (e.g. maggots)
1.YF.14.JA-NP	using packing
1.YF.14.JA-T6	using dry dressing
1.YF.14.JA-XX-L	using xenogeneic tissue [e.g. porcine xenograft]
1.YF.14.JA-XX-N	using synthetic tissue [e.g. Biobrane, Dermagraft]

1.YF.26.^ ^ Brachytherapy, skin of face**S** 35

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 35	Optional	Implant Status	Status	P M	Permanent implant – Radioactive source left in place permanently
				T M	Temporary implant – Radioactive source removed after course of treatment is complete

Includes:	Endocurietherapy, skin of face (including skin of scalp, forehead, ear, nose, lip, neck) Implantation of radioactive material, skin of face (including skin of scalp, forehead, ear, nose, lip, neck) Interstitial radiation therapy, skin of face (including skin of scalp, forehead, ear, nose, lip, neck) that involving overlapping sites of scalp, lip, forehead, nose, ear and neck
Excludes:	Brachytherapy, internal structures of nose (see 1.ET.26.^^)
Code Also:	Any concomitant implantation of brachytherapy applicators or conduits [e.g. needles, catheters] to gain access to treatment site (see 1.YF.53.^^)
Note:	There are typically two distinct phases required to complete the process of brachytherapy. The first phase involves the insertion of non-radioactive applicators or conduits [e.g. hollow needles, catheters, stents etc.] that receive or transmit the radioactive material into the body. The second phase involves the after loading of the radioactive material [e.g. seeds, pellets, wires, etc.] into the applicator or conduit.
1.YF.26.HA	using percutaneous (transcatheter or transneedle) approach
1.YF.26.JA	using external approach [e.g. surface mould]
1.YF.26.LA	using open approach

1.YF.27.^^ Radiation, skin of face

Includes:	Teletherapy, skin of face (including skin of scalp, forehead, ear, nose, lip, neck) Therapy, radiation [radiotherapy], skin of face (including skin of scalp, forehead, ear, nose, lip, neck)
Note:	May involve overlapping sites of scalp, lip, forehead, nose, ear, and neck.

1.YF.27.JA	using external beam
------------	---------------------

1.YF.35.^^ Pharmacotherapy (local), skin of face

Includes:	Application of agent, skin of face Cleanse, wound of skin of face NEC Injection, skin of face Instillation, skin of face Irrigation, skin of face Rubbing [massage] of skin with agent Skin care, topical treatment Tattoo, skin of face that for treatment of skin of forehead, nose, ear, neck and overlapping sites
Excludes:	Assistance for personal hygiene (see 7.SC.01.^^) Irrigation with drainage, skin of face (see 1.YF.52.^^) Systemic pharmacotherapy (see 1.ZZ.35.^^) that for control of bleeding (see 1.YF.13.^^)
Omit code:	When skin preparation is a part of another intervention

1.YF.35.^ ^ Pharmacotherapy (local), skin of face	percutaneous [needle] approach	topical application or direct instillation into wound
using antiinfective irrigating solution	—	1.YF.35.JA-D1 Includes: • chlorexidine, neomycin
using salt irrigating solution	—	1.YF.35.JA-D2 Includes: • sodium chloride
using other irrigating solution	—	1.YF.35.JA-D3 Includes: • sorbitol, mannitol
using antifungal agent	—	1.YF.35.JA-G1 Includes: • nystatin, clotrimazole, miconazole, tolnaftate
using emollient and protective agent	—	1.YF.35.JA-G2 Includes: • silicone, dimethicone, zinc oxide, urea, protectives against UV radiation
using wound and ulcer treatment agent	—	1.YF.35.JA-G3 Includes: • sutilains, collagenase, dextranomer
using antipruritic agent	—	1.YF.35.JA-G4 Includes: • diphenhydramine, lidocaine, benzocaine, crotonitron, calamine
using antipsoriatic agent	—	1.YF.35.JA-G5 Includes: • coal tar preparations, anthralin, methoxsalen)
using antibiotic and chemotherapeutic agent	1.YF.35.HA-G6 Includes: • fusidic acid, bacitracin, polymyxin, mupirocin, idoxuridine, acyclovir for topical use	1.YF.35.JA-G6 Includes: • fusidic acid, bacitracin, polymyxin, mupirocin, idoxuridine, acyclovir for topical use
using corticosteroid agent	1.YF.35.HA-G7 Includes: • hydrocortisone, triamcinolone, clobetasol, betamethasone	1.YF.35.JA-G7 Includes: • hydrocortisone, triamcinolone, clobetasol, betamethasone
using antiseptic and disinfectant	—	1.YF.35.JA-G8 Includes: • chlorhexadine, hexachlorophene, iodine, clloquinol, isopropyl alcohol
using other dermatological preparation	—	1.YF.35.JA-H3 Includes: • medicated shampoos, wart preparations, minoxidil
using immunomodulating agent	1.YF.35.HA-M7 Includes: • BCG, interferon alpha, filgastrim, interferon beta 1B, levamisole	—
using pharmacological agent NEC	1.YF.35.HA-T9	1.YF.35.JA-T9

1.YF.35.^ ^ Pharmacotherapy (local), skin of face	percutaneous [needle] approach	topical application or direct instillation into wound
using augmentation agent	1.YF.35.HA-W1	—
using bleaching agent [e.g. liquid nitrogen for hyperpigmentation]	—	1.YF.35.JA-X1
using drying agent [e.g. air, aluminum salts, starch, powders]	—	1.YF.35.JA-X3
using dye	1.YF.35.HA-X4	—
using agent NEC [e.g. synthetic peptides for scar formation]	1.YF.35.HA-Z9	1.YF.35.JA-Z9
using local anesthetic agent	1.YF.35.HA-P1	1.YF.35.JA-P1

1.YF.52.^ ^ Drainage, skin of face**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Aspiration, skin of face
Drainage [abscess, hematoma], skin of face NEC

Excludes: Aspiration biopsy (see [2.YF.71.^ ^](#))

1.YF.52.HA using needle aspiration
1.YF.52.HA-TS using percutaneous approach with drainage tube left in situ
1.YF.52.JA using external manual expression (or separation of infected wound)
1.YF.52.LA using incisional approach

1.YF.53.^ ^ Implantation of internal device, skin of face**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Implantation, brachytherapy applicator, skin of face

Excludes: Expansion of device already in place (see [1.YF.54.^ ^](#))

Code Also: Any concomitant loading of brachytherapy applicator (see [1.YF.26.^ ^](#))

1.YF.53.DA-TP of tissue expander using endoscopic approach
1.YF.53.HA-EM of brachytherapy applicator using percutaneous approach
1.YF.53.LA-EM of brachytherapy applicator using open approach
1.YF.53.LA-TP of tissue expander using open approach
1.YF.53.LA-TS of wound drain using open approach

1.YF.54.^ ^ Management of internal device, skin of face**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Expansion/reduction of tissue expander
Inflation/adjustment of tissue expander

1.YF.54.HA-G2 using percutaneous (needle) approach and synthetic agent [e.g. silicone]
1.YF.54.HA-W1 using percutaneous (needle) approach and augmentation agent [e.g. saline, soya]

1.YF.55.^ ^ Removal of device, skin of face**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Removal of sutures (clips etc.), skin of face
that for skin of ear, nose, lip and overlapping sites

Excludes: Removal of device, soft tissue head and neck (see [1.EQ.55.^ ^](#))
that done as part of more definitive reparative intervention

1.YF.55.DA-TP of tissue expander using endoscopic approach
1.YF.55.JA-EB of radioactive implant using external approach
1.YF.55.JA-FF of closure device [e.g. suture, clip, etc] using external approach
1.YF.55.JA-NP of packing using external approach
1.YF.55.JA-TS of wound drain using external approach
1.YF.55.LA-EB of radioactive implant using open approach
1.YF.55.LA-TP of tissue expander using open approach

1.YF.56.^ ^ Removal of foreign body, skin of face**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

- Includes:** Extraction of (superficial, embedded) foreign body, skin of face (e.g. gravel, tic)
- Excludes:** Debridement with removal of debris, skin of face (see [1.YF.59.^^](#))
- Note:** May involve the use of pulsatile jet lavage or irrigation to facilitate complete removal of foreign body debris.

1.YF.56.JA using external approach [for simple extraction]
 1.YF.56.LA using incisional approach

1.YF.57.^^ Extraction, skin of face**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: that for the treatment of acne

1.YF.57.JA-CF using mechanical device
 1.YF.57.JH using manual expression

1.YF.58.^^ Procurement, skin of face**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Excludes: Myocutaneous flaps (see Procurement, muscle, by site)

1.YF.58.LA-XX-A of full thickness autograft using open approach
 1.YF.58.LA-XX-B of split thickness autograft using open approach
 1.YF.58.LA-XX-F of free flap using open approach (e.g. fasciocutaneous)

1.YF.59.^^ Destruction, skin of face**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

- Includes:** Ablation, skin (lesion) of face
 Debridement (simple), skin of face
 Dermabrasion [planing], skin of face NEC
 Destruction, skin (lesion) of multiple or overlapping sites on face, neck and scalp
 Electrolysis, hair of face
 Epilation [removal or extraction], skin of face
 Laser therapy (for removal of strawberry hemangioma, port wine stain, rosacea), skin of face
 that for control of bleeding, skin of face
- Excludes:** Debridement with temporary tissue (e.g. dermagraft, xenograft, cadaver allograft) coverage of wound of face (see [1.YF.14.^^](#))
 Destruction, skin of ear alone (see [1.YC.59.^^](#))
 Destruction, skin of eyelid alone (see [1.CX.59.^^](#))
 Destruction, skin of forehead alone (see [1.YB.59.^^](#))
 Destruction, skin of lip alone (see [1.YE.59.^^](#))
 Destruction, skin of neck alone (see [1.YG.59.^^](#))
 Destruction, skin of nose alone (see [1.YD.59.^^](#))
 Destruction, skin of scalp alone (see [1.YA.59.^^](#))
 Laser therapy for hyperpigmentation only of the face (see [1.YF.12.^^](#))
 Phototherapy, skin of face or neck (see [1.YF.12.^^](#))
- Note:** May involve removal of tattoo, strawberry hemangioma, port wine stain, rosacea, etc., of skin of face by destroying the lesion.

1.YF.59.JA-AD	using cryoprobe
1.YF.59.JA-AG	using laser NEC [e.g. carbon dioxide for ablation]
1.YF.59.JA-AL	using electrolysis device
1.YF.59.JA-CF	using mechanical device [sandpaper, wire brush]
1.YF.59.JA-DM	using ruby laser [e.g. for tattoo removal]
1.YF.59.JA-DN	using argon dye (or tunable dye) laser
1.YF.59.JA-DP	using yellow light or copper vapor laser
1.YF.59.JA-GX	using device NEC [electrocautery]
1.YF.59.JA-X2	using cold inducing agent/cryorefrigerant [liquid nitrogen]
1.YF.59.JA-X7	using chemical cautery agent

1.YF.74.^^ Fixation, skin of face

S 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Cheek lift
Facelift (with or without neck lift)
Rhytidectomy

Excludes: Neck lift alone (see [1.YG.74.^^](#))

Code Also: Any concomitant blepharoplasty (see [1.CX.78.^^](#))

1.YF.74.DA using endoscopic approach
1.YF.74.LA using open approach [e.g. apposition, suture]
1.YF.74.LA-XX-E using open approach and local flap [e.g. T-Z plasty]

1.YF.78.^^ Repair by decreasing size, skin of face

S 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Liposuction, face and neck
Reduction of adipose tissue, face
that using tumescent solution

Excludes: that for skin of neck alone (see [1.YG.78.^^](#))

1.YF.78.HA-GX using percutaneous approach and device NEC
1.YF.78.HA-TK using percutaneous approach and suction device
Includes: Liposuction alone

1.YF.80.^ ^ Repair, skin of face**S** 28 **E** 15

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 28	Optional	Treatment Status 3A	Status	D	Delayed (closure occurs > 24 hrs post trauma)
				R	Revision
				S	Staged
E 15	Optional	Laceration	Extent	E	5 to 10 cm
				G	Greater than 10 cm
				L	Less than 5 cm

Includes: Debridement [to prepare recipient site] for skin graft/flap repair, face
 Repair, skin of face with neck or scalp
 Suture, skin of face

Excludes: Coverage [temporary tissue], skin of face (see [1.YF.14.^ ^](#))
 Repair extending into muscles of face (see [1.EP.80.^ ^](#))
 Repair, skin of ear alone (see [1.YC.80.^ ^](#))
 Repair, skin of forehead alone (see [1.YB.80.^ ^](#))
 Repair, skin of lip alone (see [1.YE.80.^ ^](#))
 Repair, skin of nose alone (see [1.YD.80.^ ^](#))
 Repair, skin of scalp alone (see [1.YA.80.^ ^](#))

Code Also: Any intraoperative microscope assistance (see [3.YZ.94.^ ^](#))

1.YF.80.HA-XX-A using percutaneous injection of fat autograft
 1.YF.80.JA-FF using closure device (e.g. clip, adhesive skin closure [Steri-Strips])
 1.YF.80.JA-XX-K using homograft (e.g. GRAFTJACKET regenerative tissue matrix)
 1.YF.80.JA-XX-P using cultured tissue
 1.YF.80.LA using apposition technique [suture]
 1.YF.80.LA-W4 using glue for apposition (e.g. crazy glue or glustitch)
 1.YF.80.LA-XX-A using full-thickness autograft
 1.YF.80.LA-XX-B using split-thickness autograft
 1.YF.80.LA-XX-E using local flap [e.g. rotation, advancement, transposition, Z-plasty]
 1.YF.80.LA-XX-F using free flap [e.g. microvascular free flap]
 1.YF.80.LA-XX-G using pedicled flap

1.YF.87.^ ^ Excision partial, skin of face**S** 5 **E** 80

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
E 80	Optional	Mohs Micrographic Surgery	Extent	0	Not applicable (e.g. other type of excision)
				01	One layer removed
				02	Two layers removed
				03	Three layers removed
				04	Four layers removed
				05	Five layers removed
				06	Six layers removed
				D	Greater than 6 layers removed

Includes: Release [excision] scar contracture, face
Resection, (lesion) skin of face

Excludes: Debridement (simple), skin of face (see [1.YF.59.^ ^](#))
Debridement (simple), with temporary coverage (e.g. dermagraft, xenograft, cadaver allograft), skin of face (see [1.YF.14.^ ^](#))
Debridement [to prepare recipient site] for skin graft/flap, face (see [1.YF.80.^ ^](#))
Dermabrasion planing], skin of face NEC (see [1.YF.59.^ ^](#))
Excision, skin of ear alone (see [1.YC.87.^ ^](#))
Excision, skin of eyelid alone (see [1.CX.87.^ ^](#))
Excision, skin of forehead alone (see [1.YB.87.^ ^](#))
Excision, skin of lip alone (see [1.YE.87.^ ^](#))
Excision, skin of neck alone (see [1.YG.87.^ ^](#))
Excision, skin of nose alone (see [1.YD.87.^ ^](#))
Excision, skin of scalp alone (see [1.YA.87.^ ^](#))
Resection extending into soft tissue (fascia, muscle, tendon) of face (see [1.EQ.87.^ ^](#))

Code Also: Any intraoperative microscope assistance (see [3.YZ.94.^ ^](#))

Note: Use this code when the definitive intervention is the (extensive) excision of diseased [e.g. neoplastic] skin which may or may not require a reconstructive skin graft/flap to repair the surgical defect.

1.YF.87.^.^ Excision partial, skin of face	open [excisional] approach	open [excisional] approach and dermatome	open [excisional] approach and laser
using apposition technique [e.g. suture, glue] for closure	1.YF.87.LA	1.YF.87.LA-AY	1.YF.87.LA-AG
using free flap	1.YF.87.LA-XX-F	1.YF.87.LA-AY-F	1.YF.87.LA-AG-F
using full thickness autograft	1.YF.87.LA-XX-A	1.YF.87.LA-AY-A	1.YF.87.LA-AG-A
using local flap [e.g. rotation, advancement, transposition, Z plasty]	1.YF.87.LA-XX-E	1.YF.87.LA-AY-E	1.YF.87.LA-AG-E
using split thickness autograft	1.YF.87.LA-XX-B	1.YF.87.LA-AY-B	1.YF.87.LA-AG-B
using combined sources of tissue [e.g. graft and flap]	1.YF.87.LA-XX-Q	—	—

1.YG.^.^ Therapeutic Interventions on Skin of Neck

Includes: Overlapping sites of skin of neck with skin of scalp

Excludes: Overlapping sites involving skin of neck with skin of face (see [1.YF.^.^](#))
 Skin of face alone (see [1.YF.^.^](#))
 Skin of scalp alone (see [1.YA.^.^](#))

1.YG.09.^.^ Stimulation, skin of neck

Includes: Radiothermoplasty, skin of neck

Excludes: that with skin of face (see [1.YF.09.^.](#))

1.YG.09.JA-AW	using radiofrequency probe [e.g. Thermage, ThermoCool, ThermoLift]
---------------	--

1.YG.12.^.^ Therapy, skin of neck

Includes: Leech therapy

1.YG.12.JA-LI	using external application of living organism (e.g. leeches)
---------------	--

1.YG.13.^.^ Control of bleeding, skin of neck

Excludes: Application of pressure dressing (see [1.YG.14.^.](#))
 Destruction or ablation, skin of neck for control of bleeding (see [1.YG.59.^.](#))
 Systemic pharmacotherapy for control of bleeding (see [1.ZZ.35.^.](#))
 that with surgical repair and suturing (see [1.YG.80.^.](#))

1.YG.13.JA-C2	using local application of antihemorrhagic agent
	Includes: aminocaproic acid, aprotinin, phytonadione, thrombin, coagulation factor VIII
1.YG.13.JN	using external manual compression

1.YG.14.^ ^ Dressing, skin of neck

Includes: Bandaging, neck (wound)
 Change dressing, neck
 Coverage [temporary tissue], skin of neck
 Debridement [simple] with temporary tissue coverage, skin of neck
 Dressing, skin of neck with scalp
 Maggot (larval) therapy

Excludes: Dressing, skin of neck with face (see [1.YF.14.^ ^](#))

1.YG.14.JA-FJ	using occlusive dressing [e.g. hydrocolloid, coal tar, paraffin gauze, hydrogel]
1.YG.14.JA-FN	using wet/moist dressing
1.YG.14.JA-GN	using pressure dressing
1.YG.14.JA-H1	using medicated dressing
1.YG.14.JA-LI	using external application of living organism (e.g. maggots)
1.YG.14.JA-NP	using packing
1.YG.14.JA-T6	using dry dressing
1.YG.14.JA-XX-L	using xenogeneic tissue [e.g. porcine xenograft]
1.YG.14.JA-XX-N	using synthetic tissue [e.g. Biobrane, Dermagraft]

1.YG.52.^ ^ Drainage, skin of neck**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Aspiration, skin of neck
 Drainage [abscess, hematoma], skin of neck

Excludes: Aspiration biopsy (see [2.YG.71.^ ^](#))

1.YG.52.HA	using needle aspiration
1.YG.52.HA-TS	using percutaneous approach with drainage tube left in situ
1.YG.52.JA	using external manual expression (or separation of infected wound)
1.YG.52.LA	using incisional approach

1.YG.53.^ ^ Implantation of internal device, skin of neck**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Excludes: Expansion of device already in place (see [1.YG.54.^^](#))

1.YG.53.DA-TP of tissue expander using endoscopic approach
 1.YG.53.LA-TP of tissue expander using open approach
 1.YG.53.LA-TS of wound drain using open approach

1.YG.54.^^ Management of internal device, skin of neck

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Expansion/reduction of tissue expander
 Inflation/adjustment of tissue expander

1.YG.54.HA-G2 using percutaneous (needle) approach and synthetic agent [e.g. silicone]
 1.YG.54.HA-W1 using percutaneous (needle) approach and augmentation agent [e.g. saline, soya]

1.YG.55.^^ Removal of device, skin of neck

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Removal of sutures (clips etc.), skin of neck

Excludes: that done as part of more definitive reparative intervention

1.YG.55.DA-TP of tissue expander using endoscopic approach
 1.YG.55.JA-FF of closure device [e.g. suture, clip, etc]
 1.YG.55.JA-NP of packing
 1.YG.55.JA-TS of wound drain using external approach
 1.YG.55.LA-TP of tissue expander using open approach

1.YG.56.^^ Removal of foreign body, skin of neck

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Extraction of (superficial, embedded) foreign body, skin of neck
Excludes: Debridement for removal of debris, skin of neck (see [1.YG.59.^^](#))
Note: May involve the use of pulsatile jet lavage or irrigation to facilitate complete removal of foreign body debris.

1.YG.56.JA using external approach [for simple extraction]
 1.YG.56.LA using incisional approach

1.YG.58.^^ Procurement, skin of neck**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Excludes: Myocutaneous flap (see Procurement, muscle, by site)

1.YG.58.LA-XX-A of full thickness autograft using open approach
 1.YG.58.LA-XX-B of split thickness autograft using open approach
 1.YG.58.LA-XX-F of free flap using open approach

1.YG.59.^^ Destruction, skin of neck**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Ablation, skin (lesion) of neck
 Debridement (simple), skin of neck
 Dermabrasion [planing], skin of neck
 Electrolysis, neck
 Epilation [removal of hair], neck
 Laser therapy for treatment of strawberry hemangioma, port wine stain, rosacea, etc., skin of neck
 Removal (non surgical) of tattoo, skin of neck
 that for control of bleeding, skin of neck

Excludes: Debridement with concomitant skin graft/flap repair of neck (see [1.YG.80.^^](#))
 Debridement with temporary tissue (e.g. dermagraft, xenograft, cadaver allograft) coverage to neck (see [1.YG.14.^^](#))
 Destruction, skin of neck with other sites (multiple, overlapping) of face (see [1.YF.59.^^](#))

1.YG.59.JA-AD	using cryoprobe
1.YG.59.JA-AG	using laser [e.g. carbon dioxide for ablation]
1.YG.59.JA-CF	using mechanical device [sandpaper, wire brush]
1.YG.59.JA-DM	using ruby laser [e.g. for tattoo removal]
1.YG.59.JA-DN	using dye or tunable dye laser
1.YG.59.JA-DP	using yellow light or copper vapor laser
1.YG.59.JA-GX	using device NEC [electrocautery]
1.YG.59.JA-X2	using cold inducing agent/cryorefrigerant [liquid nitrogen]
1.YG.59.JA-X7	using chemical cautery agent

1.YG.74.^ Fixation, skin of neck**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Neck lift**Excludes:** that with face lift (see [1.YF.74.^](#))

1.YG.74.DA	using endoscopic approach
1.YG.74.LA	using open approach [e.g. apposition, suture]
1.YG.74.LA-XX-E	using open approach and local flap [e.g. T-Z plasty]

1.YG.78.^ Repair by decreasing size, skin of neck**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Liposuction, neck (alone)
Reduction of adipose tissue, neck (alone)
that using tumescent solution**Excludes:** that done concomitantly with skin of face (see [1.YF.78.^](#))

1.YG.78.HA-GX	using percutaneous approach and device NEC
1.YG.78.HA-TK	using percutaneous approach and suction device
Includes: Liposuction alone	

1.YG.80.^ Repair, skin of neck**S** 28 **E** 15

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 28	Optional	Treatment Status 3A	Status	D	Delayed (closure occurs > 24 hrs post trauma)
				R	Revision
				S	Staged
E 15	Optional	Laceration	Extent	E	5 to 10 cm
				G	Greater than 10 cm
				L	Less than 5 cm

Includes: Debridement [to prepare recipient site] for skin graft/flap repair, neck
 Repair, skin of neck with scalp
 Suture, skin of neck

Excludes: Repair extending to muscles of neck (see [1.EP.80.^](#))
 Repair, skin of neck with overlapping sites of face (see [1.YF.80.^](#))
 Temporary tissue coverage, skin of neck (see [1.YG.14.^](#))

Code Also: Any intraoperative microscope assistance (see [3.YZ.94.^](#))

1.YG.80.JA-FF using closure device (e.g. clip, adhesive skin closure [Steri-Strips])
 1.YG.80.JA-XX-K using homograft (e.g. GRAFTJACKET regenerative tissue matrix)
 1.YG.80.JA-XX-P using cultured tissue
 1.YG.80.LA using apposition technique [suture]
 1.YG.80.LA-W4 using glue for apposition (e.g. crazy glue, glustitch)
 1.YG.80.LA-XX-A using full-thickness autograft
 1.YG.80.LA-XX-B using split-thickness autograft
 1.YG.80.LA-XX-E using local flap [e.g. rotation, advancement, transposition, Z-plasty]
 1.YG.80.LA-XX-F using free flap [e.g. microvascular free flap]

1.YG.87.^ Excision partial, skin of neck**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Release [excision] scar contracture, neck
 Resection, (lesion) skin of neck

Excludes: Debridement (simple), skin of neck (see [1.YG.59.^^](#))
 Debridement [to prepare recipient site] for skin graft/flap repair, neck (see [1.YG.80.^^](#))
 Debridement with temporary tissue (e.g. dermagraft, xenograft, cadaver allograft) coverage, neck (see [1.YG.14.^^](#))
 Dermabrasion [planing], skin of neck (see [1.YG.59.^^](#))
 Excision, (lesion) skin of neck with overlapping or multiple sites of face (see [1.YF.87.^^](#))
 Resection of skin (lesion) extending into soft tissue (fascia, muscle or tendon) of neck (see [1.EQ.87.^^](#))

Code Also: Any intraoperative microscope assistance (see [3.YZ.94.^^](#))

Note: Use this code when the definitive intervention is the (extensive) excision of diseased [e.g. neoplastic] skin which may or may not require a reconstructive skin graft/flap to repair the surgical defect.

1.YG.87.^^ Excision partial, skin of neck	open [excisional] approach	open [excisional] approach and dermatome	open [excisional] approach and laser
using apposition technique [e.g. suture, glue] for closure	1.YG.87.LA	1.YG.87.LA-AY	1.YG.87.LA-AG
using free flap	1.YG.87.LA-XX-F	1.YG.87.LA-AY-F	1.YG.87.LA-AG-F
using full thickness autograft	1.YG.87.LA-XX-A	1.YG.87.LA-AY-A	1.YG.87.LA-AG-A
using local flap [e.g. rotation, advancement, transposition, Z plasty]	1.YG.87.LA-XX-E	1.YG.87.LA-AY-E	1.YG.87.LA-AG-E
using split thickness autograft	1.YG.87.LA-XX-B	1.YG.87.LA-AY-B	1.YG.87.LA-AG-B

1.YK.^^.^^ Therapeutic Interventions on the Nipple

Includes: Accessory nipple
 Areola

Excludes: Lactiferous ducts alone (see [1.YL.^^.^^](#))
 Nipple with breast (see [1.YM.^^.^^](#))

1.YK.50.^^ Dilation, nipple

S 4 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Dilation, nipple

1.YK.50.CA-BJ using per orifice approach and cannula
 1.YK.50.CA-BP using per orifice approach and rigid dilator

1.YK.52.^ Drainage, nipple**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Drainage [non lactational abscess], nipple

Excludes: Aspiration biopsy (see [2.YK.71.^](#))
Drainage of lactational abscess (see [1.YM.52.^](#))

1.YK.52.HA using needle aspiration
1.YK.52.LA using incisional approach

1.YK.58.^ Procurement, nipple**S** ¹⁰ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 10	Optional	Tx Status 5	Status	A	Abandoned after onset
				R	Revision
				S	Staged
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: that for transfer or tissue banking

1.YK.58.LA using open approach

1.YK.80.^ ^ Repair, nipple**S** 5 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Suture, nipple and areolar complex (e.g. for nipple eversion)
Tattooing, nipple (e.g. following breast resection)

Excludes: Nipple eversion with excision [partial or total] of duct (see [1.YL.89.^ ^](#))
Reconstruction or plastic repair using tissue graft/flap (see [1.YK.84.^ ^](#))

1.YK.80.HA-X4 using tattooing dye and percutaneous (needle) approach
1.YK.80.LA using open approach without tissue [suture]

1.YK.83.^ ^ Transfer, nipple**S** 10 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 10	Optional	Tx Status 5	Status	A	Abandoned after onset
				R	Revision
				S	Staged
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Auto transplantation, tissue banked nipple areola
Repositioning, nipple
Transposition, nipple

Excludes: that done as part of repair or reconstruction of other breast tissue - code to specific procedure performed

1.YK.83.LA-XX-A using open approach and autograft

1.YK.84.^ ^ Construction or reconstruction, nipple**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: that for previously non existent nipple [e.g. reconstructed breast]

Excludes: that with excision (see [1.YK.90.^ ^](#))

Code Also: Any tattooing of skin of breast (see [1.YK.80.^ ^](#))

1.YK.84.LA-XX-A	using open approach and full thickness autograft [e.g. contralateral nipple, labia, thigh, retroauricular tissue]
1.YK.84.LA-XX-E	using open approach and local skin flap [e.g. propeller, star, quadrupod skate]
1.YK.84.LA-XX-K	using open approach and homograft
1.YK.84.LA-XX-Q	using open approach and combined sources of tissue [e.g. local flap (nipple) and autograft (areola)]

1.YK.87.^ ^ Excision partial, nipple**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Excision, nipple fibroepithelial polyps and cysts
Excision, supernumerary [accessory, ectopic] nipple

1.YK.87.LA	using open excisional approach
1.YK.87.LA-XX-A	using open excisional approach and full thickness autograft
1.YK.87.LA-XX-B	using open excisional approach and split thickness autograft
1.YK.87.LA-XX-E	using open excisional approach and local flap [e.g. rotation, advancement, transposition, Z-plasty] for closure

1.YK.89.^ ^ Excision total, nipple**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Excludes: that for tissue banking and reimplantation (see [1.YK.58.^ ^](#))
that with excision of lactiferous ducts (see [1.YL.89.^ ^](#))
that with reconstruction (see [1.YK.90.^ ^](#))

1.YK.89.LA using open approach
1.YK.89.LA-XX-A using open approach and full thickness autograft
1.YK.89.LA-XX-E using open approach and local flap [e.g. rotation, advancement, transposition, Z-plasty]

1.YK.90.^ ^ Excision total with reconstruction, nipple**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Excludes: that for previously non-existent nipple (see [1.YK.84.^ ^](#))

Code Also: Any tattooing of skin (see [1.YK.80.^ ^](#))

1.YK.90.LA-XX-A using open approach and full thickness autograft [e.g. contralateral nipple, labia, thigh, retroauricular tissue]
1.YK.90.LA-XX-E using open approach and local skin flap [e.g. propeller, star, quadripod skate]
1.YK.90.LA-XX-Q using open approach and combined local flap [e.g. nipple] and autograft [e.g. areola]

1.YL.^ ^.^ Therapeutic Interventions on the Lactiferous Duct

Includes: Mammary ducts

1.YL.87.^ ^ Excision partial, lactiferous duct**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Microdochectomy (single duct)
that for removal of fistula

1.YL.87.LA using open approach

1.YL.89.^ ^ Excision total, lactiferous duct**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Excision, ducts of breast
that with nipple eversion
that with or without excision of nipple

1.YL.89.LA using open approach

1.YM.^.^ Therapeutic Interventions on the Breast

Includes:	Fascial covering of breast Lactiferous ducts with breast Lobular tissue of breast Nipple and areolar tissue with breast Retromammary space Skin of breast with breast Suspensory ligaments of Cooper (intra-lobular fascia)
Excludes:	Lactiferous ducts alone (see 1.YL.^.^) Nipple alone (see 1.YK.^.^) Skin of breast alone (see 1.YS.^.^)

1.YM.06.^.^ Hypothermy, breast

Includes:	Application of cold, breast
Excludes:	Post partum breast therapy (see 5.PC.21.^.)

1.YM.06.JA-KL	using cooling device [e.g. cold pack, ice]
---------------	--

1.YM.07.^.^ Hyperthermy, breast

Includes:	Application of heat, breast
Excludes:	Post partum breast therapy (see 5.PC.21.^.)

1.YM.07.JA-KH	using (non-electrical) heating device [e.g. hot pack, compress]
1.YM.07.JA-KK	using electrical heating device [e.g. lamp, pad]

1.YM.12.^.^ Therapy, breast

Includes:	Leech therapy
------------------	---------------

1.YM.12.JA-LI	using external application of living organism (e.g. leeches)
---------------	--

1.YM.26.^ ^ Brachytherapy, breast**S** 35 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 35	Optional	Implant Status	Status	P M	Permanent implant – Radioactive source left in place permanently
				T M	Temporary implant – Radioactive source removed after course of treatment is complete
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Endocurietherapy, breast
 Implantation of radioactive material, breast

Code Also: Any concomitant implantation of brachytherapy applicators or conduits [e.g. needles, catheters] to gain access to treatment site (see [1.YM.53.^ ^](#))

Note: There are typically two distinct phases required to complete the process of brachytherapy. The first phase involves the insertion of non-radioactive applicators or conduits [e.g. hollow needles, catheters, stents etc.] that receive or transmit the radioactive material into the body. The second phase involves the after loading of the radioactive material [e.g. seeds, pellets, wires, etc.] into the applicator or conduit.

1.YM.26.HA using percutaneous (transcatheter or transneedle) approach

1.YM.26.LA using open approach

1.YM.27.^ ^ Radiation, breast**S** 1 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes:	Teletherapy, breast Therapy, radiation [radiotherapy], breast
Excludes:	Brachytherapy, breast (see 1.YM.26.^) Radiation therapy involving ribs (see 1.SL.27.^) Radiation therapy of skin of chest alone (see 1.YS.27.^)
Note:	May involve irradiation of some regional lymph nodes of neck and axilla.
1.YM.27.JA	using external beam
1.YM.27.JX	using focused beam [e.g. gamma knife, cyber knife stereotactic radiosurgery]

1.YM.34.^ ComPRESSION, breast

Excludes:	Post partum breast therapy (see 5.PC.21.^)
1.YM.34.JA-FG	using binding device [e.g. dressing]
1.YM.34.JN	using external approach with pressure [compression] technique
Includes:	Closed capsulotomy Manual release (to rupture capsule), breast

1.YM.35.^ Pharmacotherapy (local), breast

Includes:	Injection, breast (of therapeutic agent) Instillation, agent directly into breast Irrigation, breast Wound care, breast
Excludes:	Injection of substance into tissue expander (see 1.YM.54.^) Irrigation with drainage (see 1.YM.52.^) Systemic pharmacotherapy alone (see 1.ZZ.35.^) that for augmentation (see 1.YM.79.^) that for control of bleeding, skin of breast alone (see 1.YS.13.^) that for skin of breast alone (see 1.YS.35.^)
1.YM.35.HA-T9	of pharmacological agent NEC using percutaneous (needle) approach
1.YM.35.HA-W2	of collagen using percutaneous (needle) approach
1.YM.35.HA-Z9	of agent NEC using percutaneous (needle) approach
1.YM.35.JA-D1	using external approach and antiinfective irrigating solution
Includes:	chlorhexidine, neomycin
1.YM.35.JA-D2	using external approach and salt irrigating solution
Includes:	sodium chloride
1.YM.35.JA-D3	using external approach and other irrigating solution
Includes:	sorbitol, mannitol
1.YM.35.JA-H3	using external approach using other dermatological preparation
Includes:	medicated shampoos, wart preparations, minoxidil

1.YM.52.^ ^ Drainage, breast**S** 4 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Drainage [abscess, hematoma] ,breast
Drainage, lactational abscess

Excludes: Drainage of non-lactational peri-areolar cyst or abscess (see [1.YK.52.^ ^](#))

1.YM.52.HA using percutaneous (needle) approach
1.YM.52.HA-TS using percutaneous (needle) approach with drainage tube left in situ
1.YM.52.LA using incisional approach

1.YM.53.^ ^ Implantation of internal device, breast**S** 4 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Code Also: Any concomitant loading of brachytherapy applicator (see [1.YM.26.^ ^](#))

1.YM.53.HA-EM of brachytherapy applicator using percutaneous approach
1.YM.53.LA-EM of brachytherapy applicator using open approach

1.YM.54.^ ^ Management of internal device, breast**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Adjustment of device, breast
Expansion/reduction of tissue expander or prosthesis, breast
Inflation of tissue expander or prosthesis, breast
Irrigation of device

1.YM.54.HA-G2 using percutaneous (needle) approach with synthetic agent [e.g. silicone]
1.YM.54.HA-W1 using percutaneous (needle) approach with augmentation agent [e.g. saline, soya]
1.YM.54.JA-TS of wound drain using external approach

1.YM.55.^ ^ Removal of device, breast**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Capsulectomy with removal of prosthesis
Removal of drain, post mastectomy wound
Removal of prosthesis, breast

Excludes: that concomitant with implantation for augmentation (see [1.YM.79.^ ^](#))

1.YM.55.^ Removal of device, breast	with capsulectomy (with or without inframammary fold repair)	without capsulectomy
of breast implant [prosthesis]	1.YM.55.WJ-PM	1.YM.55.LA-PM
of radioactive implant	—	1.YM.55.LA-EB
of drain or port	1.YM.55.WJ-TS	1.YM.55.JA-TS
of tissue expander	1.YM.55.WJ-TP	1.YM.55.LA-TP

1.YM.58.^ Procurement, breast**S** 4 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Extraction/expression of milk from breast**Excludes:** that within 6 weeks postpartum (see [5.PC.21.^](#))

1.YM.58.JA-QN using pump (electric)
 1.YM.58.JH using manual technique

1.YM.59.^ Destruction, breast**S** 10 **L** 89

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 10	Optional	Tx Status 5	Status	A	Abandoned after onset
				R	Revision
				S	Staged
L 89	Mandatory	Bilaterality Mandatory 2	Location	A T	Aberrant tissue only
				B	Bilateral
				L	Left
				R	Right
				U	Unilateral unspecified

Includes: Laser interstitial thermal therapy [LITT]

1.YM.59.HA-AG percutaneous (optical fibre) approach using laser

1.YM.72.^.^ Release, breast

S ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Open capsulotomy, breast (for release of implant contracture)

Excludes: Closed capsulotomy, breast (see [1.YM.34.^.^](#))
Release, scar contracture, skin of breast (see [1.YS.87.^.^](#))

Code Also: Expansion or reduction of breast prosthesis (see [1.YM.54.^.^](#))

Omit code: When open capsulotomy is performed concomitantly with another open breast procedure

1.YM.72.LA using open approach

1.YM.74.^.^ Fixation, breast

S ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Correction, ptosis, breast
Lift, breast
Mastopexy
Transposition, breast on chest wall

Excludes: Mastopexy with augmentation (see [1.YM.79.^^](#))
 Mastopexy with insertion prosthetic implant (see [1.YM.79.^^](#))
 Mastopexy with mammoplasty NOS (see [1.YM.79.^^](#))
 Mastopexy with reconstruction mammoplasty (following mastectomy) (see [1.YM.80.^^](#))
 Mastopexy with reduction (see [1.YM.78.^^](#))

Omit code: when performed concomitantly with any other repair or reconstruction of the breast

1.YM.74.LA using open approach
 1.YM.74.RC using open approach with non-absorbable purse string suture
 1.YM.74.VQ using peri areolar round block technique

1.YM.78.^^ Repair by decreasing size, breast

S 32 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 32	Mandatory	Mandatory Tx Status 5	Status	0	Not applicable
				A	Abandoned after onset
				R	Revision
				S	Staged
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Correction, gynecomastia, macromastia
 Female to male (FTM) transgender chest masculinization
 Mammoplasty, reduction with or without concomitant liposuction
 Mastopexy with reduction
 Subcutaneous mastectomy for transgender female to male chest masculinization that with or without preservation of lactiferous ducts
 Transgender female to male (chest contouring) mastectomy

Excludes: Excision partial, breast (see [1.YM.87.^^](#))
 Liposuction, breast alone (see [1.YS.78.^^](#))

1.YM.78.LA-XX-E using excisional technique with local flap
Note: Involves 3 incisions: around the areola, vertically to the breast fold and inferiorly along the breast fold with subsequent flap closure to reposition the nipple areolar complex.

1.YM.78.VQ using circum peri areolar (keyhole, lollipop) excisional technique
Note: Involves 1 or 2 incisions: around the areola with or without a vertical incision to the breast fold.

1.YM.78.WK-XX-A using amputation technique and free nipple autograft
Note: Involves any type of breast reduction with a concomitant free nipple graft.

1.YM.79.^ Repair by increasing size, breast**S** 32 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 32	Mandatory	Mandatory Tx Status 5	Status	0	Not applicable
				A	Abandoned after onset
				R	Revision
				S	Staged
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Augmentation, breast
 Breast construction for transgender male to female chest feminization
 Implantation, breast prosthesis or tissue expander
 Male to female (MTF) mammoplasty
 Male to female (MTF) transgender breast augmentation
 Mammoplasty NOS
 Replacement of breast prosthesis with removal of previous implant that using subareolar, inframammary fold or axillary incision
 that with removal of tissue expander prior to implantation of prosthesis

Excludes: Expansion of tissue expander or prosthesis alone (see [1.YM.54.^](#))
 Mammoplasty concomitant with mastectomy (see [1.YM.88.^](#), [1.YM.90.^](#), [1.YM.92.^](#))
 Mammoplasty reconstruction (second stage) following previous mastectomy (see [1.YM.80.^](#))
 Repair, traumatically injured breast tissue (see [1.YM.80.^](#))

1.YM.79.^ Repair by increasing size, breast	without tissue	using distant pedicled flap [e.g. deepithelialization TRAM]	using autograft [e.g. fat]	using local flap
open approach				
with implantation of prosthesis	1.YM.79.LA-PM	1.YM.79.LA-PM-G	1.YM.79.LA-PM-A	1.YM.79.LA-PM-E
with implantation of tissue expander	1.YM.79.LA-TP	1.YM.79.LA-TP-G	1.YM.79.LA-TP-A	1.YM.79.LA-TP-E
with no implanted device	—	1.YM.79.LA-XX-G	—	1.YM.79.LA-XX-E
percutaneous approach				
with no implanted device	—	—	1.YM.79.HA-XX-A Code Also: • Procurement of fat (see 1.YZ.58.^)	—
endoscopic approach				
with implantation of prosthesis	1.YM.79.DA-PM	—	—	—
with implantation of tissue expander	1.YM.79.DA-TP	—	—	—

1.YM.80.^ Repair, breast**S** 10 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 10	Optional	Tx Status 5	Status	A	Abandoned after onset
				R	Revision
				S	Staged
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Reconstruction, breast following mastectomy or trauma

Excludes: Augmentation (see [1.YM.79.^](#))
 Breast lift only (see [1.YM.74.^](#))
 Breast reduction only (see [1.YM.78.^](#))
 Closed capsulotomy (to release implant contracture), breast (see [1.YM.34.^](#))
 Implantation of breast prosthesis or expanders for augmentation of existing breast (see [1.YM.79.^](#))
 Mastectomy with concomitant reconstruction (see [1.YM.88.^](#), [1.YM.90.^](#), [1.YM.92.^](#))
 Open capsulotomy alone (see [1.YM.72.^](#))
 Repair, skin of breast alone (see [1.YS.80.^](#))

Code Also: Any nipple construction (see [1.YK.84.^](#))
 Any procurement of free flap (see [1.SY.58.^](#), [1.YS.58.^](#))

Note: Use codes from this rubric when breast has been previously excised and is now (second stage) undergoing repair/ reconstruction or when breast has been traumatically injured and is now undergoing repair

1.YM.80.^ Repair, breast	without tissue	using distant pedicled flap	using free flap	using autograft	using local flap	using homograft
open approach						
with implantation of breast prosthesis	1.YM.80.LA-PM	1.YM.80.LA-PM-G Includes: <ul style="list-style-type: none">Myocutaneous pedicled flap [e.g. TRAM flap, latissimus dorsi myocutaneous flap and LDM extended flap]	1.YM.80.LA-PM-F Includes: <ul style="list-style-type: none">Deep inferior epigastric artery perforator [DIEP] free flapGluteal artery perforator [GAP] free flapGluteus maximus myocutaneous free flapMyocutaneous free flapOther back, lower abdomen and buttock free flapSuperficial inferior epigastric artery [SIEA] free flapTransverse rectus abdominis musculocutaneous [TRAM] free flap	1.YM.80.LA-PM-A	1.YM.80.LA-PM-E	1.YM.80.LA-PM-K

				N P	Subcutaneous mastectomy - Nipple sparing (nipple and breast skin spared)
				S C	Subcutaneous mastectomy - Skin sparing (nipple removed) or NOS
				Z	Other

Includes:

Lumpectomy (breast)
 Mastectomy, partial
 Quadrantectomy, breast [Quadrant resection]
 Removal of aberrant breast tissue
 Resection, segmental [partial], breast
 Subcutaneous (nipple sparing) (skin sparing) mastectomy (without concomitant reconstruction)
 Subtotal mastectomy with nipple areola preservation
 that for removal of non viable previously implanted flap
 Tylectomy
 Wedge resection, breast
 Wide excision, breast

Excludes:

Capsulectomy with removal of prosthesis (see [1.YM.55.^ ^](#))
 Debridement, skin of breast alone (see [1.YS.59.^ ^](#))
 Debridement, soft tissue (wound) of breast (see [1.SZ.59.^ ^](#))
 Excision (or revision), scar of breast (see [1.YS.87.^ ^](#))
 Female to male (FTM) transgender chest masculinization (see [1.YM.78.^ ^](#))
 Subcutaneous (nipple sparing) (skin sparing) mastectomy with reconstruction (see [1.YM.88.^ ^](#))
 Subcutaneous mastectomy for transgender female to male chest masculinization (see [1.YM.78.^ ^](#))
 that for correction of gynecomastia or breast reduction (see [1.YM.78.^ ^](#))
 Transgender female to male (chest contouring) mastectomy (see [1.YM.78.^ ^](#))

Code Also:

Any axillary sentinel lymph node biopsy (see [2.MD.71.^ ^](#))
 Any clearance or radical dissection of axillary nodes (see [1.MD.89.^ ^](#))
 Any partial dissection of axillary nodes (see [1.MD.87.^ ^](#))

1.YM.87.^ ^ Excision partial, breast	using endoscopic approach	using endoscopic guide wire (or needle hook) excision technique	using open approach	using open approach with localization device (e.g. needle hook, radioactive seed, wire)
with simple apposition (e.g. suturing)	1.YM.87.DA Includes: • Transaxillary endoscopic partial mastectomy (TEPM)	1.YM.87.GB	1.YM.87.LA	1.YM.87.UT
with autograft	—	—	1.YM.87.LA-XX-A	1.YM.87.UT-XX-A
with local flap	—	—	1.YM.87.LA-XX-E Includes: • Partial mastectomy with dermoglandular flap procured from the same quadrant of the breast • Rotation and advancement flaps Excludes: • Partial mastectomy with dermoglandular flap procured from a different quadrant of the breast (see 1.YM.88.LA-XX-G)	1.YM.87.UT-XX-E Includes: • Partial mastectomy with dermoglandular flap procured from the same quadrant of the breast • Rotation and advancement flaps Excludes: • Partial mastectomy with dermoglandular flap procured from a different quadrant of the breast (see 1.YM.88.LA-XX-G)

1.YR.^.^ Therapeutic Interventions on Skin of Axillary Region**Includes:** Axillary sweat glands**Excludes:** Overlapping sites involving skin of axillary region with skin of abdomen and trunk region (see [1.YS.^.^](#))
Overlapping sites involving skin of axillary region with skin of upper extremities (see [1.YZ.^.^](#))**1.YR.13.^ Control of bleeding, skin of axillary region****Excludes:** Application of pressure dressing (see [1.YR.14.^](#))
Destruction or ablation, skin of axillary region for control of bleeding (see [1.YR.59.^](#))
Systemic pharmacotherapy for control of bleeding (see [1.ZZ.35.^](#))
that with surgical repair and suturing (see [1.YR.80.^](#))

1.YR.13.JA-C2	using local application of antihemorrhagic agent
	Includes: aminocaproic acid, aprotinin, phytonadione, thrombin, coagulation factor VIII
1.YR.13.JN	using external manual compression

1.YR.14.^ Dressing, skin of axillary region**Includes:** Bandaging, axillary (wound)
Change dressing, skin of axilla
Debridement [simple] with temporary coverage, skin of axillary region
Temporary tissue coverage, skin of axillary region**Excludes:** Dressing, skin of axilla overlapping with breast (see [1.YS.14.^](#))
Dressing, skin of axilla overlapping with other sites of arm (see [1.YZ.14.^](#))
Dressing, skin of axilla overlapping with other sites of trunk (see [1.YS.14.^](#))

1.YR.14.JA-FJ	using occlusive dressing [e.g. hydrocolloid, coal tar, paraffin gauze, hydrogel]
1.YR.14.JA-FN	using wet/moist dressing
1.YR.14.JA-GN	using pressure dressing
1.YR.14.JA-H1	using medicated dressing
1.YR.14.JA-NP	using packing
1.YR.14.JA-T6	using dry dressing
1.YR.14.JA-XX-L	using xenogeneic tissue [e.g. porcine xenograft]
1.YR.14.JA-XX-N	using synthetic tissue [e.g. Biobrane, Dermagraft]

1.YR.35.^ Pharmacotherapy (local), skin of axillary region

1.YR.35.HA-L7	using percutaneous injection of bacterial toxin (e.g. botulinum toxin or Botox)
---------------	---

1.YR.52.^ ^ Drainage, skin of axillary region**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Aspiration, skin of axillary region
 Drainage [abscess, hematoma], skin of axillary region

Excludes: Aspiration biopsy (see [2.YR.71.^ ^](#))

1.YR.52.HA using needle aspiration
 1.YR.52.HA-TS using percutaneous approach with drainage tube left in situ
 1.YR.52.JA using external manual expression (or separation of infected wound)
 1.YR.52.LA using incisional approach

1.YR.56.^ ^ Removal of foreign body, skin of axillary region**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Extraction of (superficial, embedded) foreign body, skin of axillary region (e.g. gravel, tic)

Excludes: Debridement for removal of foreign body debris, skin of axillary region (see [1.YR.59.^ ^](#))

Note: May involve the use of pulsatile jet lavage or irrigation to facilitate complete removal of foreign body debris.

1.YR.56.JA using external approach [for simple extraction]
 1.YR.56.LA using incisional approach

1.YR.59.^ ^ Destruction, skin of axillary region**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Ablation, skin (lesion) of axillary region
 Debridement, skin of axillary region
 Dermabrasion [planing], skin of axillary region
 Electrolysis, hair of axillary region
 Epilation [removal or extraction], hair of skin of axillary region
 Laser therapy for treatment of strawberry hemangioma, port wine stain, rosacea, etc., skin of axillary region
 that for control of bleeding, skin of axillary region

Excludes: Debridement with concomitant graft/flap repair, axillary region (see [1.YR.80.^ ^](#))
 Debridement with concomitant temporary tissue (e.g. dermagraft, xenograft, cadaver allograft) coverage of axillary region (see [1.YR.14.^ ^](#))
 Destruction of multiple or overlapping sites of trunk, arm or axilla (see [1.YZ.59.^ ^](#))
 Resection extending to an axillary lymph node dissection (see [1.MD.87.^ ^](#))

1.YR.59.JA-AD	using cryoprobe
1.YR.59.JA-AG	using laser [e.g. carbon dioxide for ablation]
1.YR.59.JA-AL	using electrolysis device
1.YR.59.JA-CF	using mechanical device [sandpaper, wire brush]
1.YR.59.JA-DN	using dye or tunable dye laser
1.YR.59.JA-DP	using yellow light or copper vapor laser
1.YR.59.JA-GX	using device NEC [electrocautery]
1.YR.59.JA-X2	using cold inducing agent/cryorefrigerant [liquid nitrogen]
1.YR.59.JA-X7	using chemical cautery agent

1.YR.78.^ ^ Repair by decreasing size, skin of axillary region**S** 5 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Liposuction, axillary region
Reduction of adipose tissue, axillary region
that using tumescent solution

1.YR.78.HA-GX using percutaneous approach and device NEC
1.YR.78.HA-TK using percutaneous approach and suction device
Includes: Liposuction alone
1.YR.78.LA using excisional technique
Includes: that with excision of skin and adipose tissue alone
1.YR.78.LA-TK using excisional technique and suction device
Includes: that with excision of skin and adipose tissue and concomitant liposuction

1.YR.80.^ ^ Repair, skin of axillary region**S** 28 **L** 2 **E** 15

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 28	Optional	Treatment Status 3A	Status	D	Delayed (closure occurs > 24 hrs post trauma)
				R	Revision
				S	Staged
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)
E 15	Optional	Laceration	Extent	E	5 to 10 cm
				G	Greater than 10 cm
				L	Less than 5 cm

- Includes:** Debridement [to prepare recipient site] for skin graft/flap repair, axilla
Suture, skin of axillary region
- Excludes:** Repair, skin of axilla with overlapping sites of arm (see [1.YZ.80.^^](#))
Repair, skin of axilla with overlapping sites of trunk (see [1.YS.80.^^](#))
Temporary tissue coverage, skin of axillary region (see [1.YR.14.^^](#))
that done as part of radical dissection of axillary lymphatic vessels (see [1.MR.91.^^](#))
that done as part of radical dissection of axillary nodes (see [1.MD.89.^^](#))

1.YR.80.JA-FF	using closure device (e.g. clip, adhesive skin closure [Steri-Strips])
1.YR.80.JA-XX-K	using homograft (e.g. GRAFTJACKET regenerative tissue matrix)
1.YR.80.JA-XX-P	using cultured tissue
1.YR.80.LA	using apposition technique [suture]
1.YR.80.LA-W4	using glue apposition (e.g. crazy glue, glustitch)
1.YR.80.LA-XX-A	using full-thickness autograft
1.YR.80.LA-XX-B	using split-thickness autograft
1.YR.80.LA-XX-E	using local flap [e.g. rotation, advancement, transposition, Z-plasty]
1.YR.80.LA-XX-F	using free flap [e.g. microvascular free flap]

1.YR.87.^^ Excision partial, skin of axillary region

S 5 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Release [excision] scar contracture, axilla
Resection, skin (lesion) of axilla
- Excludes:** Debridement (simple), skin of axillary region (see [1.YR.59.^^](#))
Debridement [to prepare recipient site] for skin graft/flap repair, axilla (see [1.YR.80.^^](#))
Debridement with temporary tissue (dermagraft, xenograft, cadaver allograft) coverage, skin of axillary region (see [1.YR.14.^^](#))
Dermabrasion [planing], skin of axillary region (see [1.YR.59.^^](#))
Excision of overlapping or multiple sites of skin of axilla (trunk) and arm (see [1.YZ.87.^^](#))
Excision of overlapping or multiple sites of skin of axilla and trunk (see [1.YS.87.^^](#))
Liposuction, axillary region (see [1.YR.78.^^](#))
Resection of axillary lymph nodes with skin (see [1.MD.87.^^](#))
- Code Also:** Any intraoperative microscope assistance (see [3.YZ.94.^^](#))
- Note:** Use this code when the definitive intervention is the (extensive) excision of diseased [e.g. neoplastic] skin which may or may not require a reconstructive skin graft/flap to repair the surgical defect.

1.YR.87.^.^ Excision partial, skin of axillary region	open [excisional] approach	open [excisional] approach and dermatome	open [excisional] approach and laser	endoscopic approach
using apposition technique [e.g. suture, glue] for closure	1.YR.87.LA	1.YR.87.LA-AY	1.YR.87.LA-AG	1.YR.87.DA Includes: • Endoscopic axillary adenectomy
using full thickness autograft	1.YR.87.LA-XX-A	1.YR.87.LA-AY-A	1.YR.87.LA-AG-A	—
using local flap [e.g. rotation, advancement, transposition, Z plasty]	1.YR.87.LA-XX-E	1.YR.87.LA-AY-E	1.YR.87.LA-AG-E	—
using split thickness autograft	1.YR.87.LA-XX-B	1.YR.87.LA-AY-B	1.YR.87.LA-AG-B	—

1.YS.^.^ Therapeutic Interventions on Skin of Abdomen and Trunk

- Includes:** Skin of abdomen
Skin of back
Skin of breast
Skin of buttock
Skin of chest
Skin of thorax
Skin of trunk (single, multiple, overlapping sites)
- Excludes:** Skin of axillary region alone (see [1.YR.^.^](#))
Skin of penis alone (see [1.QE.^.^](#))
Skin of perineum alone (see [1.RY.^.^](#))
Skin of scrotum alone (see [1.QG.^.^](#))
Skin of vulva alone (see [1.RW.^.^](#))

1.YS.09.^.^ Stimulation, skin of abdomen and trunk

- Includes:** Electrostimulation, skin of abdomen and trunk NEC
Radiothermoplasty, skin of abdomen and trunk
- Note:** Involves stimulation at surface of skin (wound) to produce collagen deposit.

1.YS.09.JA-AW	using radiofrequency probe [e.g. Thermage, ThermoCool, ThermoLift]
1.YS.09.JA-DV	using external electrical stimulating device

1.YS.12.^ ^ Therapy, skin of abdomen and trunk

Includes:	Leech therapy Phototherapy, skin of abdomen and trunk NEC Therapy, laser, skin of abdomen and trunk (for hyperpigmentation)
Excludes:	Destruction [lesion], skin of abdomen and trunk (see 1.YS.59.^ ^)

1.YS.12.JA-AG	using laser NEC [e.g. green light laser]
1.YS.12.JA-DQ	using ultraviolet light
1.YS.12.JA-LI	using external approach and living organism (e.g. leeches)

1.YS.13.^ ^ Control of bleeding, skin of abdomen and trunk

Excludes:	Application of pressure dressing (see 1.YS.14.^ ^) Destruction or ablation, skin of abdomen and trunk for control of bleeding (see 1.YS.59.^ ^) Systemic pharmacotherapy for control of bleeding (see 1.ZZ.35.^ ^) that with surgical repair and suturing (see 1.YS.80.^ ^)
------------------	--

1.YS.13.JA-C2	using local application of antihemorrhagic agent Includes: aminocaproic acid, aprotinin, phytonadione, thrombin, coagulation factor VIII
1.YS.13.JN	using external manual compression

1.YS.14.^ ^ Dressing, skin of abdomen and trunk

- Includes:** Application, pressure dressing to control bleeding (wound) of trunk
 Bandaging, trunk (e.g. abdomen, back, breast, buttock, chest and groin)
 Change dressing, trunk
 Coverage [temporary tissue], skin of trunk (e.g. abdomen, back, breast, buttock, chest, groin)
 Debridement [simple] with temporary tissue coverage, skin of trunk
 Maggot (larval) therapy
- Excludes:** Dressing, axillary region alone (see [1.YR.14.^ ^](#))
 Dressings to the trunk as well as arm or leg (see [1.YZ.14.^ ^](#))

- 1.YS.14.JA-FJ using occlusive dressing [e.g. hydrocolloid, coal tar, paraffin gauze, hydrogel]
 1.YS.14.JA-FN using wet/moist dressing
 1.YS.14.JA-GN using pressure dressing
 1.YS.14.JA-H1 using medicated dressing
 1.YS.14.JA-LI using external application of living organism (e.g. maggots)
 1.YS.14.JA-NC-N using negative pressure device and synthetic tissue
- Includes:** Negative pressure wound therapy (NPWT)
 Vacuum assisted closure (VAC)
- 1.YS.14.JA-NP using packing
 1.YS.14.JA-T6 using dry dressing
 1.YS.14.JA-XX-L using xenogeneic tissue [e.g. porcine xenograft]
 1.YS.14.JA-XX-N using synthetic tissue [e.g. Biobrane, Dermagraft]

1.YS.26.^ ^ Brachytherapy, skin of abdomen and trunk**S** 35

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 35	Optional	Implant Status	Status	P M	Permanent implant – Radioactive source left in place permanently
				T M	Temporary implant – Radioactive source removed after course of treatment is complete

Includes:	Endocurietherapy, skin of abdomen and trunk Implantation of radioactive material, skin of abdomen and trunk Interstitial radiation therapy, skin of abdomen and trunk
Excludes:	Brachytherapy of breast (see 1.YM.26.^^)
Code Also:	Any concomitant implantation of brachytherapy applicators or conduits [e.g. needles, catheters] to gain access to treatment site (see 1.YS.53.^^)
Note:	There are typically two distinct phases required to complete the process of brachytherapy. The first phase involves the insertion of non-radioactive applicators or conduits [e.g. hollow needles, catheters, stents etc.] that receive or transmit the radioactive material into the body. The second phase involves the after loading of the radioactive material [e.g. seeds, pellets, wires, etc.] into the applicator or conduit.
1.YS.26.HA	using percutaneous (transcatheter or transneedle) approach
1.YS.26.JA	using external approach [e.g. surface mould]
1.YS.26.LA	using open approach

1.YS.27.^^ Radiation, skin of abdomen and trunk

Includes:	Teletherapy, skin of abdomen and trunk alone Therapy, radiation [radiotherapy], skin of abdomen and trunk alone
Excludes:	Radiation therapy of breast (see 1.YM.27.^^) Radiation therapy of deeper soft tissues of abdomen or trunk (see 1.SZ.27.^^)
1.YS.27.JA	using external beam

1.YS.35.^^ Pharmacotherapy (local), skin of abdomen and trunk

Includes:	Application of agent, skin of abdomen and trunk NEC Cleansing of wound, skin of trunk and abdomen NEC Irrigation, skin of trunk Pharmacotherapy, stoma site (at skin surface) Rubbing [massage] of skin with agent Skin care, topical treatment that for treatment of skin of abdomen and trunk NEC
Excludes:	Irrigation with drainage (see 1.YS.52.^^) Systemic pharmacotherapy (see 1.ZZ.35.^^) that for control of bleeding, skin of trunk (see 1.YS.13.^^) that for tissue of breast [e.g. collagen] (see 1.YM.35.^^)
Omit code:	When skin preparation is a part of another intervention

1.YS.35.^ Pharmacotherapy (local), skin of abdomen and trunk	percutaneous [needle] approach	topical application or direct instillation into wound
using antiinfective irrigating solution	—	1.YS.35.JA-D1 Includes: • chlorhexidine, neomycin
using salt irrigating solution	—	1.YS.35.JA-D2 Includes: • sodium chloride
using other irrigating solution	—	1.YS.35.JA-D3 Includes: • sorbitol, mannitol
using antifungal agent	—	1.YS.35.JA-G1 Includes: • nystatin, clotrimazole, miconazole, tolnaftate
using emollient and protective agent	—	1.YS.35.JA-G2 Includes: • silicone, dimethicone, zinc oxide, urea, protectives against UV radiation
using wound and ulcer treatment agent	—	1.YS.35.JA-G3 Includes: • sutilains, collagenase, dextranomer
using antipruritic agent	—	1.YS.35.JA-G4 Includes: • diphenhydramine, lidocaine, benzocaine, crotonitron, calamine
using antipsoriatic agent	—	1.YS.35.JA-G5 Includes: • coal tar preparations, anthralin, methoxsalen)
using antibiotic and chemotherapeutic agent	1.YS.35.HA-G6 Includes: • fusidic acid, bacitracin, polymyxin, mupirocin, idoxuridine, acyclovir for topical use	1.YS.35.JA-G6 Includes: • fusidic acid, bacitracin, polymyxin, mupirocin, idoxuridine, acyclovir for topical use
using corticosteroid agent	1.YS.35.HA-G7 Includes: • hydrocortisone, triamcinolone, clobetasol, betamethasone	1.YS.35.JA-G7 Includes: • hydrocortisone, triamcinolone, clobetasol, betamethasone
using antiseptic and disinfectant	—	1.YS.35.JA-G8 Includes: • chlorhexadine, hexachlorophene, iodine, cilioquinol, isopropyl alcohol
using other dermatological preparation	—	1.YS.35.JA-H3 Includes: • medicated shampoos, wart preparations, minoxidil
using immunomodulating agent	1.YS.35.HA-M7 Includes: • BCG, interferon alpha, filgastrim, interferon beta1B, levamisole	—
using local anesthetic agent	1.YS.35.HA-P1	1.YS.35.JA-P1

1.YS.35.^ ^ Pharmacotherapy (local), skin of abdomen and trunk	percutaneous [needle] approach	topical application or direct instillation into wound
using pharmacological agent NEC	1.YS.35.HA-T9	1.YS.35.JA-T9
using augmentation agent	1.YS.35.HA-W1	—
using bleaching agent [e.g. liquid nitrogen for hyperpigmentation]	—	1.YS.35.JA-X1
using drying agent [e.g. air, aluminum salts, starch, powders]	—	1.YS.35.JA-X3
using dye	1.YS.35.HA-X4	—
using agent NEC [e.g. synthetic peptides for scar formation]	1.YS.35.HA-Z9	1.YS.35.JA-Z9

1.YS.52.^ ^ Drainage, skin of abdomen and trunk**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Aspiration, skin of abdomen and trunk NEC
 Drainage [abscess, hematoma], skin of abdomen and trunk NEC

Excludes: Aspiration biopsy (see [2.YS.71.^ ^](#))
 Marsupialization, pilonidal cyst/sinus(see [1.YS.80.^ ^](#))

1.YS.52.HA	using needle aspiration
1.YS.52.HA-TS	using percutaneous approach with drainage tube left in situ
1.YS.52.JA	using external manual expression (or separation of infected wound)
1.YS.52.LA	using incisional approach

1.YS.53.^ ^ Implantation of internal device, skin of abdomen and trunk**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Excludes: Expansion of device already in place (see [1.YS.54.^^](#))
 Implantation, tissue expander, breast (see [1.YM.80.^^](#))

Code Also: Any concomitant loading of brachytherapy applicator (see [1.YS.26.^^](#))

1.YS.53.DA-TP of tissue expander using endoscopic approach
 1.YS.53.HA-EM of brachytherapy applicator using percutaneous approach
 1.YS.53.LA-EM of brachytherapy applicator using open approach
 1.YS.53.LA-QK of infusion pump using open approach
Includes: Insertion (insulin) infusion pump
 1.YS.53.LA-TP of tissue expander using open approach
 1.YS.53.LA-TS of wound drain using open approach

1.YS.54.^^ Management of internal device, skin of abdomen and trunk

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Expansion/reduction of tissue expander
 Inflation/adjustment of tissue expander

Excludes: Management of tissue expander, breast (see [1.YM.54.^^](#))

1.YS.54.HA-G2 using percutaneous (needle) approach and synthetic agent [e.g. silicone]
 1.YS.54.HA-W1 using percutaneous (needle) approach and augmentation agent [e.g. saline, soya]

1.YS.55.^^ Removal of device, skin of abdomen and trunk

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

- Includes:** Removal of sutures (clips etc.), skin of trunk NEC that for skin of axilla region
- Excludes:** Removal, device, breast (see [1.YM.55.^^](#)) that done as part of more definitive reparative intervention

1.YS.55.DA-TP	of tissue expander using endoscopic approach
1.YS.55.JA-EB	of radioactive implant using external approach
1.YS.55.JA-FF	of closure device [e.g. suture, clip, etc] using external approach
1.YS.55.JA-NP	of packing (wound) using external approach
1.YS.55.JA-TS	of wound drain using external approach
1.YS.55.LA-EB	of radioactive implant using open approach
1.YS.55.LA-TP	of tissue expander using open approach

1.YS.56.^^ Removal of foreign body, skin of abdomen and trunk

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

- Includes:** Extraction of (superficial, embedded) foreign body, skin of abdomen and trunk (e.g. gravel, tic)
Removal of foreign body, skin of chest (or breast)
- Excludes:** Debridement for removal of foreign body debris, skin of abdomen, chest and trunk (see [1.YS.59.^^](#))
- Note:** May involve the use of pulsatile jet lavage or irrigation to facilitate complete removal of foreign body debris.

1.YS.56.JA	using external approach [for simple extraction]
1.YS.56.LA	using incisional approach

1.YS.58.^^ Procurement, skin of abdomen and trunk

S 9

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 9	Optional	Tx Status 4	Status	A	Abandoned after onset
				S	Staged

Excludes: Myocutaneous flaps (see Procurement, muscle, by site)

1.YS.58.LA-XX-A	of full thickness autograft using open approach
1.YS.58.LA-XX-B	of split thickness autograft using open approach
1.YS.58.LA-XX-F	of free flap using open approach [e.g. fasciocutaneous]
	Includes: Deep inferior epigastric artery perforator [DIEP] free flap Gluteal artery perforator [GAP] free flap Superficial inferior epigastric artery [SIEA] free flap
1.YS.58.LA-XX-G	of pedicled (tube) flap
	Includes: Procurement, groin, of pedicled (tube) skin flap
	Note: Use this code at the time the pedicle flap is fashioned (for coverage of the hand/face) and again when the flap is finally cut free (from the groin). (This intervention is seldom performed.) In severe cases, where necrosis or deteriorating grafts have occurred it may be employed as a final resort because the blood supply of the pedicled flap is uninterrupted on one side of the flap—at the originating site. This increases likelihood of a viable skin transfer for extremely difficult skin repairs. This is always a multi-stage procedure.

1.YS.59.^.^ Destruction, skin of abdomen and trunk

S 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Debridement (simple), skin of trunk (abdomen, back, buttock, chest, groin)
Dermabrasion [planing], skin of trunk (abdomen, back, buttock, chest, groin)
Destruction, skin (lesions) of axilla with other sites of trunk (abdomen, back, buttock, chest, groin)
Electrolysis, hair of trunk (abdomen, back, buttock, chest, groin)
Epilation (hair removal), trunk (abdomen, back, buttock, chest, groin)
Ligation of dermal appendage, skin of trunk
that for control of bleeding, skin of abdomen and trunk

Excludes: Debridement with concomitant skin graft/flap repair, trunk (see [1.YS.80.^](#))
 Debridement with concomitant temporary tissue (dermagraft, xenograft, cadaver allograft) coverage, trunk (see [1.YS.14.^](#))
 Destruction, multiple or overlapping sites of trunk with limb (see [1.YZ.59.^](#))
 Laser (green light) therapy for hyperpigmentation only (see [1.YS.12.^](#))
 Phototherapy of skin of abdomen and trunk (see [1.YS.12.^](#))

Note: May involve the removal of tattoo, strawberry hemangioma, port wine stain, rosacea, etc... of skin of abdomen and trunk by destroying the lesion.

1.YS.59.JA-AD	using cryoprobe
1.YS.59.JA-AG	using laser NEC [e.g. carbon dioxide for ablation]
1.YS.59.JA-AL	using electrolysis device
1.YS.59.JA-CF	using mechanical device [sandpaper, wire brush]
1.YS.59.JA-DM	using ruby laser [e.g. for tattoo removal]
1.YS.59.JA-DN	using argon dye (or tunable dye) laser
1.YS.59.JA-DP	using yellow light (or copper vapor) laser
1.YS.59.JA-GX	using device NEC [electrocautery]
1.YS.59.JA-LV	using ligature
1.YS.59.JA-X2	using cold inducing agent/cryorefrigerant [liquid nitrogen]
1.YS.59.JA-X7	using chemical cautery agent

1.YS.74.^ Fixation, skin of abdomen and trunk

S ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description

				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: "Fanny lift"
 Lift, buttocks

1.YS.74.LA	using open approach
------------	---------------------

1.YS.78.^ Repair by decreasing size, skin of abdomen and trunk**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Liposuction, abdominal region and buttocks
 Liposuction, breast
 Mini abdominoplasty
 Panniculectomy
 Reduction, adipose tissue in buttocks and waist that using tumescent solution

Excludes: Abdominoplasty, with repair of muscles, chest and abdomen (see [1.SY.80.^](#))
 Belt lipectomy (see [1.YZ.74.^](#))
 Body lift (see [1.YZ.74.^](#))
 when liposuction of breast is concomitant with mammoplasty (see [1.YM.79.^](#))
 when liposuction of breast is concomitant with mastopexy (see [1.YM.74.^](#))
 when liposuction of breast is concomitant with reduction mammoplasty (see [1.YM.78.^](#))

1.YS.78.HA-GX using percutaneous approach and device NEC
 1.YS.78.HA-TK using percutaneous approach and suction device
Includes: Liposuction alone
 1.YS.78.LA using excisional technique
Includes: that with excision of skin and adipose tissue alone
 1.YS.78.LA-TK using excisional technique and suction device
Includes: that with excision of skin and adipose tissue and concomitant liposuction

1.YS.80.^ Repair, skin of abdomen and trunk**S** 28 **E** 15

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 28	Optional	Treatment Status 3A	Status	D	Delayed (closure occurs > 24 hrs post trauma)
				R	Revision
				S	Staged
E 15	Optional	Laceration	Extent	E	5 to 10 cm
				G	Greater than 10 cm
				L	Less than 5 cm

Includes: Debridement [to prepare recipient site] for skin graft/flap repair, skin of trunk
Excision (repair), pilonidal cyst/ sinus
Marsupialization, pilonidal cyst/sinus
Suture, skin of trunk (e.g. abdomen, back, breast, buttock, chest, groin)

Excludes: Repair, skin of trunk with other sites involving arm or leg (see [1.YZ.80.^^](#))
Temporary tissue coverage, trunk wound (see [1.YS.14.^^](#))

1.YS.80.JA-FF using closure device (e.g. clip, adhesive skin closure [Steri-Strips])
1.YS.80.JA-XX-K using homograft (e.g. GRAFTJACKET regenerative tissue matrix)
1.YS.80.JA-XX-P using cultured tissue
1.YS.80.LA using open approach and apposition technique [suture]
Includes: leaving wound open after marsupialization of pilonidal cyst/sinus
1.YS.80.LA-W4 using open approach and glue (e.g. crazy glue, glustitch)
1.YS.80.LA-XX-A using full-thickness autograft
1.YS.80.LA-XX-B using split-thickness autograft
1.YS.80.LA-XX-E using local flap [e.g. rotation, advancement, transposition, Z-plasty]
1.YS.80.LA-XX-F using free flap [e.g. fasciocutaneous free flap]

1.YS.87.^^ Excision partial, skin of abdomen and trunk

S 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Excision, skin of axillary region with other overlapping or multiple sites of trunk
Release [excision] scar contracture, trunk (abdomen, back, buttock, chest, groin)
Resection, skin (lesion) of trunk (abdomen, back, buttock, chest, groin)

Excludes: Debridement (simple), skin of trunk (see [1.YS.59.^^](#))
Debridement [to prepare recipient site] for skin graft/flap repair, trunk (see [1.YS.80.^^](#))
Debridement with temporary tissue (dermagraft, xenograft, cadaver allograft) coverage of trunk (see [1.YS.14.^^](#))
Dermabrasion [planing], skin of trunk (abdomen, back, buttock, chest, groin) (see [1.YS.59.^^](#))
Excision (lesion) of breast tissue (see [1.YM.87.^^](#))
Excision (lesion) of penis (see [1.QE.87.^^](#))
Excision (lesion) of perineum (see [1.RW.87.^^](#))
Excision of multiple or overlapping skin (lesion) sites of trunk with limb (see [1.YZ.87.^^](#))
Open capsulotomy, breast (for release of breast implant contracture) (see [1.YM.72.^^](#))
Pilonidal cyst excision (with/ without subsequent repair) (see [1.YS.80.^^](#))
Resection of skin (lesion) extending into soft tissue (fascia, muscle, tendon) of abdomen and chest (see [1.SZ.87.^^](#))
Resection of skin (lesion) extending into soft tissue (fascia, muscle, tendon) of back and buttock (see [1.SH.87.^^](#))

Code Also: Any intraoperative microscope assistance (see [3.YZ.94.^^](#))

Note: Use this code when the definitive intervention is the (extensive) excision of diseased [e.g. neoplastic] skin which may or may not require a reconstructive skin graft/flap to repair the surgical defect.

1.YS.87.^.^ Excision partial, skin of abdomen and trunk	open [excisional] approach	open [excisional] approach and dermatome	open [excisional] approach and laser

	Includes: Negative pressure wound therapy (NPWT) Vacuum assisted closure (VAC)
1.YT.14.JA-NP	using packing
1.YT.14.JA-T6	using dry dressing
1.YT.14.JA-XX-L	using xenogeneic tissue [e.g. porcine xenograft]
1.YT.14.JA-XX-N	using synthetic tissue [e.g. Biobrane, Dermagraft]

1.YT.26.^ ^ Brachytherapy, skin of arm**S** 35 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 35	Optional	Implant Status	Status	P M	Permanent implant – Radioactive source left in place permanently
				T M	Temporary implant – Radioactive source removed after course of treatment is complete
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Endocurietherapy, skin of arm
 Implantation of radioactive material, skin of arm
 Interstitial radiation therapy, skin of arm

Code Also: Any concomitant implantation of brachytherapy applicators or conduits [e.g. needles, catheters] to gain access to treatment site (see [1.YT.53.^ ^](#))

Note: There are typically two distinct phases required to complete the process of brachytherapy. The first phase involves the insertion of non-radioactive applicators or conduits [e.g. hollow needles, catheters, stents etc.] that receive or transmit the radioactive material into the body. The second phase involves the after loading of the radioactive material [e.g. seeds, pellets, wires, etc.] into the applicator or conduit.

1.YT.26.HA using percutaneous (transcatheter or transneedle) approach
 1.YT.26.JA using external approach [e.g. surface mould]
 1.YT.26.LA using open approach

1.YT.27.^ ^ Radiation, skin of arm**L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Teletherapy, skin of arm and hand
 Therapy, radiation [radiotherapy], skin of arm and hand

Excludes: Radiation therapy involving soft tissue of arm and hand (see [1.TX.27.^ ^](#))

1.YT.27.JA using external beam

1.YT.35.^ ^ Pharmacotherapy (local), skin of arm

- Includes:** Application of agent, skin of arm NEC
 Cleansing, wound of skin of arm
 Injection of agent, skin of arm NEC
 Instillation of agent, skin of arm NEC
 Irrigation, skin of arm
 Rubbing [massage] of skin with agent
 Skin care, topical treatment
 Tattoo, skin of arm NEC
 that for treatment of skin of upper extremity NEC
- Excludes:** Assistance for personal hygiene (see [7.SC.01.^ ^](#))
 Irrigation with drainage (see [1.YT.52.^ ^](#))
 Systemic pharmacotherapy (see [1.ZZ.35.^ ^](#))
- Omit code:** When skin preparation is part of another intervention.

1.YT.35.^ ^ Pharmacotherapy (local), skin of arm	percutaneous [needle] approach	topical application or direct instillation into wound
using antiinfective irrigating solution	—	1.YT.35.JA-D1 Includes: • chlorhexidine, neomycin
using salt irrigating solution	—	1.YT.35.JA-D2 Includes: • sodium chloride
using other irrigating solution	—	1.YT.35.JA-D3 Includes: • sorbitol, mannitol
using antifungal agent	—	1.YT.35.JA-G1 Includes: • nystatin, clotrimazole, miconazole, tolnaftate
using emollient and protective agent	—	1.YT.35.JA-G2 Includes: • silicone, dimethicone, zinc oxide, urea, protectives against UV radiation
using wound and ulcer treatment agent	—	1.YT.35.JA-G3 Includes: • sutilains, collagenase, dextranomer
using antipruritic agent	—	1.YT.35.JA-G4 Includes: • diphenhydramine, lidocaine, benzocaine, crotamiton, calamine
using antipsoriatic agent	—	1.YT.35.JA-G5 Includes: • coal tar preparations, anthralin, methoxsalen)

1.YT.35.^ ^ Pharmacotherapy (local), skin of arm	percutaneous [needle] approach	topical application or direct instillation into wound
using antibiotic and chemotherapeutic agent	1.YT.35.HA-G6 Includes: • fusidic acid, bacitracin, polymyxin, mupirocin, idoxuridine, acyclovir for topical use	1.YT.35.JA-G6 Includes: • fusidic acid, bacitracin, polymyxin, mupirocin, idoxuridine, acyclovir for topical use
using antiseptic and disinfectant	—	1.YT.35.JA-G8 Includes: • chlorhexadine, hexachlorophene, iodine, cllioquinol, isopropyl alcohol
using other dermatological preparation	—	1.YT.35.JA-H3 Includes: • medicated shampoos, wart preparations, minoxidil
using corticosteroid agent	1.YT.35.HA-J2 Includes: • prednisone, dexamethasone, fludrocortisone	1.YT.35.JA-J2 Includes: • prednisone, dexamethasone, fludrocortisone
using immunomodulating agent	1.YT.35.HA-M7 Includes: • BCG, interferon alpha, filgastrim, interferon beta 1B, levamisole	—
using local anesthetic agent	1.YT.35.HA-P1	1.YT.35.JA-P1
using pharmacological agent NEC	1.YT.35.HA-T9	1.YT.35.JA-T9
using augmentation agent	1.YT.35.HA-W1	—
using bleaching agent [e.g. liquid nitrogen for hyperpigmentation]	—	1.YT.35.JA-X1
using drying agent [e.g. air, aluminum salts, starch, powders]	—	1.YT.35.JA-X3
using dye	1.YT.35.HA-X4	—
using agent NEC [e.g. synthetic peptides for scar formation]	1.YT.35.HA-Z9	1.YT.35.JA-Z9

1.YT.52.^ Drainage, skin of arm**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left

				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Extraction of (superficial, embedded) foreign body, skin of arm (e.g. gravel, tic)
Excludes: Debridement for removal of foreign body debris, skin of arm (see [1.YT.59.^.](#))
Note: may involve the use of pulsatile jet lavage or irrigation to facilitate complete removal of foreign body debris.

1.YT.56.JA	using external approach [for simple extraction]
1.YT.56.LA	using incisional approach

1.YT.58.^.^ Procurement, skin of arm

S ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Radial forearm fasciocutaneous free flap (RFFF)
Radial forearm free flap (fasciocutaneous tissue)

Excludes: Myocutaneous flaps (see Procurement, muscle, by site)
Procurement, radial osteocutaneous flap (see [1.TV.58.^^](#))

1.YT.58.LA-XX-A of full thickness autograft using open approach
1.YT.58.LA-XX-B of split thickness autograft using open approach
1.YT.58.LA-XX-F of free flap using open approach [e.g. fasciocutaneous]

1.YT.59.^^ Destruction, skin of arm**S** ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Ablation, skin (lesion) of arm
Debridement (simple), skin of arm
Dermabrasion [planing], skin of arm
Electrolysis, arm
Epilation [hair removal], arm
Laser therapy (for removal of strawberry hemangioma, port wine stain, rosacea), skin of arm
that for control of bleeding

Excludes: Debridement with concomitant skin graft/flap repair, arm (see [1.YT.80.^^](#))
 Debridement with concomitant temporary tissue (dermagraft, xenograft, cadaver allograft) coverage, arm (see [1.YT.14.^^](#))
 Destruction, multiple or overlapping skin sites of arm with trunk (abdomen, back, buttock, chest, groin) (see [1.YZ.59.^^](#))
 Destruction, skin (lesion) of arm with hand (see [1.YU.59.^^](#))
 Laser (green light) therapy for hyperpigmentation only (see [1.YT.12.^^](#))
 Phototherapy of skin of upper extremity (see [1.YT.12.^^](#))

Note: May involve the removal of tattoo, strawberry hemangioma, port wine stain, rosacea, etc., of skin of upper extremity by destroying the lesion.

1.YT.59.JA-AD	using cryoprobe
1.YT.59.JA-AG	using laser NEC [e.g. carbon dioxide for ablation]
1.YT.59.JA-AL	using electrolysis device
1.YT.59.JA-CF	using mechanical device [sandpaper, wire brush]
1.YT.59.JA-DM	using ruby laser [e.g. for tattoo removal]
1.YT.59.JA-DN	using argon dye (or tunable dye) laser
1.YT.59.JA-DP	using yellow light (or copper vapor) laser
1.YT.59.JA-GX	using device NEC [electrocautery]
1.YT.59.JA-X2	using cold inducing agent/cryorefrigerant [liquid nitrogen]
1.YT.59.JA-X7	using chemical cautery agent

1.YT.78.^^ Repair by decreasing size, skin of arm

S ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description

Excludes: Debridement (simple), skin of hand (see [1.YU.59.^^](#))
Debridement [to prepare recipient site] for skin graft/flap repair of hand (with arm) (see [1.YU.80.^^](#))
Debridement with temporary tissue (dermagraft, xenograft, cadaver allograft) coverage, hand (see [1.YU.14.^^](#))
Dermabrasion [planing], skin of hand (see [1.YU.59.^^](#))
Resection, skin (lesion) extending into soft tissue (fascia, muscle, tendon) of hand (see [1.UY.87.^^](#))
Simple debridement with skin graft/flap repair of hand (with arm) (see [1.YU.80.^^](#))

Code Also: Any intraoperative microscope assistance (see [3.YZ.94.^^](#))

Note: Use this code when the definitive intervention is the (extensive) excision of diseased [e.g. neoplastic] skin which may or may not require a reconstructive skin graft/flap to repair the surgical defect.

1.YU.87.^^ Excision partial, skin of hand	open [excisional] approach	open [excisional] approach and laser
using apposition technique [e.g. suture, glue] for closure	1.YU.87.LA	1.YU.87.LA-AG
using full thickness autograft	1.YU.87.LA-XX-A	1.YU.87.LA-AG-A

1.YU.87.^.^ Excision partial, skin of hand	open [excisional] approach	open [excisional] approach and laser
using local flap [e.g. rotation, advancement, transposition, Z plasty]	1.YU.87.LA-XX-E	1.YU.87.LA-AG-E
using split thickness autograft	1.YU.87.LA-XX-B	1.YU.87.LA-AG-B
using free flap	1.YU.87.LA-XX-F	1.YU.87.LA-AG-F

1.YV.^.^ Therapeutic Interventions on Skin of Leg

Includes: Skin of thigh, leg and ankle

Excludes: Interventions on overlapping (or multiple) sites involving skin of leg with trunk (see [1.YZ.^.^](#))
Skin of foot (with or without leg involvement) (see [1.YW.^.^](#))

1.YV.09.^.^ Stimulation, skin of leg

Includes: Electrostimulation, skin of lower extremity NEC (wound)

Note: Involves stimulation at surface of skin wound to produce collagen deposit

1.YV.09.JA-DV	using external electrical stimulating device
---------------	--

1.YV.12.^.^ Therapy, skin of leg

Includes: Leech therapy
Phototherapy, skin of lower extremity NEC
Therapy, laser, skin of lower extremity (for hyperpigmentation)

Excludes: Destruction [lesion], skin of lower extremity (see [1.YV.59.^.](#))

1.YV.12.JA-AG	using laser NEC [e.g. green light laser]
1.YV.12.JA-DQ	using ultraviolet light
1.YV.12.JA-LI	using external application of living organism (e.g. leeches)

1.YV.13.^.^ Control of bleeding, skin of leg

Excludes: Application of pressure dressing (see [1.YV.14.^.](#))
Destruction or ablation for control of bleeding (see [1.YV.59.^.](#))
Systemic pharmacotherapy for control of bleeding (see [1.ZZ.35.^.](#))
that with surgical repair and suturing (see [1.YV.80.^.](#))

1.YV.13.JA-C2	using local application of antihemorrhagic agent Includes: aminocaproic acid, aprotinin, phytonadione, thrombin, coagulation factor VIII
1.YV.13.JN	using external manual compression

1.YV.14.^ ^ Dressing, skin of leg

Includes: Application, pressure dressing to control bleeding leg wound
 Bandaging, leg wound
 Change dressing, leg
 Coverage [temporary tissue], leg
 Debridement [simple] with temporary tissue coverage, skin of leg
 Maggot (larval) therapy

Excludes: Dressing, buttock (see [1.YS.14.^ ^](#))
 Dressing, foot with leg (see [1.YW.14.^ ^](#))
 Dressings applied to leg and to trunk (see [1.YZ.14.^ ^](#))

1.YV.14.JA-FJ using occlusive dressing [e.g. hydrocolloid, coal tar, paraffin gauze, hydrogel]
 1.YV.14.JA-FN using wet/moist dressing
 1.YV.14.JA-GN using pressure dressing
 1.YV.14.JA-H1 using medicated dressing
 1.YV.14.JA-LI using external application of living organism (e.g. maggots)
 1.YV.14.JA-NC-N using negative pressure device and synthetic tissue
Includes: Negative pressure wound therapy (NPWT)
 Vacuum assisted closure (VAC)
 1.YV.14.JA-NP using packing
 1.YV.14.JA-T6 using dry dressing
 1.YV.14.JA-XX-L using xenogeneic tissue [e.g porcine xenograft]
 1.YV.14.JA-XX-N using synthetic tissue [e.g. Biobrane, Dermagraft]

1.YV.26.^ ^ Brachytherapy, skin of leg**S** 35 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 35	Optional	Implant Status	Status	P M	Permanent implant – Radioactive source left in place permanently
				T M	Temporary implant – Radioactive source removed after course of treatment is complete
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes:	Endocurietherapy, skin of leg Implantation of radioactive material, skin of leg Interstitial radiation therapy, skin of leg
Code Also:	Any concomitant implantation of brachytherapy applicators or conduits [e.g. needles, catheters] to gain access to treatment site (see 1.YV.53.^^)
Note:	There are typically two distinct phases required to complete the process of brachytherapy. The first phase involves the insertion of non-radioactive applicators or conduits [e.g. hollow needles, catheters, stents etc.] that receive or transmit the radioactive material into the body. The second phase involves the after loading of the radioactive material [e.g. seeds, pellets, wires, etc.] into the applicator or conduit.
1.YV.26.HA	using percutaneous (transcatheter or transneedle) approach
1.YV.26.JA	using external approach [e.g. surface mould]
1.YV.26.LA	using open approach

1.YV.27.^^ Radiation, skin of leg**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Teletherapy, skin of leg and foot
Therapy, radiation [radiotherapy], skin of leg and foot

Excludes: Radiation therapy involving soft tissue of leg and foot (see [1.VX.27.^^](#))

1.YV.27.JA	using external beam
------------	---------------------

1.YV.35.^ ^ Pharmacotherapy (local), skin of leg

- Includes:** Application of agent, skin of leg NEC
Cleansing, wound of skin of leg
Injection, skin of leg NEC
Instillation, skin of leg NEC
Irrigation, skin of leg
Rubbing [massage] of skin with agent
Skin care, topical treatment
that for treatment of skin of leg NEC
- Excludes:** Assistance for personal hygiene (see [7.SC.01.^ ^](#))
Irrigation with drainage (see [1.YV.52.^ ^](#))
Systemic pharmacotherapy (see [1.ZZ.35.^ ^](#))
that for control of bleeding (see [1.YV.13.^ ^](#))
- Omit code:** When skin preparation is a part of another intervention

1.YV.35.^ Pharmacotherapy (local), skin of leg	percutaneous [needle] approach	topical application or direct instillation into wound
using antiinfective irrigating solution	—	1.YV.35.JA-D1 Includes: • chlorhexidine, neomycin
using salt irrigating solution	—	1.YV.35.JA-D2 Includes: • sodium chloride
using other irrigating solution	—	1.YV.35.JA-D3 Includes: • sorbitol, mannitol
using antifungal agent	—	1.YV.35.JA-G1 Includes: • nystatin, clotrimazole, miconazole, tolnaftate
using emollient and protective agent	—	1.YV.35.JA-G2 Includes: • silicone, dimethicone, zinc oxide, urea, protectives against UV radiation
using wound and ulcer treatment agent	—	1.YV.35.JA-G3 Includes: • sutilains, collagenase, dextranomer
using antipruritic agent	—	1.YV.35.JA-G4 Includes: • diphenhydramine, lidocaine, benzocaine, crotonamiton, calamine
using antipsoriatic agent	—	1.YV.35.JA-G5 Includes: • coal tar preparations, anthralin, methoxsalen)
using antibiotic and chemotherapeutic agent	1.YV.35.HA-G6 Includes: • fusidic acid, bacitracin, polymyxin, mupirocin, idoxuridine, acyclovir for topical use	1.YV.35.JA-G6 Includes: • fusidic acid, bacitracin, polymyxin, mupirocin, idoxuridine, acyclovir for topical use
using corticosteroid agent	1.YV.35.HA-G7 Includes: • hydrocortisone, triamcinolone, clobetasol, betamethasone	1.YV.35.JA-G7 Includes: • hydrocortisone, triamcinolone, clobetasol, betamethasone
using antiseptic and disinfectant	—	1.YV.35.JA-G8 Includes: • chlorhexadine, hexachlorophene, iodine, clloquinol, isopropyl alcohol
using other dermatological preparation	—	1.YV.35.JA-H3 Includes: • medicated shampoos, wart preparations, minoxidil
using immunomodulating agent	1.YV.35.HA-M7 Includes: • BCG, interferon alpha, filgastrim, interferon beta 1B, levamisole	—
using local anesthetic agent	1.YV.35.HA-P1	1.YV.35.JA-P1

1.YV.35.^ ^ Pharmacotherapy (local), skin of leg	percutaneous [needle] approach	topical application or direct instillation into wound
using pharmacological agent NEC	1.YV.35.HA-T9	1.YV.35.JA-T9
using augmentation agent	1.YV.35.HA-W1	—
using bleaching agent [e.g. liquid nitrogen for hyperpigmentation]	—	1.YV.35.JA-X1
using drying agent [e.g. air, aluminum salts, starch, powders]	—	1.YV.35.JA-X3
using dye	1.YV.35.HA-X4	—
using agent NEC [e.g. synthetic peptides for scar formation]	1.YV.35.HA-Z9	1.YV.35.JA-Z9

1.YV.52.^ ^ Drainage, skin of leg**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Aspiration, skin of lower extremity NEC
 Drainage [abscess, hematoma], skin of lower extremity NEC

Excludes: Aspiration biopsy (see [2.YV.71.^ ^](#))

1.YV.52.HA	using needle aspiration
1.YV.52.HA-TS	using percutaneous approach with drainage tube left in situ
1.YV.52.JA	using external manual expression (or separation of infected wound)
1.YV.52.LA	using incisional approach

1.YV.53.^ ^ Implantation of internal device, skin of leg**S** ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Implantation, brachytherapy applicator, skin of leg

Excludes: Expansion of device already in place (see [1.YV.54.^ ^](#))

Code Also: Any concomitant loading of brachytherapy applicator (see [1.YV.26.^ ^](#))

1.YV.53.DA-TP	of tissue expander using endoscopic approach
1.YV.53.HA-EM	of brachytherapy applicator using percutaneous approach
1.YV.53.HA-FT	of (semipermeable) catheter using percutaneous approach
1.YV.53.LA-EM	of brachytherapy applicator using open approach
1.YV.53.LA-TP	of tissue expander using open approach
1.YV.53.LA-TS	of wound drain using open approach

1.YV.54.^ ^ Management of internal device, skin of leg**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Expansion/reduction of tissue expander
Inflation/adjustment of tissue expander

1.YV.54.HA-G2	using percutaneous (needle) approach and synthetic agent [e.g. silicone]
1.YV.54.HA-W1	using percutaneous (needle) approach and augmentation agent [e.g. saline, soya]

1.YV.55.^ ^ Removal of device, skin of leg**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Removal of sutures (clips etc.), skin of lower extremity NEC

Excludes: that done as part of more definitive reparative intervention

1.YV.55.DA-TP	of tissue expander using endoscopic approach
1.YV.55.JA-EB	of radioactive implant using external approach
1.YV.55.JA-FF	of closure device [e.g. suture, clip, etc.] using external approach
1.YV.55.JA-FT	of (semipermeable) catheter using external approach
1.YV.55.JA-NP	of packing using external approach
1.YV.55.JA-TS	of wound drain using external approach
1.YV.55.LA-EB	of radioactive implant using open approach
1.YV.55.LA-TP	of tissue expander using open approach

1.YV.56.^ ^ Removal of foreign body, skin of leg**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Extraction of (superficial, embedded) foreign body, skin of leg (e.g. gravel, splinter, tic)

Excludes: Debridement for removal of foreign body debris, skin of leg (see [1.YV.59.^ ^](#))

Note: May involve the use of pulsatile jet lavage or irrigation to facilitate complete removal of foreign body debris.

1.YV.56.JA	using external approach [for simple extraction]
1.YV.56.LA	using incisional approach

1.YV.58.^ ^ Procurement, skin of leg**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Excludes: Myocutaneous flaps (see Procurement, Muscle, by site)

1.YV.58.LA-XX-A of full thickness autograft using open approach
 1.YV.58.LA-XX-B of split thickness autograft using open approach
 1.YV.58.LA-XX-F of free flap using open approach

1.YV.59.^ ^ Destruction, skin of leg**S** ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Ablation, skin (lesion) of leg
 Debridement (simple), skin of leg
 Dermabrasion [planing], skin of leg
 Electrolysis, leg
 Epilation [hair removal], leg
 Laser therapy (for removal of strawberry hemangioma, port wine stain, rosacea) skin of leg
 that for control of bleeding, skin of leg

Excludes: Debridement with concomitant skin graft/flap repair, leg (see [1.YV.80.^](#))
 Debridement with concomitant temporary tissue (dermagraft, xenograft, cadaver allograft) coverage of leg (see [1.YV.14.^](#))
 Destruction, skin (lesion) of overlapping or multiple sites involving leg with foot (see [1.YW.59.^](#))
 Destruction, skin (lesion) of overlapping or multiple sites involving leg with trunk (abdomen, back, buttock, chest, groin) (see [1.YZ.59.^](#))
 Laser (green light) therapy for hyperpigmentation of leg only (see [1.YV.12.^](#))
 Phototherapy of skin of leg (see [1.YV.12.^](#))

Note: May involve removal of tattoo, strawberry hemangioma, port wine stain, rosacea, etc. of skin of lower extremity by destroying the lesion.

1.YV.59.JA-AD	using cryoprobe
1.YV.59.JA-AG	using laser NEC [e.g. carbon dioxide for ablation]
1.YV.59.JA-AL	using electrolysis device
1.YV.59.JA-CF	using mechanical device [sandpaper, wire brush]
1.YV.59.JA-DM	using ruby laser [e.g. for tattoo removal]
1.YV.59.JA-DN	using argon dye (or tunable dye) laser
1.YV.59.JA-DP	using yellow light (or copper vapor) laser
1.YV.59.JA-GX	using device NEC [electrocautery]
1.YV.59.JA-X2	using cold inducing agent/cryorefrigerant [liquid nitrogen]
1.YV.59.JA-X7	using chemical cautery agent

1.YV.74.^ Fixation, skin of leg

S ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Thigh lift

1.YV.74.LA using open approach

1.YV.78.^ ^ Repair by decreasing size, skin of leg**S** 5 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Liposuction, leg
Reduction, adipose tissue, thighs
that using tumescent solution

1.YV.78.HA-GX using percutaneous approach and device NEC
 1.YV.78.HA-TK using percutaneous approach and suction device
Includes: Liposuction alone
 1.YV.78.LA using excisional technique
Includes: that with excision of skin and adipose tissue alone
 1.YV.78.LA-TK using excisional technique and suction device
Includes: that with excision of skin and adipose tissue and concomitant liposuction

1.YV.80.^ ^ Repair, skin of leg**S** 28 **L** 2 **E** 15

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 28	Optional	Treatment Status 3A	Status	D	Delayed (closure occurs > 24 hrs post trauma)
				R	Revision
				S	Staged
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)
E 15	Optional	Laceration	Extent	E	5 to 10 cm
				G	Greater than 10 cm
				L	Less than 5 cm

Includes: Debridement [to prepare recipient site] for skin graft/flap repair, leg
Suture, skin of leg

Excludes: Repair, skin of foot with leg (see [1.YW.80.^^](#))
Repair, skin of leg with buttock (see [1.YZ.80.^^](#))
Repair, skin of leg with other sites of trunk (see [1.YZ.80.^^](#))
Temporary tissue coverage, skin of leg (see [1.YV.14.^^](#))

1.YV.80.JA-FF	using closure device (e.g. clip, adhesive skin closure [Steri-Strips])
1.YV.80.JA-XX-K	using homograft (e.g. GRAFTJACKET regenerative tissue matrix)
1.YV.80.JA-XX-P	using cultured tissue
1.YV.80.LA	using apposition technique [suture]
1.YV.80.LA-W4	using glue for apposition (e.g. crazy glue, glustitch)
1.YV.80.LA-XX-A	using full-thickness autograft
1.YV.80.LA-XX-B	using split-thickness autograft
1.YV.80.LA-XX-E	using local flap [e.g. rotation, advancement, transposition, Z-plasty]
1.YV.80.LA-XX-F	using free flap [e.g. fasciocutaneous flap]

1.YV.87.^^ Excision partial, skin of leg

S ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description

1.YW.55.JA-NP of packing
1.YW.55.JA-TS of wound drain using external approach
1.YW.55.LA-TP of tissue expander using open approach

1.YW.56.^ ^ Removal of foreign body, skin of foot**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Extraction of (superficial, embedded) foreign body, skin of foot (e.g. splinter, tic)

Excludes: Debridement for removal of foreign body debris, skin of foot (see [1.YW.59.^ ^](#))

Note: May involve the use of pulsatile jet lavage or irrigation to facilitate complete removal of foreign body debris.

1.YW.56.JA using external approach [for simple extraction]

1.YW.56.LA using incisional approach

1.YW.58.^ ^ Procurement, skin of foot**S** ⁴ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

1.YW.58.LA-XX-A of full thickness autograft using open approach

1.YW.58.LA-XX-B of split thickness autograft using open approach

1.YW.59.^ Destruction, skin of foot**S** ⁵ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes:

Ablation, skin (lesion) of foot (with leg)
Cutting corn or callus, foot
Debridement (simple), skin of foot (with leg)
Dermabrasion [planing], skin of foot (with leg)
Destruction, skin (lesion) of overlapping or multiple sites involving foot with leg
Electrolysis, foot
Epilation (hair removal), foot
Laser therapy (for removal of strawberry hemangioma, port wine stain, rosacea), skin of foot

Excludes:

Debridement with concomitant temporary tissue (dermagraft, xenograft, cadaver allograft) coverage of foot (with leg) (see [1.YW.14.^](#))
Debridement with skin graft/flap repair, foot (with leg) (see [1.YW.80.^](#))
Takedown of syndactyly (dewebbing toes) (see [1.WL.71.^](#))

Note:

May involve the removal of tatoo, strawberry hemangioma, port wine stain, rosacea, callus, wart from skin of foot by destroying the lesion.

1.YW.59.JA-AD	using cryoprobe
1.YW.59.JA-AG	using laser
1.YW.59.JA-AL	using electrolysis device
1.YW.59.JA-CF	using mechanical device [sandpaper, wire brush]
1.YW.59.JA-DM	using ruby laser (e.g. for tattoo removal)
1.YW.59.JA-DN	using argon dye (or tunable dye) laser
1.YW.59.JA-DP	using yellow light (or copper vapor) laser
1.YW.59.JA-GX	using device NEC [electrocautery]
1.YW.59.JA-X2	using cold inducing agent/cryorefrigerant [liquid nitrogen]
1.YW.59.JA-X7	using chemical cautery agent

1.YW.80.^ ^ Repair, skin of foot**S** 28 **L** 2 **E** 15

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 28	Optional	Treatment Status 3A	Status	D	Delayed (closure occurs > 24 hrs post trauma)
				R	Revision
				S	Staged
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)
E 15	Optional	Laceration	Extent	E	5 to 10 cm
				G	Greater than 10 cm
				L	Less than 5 cm

Includes: Debridement [to prepare recipient site] for skin graft/flap repair, foot
Suture, skin of foot

Excludes: Temporary tissue coverage, skin of foot (see [1.YW.14.^ ^](#))

1.YW.80.JA-FF using closure device (e.g. clip, adhesive skin closure [Steri-Strips])
 1.YW.80.JA-XX-K using homograft (e.g. GRAFTJACKET regenerative tissue matrix)
 1.YW.80.JA-XX-P using cultured tissue
 1.YW.80.LA using apposition technique [suture]
 1.YW.80.LA-W4 using glue for apposition (e.g. crazy glue, glustitch)
 1.YW.80.LA-XX-A using full-thickness autograft
 1.YW.80.LA-XX-B using split-thickness autograft
 1.YW.80.LA-XX-E using local flap [e.g. rotation, advancement, transposition, Z-plasty]
 1.YW.80.LA-XX-F using free flap [e.g. fasciocutaneous]

1.YW.87.^.^ Excision partial, skin of foot**S** 5 **L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Excision partial, skin (lesion) of multiple or overlapping sites involving foot with leg
Release [excision] scar contracture, foot (with leg)
Resection, skin (lesion) of foot (with leg)

Excludes: Debridement [to prepare recipient site] for skin graft/flap of foot (with leg) (see [1.YW.80.^.](#))
Debridement with temporary tissue (dermagraft, xenograft, cadaver allograft) coverage of foot (with leg) (see [1.YW.14.^.](#))
Dermabrasion [planing], skin of foot (with leg) (see [1.YW.59.^.](#))
Removal of callus or corn of foot (see [1.YW.59.^.](#))
Resection, skin (lesion) extending into soft tissue (fascia, muscle, tendon) of foot (see [1.WV.87.^.](#))
Simple debridement, skin of foot (with leg) (see [1.YW.59.^.](#))

Code Also: Any intraoperative microscope assistance (see [3.YZ.94.^.](#))

Note: Use this code when the definitive intervention is the (extensive) excision of diseased [e.g. neoplastic] skin which may or may not require a reconstructive skin graft/flap to repair the surgical defect.

1.YW.87.^.^ Excision partial, skin of foot	open [excisional] approach	open [excisional] approach and laser
using apposition technique [e.g. suture, glue] for closure	1.YW.87.LA	1.YW.87.LA-AG
using full thickness autograft	1.YW.87.LA-XX-A	1.YW.87.LA-AG-A
using local flap [e.g. rotation, advancement, transposition, Z plasty]	1.YW.87.LA-XX-E	1.YW.87.LA-AG-E
using split thickness autograft	1.YW.87.LA-XX-B	1.YW.87.LA-AG-B

1.YX.^.^ Therapeutic Interventions on the Nail

Includes: Lateral and proximal nail fold
Nail bed
Nail matrix
Nail plate

1.YX.12.^ ^ Therapy, nail

Includes: Care, nail (cuticle)
Cutting, nail
Trimming, nail

Excludes: Therapeutic soak of nail (see [1.YX.35.^ ^](#))

1.YX.12.ZZ using technique NEC

1.YX.35.^ ^ Pharmacotherapy (local), nail

Includes: Application of agent, nail
Soak (therapeutic), nail

Excludes: Systemic pharmacotherapy (see [1.ZZ.35.^ ^](#))

1.YX.35.JA-G1 using antifungal agent

Includes: nystatin, clotrimazole, miconazole, tolnaftate

1.YX.35.JA-G2 using protective agent (e.g. emollient)

Includes: silicone, dimethicone, zinc oxide, urea, protectives against UV radiation

1.YX.35.JA-G8 using antiseptics and disinfectants

Includes: chlorhexadine, hexachlorophene, iodine, cllioquinol, isopropyl alcohol

1.YX.35.JA-Z9 using agent NEC

1.YX.52.^ ^ Drainage, nail

S 4 **L** 31 **E** 14

				S	Single nail

Includes: Avulsion, nail
Excision, nail unit and reconstruction with skin graft or flap
Onychectomy, total

Excludes: Manual removal of nail after application of chemical agent (see [1.YX.59.^.](#))

1.YX.89.LA using open [excisional] approach
1.YX.89.LA-XX-A using open [excisional] approach and full-thickness autograft
1.YX.89.LA-XX-B using open [excisional] approach and split-thickness autograft
1.YX.89.LA-XX-E using open [excisional] approach and local flap

1.YY.^.^ Therapeutic Interventions on Skin of Surgically Constructed Sites

Includes: (External) stoma
Pacemaker pocket

1.YY.12.^.^ Therapy, skin of surgically constructed sites

Includes: Care, stoma NOS

1.YY.12.ZZ using technique NEC

1.YY.14.^ ^ Dressing, skin of surgically constructed sites

Includes: Coverage [temporary], skin of surgically constructed sites
 Coverage [temporary], stoma
 Debridement [simple] with temporary coverage
 Dressing [bandaging], stoma
 Replace [change], dressing stoma

1.YY.14.JA-FJ	using occlusive dressing [e.g. hydrocolloid, coal tar, paraffin gauze, hydrogel]
1.YY.14.JA-FN	using wet/moist dressing
1.YY.14.JA-GN	using pressure dressing
1.YY.14.JA-H1	using medicated dressing
1.YY.14.JA-NC-N	using negative pressure device and synthetic tissue
	Includes: Negative pressure wound therapy (NPWT) Vacuum assisted closure (VAC)
1.YY.14.JA-NP	using packing
1.YY.14.JA-T6	using dry dressing
1.YY.14.JA-XX-L	using xenogeneic tissue [e.g. porcine xenograft]
1.YY.14.JA-XX-N	using synthetic tissue [e.g. Biobrane, Derma Graft]

1.YY.37.^ ^ Installation of external appliance, skin of surgically constructed sites

Includes: Application of external appliance, surgically constructed digestive tract
 Replacement of external appliance, surgically constructed digestive tract

1.YY.37.JA-GJ	of waste collection apparatus (e.g. stoma bag)
---------------	--

1.YY.38.^ ^ Management of external appliance, skin of surgically constructed sites

Includes: Adjustment, stoma bag
 Change, stoma bag
 Maintenance, stoma bag
 Removal, stoma bag

Excludes: Care of stoma NOS (see [1.YY.12.^ ^](#))
 Irrigation of stoma tract (see [1.OW.35.^ ^](#))

1.YY.38.JA-GJ	of waste collection apparatus (e.g. stoma bag)
---------------	--

1.YY.53.^ ^ Implantation of internal device, skin of surgically constructed sites**S**⁹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 9	Optional	Tx Status 4	Status	A	Abandoned after onset
				S	Staged

Includes: Second stage creation of subcutaneous pocket with implantation of device

Excludes: Replacement of device within an already existing subcutaneous pocket (see [1.YY.54.^ ^](#))

Omit code: when concomitant with insertion of leads, electrodes or infusion catheters (code to anatomy site where the leads, electrodes or infusion catheters reside).

1.YY.53.LA-DV	of neurostimulator using open (subcutaneous) approach
Note:	Involves the (second) stage creation of subcutaneous pocket with placement of neurostimulator into pocket (when leads are already in place percutaneously).
1.YY.53.LA-GX	of device NEC using open (subcutaneous) approach
1.YY.53.LA-QK	of infusion pump using open (subcutaneous) approach
1.YY.53.LA-TS	of tube (catheter) using open (subcutaneous) approach
Includes:	Subcutaneous burial of peritoneal dialysis catheter (for later retrieval at time of onset of dialysis)

1.YY.54.^ ^ Management of internal device, skin of surgically constructed sites**S**⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

- Includes:** Adjustment, repositioning of internal device, subcutaneous pocket
Replacement of internal device within existing subcutaneous pocket
- Excludes:** Adjustment of cardiac pacemaker function/rate (see [2.HZ.07.^^](#))
Analysis/evaluation of neurostimulator (nerve pacemaker) function/rate (see Analysis, neurostimulator, by site)
Assessment of cardiac pacemaker function/rate with or without reprogramming (see [2.HZ.07.^^](#))

- 1.YY.54.LA-DV of neurostimulator using open (subcutaneous) approach
Includes: Replacement of pulse generator/battery of neurostimulator (nerve pacemaker) system
Excludes: that with concomitant replacement of leads (see Implantation, device, by site)
- 1.YY.54.LA-FR of resynchronization pacemaker device using open (subcutaneous) approach
Includes: Replacement of pulse generator/battery of cardiac resynchronization therapy pacemaker [CRT, CRT-P, Biventricular pacemaker]
- 1.YY.54.LA-FS of cardioverter or defibrillation device using open (subcutaneous) approach
Includes: Replacement of pulse generator/battery of cardioverter or defibrillator system
Excludes: that with concomitant replacement of leads (see [1.HZ.53.^^](#))
- 1.YY.54.LA-FU of resynchronization defibrillator device using open (subcutaneous) approach
Includes: Replacement of pulse generator/battery of cardiac resynchronization therapy defibrillator [CRT-D, BiV-ICD]
- 1.YY.54.LA-GX of device NEC using open (subcutaneous) approach
- 1.YY.54.LA-NM of cardiac pacemaker battery/generator using open (subcutaneous) approach
Includes: Replacement of pulse generator/battery of cardiac pacemaker system
Excludes: that with concomitant replacement of leads (see [1.HZ.53.^^](#))
- 1.YY.54.LA-QK of infusion pump using open (subcutaneous) approach

1.YY.55.^^ Removal of internal device, skin of surgically constructed sites

S ⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes:	Removal of device, subcutaneous pocket
Excludes:	when concomitant with removal of neurostimulator electrodes (see site where electrodes reside) when concomitant with removal of pacing leads and heart pacemaker (see 1.HZ.55.^) when concomitant with replacement of new device into subcutaneous pocket when previously inserted leads or electrodes remain insitu (see 1.YY.54.^) when concomitant with takedown of subcutaneous pocket (see 1.YY.89.^)
Note:	Involves removing device from within subcutaneous pocket. If leads or electrodes are also removed, code to anatomy site where the leads or electrodes communicate (e.g. heart, brain, nerve or spinal canal).
1.YY.55.LA-DV	of neurostimulator only using open (subcutaneous) approach Includes: Removal of generator/battery of neurostimulator system
1.YY.55.LA-FR	of resynchronization pacemaker device using open (subcutaneous) approach Includes: Removal of pulse generator/battery of cardiac resynchronization therapy pacemaker [CRT, CRT-P, Biventricular pacemaker]
1.YY.55.LA-FS	of cardioverter or defibrillation device using open (subcutaneous) approach Includes: Removal of pulse generator/battery of cardioverter or defibrillator system
1.YY.55.LA-FU	of resynchronization defibrillator device using open (subcutaneous) approach Includes: Removal of pulse generator/battery of cardiac resynchronization therapy defibrillator [CRT-D, BiV-ICD]
1.YY.55.LA-GX	of internal device NEC using open (subcutaneous) approach
1.YY.55.LA-NM	of cardiac pacemaker battery/generator using open (subcutaneous) approach Includes: Removal of pulse generator/battery of cardiac pacemaker system
1.YY.55.LA-QK	of infusion pump using open (subcutaneous) approach
1.YY.55.LA-TS	of tube (catheter) using open (subcutaneous) approach Includes: Retrieval of (buried) peritoneal dialysis catheter

1.YY.59.^ Destruction, skin of surgically constructed sites

S 5 **L** 32

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 32	Optional	Stoma	Location	P K	Subcutaneous pocket (for implanted device)
				S R	External stoma of respiratory system
				S S	External stoma of digestive system
				S U	External stoma of urinary system
				S Z	Other external stoma

1.YY.59.JA-AD	using cryoprobe
1.YY.59.JA-GX	using device NEC (e.g. electrocautery)

1.YY.80.^ Repair, skin of surgically constructed sites**S** 5 **L** 32

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

				S R	External stoma of respiratory system
				S S	External stoma of digestive system
				S U	External stoma of urinary system
				S Z	Other external stoma

Includes: Repair, (pacemaker) pocket
 Repair, stoma (dehiscence or breakdown) at skin surface
 Retack (dehiscence), mucous fistula (subcutaneously)
 Suture, skin of surgically constructed sites

Excludes: Repair, stoma (at internal anastomosis site) (see [1.OW.80.^](#))

1.YY.80.LA using open approach without tissue [suture]
 1.YY.80.LA-W4 using open approach and glue (e.g. crazy glue, glustitch)
 1.YY.80.LA-XX-A using open approach and full-thickness autograft
 1.YY.80.LA-XX-B using open approach and split-thickness autograft
 1.YY.80.LA-XX-E using open approach and local flap [e.g. rotation, advancement, transposition, Z-plasty]
 1.YY.80.LA-XX-N using open approach and synthetic material (e.g. mesh)

1.YY.84.^ Construction or reconstruction, skin of surgically constructed sites**S** 9

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 9	Optional	Tx Status 4	Status	A	Abandoned after onset
				S	Staged

Includes: Creation of subcutaneous pocket for (temporary) storage (retention) of autologous bone or cartilage tissue (e.g. cranial flap or rib)
 Maturation (creation of external stoma) of ileostomy or colostomy when performed as a staged procedure
 Relocation of subcutaneous pocket (with or without takedown of original pocket)

Excludes: Second stage creation of subcutaneous pocket for implantation of device (see [1.YY.53.^](#))

Code Also: Procurement of tissue from rib for creation of external ear (see [1.SL.58.^](#))

Omit code: When done concomitantly with one stage implantation of total system (see Implantation of device, by site of lead, electrode or catheter)

1.YY.84.LA using open approach

1.YY.87.^ ^ Excision partial, skin of surgically constructed sites**S** 5 **L** 32

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 32	Optional	Stoma	Location	P K	Subcutaneous pocket (for implanted device)
				S R	External stoma of respiratory system
				S S	External stoma of digestive system
				S U	External stoma of urinary system
				S Z	Other external stoma

Includes: Debridement [when definitive procedure], skin of surgically constructed sites
Debridement, stoma at skin surface

Excludes: Debridement (simple), with temporary coverage, skin of surgically constructed sites (see [1.YY.14.^ ^](#))
Debridement, stoma within digestive tract (see [1.OW.87.^ ^](#))

1.YY.87.LA using open (excisional) approach

1.YY.89.^ ^ Excision total, skin of surgically constructed sites**S** 5 **L** 32

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision
L 32	Optional	Stoma	Location	P K	Subcutaneous pocket (for implanted device)
				S R	External stoma of respiratory system
				S S	External stoma of digestive system
				S U	External stoma of urinary system
				S Z	Other external stoma

Includes: Takedown, subcutaneous pocket with or without removal of device
Takedown, subcutaneous pocket with removal of (temporarily) stored autologous bone tissue [e.g. cranial flap, rib]

Excludes: Relocation of subcutaneous pocket with or without concomitant takedown of original pocket (see [1.YY.84.^ ^](#))
Takedown of subcutaneous pocket concomitant with removal of pacemaker with leads (see [1.HZ.55.^ ^](#))

Omit code: when takedown of other subcutaneous pocket is concomitant with removal of neurostimulator with electrodes (see removal of internal device, site where electrodes reside e.g. brain, spinal canal, nerve).

1.YY.89.LA using open (excisional) approach

1.YZ.^^.^^ Therapeutic Interventions on Skin NEC

- Includes:** Skin of overlapping (or multiple) sites involving trunk with arm or leg
Skin of overlapping sites of body NEC
- Excludes:** Skin of axilla with other trunk (back, breast, chest) site (see [1.YS.^^.^^](#))
Skin of overlapping sites of face, scalp and neck (see [1.YF.^^.^^](#))
Skin of overlapping sites of scalp and neck (see [1.YG.^^.^^](#))

1.YZ.09.^^ Stimulation, skin NEC

- Includes:** Electrostimulation, skin NEC (wound)
- Note:** Involves stimulation at surface of skin wound to produce collagen deposit

1.YZ.09.JA-DV using external electrical stimulating device

1.YZ.12.^^ Therapy, skin NEC

- Includes:** Leech therapy
Oxygenation, hyperbaric, skin (wound, any site)
Phototherapy, skin NEC
Therapy, laser, skin NEC (for hyperpigmentation)
- Excludes:** Destruction [lesion] of skin NEC (see [1.YZ.59.^^](#))
- Note:** Use this code whenever multiple skin sites of the body are involved

1.YZ.12.JA-AG using laser NEC [e.g. green light laser]
1.YZ.12.JA-DQ using ultraviolet light

Includes: (Newborn) phototherapy NOS

1.YZ.12.JA-LI using external application of living organism (e.g. leeches)
1.YZ.12.JA-MS using monoplace hyperbaric chamber (or chamber NOS)
1.YZ.12.JA-MT using multiplace hyperbaric chamber

1.YZ.13.^^ Control of bleeding, skin NEC

- Excludes:** Application of pressure dressing (see [1.YZ.14.^^](#))
Destruction or ablation, skin NEC for control of bleeding (see [1.YZ.59.^^](#))
Systemic pharmacotherapy for control of bleeding (see [1.ZZ.35.^^](#))
that with surgical repair and suturing (see [1.YZ.80.^^](#))

1.YZ.13.JA-C2 using local application of antihemorrhagic agent

Includes: aminocaproic acid, aprotinin, phytonadione, thrombin, coagulation factor VIII

1.YZ.13.JN using external manual compression

1.YZ.14.^ ^ Dressing, skin NEC

Includes: Application, pressure dressings to control multiple bleeding wounds of trunk and limb
 Bandaging, wound NEC
 Change dressing NEC
 Coverage [temporary tissue], (multiple sites) of skin
 Debridement [simple] with temporary tissue coverage, (multiple sites) of skin
 Dressing, multiple (wound) sites of trunk and limb
 Maggot (larval) therapy

Excludes: Dressing (topical), nose alone (see [1.YD.14.^ ^](#))
 Dressing, (multiple sites of) face (see [1.YF.14.^ ^](#))
 Dressing, arm alone (see [1.YT.14.^ ^](#))
 Dressing, axillary region alone (see [1.YR.14.^ ^](#))
 Dressing, ear lobe alone (see [1.YC.14.^ ^](#))
 Dressing, forehead alone (see [1.YB.14.^ ^](#))
 Dressing, leg alone (see [1.YV.14.^ ^](#))
 Dressing, lip alone (see [1.YE.14.^ ^](#))
 Dressing, neck (see [1.YG.14.^ ^](#))
 Dressing, scalp alone (see [1.YA.14.^ ^](#))
 Dressing, trunk (e.g. abdomen, back, breast, chest, groin) (see [1.YS.14.^ ^](#))

Code Also: Any concomitant dressing to face (see [1.YF.14.^ ^](#))
 Any concomitant dressing to foot (see [1.YW.14.^ ^](#))
 Any concomitant dressing to hand (see [1.YU.14.^ ^](#))

Note: If a dressing is applied to one body region only, do not use this rubric. (See exclusion notes and jump links.) If dressings are applied to multiple body regions, it is recommended that the following be coded separately: face, hand and foot since this represents significant functional impairment. (See code also notes for jump links). If dressings are applied to the trunk with any of the arm or leg, use this rubric to classify the intervention just once.

1.YZ.14.JA-FJ	using occlusive dressing [e.g. hydrocolloid, coal tar, paraffin gauze, hydrogel]
1.YZ.14.JA-FN	using wet/moist dressing
1.YZ.14.JA-GN	using pressure dressing
1.YZ.14.JA-H1	using medicated dressing
1.YZ.14.JA-LI	using external application of living organism (e.g. maggots)
1.YZ.14.JA-NC-N	using negative pressure device and synthetic tissue
	Includes: Negative pressure wound therapy (NPWT) Vacuum assisted closure (VAC)
1.YZ.14.JA-NP	using packing
1.YZ.14.JA-T6	using dry dressing
1.YZ.14.JA-XX-L	using xenogeneic tissue [e.g. porcine xenograft]
1.YZ.14.JA-XX-N	using synthetic tissue [e.g. Biobrane, Dermagraft]

1.YZ.26.^.^ Brachytherapy, skin NEC**S** 35

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 35	Optional	Implant Status	Status	P M	Permanent implant – Radioactive source left in place permanently
				T M	Temporary implant – Radioactive source removed after course of treatment is complete

Includes: Endocurietherapy, skin NEC
Implantation [insertion] of radioactive material

Code Also: Any concomitant implantation of brachytherapy applicators or conduits [e.g. needles, catheters] to gain access to treatment site (see [1.YZ.53.^.](#))

Note: There are typically two distinct phases required to complete the process of brachytherapy. The first phase involves the insertion of non-radioactive applicators or conduits [e.g. hollow needles, catheters, stents etc.] that receive or transmit the radioactive material into the body. The second phase involves the after loading of the radioactive material [e.g. seeds, pellets, wires, etc.] into the applicator or conduit.

1.YZ.26.HA	using percutaneous (transcatheter or transneedle) approach
1.YZ.26.JA	using external approach [e.g. surface mould]
1.YZ.26.LA	using open approach

1.YZ.27.^.^ Radiation, skin NEC

Includes: Radiotherapy, electron, skin (total body)
Teletherapy, skin NEC
Therapy, radiation [radiotherapy], skin NEC

Excludes: Radiation deep into soft tissue (see Radiation, soft tissue, by site)
Teletherapy, breast (see [1.YM.27.^.](#))
Teletherapy, skin of abdomen and trunk (see [1.YS.27.^.](#))
Teletherapy, skin of arm and hand (see [1.YT.27.^.](#))
Teletherapy, skin of face, neck and scalp (see [1.YF.27.^.](#))
Teletherapy, skin of leg and foot (see [1.YV.27.^.](#))

Note: May involve irradiation of overlapping or multiple skin sites.

1.YZ.27.JA	using external beam
------------	---------------------

1.YZ.35.^ ^ Pharmacotherapy (local), skin NEC

- Includes:**
- Application of agent, skin NEC
 - Cleansing, wound of skin NEC
 - Injection, skin NEC
 - Instillation, skin NEC
 - Irrigation, skin NEC
 - Rubbing [massage] of skin with agent
 - Skin care, topical treatment
 - Tattoo, skin NEC
 - that for treatment of skin NEC
- Excludes:**
- Assistance for personal hygiene (see [7.SC.01.^ ^](#))
 - Irrigation with drainage (see [1.YZ.52.^ ^](#))
 - Systemic pharmacotherapy (see [1.ZZ.35.^ ^](#))
 - that for control of bleeding (see [1.YZ.13.^ ^](#))
- Omit code:**
- When skin preparation is a part of another intervention

1.YZ.35.^.^ Pharmacotherapy (local), skin NEC	percutaneous [needle] approach	topical application or direct instillation into wound
using antiinfective irrigating solution	—	1.YZ.35.JA-D1 Includes: • chlorhexidine, neomycin
using salt irrigating solution	—	1.YZ.35.JA-D2 Includes: • sodium chloride
using other irrigating solution	—	1.YZ.35.JA-D3 Includes: • sorbitol, mannitol
using antifungal agent	—	1.YZ.35.JA-G1 Includes: • nystatin, clotrimazole, miconazole, tolnaftate
using emollient and protective agent	—	1.YZ.35.JA-G2 Includes: • silicone, dimethicone, zinc oxide, urea, protectives against UV radiation
using wound and ulcer treatment agent	—	1.YZ.35.JA-G3 Includes: • sutilains, collagenase, dextranomer
using antipruritic agent	—	1.YZ.35.JA-G4 Includes: • diphenhydramine, lidocaine, benzocaine, crotonamiton, calamine
using antipsoriatic agent	—	1.YZ.35.JA-G5 Includes: • coal tar preparations, anthralin, methoxsalen)
using antibiotic and chemotherapeutic agent	1.YZ.35.HA-G6 Includes: • fusidic acid, bacitracin, polymyxin, mupirocin, idoxuridine, acyclovir for topical use	1.YZ.35.JA-G6 Includes: • fusidic acid, bacitracin, polymyxin, mupirocin, idoxuridine, acyclovir for topical use
using corticosteroid agent	1.YZ.35.HA-G7 Includes: • hydrocortisone, triamcinolone, clobetasol, betamethasone	1.YZ.35.JA-G7 Includes: • hydrocortisone, triamcinolone, clobetasol, betamethasone
using antiseptic and disinfectant	—	1.YZ.35.JA-G8 Includes: • chlorhexadine, hexachlorophene, iodine, cllioquinol, isopropyl alcohol
using other dermatological preparation	—	1.YZ.35.JA-H3 Includes: • medicated shampoos, wart preparations, minoxidil
using immunomodulating agent	1.YZ.35.HA-M7 Includes: • BCG, interferon alpha, filgastrim, interferon beta 1B, levamisole	—
using local anesthetic agent	1.YZ.35.HA-P1	1.YZ.35.JA-P1

1.YZ.35.^.^ Pharmacotherapy (local), skin NEC	percutaneous [needle] approach	topical application or direct instillation into wound
using pharmacological agent NEC	1.YZ.35.HA-T9	1.YZ.35.JA-T9
using augmentation agent	1.YZ.35.HA-W1	—
using bleaching agent [e.g. liquid nitrogen for hyperpigmentation]	—	1.YZ.35.JA-X1
using drying agent [e.g. air, aluminum salts, starch, powders]	—	1.YZ.35.JA-X3
using dye	1.YZ.35.HA-X4	—
using agent NEC [e.g. synthetic peptides for scar formation]	1.YZ.35.HA-Z9	1.YZ.35.JA-Z9

1.YZ.37.^.^ Installation of external appliance, skin NEC

Includes: Application of external protective device (e.g. mask, plastic suit etc.)

1.YZ.37.JA-FJ of protective device

1.YZ.52.^.^ Drainage, skin NEC**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Aspiration, skin NEC
Drainage [abscess, hematoma], skin NEC

1.YZ.52.HA using needle aspiration
1.YZ.52.HA-TS using percutaneous approach with drainage tube left in situ
1.YZ.52.JA using external manual expression (or separation of infected wound)
1.YZ.52.LA using incisional approach

1.YZ.53.^.^ Implantation of internal device, skin NEC**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Excludes: Expansion of device already in place (see [1.YZ.54.^^](#))
Code Also: Any concomitant loading of brachytherapy applicator (see [1.YZ.26.^^](#))

1.YZ.53.DA-TP	of tissue expander using endoscopic approach
1.YZ.53.HA-EM	of brachytherapy applicator using percutaneous approach
1.YZ.53.LA-EM	of brachytherapy applicator using open approach
1.YZ.53.LA-TP	of tissue expander using open approach
1.YZ.53.LA-TS	of wound drain using open approach

1.YZ.54.^^ Management of internal device, skin NEC

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Expansion/reduction of tissue expander
Inflation/adjustment of tissue expander

1.YZ.54.HA-G2	using percutaneous (needle) approach and synthetic agent [e.g. silicone]
1.YZ.54.HA-W1	using percutaneous (needle) approach and augmentation agent [e.g. saline, soya]

1.YZ.55.^^ Removal of device, skin NEC

S 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Removal of sutures (clips etc.), skin NEC
Excludes: that done as part of more definitive reparative intervention

1.YZ.55.DA-TP	of tissue expander using endoscopic approach
1.YZ.55.JA-EB	of radioactive implant using external approach
1.YZ.55.JA-FF	of closure device [e.g. suture, clip, etc.] using external approach
1.YZ.55.JA-NP	of packing using external approach
1.YZ.55.JA-TS	of wound drain using external approach
1.YZ.55.LA-EB	of radioactive implant using open approach
1.YZ.55.LA-TP	of tissue expander using open approach

1.YZ.56.^.^ Removal of foreign body, skin NEC**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Extraction of (superficial, embedded) foreign body, skin NOS

Excludes: Debridement for removal of foreign body debris, skin NOS (see [1.YZ.59.^.^](#))

Note: May involve the use of pulsatile jet lavage or irrigation to facilitate complete removal of foreign body debris.

1.YZ.56.JA using external approach [for simple extraction]

1.YZ.56.LA using incisional approach

1.YZ.58.^.^ Procurement, skin NEC**S** 10

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 10	Optional	Tx Status 5	Status	A	Abandoned after onset
				R	Revision
				S	Staged

Includes: Procurement, skin of multiple sites

Excludes: Myocutaneous flaps (see Procurement, muscle, by site)

1.YZ.58.HA-XX-A of autograft (e.g. fat) using percutaneous (needle) approach

Excludes: Liposuction, skin NEC (see [1.YZ.78.^.^](#))

Note: Use this code, if desired, when autograft (fat) is procured by a separate percutaneous incision anywhere on the body. (This should never be a principal procedure).

1.YZ.58.LA-XX-A of full thickness autograft using open approach

1.YZ.58.LA-XX-B of split thickness autograft using open approach

1.YZ.58.LA-XX-F of free flap using open approach [e.g. fasciocutaneous]

1.YZ.58.LA-XX-G of pedicled (tube) flap

Note: Use this code at the time the pedicle flap is fashioned for coverage of another body site (e.g. the face) and again when the flap is finally cut free of the originating site. (This intervention is seldom performed.) In severe cases, where necrosis or deteriorating grafts have occurred it may be employed as a final resort because the blood supply of the pedicled flap is uninterrupted on one side of the flap—at the originating site. This increases likelihood of a viable skin transfer for extremely difficult skin repairs. This is always a multi-stage procedure.

1.YZ.58.LA-XX-K of homograft from deceased donor using open approach

1.YZ.59.^.^ Destruction, skin NEC**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes:

Ablation, skin (lesion) of multiple or overlapping sites involving limb with trunk
 Debridement (simple), skin (lesion) of multiple or overlapping sites involving limb with trunk
 Dermabrasion [planing], skin NEC
 Destruction, skin (lesion) of multiple or overlapping sites involving limb with trunk (abdomen, back, buttock, chest, groin)
 Electrolysis, multiple body sites involving limb with trunk
 Epilation [hair removal], multiple body sites involving limb with trunk
 Laser therapy (for removal of strawberry hemangioma, port wine stain, rosacea) of multiple skin sites involving limb with trunk
 Ligation of dermal appendage, skin NEC
 that for control of bleeding skin NEC

Excludes:

Debridement (to prepare recipient site) for skin graft/flap repair, multiple body sites involving limb with trunk (see [1.YZ.80.^.](#))
 Debridement with temporary tissue (dermagraft, xenograft, cadaver allograft) coverage of multiple sites involving limb with trunk (see [1.YZ.14.^.](#))
 Destruction, skin (lesion) of abdomen alone (see [1.YS.59.^.](#))
 Destruction, skin (lesion) of arm alone (see [1.YT.59.^.](#))
 Destruction, skin (lesion) of axillary region alone (see [1.YR.59.^.](#))
 Destruction, skin (lesion) of back alone (see [1.YS.59.^.](#))
 Destruction, skin (lesion) of buttock alone (see [1.YS.59.^.](#))
 Destruction, skin (lesion) of chest alone (see [1.YS.59.^.](#))
 Destruction, skin (lesion) of foot with or without leg (see [1.YW.59.^.](#))
 Destruction, skin (lesion) of hand with or without arm (see [1.YU.59.^.](#))
 Destruction, skin (lesion) of leg alone (see [1.YV.59.^.](#))
 Destruction, skin (lesions) of multiple sites of face with or without neck or scalp (see [1.YF.59.^.](#))
 Destruction, skin (lesions) of multiple sites of trunk (abdomen, back, buttock, chest, groin) alone (see [1.YS.59.^.](#))
 Laser (green light) therapy for hyperpigmentation of multiple body sites only (see [1.YZ.12.^.](#))
 Phototherapy, total body (see [1.YZ.12.^.](#))

Note:

May involve removal of tattoo, strawberry hemangioma, port wine stain, rosacea, etc. of multiple or overlapping skin sites of limb with trunk by destroying the lesions.

1.YZ.59.JA-AD	using cryoprobe
1.YZ.59.JA-AG	using laser NEC [e.g. carbon dioxide for ablation]
1.YZ.59.JA-AL	using electrolysis device
1.YZ.59.JA-CF	using mechanical device [sandpaper, wire brush]
1.YZ.59.JA-DM	using ruby laser [e.g. for tattoo removal]
1.YZ.59.JA-DN	using argon dye (or tunable dye) laser
1.YZ.59.JA-DP	using yellow light (or copper vapor) laser
1.YZ.59.JA-GX	using device NEC [electrocautery]
1.YZ.59.JA-LV	using ligature
1.YZ.59.JA-X2	using cold inducing agent/ cryorefrigerant [liquid nitrogen]
1.YZ.59.JA-X7	using chemical cautery agent

1.YZ.74.^.^ Fixation, skin NEC**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Belt lipectomy (abdomen, thighs and buttocks)
Body lift (lower)

Note: Involves recontouring the skin of the abdomen, thighs and buttocks (usually after massive weight loss).

1.YZ.74.LA using open approach

1.YZ.78.^.^ Repair by decreasing size, skin NEC**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Liposuction, multiple regions of the body (performed concomitantly)
Reduction, adipose (or loose skin) tissue, multiple regions of body
that using tumescent solution

Excludes: Belt lipectomy (see [1.YZ.74.^^](#))
Body lift (see [1.YZ.74.^^](#))

1.YZ.78.HA-GX	using percutaneous approach and device NEC
1.YZ.78.HA-TK	using percutaneous approach and suction device
	Includes: Liposuction alone
1.YZ.78.LA	using excisional technique
	Includes: that with excision of skin and adipose tissue alone
1.YZ.78.LA-TK	using excisional technique and suction device
	Includes: that with excision of skin and adipose tissue and concomitant liposuction

1.YZ.80.^^ Repair, skin NEC

S 28 **E** 15

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 28	Optional	Treatment Status 3A	Status	D	Delayed (closure occurs > 24 hrs post trauma)
				R	Revision
				S	Staged
E 15	Optional	Laceration	Extent	E	5 to 10 cm
				G	Greater than 10 cm
				L	Less than 5 cm

Includes: Repair, multiple sites of skin involving trunk (abdomen, back, chest, groin) with limb
Suture, skin NEC

Excludes: Repair, skin of (multiple sites on) face (see [1.YF.80.^^](#))
Repair, skin of arm alone (see [1.YT.80.^^](#))
Repair, skin of axillary region alone (see [1.YR.80.^^](#))
Repair, skin of ear lobe alone (see [1.YC.80.^^](#))
Repair, skin of forehead alone (see [1.YB.80.^^](#))
Repair, skin of leg alone (see [1.YV.80.^^](#))
Repair, skin of lip alone (see [1.YE.80.^^](#))
Repair, skin of neck alone (see [1.YG.80.^^](#))
Repair, skin of nose alone (see [1.YD.80.^^](#))
Repair, skin of scalp alone (see [1.YA.80.^^](#))

Repair, skin of trunk alone (e.g. abdomen, back, buttock, chest, groin) (see [1.YS.80.^](#))
 Temporary tissue coverage, skin of multiple sites of trunk with limb (see [1.YZ.14.^](#))

Code Also: Any concomitant repair to skin of face (see [1.YF.80.^](#))
 Any concomitant repair to skin of foot (see [1.YW.80.^](#))
 Any concomitant repair to skin of hand (see [1.YU.80.^](#))

Note: If a dressing is applied to one body region only, do not use this rubric. (See exclusion notes and jump links.) If dressings are applied to multiple body regions, it is recommended that the following be coded separately: face, hand and foot since this represents significant functional impairment. (See code also notes for jump links). If dressings are applied to the trunk with any of the arm or leg, use this rubric to classify the intervention just once

1.YZ.80.JA-FF using closure device (e.g. clip, adhesive skin closure [Steri-Strips])
 1.YZ.80.JA-XX-K using homograft (e.g. GRAFTJACKET regenerative tissue matrix)
 1.YZ.80.JA-XX-P using cultured tissue
 1.YZ.80.LA using apposition technique [suture]
 1.YZ.80.LA-W4 using glue for apposition (e.g. crazy glue, glustitch)
 1.YZ.80.LA-XX-A using full-thickness autograft
 1.YZ.80.LA-XX-B using split-thickness autograft
 1.YZ.80.LA-XX-E using local flap [e.g. rotation, advancement, transposition, Z-plasty]
 1.YZ.80.LA-XX-F using open approach and free flap [e.g. microvascular free flap]

1.YZ.87.^ Excision partial, skin NEC**S** 5

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 5	Optional	Tx Status 1	Status	A	Abandoned after onset
				R	Revision

Includes: Excision partial, skin of any limb with trunk (abdomen, back, buttock, chest, groin)
 Release [excision] scar contracture, multiple or overlapping sites of limb with trunk
 Resection, skin (lesion) of multiple or overlapping sites of limb with trunk

- Excludes:** Debridement [to prepare recipient site] for skin graft/flap repair of multiple or overlapping sites of limb with trunk (see [1.YZ.80.^](#))
 Debridement with temporary tissue (dermagraft, xenograft, cadaver allograft) coverage, skin of multiple or overlapping sites of limb with trunk (see [1.YZ.14.^](#))
 Dermabrasion [planing], skin of multiple or overlapping sites of limb with trunk (see [1.YZ.59.^](#))
 Excision, skin (lesion) of abdomen alone (see [1.YS.87.^](#))
 Excision, skin (lesion) of arm alone (see [1.YT.87.^](#))
 Excision, skin (lesion) of axillary region alone (see [1.YR.87.^](#))
 Excision, skin (lesion) of back alone (see [1.YS.87.^](#))
 Excision, skin (lesion) of ear alone (see [1.YC.87.^](#))
 Excision, skin (lesion) of eyelid alone (see [1.CX.87.^](#))
 Excision, skin (lesion) of foot (with or without leg involvement) (see [1.YW.87.^](#))
 Excision, skin (lesion) of forehead alone (see [1.YB.87.^](#))
 Excision, skin (lesion) of hand (with or without arm involvement) (see [1.YU.87.^](#))
 Excision, skin (lesion) of leg alone (see [1.YV.87.^](#))
 Excision, skin (lesion) of lip alone (see [1.YE.87.^](#))
 Excision, skin (lesion) of multiple or overlapping sites of face (with neck or scalp) (see [1.YF.87.^](#))
 Excision, skin (lesion) of multiple or overlapping sites of trunk (abdomen, back, buttock, chest, groin) (see [1.YS.87.^](#))
 Excision, skin (lesion) of neck alone (see [1.YG.87.^](#))
 Excision, skin (lesion) of nose alone (see [1.YD.87.^](#))
 Excision, skin (lesion) of scalp alone (see [1.YA.87.^](#))
 Resection, skin lesion extending into soft tissue (fascia, muscle, tendon) of abdomen and chest (see [1.SZ.87.^](#))
 Resection, skin lesion extending into soft tissue (fascia, muscle, tendon) of arm (see [1.TX.87.^](#))
 Resection, skin lesion extending into soft tissue (fascia, muscle, tendon) of foot (with or without leg involvement) (see [1.WV.87.^](#))
 Resection, skin lesion extending into soft tissue (fascia, muscle, tendon) of hand (with or without arm involvement) (see [1.UY.87.^](#))
 Resection, skin lesion extending into soft tissue (fascia, muscle, tendon) of head and neck (see [1.EQ.87.^](#))
 Resection, skin lesion extending into soft tissue (fascia, muscle, tendon) of leg (see [1.VX.87.^](#))
- Code Also:** Any intraoperative microscope assistance (see [3.YZ.94.^](#))
- Note:** Use this code when the definitive intervention is the (extensive) excision of diseased [e.g. neoplastic] skin of multiple or overlapping sites on the trunk with any limb which may or may not require a reconstructive skin graft/flap to repair the surgical defect(s).

1.YZ.87.^ Excision partial, skin NEC	open [excisional] approach	open [excisional] approach and dermatome	open [excisional] approach and laser
using apposition technique [e.g. suture, glue] for closure	1.YZ.87.LA	1.YZ.87.LA-AY	1.YZ.87.LA-AG
using free flap	1.YZ.87.LA-XX-F	1.YZ.87.LA-AY-F	1.YZ.87.LA-AG-F

using split thickness autograft	1.YZ.87.LA-XX-B	1.YZ.87.LA-AY-B	1.YZ.87.LA-AG-B

1.YZ.94.^ ^ Therapeutic intervention NEC, skin NEC

1.YZ.94.HA	using percutaneous (needle) approach
	<i>Includes:</i> Fat injection [graft] into buttocks for augmentation
1.YZ.94.JA	using external approach
1.YZ.94.LA	using open approach

Therapeutic Interventions on the Body NEC (1ZX - 1ZZ)

1.ZX.^.^ Therapeutic Interventions on Multiple Body sites

1.ZX.02.^.^ Exercise, multiple body sites

Includes:	Exercise, body NOS Hydrotherapy, body NOS
Excludes:	Exercise targeted at specific region of body (see Exercise, by site)
Code Also:	Any use of biofeedback (see 7.SP.59.^.)
Note:	Involves assisting and supervising client in performing exercise

1.ZX.02.YD	using exercise NOS
1.ZX.02.YF	using cardiovascular conditioning exercise [e.g. aerobic]
1.ZX.02.YL	using postural exercise
1.ZX.02.YN	using active range of motion exercise
1.ZX.02.YS	using relaxation exercise
1.ZX.02.ZA	using aquatic exercise
1.ZX.02.ZB	using balance training exercise
1.ZX.02.ZC	using work hardening exercise
1.ZX.02.ZD	using work conditioning exercise

1.ZX.04.^.^ Mobilization, multiple body sites

Includes:	Mobilization NOS Myofascial release, of multiple sites Traction, joints of multiple sites
Excludes:	Mobilization with concomitant manipulation NOS or of multiple regions of body (see 1.ZX.05.^.)
Note:	Involves moving, stretching or elongating soft tissue of multiple body regions.

1.ZX.04.JH	using external approach with manual technique
------------	---

1.ZX.05.^.^ Manipulation, multiple body sites

Includes:	Joint adjustment, multiple sites Mobilization with concomitant manipulation, multiple sites of body Skeletal manipulation NOS
------------------	---

1.ZX.05.JH	using external approach with manual technique
------------	---

1.ZX.06.^.^ Hypothermy, multiple body sites

Includes: Application of cold, multiple body sites
Hypothermy, body NOS
Induced hypothermia, multiple body sites
that induced for operative purposes
that to reverse hyperthermia

1.ZX.06.CA-KM	using per orifice approach and cold fluid instillation
1.ZX.06.JA-GH	using cooling blanket (with coils)
1.ZX.06.JA-KL	using cold (dry) device [e.g. cold pack, ice]
1.ZX.06.JA-KM	using cold water immersion or bath
1.ZX.06.KS-GH	using extracorporeal blood cooling device [e.g. refrigerated coils with vessel to vessel bypass]

1.ZX.07.^.^ Hyperthermy, multiple body sites

Includes: Application of heat
Extracorporeal blood warming
Hyperthermy, body NOS
Rewarming (for hypothermia)
Warming (blood), extracorporeal

1.ZX.07.CA-KJ	using per orifice warm liquid instillations [e.g. warm colonic, gastrointestinal irrigation]
1.ZX.07.HA-KJ	using percutaneous warm liquid instillations [e.g. warm peritoneal instillation]
1.ZX.07.JA-HB	using transcutaneous diathermy
1.ZX.07.JA-KJ	using hot/warm bath
1.ZX.07.JA-KK	using heating device [e.g. electric blanket, warm packs]
1.ZX.07.JA-TQ	using tank [e.g. Hubbard]
1.ZX.07.JA-TR	using whirlpool
1.ZX.07.JA-V0	using (heated/humidified) air [e.g. sauna]
1.ZX.07.KS-KK	using extracorporeal blood warming device
Code Also: any creation of shunt (see 1.KG.76.^.^)	

1.ZX.10.^.^ Acupuncture, multiple body sites

Note: Involves the insertion of needles into specific exterior body locations to relieve pain, induce anesthesia for physical (and psychological) therapeutic purposes

1.ZX.10.HA	using percutaneous (needle) approach
------------	--------------------------------------

1.ZX.12.^.^ Therapy, multiple body sites

Includes: Physiotherapy NOS, multiple sites
Therapy, body NOS

Excludes: Hydrotherapy NOS (see [1.ZX.02.^](#))
 Pool therapy (see [1.ZX.02.^](#))
 that solely for exercise (see [1.ZX.02.^](#))
 that solely for hyperthermy (see [1.ZX.07.^](#))
 that solely for hypothermy (see [1.ZX.06.^](#))

1.ZX.12.JA	using other technique NEC
1.ZX.12.JA-AG	using laser NEC (with or without photosensitizing chemicals)
1.ZX.12.JA-TG	using bath, shower or soak [e.g. contrast bath]
1.ZX.12.JA-TW	using vibrating device
1.ZX.12.JD	using acupressure technique
	Includes: Reflexology, body
1.ZX.12.JJ	using massage technique
	Includes: Body massage
1.ZX.12.JP	using therapeutic touch technique

1.ZZ.^.^ Therapeutic Interventions on the Total Body

Includes: Whole body NOS

1.ZZ.03.^ Immobilization, total body

Includes: Activity restriction, total body
 Application of external immobilization device, total body
 Bed rest [total, partial], total body
 Energy conservation therapy
 Immobilization with traction, total body
 Replacement of external immobilization device, total body

Excludes: that for specific site or region (see Immobilization , by site)

1.ZZ.03.JA-FQ	using cast [total body cast]
1.ZZ.03.JA-SR	using external splinting device [emergency stabilization]
1.ZZ.03.JZ-FQ	using cast [total body cast] and traction
1.ZZ.03.JZ-TD	using Stryker or Foster frame
1.ZZ.03.YT	using partial activity restriction [e.g. bed rest with privileges]
1.ZZ.03.YW	using total activity restriction [e.g. complete bed rest]

1.ZZ.11.^ ^ Anesthetization, total body

Includes: General anesthesia
Excludes: Local anesthetization (see Anesthetization, by site)
 Spinal anesthetization (see [1.AX.11.^ ^](#))

1.ZZ.11.AL-P1	using combined approach [per orifice and percutaneous needle] and general anesthetic agent
1.ZZ.11.CA-P1	using per orifice approach [oral or inhalation] and general anesthetic agent
1.ZZ.11.HA-P1	using percutaneous (needle) approach and general anesthetic agent

1.ZZ.15.^ ^ Natural remedy, total body

Includes: Ayurvedic formulation
 Bach flower remedy
 Botanical remedy
 Herbal medicine (Chinese, Tibetan)
 Naturopathy NEC
Excludes: Natural remedy used for cervical ripening (see [5.AC.24.^ ^](#))
 Vitamin therapy (see [1.ZZ.35.^ ^.B4](#))
Code Also: Any concomitant nutritional assessment (see [2.ZZ.02.^ ^](#))
 Any concomitant nutritional counseling (see [7.SP.10.^ ^](#))

1.ZZ.15.CA-Z9	using per orifice approach and naturally occurring agent(s)
---------------	---

1.ZZ.32.^ ^ Oxygenation, total body

Includes: Hyperbaric oxygenation [therapy]
 that using external pressurized oxygen chamber
Code Also: any simultaneous administration of intra nasal/tracheal oxygen (see [1.GZ.32.^ ^](#))

1.ZZ.32.JA-MS	using monoplace chamber
1.ZZ.32.JA-MT	using multiplace chamber

1.ZZ.33.^ ^ Decompression, total body

Includes: Decompression (in chamber), total body
 that for treatment of decompression sickness or air embolism
Excludes: Surgical decompression to relieve pressure from a body compartment (see Decompression, by specific anatomy site)

1.ZZ.33.JA-FZ	using decompression chamber
---------------	-----------------------------

1.ZZ.35.^.^ Pharmacotherapy, total body**S** 70

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 70	Optional	Chemotherapy Status 2	Status	I N	Primary initial induction (to achieve remission)
				I O	Other induction (following relapse, to achieve remission)
				I P	Consolidation (to control/maintain remission)
				R I	Repeat initial induction (to achieve remission when previous initial induction failed to achieve remission)

- Includes:** Administration, pharmacological agent (using oral, percutaneous intramuscular, intravenous, subcutaneous, and intradermal injection, and other route: rectal, vaginal, inhalation, transdermal) for systemic effect
Chemotherapy, systemic
Detoxification, using systemic pharmacotherapy
Inhalation therapy
Management, pain (systemic)
Therapy, drug (intravenous)
Therapy, pharmacological (systemic)
- Excludes:** Administration of agent for fluid/electrolyte management (see [1.LZ.35.^.](#))
Administration of anesthetic (local) (see Anesthetization by site)
Administration of pharmacological agent for local effect (see Instillation [injection, inhalation, application] by site)
Administration of vaccine (see Immunization)
Anesthetization, spinal (see [1.AX.11.^.](#))
Dialysis, renal (see [1.PZ.21.^.](#))
General anesthetization (see [1.ZZ.11.^.](#))
- Code Also:** Any immunotherapy for allergy desensitization (see Homeopathy)
Any insertion of central venous catheter [CVC] (see [1.IS.53.^.](#))
Monoclonal antibody (mAb) immunotherapy (preventing growth of neoplasm) (see [8.NZ.70.^.](#))
- Note:** The systemic pharmaceutical agents (and the route of administration) used may be selected from the table of generic agents found under code 1.ZZ.35.^.^ -Pharmacotherapy, general [total] body. Local acting or topical pharmacotherapy will be found at the appropriate anatomy site. A complete table of all systemic and local agents used in CCI may also be found in Appendix D with some common examples of each. Pharmaceutical agents are grouped according to the organ or body system on which they act and their chemical, pharmacological and therapeutic properties. The structure is based on a modification of the Anatomical Therapeutic Chemical [ATC] classification maintained by the World Health Organization. WHO Collaborating Centre for Drug Statistics Methodology, Oslo, Norway, 2000. When the administration of agents are for medical assistance in dying (MAID), code all pharmacological agents that apply.

1.ZZ.35.^.^ Pharmacotherapy, total body	per orifice (oral) approach	percutaneous approach [intramuscular, intravenous, subcutaneous, intradermal]	route NEC [transdermal, etc.]
alimentary tract and metabolism agents			
using drug for treatment of peptic ulcer and flatulence	1.ZZ.35.CA-A2 Includes: • ranitidine, misoprostol, omeprazole, simethicone, antacids, sucralfate	1.ZZ.35.HA-A2 Includes: • antacids, ranitidine, misoprostol, omeprazole, simethicone, sucralfate	1.ZZ.35.YA-A2 Includes: • antacids, ranitidine, misoprostol, omeprazole, simethicone, sucralfate
using antispasmodic, anticholinergic, propulsive agent	1.ZZ.35.CA-A3 Includes: • propantheline, atropine, belladonna alkaloids, metoclopramide, cisapride, domperidone	1.ZZ.35.HA-A3 Includes: • propantheline, atropine, belladonna alkaloids, metoclopramide, cisapride, domperidone	1.ZZ.35.YA-A3 Includes: • propantheline, atropine, belladonna alkaloids, metoclopramide, cisapride, domperidone
using antiemetic and antinauseant agent	1.ZZ.35.CA-A4 Includes: • ondansetron, scopolamine, dimenhydrinate	1.ZZ.35.HA-A4 Includes: • ondansetron, scopolamine, dimenhydrinate	1.ZZ.35.YA-A4 Includes: • ondansetron, scopolamine, dimenhydrinate
using bile and liver therapy agent	1.ZZ.35.CA-A5 Includes: • ursodiol	1.ZZ.35.HA-A5 Includes: • ursodiol	1.ZZ.35.YA-A5 Includes: • ursodiol
using antidiarrheal, intestinal antiinflammatory /antiinfective agent	1.ZZ.35.CA-A7 Includes: • neomycin, loperamide, mesalamine, charcoal, bismuth, subsalicylate, attapulgite	1.ZZ.35.HA-A7 Includes: • neomycin, loperamide, mesalamine, charcoal, bismuth, subsalicylate, attapulgite	1.ZZ.35.YA-A7 Includes: • neomycin, loperamide, mesalamine, charcoal, bismuth, subsalicylate, attapulgite
using antiobesity preparations [non dietary]	1.ZZ.35.CA-A8 Includes: • phentermine, diethylpropion	1.ZZ.35.HA-A8 Includes: • phentermine, diethylpropion	1.ZZ.35.YA-A8 Includes: • phentermine, diethylpropion
using digestive (including enzymes)	1.ZZ.35.CA-A9 Includes: • pepsin, lactase	1.ZZ.35.HA-A9 Includes: • pepsin, lactase	1.ZZ.35.YA-A9 Includes: • pepsin, lactase
using drug for diabetes treatment	1.ZZ.35.CA-B1 Includes: • insulins, metformin, chlorpropamide, tolbutamide, glyburide, gliclazide	1.ZZ.35.HA-B1 Includes: • insulins, metformin, chlorpropamide, tolbutamide, glyburide, gliclazide	1.ZZ.35.YA-B1 Includes: • insulins, metformin, chlorpropamide, tolbutamide, glyburide, gliclazide
using vitamin	1.ZZ.35.CA-B2 Includes: • single vitamins, multivitamins, vitamins with minerals	1.ZZ.35.HA-B2 Includes: • single vitamins, multivitamins, vitamins with minerals	1.ZZ.35.YA-B2 Includes: • single vitamins, multivitamins, vitamins with minerals
using mineral supplement	1.ZZ.35.CA-B3 Includes: • calcium, potassium, magnesium, zinc, sodium	1.ZZ.35.HA-B3 Includes: • calcium, potassium, magnesium, zinc, sodium	1.ZZ.35.YA-B3 Includes: • calcium, potassium, magnesium, zinc, sodium
using tonic	1.ZZ.35.CA-B4	1.ZZ.35.HA-B4	1.ZZ.35.YA-B4
using anabolic agent	1.ZZ.35.CA-B5 Includes: • nandrolone	1.ZZ.35.HA-B5 Includes: • nandrolone	1.ZZ.35.YA-B5 Includes: • nandrolone
using appetite stimulant	1.ZZ.35.CA-B6	1.ZZ.35.HA-B6	1.ZZ.35.YA-B6
using other alimentary tract and metabolism agent	1.ZZ.35.CA-B7 Includes: • amino acids and derivatives, anetholtrithion	1.ZZ.35.HA-B7 Includes: • amino acids and derivatives, anetholtrithion	1.ZZ.35.YA-B7 Includes: • amino acids and derivatives, anetholtrithion
blood and blood forming organ agents			

1.ZZ.35.^.^ Pharmacotherapy, total body	per orifice (oral) approach	percutaneous approach [intramuscular, intravenous, subcutaneous, intradermal]	route NEC [transdermal, etc.]
using antithrombotic agent	1.ZZ.35.CA-C1 Includes: • warfarin, heparin, enoxaparin, dipyridamole	1.ZZ.35.HA-C1 Includes: • warfarin, heparin, enoxaparin, dipyridamole, glycoprotein IIb/IIIa receptor inhibitors (GPI) (e.g. ReoPro [abciximab], Aggrastat, Integrilin [eptifibatide])	1.ZZ.35.YA-C1 Includes: • warfarin, heparin, enoxaparin, dipyridamole, glycoprotein IIb/IIIa receptor inhibitors (GPI) (e.g. ReoPro [abciximab], Aggrastat, Integrilin [eptifibatide])
using thrombolytic agent	—	1.ZZ.35.HA-1C Includes: • anistreplase, alteplase, reteplase, streptokinase, tenecteplase, TNKase (TNK), tissue plasminogen activator (tPA), urokinase	1.ZZ.35.YA-1C Includes: • anistreplase, alteplase, reteplase, streptokinase, tenecteplase, TNKase (TNK), tissue plasminogen activator (tPA), urokinase
using antihemorrhagic agent	1.ZZ.35.CA-C2 Includes: • aminocaproic acid, aprotinin, phytonadione, thrombin, coagulation factors	1.ZZ.35.HA-C2 Includes: • aminocaproic acid, aprotinin, phytonadione, thrombin, coagulation factors I	1.ZZ.35.YA-C2 Includes: • aminocaproic acid, aprotinin, phytonadione, thrombin, coagulation factors
using antianemic agent	1.ZZ.35.CA-C3 Includes: • iron, cyanocobalamin, folic acid, erythropoietin	1.ZZ.35.HA-C3 Includes: • iron, cyanocobalamin, folic acid, erythropoietin	1.ZZ.35.YA-C3 Includes: • iron, cyanocobalamin, folic acid, erythropoietin
using intravenous solution additive	1.ZZ.35.CA-D5 Includes: • potassium salts, sodium salts, calcium preparations, trace elements as IV solution additives	1.ZZ.35.HA-D5 Includes: • potassium salts, sodium salts, calcium preparations, trace elements as IV solution additives	1.ZZ.35.YA-D5 Includes: • potassium salts, sodium salts, calcium preparations, trace elements as IV solution additives
using other hematological agent	1.ZZ.35.CA-D7 Includes: • hyaluronidase	1.ZZ.35.HA-D7 Includes: • hyaluronidase	1.ZZ.35.YA-D7 Includes: • hyaluronidase
cardiovascular system agents			
using cardiac glycoside	1.ZZ.35.CA-E1 Includes: • digoxin	1.ZZ.35.HA-E1 Includes: • digoxin	1.ZZ.35.YA-E1 Includes: • digoxin
using antiarrhythmic, class I and III	1.ZZ.35.CA-E2 Includes: • quinidine, procainamide, lidocaine, propafenone, amiodarone	1.ZZ.35.HA-E2 Includes: • quinidine, procainamide, lidocaine, propafenone, amiodarone	1.ZZ.35.YA-E2 Includes: • quinidine, procainamide, lidocaine, propafenone, amiodarone
using cardiac stimulant (excluding cardiac glycoside)	1.ZZ.35.CA-E3 Includes: • isoproterenol, dopamine, dobutamine, epinephrine (adrenalin), amrinone	1.ZZ.35.HA-E3 Includes: • isoproterenol, dopamine, dobutamine, epinephrine (adrenalin), amrinone	1.ZZ.35.YA-E3 Includes: • isoproterenol, dopamine, dobutamine, epinephrine (adrenalin), amrinone
using vasodilator	1.ZZ.35.CA-E4 Includes: • nitroglycerin, isosorbide dinitrate	1.ZZ.35.HA-E4 Includes: • nitroglycerin, isosorbide dinitrate	1.ZZ.35.YA-E4 Includes: • nitroglycerin, isosorbide dinitrate
using other cardiac preparation	1.ZZ.35.CA-E5 Includes: • alprostadil, indomethacin, adenosine, for cardiac use	1.ZZ.35.HA-E5 Includes: • alprostadil, indomethacin, adenosine, for cardiac use	1.ZZ.35.YA-E5 Includes: • alprostadil, indomethacin, adenosine, for cardiac use

1.ZZ.35.^.^ Pharmacotherapy, total body	per orifice (oral) approach	percutaneous approach [intramuscular, intravenous, subcutaneous, intradermal]	route NEC [transdermal, etc.]
using antihypertensive	1.ZZ.35.CA-E6 Includes: • methyl dopa, prazosin, hydralazine, reserpine, nitroprusside, plain and in combination with diuretics	1.ZZ.35.HA-E6 Includes: • methyl dopa, prazosin, hydralazine, reserpine, nitroprusside, plain and in combination with diuretics	1.ZZ.35.YA-E6 Includes: • methyl dopa, prazosin, hydralazine, reserpine, nitroprusside, plain and in combination with diuretics
using diuretic	1.ZZ.35.CA-E7 Includes: • thiazides, metolazone, furosemide, spironolactone, triamterene	1.ZZ.35.HA-E7 Includes: • thiazides, metolazone, furosemide, spironolactone, triamterene	1.ZZ.35.YA-E7 Includes: • thiazides, metolazone, furosemide, spironolactone, triamterene
using peripheral vasodilator	1.ZZ.35.CA-E8 Includes: • pentoxifylline, ergoloid mesylates, phentolamine	1.ZZ.35.HA-E8 Includes: • pentoxifylline, ergoloid mesylates, phentolamine	1.ZZ.35.YA-E8 Includes: • pentoxifylline, ergoloid mesylates, phentolamine
using vasoprotective	1.ZZ.35.CA-E9 Includes: • topical antihemorrhoidals, sodium tetradecyl sulfate	1.ZZ.35.HA-E9 Includes: • topical antihemorrhoidals, sodium tetradecyl sulfate	1.ZZ.35.YA-E9 Includes: • topical antihemorrhoidals, sodium tetradecyl sulfate
using beta blocking agent	1.ZZ.35.CA-F1 Includes: • propranolol, metoprolol, atenolol, plain or in combination with other agents	1.ZZ.35.HA-F1 Includes: • propranolol, metoprolol, atenolol, plain or in combination with other agents	1.ZZ.35.YA-F1 Includes: • propranolol, metoprolol, atenolol, plain or in combination with other agents
using calcium channel blocker	1.ZZ.35.CA-F2 Includes: • nifedipine, verapamil, diltiazem, plain or in combination with other agents	1.ZZ.35.HA-F2 Includes: • nifedipine, verapamil, diltiazem, plain or in combination with other agents	1.ZZ.35.YA-F2 Includes: • nifedipine, verapamil, diltiazem, plain or in combination with other agents
using agent acting upon reninangiotensin system	1.ZZ.35.CA-F3 Includes: • captopril, enalapril, lisinopril, losartan, plain or in combination with other agents	1.ZZ.35.HA-F3 Includes: • captopril, enalapril, lisinopril, losartan, plain or in combination with other agents	1.ZZ.35.YA-F3 Includes: • captopril, enalapril, lisinopril, losartan, plain or in combination with other agents
using serum lipid reducing agent	1.ZZ.35.CA-F4 Includes: • lovastatin, gemfibrozil, nicotinic acid, cholestyramine	1.ZZ.35.HA-F4 Includes: • lovastatin, gemfibrozil, nicotinic acid, cholestyramine	1.ZZ.35.YA-F4 Includes: • lovastatin, gemfibrozil, nicotinic acid, cholestyramine
dermatological agents			
using antifungal	1.ZZ.35.CA-G1 Includes: • nystatin, clotrimazole, miconazole, tolnaftate, for topical use; griseofulvin for systemic use	1.ZZ.35.HA-G1 Includes: • nystatin, clotrimazole, miconazole, tolnaftate, for topical use; griseofulvin for systemic use	1.ZZ.35.YA-G1 Includes: • nystatin, clotrimazole, miconazole, tolnaftate, for topical use; griseofulvin for systemic use
using antipsoriatic agent [systemic]	1.ZZ.35.CA-G5 Includes: • coal tar preparations, anthralin, methoxsalen, for topical use; methoxsalen, etretinate for systemic use	1.ZZ.35.HA-G5 Includes: • coal tar preparations, anthralin, methoxsalen, for topical use; methoxsalen, etretinate for systemic use	1.ZZ.35.YA-G5 Includes: • coal tar preparations, anthralin, methoxsalen, for topical use; methoxsalen, etretinate for systemic use
using antiacne preparation [systemic]	1.ZZ.35.CA-H2 Includes: • sulfur, tretinoin, benzoyl peroxide, clindamycin, for topical use; isotretinoin for systemic use	1.ZZ.35.HA-H2 Includes: • sulfur, tretinoin, benzoyl peroxide, clindamycin, for topical use; isotretinoin for systemic use	1.ZZ.35.YA-H2 Includes: • sulfur, tretinoin, benzoyl peroxide, clindamycin, for topical use; isotretinoin for systemic use

1.ZZ.35.^ ^ Pharmacotherapy, total body	per orifice (oral) approach	percutaneous approach [intramuscular, intravenous, subcutaneous, intradermal]	route NEC [transdermal, etc.]
genitourinary system agents and sex hormones			
using uterotonic agent	1.ZZ.35.CA-I2 Includes: • ergometrine, dinoprostone, oxytocin	1.ZZ.35.HA-I2 Includes: • ergometrine, dinoprostone, oxytocin	1.ZZ.35.YA-I2 Includes: • ergometrine, dinoprostone, oxytocin
using other gynecological agent	1.ZZ.35.CA-I4 Includes: • ritodrine, bromocriptine	1.ZZ.35.HA-I4 Includes: • ritodrine, bromocriptine	1.ZZ.35.YA-I4 Includes: • ritodrine, bromocriptine
using sex hormone and modulator of genital system	1.ZZ.35.CA-I5 Includes: • progestogens, estrogens, androgens, plain or in combination; clomiphene, danazol	1.ZZ.35.HA-I5 Includes: • progestogens, estrogens, androgens, plain or in combination; clomiphene, danazol	1.ZZ.35.YA-I5 Includes: • progestogens, estrogens, androgens, plain or in combination; clomiphene, danazol
using urological agent	1.ZZ.35.CA-I6 Includes: • methenamine, nalidixic acid, nitrofurantoin, oxybutinin, finasteride	1.ZZ.35.HA-I6 Includes: • methenamine, nalidixic acid, nitrofurantoin, oxybutinin, finasteride	1.ZZ.35.YA-I6 Includes: • methenamine, nalidixic acid, nitrofurantoin, oxybutinin, finasteride
hormonal agents, excluding sex hormones			
using pituitary, hypothalamic hormone and analogue	1.ZZ.35.CA-J1 Includes: • vasopressin, desmopressin, gonadorelin, octreotide, oxytocin	1.ZZ.35.HA-J1 Includes: • vasopressin, desmopressin, gonadorelin, octreotide, oxytocin	1.ZZ.35.YA-J1 Includes: • vasopressin, desmopressin, gonadorelin, octreotide, oxytocin
using corticosteroid agent [systemic]	1.ZZ.35.CA-J2 Includes: • prednisone, dexamethasone, fludrocortisone, for systemic use	1.ZZ.35.HA-J2 Includes: • prednisone, dexamethasone, fludrocortisone, for systemic use	1.ZZ.35.YA-J2 Includes: • prednisone, dexamethasone, fludrocortisone, for systemic use
using thyroid therapy	1.ZZ.35.CA-J3 Includes: • levothyroxine, potassium iodide, propylthiouracil	1.ZZ.35.HA-J3 Includes: • levothyroxine, potassium iodide, propylthiouracil	1.ZZ.35.YA-J3 Includes: • levothyroxine, potassium iodide, propylthiouracil
using pancreatic hormone agent	1.ZZ.35.CA-J4 Includes: • glucagon	1.ZZ.35.HA-J4 Includes: • glucagon	1.ZZ.35.YA-J4 Includes: • glucagon
using calcium homeostasis agent	1.ZZ.35.CA-J5 Includes: • parathyroid hormones, calcitonin	1.ZZ.35.HA-J5 Includes: • parathyroid hormones, calcitonin	1.ZZ.35.YA-J5 Includes: • parathyroid hormones, calcitonin
general antiinfective agents			
using antiinfective NOS	1.ZZ.35.CA-K0	1.ZZ.35.HA-K0	1.ZZ.35.YA-K0
using tetracycline	1.ZZ.35.CA-K1 Includes: • tetracycline, minocycline, doxycycline	1.ZZ.35.HA-K1 Includes: • tetracycline, minocycline, doxycycline	1.ZZ.35.YA-K1 Includes: • tetracycline, minocycline, doxycycline
using amphenicol	1.ZZ.35.CA-K2 Includes: • chloramphenicol	1.ZZ.35.HA-K2 Includes: • chloramphenicol	1.ZZ.35.YA-K2 Includes: • chloramphenicol
using penicillin, betalactam, antibacterial	1.ZZ.35.CA-K3 Includes: • penicillin, amoxicillin, ticarcillin, ampicillin, cloxacillin, piperacillin, tazobactam	1.ZZ.35.HA-K3 Includes: • penicillin, amoxicillin, ticarcillin, ampicillin, cloxacillin, piperacillin, tazobactam	1.ZZ.35.YA-K3 Includes: • penicillin, amoxicillin, ticarcillin, ampicillin, cloxacillin, piperacillin, tazobactam

1.ZZ.35.^ ^ Pharmacotherapy, total body	per orifice (oral) approach	percutaneous approach [intramuscular, intravenous, subcutaneous, intradermal]	route NEC [transdermal, etc.]
using cephalosporin and related substance	1.ZZ.35.CA-K4 Includes: • cephalexin, cefotaxime, cefuroxime, cefepime	1.ZZ.35.HA-K4 Includes: • cephalexin, cefotaxime, cefuroxime, cefepime	1.ZZ.35.YA-K4 Includes: • cephalexin, cefotaxime, cefuroxime, cefepime
using monobactam, carbapenem	1.ZZ.35.CA-K5 Includes: • aztreonam, imipenem and enzyme inhibitor, meropenem	1.ZZ.35.HA-K5 Includes: • aztreonam, imipenem and enzyme inhibitor, meropenem	1.ZZ.35.YA-K5 Includes: • aztreonam, imipenem and enzyme inhibitor, meropenem
using sulfonamide and trimethoprim	1.ZZ.35.CA-K6 Includes: • trimethoprim, sulfamethoxazole, sulfadiazine, cotrimoxazole	1.ZZ.35.HA-K6 Includes: • trimethoprim, sulfamethoxazole, sulfadiazine, cotrimoxazole	1.ZZ.35.YA-K6 Includes: • trimethoprim, sulfamethoxazole, sulfadiazine, cotrimoxazole
using macrolide and lincosamide	1.ZZ.35.CA-K7 Includes: • erythromycin, clarithromycin, clindamycin	1.ZZ.35.HA-K7 Includes: • erythromycin, clarithromycin, clindamycin	1.ZZ.35.YA-K7 Includes: • erythromycin, clarithromycin, clindamycin
using aminoglycoside antibacterial	1.ZZ.35.CA-K8 Includes: • streptomycin, gentamicin, tobramycin, amikacin	1.ZZ.35.HA-K8 Includes: • streptomycin, gentamicin, tobramycin, amikacin	1.ZZ.35.YA-K8 Includes: • streptomycin, gentamicin, tobramycin, amikacin
using quinolone antibacterial	1.ZZ.35.CA-K9 Includes: • norfloxacin, ciprofloxacin	1.ZZ.35.HA-K9 Includes: • norfloxacin, ciprofloxacin	1.ZZ.35.YA-K9 Includes: • norfloxacin, ciprofloxacin
using other antibacterial	1.ZZ.35.CA-L1 Includes: • vancomycin, polymyxin B, metronidazole	1.ZZ.35.HA-L1 Includes: • vancomycin, polymyxin B, metronidazole	1.ZZ.35.YA-L1 Includes: • vancomycin, polymyxin B, metronidazole
using antimycotic [systemic]	1.ZZ.35.CA-L2 Includes: • amphotericin, ketoconazole, fluconazole, flucytosine	1.ZZ.35.HA-L2 Includes: • amphotericin, ketoconazole, fluconazole, flucytosine	1.ZZ.35.YA-L2 Includes: • amphotericin, ketoconazole, fluconazole, flucytosine
using antimycobacterial	1.ZZ.35.CA-L3 Includes: • rifampin, isoniazid, ethambutol, rifabutin, clofazimine	1.ZZ.35.HA-L3 Includes: • rifampin, isoniazid, ethambutol, rifabutin, clofazimine	1.ZZ.35.YA-L3 Includes: • rifampin, isoniazid, ethambutol, rifabutin, clofazimine
using antiviral [systemic]	1.ZZ.35.CA-L4 Includes: • acyclovir, zidovudine, zalcitabine, foscarnet, ritonavir	1.ZZ.35.HA-L4 Includes: • acyclovir, zidovudine, zalcitabine, foscarnet, ritonavir	1.ZZ.35.YA-L4 Includes: • acyclovir, zidovudine, zalcitabine, foscarnet, ritonavir
antineoplastic and immunomodulating agents			
using antineoplastic agent NOS	1.ZZ.35.CA-M0	1.ZZ.35.HA-M0	1.ZZ.35.YA-M0
using alkylating agent	1.ZZ.35.CA-M1 Includes: • cyclophosphamide, melphalan, ifosfamide, busulfan, carmustine	1.ZZ.35.HA-M1 Includes: • cyclophosphamide, melphalan, ifosfamide, busulfan, carmustine	1.ZZ.35.YA-M1 Includes: • cyclophosphamide, melphalan, ifosfamide, busulfan, carmustine
using antimetabolite	1.ZZ.35.CA-M2 Includes: • methotrexate, cytarabine, fluorouracil, cladribine	1.ZZ.35.HA-M2 Includes: • methotrexate, cytarabine, fluorouracil, cladribine	1.ZZ.35.YA-M2 Includes: • methotrexate, cytarabine, fluorouracil, cladribine

1.ZZ.35.^ ^ Pharmacotherapy, total body	per orifice (oral) approach	percutaneous approach [intramuscular, intravenous, subcutaneous, intradermal]	route NEC [transdermal, etc.]
using plant alkaloid and other natural product	1.ZZ.35.CA-M3 Includes: • vinblastine, vincristine, etoposide, paclitaxel, docetaxel	1.ZZ.35.HA-M3 Includes: • vinblastine, vincristine, etoposide, paclitaxel, docetaxel	1.ZZ.35.YA-M3 Includes: • vinblastine, vincristine, etoposide, paclitaxel, docetaxel
using cytotoxic antibiotic and related substance	1.ZZ.35.CA-M4 Includes: • doxorubicin, epirubicin, bleomycin, mitoxantrone, mitomycin	1.ZZ.35.HA-M4 Includes: • doxorubicin, epirubicin, bleomycin, mitoxantrone, mitomycin	1.ZZ.35.YA-M4 Includes: • doxorubicin, epirubicin, bleomycin, mitoxantrone, mitomycin
using other antineoplastic	1.ZZ.35.CA-M5 Includes: • alemtuzumab (Campath), asparaginase, carboplatin, cetuximab, cisplatin, estramustine, ipilimumab, procarbazine, rituximab, trastuzumab Excludes: • Combination of chemotherapy agents (e.g. CHOP, MVAC regimens) (see 1.ZZ.35.CA-M9) Code Also: • Monoclonal antibody [mAb] immunotherapy to stimulate T cell response and prevent neoplastic growth (see 8.NZ.70.^ ^)	1.ZZ.35.HA-M5 Includes: • alemtuzumab (Campath), asparaginase, carboplatin, cetuximab, cisplatin, estramustine, ipilimumab, procarbazine, rituximab, trastuzumab Excludes: • Combination of chemotherapy agents (e.g. CHOP, MVAC regimens) (see 1.ZZ.35.HA-M9) Code Also: • Monoclonal antibody [mAb] immunotherapy to stimulate T cell response and prevent neoplastic growth (see 8.NZ.70.^ ^)	1.ZZ.35.YA-M5 Includes: • alemtuzumab (Campath), asparaginase, carboplatin, cetuximab, cisplatin, estramustine, ipilimumab, procarbazine, rituximab, trastuzumab Excludes: • Combination of chemotherapy agents (e.g. CHOP, MVAC regimens) (see 1.ZZ.35.YA-M9) Code Also: • Monoclonal antibody [mAb] immunotherapy to stimulate T cell response and prevent neoplastic growth (see 8.NZ.70.^ ^)
using endocrine therapy	1.ZZ.35.CA-M6 Includes: • diethylstilbestrol, megestrol, goserelin, tamoxifen, aminoglutethimide, arimidex	1.ZZ.35.HA-M6 Includes: • diethylstilbestrol, megestrol, goserelin, tamoxifen, aminoglutethimide	1.ZZ.35.YA-M6 Includes: • diethylstilbestrol, megestrol, goserelin, tamoxifen, aminoglutethimide
using immunostimulant	1.ZZ.35.CA-M7 Includes: • interferon alpha, filgrastim, interferon beta 1B, BCG, aldesleukin	1.ZZ.35.HA-M7 Includes: • interferon alpha, filgrastim, interferon beta 1B, BCG, aldesleukin	1.ZZ.35.YA-M7 Includes: • interferon alpha, filgrastim, interferon beta 1B, BCG, aldesleukin
using immunosuppressive agent	1.ZZ.35.CA-M8 Includes: • cyclosporine, muromonab CD3, azathioprine, tacrolimus, Remicade, infliximab	1.ZZ.35.HA-M8 Includes: • cyclosporine, muromonab CD3, azathioprine, tacrolimus, Remicade, infliximab	1.ZZ.35.YA-M8 Includes: • cyclosporine, muromonab CD3, azathioprine, tacrolimus, Remicade, infliximab
using combination [multiple] antineoplastic agents	1.ZZ.35.CA-M9 Includes: • CHOP (cyclophosphamide, doxorubicin, vincristine, prednisone) regimen • MVAC (methotrexate, vinblastine, doxorubicin, cisplatin) regimen Code Also: • Any monoclonal antibody immunotherapy to stimulate T cell response and prevent neoplastic growth (see 8.NZ.70.^ ^)	1.ZZ.35.HA-M9 Includes: • CHOP (cyclophosphamide, doxorubicin, vincristine, prednisone) regimen • MVAC (methotrexate, vinblastine, doxorubicin, cisplatin) regimen Code Also: • Any monoclonal antibody immunotherapy to stimulate T cell response and prevent neoplastic growth (see 8.NZ.70.^ ^)	1.ZZ.35.YA-M9 Includes: • CHOP (cyclophosphamide, doxorubicin, vincristine, prednisone) regimen • MVAC (methotrexate, vinblastine, doxorubicin, cisplatin) regimen Code Also: • Any monoclonal antibody immunotherapy to stimulate T cell response and prevent neoplastic growth (see 8.NZ.70.^ ^)
musculoskeletal system agents			
using antiinflammatory and antirheumatic agent	1.ZZ.35.CA-N1 Includes: • NSAIDS (indomethacin, ibuprofen, aurothioglucose, D penicillamine, diclofenac)	1.ZZ.35.HA-N1 Includes: • NSAIDS (indomethacin, ibuprofen, aurothioglucose, D penicillamine, diclofenac)	1.ZZ.35.YA-N1 Includes: • NSAIDS (indomethacin, ibuprofen, aurothioglucose, D penicillamine, diclofenac)

1.ZZ.35.^.^ Pharmacotherapy, total body	per orifice (oral) approach	percutaneous approach [intramuscular, intravenous, subcutaneous, intradermal]	route NEC [transdermal, etc.]
using muscle relaxant	1.ZZ.35.CA-N3 Includes: • pancuronium, rocuronium, methocarbamol, orphenadrine, baclofen, dantrolene	1.ZZ.35.HA-N3 Includes: • pancuronium, rocuronium, methocarbamol, orphenadrine, baclofen, dantrolene	1.ZZ.35.YA-N3 Includes: • pancuronium, rocuronium, methocarbamol, orphenadrine, baclofen, dantrolene
using antigout preparation	1.ZZ.35.CA-N4 Includes: • allopurinol, probenecid, colchicine	1.ZZ.35.HA-N4 Includes: • allopurinol, probenecid, colchicine	1.ZZ.35.YA-N4 Includes: • allopurinol, probenecid, colchicine
using drug for treatment of bone disease	1.ZZ.35.CA-N5 Includes: • pamidronate, etidronate, clodronate	1.ZZ.35.HA-N5 Includes: • pamidronate, etidronate, clodronate	1.ZZ.35.YA-N5 Includes: • pamidronate, etidronate, clodronate
using other drug for disorders of MSK system	1.ZZ.35.CA-N6 Includes: • chymopapain	1.ZZ.35.HA-N6 Includes: • chymopapain	1.ZZ.35.YA-N6 Includes: • chymopapain
nervous system agents			
using analgesic	1.ZZ.35.CA-P2 Includes: • opioids (morphine, meperidine), acetylsalicylic acid, acetaminophen, ergotamine, sumatriptan	1.ZZ.35.HA-P2 Includes: • opioids (morphine, meperidine), acetylsalicylic acid, acetaminophen, ergotamine, sumatriptan	1.ZZ.35.YA-P2 Includes: • opioids (morphine, meperidine), acetylsalicylic acid, acetaminophen, ergotamine, sumatriptan
using anesthetic agent	—	1.ZZ.35.HA-P1 Includes: • Administration of systemic lidocaine for control of neuropathic pain Excludes: • that for operative anesthesia (see 1.ZZ.11.^.)	—
using antiepileptic	1.ZZ.35.CA-P3 Includes: • phenobarbital, phenytoin, valproic acid, lamotrigine, gabapentin, carbamazepine	1.ZZ.35.HA-P3 Includes: • phenobarbital, phenytoin, valproic acid, lamotrigine, gabapentin, carbamazepine	1.ZZ.35.YA-P3 Includes: • phenobarbital, phenytoin, valproic acid, lamotrigine, gabapentin, carbamazepine
using antiParkinson agent	1.ZZ.35.CA-P4 Includes: • trihexyphenidyl, levodopa, amantadine, bromocriptine, selegiline	1.ZZ.35.HA-P4 Includes: • trihexyphenidyl, levodopa, amantadine, bromocriptine, selegiline	1.ZZ.35.YA-P4 Includes: • trihexyphenidyl, levodopa, amantadine, bromocriptine, selegiline
using antipsychotic	1.ZZ.35.CA-P5 Includes: • chlorpromazine, thioridazine, haloperidol, loxapine, risperidone	1.ZZ.35.HA-P5 Includes: • chlorpromazine, thioridazine, haloperidol, loxapine, risperidone	1.ZZ.35.YA-P5 Includes: • chlorpromazine, thioridazine, haloperidol, loxapine, risperidone
using anxiolytic	1.ZZ.35.CA-P6 Includes: • benzodiazepines (diazepam, lorazepam), meprobamate, buspirone	1.ZZ.35.HA-P6 Includes: • benzodiazepines (diazepam, lorazepam), meprobamate, buspirone	1.ZZ.35.YA-P6 Includes: • benzodiazepines (diazepam, lorazepam), meprobamate, buspirone
using hypnotic and sedative agent	1.ZZ.35.CA-P7 Includes: • barbiturates (secobarbital, pentobarbital), chloral hydrate, benzodiazepines (flurazepam, midazolam) zopiclone	1.ZZ.35.HA-P7 Includes: • barbiturates (secobarbital, pentobarbital), chloral hydrate, benzodiazepines (flurazepam, midazolam) zopiclone	1.ZZ.35.YA-P7 Includes: • barbiturates (secobarbital, pentobarbital), chloral hydrate, benzodiazepines (flurazepam, midazolam) zopiclone

1.ZZ.35.^.^ Pharmacotherapy, total body	per orifice (oral) approach	percutaneous approach [intramuscular, intravenous, subcutaneous, intradermal]	route NEC [transdermal, etc.]
using psychoanaleptic	1.ZZ.35.CA-P8 Includes: • antidepressants (desipramine, amoxapine, sertraline), methylphenidate, caffeine	1.ZZ.35.HA-P8 Includes: • antidepressants (desipramine, amoxapine, sertraline), methylphenidate, caffeine	1.ZZ.35.YA-P8 Includes: • antidepressants (desipramine, amoxapine, sertraline), methylphenidate, caffeine
using other nervous system drug	1.ZZ.35.CA-P9 Includes: • neostigmine, nicotine	1.ZZ.35.HA-P9 Includes: • neostigmine, nicotine	1.ZZ.35.YA-P9 Includes: • neostigmine, nicotine
antiparasitic agents			
using antiprotozoal	1.ZZ.35.CA-Q1 Includes: • iodoquinol, chloroquine, proguanil, pyrimethamine, atovaquone	1.ZZ.35.HA-Q1 Includes: • iodoquinol, chloroquine, proguanil, pyrimethamine, atovaquone	1.ZZ.35.YA-Q1 Includes: • iodoquinol, chloroquine, proguanil, pyrimethamine, atovaquone
using anthelmintic	1.ZZ.35.CA-Q2 Includes: • praziquantel, mebendazole, piperazine, pyrantel, pyrvinium	1.ZZ.35.HA-Q2 Includes: • praziquantel, mebendazole, piperazine, pyrantel, pyrvinium	1.ZZ.35.YA-Q2 Includes: • praziquantel, mebendazole, piperazine, pyrantel, pyrvinium
respiratory system agents			
nasal preparation [systemic]	1.ZZ.35.CA-R1 Includes: • nasal decongestants, topical and oral systemic; nasal cromoglycate sodium, nasal corticosteroids (budesonide, flunisolide)	1.ZZ.35.HA-R1 Includes: • nasal decongestants, topical and oral systemic; nasal cromoglycate sodium, nasal corticosteroids (budesonide, flunisolide)	—
using antiasthmatic agent [systemic]	1.ZZ.35.CA-R3 Includes: • salbutamol, fenoterol, budesonide, ipratropium bromide, inhalants or systemic use; theophylline, zafirlukast	1.ZZ.35.HA-R3 Includes: • salbutamol, fenoterol, budesonide, ipratropium bromide, inhalants or systemic use; theophylline, zafirlukast	1.ZZ.35.YA-R3 Includes: • salbutamol, fenoterol, budesonide, ipratropium bromide, inhalants or systemic use; theophylline, zafirlukast
using cough and cold preparation	1.ZZ.35.CA-R4 Includes: • guaifenesin, acetylcysteine, hydrocodone, dextromethorphan	1.ZZ.35.HA-R4 Includes: • guaifenesin, acetylcysteine, hydrocodone, dextromethorphan	—
using antihistamine [systemic]	1.ZZ.35.CA-R5 Includes: • diphenhydramine, cetirizine, cyproheptadine, for systemic use	1.ZZ.35.HA-R5 Includes: • diphenhydramine, cetirizine, cyproheptadine, for systemic use	1.ZZ.35.YA-R5 Includes: • diphenhydramine, cetirizine, cyproheptadine
using other respiratory systemic product	1.ZZ.35.CA-R6 Includes: • colfosceril, beractant, doxapram	1.ZZ.35.HA-R6 Includes: • colfosceril, beractant, doxapram,	1.ZZ.35.YA-R6 Includes: • colfosceril, beractant, doxapram
various systemic agents			
using other therapeutic product	1.ZZ.35.CA-T2 Includes: • disulfiram, antidotes, deferoxamine, sodium polystyrene sulfonate, ipecac	1.ZZ.35.HA-T2 Includes: • disulfiram, antidotes, deferoxamine, sodium polystyrene sulfonate, ipecac	1.ZZ.35.YA-T2 Includes: • disulfiram, antidotes, deferoxamine, sodium polystyrene sulfonate, ipecac
using pharmacological agent NEC	1.ZZ.35.CA-T9	1.ZZ.35.HA-T9	1.ZZ.35.YA-T9
using radioactive pharmaceutical agent	1.ZZ.35.CA-V1	1.ZZ.35.HA-V1	—

1.ZZ.38.^.^ Management of external appliance, total body

- Includes:** Adjusting appliance, total body
 Management of appliance, total body
 Removal of device, total body
- Excludes:** Fitting of appliance (see [7.SF.18.^.](#))
 Removal with replacement of external immobilization device (see [1.ZZ.03.^.](#))
 Skills training for use of appliance (see [7.SC.59.^.](#))

1.ZZ.38.JA-FQ	of cast [total body cast]
1.ZZ.38.JA-SR	of external splinting device [emergency stabilization]
1.ZZ.38.JA-TA	of traction
1.ZZ.38.JA-TF	of Stryker or Foster frame

1.ZZ.57.^.^ Extraction, total body**S** ⁴

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

- Includes:** Chelation therapy

1.ZZ.57.CA-Z9	using agent NEC by per orifice approach
1.ZZ.57.HA-Z9	using agent NEC by intramuscular approach
1.ZZ.57.HH-Z9	using agent NEC by intravenous approach

1.ZZ.71.^ ^ Division, total body**L** 38

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 38	Optional	Conjoined twins	Location	C R	Craniopagus
				H P	Ishiopagus
				M	Multiple types
				P Y	Pygopagus
				T P	Thoracopagus
				U	Unspecified
				X P	Xiphopagus [omphalopagus]

Includes: Separation, conjoined twins

Excludes: Any interim or palliative interventions done to prepare twins for separation (e.g. fashioning of flaps or grafts or insertion of tissue expanders - code to specific intervention by site)

Note: Use location attribute to identify site(s) of division by type of conjoined twins. This intervention will vary tremendously depending on the sites and systems that are joined and whether involved organs are partially or totally joined

1.ZZ.71.LA using open approach

Section 2 - Diagnostic Interventions

Excludes:

Diagnostic imaging interventions (see Section [3](#))

Diagnostic interventions unique to the state of pregnancy or to the fetus (see Section [5](#))

Routine, preventative or screening dental, health or eye examinations (see Section [7](#))

Tabular List of Diagnostic Interventions

Diagnostic Interventions on the Nervous System (2AA - 2BX)

Diagnostic Interventions on the Brain and Spinal Cord (2AA - 2AZ)

2.AA.^.^ Diagnostic Interventions on the Meninges and Dura Mater of Brain

Includes:	Dura mater of brain Epidural space [of brain] Falx arachnoid tissue of brain Fossa (frontal, temporal and posterior clinoid) Subdural space [of brain]
Excludes:	Meninges and dura of spine (see 2.AX.^.^)

2.AA.71.^.^ Biopsy, meninges and dura mater of brain

Includes:	Biopsy, arachnoid tissue of brain
2.AA.71.HA	using percutaneous (needle) approach through fontanelle
2.AA.71.RW	using burr hole approach with needle aspiration
2.AA.71.SE	using burr hole approach
2.AA.71.SZ	using open craniotomy [flap] approach

2.AC.^.^ Diagnostic Interventions on the Ventricles of Brain

Includes:	Aqueduct of Sylvius Cerebral ventricles [lateral, 3rd and 4th] Choroid plexus of 3rd and 4th ventricles Dandy Walker malformation of 4th ventricle Foramen of Monro Luschka and Magendie
------------------	---

2.AC.70.^.^ Inspection, ventricles of brain

Includes:	Ventriculoscapy
Code Also:	Any intraoperative stereotactic or computer guidance (see 3.AN.94.^.)
2.AC.70.DA	using endoscopic approach through burr hole (or fontanelle)
2.AC.70.SZ	using open craniotomy or craniectomy [flap] approach

2.AC.71.^ ^ Biopsy, ventricles of brain**Includes:** Biopsy, choroid plexus**Code Also:** Any intraoperative stereotactic or computer guidance (see [3.AN.94.^ ^](#))

2.AC.71.DA using endoscopic approach through burr hole (or fontanelle)

2.AC.71.SZ using open craniotomy or craniectomy [flap] approach

2.AE.^ ^.^ Diagnostic Interventions on the Thalamus and Basal Ganglia

Includes:

- Caudate
- Fornix
- Globus pallidus
- Hypothalamus
- Internal capsule
- Lemniscal pathway
- Lentiform nuclei
- Putamen
- Superior and inferior vagal ganglia

2.AE.24.^ ^ Electrophysiological measurement, thalamus and basal ganglia**Includes:** Mapping, globus pallidus
Mapping, ventral intermediate (VIM) nucleus of the thalamus**Code Also:** Any intraoperative stereotactic or computer guidance (see [3.AN.94.^ ^](#))

2.AE.24.SE-JA using burr hole technique for access and insertional electrodes

2.AE.71.^ ^ Biopsy, thalamus and basal ganglia**Code Also:** Any intraoperative stereotactic or computer guidance (see [3.AN.94.^ ^](#))

2.AE.71.DA using endoscopic approach through burr hole

2.AE.71.SE using burr hole technique for access

2.AE.71.SZ using open craniotomy [flap] approach

2.AF.^.^ Diagnostic Interventions on the Pituitary Region

Includes: Cavernous sinus
 Craniobuccal pouch
 Hypophyseal fossa
 Hypophysis cerebri
 Parasella
 Petrosal sinus
 Pituitary fossa
 Rathke's pouch
 Sella
 Sella turcica
 Suprasella

2.AF.70.^ Inspection, pituitary region

Includes: Inspection, hypophysis
 Inspection, parasella
 Inspection, pituitary fossa

Code Also: Any intraoperative stereotactic or computer guidance (see [3.AN.94.^](#))

2.AF.70.QS	using open trans sphenoidal [trans ethmoidal] approach
2.AF.70.SZ	using open trans frontal [craniotomy flap] approach

2.AF.71.^ Biopsy, pituitary region

Code Also: Any intraoperative stereotactic or computer guidance (see [3.AN.94.^](#))

2.AF.71.GR	using percutaneous transluminal approach
	Includes: Petrosal sinus sampling (for elevated ACTH secretions)
2.AF.71.QS	using open trans sphenoidal [trans ethmoidal] approach
2.AF.71.SZ	using open transfrontal [craniotomy flap] approach

2.AG.^.^ Diagnostic Interventions on the Pineal Gland

Includes: Pineal recess

2.AG.71.^.^ Biopsy, pineal gland

Code Also: Any intraoperative stereotactic or computer guidance (see [3.AN.94.^.^](#))

2.AG.71.DA	using endoscopic [ventriculoscopic] approach through burr hole
2.AG.71.SE	using burr hole approach
2.AG.71.SZ	using open craniotomy or craniectomy [flap] approach

2.AJ.^.^.^ Diagnostic Interventions on the Cerebellum

Excludes: Cerebellopontine angle (see [2.AK.^.^.^](#))

2.AJ.71.^.^ Biopsy, cerebellum

Code Also: Any intraoperative stereotactic or computer guidance (see [3.AN.94.^.^](#))

2.AJ.71.SE	using burr hole technique for access (to cerebellum)
2.AJ.71.SZ	using open craniotomy or craniectomy [flap] approach

2.AK.^.^.^ Diagnostic Interventions on the Cerebellopontine Angle

Includes: Acoustic [vestibular] nerve within the cerebellopontine angle
Choroid plexus of cerebellopontine angle
Cisterna
Facial nerve [intracranial] within the cerebellopontine angle

2.AK.71.^.^ Biopsy, cerebellopontine angle

Includes: Biopsy, cisterna [of brain]

Code Also: Any intraoperative stereotactic or computer guidance (see [3.AN.94.^.^](#))

2.AK.71.QQ	using open trans labyrinthine approach
2.AK.71.SE	using burr hole approach
2.AK.71.SZ	using open craniotomy or craniectomy [flap] approach

2.AN.^.^ Diagnostic Interventions on the Brain

Includes:

- Ansa
- Brain NEC
- Cingulate cortex
- Cingulum
- Corpus callosum
- Lobes of brain [parietal, occipital, frontal and temporal]
- Septum pellucidum

2.AN.08.^ Test, brain**S** 42 **E** 25

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 42	Optional	Dx Status 6	Status	N	Initial
				N1	Repeat
				Z	Other (special)
E 25	Optional	Time parameter 1	Extent	C M	Comprehensive
				L T	Limited (brief)

Includes:

- Test, intracarotid amytal (to introduce transient hemiparesis)
- Test, speech amytal memory
- Test, speech localization
- Test, Wada activation

Excludes:

- Behavior and personality testing (see [6.AA.08.^](#))
- Intelligence and memory testing (see [6.KA.08.^](#))

2.AN.08.FN for aphasia

Includes:

- Bilingual Aphasia Test (BAT)
- Boston Diagnostic Aphasia Examination
- French Aphasia Screening Test (FAST)
- Minnesota Test for Aphasia
- Neurosensory Center Comprehensive Exam for Aphasia
- Reitan Indiana Aphasia Screening Test
- Western Aphasia Battery

2.AN.08.GQ-P7 with percutaneous (needle) intracarotid injection of amobarbital and EEG monitoring

2.AN.08.HA-P7 with percutaneous (needle) intracarotid injection of amobarbital

2.AN.08.ZZ for other neuropsychological (disorder) test

Includes:

- Benton Visual Retention Test
- Color Sorting Test
- Halstead Reitan Neuropsychological Test
- Luria Nebraska Neuropsychological Test
- Rey-Osterreith Complex Figure Test

2.AN.24.^ Electrophysiological measurement, brain**S** 20 **E** 28

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 20	Optional	Dx status 1	Status	E	Extended
				P	Routine
				Q	Ambulatory
E 28	Optional	Dx measure parameter	Extent	R A	Recording and analysis
				R C	Receipt (analysis) only
				T R	Transmission (recording) only

Includes: Electrocorticography
Electroencephalography (EEG)
Mapping, brain
Mapping, cortical

Excludes: that done specifically for sleep studies (see [2.AN.59.^](#))
that done specifically with speech localization test (see [2.AN.08.^](#))

Code Also: Any robotic assisted telemanipulation of tools (see [7.SF.14.^](#))

2.AN.24.HA-JA using insertional electrodes [e.g. sphenoidal, nasopharyngeal] by percutaneous (needle) approach

2.AN.24.HA-LZ using externally applied magnetic device by percutaneous (needle) approach

Includes: Magnetoencephalography [MEG]

2.AN.24.JA-JA using externally applied electrodes

2.AN.24.LA-JA using insertional electrodes [e.g. sphenoidal, nasopharyngeal] by open approach

2.AN.24.TG-JA using sleep deprivation technique and externally applied electrodes

2.AN.28.^ Pressure measurement, brain**E** 27

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 27	Optional	Time parameter 2	Extent	C N	Continuous
				E P	Episodic

Includes: Monitoring, intra cranial pressure
Monitoring, intraparenchymal pressure
Monitoring, subdural pressure

Excludes: Implantation of pressure monitoring device, intracranial (see [1.AC.53.^](#))
Implantation of pressure monitoring device, intraparenchymal (see [1.AN.53.^](#))
Implantation of pressure monitoring device, subdural space (see [1.AA.53.^](#))

2.AN.28.JA-PL using (implanted) pressure monitoring device

2.AN.59.^ Other study, brain**E** 32

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 32	Optional	Sleep parameters	Extent	C N	Continuous
				E P	Episodic

Includes: Other study, sleep patterns
 Polysomnography
 Staging, sleep
 Study, sleep
 Test, multiple sleep latency [MSLT]

Code Also: Any concomitant cardiac catheterization for ECG study (see [2.HZ.24.^](#))
 Any concomitant therapy such as continuous positive airway pressure [CPAP] (see [1.GZ.31.^](#))

Note: Involves continuous monitoring (recording, analysis and interpreting) of various physiological parameters of sleep for 6 or more hours. This often requires a variety of monitoring techniques: EEG, EOG, ECG, EMG, respiration, gas exchange measurement, blood pressure monitoring, motor activity, snoring and body position observation. At least 3 of these (listed) parameters are measured during sleep study.

2.AN.59.ZZ using technique NEC

2.AN.71.^ Biopsy, brain**L** 1

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 1	Optional	Brain lobes	Location	F	Frontal lobe
				M	Multiple (overlapping) lobes
				O	Occipital lobe
				P	Parietal lobe
				T	Temporal lobe
				Z	Other NEC (e.g. corpus callosum)

Excludes:	Biopsy, brain stem (see 2.AP.71.^^) Biopsy, cerebellum (see 2.AJ.71.^^) Biopsy, cisterna of brain (see 2.AK.71.^^) Biopsy, intracranial nerve (see 2.BA.71.^^) Biopsy, pineal gland (see 2.AG.71.^^) Biopsy, pituitary gland (see 2.AF.71.^^) Biopsy, thalamus (see 2.AE.71.^^)
Code Also:	Any intraoperative stereotactic or computer guidance (see 3.AN.94.^^)
2.AN.71.SE	using burr hole approach
2.AN.71.SZ	using open craniotomy or craniectomy [flap] approach

2.AP.^^.^^ Diagnostic Interventions on the Brain Stem

Includes:	Cerebral peduncle Chiari malformations of brain stem [hindbrain] Medulla oblongata Mesencephalon Midbrain Pons Tectal plate
------------------	---

2.AP.71.^^ Biopsy, brain stem

Code Also:	Any intraoperative stereotactic or computer guidance (see 3.AN.94.^^)
2.AP.71.QT	using open trans oral approach
2.AP.71.SZ	using open craniotomy or craniectomy [flap] approach

2.AW.^^.^^ Diagnostic Interventions on the Spinal Cord

Includes:	Cauda equina Cervical and thoracic spinal cord Conus medullaris Intramedullary spine Spinal nerve NEC Spinal nerve roots
Excludes:	Brachial plexus (see 2.BG.^^.^^) Cerebral spinal fluid (see 2.AX.^^.^^) Cervical plexus (see 2.BB.^^.^^) Dura of spinal cord (see 2.AX.^^.^^) Epidural (or extradural) space of spine (see 2.AX.^^.^^) Lumbar plexus (see 2.BS.^^.^^)

Meninges of spinal cord (see [2.AX.^.^](#))
 Spinal canal (see [2.AX.^.^](#))
 Spinal nerves C2, C3, and C4 (see [2.BB.^.^](#))
 Spinal nerves C5, C6, C7 and T1 (see [2.BG.^.^](#))
 Spinal theca (see [2.AX.^.^](#))
 Subarachnoid space of spine (see [2.AX.^.^](#))
 Subdural spine (see [2.AX.^.^](#))
 Transverse [superficial] cervical nerve (see [2.BB.^.^](#))

2.AW.71.^.^ Biopsy, spinal cord

Excludes: Biopsy, spinal meninges (see [2.AX.71.^.](#))
Code Also: Any concomitant laminectomy (see [1.SC.80.^.](#))
 Any intraoperative microscope assistance (see [3.AW.94.^.](#))
 Any intraoperative stereotactic or computer guidance (see [3.AW.94.^.](#))

2.AW.71.DA	using endoscopic [laparoscopic] approach
2.AW.71.HA	using percutaneous (needle) approach
2.AW.71.LA	using open approach

2.AX.^.^ Diagnostic Interventions on the Spinal Canal and Meninges

Includes: Cerebral spinal fluid (CSF) of spine
 Dura of spinal cord
 Epidural (or extradural) space of spine
 Meninges of spinal cord
 Spinal theca
 Subarachnoid (and subdural) space of spine
Excludes: Intramedullary spine (see [2.AW.^.^](#))

2.AX.07.^.^ Analysis/Evaluation, spinal canal and meninges

Includes: Adjustment, neurostimulator (nerve pacemaker) function/rate, spinal canal and meninges
 Assessment, neurostimulator (nerve pacemaker) function/rate, spinal canal and meninges
 Programming, neurostimulator (nerve pacemaker), spinal canal and meninges
 Reprogramming, neurostimulator (nerve pacemaker), spinal canal and meninges
Excludes: Adjustment of neurostimulator (nerve pacemaker) position within spinal canal (see [1.AX.54.^.](#))
 Adjustment of neurostimulator (nerve pacemaker) position within subcutaneous pocket (see [1.YY.54.^.](#))
 Replacement of pulse generator/battery, neurostimulator (nerve pacemaker) (see [1.YY.54.^.](#))

2.AX.07.JA-DV	of neurostimulator (nerve pacemaker) using external approach
---------------	--

2.AX.13.^ ^ Specimen collection (diagnostic), spinal canal and meninges

Includes: Aspiration, spinal cord (CSF)
Puncture, lumbar [for collection of CSF for diagnostic purposes]
Tap, spinal [for collection of CSF for diagnostic purposes]
that for removal of dye

2.AX.13.HA using percutaneous (needle) approach

2.AX.28.^ ^ Pressure measurement, spinal canal and meninges**E** 27

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 27	Optional	Time parameter 2	Extent	C N	Continuous
				E P	Episodic

Includes: Monitoring, intra spinal pressure of spinal canal and meninges

Excludes: Implantation of pressure monitoring device, spinal canal and meninges (see [1.AX.53.^ ^](#))

2.AX.28.JA-PL using (implanted) pressure monitoring device

2.AX.70.^ ^ Inspection, spinal canal and meninges

Includes: Exploration, spinal canal
Myeloscopy

Excludes: Exploration with removal of foreign body [e.g. bone fragment], spinal canal (see [1.AX.56.^ ^](#))

Code Also: Any concomitant laminectomy (see [1.SC.80.^ ^](#))

2.AX.70.DA using endoscopic [laparoscopic] approach
2.AX.70.LA using open approach

2.AX.71.^ ^ Biopsy, spinal canal and meninges

Code Also: Any concomitant laminectomy (see [1.SC.80.^ ^](#))

2.AX.71.DA using endoscopic [laparoscopic] approach
2.AX.71.HA using percutaneous approach
2.AX.71.LA using open approach

2.AZ.^.^ Diagnostic Interventions on the Central Nervous System NEC**2.AZ.03.^.^ Observation and monitoring, central nervous system NEC**

Includes:	Monitoring, neurological signs
Excludes:	Monitoring, mental health (for self harm) (see 6.AA.03.^.)
2.AZ.03.NB	using scale (e.g. Glasgow coma scale)
2.AZ.03.ZZ	using technique NEC

Diagnostic Interventions on the Nerves (2BA - 2BX)

2.BA.^^.^^ Diagnostic Interventions on the Cranial Nerves

- Includes:**
- Abducent CN VI
 - Accessory CN XI [intracranial]
 - Facial CN VII
 - Gasserian ganglion [intracranial portion]
 - Glossopharyngeal CN IX [intracranial]
 - Hypoglossal CN XII [intracranial]
 - Oculomotor CN III
 - Olfactory CN I
 - Optic CN II
 - Trigeminal CN V
 - Trochlear CN IV
 - Vagus CN X
- Excludes:**
- Acoustic [vestibular] nerve within cerebellopontine angle (see [2.AK.^^.^^](#))
 - Cranial nerves outside skull [extracranial] (see [2.BB.^^.^^](#))
 - Facial nerve [intracranial] within cerebellopontine angle (see [2.AK.^^.^^](#))
 - Nerve of head, face or neck outside skull (see [2.BB.^^.^^](#))
 - Superior and inferior vagal ganglia (see [2.AE.^^.^^](#))

2.BA.07.^^ Analysis/Evaluation, cranial nerves (intracranial)

- Includes:**
- Adjustment, neurostimulator (nerve pacemaker) function/rate, cranial nerve (intracranial)
 - Assessment, neurostimulator (nerve pacemaker) function/rate, cranial nerve (intracranial)
 - Programming, neurostimulator (nerve pacemaker), cranial nerve (intracranial)
 - Reprogramming, neurostimulator (nerve pacemaker), cranial nerve (intracranial)
- Excludes:**
- Adjustment of neurostimulator (nerve pacemaker) position within subcutaneous pocket (see [1.YY.54.^^](#))
 - Replacement of pulse generator/battery, neurostimulator (nerve pacemaker) (see [1.YY.54.^^](#))
 - that of vagus nerve, extracranial (see [2.BB.07.^^](#))
 - that of vagus nerve, thorax and abdominal region (see [2.BL.07.^^](#))

2.BA.07.JA-DV of neurostimulator (nerve pacemaker) using external approach

2.BA.70.^^ Inspection, cranial nerves (intracranial)

- Includes:**
- Exploration, cranial nerves
- Excludes:**
- that with concomitant decompression or release of cranial nerve (see [1.BA.72.^^](#))
- Code Also:**
- Any intraoperative stereotactic or computer assisted guidance (see [3.AN.94.^^](#))

2.BA.70.SE using burr hole technique for access

2.BA.70.SZ open craniotomy [craniectomy] approach

2.BA.71.^.^ Biopsy, cranial nerves (intracranial)

Includes:	Biopsy, CNI XII [intracranial] Biopsy, cranial nerves within cavernous sinus Biopsy, cranial nerves within petrosal sinus
Excludes:	Biopsy, acoustic nerve within cerebellopontine angle (see 2.AK.71.^.) Biopsy, facial nerve within cerebellopontine angle (see 2.AK.71.^.) Biopsy, vestibular nerve within cerebellopontine angle (see 2.AK.71.^.)
Code Also:	Any intraoperative stereotactic or computer guidance (see 3.AN.94.^.)

2.BA.71.SE	using burr hole technique for access
2.BA.71.SZ	using open craniotomy [craniectomy] approach

2.BB.^.^.^ Diagnostic Interventions on the Nerves of Head and Neck

Includes:	Accessory nerve CN XI [extracranial] Cervical plexus [C2 C4] Cranial nerve [extracranial] Dental nerve Facial nerve CN VII [extracranial] Gasserian ganglion [extracranial portion] Glossopharyngeal CN IX [extracranial] Hypoglossal nerve CN XII [extracranial] Laryngeal nerve Mental nerve Nerve of head, face or neck region outside skull Pharyngeal nerve Transverse [superficial] cervical nerve Trigeminal nerve [extracranial] Vagus nerve
Excludes:	Cranial nerve [intracranial] (see 2.BA.^.^.) Facial nerve within cerebellopontine angle (see 2.AK.^.^.) Vagus nerve, thorax and abdomen region (see 2.BL.^.^.) Vestibular nerve (see 2.BD.^.^.)

2.BB.07.^.^ Analysis/Evaluation, nerves of head and neck

- Includes:** Adjustment, neurostimulator (nerve pacemaker) function/rate, vagus nerve, extracranial
 Assessment, neurostimulator (nerve pacemaker) function/rate, vagus nerve, extracranial
 Programming, neurostimulator (nerve pacemaker), vagus nerve, extracranial
 Reprogramming, neurostimulator (nerve pacemaker), vagus nerve, extracranial
- Excludes:** Adjustment of neurostimulator (nerve pacemaker) position within subcutaneous pocket (see [1.YY.54.^.](#))
 Replacement of pulse generator/battery, neurostimulator (nerve pacemaker) (see [1.YY.54.^.](#))
 that of vagus nerve, intracranial (see [2.BA.07.^.](#))
 that of vagus nerve, thorax and abdominal region (see [2.BL.07.^.](#))

2.BB.07.JA-DV of neurostimulator (nerve pacemaker) using external approach

2.BB.25.^.^ Potential (evoked) measurement, nerves of head and neck**S** 1 **L** 49

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative
L 49	Optional	Nerves	Location	C O	Cortical
				S P	Spinal

- Includes:** Response, somatosensory evoked potential (SSEP), facial nerve
 SSEP, nerves of head and neck
 Study, somatosensory evoked potential (SSEP), nerves of head and neck NEC

2.BB.25.JA using external approach (for evoked response recording)

2.BB.50.^.^ Conduction study, nerves of head and neck**S** 1

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

- Includes:** Study, blink reflex
 Study, conduction, facial nerve
 Testing, neuromuscular junction, head and neck

2.BB.50.HA-JA using needle electrodes (percutaneously inserted)
 2.BB.50.HN-JA with repetitive stimulation (percutaneously inserted) electrodes
Includes: Neuromuscular junction testing
 2.BB.50.JA-JA using surface electrodes (externally applied)

2.BB.70.^ **Inspection, nerves of head and neck**

Includes: Exploration, cervical plexus (C2, C3 and C4)
 Exploration, facial nerve
 Exploration, nerves of head and neck

Excludes: that with concomitant decompression or release of nerve of head and neck (see [1.BB.72.^](#))

2.BB.70.LA using open approach

2.BB.71.^ **Biopsy, nerves of head and neck**

Includes: Accessory nerve CN XI [extracranial]
 Cervical plexus [C2 to C4]
 Cranial nerve [extracranial]
 Dental nerve
 Facial nerve CN VII [extracranial]
 Gasserian ganglion
 Glossopharyngeal CN IX [extracranial]
 Hypoglossal nerve CN XII [extracranial]
 Laryngeal nerve
 Mental nerve
 Pharyngeal nerve
 Transverse [superficial] cervical nerve
 Trigeminal nerve [extracranial]
 Vagus nerve, head and neck region

Excludes: Cranial nerve [intracranial] (see [2.BA.71.^](#))
 Nerve of ear (see [2.BD.71.^](#))
 Trigeminal nerve [intracranial] (see [2.BA.71.^](#))

2.BB.71.HA using percutaneous (needle) approach

2.BB.71.LA using open approach

2.BD.^.^ Diagnostic Interventions on the Nerves of the Ear

- Includes:

Ampullary nerve [anterior, lateral and posterior]
Auditory nerve
Auricular nerve [greater]
Auriculotemporal nerve
Cochlear nerve
Saccular nerve
Tympanic nerve
Utricular nerve
Vestibular nerve
Vestibulocochlear nerve CN VIII
- Excludes:

Vestibular nerve within the cerebellopontine angle (see 2.AK.^.^)

2.BD.70.^.^ Inspection, nerves of the ear

- Includes:

Exploration, nerves of ear
Exploration, vestibular nerve
- Excludes:

that with concomitant decompression or release of nerve (see 1.BD.72.^.)

2.BD.70.LA using open approach

2.BD.71.^.^ Biopsy, nerves of the ear

L 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes:	Ampullary nerve: anterior, lateral and posterior Auditory nerve Auricular nerve: greater Auriculotemporal nerve Cochlear nerve Saccular nerve Tympanic nerve Utricular nerve Vestibulocochlear nerve CN VIII
Excludes:	Vestibular nerve within cerebellopontine (see 2.BA.71.^^)
2.BD.71.HA	using percutaneous (needle) approach
2.BD.71.QQ	using trans labyrinthine approach
2.BD.71.QV	using trans canal approach

2.BF.^^.^^ Diagnostic Interventions on the Sympathetic Nerves

Includes:	Celiac nerve Parasympathetic ganglia Peripheral autonomic nervous system Perivascular plexus Splanchnic nerve Stellate ganglia
------------------	---

2.BF.70.^^ Inspection, sympathetic nerve

Includes:	Exploration, sympathetic nerve
Excludes:	that with concomitant repair of sympathetic nerve (see 1.BF.80.^^)
2.BF.70.LA	using open approach

2.BF.71.^.^ Biopsy, sympathetic nerve**L** 11

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 11	Optional	Sympathetic	Location	C X	Cervical level [includes: stellate ganglion]
				L B	Lumbar level
				P V	Perivascular region [any site]
				S L	Sacral level
				T H	Thoracic level [includes: dorsal]
				Z	Other NEC [e.g. splanchnic nerve]

Includes:

- Celiac nerve
- Parasympathetic ganglia
- Peripheral autonomic nervous system
- Perivascular plexus
- Splanchnic nerve
- Stellate ganglia

2.BF.71.DA using endoscopic approach
 2.BF.71.HA using percutaneous (needle) approach
 2.BF.71.LA using open approach

2.BG.^.^.^ Diagnostic Interventions on the Brachial Plexus

Includes:

- Antebrachial nerve
- Brachial plexus [lateral, medial and posterior cord]
- Cervical spinal nerves [C5, C6, C7, C8 and T1]
- Intercostal nerve
- Scalenus plexus
- Scapular nerve
- Spinal nerves [C5, C6, C7, C8 and T1]
- Supraclavicular plexus
- Thoracic nerve
- Thoracic spinal nerve [T1]
- Thoracodorsal nerve

Excludes:

- Cervical plexus [C2-C4] (see [2.BB.^.^.^](#))

2.BG.70.^ ^ Inspection, brachial plexus

Includes:	Exploration, brachial plexus Exploration, cervical spinal nerves (C5, C6, C7, C8 and T1)
Excludes:	that with concomitant decompression or release of brachial plexus/ thoracic outlet (see 1.BG.72.^ ^)
Omit code:	When exploration is concomitant with biopsy, release, repair, or excision with nerve grafting. (Exploration is assumed to be part of these interventions.)
2.BG.70.LL	using anterior open approach
2.BG.70.PF	using posterior open approach

2.BG.71.^ ^ Biopsy, brachial plexus

Includes:	Antebrachial nerve Brachial plexus [lateral, medial and posterior cord] Cervical spinal nerves: C5, C6, C7, C8 [and T1] Intercostal nerve Scalenus plexus Scapular nerve Spinal nerves: C5, C6, C7, C8 [and T1] Supraclavicular plexus Thoracic nerve Thoracic spinal nerve: T1 Thoracodorsal nerve
Excludes:	Cervical plexus: C2 to C4 (see 2.BB.71.^ ^) Phrenic nerve (see 2.BL.71.^ ^) Suprascapular nerve (see 2.BR.71.^ ^)
2.BG.71.DC	using anterior endoscopic [thoracoscopic] approach
2.BG.71.LL	using anterior open approach
2.BG.71.PF	using posterior open approach

2.BL.^ ^.^ Diagnostic Interventions on the Nerves of the Trunk

Includes:	Phrenic nerve Vagus nerve
------------------	------------------------------

2.BL.07.^.^ Analysis/Evaluation, nerves of trunk

- Includes:** Adjustment, neurostimulator (nerve pacemaker) (diaphragmatic pacemaker) function/rate, nerves of trunk (intraabdominal vagus nerve and phrenic nerve)
 Assessment, neurostimulator (nerve pacemaker) (diaphragmatic pacemaker) function/rate, nerves of trunk (intraabdominal vagus nerve and phrenic nerve)
 Programming, neurostimulator (nerve pacemaker) (diaphragmatic pacemaker), nerves of trunk (intraabdominal vagus nerve and phrenic nerve)
 Reprogramming, neurostimulator (nerve pacemaker) (diaphragmatic pacemaker), nerves of trunk (intraabdominal vagus nerve and phrenic nerve)
- Excludes:** Adjustment of neurostimulator (nerve pacemaker) position within subcutaneous pocket (see [1.YY.54.^.](#))
 Replacement of pulse generator/battery, neurostimulator (nerve pacemaker) (see [1.YY.54.^.](#))
 that of vagus nerve, extracranial (head and neck region) (see [2.BB.07.^.](#))
 that of vagus nerve, intracranial (see [2.BA.07.^.](#))

2.BL.07.JA-DV of neurostimulator (nerve pacemaker) using external approach

2.BL.70.^.^ Inspection, nerves of trunk

- Includes:** Exploration, nerves of trunk
- Excludes:** that with concomitant destruction of phrenic nerve (see [1.BJ.59.^.](#))
 that with concomitant destruction or interruption (vagotomy) of vagus nerve (see [1.BK.59.^.](#))

2.BL.70.LA using open approach

2.BL.71.^.^ Biopsy, nerves of trunk

- Includes:** Phrenic nerve
 Vagus nerve

2.BL.71.LA using open approach

2.BP.^.^.^ Diagnostic Interventions on the Nerves of the Hand

- Includes:** Digital nerve NOS
 Median digital nerve
 Nerves at palmar level
 Palmar median nerve
 Radial digital nerve

2.BP.50.^ ^ Conduction study, nerves of hand

2.BP.50.HA-JA	using needle electrodes percutaneously applied
2.BP.50.HN-JA	with repetitive stimulation percutaneously inserted
	Includes: Neuromuscular junction testing
2.BP.50.JA-JA	using surface electrodes externally applied

2.BP.70.^ ^ Inspection, nerves of hand

Includes:	Exploration, nerves of hand Inspection, nerves of finger [thumb]
Excludes:	Inspection, nerves of forearm [around elbow] (see 2.BR.70.^ ^) that with concomitant (soft tissue) decompression or release (see 1.BP.72.^ ^)
Omit code:	When exploration is concomitant with biopsy, release, repair, or excision with nerve grafting. (Exploration is assumed to be part of these interventions.)

2.BP.70.LA	using open approach
------------	---------------------

2.BP.71.^ ^ Biopsy, nerves of hand**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes:	Digital nerve NOS Nerves at palmar level Palmar median nerve
Excludes:	that for nerves of arm (see 2.BR.71.^ ^)

2.BP.71.HA	using percutaneous (needle) approach
2.BP.71.LA	using open approach

2.BR.^.^ Diagnostic Interventions on the Nerves of the Arm

Includes:

- Axillary nerve
- Carpal tunnel
- Cubital tunnel
- Cutaneous nerve of upper arm
- Guyon's canal
- Median nerve at level of forearm and wrist
- Median nerve NEC
- Posterior interosseous nerve
- Radial nerve NEC
- Radial tunnel
- Suprascapular nerve
- Ulnar nerve at level of forearm and wrist
- Ulnar nerve NEC

Excludes:

- Digital nerve NOS (see [2.BP.^.^](#))
- Median digital nerve (see [2.BP.^.^](#))
- Nerves at palmar level (see [2.BP.^.^](#))
- Palmar median nerve (see [2.BP.^.^](#))
- Radial digital nerve (see [2.BP.^.^](#))

2.BR.25.^.^ Potential (evoked) measurement, nerves of arm**L** 49

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 49	Optional	Nerves	Location	C O	Cortical
				S P	Spinal

Includes:

- Response, somatosensory evoked potential (SSEP), nerves of upper limb
- SSEP, nerves of upper limb

2.BR.25.JA with external approach for recording of evoked response

2.BR.50.^ ^ Conduction study, nerves of arm**S** ¹ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

2.BR.50.HA-JA using needle electrodes percutaneously inserted
 2.BR.50.HN-JA with repetitive stimulation by electrodes percutaneously inserted
 Includes: Neuromuscular junction testing
 2.BR.50.JA-JA using surface electrodes externally applied

2.BR.70.^ ^ Inspection, nerves of arm

Includes: Exploration, nerves of arm
Excludes: Inspection, nerves of hand (or finger) (see [2.BP.70.^ ^](#))
 that with concomitant (soft tissue) decompression or release at forearm and wrist level (see [1.BN.72.^ ^](#))
 that with concomitant (soft tissue) decompression or release at upper arm and elbow level (see [1.BM.72.^ ^](#))
Omit code: When exploration is concomitant with biopsy, release, repair, excision with nerve grafting. (Exploration is assumed to be part of these interventions.)

2.BR.70.LA using open approach

2.BR.71.^.^ Biopsy, nerves of arm

Includes:	Axillary nerve Carpal tunnel Cubital nerve Cutaneous nerve of upper arm Guyon's canal Median nerve NEC Posterior interosseous nerve Radial nerve NEC Suprascapular nerve Ulnar nerve
Excludes:	Digital nerves of the hand (2.BP.71.^.^) Palmar median nerve (see 2.BP.71.^.^) that for nerves of hand (see 2.BP.71.^.^)

2.BR.71.HA	using percutaneous (needle) approach
2.BR.71.LA	using open approach

2.BS.^.^.^ Diagnostic Interventions on the Nerve(s) of Pelvis, Hip and Thigh (and lower trunk)

Includes:	Femoral cutaneous nerve Femoral nerve Genitofemoral nerve Ilioinguinal nerve Lumbar plexus Obturator nerve Pelvic plexus Pudendal nerve Sacral plexus Sciatic nerve NOS
Excludes:	Nerves of leg from knee to foot (see 2.BT.^.^.^) Sciatic nerve at peroneal level from knee to foot (see 2.BT.^.^.^) Sciatic nerve at tibial level from knee to foot (see 2.BT.^.^.^)

2.BS.07.^ ^ Analysis/Evaluation, nerve(s) of pelvis, hip and thigh (and lower trunk)

- Includes:** Adjustment, neurostimulator (nerve pacemaker) function/rate, nerves of pelvis, hip and thigh
 Assessment, neurostimulator (nerve pacemaker) function/rate, nerves of pelvis, hip and thigh
 Programming, neurostimulator (nerve pacemaker), nerves of pelvis, hip and thigh
 Reprogramming, neurostimulator (nerve pacemaker), nerves of pelvis, hip and thigh
 that of sacral nerve stimulator (SNS) device
- Excludes:** Adjustment of neurostimulator (nerve pacemaker) position within subcutaneous pocket (see [1.YY.54.^ ^](#))
 Replacement of pulse generator/battery, neurostimulator (nerve pacemaker) (see [1.YY.54.^ ^](#))

2.BS.07.JA-DV of neurostimulator (nerve pacemaker) using external approach

2.BS.25.^ ^ Potential (evoked) measurement, nerve(s) of pelvis, hip and thigh (and lower trunk)

- Includes:** Percutaneous nerve evaluation (PNE), sacral (nerve) plexus
 Somatosensory evoked potential (SSEP), sciatic nerve

2.BS.25.JA with external approach for recording evoked response

2.BS.70.^ ^ Inspection, nerve(s) of pelvis, hip and thigh (and lower trunk)

- Includes:** Exploration, nerves of pelvis, hip and thigh
 Inspection, sciatic nerve NEC
- Excludes:** Exploration sciatic nerve at tibial level (see [2.BU.70.^ ^](#))
 that with concomitant (soft tissue) decompression or release (see [1.BS.72.^ ^](#))
- Omit code:** When exploration is concomitant with biopsy, release, repair, excision with nerve grafting. (Exploration is assumed to be part of these interventions.)

2.BS.70.LA using open approach

2.BS.71.^.^ Biopsy, nerve(s) of pelvis, hip and thigh (and lower trunk)

Includes: Femoral cutaneous nerve
Femoral nerve
Genitofemoral nerve
Ilioinguinal nerve
Lumbar plexus
Obturator nerve
Pelvic plexus
Pudendal nerve
Sacral plexus
Sciatic nerve NOS

Excludes: Nerves of leg from knee to foot (see [2.BT.71.^.^](#))
Sciatic nerve at peroneal level from knee to foot (see [2.BT.71.^.^](#))
Sciatic nerve at tibial level from knee to foot (see [2.BT.71.^.^](#))

2.BS.71.HA using percutaneous (needle) approach
2.BS.71.LA using open approach

2.BT.^.^.^ Diagnostic interventions on the Nerves of Lower Leg

Includes: Nerves at ankle
Nerves at knee
Peroneal nerve NEC
Response, somatosensory evoked potential (SSEP), nerves of lower limb
Saphenous nerve
SSEP, nerves of lower limb
Sural nerve
Tarsal tunnel
Tibial nerve NEC

Excludes: Peroneal nerve at buttock level (see [2.BS.^.^.^](#))
Tibial nerve at buttock level (see [2.BS.^.^.^](#))

2.BT.25.^.^ Potential (evoked) measurement, nerves of lower leg**S 1 L 49**

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative
L 49	Optional	Nerves	Location	C O	Cortical
				S P	Spinal

2.BT.25.JA with external approach for recording of evoked response

2.BT.50.^ Conduction study, nerves of lower leg**S**¹ **L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Test, neuromuscular junction, lower limb

2.BT.50.HA-JA using needle electrodes percutaneously inserted
 2.BT.50.HN-JA with repetitive stimulation by electrodes percutaneously inserted

Includes: neuromuscular junction testing

2.BT.50.JA-JA using surface electrodes (externally applied)

2.BT.70.^ Inspection, nerves of lower leg

Includes: Exploration, nerves of lower leg

Excludes: that with concomitant (soft tissue) decompression or release (see [1.BT.72.^](#))

2.BT.70.LA using open approach

2.BT.71.^ Biopsy, nerves of lower leg**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes:	Biopsy, nerve at ankle Biopsy, nerve at knee Biopsy, peroneal nerve NEC Biopsy, saphenous nerve Biopsy, sciatic nerve at tibial or peroneal level Biopsy, sural nerve Biopsy, tarsal tunnel Biopsy, tibial nerve NEC
Excludes:	Peroneal nerve at buttock level (see 2.BS.71.^^) Tibial nerve at buttock level (see 2.BS.71.^^)

2.BT.71.HA	using percutaneous (needle) approach
2.BT.71.LA	using open approach

2.BU.^^.^^ Diagnostic Interventions on the Nerves of Leg

Excludes:	Nerves of lower portion of leg (see 2.BT.^^.^^) Nerves of upper portion of leg (see 2.BS.^^.^^)
------------------	--

2.BU.70.^^ Inspection, nerves of leg

Includes:	Exploration, nerves of leg NEC
Omit code:	When exploration is concomitant with biopsy, release, repair, or excision with nerve grafting. (Exploration is assumed to be part of these interventions)

2.BU.70.LA	open approach NOS
------------	-------------------

2.BX.^^.^^ Diagnostic Interventions on the Peripheral Nerves NEC

Includes:	Nerve NEC
------------------	-----------

2.BX.07.^ ^ Analysis/Evaluation, peripheral nerves NEC

- Includes:** Adjustment, neurostimulator (nerve pacemaker) function/rate, peripheral nerve(s) NEC
 Assessment, neurostimulator (nerve pacemaker) function/rate, peripheral nerve(s) NEC
 Programming, neurostimulator (nerve pacemaker), peripheral nerve(s) NEC
 Reprogramming, neurostimulator (nerve pacemaker), peripheral nerve(s) NEC
- Excludes:** Adjustment of neurostimulator (nerve pacemaker) position within subcutaneous pocket (see [1.YY.54.^ ^](#))
 Adjustment, assessment, programming or reprogramming of neurostimulator of nerve classified elsewhere (see Adjustment, neurostimulator, by site)
 Replacement of pulse generator/battery, neurostimulator (nerve pacemaker) (see [1.YY.54.^ ^](#))

2.BX.07.JA-DV of neurostimulator, (nerve pacemaker) using external approach

2.BX.25.^ ^ Potential (evoked) measurement, peripheral nerves NEC

- Includes:** Response, somatosensory evoked potential (SSEP), nerves of trunk
 SSEP, peripheral nerves NEC
 Study, somatosensory evoked potential (SSEP), nerves of trunk

2.BX.25.JA with external approach for recording evoked response

2.BX.50.^ ^ Conduction study, peripheral nerves NEC**S**¹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

2.BX.50.HA-JA using needle electrodes percutaneously inserted
 2.BX.50.HN-JA with repetitive stimulation by electrodes percutaneously inserted
Includes: Neuromuscular junction testing
 2.BX.50.JA-JA using surface electrodes externally applied

2.BX.70.^ ^ Inspection, peripheral nerves NEC

- Includes:** Exploration, peripheral nerve NEC
- Excludes:** that with concomitant (soft tissue) decompression or release of peripheral nerve NEC (see [1.BX.72.^ ^](#))
- Omit code:** When exploration is concomitant with biopsy, release, repair, or excision with nerve grafting. (Exploration is assumed to be part of these interventions)

2.BX.70.LA using open approach

2.BX.71.^ ^ Biopsy, peripheral nerves NEC

Includes: Biopsy, nerve NEC

2.BX.71.HA	using percutaneous (needle) approach
2.BX.71.LA	using open approach

Diagnostic Interventions on the Eye and Ocular Adnexa (2CC - 2CZ)

2.CC.^.^ Diagnostic Interventions on the Cornea

Includes: Bowman's membrane [layer] [anterior lamina] stroma
Corneal epithelium
Descemet's membrane [posterior elastic lamina] corneal endothelium

2.CC.70.^ Inspection, cornea

L 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Ophthalmometry

2.CC.70.FA	using slit lamp biomicroscopy
2.CC.70.FB	using keratometer
	Includes: Keratometry [e.g. measurement of anterior curvature of cornea] Ophthalmometry
2.CC.70.FC	using photo keratoscope
	Includes: Assessment of uniformity and unevenness of corneal surface
2.CC.70.FD	using computerized corneal topography
	Includes: Corneal mapping
2.CC.70.FP	using pachymeter
	Includes: that with use of slit lamp or ultrasound
2.CC.70.JD	using slit lamp biomicroscopy following fluorescein staining

2.CC.71.^.^ Biopsy, cornea**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

2.CC.71.JQ using scraping technique (for collection of cells)
Includes: that for smear preparation and/or culture

2.CC.71.LA using incisional approach

2.CD.^.^.^ Diagnostic Interventions on the Sclera

Includes: Limbus [border]
 Schlemm's canal
 Sclerocorneal junction [corneoscleral junction]

2.CD.70.^.^ Inspection, sclera**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

2.CD.70.LA using incisional approach
Includes: Exploratory sclerotomy

2.CD.71.^.^ Biopsy, sclera**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

2.CD.71.LA using incisional approach

2.CG.^.^.^ Diagnostic Interventions on the Ciliary Body**2.CG.71.^.^ Biopsy, ciliary body****L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

2.CG.71.LA using incisional approach

2.CH.^.^.^ Diagnostic Interventions on the Iris*Includes:* Pupil

2.CH.71.^.^ Biopsy, iris**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

2.CH.71.LA using incisional approach

2.CJ.^.^.^ Diagnostic Interventions on the Anterior Chamber

Includes: Anterior chamber angle
Anterior segment
Trabecular meshwork

2.CJ.70.^.^ Inspection, anterior chamber of eye**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

2.CJ.70.FA using slit lamp biomicroscopy
Includes: Gonioscopy NOS

2.CJ.71.^.^ Biopsy, anterior chamber of eye**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

2.CJ.71.HA using needle aspiration
Includes: Aspiration biopsy, anterior chamber of eye
 Fine needle aspiration, anterior chamber of eye

2.CM.^.^.^ Diagnostic Interventions on the Vitreous**2.CM.71.^.^ Biopsy, vitreous****L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

2.CM.71.HA using needle aspiration
Includes: Aspiration biopsy, vitreous
 Fine needle aspiration, vitreous

2.CN.^.^ Diagnostic Interventions on the Retina**2.CN.24.^.^ Electrophysiological measurement, retina****L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Electrophysiological measurement (ERG)

2.CN.24.JA-GX using externally applied device NEC

2.CN.71.^.^ Biopsy, retina**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

2.CN.71.DA using endoscopic approach

Includes: that with vitrectomy

2.CP.^.^.^ Diagnostic Interventions on the Soft Tissue of Orbit and Eyeball

Includes: Eyeball NOS
Fascia of eye
Soft tissue or orbit

Excludes: Facial bones (see [2.EA.^.^](#))
Nasal sinus bones (see [2.EY.^.^](#))
Palantine (see [2.FB.^.^](#))

2.CP.70.^ Inspection, soft tissue of orbit and eyeball

L²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

2.CP.70.DA	using endoscopic approach
2.CP.70.LA	using open approach

2.CP.71.^ ^ Biopsy, soft tissue of orbit and eyeball

L²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Excludes: that for ocular muscles and tendons (see [2.CQ.71.^^](#))

2.CP.71.DA	using endoscopic approach
2.CP.71.HA	using needle aspiration

Includes: Aspiration biopsy, orbit or eyeball NEC
Fine needle aspiration, orbit or eyeball NEC

2.CP.71.LA using open approach

2.CQ.^.^ Diagnostic Interventions on the Ocular Muscles and Tendons**2.CQ.24.^.^ Electrophysiological measurement, ocular muscles or tendons****L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Electromyography (EMG), ocular muscles
Oculo electromyography

2.CQ.24.HA-JA using needle electrodes percutaneously inserted
2.CQ.24.JA-JA using surface electrodes externally applied

2.CQ.71.^.^ Biopsy, ocular muscles or tendons**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

2.CQ.71.HA using percutaneous (needle) approach
2.CQ.71.LA using incisional approach

2.CS.^.^ Diagnostic Interventions on the Conjunctiva

Includes: Inner eyelid

2.CS.71.^ ^ Biopsy, conjunctiva**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

2.CS.71.JQ using scraping technique (for collection of cells)
Includes: that for smear preparation and/or culture

2.CS.71.LA using incisional approach

2.CU.^ ^.^ Diagnostic Interventions on the Lacrimal Excretory System

Includes:

- Lacrimal ducts
- Lacrimal gland
- Lacrimal sac
- Nasolacrimal canaliculi
- Nasolacrimal duct
- Nasolacrimal punctum
- Nasolacrimal sac

2.CU.07.^ ^ Analysis/Evaluation, lacrimal system**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Analysis, lacrimal drainage
 Analysis, tear production
 Evaluation, lacrimal system (for tear production and lacrimal drainage)
 Test, Jones, for tear production
 Test, Schirmer's, for lacrimal drainage

2.CU.07.ET for tear production [e.g. Schirmer's test]
 2.CU.07.EU for lacrimal drainage following instillation of fluorescein dye in conjunctival sac [e.g. Jones I test]
 2.CU.07.EV for lacrimal drainage following instillation of water or saline after dilation of puncta [e.g. Jones II test]

2.CU.71.^.^ Biopsy, lacrimal system

L²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Biopsy of lacrimal glands and passages

2.CU.71.LA using incisional approach

2.CX.^.^.^ Diagnostic Interventions on the Eyelid

Includes: Canthus
 Epicanthal fold
 Eyelash follicles
 Eyelashes
 Eyelid retractors [Müller's muscle] and capsulo palpebral fascia
 Lower eyelid
 Meibomian glands
 Skin of eyelid
 Tarsus
 Upper eyelid
 Upper eyelid with lower eyelid

Excludes: Eyebrow (see [2.YB.^.^](#))
 Inner eyelid (see [2.CS.^.^](#))

2.CX.70.^.^ Inspection, eyelid**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Excludes: that done as part of general eye examination (see [2.CZ.02.^.^](#))

2.CX.70.FA using slit-lamp biomicroscopy following lid eversion

2.CX.71.^.^ Biopsy, eyelid**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

2.CX.71.LA using incisional approach

2.CZ.^.^.^ Diagnostic Interventions on the Eye NEC

Includes: Eye socket [of eviscerated eye]
Eyeball and surrounding structure
Lens

Excludes: Soft tissue of orbit and eyeball NEC (see [2.CP.^.^.^](#))

2.CZ.02.^.^ Assessment (examination), eye NEC**S** 21 **L** 2 **E** 47

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 21	Optional	Dx status 2	Status	N	Initial (assessment)
				P	Routine (repeat)
				Z	Other NEC
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)
E 47	Optional	Depth of Assessment	Extent	N B	Brief
				N I	Intermediate
				N X	Extensive/comprehensive

Includes: Examination, eye**Excludes:** Colour vision test (see [2.CZ.08.^.](#))
Vision screening test (see [2.CZ.08.^.](#))2.CZ.02.ZZ using technique NEC
Includes: that for corrective visual device**2.CZ.08.^.^ Test, eye NEC****L** 2 **E** 47

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)
E 47	Optional	Depth of Assessment	Extent	N B	Brief
				N I	Intermediate
				N X	Extensive/comprehensive

Includes: Screening, vision
Study, visual field (perimetry)
Test, colour vision
Test, Goldman perimeter
Test, visual field

Excludes: Eye examination: ophthalmoscopy, slit- lamp biomicroscopy, screening tonometry, eye balance test and external ocular adnexa exam (see [2.CZ.02.^^](#))

2.CZ.08.AK for (extended) color vision testing (e.g. by anomaloscope)
2.CZ.08.AL for dark adaptation testing (e.g. by Goldman adaptometer)
2.CZ.08.AM for brightness acuity testing
2.CZ.08.AN for contrast sensitivity testing
2.CZ.08.AP for vision potential testing
2.CZ.08.AQ for functional visual loss testing
2.CZ.08.ZZ for other reason NEC

2.CZ.20.^^ Size measurement, eye NEC

L²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Exophthalmometry

Note: Involves measuring the extent of protrusion of the eyeball from its orbit

2.CZ.20.JA-GX using device NEC (e.g. exophthalmometer)

2.CZ.24.^^ Electrophysiological measurement, eye NEC

L²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Electro oculography (EOG)
Electronystagmography (ENG)
Evaluation, ocular motor

Excludes: that done with sleep study (see [2.AN.59.^^](#))

Note: May involve Saccade, Gaze, pursuit, optokinetic and chair rotation/torsion tests with or without vestibular [ear] studies. Ear canal may require irrigation.

2.CZ.24.XD without caloric stimulation or NOS
2.CZ.24.XH with caloric stimulation

2.CZ.25.^^ Potential (evoked) measurement, eye NEC

L²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Response, visual evoked (VER)
Study, visual evoked (VEP) (full field, hemi field and flash)
VEP
VER, cortical

2.CZ.25.XH with light stimulation

2.CZ.28.^^ Pressure measurement, eye NEC

L²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Ophthalmodynamometry
Tonometry, eye
- Excludes:** Screening tonometry (air puff) done as part of general eye examination (see [2.CZ.02.^](#))
- Note:** Involves assessing blood flow following application of pressure to sclera or measurement of intra-ocular pressure produced by the constant application of a known weight.

2.CZ.28.JA-PL	using external application of pressure measuring device (to sclera)
2.CZ.28.JA-PQ	using external application of applanation indentation tonometer [e.g. Goldman tonometer]
2.CZ.28.JA-PR	using external application of hand held tonometer (e.g. Schiøtz tonometer)
2.CZ.28.XK	with provocative tests (for glaucoma)

2.CZ.58.^ Function study, eye NEC

- Includes:** Study, ocular motility
- Excludes:** Eye-balance test done as part of eye examination (see [2.CZ.02.^](#))

2.CZ.58.AR	using light reflex technique
2.CZ.58.AS	using (alternate) cover test
2.CZ.58.AT	with extraocular movement testing

2.CZ.70.^ Inspection, eye NEC

L²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Fluorescein angiography of eye
Fundoscopy, eye
Ophthalmoscopy
- Excludes:** Eye examination (see [2.CZ.02.^](#))
that done as part of general eye examination (see [2.CZ.02.^](#))

2.CZ.70.JA-JB	using ophthalmoscope
2.CZ.70.JA-JC	using scanning laser ophthalmoscope
2.CZ.70.JA-JD	using ophthalmoscope, following intravenous injection of fluorescent dye (angiography)
2.CZ.70.JA-JE	using scanning laser ophthalmoscope, following intravenous injection of fluorescent dye

Diagnostic Interventions on the Ear and Mastoid (process) (2DA - 2DZ)

Diagnostic Interventions on the External Ear (2DA - 2DE)

2.DA.^^.^^ Diagnostic Interventions on the External Ear NEC

Includes:	Auricle Cartilage of ear [helix, fossa triangularis, scapha, concha, tragus, antitragus, antihelix] Pinna
Excludes:	Ear lobe (see 2.YC.^^.^^) Skin of external ear (see 2.YC.^^.^^)

2.DA.20.^^ Size measurement, external ear NEC

L²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Note: Involves measuring the size of ear [auricle], such as height, width, spread, etc

2.DA.20.ZZ using technique NEC

2.DA.71.^^ Biopsy, external ear NEC

L²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Biopsy, auricle

2.DA.71.LA using incisional approach

2.DE.^.^ Diagnostic Interventions on the External Auditory Meatus

Includes: External auditory canal

2.DE.70.^.^ Inspection, external auditory meatus**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Auriscopy
Inspection, ear canal
Otoscopy

Excludes: that done as part of general hearing examination (see [2.DZ.02.^.](#))

2.DE.70.CA using per orifice approach

2.DE.71.^.^ Biopsy, external auditory meatus**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

2.DE.71.LA using incisional approach

Diagnostic Interventions on the Middle Ear [tympanic cavity](2DF - 2DL)

2.DF.^^.^^ Diagnostic Interventions on the Tympanic Membrane

Includes: Eardrum
Plica chordae tympani

2.DF.23.^^ Sound (wave) measurement, tympanic membrane

L ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Test, impedance/ emittance, tympanic membrane
Tympanometry

Note: Involves indirect measurement of mobility and impedance of tympanic membrane by applying air pressure to external acoustic meatus

2.DF.23.ZZ using technique NEC

2.DF.71.^^ Biopsy, tympanic membrane

L ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

2.DF.71.LA using open approach

2.DJ.^^.^^ Diagnostic Interventions on the Eustachian tube

Includes: Auditory tube

2.DJ.71.^.^ Biopsy, eustachian tube**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

2.DJ.71.LA using open approach

2.DK.^.^.^ Diagnostic Interventions on the Middle Ear

- Includes:** Attic
Middle ear NOS
Ossicular chain NEC
Tympanic cavity (with contents)
Tympanomastoid cavity (with contents)
- Excludes:** Mastoid process alone (see [2.DL.^.^.^](#))
Tympanic membrane [eardrum] alone (see [2.DF.^.^.^](#))

2.DK.70.^.^ Inspection, middle ear**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Inspection, tympanic membrane
that done by postauricular or ear canal [endaural] incision
Tympanotomy with elevation of tympanomeatal flap

2.DK.70.LA using open approach

2.DK.71.^.^ Biopsy, middle ear**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

2.DK.71.LA using incisional approach [through tympanic membrane]

2.DL.^.^.^ Diagnostic Interventions on the Mastoid (process)

Includes:

- Mastoid bone
- Mastoid portion of temporal bone
- Mastoid process
- Petrous apex
- Petrous pyramid air cells

2.DL.70.^.^ Inspection, mastoid (process)**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

2.DL.70.LA using incisional approach (e.g. mastoidotomy, trans tympanic membrane or endoaural incision)

2.DL.71.^ ^ Biopsy, mastoid (process)

L 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

2.DL.71.LA using incisional approach (e.g. mastoidotomy, trans tympanic membrane or endoaural incision)

Diagnostic Interventions on the Inner Ear (2DM - 2DZ)

2.DM.^.^ Diagnostic Interventions on the Cochlea

2.DM.24.^.^ Electrophysiological measurement, cochlea

L²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Electrocochleography

Excludes: Auditory evoked potential (see [2.DZ.25.^.](#))

Note: Involves measuring electrical activity of cochlea when stimulated by sound

2.DM.24.ZZ using technique NEC

2.DR.^.^ Diagnostic Interventions on the Inner Ear NEC

Includes: Inner ear NOS
Labyrinth NOS
Membranous labyrinth
Osseous labyrinth
Oval window
Round window
Semi-circular canals
Semi-circular ducts
Vestibular system
Vestibule

Excludes: Cochlea alone (see [2.DM.^.^](#))
Eustachian tube (see [2.DJ.^.^](#))
Vestibular nerve (see [2.BD.^.^](#))

2.DR.08.^.^ Test, inner ear NEC**Includes:** Vertigo test NOS

2.DR.08.JH using manual technique

Includes: Barany maneuver
Dix Hallpike maneuver
Provocative vestibular stimulation testing

2.DR.08.ZZ using technique NEC

2.DZ.^.^.^ Diagnostic Interventions on the Ear NEC**2.DZ.02.^.^ Assessment (examination), ear NEC****E** 25

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 25	Optional	Time parameter 1	Extent	C M	Comprehensive
				L T	Limited (brief)

Includes: Examination, hearing function
Examination, otoscopic
Test, tuning fork**Excludes:** Audiometry (see [2.DZ.50.^.^](#))
Auditory evoked potential test (see [2.DZ.25.^.^](#))
Provocative vestibular stimulation testing (for vertigo) (see [2.DR.08.^.^](#))**Note:** May involve a variety of methods to determine status of hearing function such as whispered speech test, otoscopic examination, tuning fork test and Weber lateralization.

2.DZ.02.ZZ using technique NEC

2.DZ.25.^.^ Potential (evoked) measurement, ear NEC**L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Audiometry (cortical or brain stem), evoked response
Response, auditory evoked potential (AEP)

Excludes: Electrocochleography (see [2.DM.24.^](#))

2.DZ.25.XH with stimulation by sound

2.DZ.29.^ Other measurement NEC, ear NEC

L ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Evaluation of Eustachian tube
Recording, autoacoustic emissions
Test, acoustic reflex

Note: Involves measuring acoustic reflex threshold by testing for contraction of stapedial muscles in response to sound.

2.DZ.29.ZZ using technique NEC

2.DZ.50.^ Conduction study, ear NEC

Includes: Audiometry

Excludes: Auditory evoked potential (see [2.DZ.25.^](#))

2.DZ.50.YA using pure tone with air conduction only
 2.DZ.50.YB using pure tone with air and bone conduction
 2.DZ.50.YC using combination of techniques (e.g. pure tone with speech reception threshold and word recognition)
 2.DZ.50.YD using pure tone loudness balance test
 2.DZ.50.YE using pure tone decay testing
 2.DZ.50.YF using Stenger test (pure tone or speech test)
 2.DZ.50.YG using speech reception threshold only
 2.DZ.50.YH using speech reception threshold and word recognition
 2.DZ.50.YJ using delayed auditory feedback test
 2.DZ.50.YK using filtered speech test
 2.DZ.50.YL using visual reinforcement audiometry (VRA)
 2.DZ.50.YM using other word recognition test
 2.DZ.50.ZZ using technique NEC

Diagnostic Interventions on the Orocraniofacial Region (2EA - 2FY)

Diagnostic Interventions on Musculoskeletal Tissue of Head and Nasal Cavity (2EA - 2EY)

2.EA.^.^ Diagnostic Interventions on the Cranium

Includes:	Cranial base Cranial suture or ligament Frontal, parietal, temporal, occipital bone Skull NOS
Excludes:	Malar bone (see 2.EB.^.^) Mandible (see 2.EE.^.^) Maxilla (see 2.ED.^.^) Nasal sinus bones (see 2.EY.^.^) Zygoma (see 2.EB.^.^)

2.EA.20.^.^ Size measurement, cranium

Includes:	Measurement [circumference], skull
2.EA.20.ZZ	using external manual technique (for measurement)

2.EA.70.^.^ Inspection, cranium

Includes:	Examination, skull
2.EA.70.JA	using external manual technique (e.g. digital examination)
2.EA.70.JB	using light source (e.g. trans-illumination of newborn skull)

2.EA.71.^.^ Biopsy, cranium

2.EA.71.HA	using percutaneous (needle) approach
2.EA.71.LA	using open approach

2.EB.^.^ Diagnostic Interventions on the Zygoma

Includes:	Facial bone NOS Malar bone Zygomatic arch(es)
------------------	---

2.EB.71.^.^ Biopsy, zygoma

Includes: Biopsy, zygomatic arches

2.EB.71.LA using open approach

2.ED.^.^.^ Diagnostic Interventions on the Maxilla

Includes: Alveolar process [ridge, arch]

2.ED.71.^.^ Biopsy, maxilla

2.ED.71.LA using open approach

2.EE.^.^.^ Diagnostic Interventions on the Mandible

Excludes: Alveolar process [ridge, arch] of mandible alone (see [2.EN.^.^.^](#))
Coronoid process of mandible alone (see [2.EL.^.^.^](#))
Mandibular condyle alone (see [2.EL.^.^.^](#))

2.EE.71.^.^ Biopsy, mandible

2.EE.71.LA using open approach

2.EL.^.^.^ Diagnostic Interventions on the Temporomandibular Joint [TMJ]

Includes: Articular disc
Bursa
Coronoid process of mandible (alone)
Joint capsule
Ligament
Mandibular condyle (alone)
Meniscus
Synovial lining [cavity]

2.EL.08.^ ^ Test, temporomandibular joint [TMJ]**Includes:** Test, range of motion, temporomandibular joint**Excludes:** Range of motion exercise (with testing), TMJ (see [1.EL.02.^ ^](#))

2.EL.08.ZZ using technique NEC

2.EL.70.^ ^ Inspection, temporomandibular joint [TMJ]**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

2.EL.70.DA using endoscopic approach

2.EL.70.LA using open approach

2.EL.71.^ ^ Biopsy, temporomandibular joint [TMJ]**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Aspiration of synovial fluid for diagnostic purposes

2.EL.71.DA using endoscopic approach

2.EL.71.HA using percutaneous (needle) approach

2.EL.71.LA using open approach

2.EN.^ ^.^ ^ Diagnostic Interventions on the Mandibular Alveolar Ridge**Includes:** Arch
Mandibular alveolar process

2.EN.71.^.^ Biopsy, mandibular alveolar ridge

2.EN.71.LA using open approach

2.EP.^.^ Diagnostic Interventions on the Muscles of Head and Neck

Includes: Fascia of head and neck: temporal, buccopharyngeal, parotid and masseter
 Muscles of head: occipitofrontalis, pterygoid, temporalis, temporoparietal, zygomaticus major and minor palati
 Muscles of the face
 Muscles of the neck: buccinator, cricothyroid, digastric, geniohyoid, mylohyoid, omohyoid, platysma, pterygoid, scalene, sternocleidomastoid, sternohyoid, thyrohyoid

Excludes: Muscles of the eye (see [2.CQ.^.^](#))
 Muscles of the tongue (see [2.FJ.^.^](#))

2.EP.08.^.^ Test, muscles of head and neck

Includes: Test, muscles of face

2.EP.08.ZZ using technique NEC

2.EP.24.^.^ Electrophysiological measurement, muscles of head and neck**S**¹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Electromyography, muscles of face
 Electromyography, muscles of head and neck
 EMG, muscles of face
 EMG, muscles of head and neck

Excludes: that of ocular muscles (see [2.CQ.24.^.](#))

Note: Involves measuring electrical activity in muscles of head and/or face at rest, following voluntary contractions and following electrical stimulation

2.EP.24.HA-JA using needle electrodes percutaneously inserted
2.EP.24.JA-JA using surface electrodes externally applied

2.EQ.^^.^^ Diagnostic Interventions on the Soft Tissue of Head and Neck

- Includes:** Soft tissue (abscess, hematomas, wound, neoplasm, sinuses, fistulae)
Soft tissue of head and neck NOS
- Excludes:** Muscles and tendons of eye (see [2.CQ.^^.^^](#))
Skin and subcutaneous tissue of face (see [2.YF.^^.^^](#))
Skin and subcutaneous tissue of neck (see [2.YG.^^.^^](#))

2.EQ.70.^^ Inspection, soft tissue of head and neck

- Includes:** Inspection, soft tissue of neck NEC

2.EQ.70.LA using open approach

2.EQ.71.^^ Biopsy, soft tissue of head and neck

-
- 2.EQ.71.HA using percutaneous (needle) approach
2.EQ.71.LA using open approach
-

2.ET.^^.^^ Diagnostic Interventions on the Nose

- Includes:** Choanae
Meatus and mucosa
Nasal bones
Nasal bones with cartilage
Nasal cartilage
Nasal cavity
Nasal fossa
Nose NEC
Turbinates
Vestibule
- Excludes:** Skin of nose alone (see [2.YD.^^.^^](#))

2.ET.58.^^ Function study, nose

- Includes:** Rhinomanometry
-
- 2.ET.58.CA-PL using pressure measuring device NEC and per orifice approach
-

2.ET.70.^.^ Inspection, nose

Includes:	Inspection, nose Rhinoscopy
Excludes:	Inspection, nasal sinuses (see 2.EY.70.^.^)
2.ET.70.BA	using endoscopic per orifice approach

2.ET.71.^.^ Biopsy, nose

2.ET.71.BA	using endoscopic per orifice approach
2.ET.71.LA	using open approach

2.EY.^.^.^ Diagnostic Interventions on the Paranasal Sinuses

Includes:	Multiple nasal sinuses (2 or more of the following: ethmoidal, sphenoidal, maxillary, frontal) Nasal sinus NEC Nasal sinus NOS Pansinus(es)
------------------	--

2.EY.70.^.^ Inspection, paranasal sinuses

Includes:	Inspection, frontal sinus Inspection, paranasal sinuses
2.EY.70.BA	using endoscopic per orifice approach
2.EY.70.JB	using light source alone (for trans-illumination of sinuses)
2.EY.70.LA	using open approach

2.EY.71.^.^ Biopsy, paranasal sinuses

Includes:	Biopsy, paranasal sinuses [e.g. sphenoidal, ethmoidal, maxillary, frontal]
2.EY.71.BA	using endoscopic per orifice approach
2.EY.71.HA	using percutaneous (needle) approach
2.EY.71.LA	using open approach

Diagnostic Interventions on the Oral Cavity and Pharynx(2FA - 2FX)

2.FA.^.^ Diagnostic Interventions on the Nasopharynx

Excludes: Nasopharynx with oropharynx (see [2.FX.^.^](#))

2.FA.70.^.^ Inspection, nasopharynx

Excludes: Inspection, oropharynx (see [2.FX.70.^.](#))

2.FA.70.BA	using endoscopic per orifice approach
	Includes: Pharyngorhinoscopy, nasopharyngoscopy

2.FA.71.^.^ Biopsy, nasopharynx

Excludes: Biopsy, oropharynx (see [2.FX.71.^.](#))

2.FA.71.BA	using endoscopic per orifice approach
2.FA.71.BP	using endoscopic per orifice approach with needle aspiration
	Includes: Core biopsy

2.FB.^.^ Diagnostic Interventions on the Hard Palate

Includes: Palate NOS
Palatine bone

2.FB.71.^.^ Biopsy, hard palate

2.FB.71.LA	using incisional approach
------------	---------------------------

2.FC.^.^ Diagnostic Interventions on the Soft Palate

2.FC.71.^.^ Biopsy, soft palate

2.FC.71.LA	using incisional approach
------------	---------------------------

2.FD.^.^ Diagnostic Interventions on the Gingiva

Includes: Gums
Oral vestibule
Periodontal pocket

2.FD.71.^.^ Biopsy, gingiva

2.FD.71.LA	using incisional approach
------------	---------------------------

2.FG.^.^ Diagnostic Interventions on the Oral and Buccal Mucosa

Includes: Buccal mucosa [fat pad, glands]
Buccal sulcus
Labial frenulum
Labial sulcus
Oral mucosa NEC
Oral papilla

Excludes: Oral mucosa of floor of mouth (see [2.FH.^.^](#))

2.FG.71.^.^ Biopsy, oral and buccal mucosa

2.FG.71.LA	using incisional approach
------------	---------------------------

2.FH.^.^ Diagnostic Interventions on the Floor of Mouth

Includes: Retromolar trigone
Sublingual space
Submandibular space

2.FH.71.^.^ Biopsy, floor of mouth

Includes: Biopsy, anterior, lateral and retromolar floor of mouth
Biopsy, retromolar trigone

2.FH.71.LA	using incisional approach
------------	---------------------------

2.FJ.^^.^^ Diagnostic Interventions on the Tongue

Includes: Lingual frenulum
Lingual sulcus
Muscles of tongue [intrinsic and extrinsic]: genioglossus styloglossus, hyoglossus
Sublingual tonsil [lymph follicles on posterior third of tongue]

2.FJ.71.^^ Biopsy, tongue

2.FJ.71.HA	using percutaneous (needle) approach
2.FJ.71.LA	using incisional approach

2.FK.^^.^^ Diagnostic Interventions on the Mouth

Includes: Oral cavity NEC

2.FK.02.^^ Assessment (examination), mouth

S 21 **L** 48 **E** 25

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 21	Optional	Dx status 2	Status	N	Initial (assessment)
				P	Routine (repeat)
				Z	Other NEC
L 48	Optional	Diagnostic tooth structures	Location	M X	Mixed (primary and permanent) dentition
				P R	Primary (deciduous) dentition
				P T	Permanent dentition
				Z	Other (edentulous)
E 25	Optional	Time parameter 1	Extent	C M	Comprehensive
				L T	Limited (brief)

Includes: Examination, dental (endodontal, orthodontal, periodontal, prosthodontal)
Examination, oral

Excludes: Photography of oral (dental) structures (see [3.FK.94.^^](#))
Radiographs of teeth (see [3.FE.10.^^](#))

Note: Involves clinical examination of hard and soft tissue of mouth, and other related structures.

2.FK.02.ZZ	using technique NEC
------------	---------------------

2.FP.^.^ Diagnostic Interventions on the Salivary Glands and Ducts**2.FP.70.^.^ Inspection, salivary glands and ducts**

Includes: Inspection, sublingual, parotid or submandibular glands

2.FP.70.BA	using endoscopic (sialendoscopic) per orifice approach
2.FP.70.LA	using open approach

2.FP.71.^.^ Biopsy, salivary glands and ducts

Includes: Biopsy, sublingual, parotid or submandibular glands

2.FP.71.BA	using endoscopic (sialendoscopic) per orifice approach
2.FP.71.HA	using percutaneous (needle) approach
2.FP.71.LA	using open approach

2.FQ.^.^ Diagnostic Interventions on the Uvula**2.FQ.71.^.^ Biopsy, uvula**

2.FQ.71.HA	using percutaneous (needle) approach
2.FQ.71.LA	using incisional approach

2.FR.^.^ Diagnostic Interventions on the Tonsils and Adenoids

Includes: Adenoid
Palatine tonsil
Pharyngeal tonsil

Excludes: Lingual tonsil (see [2.FJ.^.^](#))

2.FR.71.^.^ Biopsy, tonsils and adenoids

2.FR.71.HA	using percutaneous (needle) approach
2.FR.71.LA	using incisional approach

2.FT.^.^ Diagnostic Interventions on the Thyroglossal Duct**2.FT.70.^.^ Inspection, thyroglossal duct**

2.FT.70.LA	using open approach
------------	---------------------

2.FT.71.^.^ Biopsy, thyroglossal duct

2.FT.71.HA	using percutaneous (needle) approach
2.FT.71.LA	using open approach

2.FU.^.^ Diagnostic Interventions on the Thyroid gland

Excludes: Thyroglossal duct or tract (see [2.FT.^.^](#))
Thyroid cartilage (see [2.GE.^.^](#))

2.FU.70.^.^ Inspection, thyroid gland

Includes: Inspection, thyroid field [thyroid gland previously excised]

2.FU.70.NZ	using open [neck incision] approach
2.FU.70.PZ	using open substernal [mediastinal] approach

2.FU.71.^.^ Biopsy, thyroid gland

2.FU.71.HA	using percutaneous (needle) approach
2.FU.71.NZ	using open [neck incision] approach
2.FU.71.PZ	using open substernal [mediastinal] approach

2.FV.^.^ Diagnostic Interventions on the Parathyroid gland**2.FV.70.^.^ Inspection, parathyroid gland**

2.FV.70.NZ	using open [neck incision] approach
2.FV.70.PZ	using open substernal [mediastinal] approach

2.FV.71.^.^ Biopsy, parathyroid gland

2.FV.71.HA	using percutaneous (needle) approach
2.FV.71.NZ	using open [neck incision] approach
2.FV.71.PZ	using open substernal [mediastinal] approach

2.FX.^.^.^ Diagnostic Interventions on the Oropharynx

Includes:	Hypopharynx Oropharynx with nasopharynx Pharynx NOS Posterior and lateral oropharynx Retromaxillary Suprahyoid Valleculae
Excludes:	Nasopharynx alone (see 2.FA.^.^.^) Pharynx with larynx (see 2.GE.^.^.^)

2.FX.70.^.^ Inspection, oropharynx

Includes:	Inspection, oropharynx
Excludes:	Inspection, nasopharynx (see 2.FA.70.^.^)

2.FX.70.BA	using endoscopic per orifice approach
	Includes: Pharyngoscopy
2.FX.70.LA	using open approach
	Includes: Exploratory pharyngotomy

2.FX.71.^.^ Biopsy, oropharynx

Includes:	Biopsy, oropharynx
Excludes:	Biopsy, nasopharynx (see 2.FA.71.^.^)

2.FX.71.BA	using endoscopic per orifice approach (and device NEC)
2.FX.71.BP	using endoscopic per orifice approach with needle aspiration
	Includes: Core biopsy

Diagnostic Interventions on the Respiratory System (2GE - 2GZ)

2.GE.^.^ Diagnostic Interventions on the Larynx

Includes: Glottis (vocal cord)
Laryngeal cartilage
Pharynx with larynx
Subglottis
Supraglottis

2.GE.58.^.^ Function study, larynx

2.GE.58.ZZ	using technique NEC
------------	---------------------

2.GE.70.^.^ Inspection, larynx

Includes: Laryngoscopy
Microlaryngoscopy
Nasopharyngolaryngoscopy

Code Also: Any concomitant video stroboscopy, larynx (see [3.GE.94.^.^](#))

2.GE.70.BA	using endoscopic per orifice approach (via stoma)
2.GE.70.LA	using open (incisional) approach

2.GE.71.^.^ Biopsy, larynx

Includes: Biopsy, vocal cord

2.GE.71.BA	using endoscopic per orifice approach
2.GE.71.LA	using open approach

2.GJ.^.^ Diagnostic Interventions on the Trachea

2.GJ.70.^.^ Inspection, trachea

Includes: Tracheoscopy

2.GJ.70.BA	using endoscopic per orifice approach (via stoma)
------------	---

2.GJ.71.^.^ Biopsy, trachea

2.GJ.71.BA	using endoscopic per orifice approach
2.GJ.71.BP	using endoscopic per orifice approach and needle aspiration
2.GJ.71.BR	using endoscopic per orifice approach and brushings/ washings
	<i>Includes:</i> Tracheal lavage for cytology
2.GJ.71.LA	using open approach

2.GK.^.^.^ Diagnostic Interventions on the Thymus

Includes: Ectopic thymus tissue

2.GK.71.^.^ Biopsy, thymus

2.GK.71.HA	using percutaneous (needle) approach
------------	--------------------------------------

2.GM.^.^.^ Diagnostic Interventions on the Bronchus

Includes: Bronchial region
Bronchus NOS
Carina
Hilus of lung
Left main bronchus
Main bronchus NOS
Right main bronchus

2.GM.70.^ ^ Inspection, bronchus**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

2.GM.70.BA using endoscopic per orifice approach
Includes: Bronchoscopy [without biopsy]
that done using flexible, rigid or fiberoptic endoscope
that through existing artificial stoma

2.GM.70.LA using open approach

2.GM.71.^ ^ Biopsy, bronchus**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Code Also: Any associated transbronchial lymph node biopsy (see [2.ME.71.^ ^](#))

2.GM.71.BA using endoscopic per orifice approach
Includes: Bronchoscopy with bronchial tissue biopsy

2.GM.71.BP using endoscopic per orifice approach with needle aspiration
Includes: Transbronchial needle aspiration [TBNA]

2.GM.71.BR using endoscopic per orifice approach with brushing/washing
Includes: Bronchoscopy with brush biopsy

2.GM.71.LA using open approach

2.GT.^^.^^ Diagnostic Interventions on the Lung NEC

Includes:

- Base of lung
- Borders and surface of lung
- Lobe of lung
- Multiple overlapping sites of lung
- Parenchyma of lung
- Pulmonary NOS

2.GT.21.^^ Capacity measurement, lung NEC

Includes:

- Measurement, functional residual capacity, lung
- Measurement, indirect volume, lung
- Measurement, residual volume, lung
- Plethysmography, body

2.GT.21.FR	using helium dilution method
2.GT.21.FS	using nitrogen washout method
2.GT.21.TU	using single breath nitrogen method (e.g. airway closing volume)
2.GT.21.ZZ	using technique NEC

2.GT.70.^^ Inspection, lung NEC**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Excludes: Reopening of recent thoracotomy site for inspection (see [2.GY.70.^^](#))

2.GT.70.LA	using open approach
------------	---------------------

2.GT.71.^ ^ Biopsy, lung NEC**L** 72

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 72	Mandatory	Bilaterality Mandatory	Location	B	Bilateral
				L	Left
				R	Right
				U	Unilateral unspecified

2.GT.71.BA	using endoscopic per orifice approach
	Includes: Bronchoscopy with lung tissue biopsy
2.GT.71.BP	using endoscopic per orifice approach and needle aspiration
	Includes: Transbronchial needle aspiration [TBNA]
2.GT.71.DA	using endoscopic approach [VATS]
2.GT.71.HA	using percutaneous (needle) approach
2.GT.71.LA	using open approach

2.GV.^ ^.^ Diagnostic Interventions on the Pleura

Includes:

- Parietal pleura
- Pleural cavity
- Pleural space
- Visceral pleura

2.GV.70.^ ^ Inspection, pleura

Excludes: Reopening of recent thoracotomy site for inspection (see [2.GY.70.^ ^](#))

2.GV.70.DA	using endoscopic approach [VATS]
	Includes: Pleuroscopy
2.GV.70.LA	using open approach

2.GV.71.^ ^ Biopsy, pleura

Excludes: that for aspiration of pleural fluid (see [1.GV.52.^ ^](#))

2.GV.71.DA	using endoscopic approach [VATS]
2.GV.71.HA	using percutaneous (needle) approach
2.GV.71.LA	using open approach

2.GW.^.^ Diagnostic Interventions on the Mediastinum

Includes:	Anterior mediastinum Inferior mediastinum Mediastinal wall and cavity Middle mediastinum Posterior mediastinum Superior mediastinum
Excludes:	Blood vessels of mediastinal region (see 2.JY.^.^) Chest wall (see 2.SZ.^.^) Lymphatic structures of mediastinal region (see 2.ME.^.^) Pleural cavity (see 2.GV.^.^)

2.GW.70.^.^ Inspection, mediastinum

2.GW.70.DA	using endoscopic approach [VATS] Includes: Mediastinoscopy
2.GW.70.LA	using open approach Includes: that done by anterior mediastinotomy

2.GW.71.^.^ Biopsy, mediastinum

Code Also:	Any concomitant biopsy of lymph nodes
2.GW.71.BP	using endoscopic per orifice approach with needle aspiration Includes: Transbronchial needle aspiration [TBNA]
2.GW.71.DA	using endoscopic approach [VATS] Includes: that by mediastinoscopy
2.GW.71.HA	using percutaneous (needle) approach
2.GW.71.LA	using open approach Includes: that done by anterior mediastinotomy

2.GX.^.^ Diagnostic Interventions on the Diaphragm**2.GX.71.^.^ Biopsy, diaphragm**

2.GX.71.DA	using endoscopic approach
2.GX.71.LA	using open approach

2.GY.^.^ Diagnostic Interventions on the Thoracic cavity NEC

Includes:	Chest NOS Sinuses/fistulous tract
Excludes:	Chest wall (see 2.SZ.^.^)

2.GY.70.^.^ Inspection, thoracic cavity NEC

Includes:	Reopening of recent thoracotomy for examination
2.GY.70.DA	using endoscopic approach [VATS] Includes: Thoracoscopy, transpleural
2.GY.70.LA	using open approach

2.GZ.^.^ Diagnostic Interventions on the Respiratory System NEC**2.GZ.08.^.^ Test, respiratory system**

Includes:	Score, Apgar
2.GZ.08.NB	using scale

2.GZ.21.^.^ Capacity measurement, respiratory system

Includes:	Measurement, breathing capacity (maximum, total) Spirometry
Excludes:	Measurement of residual (indirect) lung volume (see 2.GT.21.^.)
Note:	Often involves baseline spirometry with multiple spirometric determinations following administration of each challenge/chemical agent.
2.GZ.21.EA	total capacity determination only(inspired and expired pressures)
2.GZ.21.EB	total capacity with timed forced expiratory capacity
2.GZ.21.EC	total capacity with timed forced expiratory capacity and peak flow rate
2.GZ.21.ED	total capacity with timed forced expiratory capacity and peak flow rate with maximal voluntary ventilation
2.GZ.21.EF	maximal voluntary ventilation only (maximum breathing capacity)
2.GZ.21.EG	flow volume loops
2.GZ.21.EH	with bronchospasm evaluation following use of bronchodilator
2.GZ.21.EJ	with bronchospasm evaluation following exercise
2.GZ.21.EK	with bronchospasm evaluation following prolonged exposure to aerosol bronchodilator antigen, cold air, histamine, methyl-choline, or other chemical agent

2.GZ.29.^ ^ Other measurement NEC, respiratory system**M** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
M 2	Optional	Type of delivery 2	Location	D I	Direct delivery (health care provider is face to face with client)
				I N	Indirect (service delivered at a distance e.g. telephone, telemedicine with health care provider not physically present with client)

Includes: Monitoring, breathing
Monitoring, respiration (function)

2.GZ.29.ZZ using technique NEC

2.GZ.58.^ ^ Function study, respiratory system

Includes: Measurement, carbon dioxide (diffusing capacity)
Measurement, oxygen saturation
Oximetry (pulse, ear)
Response, breathing
Response, hypoxia
Study, expired gas (carbon dioxide)

2.GZ.58.TA at rest (steady state)
2.GZ.58.TP with exercise (e.g. walking)
2.GZ.58.TU by single breath
2.GZ.58.TX at decreased concentration
2.GZ.58.TY at increased concentration (uptake)
2.GZ.58.ZZ by other technique NEC

Diagnostic Interventions on the Cardiovascular System (2HA - 2LZ)

Diagnostic Interventions on the Heart (and related structures) (2HA - 2HZ)

2.HZ.^.^ Diagnostic Interventions on the Heart NEC

Includes: Combined right and left heart
Heart NOS
Heart tissue NEC

2.HZ.07.^.^ Analysis/Evaluation, heart NEC

M²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
M 2	Optional	Type of delivery 2	Location	D I	Direct delivery (health care provider is face to face with client)
				I N	Indirect (service delivered at a distance e.g. telephone, telemedicine with health care provider not physically present with client)

Includes: Adjustment, cardiac pacemaker
Analysis (electronic), cardiac pacemaker
Assessment, cardiac pacemaker function (with or without reprogramming)
Programming, cardiac pacemaker
Reprogramming, cardiac pacemaker

Excludes: Replacement of battery, cardiac pacemaker (see [1.YY.54.^.](#))

2.HZ.07.NK	dual chamber rate responsive pacemaker
2.HZ.07.NL	chamber fixed rate pacemaker
2.HZ.07.NM	single chamber rate responsive pacemaker
2.HZ.07.NR	cardioverter/defibrillator

2.HZ.08.^.^ Test, heart NEC

Includes:	Test, cardiac stress Test, cardiac tolerance (for exercise, physical exertion) Test, cardiovascular stress Test, treadmill
Code Also:	Any concomitant cardiac catheterization for ECG study (see 2.HZ.24.^.^) Any concomitant diagnostic nuclear (imaging) study, heart with coronary arteries (see 3.IP.70.^.^) Any concomitant respiratory metabolic analysis (see 2.GZ.58.^.^) Any concomitant spirometry (see 2.GZ.21.^.^)
Note:	Usually involves ECG (resting, exertion), blood pressure and oxygen saturation measurements taken during exercise test.
2.HZ.08.EJ	with physical exercise [e.g. bicycle, treadmill] alone
2.HZ.08.EK	with pharmacological stress
2.HZ.08.XK	with provocation test [e.g. Acetylcholine, Ergonovine]

2.HZ.21.^.^ Capacity measurement, heart NEC

Includes:	Measurement, blood volume, expelled by heart Measurement, cardiac oxygen consumption Monitor, cardiac output
Excludes:	Study, cardiac output, with radionuclide (see 3.IP.70.^.^)
2.HZ.21.UC	using oxygen consumption technique Includes: Monitoring/measuring consumption of oxygen [e.g. Fick method]
2.HZ.21.UD	using thermodilution technique Includes: Injection of cold dextrose and monitoring its disappearance using a temperature sensitive catheter
2.HZ.21.ZZ	using technique NEC

2.HZ.23.^.^ Sound (wave) measurement, heart NEC

Includes:	Apex cardiogram with phonocardiogram Phonocardiography with electrocardiography (ECG) Phonocatheterization, cardiac
2.HZ.23.GP-TS	with intra-cardiac insertion of phonocatheter
2.HZ.23.JA-KF	with ECG lead and apex cardiogram
2.HZ.23.JA-XJ	with ECG lead

2.HZ.24.^ ^ Electrophysiological measurement, heart NEC**L** 68 **E** 28

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 68	Optional	Heart parameters	Location	A P	Intra-atrial
				A V	Intra-atrial and intra-ventricular
				B H	Bundle of His alone
				U	Unspecified (NOS)
				V E	Intra-ventricular
E 28	Optional	Dx measure parameter	Extent	R A	Recording and analysis
				R C	Receipt (analysis) only
				T R	Transmission (recording) only

Includes: 3-D cardiac mapping system to facilitate complex cardiac ablation (for atrial fibrillation and ventricular tachycardia)
 Catheterization, cardiac, for electrocardiography
 Electrocardiography (ECG)
 Insertion, cardiac subcutaneous event recorder
 Insertion, recording electrodes, heart (intra atrial, intra ventricular)

Excludes: that done with insertion of pacemaker (see [1.HZ.53.^ ^](#))
 that done with phonocardiogram (see [2.HZ.23.^ ^](#))

2.HZ.24.^ ^ Electrophysiological measurement, heart NEC	external application	percutaneous transluminal [cardiac catheterization] insertion	percutaneous (subcutaneous) insertion
using apex cardiogram	2.HZ.24.JA-KF Excludes: • that done as part of sleep studies (see 2.AN.59.^ ^) • that done for cardiac stress test (see 2.HZ.08.^ ^)	—	—
using 3-D cardiac mapping (of tachycardia sites)	—	2.HZ.24.GP-KM Code Also: • Any concomitant cardiac ablation (see 1.HH.59.^ ^)	—
using holter monitor [ambulatory ECG]	2.HZ.24.JA-KH Excludes: • that done as part of sleep studies (see 2.AN.59.^ ^) • that done for cardiac stress test (see 2.HZ.08.^ ^)	—	—

2.HZ.24.^E Electrophysiological measurement, heart NEC	external application	percutaneous transluminal [cardiac catheterization] insertion	percutaneous (subcutaneous) insertion
using recording electrodes [or ECG NOS]	2.HZ.24.JA-XJ Excludes: <ul style="list-style-type: none"> that done as part of sleep studies (see 2.AN.59.^E) that done for cardiac stress test (see 2.HZ.08.^E) 	2.HZ.24.GP-XJ	2.HZ.24.HA-XJ Includes: <ul style="list-style-type: none"> Insertion, subcutaneous (cardiac) event recorder
using rhythm strips [rhythm electrocardiogram]	2.HZ.24.JA-KE Excludes: <ul style="list-style-type: none"> that done as part of sleep studies (see 2.AN.59.^E) that done for cardiac stress test (see 2.HZ.08.^E) 	—	—
using stimulation pacing electrodes alone	—	2.HZ.24.GP-KJ	—
using stimulation pacing electrodes with recording	—	2.HZ.24.GP-KL	—
using tilt table test with pharmacological agent	2.HZ.24.JA-KP Excludes: <ul style="list-style-type: none"> that done as part of sleep studies (see 2.AN.59.^E) that done for cardiac stress test (see 2.HZ.08.^E) 	—	—
using tilt table	2.HZ.24.JA-KT Excludes: <ul style="list-style-type: none"> that done as part of sleep studies (see 2.AN.59.^E) that done for cardiac stress test (see 2.HZ.08.^E) 	—	—
using vector loops [vector cardiogram]	2.HZ.24.JA-KG Excludes: <ul style="list-style-type: none"> that done as part of sleep studies (see 2.AN.59.^E) that done for cardiac stress test (see 2.HZ.08.^E) 	—	—

2.HZ.29.^ ^ Other measurement NEC, heart NEC**M** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
M 2	Optional	Type of delivery 2	Location	D I	Direct delivery (health care provider is face to face with client)
				I N	Indirect (service delivered at a distance e.g. telephone, telemedicine with health care provider not physically present with client)

2.HZ.29.GP-TS	using percutaneous transluminal approach and balloon catheter
	Includes: Cardiac catheterization for balloon sizing of atrial septal defect or patent foramen ovale [e.g. Amplatzer Sizing Balloon]
	Excludes: that performed with concomitant repair of atrial septal defect [ASD] or patent foramen ovale [PFO] (see 1.HN.80.^ ^)
2.HZ.29.ZZ	using technique NEC
	Includes: Monitoring, heart function

2.HZ.70.^ ^ Inspection, heart NEC

Includes:	Inspection, (external structures of) heart [e.g. endocardium, epicardium, myocardium, pericardium] Inspection, (internal structures of) heart [e.g. valves, atrium, ventricle]
Excludes:	Inspection of aorta only (see 2.ID.70.^ ^) Inspection of coronary vessels only (see 2.IL.70.^ ^) that with angiography of heart with coronary arteries (see 3.IP.10.^ ^) that with cardiography of heart (see 3.IP.10.^ ^)

2.HZ.70.DA	using endoscopic approach (e.g. thoroscopic, VAT)
2.HZ.70.GP	using percutaneous transluminal approach
2.HZ.70.LA	using open approach

2.HZ.71.^ ^ Biopsy, heart NEC

Includes:	Biopsy, atrium of heart Biopsy, endocardium Biopsy, epicardium Biopsy, myocardium Biopsy, pericardium Biopsy, ventricle of heart Catheterization, cardiac for biopsy (internal structures) of heart
Excludes:	Biopsy of coronary arteries (see 2.IL.71.^ ^) Biopsy, aorta (see 2.ID.71.^ ^)

2.HZ.71.DA	using endoscopic approach
2.HZ.71.GP	using percutaneous transluminal approach (cardiac catheterization)
2.HZ.71.HA	using percutaneous (needle) approach
2.HZ.71.LA	using open approach

Diagnostic Interventions on the Great Vessels (2ID - 2IM)

2.ID.^.^ Diagnostic Interventions on the Aorta

Includes: Aorta NOS
Overlapping sites of aorta [thoracoabdominal aorta]

2.ID.70.^.^ Inspection, aorta

L 3

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 3	Optional	Aorta	Location	A B	Abdominal aorta
				A R	Arch of aorta
				A S	Ascending aorta
				A Z	Aorta NEC (or overlapping sites of aorta)
				T H	Thoracic aorta

Includes: Inspection of arch of aorta
Inspection of ascending, thoracic [descending], or abdominal aorta

2.ID.70.DA using endoscopic approach
2.ID.70.GP using percutaneous transluminal approach
Includes: Percutaneous angioscopy, aorta NEC
2.ID.70.LA using open approach

2.ID.71.^.^ Biopsy, aorta

L 3

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 3	Optional	Aorta	Location	A B	Abdominal aorta
				A R	Arch of aorta
				A S	Ascending aorta
				A Z	Aorta NEC (or overlapping sites of aorta)
				T H	Thoracic aorta

Includes: Biopsy of arch of aorta
Biopsy of ascending, thoracic [descending], or abdominal aorta

2.ID.71.DA using endoscopic approach
2.ID.71.GP using percutaneous transluminal approach
2.ID.71.LA using open approach

2.IJ.^^.^^ Diagnostic Interventions on the Coronary Arteries

Includes: Right and left coronary arteries and all tributaries [circumflex, left anterior descending, right marginal branch]

2.IJ.57.^^ Flow study, coronary arteries

Includes: Measurement, coronary blood volume
Monitoring, coronary artery blood flow

Excludes: that done using ultrasound with Doppler (see [3.IP.30.^^](#))
that with diagnostic nuclear imaging study (see [3.IP.70.^^](#))

2.IJ.57.GQ using percutaneous transluminal arterial approach
Includes: Fractional flow reserve [FFR]
Code Also: any coronary angiography (see [3.IP.10.^^](#))
2.IJ.57.ZZ using technique NEC

2.IL.^^.^^ Diagnostic Interventions on the Vessels of Heart

Includes: Coronary arteries and/or veins

2.IL.70.^^ Inspection, vessels of heart

Includes: Inspection of coronary arteries and/or veins

2.IL.70.DA using endoscopic approach
2.IL.70.GP using percutaneous transluminal approach
Includes: Percutaneous angioscopy, vessels of heart NEC
2.IL.70.LA using open approach

2.IL.71.^.^ Biopsy, vessels of heart

Includes: Biopsy of coronary arteries and/or veins

2.IL.71.DA	using endoscopic approach
2.IL.71.GP	using percutaneous transluminal approach
2.IL.71.LA	using open approach

2.IM.^.^.^ Diagnostic Interventions on the Pulmonary Artery

Includes: Ductus arteriosus
Pulmonary artery [main, right, left]
Pulmonary artery bifurcation

2.IM.28.^.^ Pressure measurement, pulmonary artery

Includes: Catheterization, Swan Ganz
Monitoring, blood pressure, pulmonary artery
Monitoring, pulmonary wedge (artery, capillary)
Right cardiac catheterization for pulmonary artery pressure measurement
that with or without fluoroscopy
that with pressure measurement in the right atrium and ventricle, vena cava, pulmonary artery and pulmonary wedge (with or without left atrial pressure)

Note: Involves insertion of catheter through right atria and ventricle into pulmonary artery to monitor pulmonary artery pressure

2.IM.28.GP-PL	using percutaneous transluminal venous (antegrade) approach and pressure measuring device (e.g. Swan Ganz)
---------------	--

Diagnostic Interventions on the Upper Body Vessels (2JE - 2JZ)

2.JE.^.^ Diagnostic interventions on the carotid artery NEC

Includes: Carotid bifurcation
Common carotid arteries
External carotid arteries
Internal carotid arteries

2.JE.57.^.^ Flow study carotid artery NEC

Includes: Carotid occlusion tolerance test

2.JE.57.GQ-PL using arterial percutaneous transluminal catheter (e.g. systemic arterial pressure monitor device)

2.JW.^.^ Diagnostic Interventions on the Intracranial Vessels

Includes: Anterior choroidal vessels
Basilar arteries
Cerebellar vessels
Cerebral vessels [anterior, middle, posterior communicating]
Circle of Willis
Dural venous sinuses [superior sagittal sinus, inferior sagittal sinus, straight sinus, transverse sinuses, sigmoid sinuses, cavernous sinuses, superior petrosal sinuses, inferior petrosal sinuses]
Intracranial vessels NOS
Meningeal vessels [anterior, posterior]
Ophthalmic vessels
Pontine artery

2.JW.70.^.^ Inspection, intracranial vessels

Includes: Inspection of Circle of Willis, cerebral vessels [anterior, middle, posterior communicating], meningeal vessels [anterior, posterior], cerebellar vessels, pontine artery, other intracranial vessels

Excludes: Inspection of extracranial vessels (see [2.JX.70.^.^](#))

2.JW.70.GP using percutaneous transluminal approach

Includes: Percutaneous angioscopy, intracranial vessels NEC

2.JW.71.^.^ Biopsy, intracranial vessels

Includes: Biopsy of Circle of Willis, cerebral vessels [anterior, middle, posterior communicating], meningeal vessels [anterior, posterior], cerebellar vessels, pontine artery, other intracranial vessels

Excludes: Biopsy of extracranial vessels (see [2.JX.71.^.](#))

2.JW.71.GP using percutaneous transluminal approach

2.JX.^.^.^ Diagnostic Interventions on the Other Vessels of Head, Neck and Spine NEC

Includes: Ascending pharyngeal vessels
Caroticotympanic vessels
Cavernous vessels
Extracranial vessels NEC
Facial and occipital vessels
Ganglionic vessels
Hypophyseal vessels
Jugular veins
Lingual
Maxillary vessels
Posterior auricular vessels
Pterygoid vessels
Subclavian vessels (of neck)
Superficial temporal vessels
Superior thyroid vessels
Vertebral vessels

2.JX.70.^.^ Inspection, other vessels of head, neck and spine NEC

Includes: Inspection of extracranial vessels, vertebral vessels, carotid arteries, jugular veins, other vessels of head and neck region

Excludes: Inspection of intracranial vessels (see [2.JW.70.^.](#))

2.JX.70.DA using endoscopic approach

2.JX.70.GP using percutaneous transluminal approach

Includes: Percutaneous angioscopy, vessels of head and neck

2.JX.70.LA using open approach

2.JX.71.^.^ Biopsy, other vessels of head, neck and spine NEC

Includes: Biopsy of extracranial vessels, temporal artery, vertebral vessels, carotid arteries, jugular veins, other vessels of head and neck region

Excludes: Biopsy of intracranial vessels (see [2.JW.71.^.](#))

2.JX.71.DA	using endoscopic approach
2.JX.71.GP	using percutaneous transluminal approach
2.JX.71.LA	using open approach

2.JY.^.^.^ Diagnostic Interventions on the Thoracic Vessels NEC

Includes: Anterior intercostal vessels
Brachiocephalic arteries
Bronchial vessels
Esophageal vessels
Internal mammary artery
Mediastinal vessels
Pulmonary vein
Sternal vessels
Superior epigastric vessels
Vena cava (superior and inferior)

2.JY.70.^.^ Inspection, thoracic vessels NEC

Includes: Inspection of pulmonary artery/vein, vena cava, internal [thoracic] artery, brachiocephalic vessels, innominate artery, other vessels of thoracic region

Excludes: Inspection of aorta (see [2.ID.70.^.](#))
Inspection of coronary vessels (see [2.IL.70.^.](#))

2.JY.70.DA	using endoscopic approach
2.JY.70.GP	using percutaneous transluminal approach
	Includes: Percutaneous angioscopy, thoracic vessels NEC
2.JY.70.LA	using open approach

2.JY.71.^.^ Biopsy, thoracic vessels NEC

Includes: Biopsy of pulmonary artery/vein, vena cava, internal [thoracic] artery, brachiocephalic vessels, innominate artery, other vessels of thoracic region

Excludes: Biopsy of aorta (see [2.ID.71.^.](#))
Biopsy of coronary vessels (see [2.IL.71.^.](#))

2.JY.71.DA	using endoscopic approach
2.JY.71.GP	using percutaneous transluminal approach
2.JY.71.LA	using open approach

2.JZ.^.^.^ Diagnostic Interventions on the Vessels of Arm NEC

Includes: Arteries and/or veins of arm

2.JZ.28.^.^ Pressure measurement, vessels of arm NEC**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Measurement, digital blood pressure, fingers

Excludes: Blood pressure measurement (e.g. by cuff on arm) (see [2.LZ.28.^.](#))

2.JZ.28.JA-CP	using cold pressor test
2.JZ.28.ZZ	using technique NEC

2.JZ.29.^.^ Other measurement NEC, vessels of arm NEC

Includes: Test, skin PtcO₂ (segmental)
TPCO₂
Transcutaneous oxygen tension measurement (TCOM)

2.JZ.29.TA	at rest
2.JZ.29.TP	with pre and post exercise

2.JZ.70.^.^ Inspection, vessels of arm NEC**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Inspection of axillary vessels, brachial vessels, radial vessels, ulnar vessels, palmar carpal branch vessels, other upper limb vessels

2.JZ.70.DA using endoscopic approach

2.JZ.70.GP using percutaneous transluminal approach

Includes: Percutaneous angioscopy, vessels of arm

2.JZ.70.LA using open approach

2.JZ.71.^.^ Biopsy, vessels of arm NEC**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Biopsy of axillary vessels, brachial vessels, radial vessels, ulnar vessels, palmar carpal branch vessels, other upper limb vessels

2.JZ.71.DA using endoscopic approach

2.JZ.71.GP using percutaneous transluminal approach

2.JZ.71.LA using open approach

Diagnostic Interventions on the Lower Body Vessels (2KE - 2KT)

2.KE.^.^ Diagnostic Interventions on the Abdominal Arteries

Includes:	Abdominal arteries NEC Celiac arteries Common iliac arteries Gastric arteries Gastroepiploic arteries Hepatic arteries Inferior phrenic arteries Mesenteric arteries [inferior, superior] Mesenteric artery with aorta Renal arteries Splenic arteries Umbilical arteries
------------------	--

2.KE.70.^.^ Inspection, abdominal arteries

Includes:	Inspection of celiac, gastric, hepatic, common iliac, mesenteric, renal, splenic, or other abdominal arteries
Excludes:	Inspection of abdominal aorta (see 2.ID.70.^.) Inspection of internal and external portions of iliac arteries (see 2.KT.70.^.)

2.KE.70.DA	using endoscopic approach
2.KE.70.GP	using percutaneous transluminal approach
	Includes: Percutaneous angioscopy, abdominal arteries NOS
2.KE.70.LA	using open approach

2.KE.71.^.^ Biopsy, abdominal arteries

Includes:	Biopsy of celiac, gastric, hepatic, common iliac, mesenteric, renal, splenic, or other abdominal arteries
Excludes:	Biopsy of abdominal aorta (see 2.ID.71.^.) Biopsy of internal and external portions of iliac arteries (see 2.KT.71.^.)

2.KE.71.DA	using endoscopic approach
2.KE.71.GP	using percutaneous transluminal approach
2.KE.71.LA	using open approach

2.KG.^.^ Diagnostic Interventions on Arteries of the Leg NEC

Includes: Dorsalis pedis arteries
Femoral arteries
Lower limb arteries NEC
Popliteal arteries
Tibial arteries [anterior, posterior]

2.KG.21.^ Capacity measurement, arteries of leg NEC**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Photoplethysmography (PPS), arteries of leg NEC
Plethysmography, arteries of leg NEC

2.KG.21.ZZ using technique NEC

2.KG.28.^ Pressure measurement, arteries of leg NEC**E**²⁵

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 25	Optional	Time parameter 1	Extent	C M	Comprehensive
				L T	Limited (brief)

Includes: Measurement, digital blood pressure (segmental), toes

2.KG.28.TP pre and post exercise or hyperemia test
2.KG.28.ZZ technique NEC

2.KG.29.^ ^ Other measurement NEC, arteries of leg NEC

Includes: Test, skin PtcO₂ (segmental)
 TPC02
 Transcutaneous oxygen tension measurement (TCOM)

2.KG.29.TA at rest
 2.KG.29.TP with pre and post-exercise

2.KG.70.^ ^ Inspection, arteries of leg NEC**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

2.KG.70.DA using endoscopic approach
 2.KG.70.GP using percutaneous transluminal approach
Includes: percutaneous angiography, femoral artery
 2.KG.70.LA using open approach

2.KG.71.^ ^ Biopsy, arteries of leg NEC**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

2.KG.71.DA using endoscopic approach
 2.KG.71.GP using percutaneous transluminal approach
 2.KG.71.LA using open approach

2.KQ.^.^ Diagnostic Interventions on the Abdominal Veins

Includes: Abdominal veins NOS
Common iliac veins
Hepatic veins
Mesenteric veins [superior, inferior]
Portal veins
Renal veins
Splenic veins
Suprarenal veins
Visceral veins

2.KQ.70.^.^ Inspection, abdominal veins

Includes: Inspection of common iliac, portal, hepatic, mesenteric, renal, splenic, visceral or other abdominal veins

Excludes: Inspection of internal and external portions of iliac veins (see [2.KT.70.^.](#))

2.KQ.70.DA using endoscopic approach

2.KQ.70.LA using open approach

2.KQ.71.^.^ Biopsy, abdominal veins

Includes: Biopsy of common iliac, portal, hepatic, mesenteric, renal, splenic, visceral or other abdominal veins

Excludes: Biopsy of internal and external portions of iliac veins (see [2.KT.71.^.](#))

2.KQ.71.DA using endoscopic approach

2.KQ.71.GP using percutaneous transluminal approach

2.KQ.71.LA using open approach

2.KR.^.^ Diagnostic Interventions on the Veins of Leg NEC

Includes: Femoral veins
Lower limb veins NOS
Perforator veins
Peroneal veins
Popliteal veins
Saphenous veins
Tibial veins [anterior, posterior]

2.KR.21.^.^ Capacity measurement, veins of leg NEC**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Photoplethysmography (PPS), veins of leg
Plethysmography, veins of leg

2.KR.21.JW air (cuff) plethysmography
2.KR.21.JX venous outflow impedance plethysmography
2.KR.21.JY venous outflow Strain-Gauge plethysmography
2.KR.21.ZZ using technique NEC

2.KR.71.^.^ Biopsy, veins of leg NEC**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

2.KR.71.DA using endoscopic approach
2.KR.71.GP using percutaneous transluminal approach
2.KR.71.LA using open approach

2.KT.^.^.^ Diagnostic Interventions on the Vessels of the Pelvis, Perineum and Gluteal Region

Includes: Epigastric vessels
Internal and external portion of iliac vessels
Internal pudendal artery
Uterine, vaginal, rectal, obturator, penile and pelvic vessels NEC
Vesical vessels

Excludes: Common iliac arteries (see [2.KE.^.^](#))

2.KT.70.^ ^ Inspection, vessels of the pelvis perineum and gluteal region

Includes: Inspection, iliac blood vessels (internal and external portion of)
 Inspection, obturator blood vessels
 Inspection, penile blood vessels
 Inspection, rectal blood vessels
 Inspection, uterine blood vessels
 Inspection, vaginal blood vessels
 Inspection, vesical blood vessels

Excludes: Inspection of common iliac arteries (see [2.KE.70.^ ^](#))
 Inspection, anal cushion (see [2.NT.70.^ ^](#))
 Inspection, of common iliac veins (see [2.KQ.70.^ ^](#))

2.KT.70.DA	using endoscopic approach
2.KT.70.GP	using percutaneous transluminal approach
	Includes: Percutaneous angioscopy, pelvis, perineum and gluteal region
2.KT.70.LA	using open approach

2.KT.71.^ ^ Biopsy, vessels of the pelvis perineum and gluteal region

Includes: Biopsy, iliac blood vessels (internal and external portion of)
 Biopsy, obturator blood vessels
 Biopsy, penile blood vessels
 Biopsy, rectal blood vessels
 Biopsy, uterine blood vessels
 Biopsy, vaginal blood vessels
 Biopsy, vesical blood vessels

Excludes: Biopsy, common iliac arteries (see [2.KE.71.^ ^](#))
 Biopsy, common iliac veins (see [2.KQ.71.^ ^](#))

2.KT.71.DA	using endoscopic approach
2.KT.71.GP	using percutaneous transluminal approach
2.KT.71.LA	using open approach

Diagnostic Interventions on the Circulatory System (2LZ)

2.LZ.^.^ Diagnostic Interventions on the Circulatory System NEC

Includes: Blood

2.LZ.28.^.^ Pressure measurement, circulatory system NEC

M 2 **E** 27

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
M 2	Optional	Type of delivery 2	Location	D I	Direct delivery (health care provider is face to face with client)
				I N	Indirect (service delivered at a distance e.g. telephone, telemedicine with health care provider not physically present with client)
E 27	Optional	Time parameter 2	Extent	C N	Continuous
				E P	Episodic

Includes: Monitoring, blood pressure (peripheral, cuff)
Monitoring, blood pressure, central venous
Monitoring, blood pressure, systemic arterial
Monitoring, pulse rate

Excludes: Flow study (occlusion tolerance), carotid artery (see [2.JE.57.^.](#))

2.LZ.28.GP-PL	percutaneous transluminal approach using pressure monitoring device
	Code Also: Any insertion of central venous catheter [CVC] (see 1.IS.53.^.)
2.LZ.28.HA-PL	percutaneous approach (to tunnel subcutaneously) using pressure monitoring device
2.LZ.28.JA	using manual (digital pressure) technique (e.g. taking pulse rate)
2.LZ.28.JA-PL	using externally applied pressure measuring device [e.g. cuff sphygmomanometer]

Diagnostic Interventions on the Lymphatic System (2MA - 2MZ)

2.MA.^.^ Diagnostic Interventions on the Lymph Nodes, Head Region

Includes:

- Buccal nodes
- Facial nodes
- Occipital nodes
- Parotid nodes
- Postauricular [retroauricular] nodes
- Preauricular [anterior auricular] nodes

2.MA.71.^.^ Biopsy, lymph node(s), head region

E 70

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 70	Mandatory	Mandatory Lymph Node Involvement 2	Extent	S N	Sentinel node(s)
				U	Unspecified
				Z	Other

2.MA.71.HA using percutaneous (needle) approach

2.MA.71.LA using open approach

Includes: Excision of one or two nodes of head region for diagnostic testing

2.MC.^.^ Diagnostic Interventions on the Cervical Lymph Nodes

Includes:

- Cervical nodes [superficial and deep]
- Level I nodes [submandibular and submental trigone]
- Level II nodes [upper jugular], level III nodes [middle jugular]
- Level IV nodes [lower jugular]
- Level V nodes [posterior triangle including spinal accessory, transverse cervical and supraclavicular nodes]
- Level VI nodes [anterior/central compartment including paratracheal, pretracheal, parathyroid, precricoid, Delphian and prelaryngeal nodes located above the suprasternal notch]
- Retropharyngeal nodes

2.MC.71.^.^ Biopsy, lymph node(s), cervical**E** 70

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 70	Mandatory	Mandatory Lymph Node Involvement 2	Extent	S N	Sentinel node(s)
				U	Unspecified
				Z	Other

Includes: Biopsy, (superficial) (deep) cervical nodes

2.MC.71.HA using percutaneous (needle) approach
 2.MC.71.LA using open approach

Includes: Excision of one or two nodes of neck region for diagnostic testing

2.MD.^.^.^ Diagnostic Interventions on the Axillary Lymph Nodes

Includes: Apical nodes [subclavicular]
 Central nodes
 Deep axillary nodes
 Lateral nodes
 Pectoral nodes
 Subscapular nodes
 Superficial axillary nodes

2.MD.71.^.^ Biopsy, lymph node(s), axillary**E** 70

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 70	Mandatory	Mandatory Lymph Node Involvement 2	Extent	S N	Sentinel node(s)
				U	Unspecified
				Z	Other

Includes: Sampling, axillary nodes

2.MD.71.HA using percutaneous (needle) approach
 2.MD.71.LA using open approach

Includes: Excision of one or two axillary nodes for diagnostic testing

2.ME.^.^ Diagnostic Interventions on the Mediastinal Lymph Nodes

- Includes:** Anterior and posterior mediastinal nodes
 Aortic nodes [subaortic and para-aortic nodes of the ascending aorta and aortic arch]
 Inferior mediastinal nodes [subcarinal, paraesophageal and pulmonary ligament nodes]
 Superior mediastinal nodes [pre-tracheal, upper paratracheal, pre-carinal and lower paratracheal nodes located below the suprasternal notch]
 Tracheobronchial nodes [tracheal/paratracheal, deep and inferior tracheobronchial, bronchopulmonary and pulmonary]
- Excludes:** Mediastinal nodes with other intrathoracic nodes (see [2.MF.^.^](#))

2.ME.71.^ Biopsy, lymph node(s), mediastinal**E** 70

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 70	Mandatory	Mandatory Lymph Node Involvement 2	Extent	S N	Sentinel node(s)
				U	Unspecified
				Z	Other

- 2.ME.71.BP endoscopic per orifice approach with needle aspiration
Includes: Transbronchial needle aspiration [TBNA]
- 2.ME.71.DA using endoscopic approach
 2.ME.71.HA using percutaneous (needle) approach
 2.ME.71.LA using open approach
Includes: Excision of one or two mediastinal nodes for diagnostic testing

2.MF.^.^ Diagnostic Interventions on the Intrathoracic Lymph Nodes NEC

- Includes:** Diaphragmatic nodes
 Intercostal nodes
 Mediastinal nodes with other intrathoracic nodes
 Nodes of the thoracic organs
 Parasternal nodes [internal mammary]
 Parietal nodes of thoracic wall
- Excludes:** Mediastinal nodes (see [2.ME.^.^](#))

2.MF.71.^.^ Biopsy, lymph node(s), intrathoracic NEC**E** 70

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 70	Mandatory	Mandatory Lymph Node Involvement 2	Extent	S N	Sentinel node(s)
				U	Unspecified
				Z	Other

Excludes: Mediastinal lymph nodes (see [2.ME.71.^.^](#))

2.MF.71.BP using endoscopic per orifice approach with needle aspiration
Includes: Transbronchial needle aspiration [TBNA]

2.MF.71.DA using endoscopic approach
 2.MF.71.HA using percutaneous (needle) approach
 2.MF.71.LA using open approach

Includes: Excision of one or two intrathoracic nodes for diagnostic testing

2.MG.^.^.^ Diagnostic Interventions on the Intra Abdominal Lymph Nodes

Includes: Intraaortocaval nodes [preaortic, lateral aortic, periaortic nodes located below the diaphragm]
 Mesenteric nodes
 Nodes of the abdominal organs
 Paracaval nodes
 Retrocrural nodes
 Retroperitoneal nodes

2.MG.71.^.^ Biopsy, lymph node(s), intra abdominal**E** 70

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 70	Mandatory	Mandatory Lymph Node Involvement 2	Extent	S N	Sentinel node(s)
				U	Unspecified
				Z	Other

2.MG.71.DA using endoscopic approach
 2.MG.71.HA using percutaneous (needle) approach
 2.MG.71.LA using open approach

Includes: Excision of one or two intraabdominal nodes for diagnostic testing

2.MH.^.^ Diagnostic Interventions on the Pelvic Lymph Nodes

Includes:

- Circumflex nodes
- Common iliac nodes
- External iliac nodes
- Internal iliac nodes
- Intrapelvic nodes
- Obturator nodes
- Paracervical nodes
- Parametrial nodes
- Presymphysial nodes
- Sacral nodes

2.MH.71.^.^ Biopsy, lymph node(s), pelvic**E 70**

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 70	Mandatory	Mandatory Lymph Node Involvement 2	Extent	S N	Sentinel node(s)
				U	Unspecified
				Z	Other

2.MH.71.DA using endoscopic approach
 2.MH.71.HA using percutaneous (needle) approach
 2.MH.71.LA using open approach
Includes: Excision of one or two pelvic nodes for diagnostic testing

2.MJ.^.^ Diagnostic Interventions on the Inguinal Lymph Nodes

Includes:

- Inguinofemoral nodes
- Lymph nodes of groin region
- Superficial and deep inguinal nodes

Excludes:

- Femoral nodes alone (see [2.MK.^.^](#))

2.MJ.71.^.^ Biopsy, lymph node(s), inguinal**E** 70

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 70	Mandatory	Mandatory Lymph Node Involvement 2	Extent	S N	Sentinel node(s)
				U	Unspecified
				Z	Other

2.MJ.71.DA using endoscopic approach
 2.MJ.71.HA using percutaneous (needle) approach
 2.MJ.71.LA using open approach
Includes: Excision of one or two inguinal nodes for diagnostic testing

2.MK.^.^.^ Diagnostic Interventions on the Lymph Nodes of Extremity NEC

Includes: Antecubital nodes
 Anterior tibial nodes
 Brachial nodes
 Femoral nodes
 Other lower limb nodes
 Other upper limb nodes
 Popliteal nodes
 Tibial nodes

Excludes: Axillary nodes (see [2.MD.^.^.^](#))
 Inguinofemoral nodes (see [2.MJ.^.^.^](#))

2.MK.71.^.^ Biopsy, lymph node(s), extremity NEC**E** 70

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 70	Mandatory	Mandatory Lymph Node Involvement 2	Extent	S N	Sentinel node(s)
				U	Unspecified
				Z	Other

2.MK.71.HA using percutaneous (needle) approach
 2.MK.71.LA using open approach
Includes: Excision of one or two nodes from extremities for diagnostic testing

2.MM.^.^ Diagnostic Interventions on the Thoracic Duct

Excludes: Other lymphatic ducts of thoracic region (see [2.MZ.^.^](#))

2.MM.70.^.^ Inspection, thoracic duct

2.MM.70.DA	using endoscopic approach
2.MM.70.LA	using open approach
Includes: Exploration, thoracic duct, using cervical [thoracic] approach	

2.MZ.^.^ Diagnostic Interventions on the Lymphatic System

Includes: Lymphatic vessels NOS
Lymphatic vessels of the head and neck region, thoracic region, abdomen/pelvis, arm, leg

2.MZ.70.^.^ Inspection, lymphatic system

2.MZ.70.DA	using endoscopic approach
2.MZ.70.LA	using open approach
Includes: Lymphangiectomy for exploration	

2.MZ.71.^.^ Biopsy, lymphatic system

2.MZ.71.DA	using endoscopic approach
2.MZ.71.HA	using percutaneous (needle) approach
2.MZ.71.LA	using open approach

Diagnostic Interventions on the Digestive and Hepatobiliary Tracts and Other Sites within the Abdominal Cavity NEC (2NA - 2OZ)

Diagnostic Interventions on the Digestive System (2NA - 2NT)

2.NA.^.^ Diagnostic Interventions on the Esophagus

Includes:

- Anastomotic site of esophagus to stomach
- Cardiac orifice
- Cardioesophageal junction
- Esophagus [cervical, thoracic and abdominal]
- Notch
- Ostium

2.NA.02.^.^ Assessment (examination), esophagus

E 25

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 25	Optional	Time parameter 1	Extent	C M	Comprehensive
				L T	Limited (brief)

Includes: Swallowing evaluation [e.g. fiberoptic endoscopic evaluation of swallowing (FEES)]

Excludes: that with acid infusion test and/or pH measurements (see [2.NA.58.^.](#))

2.NA.02.ZZ using technique NEC

2.NA.28.^.^ Pressure measurement, esophagus

Includes:

- Manometry, esophageal
- Measurement, esophageal pressure
- Study, manometric, esophagus (with stomach)

2.NA.28.CA-PL using pressure measuring device NEC

2.NA.58.^ Function study, esophagus**E** 28

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 28	Optional	Dx measure parameter	Extent	R A	Recording and analysis
				R C	Receipt (analysis) only
				T R	Transmission (recording) only

Includes: Study, esophageal motility
Study, esophageal reflux
Study, gastroesophageal reflux

Excludes: Swallowing evaluation (observation) only (see [2.NA.02.^](#))
that using diagnostic nuclear imaging (see [3.NZ.70.^](#))
that using radionuclide (see [3.NZ.70.^](#))
Video fluoroscopic swallowing study (see [3.NA.12.^](#))

2.NA.58.TA	with pH measurements
2.NA.58.TA-JA	with pH measurements using intraluminal pH electrode probe (capsule, tube)
2.NA.58.XH	with acid infusion test (e.g. Bernstein, acid perfusion, acid reflux)
2.NA.58.XL	with acid infusion test and pH measurements
2.NA.58.XL-JA	with acid infusion and pH measurements using intraluminal pH electrode

2.NA.70.^ Inspection, esophagus

Includes: Esophagoscopy

Code Also: Any concomitant capsule placement for esophageal pH monitoring (see [2.NA.58.^](#))

Note: The laser assisted optical "biopsy" is a valid inclusion under inspection as no tissue is removed.

2.NA.70.BA	using endoscopic per orifice approach
2.NA.70.BN	using endoscopic per orifice approach and laser assisted optical "biopsy"
	Includes: Confocal laser endoscopy, esophagus

2.NA.71.^.^ Biopsy, esophagus

Excludes: Laser assisted optical biopsy done with inspection (see [2.NA.70.^.^](#))

2.NA.71.BA	using endoscopic per orifice approach
	Includes: that done through existing artificial stoma
2.NA.71.BP	using endoscopic per orifice needle aspiration
	Includes: Needle biopsy, esophagus
2.NA.71.BR	using endoscopic per orifice brushing/washing
	Includes: Brush biopsy, esophagus
2.NA.71.DA	using endoscopic [laparoscopic] approach
2.NA.71.HA	using percutaneous (needle) approach
2.NA.71.LA	using open approach

2.NF.^.^.^ Diagnostic Interventions on the Stomach

Includes: Body of stomach
Body of stomach with pylorus
Fundus of stomach
Gastric antrum
Pyloric antrum
Stomach NOS

Excludes: Cardiac orifice (see [2.NA.^.^.^](#))
Notch with or without esophagus (see [2.NA.^.^.^](#))
Ostium (see [2.NA.^.^.^](#))

2.NF.08.^.^ Test, stomach

Includes: Test, gastric saline load

2.NF.08.ZZ	using technique NEC
------------	---------------------

2.NF.21.^.^ Capacity measurement, stomach

Includes: Aspiration, gastric content, for volume measurement

Excludes: Aspiration, gastric content, for secretion study (see [2.NF.58.^.^](#))

Code Also: Any therapeutic drainage or suction of stomach contents (see [1.NF.52.^.^](#))

Note: Involves recording total amount of gastric content aspirated or removed (collected from drainage).

2.NF.21.CA-QN	using per orifice suction device
---------------	----------------------------------

2.NF.58.^ ^ Function study, stomach

Includes: Aspiration, stomach content, for secretion study
Study, gastric secretion

Excludes: Drainage of gastric content for therapeutic effect (see [1.NF.52.^ ^](#))

2.NF.58.BA using endoscopic per orifice approach (or via stoma)

2.NF.58.BA-A0 using endoscopic per orifice approach following administration of gastric secretion stimulant (e.g. histamine)

2.NF.70.^ ^ Inspection, stomach

Includes: Gastroscopy

2.NF.70.BA using endoscopic per orifice approach

2.NF.70.BN using endoscopic per orifice approach and laser assisted optical "biopsy"

Includes: Confocal laser gastroscopy

2.NF.71.^ ^ Biopsy, stomach

Includes: Biopsy, pylorus

Excludes: Laser assisted optical biopsy (see inspection [2.NF.70.^ ^](#))

2.NF.71.BA using endoscopic per orifice approach (or via stoma)

2.NF.71.BP using endoscopic per orifice with needle (aspiration) biopsy

2.NF.71.BR using endoscopic per orifice with brush biopsy or gastric washing

2.NF.71.DA using endoscopic [laparoscopic] approach

2.NF.71.HA using percutaneous (needle) approach

2.NF.71.LA using open approach

2.NK.^ ^.^ ^ Diagnostic Interventions on the Small Intestine

Includes: Anastomotic site of stomach to small intestine and small intestine to small intestine
Duodenum
Jejunum and ileum
Meckel's diverticulum
Small bowel

Excludes: Ileocecal valve (see [2.NM.^ ^.^ ^](#))

2.NK.28.^.^ Pressure measurement, small intestine

Includes: Manometry, antroduodenal that via stoma
Manometry, small intestine

2.NK.28.BA-PL using endoscopic per orifice approach with pressure measuring device

2.NK.28.CA-PL using per orifice approach with pressure measuring device

2.NK.58.^.^ Function study, small intestine

Includes: Aspiration, duodenal content for secretion study
Study, biliary secretion
Study, duodenal secretion

2.NK.58.BA using endoscopic per orifice approach (or via stoma)

2.NK.58.BA-A0 using endoscopic per orifice approach following administration of pancreatic/biliary secretion stimulant (e.g. Kinevac)

2.NK.70.^.^ Inspection, small intestine**L A3**

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L A3	Optional	Small Intestine 3	Location	D	Duodenum
				I	Ileum
				J	Jejunum
				U	Unqualified, not applicable or unknown

Includes: Colonoscopy with ileoscopy
 Double balloon enteroscopy
 Duodenoscopy
 Esophagogastroduodenoscopy (EGD)
 Exploration, small intestine (open, laparoscopic)
 Ileoscopy
 Jejunoscopy
 Push endoscopy

2.NK.70.BA-BJ using endoscopic per orifice approach (or via stoma) and colonoscope
 2.NK.70.BA-BL using endoscopic per orifice approach (or via stoma) and gastroscope
 2.NK.70.BC-BK using antegrade (via mouth) endoscopic per orifice approach and (double) balloon enteroscope
 2.NK.70.BD-BK using retrograde (via rectum) endoscopic per orifice approach and (double) balloon enteroscope
 2.NK.70.BN-BJ using endoscopic per orifice approach with laser assisted optical "biopsy" and colonoscope
Includes: Confocal laser ileoscopy
 2.NK.70.BN-BL using endoscopic per orifice approach with laser assisted optical "biopsy" and gastroscope
Includes: Confocal laser esophagogastroduodenoscopy (EGD)
 2.NK.70.DA using endoscopic [laparoscopic] approach
 2.NK.70.LA using open approach

2.NK.71.^ ^ Biopsy, small intestine

L A3

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L A3	Optional	Small Intestine 3	Location	D	Duodenum
				I	Ileum
				J	Jejunum
				U	Unqualified, not applicable or unknown

Includes:	Colonoscopy with biopsy of ileum Push endoscopy with biopsy
Excludes:	Laser assisted optical biopsy done with inspection (see 2.NK.70.^^)

2.NK.71.BA-BJ	using endoscopic per orifice approach (or via stoma) and colonoscope
2.NK.71.BA-BL	using endoscopic per orifice approach (or via stoma) and gastroscope
2.NK.71.BC-BK	using antegrade (via mouth) endoscopic per orifice approach and (double) balloon enteroscope
2.NK.71.BD-BK	using retrograde (via rectum) endoscopic per orifice approach and (double) balloon enteroscope
2.NK.71.BR-BJ	using endoscopic per orifice approach (or via stoma) brush biopsy or washing and colonoscope
2.NK.71.BR-BL	using endoscopic per orifice approach (or via stoma) brush biopsy or washing and gastroscope
2.NK.71.BS-BK	using antegrade (via mouth) endoscopic per orifice approach brush biopsy or washing and (double) balloon enteroscope
2.NK.71.BT-BK	using retrograde (via rectum) endoscopic per orifice approach brush biopsy or washing and (double) balloon enteroscope
2.NK.71.DA	using endoscopic [laparoscopic] approach
2.NK.71.HA	using percutaneous (needle) approach
2.NK.71.LA	using open approach

2.NM.^^.^^ Diagnostic Interventions on the Large Intestine

Includes:	Anastomotic site of small intestine to large intestine Ascending colon Cecum Colon [right, left, NOS] Descending colon Diaphragmatic flexure Hepatic flexure Ileocecal valve Iliopelvic colon Sigmoid colon Sigmoid flexure Splenic flexure Transverse colon
------------------	--

2.NM.28.^^ Pressure measurement, large intestine

Includes:	Manometry, large intestine that via stoma
------------------	--

2.NM.28.BA-PL	using endoscopic per orifice approach with pressure measuring device
2.NM.28.CA-PL	using per orifice approach with pressure measuring device

2.NM.70.^ ^ Inspection, large intestine

Includes:	Colonoscopy Exploration, large intestine (open, laparoscopic) Inspection, from rectum into large intestine Proctosigmoidoscopy Sigmoidoscopy
Excludes:	Colonoscopy with biopsy of ileum (see 2.NK.71.^ ^) Colonoscopy with ileoscopy (see 2.NK.70.^ ^) Inspection, surgically constructed site in digestive or biliary tract (see 2.OW.70.^ ^) Pouchoscopy, ileoanal reservoir (see 2.OW.70.^ ^) Proctoscopy only (see 2.NQ.70.^ ^)

2.NM.70.BA-BG	using endoscopic per orifice approach (or via stoma) and rigid sigmoidoscope
2.NM.70.BA-BH	using endoscopic per orifice approach (or via stoma) and flexible sigmoidoscope Includes: Sigmoidoscope NOS
2.NM.70.BA-BJ	using endoscopic per orifice approach (or via stoma) and colonoscope
2.NM.70.BN-BG	using endoscopic per orifice approach and laser assisted optical "biopsy" and rigid sigmoidoscope
2.NM.70.BN-BH	using endoscopic per orifice approach and laser assisted optical "biopsy" and flexible sigmoidoscope Includes: Confocal laser sigmoidoscopy Laser assisted optical biopsy and sigmoidoscope NOS
2.NM.70.BN-BJ	using endoscopic per orifice approach and laser assisted optical "biopsy" and colonoscope Includes: Confocal laser sigmoidoscopy
2.NM.70.DA	using endoscopic [laparoscopic] approach
2.NM.70.LA	using open approach

2.NM.71.^ ^ Biopsy, large intestine

Excludes:	Laser assisted optical biopsy done with inspection (see 2.NM.70.^ ^)
------------------	---

2.NM.71.BA-BG	using endoscopic per orifice approach (or via stoma) and rigid sigmoidoscope
2.NM.71.BA-BH	using endoscopic per orifice approach (or via stoma) and flexible sigmoidoscope Includes: Sigmoidoscope NOS
2.NM.71.BA-BJ	using endoscopic per orifice approach (or via stoma) and colonoscope
2.NM.71.BR-BG	using endoscopic per orifice approach brush biopsy or washing and rigid sigmoidoscope
2.NM.71.BR-BH	using endoscopic per orifice approach brush biopsy or washing and flexible sigmoidoscope Includes: Brush biopsy or washing and sigmoidoscope NOS
2.NM.71.BR-BJ	using endoscopic per orifice approach brush biopsy or washing/scraping and colonoscope
2.NM.71.DA	using endoscopic [laparoscopic] approach
2.NM.71.HA	using percutaneous (needle) approach
2.NM.71.LA	using open approach

2.NQ.^^.^^ Diagnostic Interventions on the Rectum

Includes:	Anastomotic site of small intestine to rectum, large intestine to rectum and rectum to anus Anorectal juncture above dentate line Pelvirectal juncture Rectosigmoid juncture [colon]
Excludes:	Anorectal juncture (see 2.NT.^^.^^)

2.NQ.28.^^ Pressure measurement, rectum

Includes:	Manometry, rectal Study, rectal manometry
------------------	--

2.NQ.28.CA-PL	using per orifice approach and pressure measuring device
---------------	--

2.NQ.70.^^ Inspection, rectum

Includes:	Examination, rectum Proctoscopy Rectoscopy
Excludes:	Examination of prostate, trans- rectal (see 2.QT.70.^^) Inspection of rectum and large intestine (see 2.NM.70.^^) Proctosigmoidoscopy (see 2.NM.70.^^)

2.NQ.70.BA	using endoscopic per orifice approach
2.NQ.70.BN	using endoscopic per orifice approach and laser assisted optical "biopsy"
	Includes: Confocal laser proctoscopy
2.NQ.70.CA	using per orifice manual (digital) technique
2.NQ.70.DA	using endoscopic [laparoscopic] approach
2.NQ.70.LA	using open approach

2.NQ.71.^^ Biopsy, rectum

Excludes:	Laser assisted optical biopsy done with inspection (see 2.NQ.70.^^)
------------------	--

2.NQ.71.BA	using endoscopic per orifice approach
2.NQ.71.BG	using endoscopic per orifice rectal suction
2.NQ.71.BR	using endoscopic per orifice with brush biopsy or washing
2.NQ.71.CA	per orifice approach NOS
2.NQ.71.DA	using endoscopic [laparoscopic] approach
2.NQ.71.HA	using percutaneous (needle) approach (e.g. core needle biopsy)
2.NQ.71.LA	using open approach

2.NT.^.^ Diagnostic Interventions on the Anus

Includes:	Anal cushion Anal sphincter Anorectal juncture Hemorrhoidal plexus [lying within anal cushion] Levator ani muscle Muscularis propria of anal canal
Excludes:	Anorectal juncture above dentate line (see 2.NQ.^.^)

2.NT.24.^.^ Electrophysiological measurement, anus

Includes:	Electromyography (EMG), anal sphincter
Note:	Involves recording of electrical muscle activity of anal sphincter

2.NT.24.HA-JA	using needle electrodes percutaneous inserted (needle electromyography)
2.NT.24.JA-JA	using surface electrodes externally applied

2.NT.70.^.^ Inspection, anus

Includes:	Anoscopy Examination, anus
------------------	-------------------------------

2.NT.70.BA	using endoscopic per orifice approach (anoscopy)
2.NT.70.JA	using manual (digital exam) technique

2.NT.71.^.^ Biopsy anus

2.NT.71.BA	using endoscopic per orifice (e.g. anoscopic) approach
2.NT.71.HA	using percutaneous (needle,punch) approach
2.NT.71.LA	using open incisional approach

Diagnostic Interventions on the Hepatobiliary Tract and Other Sites within the Abdominal Cavity NEC (20A - 20Z)

2.OA.^.^ Diagnostic Interventions on the Liver

Includes: Caudate
Liver NOS
Lobe of liver
Quadrate of liver
Segment I through VIII of liver
Subphrenic space

2.OA.71.^.^ Biopsy, liver

2.OA.71.DA	using endoscopic [laparoscopic] approach
2.OA.71.GR	using percutaneous transluminal venous approach
	Includes: Transjugular liver biopsy
2.OA.71.HA	using percutaneous (needle) approach
2.OA.71.LA	using open approach

2.OB.^.^ Diagnostic Interventions on the Spleen

2.OB.70.^.^ Inspection, spleen

2.OB.70.DA	using endoscopic approach
2.OB.70.LA	using open approach

2.OB.71.^.^ Biopsy, spleen

2.OB.71.DA	using endoscopic [laparoscopic] approach
2.OB.71.HA	using percutaneous (needle) approach
2.OB.71.LA	using open approach

2.OD.^.^ Diagnostic Interventions on the Gallbladder

Includes: Fundus, body, neck of gallbladder
Gallbladder with associated bile ducts
Luschka's ducts of gallbladder [wall]

Excludes: Bile ducts [common, cystic or extrahepatic] alone (see [2.OE.^.^](#))

2.OD.71.^.^ Biopsy, gallbladder

2.OD.71.BA	using endoscopic [retrograde] per orifice approach
2.OD.71.DA	using endoscopic [laparoscopic] approach
2.OD.71.HA	using percutaneous (needle) approach
2.OD.71.LA	using open approach

2.OE.^.^ Diagnostic Interventions on the Bile Ducts

Includes:	Ampulla and sphincter of Oddi Biliary ducts Common bile duct [CBD] Cystic duct Duct of Santorini, Wirsung Hepatic ducts [intra and extra] Hepatopancreatic ampulla Pancreatic duct Papilla [ampulla] and sphincter of Vater
Excludes:	Bile ducts [in continuity] with gallbladder (see 2.OD.^.^)

2.OE.21.^.^ Capacity measurement, bile ducts

Includes:	Aspiration, bile, for volume measurement
Code Also:	Any therapeutic drainage of bile ducts (see 1.OE.52.^.)
Note:	Involves recording total amount of biliary content aspirated (collected from drainage).
2.OE.21.ZZ	using technique NEC

2.OE.28.^.^ Pressure measurement, bile ducts

Includes:	Manometry, sphincter of Oddi
2.OE.28.BA-PL	using endoscopic [retrograde] per orifice approach and pressure measuring device

2.OE.70.^.^ Inspection, bile ducts**S** 1

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes:	Cholangiopancreatography Cholangioscopy Choledochoscopy Pancreatography
Omit code:	when performed with cholecystectomy (see 1.OD.89.^^)

2.OE.70.BA	using endoscopic per orifice approach Includes: Choledochoscopy per os Pancreatography per os that using endoscopic direct visualization systems [e.g. Spyglass]
2.OE.70.BN	using endoscopic per orifice approach and laser assisted optical "biopsy" Includes: Confocal (laser) endomicroscopy (with fluorescence), biliary tract Confocal laser cholangioscopy
2.OE.70.DA	using endoscopic (laparoscopic) approach Includes: Intraoperative choledochoscopy
2.OE.70.LA	using open approach Includes: Intraoperative choledochoscopy

2.OE.71.^^ Biopsy, bile ducts

2.OE.71.BA	using endoscopic per orifice (retrograde) [ERC] approach
2.OE.71.DA	using endoscopic [laparoscopic] approach
2.OE.71.HA	using percutaneous (needle) approach
2.OE.71.LA	using open approach

2.OJ.^^.^^ Diagnostic Interventions on the Pancreas

Includes:	Head, body, tail of pancreas Islets of Langerhans [endocrine pancreas]
Excludes:	Duct of Santorini, Wirsung (see 2.OE.^^.^^) Hepatopancreatic ampulla (see 2.OE.^^.^^) Pancreatic duct (see 2.OE.^^.^^)

2.OJ.71.^^ Biopsy, pancreas

2.OJ.71.BA	using endoscopic [retrograde] per orifice approach
2.OJ.71.BP	using endoscopic per orifice approach with needle aspiration
2.OJ.71.DA	using endoscopic [laparoscopic] approach
2.OJ.71.HA	using percutaneous (needle) approach Includes: Large bore or fine needle biopsy
2.OJ.71.LA	using open approach

2.OT.^^.^^ Diagnostic Interventions on the Abdominal Cavity

Includes: Extraperitoneal space
 Mesentery
 Neoplasm which occupies the abdominal cavity and whose point of origin cannot easily be assigned to a single point of origin
 Omentum
 Pelvic cavity
 Peritoneal [retroperitoneal] cavity
 Peritoneum
 Sinuses/fistula of cavity
 Subdiaphragmatic space

2.OT.21.^^ Capacity measurement, abdominal cavity

Code Also: Abdominocentesis ([1.OT.52.^^](#))

Note: Involves recording total amount of fluid aspirated from abdominal cavity (collected from drainage).

2.OT.21.ZZ using technique NEC

2.OT.70.^^ Inspection, abdominal cavity**L**⁵

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 5	Optional	Hernias 1	Location	B	Bilateral (for contralateral hernia)

Note: Use location attribute to specify bilateral examination [to rule out contralateral hernia or contralateral patent processus vaginalis (CPPV)]

2.OT.70.DA using endoscopic [laparoscopic] approach

Includes: Laparoscopy NOS

2.OT.70.LA using open approach

Includes: Laparotomy NOS

2.OT.71.^.^ Biopsy, abdominal cavity

Includes:	Brushings, abdominal cavity that of intra abdominal mass that of mesentery, omentum, peritoneum Washings, abdominal cavity Washings, peritoneal
Excludes:	that of fallopian tube, ovary, uterine ligaments, uterus

2.OT.71.DA	using endoscopic [laparoscopic] approach
2.OT.71.HA	using percutaneous (needle) approach
2.OT.71.LA	using open approach

2.OW.^.^ Diagnostic Interventions on surgically constructed sites in Digestive and Biliary Tract

Includes:	Colostomy Duodenostomy Enterostomy Esophagostomy Gastric pouch Gastrostomy Ileal reservoir Ileostomy Jejunostomy Kock pouch Neoesophagus Neopharynx Neorectum Pelvic pouch Roux en y limb [of anastomosis]
Excludes:	Anastomotic site of esophagus to stomach for continuity (see 2.NA.^.^) Anastomotic site of small intestine to large intestine for continuity (see 2.NM.^.^) Anastomotic site of small intestine to rectum for continuity, large intestine to rectum for continuity and rectum to anus for continuity (see 2.NQ.^.^) Anastomotic site of small intestine to small intestine for continuity and stomach to small intestine for continuity (see 2.NK.^.^)

2.OW.70.^.^ Inspection, surgically constructed sites in digestive and biliary tract

Includes: Examination, colostomy
 Examination, enterostomy
 Examination, stoma NOS
 Exploration, surgically constructed sites of digestive tract (e.g. neoesophagus, neopharynx, neorectum)
 Inspection, ileal reservoir NOS
 Inspection, Kock pouch
 Inspection, pelvic pouch
 Pouchoscopy, ileoanal reservoir NOS

Excludes: Inspection of ileal reservoir for urinary diversion (see [2.PV.70.^.^](#))

2.OW.70.BA	using endoscopic per orifice (or via stoma) approach
2.OW.70.BN	using endoscopic per orifice approach (via stoma) with laser assisted optical biopsy
	Includes: Confocal (laser) endomicroscopy, surgically constructed site [e.g. neorectum, pelvic pouch]
2.OW.70.JA	using manual (digital exam) technique (stoma opening)

2.OW.71.^.^ Biopsy, surgically constructed sites in digestive and biliary tract

Includes: Biopsy, neorectal pouch, neoesophagus or neopharynx

2.OW.71.BA	using endoscopic per orifice approach
2.OW.71.DA	using endoscopic (laparoscopic) approach
2.OW.71.LA	using open approach

2.OZ.^.^.^ Diagnostic Interventions on the Digestive System NEC**2.OZ.29.^.^ Other measurement NEC, digestive system NEC****M**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
M 2	Optional	Type of delivery 2	Location	D I	Direct delivery (health care provider is face to face with client)
				I N	Indirect (service delivered at a distance e.g. telephone, telemedicine with health care provider not physically present with client)

<i>Includes:</i>	Analysis, body composition (fat) Analysis, patency Anthropometry Measurement, body mass index (BMI) Measurement, total body fat Monitoring, nutrition NOS Monitoring, weight (loss, gain) Weight, body
2.OZ.29.CA-AL	using bioelectrical impedance
2.OZ.29.CA-DU	using infrared (light) impedance
2.OZ.29.CA-GX	using device NEC (e.g. Agile Patency Capsule)
2.OZ.29.CA-T9	using biochemical agent (neutron activation tritiated water dilution whole body K40 count)
2.OZ.29.JA	using manual (pinch, skinfold) technique
2.OZ.29.ZZ	using technique NEC (e.g. weighing in)

Diagnostic Interventions on the Genitourinary System (2PB - 2RZ)

Diagnostic Interventions on the Urinary System (2PB - 2PV)

2.PB.^.^ Diagnostic Interventions on the Adrenal Gland

Excludes: Adrenal with kidney (see [2.PC.^.^](#))

2.PB.70.^.^ Inspection, adrenal gland

L²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

2.PB.70.DA using endoscopic approach

2.PB.70.LA using open approach

2.PB.71.^.^ Biopsy, adrenal gland

L²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

2.PB.71.DA using endoscopic approach

2.PB.71.HA using percutaneous (needle) approach

2.PB.71.LA using open approach

2.PC.^.^ Diagnostic Interventions on the Kidney

Includes: Ectopic kidney
Kidney NOS
Kidney with adrenal gland
Kidney with renal pelvis
Renal capsule
Renal cortex
Renal medulla

Excludes: Adrenal gland alone (see [2.PB.^.^](#))
Renal arteries alone (see [2.KE.^.^](#))
Renal calyces (see [2.PE.^.^](#))
Renal pelvis alone (see [2.PE.^.^](#))
Renal veins alone (see [2.KQ.^.^](#))

2.PC.28.^.^ Pressure measurement, kidney**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Manometry, kidney
Study, manometry, kidney

2.PC.28.BA-PL using endoscopic per orifice approach with pressure measuring device (includes: through nephrostomy, ureterostomy or catheter)

2.PC.70.^.^ Inspection, kidney**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Excludes: Inspection of renal pelvis alone (see [2.PE.70.^^](#))

2.PC.70.BA	using endoscopic per orifice approach
	Includes: Nephroscopy that through existing artificial stoma
2.PC.70.DA	using endoscopic [trans capsular, trans pelvic] approach
2.PC.70.LA	using open approach
	Includes: Nephrotomy for exploration

2.PC.71.^^ Biopsy, kidney

L²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Excludes: Biopsy of renal pelvis alone (see [2.PE.71.^^](#))

2.PC.71.BA	using endoscopic per orifice approach
	Includes: that through existing artificial stoma
2.PC.71.DA	using endoscopic [trans capsular, trans pelvic] approach
2.PC.71.GR	using percutaneous transluminal venous approach
	Includes: Transjugular kidney biopsy Transjugular renal biopsy (TJRB)
2.PC.71.HA	using percutaneous (needle) approach
2.PC.71.LA	using open approach

2.PE.^^.^^ Diagnostic Interventions on the Renal Pelvis

Includes: Renal calyces
Ureteropelvic junction [UPJ]

Excludes: Renal pelvis with kidney (see [2.PC.^^.^^](#))

2.PE.70.^ Inspection, renal pelvis**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Excludes: Inspection, pyelointestinal anastomosis site (see [2.PV.70.^](#))
Inspection, ureterocalicostomy (see [2.PV.70.^](#))
that with injection of contrast for retrograde pyelogram (see [3.PH.10.^](#))

2.PE.70.BA using endoscopic per orifice approach
Includes: Pyeloscopy
2.PE.70.DA using endoscopic approach
2.PE.70.LA using open approach
Includes: Pyelotomy for exploration

2.PE.71.^ Biopsy, renal pelvis**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Excludes: Biopsy, ureteropyeloneostomy (see [2.PV.71.^](#))

2.PE.71.BA using endoscopic per orifice approach
2.PE.71.DA using endoscopic approach
2.PE.71.HA using percutaneous (needle) approach
2.PE.71.LA using open approach

2.PG.^.^ Diagnostic Interventions on the Ureter

- Includes:** Ectopic ureter
Ureter NOS
Ureteral meatus
Ureterovesical junction and orifice(s)
- Excludes:** Ureteropelvic junction alone (see [2.PE.^.^](#))

2.PG.70.^.^ Inspection, ureter**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Excludes:** Inspection, ureteroureterostomy (see [2.PV.70.^.^](#))
Inspection, urinary stoma (see [2.PV.70.^.^](#))

2.PG.70.BA using endoscopic per orifice approach

Includes: Ureteroscopy

2.PG.70.DA using endoscopic approach

2.PG.70.LA using open approach

2.PG.71.^.^ Biopsy, ureter**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Excludes: Biopsy, ureterocutaneostomy (see [2.PV.71.^^](#))
Biopsy, ureteroureterostomy (see [2.PV.71.^^](#))

2.PG.71.BA	using endoscopic per orifice approach
2.PG.71.BR	using endoscopic per orifice brushing/washing
2.PG.71.DA	using endoscopic approach
2.PG.71.HA	using percutaneous (needle) approach
2.PG.71.LA	using open approach

2.PM.^^.^^ Diagnostic Interventions on the Bladder

Includes: Bladder neck
Bladder NOS
Bladder with bladder neck
Dome of bladder
Intraluminous tissue of bladder
Trigone of bladder
Urachus

2.PM.29.^^ Other measurement NEC, bladder

Includes: Measurement, fluid intake (output)
Measurement, urinary output (in and out)

Excludes: Urodynamic study (see [2.PM.58.^^](#))
Uroflowmetry (see [2.PM.58.^^](#))

Note: Involves recording total amount of fluid ingested and excreted (through urine)

2.PM.29.ZZ	using technique NEC
------------	---------------------

2.PM.58.^ ^ Function study, bladder

Includes:	Cystometrogram Profile, urodynamic Study, urodynamic that using ultrasonic device Urodynamic studies Uroflowmetry
Excludes:	Urethral pressure profile (UPP) (see 2.PQ.28.^ ^)

2.PM.58.CA-X4	using per orifice approach and dye
2.PM.58.TA	combined (multiple) techniques
2.PM.58.VD	post- void residual volume measurement
2.PM.58.VE	bladder capacity determination
2.PM.58.VF	voiding pressure study (VP, flow micturition)
2.PM.58.VG	uroflowmetry (UFR)
2.PM.58.VH	filling cystometry [cystometrography]

2.PM.59.^ ^ Other study, bladder

2.PM.59.CA-B3	potassium infusion
---------------	--------------------

2.PM.70.^ ^ Inspection, bladder

Excludes:	Inspection, neobladder (see 2.PV.70.^ ^) Pouchoscopy, ileal reservoir for urinary diversion (see 2.PV.70.^ ^)
Omit code:	when performed with retrograde pyelography (see 3.PH.10.^ ^)

2.PM.70.BA	using endoscopic per orifice approach
Includes:	Cystoscopy, transurethral

2.PM.71.^ ^ Biopsy, bladder

Excludes:	Biopsy, neobladder (see 2.PV.71.^ ^)
------------------	---

2.PM.71.BA	using endoscopic per orifice approach
2.PM.71.DA	using endoscopic approach
2.PM.71.HA	using percutaneous (needle) approach
2.PM.71.LA	using open approach
Includes:	Cystotomy for biopsy

2.PQ.^.^ Diagnostic Interventions on the Urethra

Includes: Periurethral gland
 Skene's gland [duct]
 Urethra [bulbous, penile, prostatic]
 Urethral meatus
 Urethral sphincter
 Urethral valves

2.PQ.24.^.^ Electrophysiological measurement, urethra

Includes: Electromyography (EMG), urethral sphincter
Note: Involves recording of electrical muscle activity of urethral sphincter

2.PQ.24.HA-JA	using needle electrodes percutaneously inserted
2.PQ.24.JA-JA	using surface electrodes externally applied

2.PQ.25.^.^ Potential (evoked) measurement, urethra

Includes: Measurement, bulbocavernosus latency time
 Study, evoked potential, urethra

2.PQ.25.JA	using external approach (for evoked potential response recording)
------------	---

2.PQ.28.^.^ Pressure measurement, urethra

Includes: Manometry, urethral (sphincter)
 Measurement, urethral (closure) pressure
 Profile, urethral pressure (UPP)

Excludes: Urodynamic studies (see [2.PM.58.^.](#))

2.PQ.28.BA-PL	using endoscopic per orifice approach with pressure measuring device
---------------	--

2.PQ.70.^.^ Inspection, urethra

Includes: Urethroscopy

2.PQ.70.BA	using endoscopic per orifice approach
2.PQ.70.DA	using endoscopic [trans vesical] approach
2.PQ.70.LA	using open approach

2.PQ.71.^.^ Biopsy, urethra

2.PQ.71.BA	using endoscopic per orifice approach
2.PQ.71.DA	using endoscopic approach
2.PQ.71.HA	using percutaneous (needle) approach
2.PQ.71.LA	using open approach

2.PV.^.^.^ Diagnostic Interventions on surgically constructed sites in Urinary Tract

Includes:

- Appendicovesicostomy
- Cystostomy tract
- Ileoconduit
- Neobladder
- Nephrostomy tract
- Pyelostomy tract
- Ureterocalicostomy
- Ureterocutaneostomy
- Ureteropyeloneostomy
- Ureterosigmoidostomy
- Ureterostomy tract
- Urethrostomy tract

2.PV.70.^.^ Inspection, surgically constructed sites in urinary tract

Includes:

- Examination, cystostomy
- Examination, nephrostomy
- Examination, pyelostomy
- Exploration, appendicovesicostomy
- Exploration, neobladder
- Exploration, urethrostomy
- Inspection, ileal reservoir (used for urinary diversion)
- Inspection, pyelointestinal anastomosis site
- Inspection, ureterocalicostomy
- Inspection, ureterocutaneostomy
- Inspection, ureteropyeloneostomy
- Inspection, ureterosigmoidostomy
- Inspection, urinary stoma
- Pouchoscopy, ileal reservoir for urinary diversion

Excludes:

- Inspection, surgically constructed sites of digestive tract ([2.OV.70.^.](#))

2.PV.70.BA	using endoscopic per orifice
2.PV.70.DA	using endoscopic (laparoscopic) approach

2.PV.71.^ ^ Biopsy, surgically constructed sites of urinary tract

Includes: Biopsy, neobladder
Biopsy, site of pyelointestinal anastomosis
Biopsy, ureterocutaneostomy
Biopsy, urinary stoma NOS
Biopsy, urinary stoma tract

2.PV.71.BA	using endoscopic per orifice approach (or via stoma)
2.PV.71.HA	using percutaneous (needle) approach
2.PV.71.LA	using open approach

Diagnostic Interventions on the Male Genital Organs (2QE - 2QZ)

2.QE.^.^ Diagnostic Interventions on the Penis

Includes:

- Buck's fascia
- Corpus cavernosa
- Corpus spongiosum
- Glans penis
- Prepuce (foreskin) with body of penis
- Skin of penis

2.QE.21.^ Capacity measurement, penis

Includes:

- Nocturnal penile tumescence test
- Penile plethysmography
- Plethysmogram, penis
- that with or without nerve stimulation

2.QE.21.ZZ	using technique NEC
------------	---------------------

2.QE.70.^ Inspection, penis

2.QE.70.LA	using incisional approach
------------	---------------------------

Includes:

- Penotomy for exploration
- Phallotomy for inspection

2.QE.71.^ Biopsy, penis

2.QE.71.HA	using percutaneous (needle) approach
2.QE.71.LA	using incisional approach

2.QG.^.^ Diagnostic Interventions on the Scrotum

Includes:

- Dartos tunic
- Scrotal skin
- Scrotum with contents
- Spermatic fascia

2.QG.70.^.^ Inspection, scrotum

Includes:	Exploration for undescended testis, inguinal or scrotal Inspection of content of scrotum [e.g. testis, epididymis, tunica vaginalis, vas deferens] that for isolation and injection of vas deferens for vasography
Excludes:	Incision [for exploration] into testis (see 2.QM.70.^.), into vas deferens (see 2.QN.70.^.)
2.QG.70.DA	using endoscopic approach [e.g. inguinal, lower abdominal or trans and preperitoneal]
2.QG.70.LA	using open approach
	Includes: Scrototomy for exploration

2.QJ.^.^ Diagnostic Interventions on the Epididymis

Includes:	Appendix epididymis Organ of Giralde's [paradidymis] Vas aberrans of Haller
------------------	---

2.QJ.71.^.^ Biopsy, epididymis

2.QJ.71.HA	using percutaneous (needle) approach
	Includes: Core needle biopsy or fine needle aspiration

2.QM.^.^ Diagnostic Interventions on the Testis

Includes:	Appendix testis Cyst of Morgagni Ectopic tissue (of testicle) Tunica vaginalis
------------------	---

2.QM.70.^ ^ Inspection, testis**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

2.QM.70.DA using endoscopic approach [e.g. inguinal, lower abdominal or trans and preperitoneal]

2.QM.70.LA using open approach

Includes: Incision into testis [for exploration]
Orchidotomy for exploration

2.QM.71.^ ^ Biopsy, testis**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

2.QM.71.HA using percutaneous (needle) approach

Includes: Core needle biopsy or fine needle aspiration

2.QM.71.LA using open approach

2.QN.^.^ Diagnostic Interventions on the Vas deferens**2.QN.70.^.^ Inspection, vas deferens****L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Excludes: that for isolation/injection of vas deferens for vasography (see [2.QG.70.^.](#))

2.QN.70.LA using open approach

Includes: Incision [for exploration] into vas deferens
Vasotomy for inspection

2.QN.71.^.^ Biopsy, vas deferens**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

2.QN.71.HA using percutaneous (needle) approach

2.QN.71.LA using open approach

2.QP.^.^ Diagnostic Interventions on the Spermatic Cord

Includes: Spermatic vein

2.QP.70.^.^ Inspection, spermatic cord

2.QP.70.DA using endoscopic approach [e.g. inguinal, lower abdominal]

2.QP.70.LA using open approach

2.QP.71.^.^ Biopsy, spermatic cord

2.QP.71.HA	using percutaneous (needle) approach
2.QP.71.LA	using open approach

2.QQ.^.^ Diagnostic Interventions on the Seminal Vesicles

Includes:	Ejaculatory duct
Excludes:	Seminal vesicles with prostate (see 2.QT.^.^)

2.QQ.70.^.^ Inspection, seminal vesicles

2.QQ.70.DA	using endoscopic approach [e.g. inguinal, lower abdominal]
2.QQ.70.LA	using open approach

2.QQ.71.^.^ Biopsy, seminal vesicles

2.QQ.71.HA	using percutaneous (needle) approach
2.QQ.71.LA	using open approach

2.QT.^.^ Diagnostic Interventions on the Prostate**2.QT.70.^.^ Inspection, prostate**

Includes:	Examination, prostate, trans rectal digital
------------------	---

2.QT.70.BA	using endoscopic per orifice (transurethral)
2.QT.70.CA	using manual (digital) technique (via rectum)
2.QT.70.LA	using open approach

2.QT.71.^.^ Biopsy, prostate

2.QT.71.BA	using endoscopic per orifice approach
	Includes: Transurethral (needle) biopsy, prostate
2.QT.71.HA	using percutaneous (needle) approach
	Includes: Transperineal (needle) biopsy, prostate
	Transrectal (needle) biopsy, prostate
2.QT.71.LA	using open approach

2.QZ.^.^ Diagnostic interventions on the Male Genital Tract NEC**2.QZ.02.^.^ Assessment, male genital tract NEC**

Includes: Examination, male genital organs

2.QZ.02.JA using external (manual) approach

Diagnostic Interventions on the Female Genital Organs (2RB - 2RZ)

2.RB.^.^ Diagnostic Interventions on the Ovary

Includes: Ligaments of ovary
Ova
Ovary NOS

2.RB.70.^.^ Inspection, ovary

L²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Examination, ovary

2.RB.70.CA per orifice approach NOS using manual (digital) technique (e.g. via rectum and vagina)
 2.RB.70.DA using endoscopic [laparoscopic] approach
 2.RB.70.LA using open approach

2.RB.71.^.^ Biopsy, ovary

L²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Excludes: Procurement of ovum from ovary (see [1.RB.58.^.](#))

2.RB.71.BA using endoscopic per orifice (vaginal) approach
 2.RB.71.DA using endoscopic approach
 2.RB.71.LA using open approach

2.RF.^.^ Diagnostic Interventions on the Fallopian Tube

Includes: Fimbria of fallopian tube
Hydatid of Morgagni
Uterine tube

2.RF.58.^.^ Function study, fallopian tube**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Instillation, fallopian tubes (to determine patency)
Insufflation, fallopian tubes

Excludes: Hysterosalpingogram (see [3.RK.10.^.](#))

Omit code: when fallopian tube patency test is done (most commonly with dye) during a therapeutic intervention to determine completeness of procedure.

2.RF.58.DA-D2 using endoscopic [laparoscopic] approach and saline [hydrotubation]
2.RF.58.DA-T9 using endoscopic [laparoscopic] approach and other agent NEC
2.RF.58.DA-VD using endoscopic [laparoscopic] approach and air or gas [e.g. Rubin's test]
2.RF.58.DA-X4 using endoscopic [laparoscopic] approach and dye
2.RF.58.LA-Z9 using open approach and agent NEC

2.RF.70.^.^ Inspection, fallopian tube**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Exploration, fallopian tube

2.RF.70.BA using endoscopic per orifice approach
2.RF.70.DA using endoscopic approach
2.RF.70.LA using open approach

2.RF.71.^.^ Biopsy, fallopian tube**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

2.RF.71.DA using endoscopic [laparoscopic] approach
 2.RF.71.LA using open approach

2.RJ.^.^.^ Diagnostic Interventions on the Uterine Ligaments

Includes: Broad ligaments
 Cardinal ligament
 Round ligament [canal of Nuck]
 Uterosacral ligament

2.RJ.71.^.^ Biopsy, uterine ligaments

2.RJ.71.DA using endoscopic approach
 2.RJ.71.LA using open approach

2.RM.^.^.^ Diagnostic Interventions on the Uterus and Surrounding Structures

Includes: Body of uterus
 Cervix with body of uterus
 Endometrium
 Uterus NOS

Excludes: Cervix alone (see [2.RN.^.^.^](#))
 Uterine ligaments (see [2.RJ.^.^.^](#))

2.RM.70.^ ^ Inspection, uterus and surrounding structures

Includes:	Examination, uterus Exploration, uterus
Excludes:	Exploration, postpartum uterus (see 5.PC.91.^ ^)

2.RM.70.BA	using endoscopic per orifice (hysteroscopic) approach
2.RM.70.CA	per orifice approach NOS
2.RM.70.DA	endoscopic [laparoscopic] approach NOS
2.RM.70.LA	using open approach (hysterotomy for exploration)

2.RM.71.^ ^ Biopsy, uterus and surrounding structures

Includes:	Endometrial biopsy Sampling, endometrial that with dilation of cervix
Excludes:	Biopsy of uterine ligaments (see 2.RJ.71.^ ^) Dilation and curettage [D & C] (see 1.RM.87.^ ^) Dilation and curettage [D & C], following delivery or abortion (see 5.PC.91.^ ^)

2.RM.71.BA	using endoscopic per orifice (hysteroscopic) approach
2.RM.71.BP	using endoscopic per orifice (hysteroscopic) approach with needle aspiration
2.RM.71.BR	using endoscopic per orifice (hysteroscopic) scraping of cells Includes: that for smear preparation [e.g. PAP smear]
2.RM.71.CG	using per orifice approach with suction
2.RM.71.CR	using per orifice approach with scraping of cells
2.RM.71.DA	using endoscopic [laparoscopic] approach
2.RM.71.LA	using open approach

2.RN.^ ^.^ Diagnostic Interventions on the Cervix

Includes:	Canal of cervix Cervix NEC Supravaginal cervix Uterine orifice [external os]
Excludes:	Cervix with uterus (see 2.RM.^ ^.^)

2.RN.29.^ ^ Other measurement NEC, cervix

2.RN.29.CA-AL	using per orifice approach with bioelectrical impedance Includes: Z scan electrical impedance spectroscopy
---------------	--

2.RN.71.^.^ Biopsy, cervix

Includes:	Biopsy, endocervix Cervical biopsy
Excludes:	Conization of cervix (cone biopsy) (see 1.RN.87.^.) Loop electrode excision procedure [LEEP] (see 1.RN.87.^.)
Code Also:	Any colposcopic examination, if desired (see 3.RZ.94.^.)

2.RN.71.CG	using per orifice approach with curettage Includes: Endocervical curettage [ECC]
2.RN.71.CQ	using per orifice needle approach Includes: Punch biopsy, cervix
2.RN.71.CR	using per orifice approach with brushing or scraping of cells Includes: PAP smear, endocervix (endocervical) brushing [ECB]

2.RS.^.^.^ Diagnostic Interventions on the Vagina

Includes:	Fornix [anterior, posterior, cul de sac] Vaginal orifice Vaginal vault Vaginal walls [anterior, posterior]
------------------	---

2.RS.70.^.^ Inspection, vagina

Includes:	Colpotomy, for exploration Culdoscopy Culdotomy, for exploration Exploration, cul de sac Vaginoscopy
Excludes:	Colposcopy (see 3.RZ.94.^.)

2.RS.70.BA	using endoscopic per orifice approach [e.g. culdoscopy]
2.RS.70.CA	using per orifice approach [vaginoscopy]
2.RS.70.DA	using endoscopic [laparoscopic] approach
2.RS.70.LA	using open incisional approach [colpotomy, culdotomy, vaginotomy]

2.RS.71.^.^ Biopsy, vagina

Includes: Biopsy, cul de sac

2.RS.71.BA	using endoscopic per orifice approach [e.g. culdoscopy]
2.RS.71.CA	using per orifice approach
2.RS.71.DA	using endoscopic (laparoscopic) approach
2.RS.71.LA	using open approach [abdominal or perineal]

2.RW.^.^.^ Diagnostic Interventions on the Vulva

Includes: Bartholin's glands [greater vestibular glands]
 Bulb of vestibule
 Clitoris
 Hymen
 Labia [minora, majora]
 Mons pubis
 Vestibule
 Vulva with perineum

Excludes: Urethral meatus alone (see [2.PQ.^.^.^](#))
 Vulva with vagina (see [2.RS.^.^.^](#))

2.RW.70.^.^ Inspection, vulva

Includes: Exploration, vulva
 Vulvotomy, for exploration

Excludes: Examination of vulva (visual or manual) (see [2.RZ.02.^.^](#))

2.RW.70.LA	using open approach (vulvotomy)
------------	---------------------------------

2.RW.71.^.^ Biopsy, vulva

2.RW.71.HA	using percutaneous approach (needle, punch)
2.RW.71.LA	using open approach NOS

2.RY.^.^.^ Diagnostic Interventions on the Perineum

Includes: Male perineum

2.RY.71.^.^ Biopsy, perineum

2.RY.71.HA	using percutaneous approach (needle, punch)
2.RY.71.LA	using open approach NOS

2.RZ.^.^.^ Diagnostic Interventions on the Female Genital Tract NEC

Includes: Pelvic [female] region

2.RZ.02.^.^ Assessment (examination), female genital tract NEC**E** 25

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 25	Optional	Time parameter 1	Extent	C M	Comprehensive
				L T	Limited (brief)

Includes: Examination, gynecological (female pelvic)

Excludes: Colposcopy (see [3.RZ.94.^.^](#))
 Culdoscopy (see [2.RS.70.^.^](#))
 Examination, postpartum (see [5.PB.01.^.^](#))
 Hysteroscopy (see [2.RM.70.^.^](#))

Code Also: Any cervical biopsy or smear (see [2.RN.71.^.^](#))

2.RZ.02.CA	per orifice (internal exam) technique
2.RZ.02.JA	external manual (palpation) technique

Diagnostic Interventions on the Musculoskeletal System (2SA - 2WZ)

Diagnostic Interventions on the Spine, Trunk and Pelvis (2SA - 2SZ)

2.SA.^^.^^ Diagnostic Interventions on the Atlas and Axis

Includes: Atlantoaxial joint
Cervical spinal vertebrae: C1 and C2 [with or without C3]
Occipitoatlantal (occipitocervical) joint
Odontoid process, (dens) axis
Superior and anterior facet (zygapophyseal) joint(s), atlas
Transverse ligament of occipitoatlantal joint

2.SA.71.^^ Biopsy, atlas and axis

Includes: Biopsy, vertebrae (of atlas and axis)

2.SA.71.HA	using percutaneous (needle) approach
	Includes: that using large bore needle, trocar, or needle NOS
2.SA.71.LL	using anterior open approach
	Includes: Transoral or retropharyngeal approach
2.SA.71.PF	using posterior [posterolateral] open approach

2.SC.^^.^^ Diagnostic Interventions on the Spinal Vertebrae

Includes: Lumbosacral spinal vertebrae [vertebrae L1-S2]
Spine NOS
Transverse process of vertebrae
Vertebral column
Vertebral joints [facet, interspinous ligament]

Excludes: Atlas and axis alone (see [2.SA.^^.^^](#))
Atlas and axis: C1 and C2 [with or without C3] (see [2.SA.^^.^^](#))
Sacrum and coccyx (see [2.SF.^^.^^](#))

2.SC.08.^^ Test, spinal vertebrae

Includes: Test, range of motion, spine (vertebrae)

Excludes: Range of motion exercise, spine (see [1.SJ.02.^^](#))

2.SC.08.ZZ	using technique NEC
------------	---------------------

2.SC.71.^.^ Biopsy, spinal vertebrae**L** 6

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 6	Optional	Spine 1	Location	C X	Cervical spine
				L B	Lumbar spine
				T H	Thoracic spine

Includes: Biopsy, vertebrae (of spine)

-
- 2.SC.71.HA using percutaneous (needle) approach
Includes: that using large bore needle, trocar, or needle NOS
- 2.SC.71.LL using anterior open approach
Includes: Anterolateral or thoracic approach
- 2.SC.71.PF using posterior [posterolateral] open approach
-

2.SE.^.^.^ Diagnostic Interventions on the Intervertebral Disc

Includes: Annulus fibrosus
Nucleus pulposus

2.SE.71.^.^ Biopsy, intervertebral disc

Excludes: that by laminotomy for excision of disc fragments (see [1.SE.87.^.^](#))

-
- 2.SE.71.HA using percutaneous (needle) approach
Includes: that using large bore needle, trocar, or needle NOS
-

2.SF.^.^.^ Diagnostic Interventions on the Sacrum and Coccyx

Includes: Sacroiliac joint

Excludes: Lumbosacral spinal vertebrae [vertebrae L1-S2] (see [2.SC.^.^.^](#))

2.SF.71.^.^ Biopsy, sacrum and coccyx

Includes: Aspiration of synovial fluid for diagnostic purposes
 Biopsy, sacro iliac joint
 Biopsy, vertebrae (of sacrum and coccyx)

2.SF.71.HA using percutaneous (needle) approach
Includes: that using large bore needle, trocar, or needle NOS
 2.SF.71.LA using open approach

2.SG.^.^.^ Diagnostic Interventions on the Muscles of the Back

Includes: Erector spinal vertebrae
 Iliocostalis
 Latissimus dorsi
 Longissimus thoracis and colli
 Muscles and tendons of back NOS
 Rhomboid
 Semi spinalis and serratus posterior muscles
 Thoracolumbar fascia
 Transversus aponeurosis

2.SG.08.^.^ Test, muscles of the back

Excludes: Electromyography, back (see [2.SG.24.^.^](#))

2.SG.08.ZZ using technique NEC

2.SG.24.^.^ Electrophysiological measurement, muscles of the back

Includes: Electromyography (EMG), back

2.SG.24.HA-JA using needle electrodes percutaneously inserted
 2.SG.24.JA-JA using surface electrodes externally applied

2.SH.^.^.^ Diagnostic Interventions on the Soft Tissue of the Back

Includes: Abscess arising in or extending as deep as muscle or tendon of back
 Hematoma arising in or extending as deep as muscle or tendon of back
 Neoplasm arising in or extending as deep as muscle or tendon of back
 Soft tissue wound of back

Excludes: Skin and subcutaneous tissue alone (see [2.YS.^.^.^](#))

2.SH.70.^.^ Inspection, soft tissue of the back

2.SH.70.LA	using open [incisional] approach
------------	----------------------------------

2.SH.71.^.^ Biopsy, soft tissue of the back

Excludes: that of skin and subcutaneous tissue only (see [2.YS.71.^.^](#))

2.SH.71.HA	using percutaneous (needle) approach
------------	--------------------------------------

Includes: Large bore needle or fine needle biopsy

2.SH.71.LA	using open [incisional] approach
------------	----------------------------------

2.SK.^.^.^ Diagnostic Interventions on the Sternum

Includes: Manubrium
Sternebrae body
Xiphoid process

Excludes: Bone marrow (see [2.WY.^.^.^](#))

2.SK.71.^.^ Biopsy, sternum

2.SK.71.HA	using percutaneous (needle) approach
------------	--------------------------------------

Includes: that using large bore needle, trocar, or needle NOS

2.SK.71.LA	using open approach
------------	---------------------

2.SL.^.^.^ Diagnostic Interventions on the Ribs

Includes: Cartilage and ligaments [intercostal and sternocostal] of ribs

2.SL.71.^.^ Biopsy, ribs**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

2.SL.71.HA using percutaneous (needle) approach
Includes: that using large bore needle, trocar, or needle NOS

2.SL.71.LA using open approach

2.SM.^.^.^ Diagnostic Interventions on the Clavicle

Includes: Collar bone

Excludes: Acromion (see [2.TB.^.^.^](#))
 Coracoid process (see [2.TB.^.^.^](#))

2.SM.71.^.^ Biopsy, clavicle**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

2.SM.71.HA using percutaneous (needle) approach
Includes: that using large bore needle, trocar, or needle NOS

2.SM.71.LA using open approach

2.SN.^.^.^ Diagnostic Interventions on the Scapula

Includes: Inter thoracoscavicular joint
 Shoulder blade NOS

2.SN.71.^.^ Biopsy, scapula**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

2.SN.71.HA using percutaneous (needle) approach
Includes: that using large bore needle, trocar, or needle NOS

2.SN.71.LA using open approach

2.SQ.^.^ Diagnostic Interventions on the Pelvis

Includes: Acetabulum alone
 Iliac crest
 Ilium
 Ischium
 Pelvis with pubis with acetabulum with femoral head [when affected in its entirety (e.g. amputation)]

Excludes: Acetabulum with femoral head (see [2.VA.^.^](#))
 Hip joint [acetabulum with femoral head and neck] alone (see [2.VA.^.^](#))
 Pubis alone (see [2.SW.^.^](#))
 Sacroiliac joint (see [2.SF.^.^](#))

2.SQ.71.^.^ Biopsy, pelvis

Includes: Biopsy, acetabulum

2.SQ.71.HA using percutaneous (needle) approach
Includes: that using large bore needle, trocar, or needle NOS

2.SQ.71.LA using open approach

2.SW.^.^ Diagnostic Interventions on the Pubis

Includes: Pubis alone
 Pubis ramus
 Symphysis pubis

Excludes: Pubis with acetabulum, ilium or ischium (see [2.SQ.^.^](#))
 Pubis with pelvis (see [2.SQ.^.^](#))

2.SW.71.^.^ Biopsy, pubis

2.SW.71.HA	using percutaneous (needle) approach
	Includes: that using large bore needle, trocar, or needle NOS
2.SW.71.LA	using open approach

2.SY.^.^.^ Diagnostic Interventions on Muscles of the Chest and Abdomen

Includes:	Abdominal wall Chest wall NOS Deep fascia [endo suprapleural membrane, transversalis, obturator internus] Inguinal ligament Internal and external oblique Internal intercostal Linea alba and semilunaris Muscles and tendons of abdomen NOS Muscles and tendons of chest NOS Pectoralis major [medial and lateral] Rectus abdominis Serratus anterior Transversus abdominis [internal and external] Transversus thoracis and teres muscles
Excludes:	Breast (see 2.YM.^.^) Neoplasm arising or extending into chest or abdominal wall (see 2.SZ.^.^) Skin and subcutaneous tissue of chest and abdomen (see 2.YS.^.^)

2.SY.08.^.^ Test, muscles of the chest and abdomen

2.SY.08.ZZ	using technique NEC
------------	---------------------

2.SZ.^.^.^ Diagnostic Interventions on the Soft Tissue of the Chest and Abdomen

Includes:	Abscess arising in or extending as deep as chest or abdominal wall Hematoma arising in or extending as deep as chest or abdominal wall Neoplasm arising in or extending as deep as chest or abdominal wall Wound of soft tissue of chest or abdomen
Excludes:	Breast (see 2.YM.^.^) Skin and subcutaneous tissue of chest and abdomen (see 2.YS.^.^)

2.SZ.70.^ **Inspection, soft tissue of the chest and abdomen**

Code Also: Any intraoperative use of operating microscope (see [3.YZ.94.^](#))

2.SZ.70.LA using open [incisional] approach

2.SZ.71.^ **Biopsy, soft tissue of the chest and abdomen**

Excludes: that of skin and subcutaneous tissue only (see [2.YS.71.^](#))

2.SZ.71.HA using percutaneous (needle) approach

Includes: Large bore needle or fine needle biopsy

2.SZ.71.LA using open [incisional] approach

Diagnostic Interventions on the Shoulder and Arm (2TA - 2TZ)

2.TA.^^.^^ Diagnostic Interventions on the Shoulder Joint

Includes: Bursa, capsule, cartilage, ligament and synovial lining of coracohumeral and glenohumeral joints
 Glenoid cavity
 Greater tuberosity [tubercle] of humerus
 Humeral head and surgical neck
 Labrum
 Shoulder joint NOS
 Shoulder ligaments [coracohumeral, glenohumeral, glenoid labrum, humeral and rotator interval]

Excludes: Acromioclavicular and sternoclavicular joints (see [2.TB.^^.^^](#))

2.TA.08.^^ Test, shoulder joint

L²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Test, range of motion, shoulder joint

Excludes: Range of motion exercise (with test), shoulder joint (see [1.TA.02.^^](#))

2.TA.08.ZZ using technique NEC

2.TA.70.^^ Inspection, shoulder joint

L²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

2.TA.70.DA using endoscopic [arthroscopic] approach

2.TA.70.LA using open approach

2.TA.71.^.^ Biopsy, shoulder joint**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Aspiration of synovial fluid for diagnostic purposes

2.TA.71.DA using endoscopic [arthroscopic] approach
 2.TA.71.HA using percutaneous (needle) approach
 2.TA.71.LA using open approach

2.TB.^.^.^ Diagnostic Interventions on the Acromioclavicular and Sternoclavicular Joints

Includes: Acromioclavicular, coracoacromial, coracoclavicular, coracohumeral ligaments
 Acromion
 Coracoid process
 Distal end of clavicle with acromion
 Sternoclavicular articular disc
 Sternoclavicular, costoclavicular and interclavicular ligaments
 Subacromial bursa and capsule
 Subacromial space

2.TB.70.^.^ Inspection, acromioclavicular and sternoclavicular joints**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Inspection of acromioclavicular joints alone
 Inspection of sternoclavicular joints alone

2.TB.70.DA using endoscopic [arthroscopic] approach
 2.TB.70.LA using open approach

2.TB.71.^.^ Biopsy, acromioclavicular and sternoclavicular joints**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Aspiration of synovial fluid for diagnostic purposes
 Biopsy of acromioclavicular joints alone
 Biopsy of sternoclavicular joints alone

2.TB.71.DA using endoscopic [arthroscopic] approach
Includes: that for access to acromioclavicular joint
 2.TB.71.HA using percutaneous (needle) approach
 2.TB.71.LA using open approach

2.TC.^.^.^ Diagnostic Interventions on the Rotator Cuff

Includes: Infraspinatus
 Subscapularis
 Supraspinatus and teres minor muscles and tendons

2.TC.70.^.^ Inspection, rotator cuff**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

2.TC.70.DA using endoscopic [arthroscopic] approach
 2.TC.70.LA using open approach

2.TC.71.^.^ Biopsy, rotator cuff**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

2.TC.71.DA using endoscopic [arthroscopic] approach
 2.TC.71.HA using percutaneous (needle) approach
 2.TC.71.LA using open approach

2.TK.^.^.^ Diagnostic Interventions on the Humerus

Includes: Epiphysis and periosteum of humerus
 Supracondylar ridge [lateral and medial] of humerus

Excludes: Articular surface of distal humerus (elbow) (see [2.TM.^.^.^](#))
 Articular surface of proximal humerus (shoulder) (see [2.TA.^.^.^](#))
 Capitulum of humerus (see [2.TM.^.^.^](#))
 Epicondyles [lateral and medial], humerus (see [2.TM.^.^.^](#))
 Greater tuberosity [tubercle], humerus (see [2.TA.^.^.^](#))
 Head of humerus (see [2.TA.^.^.^](#))
 Surgical neck of humerus (see [2.TA.^.^.^](#))
 Trochlea of humerus (see [2.TM.^.^.^](#))

2.TK.71.^.^ Biopsy, humerus**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

2.TK.71.HA using percutaneous (needle) approach
 Includes: that using large bore needle, trocar, or needle NOS

2.TK.71.LA using open approach

2.TM.^.^ Diagnostic Interventions on the Elbow Joint

Includes: Articular surface of distal humerus
 Articular surface of proximal radius and ulna
 Bursa, capsule, cartilage, ligaments and synovial lining of radiohumeral joint
 Bursa, capsule, cartilage, ligaments and synovial lining of ulnohumeral joint
 Distal humerus [capitulum]
 Elbow joint NOS
 Epicondyles (medial and lateral)
 Olecranon
 Radial head and neck
 Trochlea
 Tubercle
 Ulnar coronoid process

2.TM.08.^.^ Test, elbow joint**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Test, range of motion, elbow joint

Excludes: Range of motion exercise (with testing), elbow joint (see [1.TM.02.^.](#))

2.TM.08.ZZ using technique NEC

2.TM.70.^.^ Inspection, elbow joint**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

2.TM.70.DA using endoscopic [arthroscopic] approach

2.TM.70.LA using open approach

2.TM.71.^.^ Biopsy, elbow joint**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

2.TM.71.DA using endoscopic [arthroscopic] approach
 2.TM.71.HA using percutaneous (needle) approach
 2.TM.71.LA using open approach

2.TV.^.^.^ Diagnostic Interventions on the Radius and Ulna

Includes: Epiphysis or periosteum of radius and ulna
 Radius NOS
 Tuberosity of radius
 Tuberosity of ulna
 Ulna NOS

Excludes: Articular surface of distal radius and ulna (see [2.UC.^.^.^](#))
 Articular surface of proximal radius and ulna (see [2.TM.^.^.^](#))
 Olecranon (see [2.TM.^.^.^](#))
 Radius, head and neck (see [2.TM.^.^.^](#))
 Ulna, coronoid process and tubercle (see [2.TM.^.^.^](#))

2.TV.71.^.^ Biopsy, radius and ulna**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

2.TV.71.HA using percutaneous (needle) approach
 Includes: that using large bore needle, trocar, or needle NOS
 2.TV.71.LA using open approach

2.TX.^.^ Diagnostic Interventions on the Soft Tissue of Arm

Includes: Muscles of the arm [around shoulder]
 Muscles of the forearm [around elbow]
 Soft tissue neoplasm arising in or extending into soft tissue of arm [any site]
 Tendons of the arm
 Tendons of the forearm
 Wound of soft tissue of arm

Excludes: Skin or subcutaneous tissue of arm alone (see [2.YT.^.^](#))
 Soft tissue neoplasm extending into humerus (see [2.TK.^.^](#))
 Soft tissue neoplasm extending into radius and ulna (see [2.TV.^.^](#))
 Soft tissue of hand alone (see [2.UY.^.^](#))

2.TX.70.^.^ Inspection, soft tissue of arm**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: that using operating microscope

Excludes: that of hand and wrist (see [2.UY.70.^.](#))

Code Also: Any intraoperative use of operating microscope (see [3.TZ.94.^.](#))

2.TX.70.LA using open [incisional] approach

2.TX.71.^.^ Biopsy, soft tissue of arm**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Excludes: that of skin and subcutaneous tissue only (see [2.YT.71.^^](#))

2.TX.71.HA using percutaneous (needle) approach
Includes: Large bore needle or fine needle biopsy
 2.TX.71.LA using open [incisional] approach

2.TZ.^^.^^ Diagnostic Interventions on the Arm

2.TZ.08.^^ Test, arm

L²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Excludes: Electromyography (EMG), arm (see [2.TZ.24.^^](#))
 that for hand alone (see [2.UY.08.^^](#))

2.TZ.08.ZZ using technique NEC

2.TZ.20.^^ Size measurement, arm

L²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Measurement, arm (length, circumference)

2.TZ.20.ZZ using technique NEC

2.TZ.24.^ Electrophysiological measurement, arm**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Electromyography (EMG), arm

Excludes: Electromyography, hand only (see [2.UY.24.^](#))

Note: Involves measuring electrical activity in muscles of arms and hands at rest, following voluntary contractions and following electrical stimulation

2.TZ.24.HA-JA	using needle electrodes percutaneously inserted
2.TZ.24.JA-JA	using surface electrodes externally applied

Diagnostic Interventions on the Hand and Wrist (2UB - 2UY)

2.UB.^^.^^ Diagnostic Interventions on the Wrist Joint

Includes: Articular disc, bursa, capsule, cartilage, ligament and synovial lining
 Radial tubercle
 Radiocarpal and ulnocarpal joints
 Styloid process, radius and ulna
 Ulnar head

Excludes: Carpal joint(s) or bone(s) alone (see [2.UC.^^.^^](#))
 Distal radioulnar joint alone (see [2.UC.^^.^^](#))

2.UB.08.^^ Test, wrist joint

L²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Test, range of motion, wrist joint

Excludes: Range of motion exercise (with testing), wrist joint (see [1.UB.02.^^](#))
 Test, range of motion multiple joints of hand (see [2.UL.08.^^](#))

2.UB.08.ZZ using technique NEC

2.UB.70.^^ Inspection, wrist joint

L²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Inspection, distal radioulnar and carpal joints
Inspection, radiocarpal and ulnocarpal joints

2.UB.70.DA using endoscopic [arthroscopic] approach
2.UB.70.LA using open approach

2.UB.71.^.^ Biopsy, wrist joint

L ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Aspiration of synovial fluid for diagnostic purposes
Excludes: Biopsy, distal radioulnar and carpal joints (see [2.UC.71.^.^](#))

2.UB.71.DA using endoscopic [arthroscopic] approach
2.UB.71.HA using percutaneous (needle) approach
2.UB.71.LA using open approach

2.UC.^.^.^ Diagnostic Interventions on the Distal Radioulnar Joint and Carpal Joints and Bones

Includes: Capsule
Carpal bones: capitate [os magnum], hamate [unciform], lunate [semilunar], navicular [scaphoid], pisiform, trapezoid, triquetrum [cuneiform of carpus]
Carpal joints
Carpometacarpal joint
Cartilage ligament and synovial lining of carpal and radioulnar joints
Intercarpal joints
Midcarpal joints
Radioulnar joint
Volar wrist ligaments

Excludes: Radiocarpal and ulnocarpal joints of wrist (see [2.UB.^.^.^](#))

2.UC.71.^.^ Biopsy, distal radioulnar joint and carpal joints and bones**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Biopsy, bones of wrist
 Biopsy, carpal bones
 Biopsy, distal radioulnar and carpal joints

2.UC.71.HA using percutaneous (needle) approach
Includes: that using large bore needle, trocar, or needle NOS
 2.UC.71.LA using open approach

2.UF.^.^.^ Diagnostic Interventions on Other Metacarpal Bones

Includes: Diagnostic interventions on the first metacarpal bone

2.UF.71.^.^ Biopsy, other metacarpal bones**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Biopsy, bones of hand NOS

2.UF.71.HA using percutaneous (needle) approach
Includes: that using large bore needle, trocar, or needle NOS
 2.UF.71.LA using open approach

2.UJ.^^.^^ Diagnostic Interventions on Other Phalanx of Hand

Includes: Bones of fingers NOS
First phalanx of hand
Tuft of distal phalanx

2.UJ.71.^^ Biopsy, other phalanx of hand**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Biopsy, bones of fingers and thumb

2.UJ.71.HA using percutaneous (needle) approach
Includes: that using large bore needle, trocar, or needle NOS
 2.UJ.71.LA using open approach

2.UL.^^.^^ Diagnostic Interventions on the Joints of Finger and Hand NEC

Includes: Interphalangeal joint(s)
Metacarpophalangeal joint(s)

2.UL.08.^^ Test, joints of fingers and hand NEC**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Test, range of motion, joints of hand and fingers
Excludes: Range of motion exercise (with testing) (see [1.UL.02.^^](#))

2.UL.08.ZZ using technique NEC

2.UL.70.^.^ Inspection, joints of fingers and hand NEC**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Inspection, metacarpophalangeal and interphalangeal joints

2.UL.70.DA using endoscopic (arthroscopic) approach
 2.UL.70.LA using open approach

2.UL.71.^.^ Biopsy, joints of fingers and hand NEC**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Biopsy, metacarpophalangeal and interphalangeal joints

2.UL.71.DA using endoscopic [arthroscopic] approach
 2.UL.71.HA using percutaneous (needle) approach
 2.UL.71.LA using open approach

2.UY.^.^ Diagnostic Interventions on the Soft Tissue of the Wrist and Hand

Includes: Abductor pollicis longus and brevis
 Adductor pollicis
 Deep palmar space
 Dorsal extensor [fascial] compartments
 Extensor digitorum communis, extensor indicis proprius, extensor pollicis longus and brevis
 Extrinsic muscles of hand and wrist: Extensor wad of three [extensor carpi radialis longus and brevis, brachioradialis]
 Fascia of hand NOS
 Flexor pollicis longus
 Flexor wad of five [flexor carpi ulnaris and radialis, palmaris longus, flexor digitorum superficialis and profundus, pronator teres and quadratus, supinator]

Hypothenar [opponens digiti minimi, flexor digiti quinti brevis, abductor digiti quinti or minimi]
 Intrinsic muscles of hand: Lumbricales, dorsal interossei, volar interossei
 Muscles of hand, thumb and fingers NOS
 Neoplasm of soft tissue [arising in or extending into muscle] of hand or wrist
 Palmar fascia
 Retinacula [digital, flexor and extensor]
 Thenar [opponens pollicis, abductor pollicis brevis, flexor pollicis brevis]
 Thenar space
 Wounds of soft tissue of wrist and hand

Excludes: Skin and subcutaneous tissue of wrist and hand (see [2.YU.^^.^^](#))

2.UY.08.^^ Test, soft tissue of the wrist and hand

L²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Excludes: Muscle testing of entire arm (see [2.TZ.08.^^](#))

2.UY.08.ZZ using technique NEC

2.UY.24.^^ Electrophysiological measurement, soft tissue of the wrist and hand

L²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Electromyography (EMG), hand

2.UY.24.HA-JA using needle electrodes percutaneously applied
 2.UY.24.JA-JA using surface electrodes externally applied

2.UY.70.^ ^ Inspection, soft tissue of the wrist and hand**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: that using operating microscope

Excludes: that of arm (see [2.TX.70.^ ^](#))

2.UY.70.LA using open [incisional] approach

2.UY.71.^ ^ Biopsy, soft tissue of the wrist and hand**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Excludes: that of skin and subcutaneous tissue only (see [2.YU.71.^ ^](#))

2.UY.71.HA using percutaneous (needle) approach

Includes: Large bore needle or fine needle biopsy

2.UY.71.LA using open [incisional] approach

Diagnostic Interventions on the Hip and Leg (2VA - 2VZ)

2.VA.^^.^^ Diagnostic Interventions on the Hip Joint

Includes: Acetabulum with femoral head or neck and supporting joint structures [bursa, capsule, cartilage, synovium, ligament teres]
Hip joint NOS

Excludes: Acetabulum alone (see [2.SQ.^^.^^](#))
Hip joint with entire pelvis (see [2.SQ.^^.^^](#))
Sacroiliac joint (see [2.SF.^^.^^](#))
Trochanter of femur alone (see [2.VC.^^.^^](#))

2.VA.08.^^ Test, hip joint

L²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Test, range of motion, hip joint

Excludes: Range of motion exercise (with testing), hip joint (see [1.VA.02.^^](#))

2.VA.08.ZZ using technique NEC

2.VA.70.^^ Inspection, hip joint

L²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

2.VA.70.DA using endoscopic [arthroscopic] approach

2.VA.70.LA using open approach

2.VA.71.^.^ Biopsy, hip joint**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Aspiration of synovial fluid for diagnostic purposes

2.VA.71.DA using endoscopic [arthroscopic] approach
 2.VA.71.HA using percutaneous (needle) approach
 2.VA.71.LA using open approach

2.VC.^.^.^ Diagnostic Interventions on the Femur

Includes: Intertrochanter of femur
 Pertrochanter of femur
 Trochanter [greater and lesser] of femur

Excludes: Articular surface of distal femur (knee) (see [2.VG.^.^.^](#))
 Articular surface of proximal femur (hip) (see [2.VA.^.^.^](#))
 Femoral condyle [medial and lateral] (see [2.VG.^.^.^](#))
 Femoral head (see [2.VA.^.^.^](#))
 Femoral neck (see [2.VA.^.^.^](#))
 Femoral tubercle [adductor] (see [2.VG.^.^.^](#))

2.VC.20.^.^ Size measurement, femur**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Measurement, femur (length)
Excludes: Measurement, entire leg (see [2.VZ.20.^^](#))
 Measurement, girth of thigh (see [2.VZ.20.^^](#))

2.VC.20.ZZ using technique NEC

2.VC.71.^^ Biopsy, femur

L²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Excludes: Core decompression biopsy, femoral head (see [2.VA.71.^^](#))

2.VC.71.HA using percutaneous (needle) approach
Includes: that using large bore needle, trocar, or needle NOS
 2.VC.71.LA using open approach

2.VG.^^.^^ Diagnostic Interventions on the Knee Joint

Includes: Articular surface of distal femur
 Articular surface of proximal tibia and fibula
 Bursa, capsule, cartilage, ligaments of knee NEC
 Femoral medial and lateral condyles and epicondyles
 Knee NOS
 Synovial lining of tibiofibular and tibiofemoral joints of knee
 Tibial plateau, medial and lateral condyles

2.VG.08.^^ Test, knee joint

L²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Test, range of motion, knee joint
Excludes: Range of motion exercise (with testing), knee joint (see [1.VG.02.^^](#))

2.VG.08.ZZ using technique NEC

2.VG.70.^^ Inspection, knee joint

L²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

2.VG.70.DA using endoscopic [arthroscopic] approach

2.VG.70.LA using open approach

2.VG.71.^^ Biopsy, knee joint

L²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Aspiration of synovial fluid for diagnostic purposes

2.VG.71.DA using endoscopic [arthroscopic] approach

2.VG.71.HA using percutaneous (needle) approach

2.VG.71.LA using open approach

2.VK.^^.^^ Diagnostic Interventions on the Meniscus of Knee

Includes: Lateral, medial meniscus
 Posterior meniscomfemoral ligament
 Semilunar cartilage
Excludes: Meniscus with cruciate and collateral ligaments (see [2.VN.^^.^^](#))

2.VK.71.^.^ Biopsy, meniscus of knee**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

2.VK.71.DA using endoscopic [arthroscopic] approach
 2.VK.71.HA using percutaneous (needle) approach
 2.VK.71.LA using open approach

2.VN.^.^.^ Diagnostic Interventions on the Cruciate with Collateral Ligaments of Knee

Includes: Cruciate with collateral ligaments with or without meniscus of knee

2.VN.71.^.^ Biopsy, cruciate with collateral ligaments of knee**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Biopsy, cruciate and collateral ligaments of knee

2.VN.71.DA using endoscopic [arthroscopic] approach
 2.VN.71.LA using open approach

2.VP.^.^.^ Diagnostic Interventions on the Patella

Includes: Knee cap
 Patellar ligaments
 Patellofemoral joint

2.VP.71.^.^ Biopsy, patella**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

2.VP.71.DA using endoscopic [arthroscopic] approach
 2.VP.71.HA using percutaneous (needle) approach
 Includes: that using large bore needle, trocar, or needle NOS
 2.VP.71.LA using open approach

2.VQ.^.^.^ Diagnostic Interventions on the Tibia and Fibula

Includes: Epiphysis of tibia and fibula
 Fibula NOS
 Neck of fibula
 Periosteum of tibia and fibula
 Skeletal tissue below knee and above ankle
 Tibia NOS
 Tuberosity of tibia

Excludes: Articular surface of distal tibia and fibula (ankle) (see [2.WA.^.^.](#))
 Articular surface of proximal tibia and fibula (knee) (see [2.VG.^.^.](#))
 Condyle [medial and lateral] of tibia (see [2.VG.^.^.](#))
 Head of tibia and fibula (see [2.VG.^.^.](#))
 Malleolus [medial and lateral] (see [2.WA.^.^.](#))
 Tibial plateau (see [2.VG.^.^.](#))

2.VQ.71.^.^ Biopsy, tibia and fibula**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

2.VQ.71.HA using percutaneous (needle) approach
Includes: that using large bore needle, trocar, or needle NOS

2.VQ.71.LA using open approach

2.VX.^.^.^ Diagnostic Interventions on the Soft Tissue of Leg

Includes: Muscles and tendons of hip, thigh and lower leg
 Neoplasm arising in or extending as deep as muscle or tendon, lower leg
 Soft tissue of hip and thigh
 Soft tissue of leg (any site)
 Wound of leg

Excludes: Skin and subcutaneous tissue of leg alone (see [2.YV.^.^](#))
 Soft tissue neoplasm extending into femur (see [2.VC.^.^](#))
 Soft tissue neoplasm extending into tibia and fibula (see [2.VQ.^.^](#))
 Soft tissue of foot only (see [2.WV.^.^](#))

2.VX.70.^.^ Inspection, soft tissue of leg**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: that of hip and thigh
 that using operating microscope

Excludes: that of foot and ankle (see [2.WV.70.^.](#))

2.VX.70.LA using open [incisional] approach

2.VX.71.^.^ Biopsy, soft tissue of leg**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: that of hip and thigh**Excludes:** that of skin and subcutaneous tissue only (see [2.YV.71.^.](#))

2.VX.71.HA using percutaneous (needle) approach

Includes: Large bore needle or fine needle biopsy

2.VX.71.LA using open [incisional] approach

2.VZ.^.^.^ Diagnostic Interventions on the Leg**2.VZ.08.^.^ Test, leg****L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

2.VZ.08.ZZ using technique NEC

2.VZ.20.^ Size measurement, leg**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Measurement, leg (length, circumference)

Excludes: that for femur alone (see [2.VC.20.^](#))

2.VZ.20.ZZ using technique NEC

2.VZ.24.^ Electrophysiological measurement, leg**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Electromyography (EMG), leg

Note: Involves measuring electrical activity in muscles of legs and feet at rest, following voluntary contractions and following electrical stimulation

2.VZ.24.HA-JA using needle electrodes percutaneously inserted

2.VZ.24.JA-JA using surface electrodes externally applied

Diagnostic Interventions on the Ankle and Foot (2WA - 2WV)

2.WA.^.^ Diagnostic Interventions on the Ankle Joint

Includes: Articular surface of distal tibia and fibula
Bursa, capsule, cartilage, synovial lining of ankle
Malleolus [lateral and medial]
Supratotal joint
Tibiotalar joint

2.WA.08.^.^ Test, ankle joint

L 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Test, range of motion, ankle joint

Excludes: Range of motion exercise (with testing), ankle joint (see [1.WA.02.^.](#))

2.WA.08.ZZ using technique NEC

2.WA.70.^.^ Inspection, ankle joint

L 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

2.WA.70.DA using endoscopic [arthroscopic] approach

2.WA.70.LA using open approach

2.WA.71.^.^ Biopsy, ankle joint**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Aspiration of synovial fluid for diagnostic purposes

2.WA.71.DA using endoscopic [arthroscopic] approach
 2.WA.71.HA using percutaneous (needle) approach
 2.WA.71.LA using open approach

2.WH.^.^ Diagnostic Interventions on the Foot and Toe Joint

Includes: Interphalangeal joints
 Intertarsal joints [hindfoot, midfoot]
 Metatarsophalangeal joints
 Tarsometatarsal joints

2.WH.70.^.^ Inspection, foot and toe joint**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Inspection of intertarsal, tarsometatarsal, metatarsophalangeal, and interphalangeal joints

2.WH.70.DA using endoscopic [arthroscopic] approach
 2.WH.70.LA using open approach

2.WH.71.^.^ Biopsy, foot and toe joint**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Biopsy of intertarsal, tarsometatarsal, metatarsophalangeal, and interphalangeal joints

2.WH.71.DA using endoscopic [arthroscopic] approach
 2.WH.71.HA using percutaneous (needle) approach
 2.WH.71.LA using open approach

2.WL.^.^ Diagnostic Interventions on the Phalanx of Foot

Includes: Hallux
 Tuft of toe

2.WL.71.^.^ Biopsy, phalanx of foot**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Biopsy, bones of toes and hallux

2.WL.71.HA using percutaneous (needle) approach
Includes: that using large bore needle, trocar, or needle NOS
 2.WL.71.LA using open approach

2.WQ.^.^ Diagnostic Interventions on the Tarsal Bones**2.WQ.71.^.^ Biopsy, tarsal bones****L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Biopsy, bones of hindfoot [midfoot]
Biopsy, calcaneus

2.WQ.71.HA using percutaneous (needle) approach
Includes: that using large bore needle, trocar, or needle NOS
2.WQ.71.LA using open approach

2.WS.^.^ Diagnostic Interventions on the Metatarsal Bones**2.WS.71.^.^ Biopsy, metatarsal bones****L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Biopsy, bones of forefoot
Excludes: that of toes and hallux (see [2.WL.71.^.](#))

2.WS.71.HA using percutaneous (needle) approach
Includes: that using large bore needle, trocar, or needle NOS
2.WS.71.LA using open approach

2.WV.^^.^^ Diagnostic Interventions on the Soft Tissue of the Foot and Ankle

- Includes:**
- [Quadratus] plantaris
 - Abductor and adductor hallucis muscles
 - Abductor digiti muscle of foot
 - Extensor digitorum brevis muscle of foot
 - Interossei, intrinsic and extrinsic muscles of foot
 - Ligaments of foot
 - Peroneus [longus, brevis, tertius] muscles
 - Plantar fascia
 - Soft tissue [neoplasm] arising in or extending into foot
 - Tendons of ankle and foot
 - Tibialis posterior, flexor digitorum longus, flexor hallucis longus muscles
 - Wound, soft tissue of foot and ankle
- Excludes:**
- Gastrocnemius and soleus muscles (see [2.VX.^^.^^](#))

2.WV.70.^^ Inspection, soft tissue of the foot and ankle**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: that using operating microscope

Excludes: that of lower leg (see [2.VX.70.^^](#))

2.WV.70.LA using open [incisional] approach

2.WV.71.^ ^ Biopsy, soft tissue of the foot and ankle**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Excludes: that of skin and subcutaneous tissue only (see [2.YV.71.^ ^](#))

2.WV.71.HA using percutaneous (needle) approach
Includes: Large bore needle or fine needle biopsy
 2.WV.71.LA using open [incisional] approach

Diagnostic Interventions on the Musculoskeletal System NEC(2WX - 2WZ)

2.WY.^.^ Diagnostic Interventions on the Bone Marrow

2.WY.71.^.^ Biopsy, bone marrow

Excludes: that for procurement of bone marrow for transplant (see [1.WY.58.^.](#))

2.WY.71.HA	using percutaneous (needle) approach
	Includes: that using large bore needle, trocar or needle NOS

2.WZ.^.^ Diagnostic Interventions on the Musculoskeletal System

2.WZ.08.^.^ Test, musculoskeletal system NEC

Includes: Test, muscles of body NOS (e.g. multiple sites of body)

Excludes: Analysis of physical demands (see [6.VA.08.^.](#))
 Motor and living skills testing (see [6.VA.08.^.](#))
 that for muscles of arm alone (see [2.TZ.08.^.](#))
 that for muscles of hand alone (see [2.UY.08.^.](#))
 that for muscles of leg alone (see [2.VZ.08.^.](#))
 that for muscles of trunk alone (see [2.SY.08.^.](#))

2.WZ.08.ZZ	using technique NEC
------------	---------------------

2.WZ.20.^.^ Size measurement, musculoskeletal system NEC

Includes: Height, body
 Measurement, body (girth)
 Size measurement, multiple body parts

Excludes: that for measurement of arm length alone (see [2.TZ.20.^.](#))
 that for measurement of femur length alone (see [2.VC.20.^.](#))
 that for measurement of leg length alone (see [2.VZ.20.^.](#))
 that for measurement of skull circumference alone (see [2.EA.20.^.](#))

2.WZ.20.ZZ	using technique NEC
------------	---------------------

Diagnostic Interventions on the Skin, Subcutaneous Tissue and Breast (2YA - 2YZ)

2.YA.^.^ Diagnostic Interventions on the Scalp

- Includes:** Hair and hair follicles
Hair bearing skin of scalp
- Excludes:** Overlapping sites involving skin of scalp with skin of face (see [2.YF.^.^](#))
Overlapping sites involving skin of scalp with skin of neck (see [2.YG.^.^](#))

2.YA.71.^.^ Biopsy, scalp

- | | |
|------------|---|
| 2.YA.71.HA | using percutaneous approach (needle, punch) |
| 2.YA.71.LA | using open [incisional] approach |

2.YB.^.^ Diagnostic Interventions on Skin of Forehead

- Includes:** Eyebrow alone
Forehead alone
Forehead and eyebrow
- Excludes:** Overlapping sites involving skin of forehead with skin of face (see [2.YF.^.^](#))

2.YB.71.^.^ Biopsy, skin of forehead

- | | |
|------------|---|
| 2.YB.71.HA | using percutaneous approach (needle, punch) |
| 2.YB.71.LA | using open [incisional] approach |

2.YC.^.^ Diagnostic Interventions on Skin of Ear

- Includes:** Ear lobe [lobule]
External auricular canal
- Excludes:** Overlapping sites involving skin of ear with skin of face (see [2.YF.^.^](#))

2.YC.71.^.^ Biopsy, skin of ear

- | | |
|------------|---|
| 2.YC.71.HA | using percutaneous approach (needle, punch) |
| 2.YC.71.LA | using open [incisional] approach |

2.YD.^.^ Diagnostic Interventions on Skin of Nose

Excludes: Nose, internal structure (see [2.ET.^.^](#))

2.YD.71.^.^ Biopsy, skin of nose

2.YD.71.HA	using percutaneous approach (needle, punch)
2.YD.71.LA	using open [incisional] approach

2.YE.^.^ Diagnostic Interventions on the Lip

Includes: Mucosa of lip

Excludes: Oral cavity [and surrounding structures] (see [2.FK.^.^](#))
 Oral mucosa (see [2.FG.^.^](#))
 Overlapping sites involving skin of lip with skin of face (see [2.YF.^.^](#))

2.YE.71.^.^ Biopsy, lip

2.YE.71.HA	using percutaneous approach (needle, punch)
2.YE.71.LA	using open [incisional] approach

2.YF.^.^ Diagnostic Interventions on Skin of Face

Includes: Skin of cheek
 Skin of chin
 Skin of overlapping sites of face, neck and scalp

Excludes: Overlapping sites involving skin of neck with skin of scalp alone (see [2.YG.^.^](#))
 Skin of ear alone (see [2.YC.^.^](#))
 Skin of forehead alone (see [2.YB.^.^](#))
 Skin of lip alone (see [2.YE.^.^](#))
 Skin of nose alone (see [2.YD.^.^](#))
 Skin of scalp alone (see [2.YA.^.^](#))

2.YF.71.^.^ Biopsy, skin of face

2.YF.71.HA	using percutaneous approach (needle, punch)
2.YF.71.LA	using open [incisional] approach

2.YG.^.^ Diagnostic Interventions on Skin of Neck

- Includes:** Overlapping sites of skin of neck with skin of scalp
- Excludes:** Overlapping sites involving skin of neck with skin of face (see [2.YF.^.^](#))
 Skin of face alone (see [2.YF.^.^](#))
 Skin of scalp alone (see [2.YA.^.^](#))

2.YG.71.^.^ Biopsy, skin of neck

2.YG.71.HA	using percutaneous approach (needle, punch)
2.YG.71.LA	using open [incisional] approach

2.YK.^.^ Diagnostic Interventions on the Nipple

- Includes:** Accessory nipple
Areola
- Excludes:** Lactiferous ducts alone (see [2.YL.^.^](#))
Nipple with breast (see [2.YM.^.^](#))

2.YK.70.^.^ Inspection, nipple**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Exploration, nipple and areolar complex

2.YK.70.LA	using open [incisional] approach
------------	----------------------------------

2.YK.71.^ ^ Biopsy, nipple**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

2.YK.71.HA using percutaneous approach (needle, punch)

2.YK.71.LA using open [incisional] approach

2.YL.^ ^.^ Diagnostic Interventions on the Lactiferous Duct*Includes:* Mammary ducts**2.YL.71.^ ^ Biopsy, lactiferous duct****L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

2.YL.71.HA using percutaneous (needle) approach

2.YL.71.LA using open approach

2.YM.^.^ Diagnostic Interventions on the Breast

Includes: Fascial covering of breast
 Lactiferous ducts with breasts
 Lobular tissue of breast
 Nipple and areolar tissue with breast
 Retromammary space
 Skin of breast with breast
 Suspensory ligaments of Cooper (intralobular fascia)

Excludes: Lactiferous ducts alone (see [2.YL.^.^](#))
 Nipple alone (see [2.YK.^.^](#))
 Skin of breast alone (see [2.YS.^.^](#))

2.YM.70.^.^ Inspection, breast**L** 2

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Examination, breast
 Exploration, breast

2.YM.70.DA using endoscopic approach
 2.YM.70.JA using manual (palpation) technique
 2.YM.70.LA using open approach

Includes: Inspection by incision, breast

2.YM.71.^.^ Biopsy, breast**L** 72

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 72	Mandatory	Bilaterality Mandatory	Location	B	Bilateral
				L	Left
				R	Right
				U	Unilateral unspecified

Includes:	Core biopsy
Excludes:	Excisional biopsy (see 1.YM.87.^^) Lumpectomy (see 1.YM.87.^^)
2.YM.71.HA	using percutaneous (needle) aspiration Includes: Fine needle aspiration
2.YM.71.HA-GX	using percutaneous approach and device NEC Includes: percutaneous rotating biopsy device vacuum assisted device
2.YM.71.HB	using percutaneous approach and core needle aspiration technique Includes: that with a small incision to permit insertion of large bore core biopsy needle
2.YM.71.LA	using open approach

2.YR.^^.^^ Diagnostic Interventions on Skin of Axillary Region

Includes:	Axillary sweat glands
Excludes:	Overlapping sites involving skin of axillary region with skin of abdomen and trunk region (see 2.YS.^^.^^) Overlapping sites involving skin of axillary region with skin of upper extremities (see 2.YZ.^^.^^)

2.YR.71.^^ Biopsy, skin of axillary region

2.YR.71.HA	using percutaneous approach (needle, punch)
2.YR.71.LA	using open [incisional] approach

2.YS.^^.^^ Diagnostic Interventions on Skin of Abdomen and Trunk

Includes:	Skin of abdomen Skin of back Skin of breast Skin of buttock Skin of thorax Skin of trunk (single, multiple, overlapping sites)
Excludes:	Skin of axillary region alone (see 2.YR.^^.^^) Skin of penis alone (see 2.QE.^^.^^) Skin of perineum alone (see 2.RY.^^.^^) Skin of scrotum alone (see 2.QG.^^.^^) Skin of vulva alone (see 2.RW.^^.^^)

2.YS.71.^.^ Biopsy, skin of abdomen and trunk

Includes: Biopsy, skin of back
Biopsy, skin of breast
Biopsy, skin of buttock
Biopsy, skin of chest

Excludes: Biopsy, breast tissue (see [2.YM.71.^.^](#))

2.YS.71.HA using percutaneous approach (needle, punch)

2.YS.71.LA using open [incisional] approach

2.YT.^.^.^ Diagnostic Interventions on Skin of Arm

Includes: Skin of arm with hand
Skin of shoulder, arm and wrist

Excludes: Overlapping site(s) involving skin of upper extremity with skin of trunk (see [2.YZ.^.^.^](#))
Skin of axillary region alone (see [2.YR.^.^.^](#))
Skin of hand (with or without arm involvement) (see [2.YU.^.^.^](#))

2.YT.71.^.^ Biopsy, skin of arm

Includes: Biopsy, skin of shoulder, arm and wrist

Excludes: Biopsy, skin of hand (see [2.YU.71.^.^](#))

2.YT.71.HA using percutaneous approach (needle, punch)

2.YT.71.LA using open [incisional] approach

2.YU.^.^.^ Diagnostic Interventions on Skin of Hand

Includes: Skin of finger
Skin of hand with arm involvement

Excludes: Skin of wrist (see [2.YT.^.^.^](#))

2.YU.71.^.^ Biopsy, skin of hand

2.YU.71.HA using percutaneous approach (needle, punch)

2.YU.71.LA using open [incisional] approach

2.YV.^.^ Diagnostic Interventions on Skin of Leg

- Includes:** Skin of thigh, leg and ankle
- Excludes:** Overlapping sites involving skin of leg with trunk (see [2.YZ.^.^](#))
Skin of foot (with or without leg involvement) (see [2.YW.^.^](#))

2.YV.71.^.^ Biopsy, skin of leg

- Includes:** Biopsy, skin of thigh, leg, and ankle
- Excludes:** Biopsy, skin of foot (see [2.YW.71.^.](#))

2.YV.71.HA	using percutaneous approach (needle, punch)
2.YV.71.LA	using open [incisional] approach

2.YW.^.^ Diagnostic Interventions on Skin of Foot

- Includes:** Skin of foot (with or without leg involvement) (overlapping sites)
Skin of toes
- Excludes:** Skin of ankle (see [2.YV.^.^](#))

2.YW.71.^.^ Biopsy, skin of foot

2.YW.71.HA	using percutaneous approach (needle, punch)
2.YW.71.LA	using open [incisional] approach

2.YX.^.^ Diagnostic Interventions on the Nail

- Includes:** Lateral and proximal nail fold
Nail bed
Nail matrix
Nail plate

2.YX.71.^.^ Biopsy, nail

2.YX.71.HA	using percutaneous (through nail) approach (needle, punch) Includes: punch biopsy, nail bed
2.YX.71.LA	using open approach

2.YZ.^.^ Diagnostic Interventions on Skin NEC

- Includes:** Skin of overlapping (or multiple) sites involving trunk with arm or leg
Skin of overlapping sites of body NEC
- Excludes:** Skin of axilla with other trunk (back, breast, chest) site (see [2.YS.^.^](#))
Skin of overlapping sites of face, scalp and neck (see [2.YF.^.^](#))
Skin of overlapping sites of scalp and neck (see [2.YG.^.^](#))

2.YZ.28.^ Pressure measurement, skin NEC

- Includes:** Manometry, interstitial (fluid)

2.YZ.28.JA-PL	using pressure measuring device (e.g. wick catheter, needle manometer)
---------------	--

Diagnostic Interventions on the Body System NEC (2ZZ)

2.ZZ.^.^ Diagnostic Interventions on the Total Body

Includes: Whole body NOS

2.ZZ.02.^.^ Assessment (examination), total body

S 38 **M** 2 **E** 25

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 38	Mandatory	Mandatory Dx Status 5	Status	0	Not applicable
				N	Initial (general assessment)
				N1	Repeat (general assessment)
				P	Routine (periodic general exam or assessment)
				P1	Pre (operative or treatment assessment)
				U	Initial consultation (specialty referral)
				V	Repeat consultation (specialty referral)
				Z	Other NEC
M 2	Optional	Type of delivery 2	Location	D I	Direct delivery (health care provider is face to face with client)
				I N	Indirect (service delivered at a distance e.g. telephone, telemedicine with health care provider not physically present with client)
E 25	Optional	Time parameter 1	Extent	C M	Comprehensive
				L T	Limited (brief)

Includes: Assessment, diagnostic NEC
 Assessment, rehabilitation
 Consultation, diagnostic
 Establishment, diagnosis
 Establishment, treatment plan
 Evaluation, diagnostic
 Examination, general (physical)
 Interview, diagnostic
 Postoperative followup with examination
 Well baby followup with examination

Excludes:	Assessment, activities of daily living (ADL) (see 6.VA.02.^) Assessment, antepartum obstetrical (see 5.AB.01.^) Assessment, environment (see 7.SE.02.^) Assessment, esophageal (swallowing) function (see 2.NA.02.^) Assessment, laryngeal function (see 6.RA.02.^) Assessment, life coping skills (see 6.VA.02.^) Assessment, postpartum obstetrical (see 5.PB.01.^) Assessment, psychiatric (see 6.AA.02.^) Assessment, use of assistive (adaptive) equipment (see 6.VA.02.^)
Code Also:	Any concomitant assessment of placement requirements (see 7.SF.02.^) Any concomitant assessment of treatment eligibility (see 7.SF.02.^) Any concomitant counseling for (existing) health risk (see 7.SP.10.^) Any concomitant instruction in self care (see 7.SP.59.^) Any eye examination (see 2.CZ.02.^) Any gynecological examination (see 2.RZ.02.^) Any hearing examination (see 2.DZ.02.^) Any prostate examination (see 2.QT.70.^) Any rectal examination (see 2.NQ.70.^)
Note:	Involves evaluating a client's condition, problem or functional status to establish a diagnosis, and/or identify treatment or rehabilitation measures, and/or monitor a client's response to an existing treatment/rehabilitation plan. Also includes, where applicable, ordering diagnostic investigations, reviewing results, prescribing medications and counseling patient.
2.ZZ.02.PM	for assistance in dying Includes: Consultation for medical assistance in dying (MAID) Note: Use the status attribute to identify initial and repeat consultations for MAID. Select status attribute "U-initial consultation" when it is the patient's first consultation to determine candidacy for MAID. Select status attribute "V-repeat consultation" for any MAID consultation(s) occurring after the initial consultation for MAID. If MAID is performed, identify the provision of assistance in dying (see 7.SC.08.PM) and all pharmacological agents used for MAID should be coded (see 1.ZZ.35.^).
2.ZZ.02.ZS	for nutrition status (primarily)
2.ZZ.02.ZT	for pharmacy profile (primarily)
2.ZZ.02.ZU	for physiological function only (primarily)
	Includes: Rehabilitation (needs) assessment
2.ZZ.02.ZX	for determining candidacy for treatment NEC
	Excludes: for assistance in dying (see 2.ZZ.02.PM)
2.ZZ.02.ZZ	general NEC (e.g. multiple reasons)

2.ZZ.03.^ ^ Observation and monitoring, total body**M** 2 **E** 63

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
M 2	Optional	Type of delivery 2	Location	D I	Direct delivery (health care provider is face to face with client)
				I N	Indirect (service delivered at a distance e.g. telephone, telemedicine with health care provider not physically present with client)
E 63	Optional	One on one	Extent	I N	Individual client with one health care provider (one on one)

Includes: Close observation and monitoring NOS
 General observation and monitoring, vital signs
 Observation and monitoring, detoxification (withdrawal)
 Observation and monitoring, health status

Excludes: Monitoring, healing wound (see [2.ZZ.29.^ ^](#))
 Monitoring, insulin and medication levels (see [2.ZZ.29.^ ^](#))
 Observation and monitoring for self harm (potential) (see [6.AA.03.^ ^](#))

Code Also: Any concomitant security precaution (see [7.SC.70.^ ^](#))

2.ZZ.03.ZZ using technique NEC

2.ZZ.08.^ ^ Test, total body

Includes: Test, allergy
 Test, sensitivity (skin)
 Test, tuberculin

Note: Involves testing for sensitivity to various allergenic products, extracts, microorganisms, drugs, venoms, etc.

2.ZZ.08.^ ^ Test, total body	allergenic extracts	microorganisms [e.g. tuberculin]	drugs	venoms	other biological products
method used for testing					
intracutaneous [intra dermal] injection, immediate type reaction	2.ZZ.08.MA	2.ZZ.08.MF	2.ZZ.08.ML	2.ZZ.08.MQ	2.ZZ.08.MU
intracutaneous [intra dermal] injection, delayed type reaction	2.ZZ.08.MB	2.ZZ.08.MG	—	—	—
scratch test	2.ZZ.08.MC	2.ZZ.08.MH	2.ZZ.08.MM	2.ZZ.08.MR	2.ZZ.08.MV
patch [or application] test	2.ZZ.08.MD	2.ZZ.08.MJ	2.ZZ.08.MN	2.ZZ.08.MS	2.ZZ.08.MW
photopatch test	2.ZZ.08.ME	2.ZZ.08.MK	2.ZZ.08.MP	2.ZZ.08.MT	2.ZZ.08.MX

2.ZZ.13.^ ^ Specimen collection (for diagnostic testing), total body**E** 68

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 68	Optional	Specimen Handling	Extent	R A	Preparation and analysis (of results)
				R C	Review analysis (of results) only
				T R	Preparation (specimen) only

Excludes: that done by drainage/aspiration (see Drainage or aspiration, by site)
that done for biopsy (see Biopsy, by site)
that done for transfusion (see [1.LZ.19.^ ^](#))
that for bone marrow biopsy/aspiration (see [2.WY.71.^ ^](#))

2.ZZ.13.RA	blood by venous puncture
2.ZZ.13.RB	blood by catheterization of femoral vein
2.ZZ.13.RC	blood by catheterization of vein NEC
2.ZZ.13.RD	blood by capillary puncture
2.ZZ.13.RE	blood by arterial puncture
2.ZZ.13.RF	blood by catheterization of femoral artery
2.ZZ.13.RG	blood by catheterization of artery NEC
	Includes: Umbilical artery catheterization
2.ZZ.13.RH	urine by catheterization
	Excludes: that obtained from previously installed collection bag
2.ZZ.13.RJ	urine quantitative samples
	Includes: that for quantitative samples [e.g. 24 hour collection]
2.ZZ.13.RK	urine NEC
	Includes: that for random or clean catch urine samples
2.ZZ.13.RL	sweat
2.ZZ.13.RM	microbiology swab
	Includes: that obtained from wound, nose, throat, eyes, other body parts
2.ZZ.13.ZZ	specimen NEC
	Includes: that obtained for microdialysis

2.ZZ.29.^ ^ Other measurement NEC, total body**S** 21 **M** 2 **E** 26

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 21	Optional	Dx status 2	Status	N	Initial (assessment)
				P	Routine (repeat)
				Z	Other NEC
M 2	Optional	Type of delivery 2	Location	D I	Direct delivery (health care provider is face to face with client)
				I N	Indirect (service delivered at a distance e.g. telephone, telemedicine with health care provider not physically present with client)
E 26	Optional	Delivery size parameter 1	Extent	G R	Group of clients with one health care provider
				G S	Group of clients with multiple health care providers
				I M	Individual client with multiple health care providers
				I N	Individual client with one health care provider

Includes: Followup postoperative visit
Followup well baby visit (subsequent to initial postnatal visit)
Monitoring, healing process (e.g. ulcer, hernia, wound)
Monitoring, insulin levels
Monitoring, medication levels (e.g. coumadin, digoxin, phenobarb)

Excludes: First postnatal well baby visit (see [5.PB.01.^ ^](#))
Followup postoperative visit with examination (see [2.ZZ.02.^ ^](#))
Followup well baby visit with examination (see [2.ZZ.02.^ ^](#))
Monitoring, neurological signs (see [2.AZ.03.^ ^](#))
Monitoring, nutrition (see [2.OZ.29.^ ^](#))
Monitoring, respiration (see [2.GZ.29.^ ^](#))
Monitoring, vital signs (see [2.ZZ.03.^ ^](#))
that with a general physical assessment or exam (see [2.ZZ.02.^ ^](#))

Note: Involves activities relating to the collection, analysis and interpretation of client data to prevent/minimize complications

Omit code: When monitoring is accompanied by a related therapeutic intervention.

2.ZZ.29.ZZ using technique NEC

2.ZZ.94.^.^ Other diagnostic intervention NEC, total body

Includes:	Injection of agents, for diagnostic purposes that done for diagnostic stimulation testing that done to stimulate body/organ function/secretion
Excludes:	Therapeutic injection (see Pharmacotherapy)
Omit code:	When injection is performed as part of radiological intervention.

2.ZZ.94.UJ	intravenous injection
2.ZZ.94.UK	oral administration
2.ZZ.94.UL	intramuscular injection
2.ZZ.94.UM	subcutaneous injection
2.ZZ.94.ZZ	technique NEC

Section 3 - Diagnostic Imaging Interventions

Excludes:

actual diagnostic or therapeutic interventions where image assistance is used (these should be coded separately)
examinations which are unique to the state of pregnancy [e.g. obstetrical ultrasound] or the fetus [e.g. Doppler of fetal heart] (see Section 5)
interventions which are therapeutic in nature [e.g. radio-iodine therapy, angioplasty] (see Section 1)

Tabular List of Diagnostic Imaging Interventions

Diagnostic Imaging Interventions on the Nervous System (3AF - 3AW)

3.AF.^.^ Diagnostic Imaging Interventions on the Pituitary Region

Includes: Sella turcica

3.AF.10.^.^ Xray, pituitary region

Includes: Xray, sella turcica

3.AF.10.VA	without contrast (e.g. plain film)
------------	------------------------------------

3.AF.18.^.^ Tomography, pituitary region

Includes: Tomography, sella turcica

3.AF.18.VA	without contrast (e.g. plain film)
------------	------------------------------------

3.AF.20.^.^ Computerized tomography [CT], pituitary region

Includes: CAT scan, sella turcica

Omit code: When CT scan is performed as part of a SPECT or PET diagnostic nuclear imaging study, hybrid/fusion technique, single machine (see Diagnostic nuclear (imaging) (scan) study, by site)

3.AF.20.VA	without contrast
------------	------------------

3.AF.20.WC	with contrast
------------	---------------

3.AF.40.^.^ Magnetic resonance imaging [MRI], pituitary region

Includes: MRI, sella turcica

3.AF.40.VA	without contrast
------------	------------------

3.AF.40.WC	with contrast
------------	---------------

3.AN.^.^ Diagnostic Imaging Interventions on the Brain**3.AN.10.^.^ Xray, brain**

Includes: Encephalography
that for ventricles of brain

3.AN.10.VJ following subarachnoid injection of contrast (with or without fluoroscopy)

3.AN.10.WX following catheter injection of contrast (with or without fluoroscopy)

Includes: Contrast administered via ventricular shunt
Shuntogram, intracranial

Excludes: that using radionuclide (see [3.AN.70.^.](#))

3.AN.12.^.^ Fluoroscopy, brain**S** ¹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Fluoroscopic guidance, brain (interventions)

Excludes: that for fluoroscopic guidance, intracranial vessels (see [3.JX.12.^.](#))
that with xray (see [3.AN.10.^.](#))

3.AN.12.VA without contrast

3.AN.20.^.^ Computerized tomography [CT], brain

Includes: CAT scan, brain
that for meninges, ventricles, cerebellum, brain stem, cisterna [of brain], posterior fossa

Excludes: that to specifically visualize blood vessels of the head and neck region (see [3.JX.20.^.](#))
that to visualize total head (region) (see [3.ER.20.^.](#))

Omit code: When CT scan is performed as part of a SPECT or PET diagnostic nuclear imaging study, hybrid/fusion technique, single machine (see Diagnostic nuclear (imaging (scan) study, by site)

3.AN.20.VA without contrast

3.AN.20.WC with contrast

3.AN.30.^ ^ Ultrasound, brain**S** ¹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Echoencephalography
that for meninges, ventricles, cerebellum, brain stem, cisterna [of brain], posterior fossa
Transcranial (intracranial) ultrasound
Ultrasound guidance, brain (interventions)

3.AN.30.DA	alone
3.AN.30.DB	with color flow
3.AN.30.DC	with Doppler
3.AN.30.DD	with color flow and Doppler
3.AN.30.DE	with transoral alone

3.AN.40.^ ^ Magnetic resonance imaging [MRI], brain**S** ¹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: MRI, brain
that for meninges, ventricles, cerebellum, brain stem, cisterna [of brain], posterior fossa

3.AN.40.VA	without contrast
3.AN.40.WC	with contrast

3.AN.70.^ ^ Diagnostic nuclear (imaging) study, brain**E** ³³

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 33	Optional	Nuclear (imaging) study parameter	Extent	C M	Complete study
				L T	Limited study

Includes: Cisternography
Nuclear medicine NEC, brain
Scan, brain
that for CSF flow imaging or leakage studies
that with radionuclide injection into ventricular (shunt) reservoir
Ventriculography, cerebral

3.AN.70.CA	using scintigraphy
	Includes: Brain scan NOS
3.AN.70.CB	using scintigraphy with vascular flow
3.AN.70.CC	using SPEC tomography (SPECT)
3.AN.70.CD	using SPEC tomography (SPECT) with CSF flow (imaging)
3.AN.70.CE	using PE tomography (PET)
3.AN.70.CF	using PE tomography (PET) with CSF flow (imaging)
3.AN.70.CH	using SPEC tomography (SPECT) with CT hybrid technique, single machine
3.AN.70.CJ	using PE tomography (PET) with CT hybrid technique, single machine

3.AN.94.^.^ Imaging intervention NEC, brain

Includes: Guidance, computer assisted [e.g. neuronavigator, viewing wand], brain
Guidance, stereotactic (computer), brain
Imaging assistance, brain (intervention)
Visualization, by operating microscope, brain

Omit code: when imaging is performed concomitantly with robotic assisted telemanipulation of tools (see [7.SF.14.^.](#))

3.AN.94.ZA	using microscope
3.AN.94.ZB	using computer (with or without stereotaxis)
3.AN.94.ZC	using stereotaxis (without computer guidance)

3.AW.^.^.^ Diagnostic Imaging Interventions on the Spinal Cord

Includes: Nuclear medicine NEC, spinal cord (spinal canal) that for CSF flow imaging or leakage studies

3.AW.10.^ ^ Xray, spinal cord**L** 88

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 88	Optional	Spine 3	Location	C T	Cervicothoracic
				C X	Cervical alone
				L B	Lumbar alone
				L S	Lumbosacral
				S P	Complete spine (or spine NEC)
				T H	Thoracic only
				T L	Thoracolumbar

Includes: Epidurography
Myelogram, spinal canal
Myelography, spine (posterior fossa)

3.AW.10.VJ following subarachnoid injection of contrast (with or without fluoroscopy)
3.AW.10.VM following epidural injection of contrast (with or without fluoroscopy)
3.AW.10.WX following catheter (shunt or pump) injection of contrast (with or without fluoroscopy)

Includes: Shuntogram, spinal
that with contrast injection into spinal shunt or infusion pump

3.AW.12.^ ^ Fluoroscopy, spinal cord**S** 1 **L** 88

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative
L 88	Optional	Spine 3	Location	C T	Cervicothoracic
				C X	Cervical alone
				L B	Lumbar alone
				L S	Lumbosacral
				S P	Complete spine (or spine NEC)
				T H	Thoracic only
				T L	Thoracolumbar

Includes: Fluoroscopic guidance, spinal cord (interventions)

Excludes: that with xray (see [3.AW.10.^ ^](#))

3.AW.12.VA without contrast
3.AW.12.VM following epidural injection of contrast

3.AW.30.^ ^ Ultrasound, spinal cord**S** 1 **L** 88

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative
L 88	Optional	Spine 3	Location	C T	Cervicothoracic
				C X	Cervical alone
				L B	Lumbar alone
				L S	Lumbosacral
				S P	Complete spine (or spine NEC)
				T H	Thoracic only
				T L	Thoracolumbar

Includes: Ultrasound guidance, spinal cord (intervention)
 Ultrasound, spinal canal

3.AW.30.DA alone
 3.AW.30.DB with color flow
 3.AW.30.DC with Doppler
 3.AW.30.DD with color flow and Doppler

3.AW.70.^ ^ Diagnostic nuclear (imaging) study, spinal cord**E** 33

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 33	Optional	Nuclear (imaging) study parameter	Extent	C M	Complete study
				L T	Limited study

Includes: Nuclear medicine NEC, spinal cord (spinal canal)
 that for CSF flow imaging or leakage studies

3.AW.70.CC using SPEC tomography (SPECT)
 3.AW.70.CD using SPEC tomography (SPECT) with CSF flow (imaging)
Includes: that using radionuclide injection into spinal shunt or infusion pump reservoir
 3.AW.70.CE using PE tomography (PET)
 3.AW.70.CF using PE tomography (PET) with CSF flow (imaging)
Includes: that using radionuclide injection into spinal shunt or infusion pump reservoir
 3.AW.70.CH using SPEC tomography (SPECT) with CT hybrid technique, single machine
 3.AW.70.CJ using PE tomography (PET) with CT hybrid technique, single machine

3.AW.94.^ ^ Imaging intervention NEC, spinal cord

Includes:	Guidance, computer assisted [e.g. neuronavigator, viewing wand], spinal cord Guidance, stereotactic (computer), spinal cord Imaging assistance, spinal cord (intervention) Visualization, by operating microscope, spinal cord
Omit code:	when imaging is performed concomitantly with robotic assisted telemanipulation of tools (see 7.SF.14.^ ^)

3.AW.94.ZA	using microscope
3.AW.94.ZB	using computer
3.AW.94.ZC	using stereotaxis (without computer guidance)

Diagnostic Imaging Interventions on the Eye and Ocular Adnexa (3CA - 3CZ)

3.CA.^.^ Diagnostic Imaging Interventions on the Orbit of Eye

3.CA.10.^ Xray, orbit of eye

L²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: that for detection of foreign body within eye
Xray, eye (alone) (with socket or orbital rim)

Excludes: that specifically to visualize the ophthalmic vessels (see [3.JS.10.^](#))
Xray, whole face (see [3.EI.10.^](#))

3.CA.10.VA without contrast (e.g. plain film) (with or without fluoroscopy)

3.CA.12.^ Fluoroscopy, orbit of eye

S¹ L²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Fluoroscopic guidance, orbit (of eye) (interventions)
Fluoroscopy, eye
that for detection of foreign body within eye

Excludes: that for ophthalmic vessels (see [3.JX.12.^](#))
that with xray (see [3.CA.10.^](#))

3.CA.12.VA without contrast

3.CA.18.^ ^ Tomography, orbit of eye**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: that for detection of foreign body within eye
Tomography, eye

3.CA.18.VA without contrast

3.CA.20.^ ^ Computerized tomography [CT], orbit of eye**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Computerized tomography, eye

3.CA.20.VA without contrast

3.CA.20.WC with contrast

3.CA.30.^ ^ Ultrasound, orbit of eye**S**¹ **L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Ultrasound guidance, orbit (of eye) (interventions)
 Ultrasound, eye

Excludes: that specifically to visualize the ophthalmic vessels (see [3.JS.30.^^](#))

3.CA.30.FA imaging study
 3.CA.30.FD biometric study

3.CA.40.^^ Magnetic resonance imaging [MRI], orbit of eye

L²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Magnetic resonance imaging [MRI], eye

3.CA.40.VA without contrast
 3.CA.40.WC with contrast

3.CU.^^.^^ Diagnostic Imaging Interventions on the Lacrimal Excretory System

3.CU.10.^^ Xray, lacrimal excretory system

L²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Dacryocystography
 Xray, nasolacrimal duct

3.CU.10.HH following per orifice interductal injection of contrast (with or without fluoroscopy)
 3.CU.10.VA without contrast (e.g. plain film)

3.CU.12.^ ^ Fluoroscopy, lacrimal excretory system**S** 1

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Fluoroscopic guidance, lacrimal excretory system (interventions)

Excludes: that with xray (see [3.CU.10.^ ^](#))

3.CU.12.VA without contrast

3.CU.70.^ ^ Diagnostic nuclear (imaging) study, lacrimal excretory system**E** 33

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 33	Optional	Nuclear (imaging) study parameter	Extent	C M	Complete study
				L T	Limited study

Includes: Dacryocystography, nuclear (radionuclide)
Nuclear medicine, nasolacrimal duct

3.CU.70.CA using scintigraphy
3.CU.70.CC using SPEC tomography (SPECT)
3.CU.70.CE using PE tomography (PET)

3.CZ.^.^ Diagnostic Imaging Interventions on the Eye NEC**3.CZ.94.^.^ Imaging intervention NEC, eye NEC**

Includes:	Goniophotography Guidance, computer assisted [e.g. neuronavigator, viewing wand], eye Guidance, stereotactic (computer), eye Photography (slit lamp, stereo), eye Photography, ocular Photography, retina Visualization, by operating microscope, eye
Omit code:	when imaging is performed concomitantly with robotic assisted telemanipulation of tools (see 7.SF.14.^.)
3.CZ.94.ZA	using microscope
3.CZ.94.ZB	using computer
3.CZ.94.ZC	using stereotaxis (without computer guidance)
3.CZ.94.ZE	using camera
3.CZ.94.ZF	using light source (infrared)
	Includes: Optical coherence tomography

Diagnostic Imaging Interventions on the Ears and Mastoid (Process) (3DL- 3DZ)

Diagnostic Imaging Interventions on the Middle Ear [Tympanic Cavity] (3DL)

3.DL.^.^ Diagnostic Imaging Interventions on the Mastoid (process)

Includes:

- Mastoid bone
- Mastoid portion of temporal bone
- Mastoid process
- Petrous apex
- Petrous pyramid air cells

3.DL.10.^.^ Xray, mastoid (process)

3.DL.10.VA without contrast (e.g. plain film) (with or without fluoroscopy)

3.DL.12.^.^ Fluoroscopy, mastoid (process)

S¹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Fluoroscopic guidance, mastoid process (interventions)

Excludes: that with xray (see [3.DL.10.^.](#))

3.DL.12.VA without contrast

3.DL.18.^.^ Tomography, mastoid (process)

Includes: Polytomography, mastoid (process)
that with hypercycloidal [complex motion] technique

3.DL.18.VA without contrast

3.DL.40.^.^ Magnetic resonance imaging [MRI], mastoid (process)

3.DL.40.VA without contrast

3.DL.40.WC with contrast

Diagnostic Imaging Interventions on the Inner Ear (3DR - 3DZ)

3.DR.^.^ Diagnostic Imaging Interventions on the Inner Ear NEC

Includes: Internal auditory canal

3.DR.10.^ Xray, inner ear NEC

3.DR.10.VA	without contrast (e.g. plain film) (with or without fluoroscopy)
3.DR.10.VV	following per orifice injection of contrast (with or without fluoroscopy)

3.DR.12.^ Fluoroscopy, inner ear NEC

S 1

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Fluoroscopic guidance, inner ear NEC (interventions)

Excludes: that with xray (see [3.DR.10.^](#))

3.DR.12.VA	without contrast
------------	------------------

3.DR.20.^ Computerized tomography [CT], inner ear NEC

Includes: CAT scan, internal auditory canal

3.DR.20.VA	without contrast
3.DR.20.WC	with contrast

3.DR.40.^ Magnetic resonance imaging [MRI], inner ear NEC

Includes: MRI, acoustic nerve

3.DR.40.VA	without contrast
3.DR.40.WC	with contrast

3.DZ.^.^ Diagnostic Imaging Interventions on the Ear NEC**3.DZ.94.^.^ Imaging intervention NEC, ear NEC**

Includes: Guidance, computer assisted [e.g. viewing wand], ear
Visualization, by operating microscope, ear

3.DZ.94.ZA	using microscope
3.DZ.94.ZB	using computer
3.DZ.94.ZC	using stereotaxis (without computer guidance)

Diagnostic Imaging Interventions on the Orocraniofacial Region (3EA - 3FY)

Diagnostic Imaging Interventions on Musculoskeletal Tissue of Head and Nasal Cavity (3EA - 3EY)

3.EA.^.^ Diagnostic Imaging Interventions on the Cranium

- Includes:** Cranial base
Cranial suture or ligament
Frontal, parietal, temporal, occipital bone
Skull NOS
- Excludes:** Face NEC [whole face NOS] (see [3.EI.^.^](#))
Malar bone (see [3.EB.^.^](#))
Mandible (see [3.EE.^.^](#))
Maxilla (see [3.ED.^.^](#))
Zygoma (see [3.EB.^.^](#))

3.EA.10.^.^ Xray, cranium

- Includes:** that for stereotactic studies of cranium (preoperative)

3.EA.10.VA without contrast (e.g. plain film) (with or without fluoroscopy)

3.EA.12.^.^ Fluoroscopy, cranium

S¹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

- Includes:** Fluoroscopic guidance, cranium (interventions)
that for stereotactic studies of cranium (preoperative)

Excludes: that with xray (see [3.EA.10.^.](#))

3.EA.12.VA without contrast

3.EA.18.^.^ Tomography, cranium

- Includes:** that for stereotactic studies of cranium (preoperative)
tomography, head

3.EA.18.VA without contrast (e.g. plain film)

3.EA.20.^.^ Computerized tomography [CT], cranium

Includes: CAT scan, cranium

3.EA.20.VA without contrast

3.EA.20.WC with contrast

3.EA.94.^.^ Imaging intervention NEC, cranium

Includes: Guidance, computer assisted [e.g. viewing wand], cranium

Guidance, stereotactic (computer), cranium

Omit code: when imaging is performed concomitantly with robotic assisted telemanipulation of tools (see [7.SF.14.^.^](#))

3.EA.94.ZB using computer (stereotactic computer guidance)

3.EA.94.ZC using stereotaxis without computer guidance

3.EB.^.^.^ Diagnostic Imaging Interventions on the Zygoma

Includes: Malar bone
Zygomatic arch

3.EB.10.^.^ Xray, zygoma

3.EB.10.VA without contrast (e.g. plain film)

3.ED.^.^.^ Diagnostic Imaging Interventions on the Maxilla

Excludes: That with mandible (see [3.EF.^.^.^](#))

3.ED.10.^.^ Xray, maxilla

Excludes: (Ortho)pantogram, maxilla and mandible (see [3.EF.10.^.^](#))
Dental xrays (see [3.FE.10.^.^](#))

3.ED.10.VA without contrast (e.g. plain film) (with or without fluoroscopy)

3.ED.12.^.^ Fluoroscopy, maxilla**S**¹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Fluoroscopic guidance, maxilla (interventions)

Excludes: that with xray (see [3.ED.10.^.](#))

3.ED.12.VA without contrast

3.ED.94.^.^ Imaging intervention NEC, maxilla

Includes: Guidance, computer assisted [e.g. viewing wand], maxilla

Guidance, stereotactic (computer), maxilla

Omit code: when imaging is performed concomitantly with robotic assisted telemanipulation of tools (see [7.SF.14.^.](#))

3.ED.94.ZB using computer (stereotactic computer guidance)

3.ED.94.ZC using stereotaxis (without computer guidance)

3.EE.^.^ Diagnostic Imaging Interventions on the Mandible

Excludes: Coronoid process of mandible alone (see [3.EL.^.^](#))

Mandibular condyle alone (see [3.EL.^.^](#))

3.EE.10.^.^ Xray, mandible

Excludes: (Ortho)pantogram, mandible and maxilla (see [3.EF.10.^.](#))

Dental xrays (see [3.FE.10.^.](#))

3.EE.10.VA without contrast (e.g. plain film) (with or without fluoroscopy)

3.EE.12.^.^ Fluoroscopy, mandible**S**¹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Fluoroscopic guidance, mandible (interventions)
Excludes: that for temporomandibular joint [TMJ] (see [3.EL.12.^^](#))
 that with xray (see [3.EE.10.^^](#))

3.EE.12.VA without contrast

3.EE.94.^^ Imaging intervention NEC, mandible

Includes: Guidance, computer assisted [e.g. viewing wand], mandible
 Guidance, stereotactic (computer), mandible
Omit code: when imaging is performed concomitantly with robotic assisted telemanipulation of tools (see [7.SF.14.^^](#))

3.EE.94.ZB using computer (stereotactic computer guidance)
 3.EE.94.ZC using stereotaxis (without computer guidance)

3.EF.^^.^^ Diagnostic Imaging Interventions on the Maxilla with Mandible

Excludes: Mandible alone (see [3.EE.^^.^^](#))
 Maxilla alone (see [3.ED.^^.^^](#))

3.EF.10.^^ Xray, maxilla with mandible

Includes: Orthopantomogram
 Pantogram
 Pantography (orthopantomography) [Panorex] maxilla with mandible (TM joint)
Excludes: Dental xrays (see [3.FE.10.^^](#))
 Pantography (orthopantomography) [Panorex] teeth (see [3.FE.10.^^](#))
 Xray, mandible alone (see [3.EE.10.^^](#))
 Xray, maxilla alone (see [3.ED.10.^^](#))

3.EF.10.AS with pantomography (orthopantomography) [Panorex]
 3.EF.10.VA without contrast (e.g. plain film) (with or without fluoroscopy)

3.EI.^^.^^ Diagnostic Imaging Interventions on the Facial Bone Structure

3.EI.10.^^ Xray, facial bone structure

Includes: Xray, face NOS
 Xray, facial bone NOS

3.EI.10.VA without contrast (e.g. plain film)

3.EL.^^.^^ Diagnostic Imaging Interventions on the Temporomandibular Joint [TMJ]**3.EL.10.^^ Xray, temporomandibular joint [TMJ]****L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Arthrography, temporomandibular joint

Excludes: (Ortho)pantogram, maxilla with mandible (see [3.EF.10.^^](#))
Pantomography (orthopantomography) [Panorex] temporomandibular joint [TMJ] with maxilla and mandible (see [3.EF.10.^^](#))

3.EL.10.VA without contrast (e.g. plain film) (with or without fluoroscopy)
3.EL.10.VL with intraarticular injection of contrast (with or without fluoroscopy)

3.EL.12.^^ Fluoroscopy, temporomandibular joint [TMJ]**S**¹ **L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Fluoroscopic guidance, temporomandibular joint [TMJ] (interventions)

Excludes: that with xray (see [3.EL.10.^^](#))

3.EL.12.AY with cine/video recording (with or without intraarticular injection of contrast)
3.EL.12.VA without contrast
3.EL.12.VL with intraarticular injection of contrast

3.EL.18.^ ^ Tomography, temporomandibular joint [TMJ]**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Polytomography, temporomandibular joint [TMJ]
that with hypercycloidal [complex] motion technique

3.EL.18.VA without contrast (e.g. plain film)

3.EL.18.VL with intraarticular injection of contrast

3.EL.20.^ ^ Computerized tomography [CT], temporomandibular joint [TMJ]**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: CAT scan, temporomandibular joint

3.EL.20.VA without contrast

3.EL.20.WC with contrast

3.EL.40.^ ^ Magnetic resonance imaging [MRI], temporomandibular joint [TMJ]

3.EL.40.VA without contrast

3.EL.40.WC with contrast

3.EL.94.^.^ Imaging intervention NEC, temporomandibular joint [TMJ]

Includes:	Guidance, computer assisted, temporomandibular joint Image guidance, temporomandibular joint [TMJ] intervention
Omit code:	when imaging is performed concomitantly with robotic assisted telemanipulation of tools (see 7.SF.14.^.)
3.EL.94.ZB	using computer (with or without stereotaxis)

3.EQ.^.^.^ Diagnostic Imaging Interventions on the Soft tissue of Head and Neck

Includes:	Muscles of the head and neck Soft tissue (abscess, hematomas, wound or neoplasm, sinuses, fistulae) Soft tissue of head and neck NOS
Excludes:	Skin and subcutaneous tissue NEC (see 3.YZ.^.^.) Soft tissue of neck alone (see 3.FY.^.^.)

3.EQ.10.^.^ Xray, soft tissue of head and neck

Includes:	Sinogram or fistulogram, head and neck region
Excludes:	that for nasal sinuses (see 3.EY.10.^.)
3.EQ.10.VA	without contrast (e.g. plain film) (with or without fluoroscopy)
3.EQ.10.VC	following intravenous injection of contrast (with or without fluoroscopy)
3.EQ.10.VZ	following percutaneous injection of contrast (with or without fluoroscopy)

3.EQ.12.^.^ Fluoroscopy, soft tissue of head and neck**S** 1

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes:	Fluoroscopic guidance, soft tissue of head and neck (region) (interventions)
Excludes:	that with xray (see 3.EQ.10.^.)
3.EQ.12.VA	without contrast

3.EQ.30.^.^ Ultrasound, soft tissue of head and neck**S**¹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Sinogram or fistulogram, soft tissue of head and neck
that for fistula or sinus of soft tissue in head and neck
Ultrasound guidance, soft tissue of head and neck (interventions)

Excludes: that for examination of soft tissue of neck alone (see [3.FY.30.^.](#))

3.EQ.30.VA	without contrast
3.EQ.30.VZ	following percutaneous injection of contrast

3.EQ.94.^.^ Imaging intervention NEC, soft tissue of head and neck

Includes: Visualization, by operating microscope, soft tissue of head and neck

Note: May involve visualization of tendon, muscle, nerve or vessels.

3.EQ.94.ZA	using microscope
------------	------------------

3.ER.^.^ Diagnostic Imaging Interventions on the Head NEC**3.ER.20.^.^ Computerized tomography [CT], head NEC**

Includes: CAT scan, total head (region)

Excludes: that specifically to visualize blood vessels of the head and neck region (see [3.JX.20.^.](#))
that specifically to visualize brain (see [3.AN.20.^.](#))
that specifically to visualize cranium (see [3.EA.20.^.](#))
that specifically to visualize eye (see [3.CA.20.^.](#))
that specifically to visualize inner ear or auditory canal (see [3.DR.20.^.](#))
that specifically to visualize nasal sinuses (see [3.EY.20.^.](#))
that specifically to visualize sella turcica (see [3.AF.20.^.](#))
that specifically to visualize temporomandibular joints (see [3.EL.20.^.](#))

Note: Select this rubric when the entire head, structures and contents, are visualized in a single image.

3.ER.20.VA	without contrast
3.ER.20.WC	with contrast

3.ER.30.^.^ Ultrasound, head NEC**S** ¹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Ultrasound guidance, head NEC (interventions)

Excludes: that for blood vessels of head and neck region (see [3.JX.30.^.](#))
that for brain alone (see [3.AN.30.^.](#))
that for examination of soft tissue of head (and neck) (see [3.EQ.30.^.](#))
that for orbit (of eye) alone (see [3.CA.30.^.](#))
that for sinus or fistula of soft tissue of head (and neck)(see [3.EQ.30.^.](#))

3.ER.30.DA	alone
3.ER.30.DB	with color flow
3.ER.30.DC	with Doppler
3.ER.30.DD	with color flow and Doppler

3.ER.40.^.^ Magnetic resonance imaging [MRI], head NEC

Excludes: that specifically to visualize blood vessels of head and neck region (see [3.JX.40.^.](#))
that specifically to visualize brain (see [3.AN.40.^.](#))
that specifically to visualize inner ear or auditory canal (see [3.DR.40.^.](#))
that specifically to visualize mastoid (process) (see [3.DL.40.^.](#))
that specifically to visualize orbit of eye alone (see [3.CA.40.^.](#))
that specifically to visualize sella turcica (see [3.AF.40.^.](#))
that specifically to visualize temporomandibular joints alone (see [3.EL.40.^.](#))

3.ER.40.VA	without contrast
3.ER.40.WC	with contrast

3.ET.^.^ Diagnostic Imaging Interventions on the Nose

Includes: Nasal bone
Nasal bones with cartilage
Nasal cavity
Nasal turbinate

3.ET.10.^.^ Xray, nose

Excludes: that to specifically visualize the nasal sinuses (see [3.EY.10.^.](#))

3.ET.10.VA	without contrast (e.g. plain film) (with or without fluoroscopy)
------------	--

3.ET.12.^.^ Fluoroscopy, nose**S**¹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Fluoroscopic guidance, nose (interventions)

Excludes: that with xray (see [3.ET.10.^.](#))

3.ET.12.VA without contrast

3.EY.^.^.^ Diagnostic Imaging Interventions on the Paranasal Sinuses

Includes: Multiple nasal sinuses (2 or more of the following: ethmoidal, sphenoidal, maxillary, frontal)
Nasal sinus NOS
Pansinus(es)

3.EY.10.^.^ Xray, paranasal sinuses

Includes: Xray, paranasal sinuses

3.EY.10.VA without contrast (e.g. plain film) (with or without fluoroscopy)

3.EY.10.VV following per orifice injection of contrast (with or without fluoroscopy)

3.EY.12.^.^ Fluoroscopy, paranasal sinuses**S**¹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Fluoroscopic guidance, paranasal sinuses (interventions)

Excludes: that with xray (see [3.EY.10.^.](#))

3.EY.12.VA without contrast

3.EY.20.^ **Computerized tomography [CT], paranasal sinuses**

Includes: CAT scan, nasal sinuses

3.EY.20.VA without contrast

3.EY.20.WC with contrast

3.EY.94.^ **Imaging intervention NEC, paranasal sinuses**

Includes: Guidance, computer assisted [e.g. viewing wand], paranasal sinuses

Guidance, stereotactic (computer), paranasal sinuses

Omit code: when imaging is performed concomitantly with robotic assisted telemanipulation of tools (see [7.SF.14.^](#))

3.EY.94.ZB using computer (stereotactic computer guidance)

3.EY.94.ZC using stereotaxis (without computer guidance)

Diagnostic Imaging Interventions on the Oral Cavity and Pharynx (3FE - 3FY)

3.FE.^.^ Diagnostic Imaging Interventions on the Tooth

Includes: Periodontal pocket
Root of tooth

3.FE.10.^.^ Xray, tooth

Includes: Dental xray
Pantomography (orthopantography) [Panorex] teeth

3.FE.10.AP	single tooth/area
3.FE.10.AQ	partial set/series [e.g. multiple teeth]
3.FE.10.AR	full set/series [e.g. all teeth, full mouth]
3.FE.10.AS	with pantography [Panorex] (full mouth)

3.FK.^.^ Diagnostic Imaging Interventions on the Mouth

Includes: Oral cavity

3.FK.94.^.^ Imaging intervention NEC, mouth

Includes: Photography (panoramic), dental
Photography, oral

3.FK.94.ZE	using camera
------------	--------------

3.FP.^.^ Diagnostic Imaging Interventions on the Salivary Glands and Ducts NEC

3.FP.10.^.^ Xray, salivary glands and ducts NEC

Includes: Sialography
that for parotid, submandibular, sublingual glands

3.FP.10.VA	without contrast (with or without fluoroscopy)
3.FP.10.VV	following per orifice (intraductal) injection of contrast (with or without fluoroscopy)

3.FP.12.^.^ Fluoroscopy, salivary glands and ducts NEC**S** 1

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Fluoroscopic guidance, salivary glands and ducts (interventions)

Excludes: that with xray (see [3.FP.10.^.^](#))

3.FP.12.VA without contrast

3.FP.70.^.^ Diagnostic nuclear (imaging) study, salivary glands and ducts NEC**E** 33

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 33	Optional	Nuclear (imaging) study parameter	Extent	C M	Complete study
				L T	Limited study

3.FP.70.CA using scintigraphy

3.FP.70.CC using SPEC tomography (SPECT)

3.FP.70.CE using PE tomography (PET)

3.FP.70.CH using SPEC tomography (SPECT) with CT hybrid technique, single machine

3.FP.70.CJ using PE tomography (PET) with CT hybrid technique, single machine

3.FU.^.^.^ Diagnostic Imaging Interventions on the Thyroid Gland**3.FU.30.^.^ Ultrasound, thyroid gland****S** 1

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Ultrasound guidance, thyroid gland (interventions)

Ultrasound, thyroid (parathyroid) region

3.FU.30.VA without contrast

3.FU.70.^.^ Diagnostic nuclear (imaging) study, thyroid gland**E** 33

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 33	Optional	Nuclear (imaging) study parameter	Extent	C M	Complete study
				L T	Limited study

Includes: nuclear medicine NEC, thyroid gland
radionuclide uptake study

3.FU.70.CA	using scintigraphy
3.FU.70.CC	using SPEC tomography (SPECT)
3.FU.70.CE	using PE tomography (PET)
3.FU.70.CH	using SPEC tomography (SPECT) with CT hybrid technique, single machine
3.FU.70.CJ	using PE tomography (PET) with CT hybrid technique, single machine
3.FU.70.TE	for red cell radioiron utilization

3.FV.^.^.^ Diagnostic Imaging Interventions on the Parathyroid Gland

Excludes: Ultrasound, parathyroid gland (with thyroid) (see [3.FU.30.^.^](#))

3.FV.70.^.^ Diagnostic nuclear (imaging) study, parathyroid gland**E** 33

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 33	Optional	Nuclear (imaging) study parameter	Extent	C M	Complete study
				L T	Limited study

Includes: nuclear medicine NEC, parathyroid glands

3.FV.70.CA	using scintigraphy
3.FV.70.CC	using SPEC tomography (SPECT)
3.FV.70.CE	using PE tomography (PET)

3.FX.^.^.^ Diagnostic Imaging Interventions on the Oropharynx

Includes: Pharynx NEC

Excludes: Pharynx with larynx (see [3.GE.^.^.^](#))

3.FX.10.^ ^ Xray, oropharynx

Includes: that for detection of foreign body in nasopharynx oropharynx

3.FX.10.VA without contrast (e.g. plain film) (with or without fluoroscopy)

3.FX.10.WG following oral administration of contrast (with or without fluoroscopy)

3.FX.12.^ ^ Fluoroscopy, oropharynx**S** ¹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Fluoroscopic guidance, oropharynx (interventions)

Excludes: that with xray, oropharynx (see [3.FX.10.^ ^](#))

3.FX.12.AY with cine/video recording [for dynamic speech evaluation] (with or without contrast)

Includes: Sleep apneogram

3.FX.12.VA without contrast

3.FX.12.WG following oral administration of contrast

3.FX.20.^ ^ Computerized tomography [CT], oropharynx

Includes: CAT scan, nasopharynx, pharynx

3.FX.20.VA without contrast

3.FX.20.WC with contrast

3.FY.^ ^.^ Diagnostic Imaging Interventions on the Soft Tissue of Neck

Includes: Neck NEC

Excludes: Soft tissue of head with neck (see [3.EQ.^ ^.^](#))

3.FY.20.^ ^ Computerized tomography [CT], soft tissue of neck

Includes: CAT scan, neck region (thyroid, parathyroid, soft tissues)
Neck NEC

Excludes: that for blood vessels of head and neck region (see [3.JX.20.^ ^](#))
that for carotid artery (see [3.JE.20.^ ^](#))
that for pharynx (see [3.FX.20.^ ^](#))

Omit code: When CT scan is performed as part of a SPECT or PET diagnostic nuclear imaging study, hybrid/fusion technique, single machine. (See Diagnostic nuclear (imaging) (scan) study, by site)

3.FY.20.VA without contrast
3.FY.20.WC with contrast

3.FY.30.^ ^ Ultrasound, soft tissue of neck**S**¹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Ultrasound guidance, neck region soft tissues (interventions)
Ultrasound, neck region soft tissues only

Excludes: that for examination of soft tissues of head with neck (see [3.EQ.30.^ ^](#))
that for examination of thyroid gland (with parathyroid) region (see [3.FU.30.^ ^](#))

3.FY.30.VA without contrast (e.g. plain film)
3.FY.30.VC following intravenous injection of contrast
3.FY.30.VZ following percutaneous injection of contrast

3.FY.40.^ ^ Magnetic resonance imaging [MRI], soft tissue of neck

Includes: MRI, neck region thyroid, parathyroid, pharynx
Neck NEC

Excludes: that specifically for blood vessels of head and neck region (see [3.JX.40.^ ^](#))

3.FY.40.VA without contrast
3.FY.40.WC with contrast

Diagnostic Imaging Interventions on the Respiratory System (3GE - 3GY)

3.GE.^.^ Diagnostic Imaging Interventions on the Larynx NEC

3.GE.10.^.^ Xray, larynx NEC

Includes: Laryngography

3.GE.10.VA	without contrast (e.g. plain film) (with or without fluoroscopy)
3.GE.10.WG	following oral administration of contrast (with or without fluoroscopy)

3.GE.12.^.^ Fluoroscopy, larynx NEC

S¹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Fluoroscopic guidance, larynx NEC (interventions)

Excludes: Dynamic voice evaluation (see [3.FX.12.^.](#))
that with xray (see [3.GE.10.^.](#))

3.GE.12.VA	without contrast
3.GE.12.WG	following oral administration of contrast

3.GE.20.^.^ Computerized tomography [CT], larynx NEC

Includes: CAT scan, larynx

3.GE.20.VA	without contrast
3.GE.20.WC	with contrast

3.GE.94.^.^ Imaging interventions, larynx NEC

S¹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Video stroboscopy, larynx
Excludes: Fluoroscopic dynamic speech evaluation (see [3.FX.12.^](#))
Code Also: Any concomitant laryngoscopy (see [2.GE.70.^](#))

3.GE.94.AY with cine/video recording

3.GT.^.^ Diagnostic Imaging Interventions on the Lung NEC

Includes: Lobe of lung

3.GT.10.^ Xray, lung NEC

Includes: Bronchography
Excludes: multiple view chest xray (see [3.GY.10.^](#))

3.GT.10.VA without contrast (e.g. plain film) (with or without fluoroscopy)
 3.GT.10.VV following per orifice injection of contrast (with or without fluoroscopy)

3.GT.12.^ Fluoroscopy, lung NEC

S 1

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Bronchofluoroscopy
 Fluoroscopic guidance, lung NEC (interventions)
 that for trachea and bronchus
Excludes: that with xray (see [3.GT.10.^](#))

3.GT.12.VA without contrast
 3.GT.12.VV following per orifice injection of contrast

3.GT.20.^ Computerized tomography [CT], lung NEC

Includes: CAT scan, chest lungs, trachea and bronchus
Omit code: When CT scan is performed as part of a SPECT or PET diagnostic nuclear imaging study, hybrid/fusion technique, single machine. (See Diagnostic nuclear (imaging) (scan) study, by site)

3.GT.20.SZ for placement of localization device (e.g. coil, needle hook, wire)
 3.GT.20.VA without contrast
 3.GT.20.WC with contrast

3.GT.70.^.^ Diagnostic nuclear (imaging) study, lung NEC**E** 33

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 33	Optional	Nuclear (imaging) study parameter	Extent	C M	Complete study
				L T	Limited study

Includes: nuclear medicine NEC, chest scan, lung

Excludes: that to visualize heart disease (see [1.HZ.70.^.^](#))

3.GT.70.CA	using scintigraphy
3.GT.70.CC	using SPEC tomography (SPECT)
3.GT.70.CE	using PE tomography (PET)
3.GT.70.CH	using SPEC tomography (SPECT) with CT hybrid technique, single machine
3.GT.70.CJ	using PE tomography (PET) with CT hybrid technique, single machine
3.GT.70.KC	using scintigraphy for perfusion study
3.GT.70.KD	using scintigraphy for ventilation study
3.GT.70.KE	using scintigraphy for perfusion and ventilation study

3.GY.^.^.^ Diagnostic Imaging Interventions on the Thoracic Cavity NEC

Includes: Chest NOS
Sinuses/fistulous tract

3.GY.10.^.^ Xray, thoracic cavity NEC

Includes: chest NOS, sinuses/fistulous tract
one or more of the following views: frontal, lateral, oblique projections, decubitus
thoracic sinogram or fistulogram
xray, chest

Excludes: that for lungs alone (see [3.GT.10.^.^](#))

3.GY.10.VA	without contrast (with or without fluoroscopy)
3.GY.10.VV	following per orifice injection of contrast (with or without fluoroscopy)
3.GY.10.VZ	following percutaneous injection of contrast [e.g. air, other contrast media] (with or without fluoroscopy)
3.GY.10.WX	following catheter (shunt) injection of contrast (with or without fluoroscopy)
	Includes: Shuntogram, thoracic that for visualization of pleuroperitoneal shunt

3.GY.12.^ ^ Fluoroscopy, thoracic cavity NEC**S**¹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Fluoroscopic guidance, thoracic cavity NEC (interventions) that for imaging of breathing dynamics (diaphragm motility)

Excludes: that of lung alone (see [3.GT.12.^ ^](#))
that with xray (see [3.GY.10.^ ^](#))

3.GY.12.VA without contrast

3.GY.18.^ ^ Tomography, thoracic cavity NEC

Includes: chest NOS, sinuses/fistulous tract
tomography, chest

3.GY.18.VA without contrast

3.GY.18.VV following per orifice injection of contrast

3.GY.18.VZ following percutaneous injection of contrast [air]

3.GY.20.^ ^ Computerized tomography [CT], thoracic cavity NEC

Includes: CAT scan, chest NOS

Excludes: CAT scan, lung(s) and tracheobronchial tree (as focus) (see [3.GT.20.^ ^](#))
CT scan chest, abdomen and pelvis together (total body) (see [3.ZZ.20.^ ^](#))
that for blood vessels of thoracic region (see [3.JY.20.^ ^](#))

Omit code: When CT scan is performed as part of a SPECT or PET diagnostic nuclear imaging study, hybrid/fusion technique, single machine. (See Diagnostic nuclear (imaging) (scan) study, by site)

3.GY.20.VA without contrast

3.GY.20.WC with contrast

3.GY.30.^ ^ Ultrasound, thoracic cavity NEC**S**¹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Chest NOS, sinuses/fistulous tract
 Focused (targeted) assessment sonography [FAS], thoracic cavity
 that for pleura, mediastinum, pericardium
 that to identify masses, pleural effusion
 Ultrasound guidance, thoracic cavity (interventions)
 Ultrasound, chest

3.GY.30.DA	alone
3.GY.30.HE	using transbronchial endoscopic per orifice approach
	Includes: Endobronchial ultrasound (EBUS)
3.GY.30.HJ	using transesophageal approach
	Includes: Endoscopic ultrasound (EUS), thoracic cavity

3.GY.40.^ ^ Magnetic resonance imaging [MRI], thoracic cavity NEC

Includes: chest NOS, sinuses/fistulous tract
 MRI, chest

Excludes: that for blood vessels of thoracic region (see [3.JY.40.^ ^](#))

3.GY.40.VA	without contrast
3.GY.40.WC	with contrast

3.GY.94.^ ^ Imaging intervention NEC, thoracic cavity NEC

Includes: chest NOS, sinuses/fistulous tract
 Visualization, by operating microscope, thoracic cavity

3.GY.94.ZA	using microscope
------------	------------------

Diagnostic Imaging Interventions on the Cardiovascular System (3HA - 3LZ)

Diagnostic Imaging Interventions on the Heart (and related structures) (3HA-3HZ)

3.HZ.^.^ Diagnostic Imaging Interventions on the Heart NEC

3.HZ.12.^.^ Fluoroscopy, heart NEC

S 1

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Fluoroscopic guidance, heart NEC (interventions)

Excludes: that with xray (see [3.IP.10.^.](#))

3.HZ.12.VA without contrast

3.HZ.30.^.^ Ultrasound, heart NEC

S 1

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Ultrasound guidance, heart NEC (interventions)

Excludes: ECG cardiac mapping (see [2.HZ.24.^.](#))
Intravascular (intraarterial) ultrasound [IVUS] (see [3.IJ.30.^.](#))
Ultrasound, heart with coronary arteries (see [3.IP.30.^.](#))

3.HZ.30.GP with percutaneous transluminal (cardiac catheter) inspection

Includes: Intracardiac echo [ICE]

Diagnostic Imaging Interventions on the Great Vessels (3ID - 3IS)

3.ID.^.^ Diagnostic Imaging Interventions on the Aorta NEC

Includes: Aorta NOS
Arch

3.ID.10.^.^ Xray, aorta NEC

Includes: Angiography, aorta [ascending, thoracic, abdominal, arch]
Angiography, combined abdominal with thoracic aorta
Aortic root angiogram
Aortography, NEC
xray with fluoroscopy, aorta NEC

Code Also: Any concomitant xray of heart with coronary arteries (see [3.IP.10.^.](#))

3.ID.10.VC	following intravenous injection of contrast (with or without fluoroscopy)
3.ID.10.VX	following intraarterial injection of contrast (with or without fluoroscopy)
3.ID.10.VY	following intracardiac injection of contrast (with or without fluoroscopy)

3.ID.12.^.^ Fluoroscopy, aorta NEC

S 1

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Fluoroscopic guidance, aorta NEC (interventions)

Excludes: that with xray (see [3.ID.10.^.](#))

3.ID.12.VA	without contrast
------------	------------------

3.ID.20.^.^ Computerized tomography [CT], aorta NEC

Includes: CAT scan, aorta NEC
Computerized tomography [CT] angiography, aorta NEC

Excludes: CAT scan, heart, coronary arteries and aorta (see [3.IP.20.^.](#))
that with heart and coronary arteries (see [3.IP.20.^.](#))

3.ID.20.VA	without contrast
3.ID.20.WC	with contrast

3.ID.30.^.^ Ultrasound, aorta NEC**S**¹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Dopplergram, aorta
 Ultrasound guidance, aorta NEC (interventions)

Excludes: that with heart and coronary arteries (see [3.IP.30.^.^](#))

3.ID.30.DA	transcutaneous ultrasound alone
3.ID.30.DB	transcutaneous with color flow
3.ID.30.DC	transcutaneous with Doppler
3.ID.30.DD	transcutaneous with color flow and Doppler
3.ID.30.GP	intravascular [IVUS]
	Includes: Virtual histology intravascular ultrasound [VH-IVUS]
3.ID.30.HE	transbronchial endoscopic approach
	Includes: Endobronchial ultrasound (EBUS)
3.ID.30.HJ	transesophageal approach
	Includes: Endoscopic ultrasound (EUS)

3.ID.40.^.^ Magnetic resonance imaging [MRI], aorta NEC

Includes: MRI angiography, aorta NEC

Excludes: that with heart and coronary arteries (see [3.IP.40.^.^](#))

3.ID.40.VA	without contrast
3.ID.40.WC	with contrast

3.IJ.^.^.^ Diagnostic Imaging Interventions on the Coronary Arteries

Excludes: Heart with coronary arteries (see [3.IP.^.^.^](#))

3.IJ.12.^ **Fluoroscopy, coronary arteries**

- Includes:** Intraoperative indocyanine green (ICG) fluorescence angiography [e.g. SPY imaging system] for real time assessment of graft patency during CABG
Intraoperative laser fluorescent arteriogram
- Excludes:** Coronary angiogram performed with left cardiac catheterization (see [3.IP.10.^](#))
- Omit code:** Fluoroscopic guidance for catheter placement during cardiac catheterization interventions

3.IJ.12.VA without contrast

3.IJ.30.^ **Ultrasound, coronary arteries****S**¹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

- Includes:** Ultrasound guidance, coronary arteries (interventions)
- Excludes:** Ultrasound, heart with coronary arteries (see [3.IP.30.^](#))

3.IJ.30.GP with percutaneous transluminal (cardiac catheter) inspection

- Includes:** Intravascular ultrasound [IVUS]
- Excludes:** Intracardiac echocardiography (ICE) (see [3.HZ.30.^](#))
-

3.IJ.94.^ **Imaging intervention NEC, coronary arteries****S**¹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

3.IJ.94.ZF using light source (infrared)

Includes: Optical coherence tomography

3.IK.^^.^^ Diagnostic Imaging Interventions on the Coronary Veins

Includes: Anterior cardiac veins
Coronary sinus
Great coronary vein
Middle cardiac veins
Posterior cardiac vein
Small coronary vein

3.IK.10.^^ Xray, coronary veins**S** 1

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Coronary sinus venogram

Code Also: Any concomitant coronary arteriography (see [3.IP.10.^^](#))

3.IK.10.VC following intravenous injection of contrast (with or without fluoroscopy)

3.IM.^^.^^ Diagnostic Imaging Interventions on the Pulmonary Artery

Includes: Ductus arteriosus

3.IM.10.^^ Xray, pulmonary artery

Includes: Angiography, pulmonary
Arteriography, pulmonary
Xray with fluoroscopy, pulmonary arteries

3.IM.10.VC following intravenous injection of contrast (with or without fluoroscopy)
3.IM.10.VX following intraarterial injection of contrast (with or without fluoroscopy)
3.IM.10.VY following intracardiac injection of contrast (with or without fluoroscopy)

3.IM.12.^^ Fluoroscopy, pulmonary artery**S** 1

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Fluoroscopic guidance, pulmonary artery (interventions)

Excludes: that with xray (see [3.IM.10.^^](#))

3.IM.12.VA without contrast

3.IN.^^.^^ Diagnostic Imaging Interventions on the Pulmonary Vein

3.IN.10.^^ Xray, pulmonary vein

Includes: Phlebography, pulmonary
Venography, pulmonary
xray with fluoroscopy, pulmonary veins

3.IN.10.VC following intravenous injection of contrast (with or without fluoroscopy)

3.IN.10.XA following percutaneous transhepatic injection of contrast (with or without fluoroscopy)

3.IN.10.XB following percutaneous transhepatic injection of contrast and hemodynamic evaluation (with or without fluoroscopy)

3.IN.12.^^ Fluoroscopy, pulmonary vein

S¹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Fluoroscopic guidance, pulmonary vein (interventions)

Excludes: that with xray (see [3.IN.10.^^](#))

3.IN.12.VA without contrast

3.IP.^^.^^ Diagnostic Imaging Interventions on the Heart with Coronary Arteries

Excludes: Coronary arteries alone (see [3.IJ.^^.^^](#))
Heart NEC (see [3.HZ.^^.^^](#))

3.IP.10.^ ^ Xray, heart with coronary arteries**S** 55 **L** 20

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 55	Mandatory	Mandatory Coronary (Artery) Angiography	Status	0	Not applicable [i.e. ventriculogram] [for use with 3.IP.10.VC and 3.IP.10.VZ only]
				D X	Diagnostic
				I	Intraoperative
				U N	Unknown [whether diagnostic or intraoperative]
L 20	Mandatory	Mandatory Artery Access	Location	0	Not applicable [i.e. venous approach] [for use with 3.IP.10.VC and 3.IP.10.VZ only]
				C B	Combined [for chronic total occlusion]
				F Y	Femoral artery (left) (right)
				L Y	Left arm artery [e.g. radial, brachial]
				R Y	Right arm artery [e.g. radial, brachial]
				U	Unknown artery

Includes: Angiocardiology, heart structures (left) (right)
 Cardiac catheterization for coronary angiography and/or ventriculography that using rotational (C arm) 3D image capture that with or without fluoroscopy (for catheter placement)

Excludes: Intraoperative fluoroscopy during CABG to test graft patency (see [3.IJ.12.^ ^](#))
 Xray, heart without cardiac catheterization (see [3.GY.10.^ ^](#))

Code Also: Any concomitant aortic root angiography (see [3.ID.10.^ ^](#))
 Any concomitant aortography (see [3.ID.10.^ ^](#))
 Any concomitant coronary sinus venogram (see [3.IK.10.^ ^](#))

Omit code: When cardiac catheterization is the approach to a therapeutic or diagnostic intervention

3.IP.10.VC	of right heart structures using percutaneous transluminal venous (antegrade) approach Includes: Angiocardiography (ventriculogram) of: • pulmonary valve • right atrium • right ventricle (outflow tract) • tricuspid valve Right ventricular angiogram that with ventricular and aortic pressure measurements Excludes: Right cardiac catheterization for cardiac output measurement [e.g. Fick method, thermodilution method] (see 2.HZ.21.^^) Right cardiac catheterization for pulmonary artery pressure measurement (see 2.IM.28.^^) Code Also: Any concomitant coronary angiogram and/or left angiocardiography (see 3.IP.10.VX)
3.IP.10.VX	of left heart structures using percutaneous transluminal arterial (retrograde) approach Includes: (Left) (right) (selective) coronary angiography (arteriography) with or without left ventriculography Angiocardiography (ventriculogram) of: • aortic valve • left ventricle (outflow tract) • mitral valve Left ventricular angiogram (with or without coronary angiogram) that with ventricular and aortic pressure measurements and ejection fraction Code Also: Any concomitant right heart angiocardiography (see 3.IP.10.VC)
3.IP.10.VZ	of left heart structures using percutaneous transluminal transseptal approach Includes: Angiocardiography of left atrium that using percutaneous transluminal venous approach with puncture of the atrial septum to gain access to the left atrium

3.IP.20.^^ Computerized tomography [CT], heart with coronary arteries

Includes:	CAT scan, heart with coronary arteries and aorta Coronary calcium screening CT angiography, heart with coronary arteries
Excludes:	that for aorta alone (see 3.ID.20.^^)
Omit code:	When CT scan is performed as part of a SPECT or PET diagnostic nuclear imaging study, hybrid/fusion technique, single machine. (See Diagnostic nuclear (imaging) (scan) study, by site)
3.IP.20.VA	without contrast
3.IP.20.WC	with contrast

3.IP.30.^ **Ultrasound, heart with coronary arteries****S** ¹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Dopplergram, heart
 Echocardiography, heart
 Transesophageal echocardiography [TEE]
 Transthoracic echocardiography [TTE]
 Ultrasound guidance, heart with coronary arteries (interventions)

Excludes: Intracardiac (catheterization) echocardiography [ICE] (see [3.HZ.30.^](#))
 Intravascular (intraarterial) ultrasound [IVUS] (see [3.IJ.30.^](#))

Code Also: Any associated cardiac stress test (see [2.HZ.08.^](#))

3.IP.30.DA	transcutaneous ultrasound alone
3.IP.30.DB	transcutaneous with color flow
3.IP.30.DC	transcutaneous with Doppler
3.IP.30.DD	transcutaneous with color flow and Doppler
3.IP.30.HA	endoscopic [EUS] (transesophageal) NOS
3.IP.30.HB	endoscopic [EUS] (transesophageal) with color flow
3.IP.30.HC	endoscopic [EUS] (transesophageal) with Doppler
3.IP.30.HD	endoscopic [EUS] (transesophageal) with color flow and Doppler

3.IP.40.^ **Magnetic resonance imaging [MRI], heart with coronary arteries**

Includes: Magnetic resonance angiography, heart with coronary arteries

Excludes: that for aorta alone (see [3.ID.40.^](#))

3.IP.40.VA	without contrast
3.IP.40.WC	with contrast

3.IP.70.^ **Diagnostic nuclear (imaging) study, heart with coronary arteries****E** ³³

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 33	Optional	Nuclear (imaging) study parameter	Extent	C M	Complete study
				L T	Limited study

Includes:	Cardiac shunt detection (using radionuclide) Ejection fraction study (using radionuclide) First pass technique (using radionuclide) Gated SPEC tomography (SPECT) MUGA scan (using radionuclide) Nuclear medicine NEC, cardiac Study, cardiac output (using radionuclide) Ventriculography, cardiac (using radionuclide) Wall motion study (using radionuclide)
Code Also:	Any concomitant exercise stress test of the heart for example during MIBI (see 2.HZ.08.^^)

3.IP.70.CC	using SPEC tomography (SPECT)
3.IP.70.CE	using PE tomography (PET)
3.IP.70.CH	using SPEC tomography (SPECT) with CT hybrid technique, single machine
3.IP.70.CJ	using PE tomography (PET) with CT hybrid technique, single machine
3.IP.70.KG	using scintigraphy perfusion imaging
3.IP.70.KP	using scintigraphy blood pool imaging
3.IP.70.KS	using SPEC tomography (SPECT) and blood pool imaging

3.IS.^^.^^ Diagnostic Imaging Interventions on the Vena Cava (superior and/or inferior)

3.IS.10.^^ Xray, vena cava (superior and/or inferior)

Includes:	Phlebography, vena cava Venacavogram Venography, vena cava Xray with fluoroscopy, vena cava
------------------	--

3.IS.10.VA	without contrast (with or without fluoroscopy)
3.IS.10.VC	following intravenous injection of contrast (with or without fluoroscopy)

3.IS.12.^^ Fluoroscopy, vena cava (superior and/or inferior)

S¹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes:	Fluoroscopic guidance, vena cava (interventions)
Excludes:	that with xray (see 3.IS.10.^^)

3.IS.12.VA	without contrast
------------	------------------

Diagnostic Imaging Interventions on the Upper Body Vessels (3JE - 3JY)

3.JE.^.^ Diagnostic Imaging Interventions on the Carotid Artery

Includes: Carotid bifurcation
Common carotid arteries
External carotid arteries
Internal carotid arteries

Excludes: Carotid artery with subclavian, vertebral and/or intracranial arteries (see [3.JX.^.^](#))

3.JE.10.^.^ Xray, carotid artery

L²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Angiography, carotid arteries
Arteriography, carotid
Xray with fluoroscopy, carotid artery

Excludes: that with subclavian, vertebral and/or intracranial arteries (see [3.JX.10.^.](#))

3.JE.10.VA without contrast (with or without fluoroscopy)

3.JE.10.VX using percutaneous transluminal arterial approach (with or without fluoroscopy)

3.JE.12.^.^ Fluoroscopy, carotid artery

S¹ **L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Fluoroscopic guidance, carotid artery (interventions)

Excludes: that with xray (see [3.JE.10.^^](#))

3.JE.12.VA without contrast

3.JE.20.^^ Computerized tomography [CT], carotid artery

Includes: CT angiography, carotid artery

Excludes: that with subclavian, vertebral and/or intracranial arteries (see [3.JX.20.^^](#))

3.JE.20.WC with contrast

3.JE.30.^^ Ultrasound, carotid artery

S¹ **L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Dopplergram, carotid
Ultrasound guidance, carotid artery (interventions)

Excludes: that with subclavian, vertebral and/or intracranial arteries (see [3.JX.30.^^](#))

3.JE.30.DA alone
3.JE.30.DB with color flow
3.JE.30.DC with Doppler
3.JE.30.DD with color flow and Doppler

3.JE.40.^^ Magnetic resonance imaging [MRI], carotid artery

L²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Magnetic resonance angiography, carotid arteries
Excludes: that with subclavian, vertebral and/or intracranial arteries (see [3.JX.40.^^](#))

3.JE.40.VA without contrast
 3.JE.40.WC with contrast

3.JL.^^.^^ Diagnostic Imaging Interventions on the Internal Mammary Artery

Includes: Internal thoracic artery

3.JL.10.^^ Xray, internal mammary artery

Includes: Arteriography, internal thoracic artery
 Xray with fluoroscopy, internal mammary artery

3.JL.10.VA without contrast (with or without fluoroscopy)
 3.JL.10.VX following intraarterial injection of contrast (with or without fluoroscopy)

3.JL.12.^^ Fluoroscopy, internal mammary artery

S¹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Fluoroscopic guidance, internal mammary artery (interventions)
Excludes: that with xray (see [3.JL.10.^^](#))

3.JL.12.VA without contrast

3.JM.^^.^^ Diagnostic Imaging Interventions on Arteries of Arm NEC

3.JM.10.^^ Xray, arteries of arm NEC

L²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Arteriography, arteries of arm
 Arteriography, brachial, radial, ulnar, palmar
 Xray with fluoroscopy, arteries of arm

3.JM.10.VA without contrast (with or without fluoroscopy)
 3.JM.10.VX following intraarterial injection of contrast (with or without fluoroscopy)

3.JM.12.^.^ Fluoroscopy, arteries of arm NEC

S ¹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Fluoroscopic guidance, arteries of arm (interventions)

Excludes: that with xray (see [3.JM.10.^.^](#))

3.JM.12.VA without contrast

3.JM.20.^.^ Computerized tomography [CT], arteries of arm NEC

Includes: CT angiography, arteries of arm

3.JM.20.WC with contrast

3.JM.30.^.^ Ultrasound, arteries of arm NEC

S ¹ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description

				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Dopplergram, (brachial, radial, ulnar, palmar) arteries of arm
 Ultrasound guidance, arteries of arm NEC (interventions)
- Excludes:** ultrasound measurement of ankle brachial index (see [3.KG.30.^^](#))
 ultrasound, arteriovenous shunt or fistula of arm (see [3.KY.30.^^](#))

3.JM.30.DA	alone
3.JM.30.DB	with color flow
3.JM.30.DC	with Doppler
3.JM.30.DD	with color flow and Doppler

3.JM.40.^^ Magnetic resonance imaging [MRI], arteries of arm NEC

L²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Magnetic resonance angiography, upper limbs NEC

3.JM.40.VA	without contrast
3.JM.40.WC	with contrast

3.JQ.^^.^^ Diagnostic Imaging Interventions on the Jugular Veins

3.JQ.10.^^ Xray, jugular veins

- Includes:** Phlebography, jugular
 Venography, jugular
 Xray with fluoroscopy, jugular veins

3.JQ.10.VA	without contrast (with or without fluoroscopy)
3.JQ.10.VC	following intravenous injection of contrast (with or without fluoroscopy)

3.JQ.12.^^ Fluoroscopy, jugular veins

S¹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Fluoroscopic guidance, jugular veins (interventions)
Excludes: that with xray (see [3.JQ.10.^](#))

3.JQ.12.VA without contrast

3.JQ.30.^ Ultrasound, jugular veins

S¹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Dopplergram, jugular veins
 Ultrasound guidance, jugular veins (interventions)

3.JQ.30.DA alone
 3.JQ.30.DB with color flow
 3.JQ.30.DC with Doppler
 3.JQ.30.DD with color flow and Doppler

3.JS.^.^ Diagnostic Imaging Interventions on the Ophthalmic Vessels

3.JS.10.^ Xray, ophthalmic vessels

L²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral

3.JW.12.^.^ Fluoroscopy, intracranial vessels**S** 1

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Fluoroscopic guidance, intracranial vessels (interventions)

Excludes: that with xray (see [3.JW.10.^.](#))

3.JW.12.VA without contrast

3.JW.30.^.^ Ultrasound, intracranial vessels**S** 1

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Dopplergram, transcranial
Trans cranial Doppler
Ultrasound guidance, intracranial vessels (interventions)

3.JW.30.DA alone
3.JW.30.DB with color flow
3.JW.30.DC with Doppler
3.JW.30.DD with color flow and Doppler

3.JX.^.^.^ Diagnostic Imaging Interventions on the Other Vessels of Head, Neck and Spine NEC

Includes: Diagnostic imaging interventions on multiple vessels of head, neck (may include carotid artery) and spine (vertebral) region (may include the subclavian artery)

3.JX.10.^ ^ Xray, other vessels of head, neck and spine NEC

- Includes:** Arteriography, vessels of head, neck and spine NEC
 Phlebography, vessels of head, neck and spine NEC
 that for extracranial vessels, cerebral vessels, cerebellar vessels, vertebral vessels
 Venography, vessels of head, neck and spine NEC
 Xray with fluoroscopy, vessels of head, neck and spine NEC
- Excludes:** that for carotid arteries alone (see [3.JE.10.^ ^](#))
 that for intracranial vessels (see [3.JW.10.^ ^](#))
 that for jugular veins alone (see [3.JQ.10.^ ^](#))
 that for ophthalmic vessels alone (see [3.JS.10.^ ^](#))

3.JX.10.VA	without contrast (with or without fluoroscopy)
3.JX.10.VC	using percutaneous transluminal venous approach (with or without fluoroscopy)
3.JX.10.VX	using percutaneous transluminal arterial approach (with or without fluoroscopy)

3.JX.12.^ ^ Fluoroscopy, other vessels of head, neck and spine NEC**S**¹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

- Includes:** Fluoroscopic guidance, other vessels of head, neck and spine NEC (interventions)
- Excludes:** that with xray (see [3.JX.10.^ ^](#))

3.JX.12.VA	without contrast
------------	------------------

3.JX.20.^ ^ Computerized tomography [CT], other vessels of head, neck and spine NEC

- Includes:** CT angiography, head and neck region
 CT angiography, head, neck and spine (vertebral vessels)
- Excludes:** that of carotid artery alone (see [3.JE.20.^ ^](#))

3.JX.20.WC	with contrast
------------	---------------

3.JX.30.^ ^ Ultrasound, other vessels of head, neck and spine NEC**S**¹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Dopplergram, extracranial vessels, cerebral vessels, cerebellar vessels, spinal vessels
Ultrasound guidance, other vessels of head, neck and spine NEC (interventions)

Excludes: that specifically for carotid arteries (see [3.JE.30.^^](#))
that specifically for intracranial vessels (see [3.JW.30.^^](#))
that specifically for jugular veins (see [3.JQ.30.^^](#))
that specifically for ophthalmic vessels (see [3.JS.30.^^](#))

3.JX.30.DA	alone
3.JX.30.DB	with color flow
3.JX.30.DC	with Doppler
3.JX.30.DD	with color flow and Doppler

3.JX.40.^^ Magnetic resonance imaging [MRI], other vessels of head, neck and spine NEC

Includes: Magnetic resonance angiography, head and neck region
Magnetic resonance angiography, head, neck and spine (vertebral vessels)

Excludes: that for carotid artery alone (see [3.JE.40.^^](#))

3.JX.40.VA	without contrast
3.JX.40.WC	with contrast

3.JY.^^.^^ Diagnostic Imaging Interventions on the Thoracic Vessels NEC

Includes: subclavian vessels (alone or with other thoracic vessels), mediastinal vessels, bronchial vessels, sternal vessels, anterior intercostal vessels, superior epigastric vessels, esophageal vessels, brachiocephalic artery

Excludes: subclavian vessels with multiple vessels of head, neck and spine (vertebral region) (see [3.JX.10.^^](#))

3.JY.10.^^ Xray, thoracic vessels NEC

Includes: Arteriography, thoracic vessels
Phlebography, thoracic vessels
that for subclavian (alone or with other thoracic vessels), brachiocephalic, bronchial and intercostal arteries/veins
Venography, thoracic vessels
Xray with fluoroscopy, thoracic vessels NEC

Excludes: that for pulmonary arteries alone (see [3.IM.10.^^](#))
that for pulmonary veins alone (see [3.IN.10.^^](#))
that for subclavian vessels with multiple vessels of head, neck and spine (vertebral region) (see [3.JX.10.^^](#))
that specifically for internal thoracic [mammary] arteries (see [3.JL.10.^^](#))

3.JY.10.VA	without contrast (with or without fluoroscopy)
3.JY.10.VC	following intravenous injection of contrast (with or without fluoroscopy)
3.JY.10.VX	following intraarterial injection of contrast (with or without fluoroscopy)

3.JY.12.^ ^ Fluoroscopy, thoracic vessels NEC**S**¹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Fluoroscopic guidance, thoracic vessels NEC (interventions)

Excludes: that with xray (see [3.JY.10.^ ^](#))

3.JY.12.VA without contrast

3.JY.20.^ ^ Computerized tomography [CT], thoracic vessels NEC

Includes: CT angiography, thoracic vessels
that for internal thoracic [mammary] artery
that for pulmonary arteries/veins
that for vena cava

Excludes: that of heart with coronary arteries (see [3.IP.20.^ ^](#))

3.JY.20.WC with contrast

3.JY.30.^ ^ Ultrasound, thoracic vessels NEC**S**¹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Dopplergram, thoracic vessels:
internal thoracic [mammary] artery
pulmonary arteries/veins
Ultrasound guidance, thoracic vessels NEC (interventions)
vena cava

Excludes: ultrasound, aorta (see [3.ID.30.^ ^](#))
ultrasound, coronary (see [3.IP.30.^ ^](#))

3.JY.30.DA alone
3.JY.30.DB with color flow
3.JY.30.DC with Doppler
3.JY.30.DD with color flow and Doppler

3.JY.40.^ ^ Magnetic resonance imaging [MRI], thoracic vessels NEC

Includes: Magnetic resonance angiography, thoracic region
that for internal thoracic [mammary] artery
that for pulmonary arteries/veins
that for vena cava

3.JY.40.VA	without contrast
3.JY.40.WC	with contrast

Diagnostic Imaging Interventions on the Lower Body Vessels (3KC - 3KU)

3.KC.^.^ Diagnostic Imaging Interventions on the Renal Arteries

3.KC.10.^.^ Xray, renal arteries

L²

S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Fluoroscopic guidance, vessels of the pelvis perineum and gluteal region (interventions)
Excludes: that with xray (see [3.KT.10.^](#))

3.KT.12.VA without contrast

3.KT.20.^ Computerized tomography [CT], vessels of the pelvis, perineum and gluteal region

Includes: CT angiography, pelvic region
that of pelvic arteries

3.KT.20.WC with contrast

3.KT.30.^ Ultrasound, vessels of the pelvis, perineum and gluteal region

S 1

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Dopplergram, pelvic vessels/arteries
Ultrasound guidance, vessels of the pelvis, perineum and gluteal region (interventions)
Excludes: that for penile vessels (see [3.KU.30.^](#))

3.KT.30.DA alone
3.KT.30.DB with color flow
3.KT.30.DC with Doppler
3.KT.30.DD with color flow and Doppler

3.KT.40.^ Magnetic resonance imaging [MRI], vessels of the pelvis, perineum and gluteal region

Includes: Magnetic resonance angiography, pelvic region
pelvic arteries

3.KT.40.VA without contrast
3.KT.40.WC with contrast

3.KU.^.^ Diagnostic Imaging Interventions on the Penile Vessels**3.KU.30.^.^ Ultrasound, penile vessels****S**¹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Dopplergram, penile vessels
 Ultrasound guidance, penile vessels (interventions)

3.KU.30.DA	alone
3.KU.30.DB	with color flow
3.KU.30.DC	with Doppler
3.KU.30.DD	with color flow and Doppler

Diagnostic Imaging Interventions on Blood Vessels NEC (3KV - 3KZ)

3.KV.^.^ Diagnostic Imaging Interventions on the Artery NEC

3.KV.10.^.^ Xray, artery NEC

Includes: Arteriography, artery NEC
Arteriography, bypass graft NEC
Xray with fluoroscopy, artery NEC

Excludes: Xray, arteriovenous shunt or fistula (see [3.KY.10.^.](#))

Note: for specific arteries classified elsewhere see alphabetical index under Xray, arteries by site

3.KV.10.VA without contrast (with or without fluoroscopy)

3.KV.10.VX following intraarterial injection of contrast (with or without fluoroscopy)

3.KV.12.^.^ Fluoroscopy, artery NEC

S¹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Fluoroscopic guidance, artery NEC (interventions)

Excludes: that with xray (see [3.KV.10.^.](#))

Note: for specific arteries classified elsewhere see index Fluoroscopy, blood vessels, arteries by site

3.KV.12.VA without contrast

3.KV.30.^.^ Ultrasound, artery NEC

S¹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes:	Dopplergram, for bypass graft NEC
Excludes:	Dopplergram, arteriovenous [av] shunt or fistula (see 3.KY.30.^^)
3.KV.30.DA	alone
3.KV.30.DB	with color flow
3.KV.30.DC	with Doppler
3.KV.30.DD	with color flow and Doppler
3.KV.30.GP	intravascular [IVUS]
Includes:	Virtual histology intravascular ultrasound [VH-IVUS]

3.KV.40.^^ Magnetic resonance imaging [MRI], artery NEC

Includes:	that for bypass graft NEC
Excludes:	that for specific arteries classified elsewhere (see Magnetic Resonance Imaging, blood vessel, by site)
3.KV.40.VA	without contrast
3.KV.40.WC	with contrast

3.KX.^^.^^ Diagnostic Imaging Interventions on the Vein NEC**3.KX.10.^^ Xray, vein NEC**

Includes:	Phlebography, vein NEC Venography, vein NEC Xray with fluoroscopy, vein NEC
Excludes:	Venography, arteriovenous shunt or fistula (see 3.KY.10.^^)
Note:	for specific veins classified elsewhere see index under Xray, blood vessel, by site
3.KX.10.VA	without contrast (with or without fluoroscopy)
3.KX.10.VC	following intravenous injection of contrast (with or without fluoroscopy)

3.KX.12.^^ Fluoroscopy, vein NEC**S** ¹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Fluoroscopic guidance, vein NEC (interventions)
Excludes: that with xray (see [3.KX.10.^^](#))
Note: for specific veins classified elsewhere see Fluoroscopy, blood vessels, veins by site

3.KX.12.VA without contrast

3.KX.30.^^ Ultrasound, vein NEC

S¹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Dopplergram, vein NEC
 Ultrasound guidance, vein NEC (interventions)
Excludes: Dopplergram, arteriovenous [av] shunt or fistula (see [3.KY.30.^^](#))
Note: for specific veins classified elsewhere see index under ultrasound, blood vessel, by site

3.KX.30.DA alone
 3.KX.30.DB with color flow
 3.KX.30.DC with Doppler
 3.KX.30.DD with color flow and Doppler

3.KX.40.^^ Magnetic resonance imaging [MRI], vein NEC

Excludes: that for specific veins classified elsewhere (see Magnetic Resonance Imaging, blood vessel, by site)

3.KX.40.VA without contrast
 3.KX.40.WC with contrast

3.KY.^.^ Diagnostic Imaging Interventions on the Artery with Vein**3.KY.10.^.^ Xray, artery with vein****L** 70

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 70	Optional	Dialysis fistula	Location	L A	Left arm
				L L	Left leg
				R A	Right arm
				R L	Right leg
				Z	Other site (e.g. jugular, subclavian)

Includes: Angiography, arteriovenous shunt/fistula [for dialysis]
 AV fistula shuntogram
 Xray with fluoroscopy, arteriovenous shunt/fistula [for dialysis]

3.KY.10.VA without contrast (with or without fluoroscopy)
 3.KY.10.VC following intravenous injection of contrast (with or without fluoroscopy)

3.KY.12.^.^ Fluoroscopy, artery with vein**S** 1 **L** 70

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative
L 70	Optional	Dialysis fistula	Location	L A	Left arm
				L L	Left leg
				R A	Right arm
				R L	Right leg
				Z	Other site (e.g. jugular, subclavian)

Includes: Fluoroscopic guidance, arteriovenous shunt/fistula [for dialysis]
Excludes: that with xray (see [3.KY.10.^.](#))

3.KY.12.VA without contrast

3.KY.30.^.^ Ultrasound, artery with vein**S** 1 **L** 70

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative
L 70	Optional	Dialysis fistula	Location	L A	Left arm
				L L	Left leg
				R A	Right arm
				R L	Right leg
				Z	Other site (e.g. jugular, subclavian)

Includes: Dopplergram, arteriovenous [av] shunt or fistula [for dialysis]
 Ultrasound guidance, artery with vein (interventions)

3.KY.30.DA alone
 3.KY.30.DB with color flow
 3.KY.30.DC with Doppler
 3.KY.30.DD with color flow and Doppler

3.KZ.^.^ Diagnostic Imaging Interventions on the Blood Vessels NEC

Includes: Blood vessels NOS

3.KZ.70.^.^ Diagnostic nuclear (imaging) study, blood vessels NEC

Includes: Nuclear imaging study done to determine catheter patency
 Nuclear scan, blood vessel NEC
 Nuclear venogram, blood vessels NEC

Excludes: that done for circulatory system NEC (see [3.LZ.70.^.](#))
 that done for heart with coronary arteries (see [3.IP.70.^.](#))
 that done for lower leg veins (see [3.KR.70.^.](#))

3.KZ.70.CA using scintigraphy

Diagnostic Imaging Interventions on Circulatory System NEC (3LZ)

3.LZ.^.^ Diagnostic Imaging Interventions on the Circulatory System NEC

3.LZ.40.^.^ Magnetic resonance imaging [MRI], circulatory system NEC

3.LZ.40.VA	without contrast
3.LZ.40.WC	with contrast

3.LZ.70.^.^ Diagnostic nuclear (imaging) study, circulatory system NEC

E 33

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 33	Optional	Nuclear (imaging) study parameter	Extent	C M	Complete study
				L T	Limited study

Includes: Determination, blood volume
Nuclear medicine NEC, blood
Study, blood cell survival
Study, plasma and red cell radioiron

Excludes: that for diagnostic nuclear imaging study of the heart and coronary arteries (see [3.IP.70.^.](#))

3.LZ.70.CA	using scintigraphy
3.LZ.70.CC	using SPEC tomography (SPECT)
	Includes: labeled red blood cell SPECT
3.LZ.70.PB	for total blood volume
3.LZ.70.PD	for white blood cell survival
3.LZ.70.PE	for white blood cell survival with sequestration
3.LZ.70.PL	for plasma volume
3.LZ.70.PQ	for red blood cell survival with sequestration
3.LZ.70.PR	for red blood cell volume
3.LZ.70.PS	for red blood cell survival
3.LZ.70.PT	for platelet survival
3.LZ.70.PU	for platelet survival with sequestration
3.LZ.70.TA	for plasma radioiron clearance
3.LZ.70.TD	for radioiron (oral) absorption
3.LZ.70.TE	for red cell radioiron utilization

Diagnostic Imaging Interventions on the Lymphatic System (3ML - 3MZ)

3.ML.^.^ Diagnostic Imaging Interventions on the Lymphatic Vessels of Head and Neck Region

3.ML.10.^.^ Xray, lymphatic vessels of head and neck region

Includes: Lymphangiography, head and neck region

3.ML.10.VF	following intralymphatic injection of contrast (with or without fluoroscopy)
------------	--

3.MN.^.^ Diagnostic Imaging Interventions on the Lymphatic Vessels of Thoracic Region

Excludes: Thoracic duct (see [3.MZ.^.^](#))

3.MN.10.^.^ Xray, lymphatic vessels of thoracic region

Includes: Lymphangiography, thoracic region

3.MN.10.VF	following intralymphatic injection of contrast (with or without fluoroscopy)
------------	--

3.MP.^.^ Diagnostic Imaging Interventions on the Lymphatic Vessels of Abdomen and Pelvis

3.MP.10.^.^ Xray, lymphatic vessels of abdomen and pelvis

Includes: Lymphangiography, abdomen/pelvis

3.MP.10.VF	following intralymphatic injection of contrast (with or without fluoroscopy)
------------	--

3.MR.^.^ Diagnostic Imaging Interventions on the Lymphatic Vessels of Arm

3.MR.10.^.^ Xray, lymphatic vessels of arm

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 17	Optional	Upper extremities	Location	B U	Bilateral (both) arms
				L A	Left arm
				R A	Right arm

L 17

Includes: Lymphangiography, arm

3.MR.10.VF following intralymphatic injection of contrast (with or without fluoroscopy)

3.MS.^.^ Diagnostic Imaging Interventions on the Lymphatic Vessels of Leg

Excludes: Lymphatic structures of inguinal region (see [3.MP.^.^](#))

3.MS.10.^.^ Xray, lymphatic vessels of leg

L 18

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 18	Optional	Lower extremities	Location	B L	Bilateral (both) legs
				L L	Left leg
				R L	Right leg

Includes: Lymphangiography, leg

3.MS.10.VF following intralymphatic injection of contrast (with or without fluoroscopy)

3.MZ.^.^ Diagnostic Imaging Interventions on the Lymphatic System NEC

Includes: Lymphatic vessels NEC
Thoracic duct

3.MZ.10.^.^ Xray, lymphatic system NEC

Includes: Lymphangiography NOS
Lymphatic vessels NEC

Excludes: Lymphangiography, abdomen/pelvis (see [3.MP.10.^.](#))
Lymphangiography, arm (see [3.MR.10.^.](#))
Lymphangiography, head and neck (see [3.ML.10.^.](#))
Lymphangiography, leg (see [3.MS.10.^.](#))
Lymphangiography, thoracic region (see [3.MN.10.^.](#))
that done using radionuclide (see [3.MZ.70.^.](#))

3.MZ.10.VF following intralymphatic injection of contrast (with or without fluoroscopy)

3.MZ.70.^.^ Diagnostic nuclear (imaging) study, lymphatic system NEC**E** 33

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 33	Optional	Nuclear (imaging) study parameter	Extent	C M	Complete study
				L T	Limited study

Includes: Lymphangiography, using radionuclide
Lymphatic vessels NEC
Lymphoscintigraphy

Note: Lymphoscintigraphy is used to provide image guidance for the isolation of the sentinel lymph node for lymph node biopsy

3.MZ.70.CA using scintigraphy
3.MZ.70.CC using SPEC tomography (SPECT)
3.MZ.70.CE using PE tomography (PET)
3.MZ.70.CH using SPEC tomography (SPECT) with CT hybrid technique, single machine
3.MZ.70.CJ using PE tomography (PET) with CT hybrid technique, single machine

3.MZ.94.^.^ Imaging intervention NEC, lymphatic system NEC**S** 1

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Imaging assistance, lymphatic system (intervention)
Visualization, by operating microscope, lymphatic system

3.MZ.94.ZA using microscope

Diagnostic Imaging Interventions on the Digestive and Hepatobiliary Tracts and Other Sites within the Abdominal Cavity NEC (3NA - 3OZ)

Diagnostic Imaging Interventions on the Digestive System (3NA - 3NZ)

3.NA.^^.^^ Diagnostic Imaging Interventions on the Esophagus

3.NA.10.^^ Xray, esophagus

Includes: Xray, pharynx with esophagus

Excludes: Xray, esophagus with stomach (see [3.NL.10.^^](#))

3.NA.10.VN with fluoroscopy following oral administration of contrast

3.NA.10.WG following oral administration of contrast

Includes: that with administration of contrast through esophageal tube

3.NA.12.^^ Fluoroscopy, esophagus

S 1

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Fluoroscopic guidance, esophagus (interventions)

Fluoroscopy, pharynx with esophagus

Video fluoroscopic swallow study (VFSS)

Excludes: Fluoroscopy, esophagus with stomach (see [3.NL.10.^^](#))
that with xray (see [3.NA.10.^^](#))

3.NA.12.AY with cine/video recording [for evaluation of swallowing function] (with or without contrast)

3.NA.12.VA without contrast

3.NK.^^.^^ Diagnostic Imaging Interventions on the Small Intestine

Includes: Small bowel

Excludes: Ileocecal valve (see [3.NM.^^.^^](#))

3.NK.10.^.^ Xray, small intestine

Includes: Duodenography
 Small bowel follow through with per orifice administration of contrast through tube or stoma
 Xray, J tube (placement)
 Xray, jejunostomy

Excludes: Xray, upper GI tract (see [3.NL.10.^.](#))

3.NK.10.VV following per orifice (stoma) injection of contrast (with or without fluoroscopy)
 3.NK.10.WG following oral (via nasogastric or gastric tube) administration of contrast (with or without fluoroscopy)
Includes: Enteroclysis
 3.NK.10.WX using J tube or catheter injection of contrast (with or without fluoroscopy)
Includes: that through previous percutaneously inserted feeding tube

3.NK.20.^.^ Computerized tomography [CT], small intestine

Includes: CAT scan, small intestine
 Enterography, computed tomographic

Omit code: When CT scan is performed as part of a SPECT or PET diagnostic nuclear imaging study, hybrid/fusion technique, single machine. (See Diagnostic nuclear (imaging) (scan) study, by site)

3.NK.20.VA without contrast
 3.NK.20.WC with contrast

3.NL.^.^.^ Diagnostic Imaging Interventions on the Upper Gastrointestinal [GI] Tract**3.NL.10.^.^ Xray, upper gastrointestinal [GI] tract**

Includes: Air contrast with high density barium
 Barium swallow
 Upper GI series with small bowel follow through
 Xray, stomach (gastric tube placement)

Excludes: that for small intestine alone (see [3.NK.10.^.](#))

3.NL.10.VN with fluoroscopy (and oral administration of contrast)

3.NM.^.^.^ Diagnostic Imaging Interventions on the Large Intestine

Includes: Colon

3.NM.10.^.^ Xray, large intestine

Includes: Barium enema
 Lower GI series
 Xray, colon with per rectum (or stoma) administration of contrast
 Xray, colostomy (tube placement)

3.NM.10.VN with fluoroscopy (and administration of contrast)

3.NM.20.^.^ Computerized tomography [CT], large intestine

Includes: CAT scan, large intestine
 Colonography, computed tomographic
 Colonoscopy, virtual

Omit code: When CT scan is performed as part of a SPECT or PET diagnostic nuclear imaging study, hybrid/fusion technique, single machine. (See Diagnostic nuclear (imaging) (scan) study, by site)

3.NM.20.VA without contrast
 3.NM.20.WC with contrast

3.NQ.^.^.^ Diagnostic Imaging Interventions on the Rectum**3.NQ.10.^.^ Xray, rectum**

Includes: Pouchogram
 Proctography

3.NQ.10.VN with fluoroscopy (and rectal administration of contrast)

3.NZ.^.^.^ Diagnostic Imaging Interventions on the Gastrointestinal Tract NEC**3.NZ.10.^.^ Xray, gastrointestinal tract NEC**

Includes: Fistulogram, gastrointestinal tract
 Sinogram, gastrointestinal tract

Excludes: Pouchogram (see [3.NQ.10.^.^](#))

3.NZ.10.VN with fluoroscopy (and administration of contrast)

3.NZ.70.^.^ Diagnostic nuclear (imaging) study, gastrointestinal tract NEC**E** 33

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 33	Optional	Nuclear (imaging) study parameter	Extent	C M	Complete study
				L T	Limited study

Includes: Isotope study, gastrointestinal tract
Nuclear medicine NEC, gastrointestinal tract
Schilling test

3.NZ.70.CA	using scintigraphy
	Includes: Meckel's scan urea breath test (for H. pylori detection)
3.NZ.70.MX	for absorption study of vitamin B12 (without intrinsic factor)
3.NZ.70.MY	for absorption study of vitamin B12 with intrinsic factor
3.NZ.70.MZ	for absorption study of vitamin B12 with and without intrinsic factor
3.NZ.70.SC	using isotope for blood loss study
3.NZ.70.SD	using isotope for absorption study (fat, calcium)
	Includes: SeHCAT bile salt absorption study
3.NZ.70.SE	for esophageal transit study
3.NZ.70.SN	using isotope for esophageal reflux study
3.NZ.70.SP	using isotope for esophageal motility study
3.NZ.70.TB	using isotope for protein loss study
3.NZ.70.TC	using isotope for gastric emptying studies

Diagnostic Imaging Interventions on the Hepatobiliary Tract and Other Sites within the Abdominal Cavity NEC (30A - 30Z)

3.OA.^^.^^ Diagnostic Imaging Interventions on the Liver

3.OA.10.^^ Xray, liver

Includes: that for visualization of indwelling infusion pump catheter
Excludes: Xray, abdominal cavity (organs and structures within) (see [3.OT.10.^^](#))

3.OA.10.WX following catheter (infusion pump) injection of contrast

3.OA.30.^^ Ultrasound, liver

S 1

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Dopplergram assessment of transplanted liver
 Ultrasound guidance, liver (interventions)

Excludes: Ultrasound, abdomen (routine) (see [3.OT.30.^^](#))
 Ultrasound, liver with spleen (see [3.OC.30.^^](#))

3.OA.30.DA alone
 3.OA.30.DB with color flow
 3.OA.30.DC with Doppler
 3.OA.30.DD with color flow and Doppler
 3.OA.30.HJ with transesophageal approach
Includes: Endoscopic ultrasound (EUS)

3.OA.70.^^ Diagnostic nuclear (imaging) study, liver

E 33

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 33	Optional	Nuclear (imaging) study parameter	Extent	C M	Complete study
				L T	Limited study

- Includes:** Hepatic function study using radionuclide
Nuclear scan, liver
- Excludes:** Hepatobiliary nuclear scan (see [3.OD.70.^^](#))
Nuclear scan of liver with spleen (see [3.OC.70.^^](#))

3.OA.70.CA	using scintigraphy
3.OA.70.CC	using SPEC tomography (SPECT)
3.OA.70.CE	using PE tomography (PET)
3.OA.70.CH	using SPEC tomography (SPECT) with CT hybrid technique, single machine
3.OA.70.CJ	using PE tomography (PET) with CT hybrid technique, single machine

3.OB.^^.^^ Diagnostic Imaging Interventions on the Spleen

3.OB.70.^^ Diagnostic nuclear (imaging) study, spleen

E 33

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 33	Optional	Nuclear (imaging) study parameter	Extent	C M	Complete study
				L T	Limited study

- Includes:** Splenography using radionuclides
- Excludes:** Nuclear scan, liver with spleen (see [3.OC.70.^^](#))

3.OB.70.CA	using scintigraphy
3.OB.70.CC	using SPEC tomography (SPECT)
3.OB.70.CE	using PE tomography (PET)
3.OB.70.CH	using SPEC tomography (SPECT) with CT hybrid technique, single machine
3.OB.70.CJ	using PE tomography (PET) with CT hybrid technique, single machine

3.OC.^^.^^ Diagnostic Imaging Interventions on the Liver with Spleen

- Excludes:** Liver alone (see [3.OA.^^.^^](#))
Spleen alone (see [3.OB.^^.^^](#))

3.OC.30.^^ Ultrasound, liver with spleen

S 1

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

- Includes:** Dopplergram, liver with spleen
 Ultrasound guidance, liver with spleen (interventions)
- Excludes:** Endoscopic ultrasound, (contents of) abdominal cavity (see [3.OT.30.^^](#))
 Ultrasound, liver alone (see [3.OA.30.^^](#))
 Ultrasound, upper abdomen (routine) (see [3.OT.30.^^](#))

3.OC.30.DA	alone
3.OC.30.DB	with color flow
3.OC.30.DC	with Doppler
3.OC.30.DD	with color flow and Doppler

3.OC.70.^^ Diagnostic nuclear (imaging) study, liver with spleen

E 33

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 33	Optional	Nuclear (imaging) study parameter	Extent	C M	Complete study
				L T	Limited study

- Includes:** Nuclear scan, liver with spleen
- Excludes:** Liver scan alone (see [3.OA.70.^^](#))
 Spleen scan alone (see [3.OB.70.^^](#))

3.OC.70.CA	using scintigraphy
3.OC.70.CB	using scintigraphy with vascular flow
3.OC.70.CC	using SPEC tomography (SPECT)
3.OC.70.CD	using SPEC tomography (SPECT) with vascular flow
3.OC.70.CE	using PE tomography (PET)
3.OC.70.CH	using SPEC tomography (SPECT) with CT hybrid technique, single machine
3.OC.70.CJ	using PE tomography (PET) with CT hybrid technique, single machine
3.OC.70.KP	with blood pool imaging
3.OC.70.KR	with blood pool imaging and vascular flow
3.OC.70.KS	with blood pool imaging and SPEC tomography (SPECT)

3.OD.^^.^^ Diagnostic Imaging Interventions on the Gallbladder

- Excludes:** Bile ducts [common, cystic or extrahepatic] alone (see [3.OE.^^.^^](#))

3.OD.70.^.^ Diagnostic nuclear (imaging) study, gallbladder

Includes: Gallbladder ejection fraction study
Hepatobiliary nuclear scan

3.OD.70.CA	using scintigraphy
	Includes: HIDA scan cholescintigraphy
3.OD.70.CC	using SPEC tomography (SPECT)
3.OD.70.CE	using PE tomography (PET)
3.OD.70.CH	using SPEC tomography (SPECT) with CT hybrid technique, single machine
3.OD.70.CJ	using PE tomography (PET) with CT hybrid technique, single machine

3.OE.^.^.^ Diagnostic Imaging Interventions on the Bile Ducts

Includes: Biliary ducts alone
Sphincter of Oddi

3.OE.10.^.^ Xray, bile ducts**S**¹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Cholangiography
Fluoroscopy, biliary ducts (and gallbladder)
That for biliary ducts with gallbladder
Xray (with fluoroscopy), biliary tract NEC

Excludes: That with pancreas (see [3.OG.10.^.^](#))

3.OE.10.WG	following oral administration of contrast
3.OE.10.WX	following T-tube or catheter injection of contrast
3.OE.10.WZ	following endoscopic (retrograde) injection of contrast
	Includes: Endoscopic retrograde cholangiography (ERC)
3.OE.10.XA	following percutaneous (transhepatic) injection of contrast

3.OE.70.^.^ Diagnostic nuclear (imaging) study, bile ducts

Excludes: Hepatobiliary nuclear scan (see [3.OD.70.^.^](#))

3.OE.70.CA	using scintigraphy
3.OE.70.CC	using SPEC tomography (SPECT)
3.OE.70.CE	using PE tomography (PET)
3.OE.70.CH	using SPEC tomography (SPECT) with CT hybrid technique, single machine
3.OE.70.CJ	using PE tomography (PET) with CT hybrid technique, single machine

3.OG.^.^.^ Diagnostic Imaging Interventions on the Biliary Ducts with Pancreas

Excludes: Biliary ducts and gallbladder alone (see [3.OE.^.^.^](#))
Pancreas alone (see [3.OJ.^.^.^](#))

3.OG.10.^.^ Xray, biliary ducts with pancreas**S**¹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Cholangiopancreatography
Fluoroscopy, biliary ducts with pancreas
that with sphincterotomy
Xray with fluoroscopy, biliary ducts with pancreas

Excludes: Cholangiography (ERC) (see [3.OE.10.^.^](#))
that for biliary ducts and gall bladder alone (see [3.OE.10.^.^](#))
that for pancreas alone (see [3.OJ.10.^.^](#))

3.OG.10.WG	following oral administration of contrast
3.OG.10.WX	following T-tube or catheter injection of contrast
3.OG.10.WZ	following endoscopic (retrograde) injection of contrast [ERCP] Includes: Endoscopic retrograde cholangiopancreatography (ERCP)
3.OG.10.XA	following percutaneous (transhepatic) injection of contrast

3.OJ.^^.^^ Diagnostic Imaging Interventions on the Pancreas**3.OJ.10.^^ Xray, pancreas****S**¹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Pancreatography

3.OJ.10.WG	following oral administration of contrast
3.OJ.10.WX	following T-tube or catheter injection of contrast
3.OJ.10.WZ	following endoscopic (retrograde) injection of contrast [ERP]
3.OJ.10.XA	following percutaneous (trans hepatic) injection of contrast

3.OT.^^.^^ Diagnostic Imaging Interventions on the Abdominal Cavity**Includes:** Peritoneum
Sinuses/Fistulae of cavity**3.OT.10.^^ Xray, abdominal cavity****S**¹ **L**⁶⁹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative
L 69	Optional	Abdominal imaging	Location	L W	Lower abdomen (intestinal tract, rectum)
				P D	Pelvic cavity (genitourinary tract, retroperitoneum, uterus)
				U	Unspecified
				U P	Upper abdomen (stomach, gall bladder, liver, spleen)
				Z	Other NEC (complete abdominal and pelvic cavity or overlapping sites)

- Includes:** Peritoneogram
 Xray with fluoroscopy, abdomen and pelvic cavity
 Xray, abdominal cavity (organs and structures within)
 Xray, pelvic cavity (organs and structures within)
- Excludes:** that for fistula/sinus of digestive system (see [3.NZ.10.^^](#))
 that for fistula/sinus of genitourinary system (see [3.PZ.10.^^](#))

3.OT.10.VA	without contrast (with or without fluoroscopy)
3.OT.10.VH	following injection of air/gas (in cavity) (with or without fluoroscopy)
3.OT.10.VZ	following percutaneous injection of contrast (with or without fluoroscopy)
3.OT.10.WG	following oral administration of contrast (with or without fluoroscopy)
3.OT.10.WX	following catheter (shunt, pump or reservoir) injection of contrast (with or without fluoroscopy)
Includes: that for visualization of indwelling shunt, pump or reservoir	

3.OT.12.^^ Fluoroscopy, abdominal cavity**S** 1 **L** 69

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative
L 69	Optional	Abdominal imaging	Location	LW	Lower abdomen (intestinal tract, rectum)
				P D	Pelvic cavity (genitourinary tract, retroperitoneum, uterus)
				U	Unspecified
				U P	Upper abdomen (stomach, gall bladder, liver, spleen)
				Z	Other NEC (complete abdominal and pelvic cavity or overlapping sites)

- Includes:** Fluoroscopic guidance, abdominal cavity (organs and structures within) (interventions)
- Excludes:** Xray with fluoroscopy, abdominal cavity (organs and structures within) (see [3.OT.10.^^](#))
 Xray with fluoroscopy, specified organs and structures within abdominal cavity visualized (see [3.OT.10.^^](#))
- Note:** Use (optional) location attribute to indicate specific region of the abdominal cavity visualized

3.OT.12.VA	without contrast
------------	------------------

3.OT.18.^ ^ Tomography, abdominal cavity**L** 69

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 69	Optional	Abdominal imaging	Location	L W	Lower abdomen (intestinal tract, rectum)
				P D	Pelvic cavity (genitourinary tract, retroperitoneum, uterus)
				U	Unspecified
				U P	Upper abdomen (stomach, gall bladder, liver, spleen)
				Z	Other NEC (complete abdominal and pelvic cavity or overlapping sites)

Includes: Tomography, (organs and structures within) abdominal and pelvic cavity

3.OT.18.VA without contrast

3.OT.20.^ ^ Computerized tomography [CT], abdominal cavity**S** 1 **L** 69

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative
L 69	Optional	Abdominal imaging	Location	L W	Lower abdomen (intestinal tract, rectum)
				P D	Pelvic cavity (genitourinary tract, retroperitoneum, uterus)
				U	Unspecified
				U P	Upper abdomen (stomach, gall bladder, liver, spleen)
				Z	Other NEC (complete abdominal and pelvic cavity or overlapping sites)

Includes: CAT scan, (organs and structures within) abdominal and pelvic cavity

Excludes: Computerized tomographic colonography (see [3.NM.20.^ ^](#))
 Computerized tomographic enterography (see [3.NK.20.^ ^](#))
 CT scan, chest, abdomen and pelvis together (total body) (see [3.ZZ.20.^ ^](#))
 that for blood vessels of abdominal region (see [3.KE.20.^ ^](#))
 that for blood vessels of pelvic region (see [3.KT.20.^ ^](#))
 Virtual colonoscopy (see [3.NM.20.^ ^](#))

Omit code: When CT scan is performed as part of a SPECT or PET diagnostic nuclear imaging study, hybrid/fusion technique, single machine. (See Diagnostic nuclear (imaging) (scan) study, by site)

3.OT.20.VA without contrast

3.OT.20.WC with contrast

3.OT.30.^ ^ Ultrasound, abdominal cavity**S** 1 **L** 84

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative
L 84	Optional	Abdominal Imaging 2	Location	LW	Lower abdomen (intestinal tract, rectum or anus)
				P D	Pelvic cavity (retroperitoneum)
				U	Unspecified
				U P	Upper abdomen (stomach, gall bladder, liver, spleen)
				Z	Other NEC (overlapping sites)

Includes:

- Focused (targeted) assessment sonography [FAS], abdominal cavity
- Ultrasound guidance, abdominal cavity (interventions)
- Ultrasound, (organs and structures within) abdominal and pelvic cavity
- Ultrasound, (organs and structures within) abdominal and pelvic cavity and genital tract (male or female)
- Ultrasound, intestinal tract, rectum or anus
- Ultrasound, retroperitoneum
- Ultrasound, stomach or gallbladder

Excludes:

- Ultrasound, bladder (alone) (see [3.PM.30.^ ^](#))
- Ultrasound, female genital tract (non obstetrical) (alone) (see [3.RZ.30.^ ^](#))
- Ultrasound, kidney (alone) (see [3.PC.30.^ ^](#))
- Ultrasound, liver (alone) (see [3.OA.30.^ ^](#))
- Ultrasound, liver with spleen (alone) (see [3.OC.30.^ ^](#))
- Ultrasound, male genital tract (alone) (see [3.QZ.30.^ ^](#))
- Ultrasound, obstetrical (assessment) (see [5.AB.03.^ ^](#))
- Ultrasound, prostate (alone) (see [3.QT.30.^ ^](#))

3.OT.30.DA	alone
3.OT.30.DB	with color flow
3.OT.30.DC	with Doppler
3.OT.30.DD	with color flow and Doppler
3.OT.30.DG	transrectal probe
3.OT.30.HA	endoscopic [EUS] NEC
3.OT.30.LA	transvaginal probe

3.OT.40.^ ^ Magnetic resonance imaging [MRI], abdominal cavity**S** 1 **L** 69

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative
L 69	Optional	Abdominal imaging	Location	LW	Lower abdomen (intestinal tract, rectum)
				P D	Pelvic cavity (genitourinary tract, retroperitoneum, uterus)
				U	Unspecified
				U P	Upper abdomen (stomach, gall bladder, liver, spleen)
				Z	Other NEC (complete abdominal and pelvic cavity or overlapping sites)

Includes: MRI, (organs and structures within) abdominal and pelvic cavity
MRI, retroperitoneum

Excludes: that for blood vessels of abdominal region (see [3.KE.40.^ ^](#))
that for blood vessels of pelvic region (see [3.KT.40.^ ^](#))

3.OT.40.VA without contrast

3.OT.40.WC with contrast

3.OT.70.^ ^ Diagnostic nuclear (imaging) study, abdominal cavity**E** 33

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 33	Optional	Nuclear (imaging) study parameter	Extent	C M	Complete study
				L T	Limited study

Includes: Nuclear scan, (organs and structures within) abdominal and pelvic cavity

Excludes: Nuclear imaging of lymphatic system (any site) (see [3.MZ.70.^ ^](#))

Note: For nuclear imaging of specified organ within abdominal and pelvic cavity, see index under Imaging, nuclear by site.

3.OT.70.CA using scintigraphy

3.OT.70.CC using SPEC tomography (SPECT)

3.OT.70.CE using PE tomography (PET)

3.OT.70.CH using SPEC tomography (SPECT) with CT hybrid technique, single machine

3.OT.70.CJ using PE tomography (PET) with CT hybrid technique, single machine

3.OZ.^.^ Diagnostic Imaging Interventions on the Digestive System NEC**3.OZ.94.^.^ Imaging intervention NEC, digestive system NEC****S**¹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Visualization, by operating microscope, abdominal cavity
Visualization, by operating microscope, digestive & hepatobiliary tract

3.OZ.94.AY	using cine/video recording (camera transmitter)
Includes:	Capsule endoscopy, small intestine Mouth to anus [M 2 A] video recording
Note:	Involves swallowing a (small) capsule containing a miniature video camera which transmits images to a recording device worn by patient
3.OZ.94.ZA	using microscope

Diagnostic Imaging Interventions on the Genitourinary System (3PB - 3RZ)

Diagnostic Imaging Interventions on the Urinary System (3PB - 3PZ)

3.PB.^.^ Diagnostic Imaging Interventions on the Adrenal gland

Excludes: Adrenal with kidney (see [3.PC.^.^](#))

3.PB.70.^.^ Diagnostic nuclear (imaging) study, adrenal gland

Includes: Nuclear scan, adrenal gland

3.PB.70.CA	using scintigraphy
3.PB.70.CC	using SPEC tomography (SPECT)
3.PB.70.CE	using PE tomography (PET)
3.PB.70.CH	using SPEC tomography (SPECT) with CT hybrid technique, single machine
3.PB.70.CJ	using PE tomography (PET) with CT hybrid technique, single machine

3.PC.^.^ Diagnostic Imaging Interventions on the Kidney

Includes: Ectopic kidney
Kidney NOS
Kidney with adrenal gland
Kidney with renal pelvis
Renal capsule
Renal cortex
Renal medulla
Renal pelvis

Excludes: Adrenal gland alone (see [3.PB.^.^](#))
Renal arteries alone (see [3.KC.^.^](#))
Renal veins alone (see [3.KQ.^.^](#))

3.PC.10.^ ^ Xray, kidney**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Nephrography
Nephrostography
that for kidney with renal pelvis

Excludes: that with ureter (see [3.PH.10.^ ^](#))
that with ureter and bladder [KUB] (see [3.PS.10.^ ^](#))

3.PC.10.VC following intravenous injection of contrast (with or without fluoroscopy)
3.PC.10.VZ following percutaneous injection of contrast (with or without fluoroscopy)

3.PC.12.^ ^ Fluoroscopy, kidney**S** ¹ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Fluoroscopic guidance, kidney (interventions)

Excludes: that with ureter (see [3.PH.12.^ ^](#))
that with ureter and bladder (see [3.PZ.12.^ ^](#))
that with xray (see [3.PC.10.^ ^](#))

3.PC.12.VA without contrast
3.PC.12.VC following intravenous injection of contrast
3.PC.12.VZ following percutaneous injection of contrast

3.PC.18.^ Tomography, kidney**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Nephrotomography**Excludes:** that with ureter (see [3.PZ.18.^](#))
that with ureter and bladder (see [3.PZ.18.^](#))

3.PC.18.VA	without contrast
3.PC.18.VC	following intravenous injection of contrast
3.PC.18.VZ	following percutaneous injection of contrast

3.PC.20.^ Computerized tomography [CT], kidney**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Omit code: When CT scan is performed as part of a SPECT or PET diagnostic nuclear imaging study, hybrid/fusion technique, single machine. (See Diagnostic nuclear (imaging) (scan) study, by site)

3.PC.20.VA	without contrast
3.PC.20.WC	with contrast

3.PC.30.^ **Ultrasound, kidney****S**¹ **L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Ultrasound guidance, kidney (interventions)
 Ultrasound, assessment of transplanted kidney
 Ultrasound, kidney (and adrenal gland)

Excludes: Ultrasound of abdominal (pelvic) cavity with kidney (see [3.OT.30.^](#))

3.PC.30.DA alone
 3.PC.30.DB with color flow
 3.PC.30.DC with Doppler
 3.PC.30.DD with color flow and Doppler

3.PC.40.^ **Magnetic resonance imaging [MRI], kidney****L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

3.PC.40.VA without contrast
 3.PC.40.WC with contrast

3.PC.70.^.^ Diagnostic nuclear (imaging) study, kidney**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Dynamic renal scan

Excludes: Residual urine in bladder study (see [3.PZ.70.^.](#))
 Ureteral reflux study (see [3.PZ.70.^.](#))
 Urinary recovery study (see [3.PZ.70.^.](#))

3.PC.70.CA	using scintigraphy
	Includes: Renal scan NOS
3.PC.70.CB	using scintigraphy and vascular flow (plasma flow)
	Includes: Effective renal plasma flow study (ERPF)
3.PC.70.CC	using SPEC tomography (SPECT)
3.PC.70.CE	using PE tomography (PET)
3.PC.70.CH	using SPEC tomography (SPECT) with CT hybrid technique, single machine
3.PC.70.CJ	using PE tomography (PET) with CT hybrid technique, single machine
3.PC.70.SQ	using isotope for glomerular filtration rate (GFR) study
3.PC.70.TF	using isotope for renal clearance study

3.PH.^.^.^ Diagnostic Imaging Interventions on the Kidney with Ureter**3.PH.10.^.^ Xray, kidney with ureter****S** ¹ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Plain film of kidney with ureter alone
Retrograde pyelogram
Urography
Visualization of kidney and ureter following injection of dye through ureterostomy catheter

Excludes: Nephrostography (see [3.PC.10.^^](#))
that for kidney alone (see [3.PC.10.^^](#))
that with bladder [KUB] (see [3.PS.10.^^](#))

3.PH.10.VA without contrast
3.PH.10.VZ following percutaneous injection of contrast (with or without fluoroscopy)
Note: Includes that via injection of contrast into ureterostomy catheter
3.PH.10.XJ following retrograde injection of contrast (with or without fluoroscopy)
Note: Involves a retrograde approach via the urethra to bladder by cystoscope followed by injection of contrast dye into the ureters and renal pelvis for pyelography.

3.PH.12.^^ Fluoroscopy, kidney with ureter

S ¹ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Fluoroscopic guidance, kidney with ureter (interventions)

Excludes: that for kidney alone (see [3.PC.12.^^](#))
that with bladder (see [3.PZ.12.^^](#))
that with xray (see [3.PH.10.^^](#))

3.PH.12.VA without contrast
3.PH.12.VC following intravenous injection of contrast
3.PH.12.XJ following retrograde injection of contrast

3.PM.^^.^^ Diagnostic Imaging Interventions on the Bladder

Includes:

- Bladder neck
- Bladder NOS
- Bladder with bladder neck
- Bladder with urethra
- Dome of bladder
- Intraluminous tissue of bladder
- Trigone of bladder
- Urachus

3.PM.10.^^ Xray, bladder**S**¹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes:

- Cystography
- Cystourethrography
- Voiding cystourethrogram (VCUG)

Excludes:

- intravenous pyelogram (see [3.PS.10.^^](#))
- that with kidney and ureter (see [3.PS.10.^^](#))

3.PM.10.WN following antegrade injection of contrast (with or without fluoroscopy)

3.PM.10.WQ following antegrade injection of contrast with voiding views (with or without fluoroscopy)

3.PM.10.XJ following retrograde injection of contrast (with or without fluoroscopy)

3.PM.10.XK following retrograde injection of contrast using special light source (with or without fluoroscopy)

Includes: Blue light cystoscopy (Cysview)

3.PM.10.XN following retrograde injection of contrast with voiding views (with or without fluoroscopy)

3.PM.12.^^ Fluoroscopy, bladder**S**¹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Fluoroscopic guidance, bladder NEC (interventions)

Excludes: that with kidney and ureter (see [3.PZ.12.^^](#))
that with urethra (see [3.PZ.12.^^](#))
that with xray (see [3.PM.10.^^](#))

3.PM.12.VA without contrast
3.PM.12.XJ following retrograde injection of contrast
3.PM.12.XN following retrograde injection of contrast with voiding views

3.PM.30.^^ Ultrasound, bladder

S 1

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Ultrasound guidance, bladder (interventions)

Excludes: Ultrasonic device used for bladder function studies (see [2.PM.58.^^](#))
Ultrasound of abdominal (pelvic) cavity with bladder (see [3.OT.30.^^](#))

3.PM.30.DA alone
3.PM.30.DG transrectal
3.PM.30.LA transvaginal

3.PQ.^^.^^ Diagnostic Imaging Interventions on the Urethra

Includes: Urethral sphincter

3.PQ.10.^^ Xray, urethra

S 1

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Urethrography

Excludes: that with bladder (see [3.PM.10.^^](#))

3.PQ.10.XJ following retrograde injection of contrast

3.PS.^.^ Diagnostic Imaging Interventions on the Kidney with Ureter and Bladder**3.PS.10.^.^ Xray, kidney with ureter and bladder****S¹ E²**

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative
E 2	Optional	Views	Extent	A	2 views or less
				B	3 to 4 views
				C	5 to 6 views
				D	Greater than 6 views

Includes: Pyelography
Xray, KUB

Excludes: Retrograde pyelography (see [3.PH.10.^.](#))
that for bladder alone (see [3.PM.10.^.](#))
that for kidney alone (see [3.PC.10.^.](#))
that for kidney and ureter alone (see [3.PH.10.^.](#))

3.PS.10.VA without contrast (e.g. plain film KUB)
3.PS.10.VC following intravenous injection of contrast [IVP]
3.PS.10.XJ following retrograde injection of contrast

Includes: Cystopyelography

3.PZ.^.^ Diagnostic Imaging Interventions on the Urinary System NEC**3.PZ.10.^.^ Xray, urinary system NEC****S¹**

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

- Includes:** Fistulogram, urinary
 Ileal conduitogram (urinary loop diversion)
 Ileoconduit loopography
 Sinogram, genitourinary
 Xray, external urinary diversion (stoma)
- Excludes:** Xray, kidney with ureter and bladder [KUB] (see [3.PS.10.^^](#))

- 3.PZ.10.VA without contrast (e.g. plain film) (with or without fluoroscopy)
 3.PZ.10.VC following intravenous injection of contrast (with or without fluoroscopy)
 3.PZ.10.XJ following retrograde injection of contrast (with or without fluoroscopy)

3.PZ.12.^^ Fluoroscopy, urinary system NEC**S**¹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

- Includes:** Fluoroscopic guidance, urinary system NEC (interventions)
 Fluoroscopy, bladder with urethra
 Fluoroscopy, kidney with ureter and bladder
 Fluoroscopy, sinuses/fistula of genitourinary
 Fluoroscopy, urinary stoma
 Fluoroscopy, urinary system NOS
- Excludes:** Fluoroscopy, bladder alone (see [3.PM.12.^^](#))
 Fluoroscopy, kidney alone (see [3.PC.12.^^](#))
 Fluoroscopy, kidney with ureter (see [3.PH.12.^^](#))
 that with xray (see [3.PZ.10.^^](#))

- 3.PZ.12.VA without contrast
 3.PZ.12.VC following intravenous injection of contrast

3.PZ.18.^^ Tomography, urinary system NEC

- Includes:** Tomography, genitourinary system
- Excludes:** Nephrotomography (see [3.PC.18.^^](#))

- 3.PZ.18.VA without contrast
 3.PZ.18.VC following intravenous injection of contrast
 3.PZ.18.XJ following retrograde injection of contrast

3.PZ.20.^ ^ Computerized tomography [CT], urinary system NEC**Includes:** CAT scan, urinary system**Omit code:** When CT scan is performed as part of a SPECT or PET diagnostic nuclear imaging study, hybrid/fusion technique, single machine. (See Diagnostic nuclear (imaging) (scan) study, by site)

3.PZ.20.VA without contrast

3.PZ.20.WC with contrast

3.PZ.70.^ ^ Diagnostic nuclear (imaging) study, urinary system NEC**E 33**

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 33	Optional	Nuclear (imaging) study parameter	Extent	C M	Complete study
				L T	Limited study

Includes: Function study, bladder
Function study, ureter
Function study, urinary system NEC using radionuclide**Excludes:** Diagnostic nuclear (imaging) study, kidney (alone) (see [3.PC.70.^ ^](#))
Function study, kidney (alone) using radionuclide (see [3.PC.70.^ ^](#))

3.PZ.70.CA using scintigraphy

Includes: Urinary system scan NOS

3.PZ.70.CB using scintigraphy with vascular flow

3.PZ.70.CC using SPECT tomography (SPECT)

3.PZ.70.CE using PET tomography (PET)

3.PZ.70.CH using SPECT tomography (SPECT) with CT hybrid technique, single machine

3.PZ.70.CJ using PET tomography (PET) with CT hybrid technique, single machine

3.PZ.70.TH using isotope for residual urine in bladder study

3.PZ.70.TK using isotope for ureteral reflux study

3.PZ.70.TL using isotope for urinary recovery study

3.PZ.94.^ Imaging intervention NEC, urinary system NEC**S**¹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Guidance, stereotactic (computer assisted), urinary system
 Imaging assistance NEC, urinary system
 Visualization, by operating microscope, urinary system

Omit code: when imaging is performed concomitantly with robotic assisted telemanipulation of tools (see [7.SF.14.^](#))

3.PZ.94.ZA using microscope
 3.PZ.94.ZB using computer
 3.PZ.94.ZC using stereotaxis (without computer guidance)

Diagnostic Imaging Interventions on the Male Genital Organs (3QA - 3QZ)

3.QE.^.^ Diagnostic imaging interventions on the Penis

Includes: Corpus cavernosa
Corpus spongiosum

Excludes: Penile vessels (see [3.KU.^.^](#))

3.QE.10.^ Xray, penis

Includes: Corpus cavernosography
xray with fluoroscopy

3.QE.10.VZ following percutaneous injection of contrast (with or without fluoroscopy)
3.QE.10.WX following catheter (shunt, pump or reservoir) injection of contrast (with or without fluoroscopy)

Includes: that for visualization of shunt, pump or reservoir

3.QE.12.^ Fluoroscopy, penis

S¹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Fluoroscopic guidance, penis (interventions)

Excludes: that with xray (see [3.QE.10.^](#))

3.QE.12.VA without contrast

3.QG.^.^ Diagnostic Imaging Interventions on the Scrotum

Includes: Scrotum and contents
Testis

Excludes: Seminal vesicles (see [3.QT.^.^](#))

3.QG.30.^ ^ Ultrasound, scrotum**S** 1

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Ultrasound guidance, scrotum (interventions)
Ultrasound, testicles

Excludes: that for penile blood vessels (see [3.KU.30.^ ^](#))
that for seminal vesicles (see [3.QT.30.^ ^](#))

3.QG.30.DA alone
3.QG.30.DB with color flow
3.QG.30.DC with Doppler
3.QG.30.DD with color flow and Doppler

3.QG.40.^ ^ Magnetic resonance imaging [MRI], scrotum**S** 1

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: MRI, testicles

3.QG.40.VA without contrast
3.QG.40.WC with contrast

3.QG.70.^ ^ Diagnostic nuclear (imaging) study, scrotum**E** 33

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 33	Optional	Nuclear (imaging) study parameter	Extent	C M	Complete study
				L T	Limited study

Includes: Nuclear scan, scrotum (testicle)

3.QG.70.CA	using scintigraphy
3.QG.70.CB	using scintigraphy with vascular flow
3.QG.70.CC	using SPEC tomography (SPECT)
3.QG.70.CE	using PE tomography (PET)
3.QG.70.CH	using SPEC tomography (SPECT) with CT hybrid technique, single machine
3.QG.70.CJ	using PE tomography (PET) with CT hybrid technique, single machine

3.QN.^.^ Diagnostic Imaging Interventions on the Vas Deferens

3.QN.10.^ Xray, vas deferens

Includes: Vasography

3.QN.10.VA	without contrast (e.g. plain film)
3.QN.10.VV	following per orifice injection of contrast

3.QT.^.^ Diagnostic Imaging Interventions on the Prostate

Includes: Seminal vesicles

3.QT.20.^ Computerized tomography [CT], prostate

S 1

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: that for seminal vesicles

Omit code: When CT scan is performed as part of a SPECT or PET diagnostic nuclear imaging study, hybrid/fusion technique, single machine. (See Diagnostic nuclear (imaging) (scan) study, by site)

3.QT.20.VA	without contrast
3.QT.20.WC	with contrast

3.QT.30.^ Ultrasound, prostate

S 1

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Ultrasound guidance, prostate (interventions)
 Ultrasound, seminal vesicles

Excludes: Ultrasound of abdominal (pelvic) cavity with prostate (see [3.OT.30.^^](#))

3.QT.30.DA alone
 3.QT.30.DG using trans rectal approach

3.QT.40.^^ Magnetic resonance imaging [MRI], prostate

S¹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: MRI, seminal vesicles

3.QT.40.VA without contrast
 3.QT.40.WC with contrast

3.QZ.^^.^^ Diagnostic Imaging Interventions on the Male Genital Tract NEC

Excludes: Penis NEC (see [3.QE.^^.^^](#))

3.QZ.10.^^ Xray, male genital tract NEC

Includes: Xray, male genital organ NOS

Excludes: Corpus cavernosography (see [3.QE.10.^^](#))
 that for examination of penis (alone) (see [3.QE.10.^^](#))
 that for vas deferens (see [3.QN.10.^^](#))

3.QZ.10.VV following per orifice injection of contrast

3.QZ.12.^^ Fluoroscopy, male genital tract NEC

S¹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Fluoroscopic guidance, male genital tract NEC (interventions)

3.QZ.12.VA without contrast
3.QZ.12.VV following per orifice injection of contrast

3.QZ.30.^.^ Ultrasound, male genital tract NEC

S 1

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Ultrasound guidance, male genital tract NEC (interventions)

Excludes: that for penile blood vessels (see [3.KU.30.^.](#))
that for prostate (see [3.QT.30.^.](#))
that for scrotum and contents (see [3.QG.30.^.](#))
Ultrasound of abdominal (pelvic) cavity with male genital tract (see [3.OT.30.^.](#))

3.QZ.30.DA alone

3.QZ.94.^.^ Imaging intervention NEC, male genital tract NEC

S 1

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Guidance, stereotactic (computer assisted), male genital tract
Imaging assistance NEC, male genital tract
Visualization, by operating microscope, male genital tract

Omit code: when imaging is performed concomitantly with robotic assisted telemanipulation of tools (see [7.SF.14.^.](#))

3.QZ.94.ZA using microscope
3.QZ.94.ZB using computer
3.QZ.94.ZC using stereotaxis (without computer guidance)

Diagnostic Imaging Interventions on the Female Genital Organs (3RF - 3RZ)

3.RF.^.^ Diagnostic Imaging Interventions on the Fallopian Tube

Includes: Uterine tube

Excludes: Uterus with fallopian tube (see [3.RK.^.^](#))

3.RF.10.^.^ Xray, fallopian tube

S 1

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Salpingography

Excludes: that with uterus (see [3.RK.10.^.](#))

3.RF.10.VH following injection of air or gas (in cavity) (with or without fluoroscopy)

3.RF.10.XJ following retrograde injection of contrast (e.g. dye) (with or without fluoroscopy)

3.RK.^.^ Diagnostic Imaging Interventions on the Uterus with Fallopian Tube(s)

Includes: Uterus with uterine tube

3.RK.10.^.^ Xray, uterus with fallopian tube(s)

S 1

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Hysterosalpingography

Uterosolpingography

Excludes: that for fallopian tubes alone (see [3.RF.10.^.](#))

3.RK.10.VH following injection of air or gas (in cavity) (with or without fluoroscopy)

3.RK.10.XJ following retrograde injection of contrast (e.g. dye) (with or without fluoroscopy)

3.RM.^.^ Diagnostic Imaging Interventions on the Uterus**3.RM.70.^.^ Diagnostic nuclear (imaging) study, uterus****E** 33

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 33	Optional	Nuclear (imaging) study parameter	Extent	C M	Complete study
				L T	Limited study

Includes: Nuclear scan, uterus

3.RM.70.CA using scintigraphy
 3.RM.70.CC using SPEC tomography (SPECT)
 3.RM.70.CE using PE tomography (PET)
 3.RM.70.CH using SPEC tomography (SPECT) with CT hybrid technique, single machine
 3.RM.70.CJ using PE tomography (PET) with CT hybrid technique, single machine

3.RS.^.^ Diagnostic Imaging Interventions on the Vagina**3.RS.10.^.^ Xray, vagina****Includes:** Vaginogram**Excludes:** Perineogram (see [3.RY.10.^.](#))

3.RS.10.VV following per orifice injection of contrast

3.RY.^.^ Diagnostic Imaging Interventions on the Perineum**Includes:** Male perineum**3.RY.10.^.^ Xray, perineum****Includes:** Perineogram
that for determination of extent of congenital anomalies

3.RY.10.VZ following percutaneous injection of contrast

3.RZ.^.^ Diagnostic Imaging Interventions on the Female Genital Tract NEC**3.RZ.12.^.^ Fluoroscopy, female genital tract NEC****S**¹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Fluoroscopic guidance, female genital tract NEC (interventions)

Excludes: that with xray, fallopian tubes (see [3.RF.10.^.](#))
that with xray, uterus with fallopian tubes (see [3.RK.10.^.](#))

3.RZ.12.VA without contrast

3.RZ.12.VV with contrast

3.RZ.30.^.^ Ultrasound, female genital tract NEC**S**¹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Ultrasound for follicular study (ovarian)
Ultrasound uterus (with fallopian tubes) (non obstetrical)
Ultrasound, female genital tract (non obstetrical)

Excludes: Obstetrical ultrasound (see [5.AB.03.^.](#))
Ultrasound of abdominal (pelvic) cavity with female genital tract (see [3.OT.30.^.](#))
Ultrasound of bladder (alone) (see [3.PM.30.^.](#))
Ultrasound of gravid uterus (see [5.AB.03.^.](#))

3.RZ.30.DA alone

3.RZ.30.LA transvaginal approach

3.RZ.94.^.^ Imaging intervention NEC, female genital tract NEC

S 1

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Imaging assistance NEC, female genital tract
Visualization, by operating microscope, female genital tract

3.RZ.94.ZA	using microscope [colposcopy]
------------	-------------------------------

Diagnostic Imaging Interventions on the Musculoskeletal System (3SC - 3WZ)

Diagnostic Imaging Interventions on the Spine, Trunk and Pelvis (3SC - 3SZ)

3.SC.^.^ Diagnostic Imaging Interventions on the Spinal Vertebrae

Includes: Diagnostic imaging interventions on the vertebral column

Excludes: Sacrum and coccyx (see [3.SF.^.^](#))

3.SC.10.^.^ Xray, spinal vertebrae

L⁷

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 7	Optional	Spine 2	Location	C T	Cervicothoracic spine
				C X	Cervical spine alone
				L B	Lumbar spine alone
				L S	Lumbosacral spine
				S P	Complete spine (or spine NEC)
				T H	Thoracic spine alone
				T L	Thoracolumbar spine (or thoracolumbosacral)

Includes: Scoliosis film/series

Excludes: that for spinal canal and contents (see [3.AW.10.^.^](#))

3.SC.10.KM	with physically induced stress (with or without fluoroscopy)
3.SC.10.VA	without contrast
3.SC.10.VN	with fluoroscopy

3.SC.12.^ ^ Fluoroscopy, spinal vertebrae**S** ¹ **L** ⁷

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative
L 7	Optional	Spine 2	Location	C T	Cervicothoracic spine
				C X	Cervical spine alone
				L B	Lumbar spine alone
				L S	Lumbosacral spine
				S P	Complete spine (or spine NEC)
				T H	Thoracic spine alone
				T L	Thoracolumbar spine (or thoracolumbosacral)

Includes: Fluoroscopic guidance, spine (intervention)

Excludes: that of spinal cord (see [3.AW.12.^ ^](#))
that with xray (see [3.SC.10.^ ^](#))

3.SC.12.AY with cine/video recording

3.SC.12.VA without contrast

3.SC.18.^ ^ Tomography, spinal vertebrae**L** ⁷

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 7	Optional	Spine 2	Location	C T	Cervicothoracic spine
				C X	Cervical spine alone
				L B	Lumbar spine alone
				L S	Lumbosacral spine
				S P	Complete spine (or spine NEC)
				T H	Thoracic spine alone
				T L	Thoracolumbar spine (or thoracolumbosacral)

3.SC.18.VA without contrast

3.SC.20.^ ^ Computerized tomography [CT], spinal vertebrae**S** ¹ **L** ⁷

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative
L 7	Optional	Spine 2	Location	C T	Cervicothoracic spine
				C X	Cervical spine alone
				L B	Lumbar spine alone
				L S	Lumbosacral spine
				S P	Complete spine (or spine NEC)
				T H	Thoracic spine alone
				T L	Thoracolumbar spine (or thoracolumbosacral)

Includes: CAT scan, spine**Omit code:** When CT scan is performed as part of a SPECT or PET diagnostic nuclear imaging study, hybrid/fusion technique, single machine. (See Diagnostic nuclear (imaging) (scan) study, by site)

3.SC.20.VA without contrast

3.SC.20.WC with contrast

3.SC.40.^ ^ Magnetic resonance imaging [MRI], spinal vertebrae**L** ⁷

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 7	Optional	Spine 2	Location	C T	Cervicothoracic spine
				C X	Cervical spine alone
				L B	Lumbar spine alone
				L S	Lumbosacral spine
				S P	Complete spine (or spine NEC)
				T H	Thoracic spine alone
				T L	Thoracolumbar spine (or thoracolumbosacral)

Includes: MRI, spine

3.SC.40.VA without contrast

3.SC.40.WC with contrast

3.SC.70.^.^ Diagnostic nuclear (imaging) study, spinal vertebrae**E** 33

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 33	Optional	Nuclear (imaging) study parameter	Extent	C M	Complete study
				L T	Limited study

Includes: Nuclear scan, spine

Excludes: that for spinal cord, canal and contents (see [3.AW.70.^.^](#))

3.SC.70.CA	using scintigraphy
3.SC.70.CC	using SPEC tomography (SPECT)
3.SC.70.CE	using PE tomography (PET)
3.SC.70.CH	using SPEC tomography (SPECT) with CT hybrid technique, single machine
3.SC.70.CJ	using PE tomography (PET) with CT hybrid technique, single machine

3.SE.^.^ Diagnostic Imaging Interventions on the Intervertebral Disc

Includes: Annulus fibrosus
Nucleus pulposus

3.SE.10.^.^ Xray, intervertebral disc**L** 7

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 7	Optional	Spine 2	Location	C T	Cervicothoracic spine
				C X	Cervical spine alone
				L B	Lumbar spine alone
				L S	Lumbosacral spine
				S P	Complete spine (or spine NEC)
				T H	Thoracic spine alone
				T L	Thoracolumbar spine (or thoracolumbosacral)

Includes: Discography, intervertebral

3.SE.10.VK	following intradiscal injection of contrast (with or without fluoroscopy)
------------	---

3.SE.12.^.^ Fluoroscopy, intervertebral disc**S** ¹ **L** ⁷

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative
L 7	Optional	Spine 2	Location	C T	Cervicothoracic spine
				C X	Cervical spine alone
				L B	Lumbar spine alone
				L S	Lumbosacral spine
				S P	Complete spine (or spine NEC)
				T H	Thoracic spine alone
				T L	Thoracolumbar spine (or thoracolumbosacral)

Includes: Fluoroscopic guidance, intervertebral disc (intervention)

Excludes: that with xray (see [3.SE.10.^.^](#))

3.SE.12.VA without contrast

3.SE.12.VK following intradiscal injection of contrast

3.SF.^.^.^ Diagnostic Imaging Interventions on the Sacrum and Coccyx

Excludes: Lumbosacral spinal vertebrae [vertebrae L1-S2] (see [3.SC.^.^.^](#))

3.SF.10.^.^ Xray, sacrum and coccyx

Includes: sacroiliac joints

3.SF.10.VA without contrast

3.SF.10.VL following intraarticular injection of contrast (with or without fluoroscopy)

Includes: Arthrography, sacroiliac joint

3.SF.12.^.^ Fluoroscopy, sacrum and coccyx**S** ¹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Fluoroscopic guidance, sacroiliac joint (intervention)
Excludes: that with xray (see [3.SF.10.^^](#))

3.SF.12.VA without contrast
 3.SF.12.VL following intraarticular injection of contrast

3.SF.18.^^ Tomography, sacrum and coccyx

Includes: Tomography, sacroiliac joint

3.SF.18.VA without contrast

3.SF.20.^^ Computerized tomography [CT], sacrum and coccyx

Includes: CAT scan, sacroiliac joint

Omit code: When CT scan is performed as part of a SPECT or PET diagnostic nuclear imaging study, hybrid/fusion technique, single machine. (See Diagnostic nuclear (imaging) (scan) study, by site)

3.SF.20.VA without contrast
 3.SF.20.WC with contrast

3.SF.40.^^ Magnetic resonance imaging [MRI], sacrum and coccyx

Includes: MRI, Sacroiliac joint

3.SF.40.VA without contrast
 3.SF.40.WC with contrast

3.SH.^^.^^ Diagnostic Imaging Interventions on Soft Tissue of Back

Excludes: Skin and subcutaneous alone (see [3.YZ.^^.^^](#))

3.SH.30.^^ Ultrasound, soft tissue of the back

S¹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Excludes: that for sinus/fistulous tract of thoracic cavity (see [3.GY.30.^^](#))

3.SH.30.DA alone

3.SK.^^.^^ Diagnostic Imaging Interventions on the Sternum**3.SK.10.^^ Xray, sternum***Includes:* that with fluoroscopy

3.SK.10.VA without contrast (with or without fluoroscopy)

3.SK.12.^^ Fluoroscopy, sternum**S**¹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Fluoroscopic guidance, sternum (interventions)*Excludes:* that with xray (see [3.SK.10.^^](#))

3.SK.12.VA without contrast

3.SL.^^.^^ Diagnostic Imaging Interventions on the Ribs**3.SL.10.^^ Xray, ribs***Includes:* Xray with fluoroscopy, ribs

3.SL.10.VA without contrast (with or without fluoroscopy)

3.SL.12.^^ Fluoroscopy, ribs**S**¹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Fluoroscopic guidance, ribs (interventions)*Excludes:* that with xray, ribs (see [3.SL.10.^^](#))

3.SL.12.VA without contrast

3.SM.^.^ Diagnostic Imaging Interventions on the Clavicle

Excludes: Acromion (see [3.TB.^.^](#))
Coracoid process (see [3.TB.^.^](#))

3.SM.10.^.^ Xray, clavicle**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: that with fluoroscopy

3.SM.10.VA without contrast (with or without fluoroscopy)

3.SM.12.^.^ Fluoroscopy, clavicle**S**¹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Fluoroscopic guidance, clavicle (interventions)

Excludes: that with xray (see [3.SM.10.^.](#))

3.SM.12.VA without contrast

3.SN.^.^ Diagnostic Imaging Interventions on the Scapula**3.SN.10.^ Xray, scapula****L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Xray with fluoroscopy, scapula

3.SN.10.VA without contrast (e.g. plain film) (with or without fluoroscopy)

3.SN.12.^ Fluoroscopy, scapula**S**¹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Fluoroscopic guidance, scapula (interventions)

Excludes: that with xray (see [3.SN.10.^](#))

3.SN.12.VA without contrast

3.SQ.^.^ Diagnostic Imaging Interventions on the Pelvis

Includes: Pubis

3.SQ.10.^ Xray, pelvis

Includes: Pelvimetry (non gravid)

Excludes: that for obstetrical examination (see [5.AB.05.^](#))
that for obstetrical pelvimetry (see [5.AB.05.^](#))
that with hip joint (see [3.VA.10.^](#))

3.SQ.10.VA without contrast

3.SQ.10.VN with fluoroscopy

3.SQ.12.^ ^ Fluoroscopy, pelvis**S**¹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Fluoroscopic guidance, pelvis (intervention)

Excludes: that with hip joint (see [3.VA.12.^ ^](#))
that with xray (see [3.SQ.10.^ ^](#))

3.SQ.12.VA without contrast

3.SQ.18.^ ^ Tomography, pelvis

3.SQ.18.VA without contrast

Diagnostic Imaging Interventions on the Shoulder and Arm (excluding hand and wrist) (3TA - 3TZ)

3.TA.^.^ Diagnostic Imaging Interventions on the Shoulder Joint

Excludes: Acromioclavicular and sternoclavicular joints (see [3.TB.^.^](#))

3.TA.10.^.^ Xray, shoulder joint

L ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: that for examination of shoulder joint alone

Excludes: Radionuclide arthrogram, shoulder joint (see [3.TA.70.^.](#))

3.TA.10.KM with physically induced stress (to joint or contralateral joint) (with or without fluoroscopy)

3.TA.10.VA without contrast (with or without fluoroscopy)

3.TA.10.VL following intraarticular injection of contrast (with or without fluoroscopy)

Includes: Arthrography, shoulder joint

3.TA.12.^.^ Fluoroscopy, shoulder joint

S ¹ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Fluoroscopic guidance, shoulder joint (interventions)

Excludes: that with xray (see [3.TA.10.^.](#))

3.TA.12.VA without contrast

3.TA.12.VL following intraarticular injection of contrast

3.TA.30.^ **Ultrasound, shoulder joint****S**¹ **L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Ultrasound guidance, shoulder joint (interventions)

3.TA.30.VA without contrast

3.TA.70.^ **Diagnostic nuclear (imaging) study, shoulder joint****L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: intraarticular injection of radionuclide
 Radionuclide arthrogram that for evaluation of joint prosthesis or fixation devices
 Radionuclide arthrography (RNA)

Excludes: Contrast arthrogram (xray), shoulder joint (see [3.TA.10.^](#))
 Nuclear bone density scan (see [3.WZ.70.^](#))

3.TA.70.CA using scintigraphy
 3.TA.70.CC using SPEC tomography (SPECT)
 3.TA.70.CE using PE tomography (PET)
 3.TA.70.CH using SPEC tomography (SPECT) with CT hybrid technique, single machine
 3.TA.70.CJ using PE tomography (PET) with CT hybrid technique, single machine

3.TB.^^.^^ Diagnostic Imaging Interventions on the Acromioclavicular and Sternoclavicular Joints**3.TB.10.^^ Xray, acromioclavicular and sternoclavicular joints****L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Xray with fluoroscopy, AC and SC joints

3.TB.10.KM with physically induced stress (to joint or contralateral joint) (with or without fluoroscopy)
 3.TB.10.VA without contrast (with or without fluoroscopy)
 3.TB.10.VL following intraarticular injection of contrast (with or without fluoroscopy)

Includes: Arthrography, acromioclavicular and sternoclavicular joints

3.TB.12.^^ Fluoroscopy, acromioclavicular and sternoclavicular joints**S**¹ **L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Fluoroscopic guidance, acromioclavicular and sternoclavicular joints (interventions)

Excludes: that with xray (see [3.TB.10.^^](#))

3.TB.12.VA without contrast

3.TK.^^.^^ Diagnostic Imaging Interventions on the Humerus**3.TK.10.^^ Xray, humerus****L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Xray with fluoroscopy, humerus (with shoulder)
Xray, (views of) upper arm

Excludes: that of shoulder joint only (see [3.TA.10.^^](#))
Xray, whole arm (see [3.TZ.10.^^](#))

3.TK.10.VA without contrast (e.g. plain film) (with or without fluoroscopy)

3.TK.12.^^ Fluoroscopy, humerus**S**¹ **L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Fluoroscopic guidance, humerus (intervention)
Fluoroscopic guidance, upper arm (intervention)
that involving shoulder with humerus

Excludes: Fluoroscopic guidance (for) shoulder joint (interventions) alone (see [3.TA.12.^^](#))
Fluoroscopy with xray, humerus (with shoulder) (see [3.TK.10.^^](#))

3.TK.12.VA without contrast

3.TM.^^.^^ Diagnostic Imaging Interventions on the Elbow joint

Excludes: Elbow with radius and ulna (see [3.TV.^^.^^](#))

3.TM.10.^ ^ Xray, elbow joint**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: that for examination of elbow joint alone

Excludes: Radionuclide arthrogram, elbow joint (see [3.TM.70.^ ^](#))

3.TM.10.KM with physically induced stress (to joint or contralateral joint) (with or without fluoroscopy)

3.TM.10.VA without contrast

3.TM.10.VL following intraarticular injection of contrast (with or without fluoroscopy)

Includes: Arthrography, elbow joint

3.TM.12.^ ^ Fluoroscopy, elbow joint**S** ¹ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Fluoroscopic guidance, elbow joint (interventions)

Excludes: that with xray (see [3.TM.10.^ ^](#))

3.TM.12.VA without contrast

3.TM.12.VL following intraarticular injection of contrast

3.TM.30.^ Ultrasound, elbow joint**S**¹ **L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Ultrasound guidance, elbow joint (interventions)

3.TM.30.VA without contrast

3.TM.70.^ Diagnostic nuclear (imaging) study, elbow joint**L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Intraarticular injection of radionuclide
Radionuclide arthrogram
Radionuclide arthrography (RNA)
that for evaluation of joint prosthesis or fixation devices

Excludes: Contrast arthrogram (xray), elbow joint (see [3.TM.10.^](#))
Nuclear bone density scan (see [3.WZ.70.^](#))

3.TM.70.CA using scintigraphy
3.TM.70.CC using SPEC tomography (SPECT)
3.TM.70.CE using PE tomography (PET)
3.TM.70.CH using SPEC tomography (SPECT) with CT hybrid technique, single machine
3.TM.70.CJ using PE tomography (PET) with CT hybrid technique, single machine

3.TV.^^.^^ Diagnostic Imaging Interventions on the Radius and Ulna**3.TV.10.^^ Xray, radius and ulna****L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Xray with fluoroscopy, radius and ulna (with or without elbow)
Xray, (views of) forearm

3.TV.10.VA without contrast (e.g. plain film) (with or without fluoroscopy)

3.TV.12.^^ Fluoroscopy, radius and ulna**S**¹ **L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description

3.VZ.94.^^ Imaging intervention NEC, leg NEC

S ¹ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Imaging assistance NEC, leg (intervention)
muscle, nerve, tendon, vessels
Visualization, by operating microscope, leg

Excludes: Visualization, by operating microscope, foot (see [3.WG.94.^^](#))

3.VZ.94.ZA using microscope

Diagnostic Imaging Interventions on the Ankle and Foot (3WA - 3WV)

3.WA.^.^ Diagnostic Imaging Interventions on the Ankle Joint

3.WA.10.^.^ Xray, ankle joint

L²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Xray, ankle joint with foot

3.WA.10.KM with physically induced stress (to joint or contralateral joint) (with or without fluoroscopy)
 3.WA.10.VA without contrast (e.g. plain film) (with or without fluoroscopy)
 3.WA.10.VL following intraarticular injection of contrast (with or without fluoroscopy)

Includes: Arthrography, ankle joint

3.WA.12.^.^ Fluoroscopy, ankle joint

S¹ L²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Fluoroscopic guidance, ankle joint (intervention)

Excludes: Fluoroscopic guidance for foot (intervention) (see [3.WG.12.^.](#))
 that with xray (see [3.WA.10.^.](#))

3.WA.12.VA without contrast
 3.WA.12.VZ following intraarticular injection of contrast

3.WG.^^.^^ Diagnostic Imaging Interventions on the Foot

Includes: Bones and joints of foot and toes NEC

3.WG.10.^^ Xray, foot**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Xray, (tarsal, metatarsal and phalangeal) bones of foot
Xray, toes of foot

Excludes: Xray for examination of ankle joint only (see [3.WA.10.^^](#))

3.WG.10.KM with physically induced stress (to joint or contralateral joint) (with or without fluoroscopy)
3.WG.10.VA without contrast (e.g. plain film) (with or without fluoroscopy)
3.WG.10.VL following intraarticular injection of contrast (with and without fluoroscopy)

Includes: arthrography, joint of foot

3.WG.12.^^ Fluoroscopy, foot**S** ¹ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Fluoroscopic guidance, foot (intervention)

Excludes: Fluoroscopic guidance, ankle joint (intervention) (see [3.WA.12.^^](#))
that with xray (see [3.WG.10.^^](#))

3.WG.12.VA without contrast
3.WG.12.VZ following injection of contrast

3.WG.94.^ ^ Imaging intervention NEC, foot**S** ¹ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Imaging assistance NEC, foot (intervention)
Visualization, by operating microscope, foot

3.WG.94.ZA using microscope

Diagnostic Imaging Interventions on the Musculoskeletal System NEC (3WX - 3WZ)

3.WY.^^.^^ Diagnostic Imaging Interventions on the Bone Marrow

3.WY.40.^^ Magnetic resonance imaging [MRI], bone marrow

Includes: that for imaging bone marrow blood supply

3.WY.40.VA without contrast
3.WY.40.WC with contrast

3.WY.70.^^ Diagnostic nuclear (imaging) study, bone marrow

E 33

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 33	Optional	Nuclear (imaging) study parameter	Extent	C M	Complete study
				L T	Limited study

Includes: Bone marrow nuclear scan

Excludes: Bone scan NOS (see [3.WZ.70.^^](#))

3.WY.70.CA using scintigraphy
3.WY.70.CC using SPEC tomography (SPECT)
3.WY.70.CE using PE tomography (PET)
3.WY.70.CH using SPEC tomography (SPECT) with CT hybrid technique, single machine
3.WY.70.CJ using PE tomography (PET) with CT hybrid technique, single machine

3.WZ.^^.^^ Diagnostic Imaging Interventions on the Musculoskeletal System NEC

3.WZ.10.^^ Xray, musculoskeletal system NEC

E 33

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 33	Optional	Nuclear (imaging) study parameter	Extent	C M	Complete study
				L T	Limited study

Includes: Bone survey (multiple or overlapping sites)
Skeletal survey

3.WZ.10.VA without contrast (e.g. plain film) (with or without fluoroscopy)

3.WZ.20.^ ^ Computerized tomography [CT], musculoskeletal system NEC**E** 33

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 33	Optional	Nuclear (imaging) study parameter	Extent	C M	Complete study
				L T	Limited study

Includes: Bone densitometry
Bone density study NOS
Bone density survey
CAT scan, skeletal system

Excludes: that involving nuclear medicine (radionuclide) (see [3.WZ.70.^ ^](#))
Total body CT scan, chest, abdomen and pelvis together, for viewing sites other than musculoskeletal system (see [3.ZZ.20.^ ^](#))

Omit code: When CT scan is performed as part of a SPECT or PET diagnostic nuclear imaging study, hybrid/fusion technique, single machine. (See Diagnostic nuclear (imaging) (scan) study, by site)

3.WZ.20.VA without contrast

3.WZ.20.WC with contrast

3.WZ.40.^ ^ Magnetic resonance imaging [MRI], musculoskeletal system NEC

Includes: Magnetic resonance imaging [MRI] skeletal survey

3.WZ.40.VA without contrast

3.WZ.40.WC with contrast

3.WZ.70.^ ^ Diagnostic nuclear (imaging) study, musculoskeletal system NEC**E** 33

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 33	Optional	Nuclear (imaging) study parameter	Extent	C M	Complete study
				L T	Limited study

Includes:	Bone flow scintigram Bone scan Nuclear bone density Nuclear scan, skeletal system
Excludes:	Bone marrow scan (see 3.WY.70.^^) Radionuclide arthrogram (see Diagnostic nuclear (imaging) (scan) study, joints, by site)

3.WZ.70.CA	using scintigraphy
	Includes: Nuclear bone scan NOS
3.WZ.70.CC	using SPEC tomography (SPECT)
3.WZ.70.CE	using PE tomography (PET)
3.WZ.70.CG	using dual energy (xray) absorptiometry
	Includes: Nuclear bone density assessment
3.WZ.70.CH	using SPEC tomography (SPECT) with CT hybrid technique, single machine
3.WZ.70.CJ	using PE tomography (PET) with CT hybrid technique, single machine

Diagnostic Imaging Interventions on the Skin, Subcutaneous Tissue and Breast (3YL - 3YZ)

3.YL.^^.^^ Diagnostic Imaging Interventions on the Lactiferous Duct

Includes: Mammary ducts

3.YL.10.^^ Xray, lactiferous duct

E²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 2	Optional	Views	Extent	A	2 views or less
				B	3 to 4 views
				C	5 to 6 views
				D	Greater than 6 views

Includes: mammary ducts
Mammoductography

3.YL.10.VZ following intraductal injection of contrast

Includes: Mammoductography

3.YM.^^.^^ Diagnostic Imaging Interventions on the Breast

Excludes: Lactiferous ducts alone (see [3.YL.^^.^^](#))

3.YM.10.^^ Xray, breast

S¹ **L**²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Mammography [diagnostic, screening]
Excludes: Mammoductography (see [3.YL.10.^](#))
that on surgically removed breast (see [3.YN.10.^](#))

3.YM.10.SZ for placement of localization device (with or without fluoroscopy) (e.g. clip, needle hook, radioactive seed, wire)
Includes: that for confirmation of placement
3.YM.10.VA without contrast (with or without fluoroscopy)

3.YM.12.^ Fluoroscopy, breast

S ¹ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Fluoroscopic guidance, breast (intervention)
Excludes: that on surgically removed breast (see [3.YN.12.^](#))
that with xray (see [3.YM.10.^](#))

3.YM.12.SZ for placement of localization device (e.g. clip, needle hook, radioactive seed, wire)
Includes: that for confirmation of placement
3.YM.12.VA without contrast

3.YM.20.^ Computerized tomography [CT], breast

L ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: CAT scan, breast

Omit code: When CT scan is performed as part of a SPECT or PET diagnostic nuclear imaging study, hybrid/fusion technique, single machine. (See Diagnostic nuclear (imaging) (scan) study, by site)

3.YM.20.VA without contrast

3.YM.20.WC with contrast

3.YM.30.^.^ Ultrasound, breast

S ¹ **L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Ultrasound guidance, breast (intervention)

3.YM.30.DA

alone

3.YM.30.SZ

for placement of localization device (e.g. clip, needle hook, radioactive seed, wire)

Includes: that for confirmation of placement

3.YM.40.^.^ Magnetic resonance imaging [MRI], breast

L ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

3.YM.40.VA without contrast

3.YM.40.WC with contrast

3.YM.70.^ ^ Diagnostic nuclear (imaging) study, breast**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: Nuclear scan, breast

3.YM.70.CA using scintigraphy
 3.YM.70.CC using SPEC tomography (SPECT)
 3.YM.70.CE using PE tomography (PET)
 3.YM.70.CH using SPEC tomography (SPECT) with CT hybrid technique, single machine
 3.YM.70.CJ using PE tomography (PET) with CT hybrid technique, single machine

3.YM.94.^ ^ Imaging intervention NEC, breast**S** ¹

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 1	Optional	Intra-operative	Status	I	Intra-operative

Includes: Guidance, stereotactic (computer assisted), breast
Imaging assistance NEC, breast
Visualization, by operating microscope, breast

3.YM.94.ZA using microscope
 3.YM.94.ZB using computer (with or without stereotaxis)
 3.YM.94.ZC using stereotaxis (without computer guidance)

3.YN.^ ^.^ Diagnostic Imaging Interventions on the Surgically Removed Breast**Includes:** Surgical specimen

3.YN.10.^ ^ Xray, surgically removed breast**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: surgical specimen
that done to locate lesions prior to processing tissue for microscopic examination

Excludes: that on other surgically removed specimens (see [3.ZA.10.^ ^](#))

3.YN.10.VA without contrast

3.YN.12.^ ^ Fluoroscopy, surgically removed breast**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

Includes: surgical specimen
that done to locate lesions prior to processing tissue for microscopic examination

Excludes: that on other surgically removed specimens (see [3.ZA.12.^ ^](#))

3.YN.12.VA without contrast

3.YN.30.^.^ Ultrasound, surgically removed breast**L** ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 2	Optional	Bilaterality (optional)	Location	B	Bilateral
				L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

3.YN.30.DA alone
Includes: that done to locate lesions prior to processing tissue for microscopic examination
 Ultrasound, surgical specimen of breast

3.YZ.^.^.^ Diagnostic Imaging Interventions on the Skin NEC**3.YZ.94.^.^ Imaging intervention NEC, skin NEC**

Includes: Imaging assistance NEC, skin
 Visualization, by operating microscope, site NEC
 Visualization, by operating microscope, skin

3.YZ.94.ZA using microscope
 3.YZ.94.ZF using light source (infrared)
Includes: Optical coherence tomography

Diagnostic Imaging Interventions on the Body NEC (3ZA - 3ZZ)

3.ZA.^.^ Diagnostic Imaging Interventions on Surgical Specimen NEC

Excludes: Surgically removed breast (see [3.YN.^.^](#))

3.ZA.10.^.^ Xray, surgical specimen NEC

Excludes: that for surgically removed breast (see [3.YN.10.^.^](#))

3.ZA.10.VA without contrast

3.ZA.12.^.^ Fluoroscopy, surgical specimen NEC

Excludes: that for surgically removed breast (see [3.YN.12.^.^](#))

3.ZA.12.VA without contrast

3.ZZ.^.^ Diagnostic Imaging Interventions on the Total Body

Includes: Whole body NOS

3.ZZ.10.^.^ Xray, total body

Includes: Babygram
Single view of whole body mouth to anus (M2A)
that for detection of foreign body in child

Excludes: Mouth to anus (M2A) capsule endoscopy (see [3.OZ.94.^.^](#))
Skeletal survey (see [3.WZ.10.^.^](#))
that for visualization of entire skeletal system (see [3.WZ.10.^.^](#))

Note: For separate xrays taken of various anatomy sites, code to applicable anatomy sites.

3.ZZ.10.VA without contrast

3.ZZ.20.^ ^ Computerized tomography [CT], total body

Includes:	CAT scan, total body CT scan, chest, abdomen and pelvis together
Excludes:	that for bone density survey or study (see 3.WZ.20.^ ^) that for viewing of musculoskeletal system, total body (see 3.WZ.20.^ ^)
Note:	Select this rubric when computerized tomography [CT] of chest, abdomen and pelvis are visualized in a single image.
Omit code:	When CT scan is performed as part of a SPECT or PET diagnostic nuclear imaging study, hybrid/fusion technique, single machine. (See Diagnostic nuclear (imaging) (scan) study, by site)
3.ZZ.20.VA	without contrast
3.ZZ.20.WC	with contrast

3.ZZ.40.^ ^ Magnetic resonance imaging [MRI], total body

Includes:	Whole body MRI Whole body MRI angiography Whole body turbo short tau inversion recovery magnetic resonance imaging[turboSTIR MRI]
Excludes:	that for visualization of separate anatomy sites (see specific anatomy site)
Note:	This rubric may only be used when the entire body is visualized in one episode.
3.ZZ.40.VA	without contrast
3.ZZ.40.WC	with contrast

3.ZZ.70.^ ^ Diagnostic nuclear (imaging) study, total body

Includes:	Nuclear scan, total body
Excludes:	Bone scan NOS (see 3.WZ.70.^ ^) that of bone marrow (see 3.WY.70.^ ^) that of circulatory system (see 3.LZ.70.^ ^) that of lymphatic system (see 3.MZ.70.^ ^) that of skeletal system (see 3.WZ.70.^ ^)
3.ZZ.70.CA	using scintigraphy
3.ZZ.70.CC	using SPEC tomography (SPECT)
3.ZZ.70.CE	using PE tomography (PET)
3.ZZ.70.CH	using SPEC tomography (SPECT) with CT hybrid technique, single machine
3.ZZ.70.CJ	using PE tomography (PET) with CT hybrid technique, single machine

Section 5 - Obstetrical and Fetal Interventions

Excludes:

interventions which are not unique to the pregnant state or fetus, such as tubal ligation (see Section 1), non-obstetrical abdominal ultrasound (see Section 3), specimen collection for diagnostic purposes (see Section 2), etc.

Tabular List of Obstetrical and Fetal Interventions

Antepartum Interventions (5AB - 5CA)

5.AB.^.^ Antepartum Diagnostic Interventions

Includes: Diagnostic interventions from the initial confirmation of pregnancy until labour begins
Excludes: Diagnostic interventions which are not unique to the state of pregnancy (see Sections 2, 3)

5.AB.01.^.^ Antepartum care

M ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
M 2	Optional	Type of delivery 2	Location	D I	Direct delivery (health care provider is face to face with client)
				I N	Indirect (service delivered at a distance e.g. telephone, telemedicine with health care provider not physically present with client)

5.AB.01.AB	major antenatal visit(s)	Note: Often involves the following: Medical history, obstetrical history, social history (violence, counseling, life style), recording of weight and height, blood pressures, thyroid exam, breast exam, chest and cardiovascular findings, abdominal exam, procurement of PAP smear, bimanual examination for uterine size and adnexal findings and assessment of the extremities. The above listed investigations may require more than one visit to complete
5.AB.01.AC	subsequent antenatal visit(s)	Note: May Include: Blood pressure, fundal height, fetal heart rate, maternal weight, fetal activity

5.AB.02.^.^ Amniocentesis

Includes: Percutaneous trans abdominal puncture of uterus to obtain amniotic fluid
Excludes: Therapeutic amniocentesis (see [5.AC.73.^.](#))
Code Also: Any image assistance (see [5.AB.03.^.](#))

5.AB.02.HA	using percutaneous abdominal approach
------------	---------------------------------------

5.AB.03.^ ^ Obstetrical ultrasound examinations**L** 67 **E** 31

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 67	Optional	Trimester	Location	T1	1st trimester (< 14 weeks)
				T2	2nd trimester (14-26 weeks)
				T3	3rd trimester (> than 26 weeks)
				U	Unspecified
E 31	Optional	Antepartum 1	Extent	M	Multiple fetuses
				S	Single fetus

Includes: Diagnostic ultrasound of gravid uterus
Fetal and/or maternal assessment using ultrasound probe that for determining gestational age

Excludes: Fetal biophysical profile (see [5.AB.06.^ ^](#))
Ultrasound examinations which are not unique to the state of pregnancy (see Ultrasound, by site)

Note: Where more than one of the following examinations is performed [e.g. abdominal with trans-vaginal], code each separate examination

5.AB.03.CK	per orifice (trans vaginal) approach
5.AB.03.GS	major morphological assessment of fetus
	Includes: Assessment of fetal anomalies
5.AB.03.GV	trans perineal approach
5.AB.03.JA	trans abdominal approach
	Includes: Abdominal ultrasound of gravid uterus NOS
	Focused (targeted) assessment sonography [FAS] (for ectopic pregnancy)

5.AB.04.^ ^ Obstetrical doppler studies

5.AB.04.MJ	doppler study of fetal head
	Includes: that done on fetal cerebral artery
5.AB.04.MK	doppler study of fetal heart
	Includes: 2 D fetal echocardiography
	Doppler echocardiography, fetal
5.AB.04.ML	doppler study of uterine arteries/veins
5.AB.04.MM	doppler study of umbilical cord
	Includes: Doppler assessment of umbilical arteries/vein
5.AB.04.MU	doppler study of other fetal vessels

5.AB.05.^ ^ Other antepartum diagnostic imaging examination

Excludes: Diagnostic imaging examinations which are not unique to the state of pregnancy (see Section 3)
 Obstetrical Doppler studies (see [5.AB.04.^ ^](#))
 Obstetrical ultrasound examinations (see [5.AB.03.^ ^](#))

5.AB.05.GW	pelvimetry with placental localization
5.AB.05.GX	pelvimetry without placental localization
5.AB.05.GY	placentography
5.AB.05.GZ	other imaging techniques [e.g. MRI, CT, etc.]

Includes: that done for imaging of fetus

5.AB.06.^ ^ Fetal biometric qualitative evaluation

5.AB.06.AD	biophysical profile with non-stress test
5.AB.06.AE	biophysical profile without non stress test
5.AB.06.AF	fetal movement count
5.AB.06.AG	non stress test
5.AB.06.AH	contraction stress test
5.AB.06.AJ	amniotic fluid index [AFI]

Includes: Breast stimulation test [BST]
 Nipple stimulation test

5.AB.09.^ ^ Antepartum diagnostic interventions, biopsy**L** 67

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 67	Optional	Trimester	Location	T1	1st trimester (< 14 weeks)
				T2	2nd trimester (14-26 weeks)
				T3	3rd trimester (> than 26 weeks)
				U	Unspecified

Includes:	Biopsy, fetal structures Biopsy, placenta Sampling, percutaneous umbilical cord [PUBS]
5.AB.09.CK	chorionic villus sampling [CVS] using transcervical approach
5.AB.09.HA	chorionic villus sampling [CVS], using transabdominal approach
5.AB.09.LR	umbilical cord sampling (cordocentesis)
Excludes:	Cord blood taken following delivery (see 5.MD.11.^^)
5.AB.09.QM	fetal skin
5.AB.09.QP	fetal liver
5.AB.09.QU	fetal muscle
5.AB.09.QX	fetal tissue, site NEC

5.AB.70.^^ Inspection, fetal structures**L** 67

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
L 67	Optional	Trimester	Location	T1	1st trimester (< 14 weeks)
				T2	2nd trimester (14-26 weeks)
				T3	3rd trimester (> than 26 weeks)
				U	Unspecified

Includes: Embryoscopy
Fetoscopy (usually performed after 12 weeks gestation)
Percutaneous trans abdominal examination of umbilical cord, embryo or fetus.
Umbilioscopy

5.AB.70.DA using endoscopic approach

5.AC.^^.^^ Antepartum Therapeutic Interventions

Includes: Therapeutic interventions done from the initial confirmation of pregnancy until labour begins

Excludes: Interventions related to labour (see [5.LC.^^.^^](#) or [5.LD.^^.^^](#))
Interventions related to termination of pregnancy (see [5.CA.^^.^^](#))
Therapeutic interventions which are not unique to the state of pregnancy (see Sections 1, 6, or 7)

5.AC.20.^^ Antepartum (maternal and fetal) pharmacotherapy

Includes: Pharmacotherapy given to the mother but that which may have a direct effect on the fetus either for preventative or therapeutic outcomes.
Pharmacotherapy given to the mother for maternal conditions

Excludes: Administration of rh immunoglobulin (see [8.ZZ.70.^^](#))

5.AC.20.^ Antepartum (maternal and fetal) pharmacotherapy	combined approaches of administration	oral approach	percutaneous approach	route NEC [per orifice, transdermal, etc.]
antianemic preparation [e.g. iron, cyanocobalamin, folic acid, erythropoietin]	5.AC.20.AL-C3 Includes: • iron, cyanocobalamin, folic acid, erythropoietin	5.AC.20.CA-C3 Includes: • iron, cyanocobalamin, folic acid, erythropoietin	5.AC.20.HA-C3 Includes: • iron, cyanocobalamin, folic acid, erythropoietin	5.AC.20.YA-C3 Includes: • iron, cyanocobalamin, folic acid, erythropoietin
antinausea/antiemetic	5.AC.20.AL-A4 Includes: • ondansetron, scopolamine, dimenhydrinate	5.AC.20.CA-A4 Includes: • ondansetron, scopolamine, dimenhydrinate	5.AC.20.HA-A4 Includes: • ondansetron, scopolamine, dimenhydrinate	5.AC.20.YA-A4 Includes: • ondansetron, scopolamine, dimenhydrinate
antiviral agents	5.AC.20.AL-L4 Includes: • acyclovir, zidovudine, didanosine, zalcitabine, lamivudine, foscarnet	5.AC.20.CA-L4 Includes: • acyclovir, zidovudine, didanosine, zalcitabine, lamivudine, foscarnet	5.AC.20.HA-L4 Includes: • acyclovir, zidovudine, didanosine, zalcitabine, lamivudine, foscarnet	5.AC.20.YA-L4 Includes: • acyclovir, zidovudine, didanosine, zalcitabine, lamivudine, foscarnet
beta blocking agents	5.AC.20.AL-F1 Includes: • propranolol, metoprolol, atenolol	5.AC.20.CA-F1 Includes: • propranolol, metoprolol, atenolol	5.AC.20.HA-F1 Includes: • propranolol, metoprolol, atenolol	5.AC.20.YA-F1 Includes: • propranolol, metoprolol, atenolol
calcium channel blockers	5.AC.20.AL-F2 Includes: • nifedipine, verapamil, diltiazem	5.AC.20.CA-F2 Includes: • nifedipine, verapamil, diltiazem	5.AC.20.HA-F2 Includes: • nifedipine, verapamil, diltiazem	5.AC.20.YA-F2 Includes: • nifedipine, verapamil, diltiazem
cardiac antiarrhythmics	5.AC.20.AL-E2 Includes: • quinidine, procainamide, lidocaine, propafenone, amiodarone	5.AC.20.CA-E2 Includes: • quinidine, procainamide, lidocaine, propafenone, amiodarone	5.AC.20.HA-E2 Includes: • quinidine, procainamide, lidocaine, propafenone, amiodarone	5.AC.20.YA-E2 Includes: • quinidine, procainamide, lidocaine, propafenone, amiodarone
cardiac glycosides	5.AC.20.AL-E1 Includes: • digoxin	5.AC.20.CA-E1 Includes: • digoxin	5.AC.20.HA-E1 Includes: • digoxin	5.AC.20.YA-E1 Includes: • digoxin
corticosteroids	5.AC.20.AL-J2 Includes: • prednisone, dexamethasone, fludrocortisone	5.AC.20.CA-J2 Includes: • prednisone, dexamethasone, fludrocortisone	5.AC.20.HA-J2 Includes: • prednisone, dexamethasone, fludrocortisone	5.AC.20.YA-J2 Includes: • prednisone, dexamethasone, fludrocortisone
diabetes therapy	5.AC.20.AL-B1 Includes: • insulins, metformin, chlorpropamide, tolbutamide, glyburide, glipizide	5.AC.20.CA-B1 Includes: • insulins, metformin, chlorpropamide, tolbutamide, glyburide, glipizide	5.AC.20.HA-B1 Includes: • insulins, metformin, chlorpropamide, tolbutamide, glyburide, glipizide	5.AC.20.YA-B1 Includes: • insulins, metformin, chlorpropamide, tolbutamide, glyburide, glipizide
other pharmaceutical NEC	5.AC.20.AL-T9	5.AC.20.CA-T9	5.AC.20.HA-T9	5.AC.20.YA-T9
thyroid therapy	5.AC.20.AL-J3 Includes: • levothyroxine, potassium iodide, propylthiouracil	5.AC.20.CA-J3 Includes: • levothyroxine, potassium iodide, propylthiouracil	5.AC.20.HA-J3 Includes: • levothyroxine, potassium iodide, propylthiouracil	5.AC.20.YA-J3 Includes: • levothyroxine, potassium iodide, propylthiouracil
vitamin supplements	5.AC.20.AL-B2 Includes: • folic acid, Vitamin B12 [cyanocobalamin]	5.AC.20.CA-B2 Includes: • folic acid, Vitamin B12 [cyanocobalamin]	5.AC.20.HA-B2 Includes: • folic acid, Vitamin B12 [cyanocobalamin]	5.AC.20.YA-B2 Includes: • folic acid, Vitamin B12 [cyanocobalamin]

5.AC.24.^.^ Preparation by dilating cervix (for), labour

Includes:	Cervical ripening to prepare for induction Interventions to ripen the cervix where the intent is to deliver a live fetus or expel an already dead fetus (i.e. intrauterine death, missed abortion)
Excludes:	cervical dilation in non-pregnant state (see 1.RN.50.^.) that being performed for termination of pregnancy (see 5.CA.^.^)

5.AC.24.AN	using membrane stripping
	Includes: Membrane sweeping
5.AC.24.AZ	using nipple stimulation
5.AC.24.CA-Z9	using oral administration of non-pharmaceutical agent [e.g. herbal preparation, castor oil]
5.AC.24.CK-BD	using per orifice (ripening) by balloon catheter
5.AC.24.CK-W6	using per orifice insertion of laminaria

5.AC.25.^.^ Removal of device, cervix, antepartum

Excludes:	that done during labor (see 5.LD.25.^.)
------------------	--

5.AC.25.GN	removal of cerclage material (e.g. Shirodkar, McDonald's)
------------	---

5.AC.30.^.^ Induction of labour

Includes:	Interventions to induce labour where the intent is to deliver a live fetus or expel an already dead fetus (i.e. intrauterine death, missed abortion). that being performed prior to commencement of labour
Excludes:	after beginning of labor (see 5.LD.31.^.) that being performed for termination of pregnancy (see 5.CA.^.^)
Note:	Code all methods that apply.

5.AC.30.AP	using artificial rupture of membranes
	Includes: Amniotomy
5.AC.30.CA-I2	using oral administration of uterotonic agent
	Includes: Use of oral prostaglandin (e.g. misoprostol)
5.AC.30.CK-I2	using per orifice (intra cervical/vaginal) administration of uterotonic agent
	Includes: Use of intravaginal prostaglandin (e.g. cervidil, prostin gel)
5.AC.30.HA-I2	using percutaneous infusion of uterotonic agent
	Includes: Use of oxytocin, syntocinon
5.AC.30.YA-I2	using administration of uterotonic agent route NEC

5.AC.40.^ ^ Antepartum version

5.AC.40.JA	external cephalic version
	<i>Includes:</i> that done by turning the fetus in utero from a breech presentation or transverse lie to a cephalic presentation.

5.AC.46.^ ^ Replacement, amniotic sac

<i>Includes:</i>	Reduction of bulging or hourglass amniotic membranes
<i>Excludes:</i>	that with drainage of the amniotic sac (see 5.AC.73.^ ^)
<i>Omit code:</i>	when performed concomitantly with cervical cerclage (see 5.AC.80.^ ^)

5.AC.46.CK	using transcervical approach
------------	------------------------------

5.AC.72.^ ^ Instillation, amniotic sac

<i>Includes:</i>	Amnion infusion Infusion, normal saline to increase amniotic fluid volume
<i>Excludes:</i>	That done during active labour (see 5.LD.72.^ ^) That done to add contrast for ultrasound (see 5.AB.03.^ ^)

5.AC.72.CK	using transcervical approach
5.AC.72.HA	using percutaneous approach (e.g. intravenous)
5.AC.72.ZZ	using approach/technique NOS

5.AC.73.^ ^ Drainage, amniotic sac

<i>Includes:</i>	Amniocentesis, therapeutic Amnioreduction Drainage, amniotic sac (to decrease fluid volume) Extraction, amniotic fluid to decrease volume
<i>Excludes:</i>	that for selective fetal reduction (see 5.CA.90.^ ^)

5.AC.73.CK	using transcervical approach
5.AC.73.HA	using percutaneous approach
5.AC.73.ZZ	using approach/technique NOS

5.AC.80.^.^ Suturing of internal cervical os**S** 4

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 4	Optional	Abandoned	Status	A	Abandoned after onset

Includes: Shirodkar suture, McDonald's suture , cerclage of isthmus uteri

Excludes: Postpartum repair of cervix (see [5.PC.80.^.](#))

5.AC.80.CK using per orifice (intra vaginal) approach
 5.AC.80.LA using abdominal approach

5.AD.^.^ Antepartum Supportive Interventions

Includes: Counseling, education or support services provided to the pregnant woman and/or her family from the initial confirmation of pregnancy until labour begins

Excludes: Support interventions done during active labour (see [5.LD.15.^.](#))

5.AD.13.^.^ Antepartum education**M** 2 **E** 26

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
M 2	Optional	Type of delivery 2	Location	D I	Direct delivery (health care provider is face to face with client)
				I N	Indirect (service delivered at a distance e.g. telephone, telemedicine with health care provider not physically present with client)
E 26	Optional	Delivery size parameter 1	Extent	G R	Group of clients with one health care provider
				G S	Group of clients with multiple health care providers
				I M	Individual client with multiple health care providers
				I N	Individual client with one health care provider

Excludes: that with counseling (see [5.AD.14.^^](#))

5.AD.13.AX	psychophysiologic preparation
	Includes: Educating the patient about her body functions and the physiology of labour, discomforts associated with pregnancy
5.AD.13.AY	developing a birth plan
5.AD.13.BA	individual childbirth teaching
5.AD.13.BB	group childbirth teaching
5.AD.13.BC	birthing educational tour
5.AD.13.BD	diet teaching and assessment(nutrition)
5.AD.13.BE	classes for partners
5.AD.13.BF	classes for siblings
5.AD.13.BG	classes for the pregnant adolescent
5.AD.13.BH	exposure to infectious disease in pregnancy
5.AD.13.SM	(group) prenatal classes
	Note: May Include: components of all of the above
5.AD.13.ZZ	other education NEC

5.AD.14.^.^ Antepartum counseling**E** 26

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 26	Optional	Delivery size parameter 1	Extent	G R	Group of clients with one health care provider
				G S	Group of clients with multiple health care providers
				I M	Individual client with multiple health care providers
				I N	Individual client with one health care provider

5.AD.14.BJ	stress alleviation during pregnancy
5.AD.14.BK	lifestyle adjustment [e.g. smoking cessation, alcohol and drug use]
5.AD.14.BL	sexuality in pregnancy
5.AD.14.BM	exercise and physical fitness
5.AD.14.BN	developmental abnormalities
5.AD.14.BP	genetic counseling
5.AD.14.BQ	nutritional
	Includes: Antepartum diet counseling
	Note: May involve advising on maternal weight gain, vitamin supplements: iron, folic acid; food supplements: caloric intake, protein, and carbohydrates.
5.AD.14.BR	work during pregnancy
5.AD.14.BS	domestic violence and abuse in pregnancy
5.AD.14.BT	pre-existing conditions in pregnancy [e.g. epilepsy]
5.AD.14.BZ	physical comfort measures
5.AD.14.SL	grieving/bereavement
	Includes: Bereavement counseling for anticipated fetal loss or complication
5.AD.14.ZZ	other counseling NEC

5.CA.^.^ Termination of Pregnancy

Includes:	Interventions related to hydatidiform mole, blighted ovum Interventions where the intent is to terminate the pregnancy, where the fetus is alive at the initiation of the intervention, regardless of the outcome to the fetus (products of conception, stillbirth, livebirth).
Excludes:	Interventions for cervical ripening where the intent is to deliver a live fetus or expel an already dead fetus (i.e. an intrauterine death or missed abortion) (see 5.AC.24.^.^) Interventions to induce labour where the intent is to deliver a live fetus or expel an already dead fetus (i.e. an intrauterine death or missed abortion) (see 5.AC.30.^.^)

5.CA.20.^ Pharmacotherapy (in preparation for), termination of pregnancy

- Includes:** Injection, intracardiac or intrathoracic of an only fetus in utero
- Excludes:** Intracardiac or intrathoracic injection for selective fetal reduction (see [5.CA.90.^](#))
- Code Also:** Any (subsequent) medical induction for termination of pregnancy (see [5.CA.88.^](#))
- Note:** In some circumstances, when it is necessary to terminate the pregnancy later on in gestation, an intracardiac injection of KCL may be injected into the fetus prior to initiating the termination procedure. This code would be selected for those circumstances.

5.CA.20.FK using intracardiac/intrathoracic injection [e.g. KCL]

5.CA.24.^ Preparation by dilating cervix (for), termination of pregnancy

- Includes:** Cervical ripening for termination of pregnancy
Insertion of laminaria (tent) to terminate pregnancy
- Excludes:** Insertion of laminaria (for cervical dilation) in non-pregnant state (see [1.RN.50.^](#))
Insertion of laminaria for cervical ripening (see [5.AC.24.^](#))

5.CA.24.CK-BD per orifice approach and balloon catheter
5.CA.24.CK-W6 per orifice approach and laminaria

5.CA.88.^ Pharmacological termination of pregnancy

- Includes:** that for intra uterine or extra uterine [ectopic] pregnancy
- Excludes:** Misoprostol per orifice in a separate episode of care, for the purpose of cervical ripening prior to termination of pregnancy (see [5.CA.24.^](#))
Selective fetal reduction where the intent is to terminate selected fetuses to encourage the safe completion of gestation of the remaining fetus(es) (see [5.CA.90.^](#))
- Code Also:** any image assistance (e.g. obstetrical ultrasound) (see [5.AB.03.^](#))
any intracardiac/intrathoracic injection of KCL into the fetus prior to termination procedure (see [5.CA.20.^](#))
- Note:** Code as many pharmaceutical agents as apply.

5.CA.88.^ Pharmacological termination of pregnancy	combined types of approaches	endoscopic [assisted] approach	oral approach	per orifice [vaginal] approach	percutaneous approach [e.g. intravenous, injection into intraamniotic or extraamniotic sac]
antimetabolite	5.CA.88.AL-M2 Includes: • methotrexate, cytarabine, fluorouracil, cladribine	5.CA.88.DA-M2 Includes: • methotrexate, cytarabine, fluorouracil, cladribine	5.CA.88.CA-M2 Includes: • methotrexate, cytarabine, fluorouracil, cladribine	—	5.CA.88.HA-M2 Includes: • methotrexate, cytarabine, fluorouracil, cladribine
emollient	5.CA.88.AL-G2 Includes: • urea	5.CA.88.DA-G2 Includes: • urea	—	—	5.CA.88.HA-G2 Includes: • urea
other abortifacient NEC	5.CA.88.AL-Z9	5.CA.88.DA-Z9	5.CA.88.CA-Z9	5.CA.88.CK-Z9	5.CA.88.HA-Z9
uterotonic agent	5.CA.88.AL-I2 Includes: • prostaglandin, ergometrine, dinoprostone, misoprostol	—	5.CA.88.CA-I2 Includes: • prostaglandin, ergometrine, dinoprostone, misoprostol	5.CA.88.CK-I2 Includes: • prostaglandin, ergometrine, dinoprostone, misoprostol	5.CA.88.HA-I2 Includes: • prostaglandin, ergometrine, dinoprostone, misoprostol
salt solution	5.CA.88.AL-D2 Includes: • saline	5.CA.88.DA-D2 Includes: • saline	—	—	5.CA.88.HA-D2 Includes: • saline
sex hormone and regulator	—	—	5.CA.88.CA-I5 Includes: • abortion pill NEC, RU486, mifepristone	—	—

5.CA.89.^ Surgical termination of pregnancy

S 16

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 16	Optional	Tx Status 10	Status	A	Abandoned after onset
				C	Converted (from endoscopic to open approach)

Includes: that done to remove hydatidiform mole or blighted ovum

- Excludes:**
- Aspiration curettage following delivery (see [5.PC.91.^^](#))
 - Aspiration curettage following spontaneous or missed abortion (see [5.PC.91.^^](#))
 - Aspiration curettage for non-obstetrical condition (see [1.RM.87.^^](#))
 - Dilation and curettage (D&C) following delivery (see [5.PC.91.^^](#))
 - Dilation and curettage (D&C) following spontaneous or missed abortion (see [5.PC.91.^^](#))
 - Dilation and curettage (D&C) for non-obstetrical condition (see [1.RM.87.^^](#))
 - Menstrual extraction or regulation without a positive HCG test (see [1.RM.57.^^](#))
 - Selective fetal reduction where the intent is to terminate selected fetuses to encourage the safe completion of gestation of the remaining fetus(es). (see [5.CA.90.^^](#))
 - Surgical removal of extrauterine pregnancy (see [5.CA.93.^^](#))
- Note:**
- An aspiration [suction] curettage is generally done for first trimester terminations, while a dilation curettage (evacuation) may be indicated for second trimester terminations.

5.CA.89.^^ Surgical termination of pregnancy	endoscopic approach	open approach	vaginal approach
aspiration and curettage	—	—	5.CA.89.GC Includes: • Therapeutic abortion NOS
dilation and curettage [D & C]	—	—	5.CA.89.GA
dilation and evacuation [D & E]	—	—	5.CA.89.GD
hysterectomy	5.CA.89.GB	5.CA.89.WJ	5.CA.89.CK
hysterotomy	5.CA.89.DA	5.CA.89.WK	—
menstrual extraction or regulation [minisuction curettage] [that done with syringe] [HCG positive]	—	—	5.CA.89.FB Includes: • Manual Vacuum Aspiration (MVA)

5.CA.90.^^ Selective fetal reduction

E 19

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 19	Mandatory	Mandatory # Fetus	Extent	1	One fetus
				2	Two fetuses
				3	Three fetuses
				4	Four fetuses
				5	Five fetuses
				6	6 or more fetuses

Excludes:		Aspiration for amniotic fluid reduction (see 5.AC.73.^) Termination of all fetuses, pharmacological (see 5.CA.88.^) Termination of all fetuses, surgical (see 5.CA.89.^)
5.CA.90.FJ	using cardiac puncture	
5.CA.90.FK	using intracardiac/intrathoracic injections	
	Excludes:	intracardiac/intrathoracic injection of an only fetus in utero (see 5.CA.20.^)
5.CA.90.FL	using sac aspiration	
5.CA.90.FM	using vascular occlusion	
	Includes:	Ligation, umbilical cord (e.g. that for acardiac twin)

5.CA.93.^ Surgical removal of extrauterine pregnancy**S** 16 **L** 12

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 16	Optional	Tx Status 10	Status	A	Abandoned after onset
				C	Converted (from endoscopic to open approach)
L 12	Optional	Right/Left	Location	L	Left
				R	Right
				S	Unilateral (unspecified if right or left)

- Includes:** Removal, ectopic (intrafallopian) pregnancy
- Excludes:** Surgical termination of intrauterine pregnancy (see [5.CA.89.^](#))
- Code Also:** Any concomitant oophorectomy (see [1.RB.89.^](#))
any image assistance (e.g. microscope) (see [3.RZ.94.^](#))
any subsequent hysterectomy (see [1.RM.89.^](#))
- Note:** A salpingostomy is usually performed for an unruptured tubal pregnancy that is less than 2 cm. in length. The incision in the tube is not sutured closed, but rather is left to heal on its own. A salpingotomy is usually performed for an unruptured tubal pregnancy that is larger than 2 cm. in length. An incision is made in the tube directly over the ectopic pregnancy and the pregnancy is then gently removed. This incision is closed.

5.CA.93.^ Surgical removal of extrauterine pregnancy	endoscopic approach	open approach
total salpingectomy	5.CA.93.GB	5.CA.93.WJ
partial salpingectomy	5.CA.93.EK Includes: <ul style="list-style-type: none"> Segmental resection and anastomosis That with tubotuboplasty 	5.CA.93.EJ Includes: <ul style="list-style-type: none"> Segmental resection and anastomosis That with tubotuboplasty
laser partial salpingectomy	5.CA.93.EK-AG	—
salpingostomy	5.CA.93.ED	5.CA.93.EC
laser salpingostomy	5.CA.93.ED-AG	—
salpingotomy	5.CA.93.TC	5.CA.93.WK
laser salpingotomy	5.CA.93.TC-AG	—
with manual technique (fimbrial expression [e.g. milking])	5.CA.93.EF	5.CA.93.UW
removal of extrauterine pregnancy of other site [e.g. intraperitoneal, intraligamentous, site NEC]	5.CA.93.EQ	5.CA.93.EM

Interventions on the Fetus (5FD - 5FT)

5.FD.^^.^^ Preventative and Therapeutic Interventions on the Fetus

Includes: Antepartum interventions done directly to the fetus for preventative or therapeutic purposes

5.FD.72.^^ In utero transfusion

Includes: Intrauterine fetal transfusion
that done by intra abdominal or intravascular approach
Transplantation, in utero hematopoietic stem cells

5.FD.72.^^ In utero transfusion	using intraabdominal approach [percutaneous]	using intravascular approach [transluminal] through umbilical cord
using stem cells	5.FD.72.HA-U7	5.FD.72.GP-U7
using whole blood	5.FD.72.HA-U9	5.FD.72.GP-U9
using platelets	5.FD.72.HA-U4	5.FD.72.GP-U4
using red cell concentrate	5.FD.72.HA-U1	5.FD.72.GP-U1

5.FG.^^.^^ Surgical Interventions on the Fetal Digestive System

5.FG.94.^^ Surgical intervention NEC, fetal digestive system NEC

5.FG.94.ZZ using approach/technique NEC

5.FH.^^.^^ Surgical Interventions on the Fetal Circulatory System

5.FH.76.^^ Laser placenta therapy

Includes: Occlusion, blood flow from one twin to the other (e.g. twin to twin transfusion syndrome)
Photocoagulation (laser), communicating vessels

5.FH.76.DA	using endoscopic approach [fetoscopy]
5.FH.76.HA	using percutaneous approach

5.FH.94.^^ Surgical intervention NEC, fetal circulatory system NEC

5.FH.94.ZZ using approach/technique NEC

5.FJ.^^.^^ Surgical Interventions on the Fetal Respiratory System**5.FJ.73.^^ Drainage, fetal thorax**

Includes: Aspiration, fetal thorax
Thoracocentesis, fetal,(transabdominal)

5.FJ.73.ZZ using approach/technique NEC

5.FJ.94.^^ Surgical intervention NEC, fetal respiratory system NEC

5.FJ.94.ZZ using approach/technique NEC

5.FL.^^.^^ Surgical Interventions on the Fetal Nervous System**5.FL.73.^^ Drainage, fetal brain**

Includes: Aspiration, fetal brain (e.g. that for hydrocephalus prior to labour)
Needling

Excludes: that done to facilitate delivery (see [5.MD.45.^^](#))

5.FL.73.ZZ using approach/technique NEC

5.FL.94.^^ Surgical intervention NEC, fetal nervous system NEC

5.FL.94.ZZ using approach/technique NEC

5.FM.^^.^^ Surgical Interventions on the Fetal Urinary System**5.FM.73.^^ Drainage, fetal kidney**

Includes: Drainage, hydronephrosis prior to labour [antepartum]
Needling, fetal abdomen

Excludes: that done to facilitate delivery (see [5.MD.45.^^](#))

5.FM.73.ZZ using approach/technique NEC

5.FM.74.^.^ Insertion of device, fetal bladder

5.FM.74.QS	of vesico amniotic catheter shunt (ante partum)
------------	---

5.FM.94.^.^ Surgical intervention NEC, fetal urinary system NEC

5.FM.94.ZZ	using approach/technique NEC
------------	------------------------------

5.FT.^.^.^ Interventions on the Fetal Genetics**5.FT.78.^.^ Gene therapy**

Includes: gene transfer to the fetus
that done by bone marrow transplant

5.FT.78.ZZ	using approach/technique NOS
------------	------------------------------

Interventions During Labour and Delivery (5LB - 5MD)

5.LB.^.^ Assessment of Labour

5.LB.08.^.^ Assessment, labour

Includes: Initial triage or assessing establishment of labour

5.LB.08.ZZ labour NOS

5.LC.^.^ Interventions during Latent Labour

Includes: Interventions done when the patient does not go on to active labour and/or delivery in this episode of care. During this period, despite regular uterine contractions, little recognizable change may take place in the cervix. If labour is not specified as "latent" code to "active" labour.

Excludes: Interventions done during active labour (see [5.LD.^.^](#))

5.LC.06.^.^ Evaluation of uterine activity during latent labour

Includes: Quantification, uterine activity

5.LC.06.AK using external tocodynamometer

5.LC.06.AM using manual palpation and observation

5.LC.07.^.^ Fetal heart monitoring during latent labour

E 31

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 31	Optional	Antepartum 1	Extent	M	Multiple fetuses
				S	Single fetus

Includes: use of a fetoscope, where appropriate

5.LC.07.JA-FR using intermittent auscultation

5.LC.07.JA-FT using intermittent electronic monitoring

5.LC.07.JA-FW using continuous electronic monitoring

5.LC.08.^.^ Maternal monitoring during latent labour*Includes:* Monitoring vital signs, reflexes

5.LC.08.ZZ monitoring NOS

5.LC.15.^.^ Support during latent labour

5.LC.15.HA-X9 using injection of sterile water
 5.LC.15.HB using patterned breathing
 5.LC.15.HC using other relaxation techniques
Includes: Aromatherapy
 5.LC.15.HD using counter pressure
 5.LC.15.HE using hot/cold packs
 5.LC.15.HF using music therapy
 5.LC.15.HG using birthing ball
 5.LC.15.HH using hydrotherapy
Includes: Use of tub baths
 5.LC.15.HK using therapeutic touch
 5.LC.15.HL using coaching
Includes: Presence of a doula
 5.LC.15.HM using massage
 5.LC.15.HS using visualization
 5.LC.15.MN using transcutaneous electrical nerve stimulation [TENS]
 5.LC.15.MP using hypnosis
 5.LC.15.MQ using acupuncture
 5.LC.15.MR using pressure points

5.LC.20.^.^ Intrapartum pharmacotherapy during latent labour

5.LC.20.^.^ Intrapartum pharmacotherapy during latent labour	combined routes of administration [e.g. oral followed by intravenous]	oral approach	percutaneous approach [e.g. intramuscular, intravenous, subcutaneous, intradermal]	route NEC [e.g. per orifice, transdermal]
antiinfective agent	5.LC.20.AL-K0	5.LC.20.CA-K0	5.LC.20.HA-K0	5.LC.20.YA-K0
pharmaceutical agent NEC	5.LC.20.AL-T9	5.LC.20.CA-T9	5.LC.20.HA-T9	5.LC.20.YA-T9

5.LC.32.^.^ Suppression, latent labour

5.LC.32.^.^ Suppression, latent labour	combined routes of administration [e.g. oral followed by intravenous]	oral approach	percutaneous approach [e.g. intramuscular, intravenous, subcutaneous, intradermal]	route NEC [e.g. per orifice, transdermal]
using antihypertensives	5.LC.32.AL-E6 Includes: • methyldopa, prazosin, hydralazine, reserpine, nitroprusside	5.LC.32.CA-E6 Includes: • methyldopa, prazosin, hydralazine, reserpine, nitroprusside	5.LC.32.HA-E6 Includes: • methyldopa, prazosin, hydralazine, reserpine, nitroprusside	5.LC.32.YA-E6 Includes: • methyldopa, prazosin, hydralazine, reserpine, nitroprusside
using labour suppressants	5.LC.32.AL-I4 Includes: • Ritodrine, bromocriptine	5.LC.32.CA-I4 Includes: • Ritodrine, bromocriptine	5.LC.32.HA-I4 Includes: • Ritodrine, bromocriptine	5.LC.32.YA-I4 Includes: • Ritodrine, bromocriptine
using analgesics	5.LC.32.AL-P2 Includes: • opioids (morphine, meperidine), acetylsalicylic acid, acetaminophen, ergotamine, sumatriptan	5.LC.32.CA-P2 Includes: • opioids (morphine, meperidine), acetylsalicylic acid, acetaminophen, ergotamine, sumatriptan	5.LC.32.HA-P2 Includes: • opioids (morphine, meperidine), acetylsalicylic acid, acetaminophen, ergotamine, sumatriptan	5.LC.32.YA-P2 Includes: • opioids (morphine, meperidine), acetylsalicylic acid, acetaminophen, ergotamine, sumatriptan
using anticonvulsants	5.LC.32.AL-P3 Includes: • magnesium sulphate, phenobarbital, phenytoin, clobazam, valproic acid, lamotrigine, gabapentin	5.LC.32.CA-P3 Includes: • magnesium sulphate, phenobarbital, phenytoin, clobazam, valproic acid, lamotrigine, gabapentin	5.LC.32.HA-P3 Includes: • magnesium sulphate, phenobarbital, phenytoin, clobazam, valproic acid, lamotrigine, gabapentin	5.LC.32.YA-P3 Includes: • magnesium sulphate, phenobarbital, phenytoin, clobazam, valproic acid, lamotrigine, gabapentin
pharmaceutical agent NEC [e.g. prostaglandin inhibitors]	5.LC.32.AL-T9	5.LC.32.CA-T9	5.LC.32.HA-T9	5.LC.32.YA-T9

5.LD.^.^.^ Interventions during Active Labour

- Includes:** Interventions done after the patient is determined to be in active labour [e.g. contractions are occurring regularly, the cervix is dilated at least 3 cm. and dilation is progressing]
Labour NOS
- Excludes:** those cases where intervention is specifically stated as during "latent" labour (see [5.LC.^.^.^](#)).

5.LD.06.^ ^ Evaluation during active labour

- Includes:** Evaluation, fetal well being
Evaluation, uterine activity
Quantification, uterine activity during active labour
- Excludes:** Antepartum umbilical cord sampling (see [5.AB.09.^ ^](#))
Cord blood sampling taken immediately following delivery (see [5.MD.11.^ ^](#))
Evaluation of uterine activity during latent labour (see [5.LC.06.^ ^](#))
Fetal scalp electrode for fetal heart monitoring (see [5.LD.07.^ ^](#))

5.LD.06.AK	using external tocodynamometer
5.LD.06.AM	using manual palpation and observation
5.LD.06.QH	using fetal scalp blood sampling
5.LD.06.QJ	using fetal blood sampling from other sites [e.g. intrahepatic, intracardiac]
5.LD.06.QK	using fetal pulse oximetry
5.LD.06.TB	using intrauterine pressure catheter

5.LD.07.^ ^ Fetal heart monitoring during active labour**E** 31

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 31	Optional	Antepartum 1	Extent	M	Multiple fetuses
				S	Single fetus

- Includes:** use of a fetoscope, where appropriate
- Excludes:** that during latent labour (see [5.LC.07.^ ^](#))

5.LD.07.JA-FR	using intermittent auscultation
5.LD.07.JA-FT	using intermittent electronic monitoring
5.LD.07.JA-FW	using continuous electronic monitoring
5.LD.07.JA-FX	using fetal scalp electrode

5.LD.08.^ ^ Maternal monitoring during active labour

- Includes:** Monitoring vital signs, reflexes

5.LD.08.ZZ	monitoring NOS
------------	----------------

5.LD.15.^ ^ Support during active labour

5.LD.15.HA-X9	using injection of sterile water
5.LD.15.HB	using patterned breathing
5.LD.15.HC	using other relaxation techniques
	<i>Includes:</i> Aromatherapy
5.LD.15.HD	using counter pressure
5.LD.15.HE	using hot/cold packs
5.LD.15.HF	using music therapy
5.LD.15.HG	using birthing ball
5.LD.15.HH	using hydrotherapy
	<i>Includes:</i> Use of tub baths
5.LD.15.HK	using therapeutic touch
5.LD.15.HL	using coaching
	<i>Includes:</i> presence of a doula
5.LD.15.HM	using massage
5.LD.15.HS	using visualization
5.LD.15.MN	using transcutaneous electrical nerve stimulation [TENS]
5.LD.15.MP	using hypnosis
5.LD.15.MQ	using acupuncture
5.LD.15.MR	using pressure points

5.LD.16.^ ^ Maternal positions for labour

5.LD.16.HH	in tub/shower
5.LD.16.KY	in bed
5.LD.16.KZ	ambulatory
5.LD.16.LG	multiple position/location changes

5.LD.20.^ ^ Intrapartum pharmacotherapy during active labour

<i>Includes:</i>	Administration of drugs (to treat or prevent disease) during active labour
	Epidural anesthetic for pain control during labour
	that for nerve blocks

5.LD.20.^ Intrapartum pharmacotherapy during active labour	combined routes of administration [e.g. oral followed by intravenous]	oral approach	percutaneous approach [e.g. intramuscular, intravenous, subcutaneous, intradermal]	route NEC [e.g. per orifice, transdermal]
using antiinfective agents	5.LD.20.AL-K0	5.LD.20.CA-K0	5.LD.20.HA-K0	5.LD.20.YA-K0

using anticonvulsants	5.LD.32.AL-P3 Includes: • magnesium sulphate, phenobarbital, phenytoin, clobazam, valproic acid, lamotrigine, gabapentin	5.LD.32.CA-P3 Includes: • magnesium sulphate, phenobarbital, phenytoin, clobazam, valproic acid, lamotrigine, gabapentin	5.LD.32.HA-P3 Includes: • magnesium sulphate, phenobarbital, phenytoin, clobazam, valproic acid, lamotrigine, gabapentin	5.LD.32.YA-P3 Includes: • magnesium sulphate, phenobarbital, phenytoin, clobazam, valproic acid, lamotrigine, gabapentin
pharmaceutical agent NEC [e.g. prostaglandin inhibitors]	5.LD.32.AL-T9	5.LD.32.CA-T9	5.LD.32.HA-T9	5.LD.32.YA-T9

5.LD.40.^.^ Version during labour

Excludes: that done at time of delivery (see [5.MD.40.^.^](#))

5.LD.40.JA	by external cephalic version
	Includes: Turning the fetus from a breech presentation or transverse lie to a cephalic presentation

5.LD.72.^.^ Transfusion/instillation, into amniotic sac during active labour

Includes: Amnion infusion during labour
That done for prevention of umbilical cord compression

Excludes: That done prior to commencement of labour (see [5.AC.72.^.^](#))
That done to provide contrast for ultrasound (see [5.AB.03.^.^](#))

5.LD.72.CK	using transcervical approach
5.LD.72.HA	using percutaneous approach (e.g. intravenous)
5.LD.72.ZZ	using approach/technique NOS

5.MD.^.^.^ Delivery [Birthing] Interventions

Includes: Interventions occurring during the second stage of labour which is from full dilatation of the cervix until delivery of the fetus
Interventions pertaining to delivery of the fetus

Excludes: Interventions where the intent is to terminate the pregnancy, where the fetus is alive at the initiation of the intervention, regardless of the outcome to the fetus (products of conception, stillbirth, livebirth (see [5.CA.^.^.^](#)))

5.MD.11.^.^ Cord blood sampling

Includes: that taken from cord immediately following delivery

Excludes: Antepartum cordocentesis (see [5.AB.09.^.^](#))
Scalp blood sampling (see [5.LD.06.^.^](#))

5.MD.11.TA	procurement of cord blood
	Includes: sampling from cord or placenta for procurement or harvesting of stem cells
5.MD.11.ZZ	using approach/technique NOS
	Includes: that for assessment of fetal well being

5.MD.16.^ ^ Maternal positions for delivery (assistance)

5.MD.16.LB	lateral position [Sims position]
5.MD.16.LC	delivery on all fours (limbs)
5.MD.16.LD	lithotomy
5.MD.16.LE	squatting (with use of squatting bar)
5.MD.16.LF	modified squatting
	Note: Patient lying on bed or chair with back support, but holding legs up into squatting position
5.MD.16.LJ	standing
5.MD.16.LK	sitting
5.MD.16.LL	hyperflexion of hips [e.g. McRoberts maneuver for shoulder dystocia]
	Includes: that with or without suprapubic pressure

5.MD.40.^ ^ Version and/or rotation at time of delivery

Excludes:	Version or rotation done prior to commencement of labour (see 5.AC.40.^ ^)
Code Also:	Type of delivery (e.g. manually assisted delivery 5.MD.50.^ ^ , forceps delivery 5.MD.53.^ ^ , vacuum delivery 5.MD.54.^ ^ , combined forceps and vacuum 5.MD.55.^ ^ , breech delivery 5.MD.56.^ ^ or Cesarean section 5.MD.60.^ ^)

5.MD.40.JA	by external cephalic version
	Includes: that for delivery of second twin
5.MD.40.JB	by internal podalic version
	Includes: turning the fetus in utero, with the hand or fingers inside the uterus, to a breech presentation
5.MD.40.JC	by manual rotation of fetal head (e.g. Pomeroy maneuver)
	Excludes: Pomeroy technique of tubal ligation (see 1.RF.51.^ ^)
5.MD.40.LH	corkscrew maneuver (e.g. Rubin maneuver, Wood's maneuver)
	Includes: Internal rotation of shoulder (i.e. for shoulder dystocia)

5.MD.45.^ ^ Other interventions to fetus to facilitate delivery

5.MD.45.QA	destruction of (dead) fetus
5.MD.45.QB	fracture of humerus
5.MD.45.QC	fracture of clavicle
5.MD.45.QD	clavicotomy [cleidotomy]
5.MD.45.QE	needling of hydrocephalic head
	Excludes: that done in the antepartum period (see 5.FL.73.^ ^)
5.MD.45.QF	needling [decompression] of fetal abdomen
	Excludes: that done in the antepartum period (see 5.FM.73.^ ^)
5.MD.45.QG	other methods used to decompress (dead) fetus

5.MD.46.^ Replacement at time of delivery

5.MD.46.LP	cephalic replacement <i>Includes:</i> Zavanelli maneuver
5.MD.46.MM	prolapsed umbilical cord <i>Includes:</i> Replacement, (manual) of umbilical cord that done by putting mother in knee chest position
5.MD.46.MV	other (presenting) fetal parts [e.g. hand, arm, foot, leg]

5.MD.47.^ Surgical incisions (to facilitate delivery)

<i>Includes:</i>	Hysteromatotomy (to facilitate delivery) Pubiotomy (to facilitate delivery)
<i>Excludes:</i>	Episiotomy (see 5.MD.50.^ , 5.MD.53.^ , 5.MD.54.^)
<i>Code Also:</i>	Type of delivery (see 5.MD.53.^ or 5.MD.54.^ or 5.MD.55.^ or 5.MD.56.^)

5.MD.47.GJ	incision of cervix <i>Includes:</i> Hysteromatotomy Radial incisions [e.g. Dührssen incision]
5.MD.47.GK	symphysiotomy <i>Includes:</i> Pubiotomy
5.MD.47.GL	episioproctotomy <i>Includes:</i> that with subsequent repair
5.MD.47.GU	incision of vagina

5.MD.50.^ Manually assisted vaginal delivery (vertex)

<i>Includes:</i>	Crede maneuver that with easy cord disentanglement (e.g. slipping cord over head of the fetus) that with or without perineal massage those classed as normal spontaneous vertex delivery, requiring minimal assistance from obstetrical personnel (e.g. Ritgen maneuver)
<i>Excludes:</i>	Breech delivery (see 5.MD.56.^) that with forceps (see 5.MD.53.^) that with forceps and vacuum (see 5.MD.55.^) that with vacuum (see 5.MD.54.^) Water birth (see 5.MD.52.^)
<i>Code Also:</i>	Any interventions performed to fetus to facilitate delivery (see 5.MD.40.^ or 5.MD.45.^)

5.MD.50.AA	without episiotomy
5.MD.50.GH	with episiotomy <i>Includes:</i> Mediolateral episiotomy Midline episiotomy

5.MD.51.^ ^ Unassisted spontaneous vaginal delivery

Includes: Autonomous delivery where health professionals do not intervene or assist during the delivery (e.g. unattended delivery)

Excludes: Water birth (see [5.MD.52.^ ^](#))

5.MD.51.ZZ using approach/technique NOS

5.MD.52.^ ^ Water birth

Includes: Delivery in bathtub

Excludes: Tub bath used for labour support (see [5.LD.15.^ ^](#))

5.MD.52.KV delivery under water

Includes: those done in tubs where baby is born partially or completely submersed under water

5.MD.53.^ ^ Forceps traction and rotation delivery

Excludes: Failed forceps delivery proceeding to Cesarean delivery (see [5.MD.60.^ ^](#))
those deliveries that require a combination of forceps and vacuum traction (see [5.MD.55.^ ^](#))

Code Also: Any surgical incision other than episiotomy done to facilitate delivery (see [5.MD.47.^ ^](#)). When coding the surgical incision it should be the principal procedure and then choose from this table to show forceps without episiotomy.

Note: Forceps definitions found in the notes at the code level are as defined in the guidelines published by the Society of Obstetricians and Gynecologists of Canada.

5.MD.53.^.^ Forceps traction and rotation delivery	with episiotomy (including midline or mediolateral)	without episiotomy
double application of forceps [e.g. Scanzoni maneuver]	5.MD.53.KS	5.MD.53.KP
forceps rotation only with manually assisted delivery (e.g. DeLee key-in-lock maneuver)	5.MD.53.JE	5.MD.53.JD
low forceps (e.g. Pajot maneuver)	5.MD.53.KL Includes: <ul style="list-style-type: none"> Forceps delivery NOS with episiotomy Note: <ul style="list-style-type: none"> Low forceps are defined as those cases where the leading point of the skull is at station lesser than or equal to plus 2 cm, and not on pelvic floor two subdivisions: rotation of 45 degrees or less or rotation more than 45 degrees 	5.MD.53.KK Includes: <ul style="list-style-type: none"> Forceps delivery NOS Note: <ul style="list-style-type: none"> Low forceps are defined as those cases where the leading point of the skull is at station lesser than or equal to plus 2 cm, and not on pelvic floor two subdivisions: rotation of 45 degrees or less or rotation more than 45 degrees
mid forceps	5.MD.53.KN Note: <ul style="list-style-type: none"> Mid forceps are defined as those cases where the head is engaged and the leading point of skull is above station plus 2 cm. 	5.MD.53.KM Note: <ul style="list-style-type: none"> Mid forceps are defined as those cases where the head is engaged and the leading point of skull is above station plus 2 cm.
outlet forceps	5.MD.53.KJ Note: <ul style="list-style-type: none"> Outlet forceps are defined as those cases where: (1) the fetal scalp is visible at the introitus without separating the labia; (2) the fetal scalp has reached the pelvic floor; (3) the sagittal suture is in: anteroposterior diameter, right/left occiput anterior or posterior position (4) the fetal head is at or on the perineum. 	5.MD.53.KH Note: <ul style="list-style-type: none"> Outlet forceps are defined as those cases where: (1) the fetal scalp is visible at the introitus without separating the labia; (2) the fetal scalp has reached the pelvic floor; (3) the sagittal suture is in: anteroposterior diameter, right/left occiput anterior or posterior position (4) the fetal head is at or on the perineum.

5.MD.54.^.^ Vacuum traction delivery

Excludes: failed vacuum traction proceeding to Cesarean delivery (see [5.MD.60.^.^](#))
 those deliveries that require a combination of forceps and vacuum traction (see [5.MD.55.^.^](#))

Code Also: Any surgical incision other than episiotomy done to facilitate delivery (see [5.MD.47.^.^](#)). When coding the surgical incision it should be the principal procedure and then choose from this table to show vacuum without episiotomy.

5.MD.54.^ ^ Vacuum traction delivery	with episiotomy (e.g. midline, mediolateral)	without episiotomy
outlet vacuum traction	5.MD.54.KJ Note: <ul style="list-style-type: none"> • Outlet vacuum is defined as those cases where: • the fetal scalp is visible at the introitus without separating the labia; • the fetal scalp has reached the pelvic floor; • the sagittal suture is in: anteroposterior diameter • right/left occiput anterior or posterior position • the fetal head is at or on the perineum 	5.MD.54.KH Note: <ul style="list-style-type: none"> • Outlet vacuum is defined as those cases where: • the fetal scalp is visible at the introitus without separating the labia; • the fetal scalp has reached the pelvic floor; • the sagittal suture is in: anteroposterior diameter • right/left occiput anterior or posterior position • the fetal head is at or on the perineum
low vacuum traction	5.MD.54.KL Note: <ul style="list-style-type: none"> • Low vacuum is defined as those cases where: • the leading point of the skull is at station lesser than or equal to plus 2 cm, and not on pelvic floor • two subdivisions: rotation of 45 degrees or less or rotation more than 45 degrees 	5.MD.54.KK Note: <ul style="list-style-type: none"> • Low vacuum is defined as those cases where the leading point of the skull is at station less than or equal to plus 2 cm, and not on pelvic floor or, two subdivisions: rotation of 45 degrees or less or rotation more than 45 degrees.
mid vacuum traction	5.MD.54.KN Note: <ul style="list-style-type: none"> • Mid vacuum is defined as those cases where: • the head is engaged; and • the leading point of skull is above station plus 2 cm 	5.MD.54.KM Note: <ul style="list-style-type: none"> • Mid vacuum is defined as those cases where the head is engaged and the leading point of skull is above station plus 2 cm.
vacuum traction NOS	5.MD.54.NF	5.MD.54.NE

5.MD.55.^ ^ Combination of vacuum and forceps delivery

Includes: Attempted (failed) trial of vacuum followed by application of forceps

Excludes: "failed" trial of vacuum/forceps proceeding to Cesarean section (see [5.MD.60.^ ^](#))

5.MD.55.^ ^ Combination of vacuum and forceps delivery	with episiotomy	without episiotomy
mid vacuum/forceps	5.MD.55.KN	5.MD.55.KM
low vacuum/forceps	5.MD.55.KL	5.MD.55.KK
outlet vacuum/forceps	5.MD.55.KJ	5.MD.55.KH
vacuum with forceps NOS	5.MD.55.KR	5.MD.55.KQ

5.MD.56.^ ^ Breech delivery

Includes: those done with suprapubic pressure [Kristellar maneuver]

Code Also: Any concomitant surgical intervention done to mother to facilitate delivery (see [5.MD.47.^ ^](#))

Note: Breech delivery definitions found in the notes at the code level are as defined in Oxorn-Foote, Human Labor and Birth, 1986.

5.MD.56.^ ^ Breech delivery	with spontaneous delivery of head	with assisted delivery of aftercoming head	with forceps to aftercoming head [e.g. Piper]
without episiotomy			
spontaneous breech delivery	5.MD.56.AA Note: <ul style="list-style-type: none"> Spontaneous breech delivery refers to the case where the entire infant is expelled by the natural forces of the mother, with no assistance other than support of the baby as it is being born. 	—	—

5.MD.60.^ ^ Cesarean section delivery**S** 64 **E** 50

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 64	Mandatory	Mandatory Cesarean Section Status 2	Status	P A	Primary, Indicated, Planned
				P B	Primary, Indicated, Emergent
				P C	Primary, Not indicated, Planned
				R A	Repeat, Indicated, Planned
				R B	Repeat, Indicated, Emergent
				R C	Repeat, Not indicated, Planned
				Z	Other (unknown)
E 50	Optional	Application of instrumentation with C Section	Extent	01	Single application (of instruments)
				02	Double application (of instruments) during trial of labour and then during C Section

Includes: Manual removal of placenta at same operative episode that for surgical termination of pregnancy (see [5.CA.89.^ ^](#))

Excludes: Any concomitant tubal ligation (see [1.RF.51.^ ^](#))

Code Also:

Note: Use of forceps or vacuum prior to proceeding to Cesarean section or application through the Cesarean section incision is captured using codes from either column 2 or 3 of this table. If both forceps and traction were tried (unsuccessfully), select a code from column 5 "with use of both vacuum and forceps". The extent attribute may also be applied, if desired (see note in attribute box).

5.MD.60.^ ^ Cesarean section delivery	with use of forceps	with use of vacuum	without instrumentation	with use of both vacuum and forceps
Cesarean hysterectomy	5.MD.60.RC	5.MD.60.RD	5.MD.60.KE	5.MD.60.CB
classical section [vertical incision in upper segment]	5.MD.60.JZ	5.MD.60.KA	5.MD.60.JY	5.MD.60.CC
extraperitoneal section	5.MD.60.KC	5.MD.60.KD	5.MD.60.KB	5.MD.60.CD
inverted T incision	5.MD.60.RA	5.MD.60.RB	5.MD.60.KG	5.MD.60.CE
laparotomy [for abdominal pregnancy]	5.MD.60.RE	5.MD.60.RF	5.MD.60.KF	—
lower segment transverse incision	5.MD.60.JW	5.MD.60.JX	5.MD.60.AA Includes: • Cesarean section NOS	5.MD.60.CF
other type of Cesarean section NEC	5.MD.60.RG Includes: • De Lee incision (combined upper and lower vertical incision), J incision, vaginal incision	5.MD.60.RH Includes: • De Lee incision (combined upper and lower vertical incision), J incision, vaginal incision	5.MD.60.KT Includes: • De Lee incision (combined upper and lower vertical incision), J incision, vaginal incision	5.MD.60.CG Includes: • De Lee incision (combined upper and lower vertical incision), J incision, vaginal incision

Postpartum Interventions (5PB - 5PD)

5.PB.^.^ Postpartum Diagnostic Interventions

5.PB.01.^.^ Postpartum care

Includes: First post natal (well baby) visit

Excludes: Subsequent well baby visit (see [2.ZZ.29.^.](#))
Subsequent well baby visit with physical examination (see [2.ZZ.02.^.](#))

5.PB.01.AB	immediate postpartum care
	Note: May Include: Monitoring vital signs, fundus, lochia, care of perineum
5.PB.01.AC	postpartum (follow-up) visit
	Includes: Follow up visit/consultation after delivery
	Note: Procurement of PAP smear, laboratory investigations, etc. postpartum follow up visit, mom and baby (first post natal visit)

5.PC.^.^ Postpartum Therapeutic Interventions

Includes: Therapeutic interventions done in the third stage of labour, immediately following delivery and in the first six weeks (42 days) following delivery

5.PC.20.^.^ Postpartum pharmacotherapy

Excludes: Administration of rh immunoglobulin (see [8.ZZ.70.^.](#))
Pharmacotherapy for induction of labour to expulse already dead fetus (i.e. intrauterine death, missed abortion) (see [5.AC.30.^.](#))

5.PC.20.^.^ Postpartum pharmacotherapy	combined routes of administration [e.g. oral followed by intravenous]	oral approach	percutaneous approach [e.g. intramuscular, intravenous, subcutaneous, intradermal]	route NEC [e.g. per orifice, transdermal]
analgesics	5.PC.20.AL-P2 Includes: • opioids (morphine, meperidine), acetylsalicylic acid, acetaminophen, ergotamine, sumatriptan	5.PC.20.CA-P2 Includes: • opioids (morphine, meperidine), acetylsalicylic acid, acetaminophen, ergotamine, sumatriptan	5.PC.20.HA-P2 Includes: • opioids (morphine, meperidine), acetylsalicylic acid, acetaminophen, ergotamine, sumatriptan	5.PC.20.YA-P2 Includes: • opioids (morphine, meperidine), acetylsalicylic acid, acetaminophen, ergotamine, sumatriptan
hormones [for suppression of lactation] [e.g. parlodel]	—	5.PC.20.CA-J1	—	—
uterotonic agent	5.PC.20.AL-I2 Includes: • ergot alkaloid [methylethergonavine], prostaglandin, oxytocin, ergometrine, dinoprostone	5.PC.20.CA-I2 Includes: • ergot alkaloid [methylethergonavine], prostaglandin, oxytocin, ergometrine, dinoprostone	5.PC.20.HA-I2 Includes: • ergot alkaloid [methylethergonavine], prostaglandin, oxytocin, ergometrine, dinoprostone	5.PC.20.YA-I2 Includes: • ergot alkaloid [methylethergonavine], prostaglandin, oxytocin, ergometrine, dinoprostone

5.PC.20.^ Postpartum pharmacotherapy	combined routes of administration [e.g. oral followed by intravenous]	oral approach	percutaneous approach [e.g. intramuscular, intravenous, subcutaneous, intradermal]	route NEC [e.g. per orifice, transdermal]
pharmaceutical agent NEC	5.PC.20.AL-T9	5.PC.20.CA-T9	5.PC.20.HA-T9	5.PC.20.YA-T9
stool softeners	—	5.PC.20.CA-A6	—	—

5.PC.21.^ Postpartum therapies on the breast

Excludes: Interventions related to treatment of lactational and non-lactational breast abscesses (see [1.YK.^](#) or [1.YL.^](#))

5.PC.21.MA	expression (emptying) of the breast (milk) Includes: Manual expression Mechanical expression (using breast pump)
5.PC.21.MB	binding of the breast
5.PC.21.MC	using heat therapy
5.PC.21.MD	using ice therapy
5.PC.21.ME	nipple care Includes: that for cracked nipples that for retracted nipples

5.PC.25.^ Removal of device, postpartum

Includes: that done following Cesarean section

Excludes: that done during labour (see [5.LD.25.^](#))

5.PC.25.GN	of (cervical) cerclage suture [e.g. Shirodkar, McDonald's]
------------	--

5.PC.73.^ Drainage postpartum

Includes: Evacuation, hematoma (postpartum)

Excludes: Drainage of non-obstetrical hematoma of perineum (see [1.RY.52.^](#))
Drainage of non-obstetrical hematoma of vagina (see [1.RS.52.^](#))
Drainage of non-obstetrical hematoma of vulva (see [1.RW.52.^](#))

5.PC.73.JS	incisional hematoma
5.PC.73.JT	other hematoma of vulva or vagina

5.PC.80.^ ^ Surgical repair, postpartum

	Includes:	Repair, post termination of pregnancy
	Excludes:	B-Lynch suture, uterus, for control of postpartum hemorrhage (see 5.PC.91.^ ^) Cervical cerclage, postpartum (see 5.PC.91.^ ^)
5.PC.80.JH		of obstetric laceration of corpus uteri [body of uterus] Includes: Repair of extension of uterine incision
5.PC.80.JJ		of current obstetric laceration of cervix occurring at vaginal delivery
5.PC.80.JK		of current obstetric laceration of cervix occurring at Cesarean section or during surgical termination of pregnancy
5.PC.80.JL		of current obstetric laceration of broad ligament(s) of uterus
5.PC.80.JM		secondary to uterine incision Includes: Repair of wound dehiscence following Cesarean section or hysterotomy for termination of pregnancy
5.PC.80.JN		secondary (to episiotomy) Includes: Delayed repair of episiotomy Repair of wound dehiscence following episiotomy or obstetrical laceration repair Omit code: When episiotomy is repaired at the time of delivery (see Delivery, by type)
5.PC.80.JP		of current obstetric laceration of pelvic floor, perineum, lower vagina or vulva Includes: Repair of 1st or 2nd degree tear, minor periurethral tears that of lower vagina (with or without perineal involvement) without extension into upper vagina
5.PC.80.JQ		of current obstetric laceration of rectum and sphincter ani Includes: Repair of 3rd or 4th degree tear
5.PC.80.JR		of current obstetric laceration of bladder and urethra Excludes: Repair of minor periurethral tears (see 5.PC.80.JP)
5.PC.80.JU		of current obstetric high vaginal laceration Includes: Repair of (vaginal) sulcus laceration that of an isolated laceration in the middle or upper third of the vagina without perineal involvement that where perineal laceration extends into the upper vagina (sulcus)

5.PC.91.^.^ Interventions to uterus (following delivery or abortion)

Excludes: Control of postpartum hemorrhage by embolization of pelvic vessels (see [1.RM.13.^.](#))
 Control of postpartum hemorrhage by ligation of pelvic vessels (see [1.KT.51.^.](#))
 Removal of blighted ovum (see [5.CA.89.^.](#))

Note: Code all that apply.

5.PC.91.GA	dilation and curettage
5.PC.91.GC	aspiration and curettage
5.PC.91.GD	dilation and evacuation [D&E] Includes: removal of missed abortion with (surgical) forceps
5.PC.91.HN	manual removal of placenta from uterus (e.g. Brandt Andrews maneuver) Omit code: When only gentle traction on placenta from vagina is used
5.PC.91.HP	manual correction of inverted uterus
5.PC.91.HQ	surgical correction of inverted uterus
5.PC.91.HR	manual exploration of uterine cavity
5.PC.91.HT	uterine (and vaginal) packing Includes: Tamponade (for control of postpartum hemorrhage) that with or without (temporary) cervical cerclage for retention of packing
5.PC.91.HU	bimanual compression and massage Includes: Non surgical control of postpartum hemorrhage
5.PC.91.HV	compression using intrauterine balloon Includes: that for control of postpartum hemorrhage
5.PC.91.LA	suturing of uterus Includes: B-Lynch suture (for postpartum hemorrhage)

5.PD.^.^.^ Postpartum Supportive Interventions

Includes: Supportive interventions occurring in the third stage of labour, immediately following delivery or in the first six weeks (42 days) following delivery.

5.PD.13.^.^ Postpartum education**E** 26

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description

 7.SC.06.ZZ for other activity
Includes: Clubhouse activities NEC

7.SC.08.^.^ Other ministrations, personal care**M** 10

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
M 10	Mandatory	Mandatory Type of delivery 10	Location	0	Not applicable
				D I	Administered by health care provider
				S D	Administered by self (patient)

Includes: Care, comfort
 Care, palliative
 Care, pastoral
 Ceremony, healing
 Conversation, (emotionally) supportive
 Ministration, spiritual
 Prayer
 Stimulation NOS (e.g. diversion of thought)
 Therapy, distraction (diversion of thought)

Excludes: Care giver support (see [7.SJ.08.^.^](#))

7.SC.08.PK for palliation
 7.SC.08.PL for (chronic) pain
 7.SC.08.PM for assistance in dying
Includes: Medical assistance in dying (MAID)
Code Also: All pharmacological agents used for medical assistance in dying (see [1.ZZ.35.^.^](#))
 Any consultation(s) for medical assistance in dying (see [2.ZZ.02.PM](#))
 7.SC.08.ZZ for other reason NEC
Includes: Supportive conversation and visiting NOS
Excludes: that during palliative care (see [7.SC.08.PK](#))
 that for (chronic) pain distraction (see [7.SC.08.PL](#))

7.SC.59.^ Instruction, personal care**E** 26

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 26	Optional	Delivery size parameter 1	Extent	G R	Group of clients with one health care provider
				G S	Group of clients with multiple health care providers
				I M	Individual client with multiple health care providers
				I N	Individual client with one health care provider

Includes: Instruction, self care

Excludes: Assistance, activities of daily living (see [7.SC.01.^](#))
 Instruction, monitoring glucose level (see [7.SP.59.^](#))
 Instruction, monitoring vital signs (see [7.SP.59.^](#))
 Instruction, performing self exam (see [7.SP.59.^](#))
 Instruction, self care for early detection of disease (see [7.SP.59.^](#))
 Instruction, self care to reduce health risk factors (see [7.SP.59.^](#))
 Instruction, weight loss or gain (see [7.SP.59.^](#))
 Training, activities of daily living (see [6.VA.50.^](#))

Code Also: Any associated care giver instruction (see [7.SJ.59.^](#))**Note:** Involves providing client with sufficient instructional guidance enabling the performance of self care

7.SC.59.FE	for soft contact lens
7.SC.59.FF	for gas permeable contact lens
7.SC.59.FG	for contact lens NEC
7.SC.59.FJ	for specialty vision device NEC
	Includes: medical, sports or cosmetic vision device
7.SC.59.QA	for medication administration (includes any route: injections, intravenous, infusion pumps)
7.SC.59.QB	for oxygen use
7.SC.59.QC	for catheter care
7.SC.59.QD	for dialysis
	Includes: Dialysis training
7.SC.59.QE	for stoma care (includes: ostomy care)
7.SC.59.QF	for installation and care of prosthesis, orthoses
7.SC.59.QG	for dressings (includes: wound care)
7.SC.59.QH	for exercises (e.g. strengthening, stretching, relaxing to optimize physical fitness)
7.SC.59.ZZ	for other reason NEC (e.g. pre or postoperative)

7.SC.70.^ ^ Precaution, personal care

Includes: Adaptation, environmental
 Creation, safe environment
 Hypobaric chamber therapy (for altitude indoctrination)
 Incubation
 Isolation
 Management, risk (patient)
 Observation (detoxification, self harm)
 Precaution, infection
 Precaution, isolation
 Restraint, patient

Excludes: Environmental assessment (for safety) (see [7.SE.02.^ ^](#))

Note: Personal care precautions may often be employed during episodes of acute infection, psychotic episodes, detoxification, autoimmune deficiency, allergic reaction, premature infant development, or any other health condition that requires special environmental (or personal) controls.

7.SC.70.SA	by area restriction (includes: isolation NEC)
7.SC.70.SB	by physical restraint (e.g. human, mechanical binding)
7.SC.70.SC	by chemical restraint (e.g. sedation to reduce agitation, violence)
7.SC.70.SD	by combined physical and chemical restraint
7.SC.70.SE	by enforcing airborne precaution protocol
7.SC.70.SF	by enforcing contact precaution protocol
7.SC.70.SJ	by placement in an incubator
7.SC.70.SL	by placement under hood (or tent)
7.SC.70.SZ	by environmental adaptation NEC (safe or sterile environment)

Includes: Decontamination

7.SC.80.^ ^ Post mortem, personal care

Includes: Care, deceased (body)

7.SC.80.ZZ	for reason NEC
------------	----------------

7.SE.^.^ Environmental Healthcare Intervention**7.SE.02.^.^ Assessment, environment****S** 42 **E** 25

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 42	Optional	Dx Status 6	Status	N	Initial
				N1	Repeat
				Z	Other (special)
E 25	Optional	Time parameter 1	Extent	C M	Comprehensive
				L T	Limited (brief)

Includes: Environmental assessment
Transactional analysis of personality and environment [TAPE]

Note: May involve analyzing the environment to determine if there are health hazards, safety problems, barriers to access or other concerns that prevent active and healthy enjoyment of physical space.

7.SE.02.AA	of communal living space
	Includes: Group home assessment
7.SE.02.AB	of private living space
	Includes: Home assessment
7.SE.02.AD	of public meeting place
7.SE.02.AE	of public recreation site
7.SE.02.AG	of public roads and highways
	Includes: Highway safety assessment
7.SE.02.AK	of public transportation (system)
	Includes: Public transportation access assessment Public transportation safety assessment
7.SE.02.AL	of public waterways
	Includes: Waterway safety assessment
7.SE.02.AP	of other public place
7.SE.02.AW	of workplace
	Includes: Ergonomic assessment Occupational assessment
7.SE.02.QP	of quality of air
7.SE.02.QS	of quality of soil
7.SE.02.QV	of quality of water
7.SE.02.ZZ	for other reason NEC

7.SE.04.^.^ Accommodation, environment

E 26	Optional	Delivery size parameter 1	Extent	G R	Group of clients with one health care provider
				G S	Group of clients with multiple health care providers
				I M	Individual client with multiple health care providers
				I N	Individual client with one health care provider

Includes: Conference, team
 Planning, care
 Planning, discharge
 Programming, activity
 Rounds, clinical service
 Rounds, ward

7.SF.12.ZZ for reason NEC

7.SF.13.^ ^ Preparation, service

Includes: Preparation, health intervention
 Preparation, pre operative
 Preparation, specimen
 Processing, specimen
 Rehearsal, surgical
 Simulation, operative (e.g. computer simulation of operative technique)
 Simulation, pre operative (e.g. virtual reality)
 Simulation, radiation (e.g. determining field outlines and orientation)

Excludes: that for the purpose of pharmacotherapy (see Pharmacotherapy, by site)

Code Also: Any associated diagnostic imaging (e.g. computerized tomography, by site)
 Any inspection done, by site (see Section 2)

7.SF.13.QJ for surgical site marking
Includes: Placement of fiducial markers, transponders, tumour marking tattoos, chromoscopy
 Surgical (tumour) site mapping, staining (e.g. fluorescent dye, triamcinolone) for direct visualization during surgery

7.SF.13.TZ for treatment plan execution
Includes: Creation of plan for treatment (any type)

7.SF.13.ZZ for reason NEC

7.SF.14.^ ^ Robotic assisted telemanipulation of tools, service

M⁷

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
M 7	Optional	Type of delivery 7	Location	D I	Direct delivery (operator in same location as patient)
				I N	Indirect delivery (operator in a remote location)
				U	Unknown

- Includes:** Robot (robotic) assisted surgical system (e.g. da Vinci, ZEUS)
that with concomitant computer assisted imaging guidance
Use of robot (robotic) assistance to perform intervention NOS
- Excludes:** Computer assisted imaging guidance alone (see Imaging intervention NEC, by site)
- Code Also:** Specific intervention being performed (see Section 1 or 2)
- Note:** The specific intervention must be sequenced first.

7.SF.14.ZX using system NEC

7.SF.15.^ ^ Brokerage, service

M ²

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
M 2	Optional	Type of delivery 2	Location	D I	Direct delivery (health care provider is face to face with client)
				I N	Indirect (service delivered at a distance e.g. telephone, telemedicine with health care provider not physically present with client)

- Includes:** Advice, telephone
Advisory, health
Delegation, clinical support activities (on client's behalf)
Management, case
Monitoring, third party administered therapy (e.g. direct observed therapy or "DOT")
Referral, client
- Code Also:** Any creation of treatment plan (see [7.SF.13.^ ^](#))
- Note:** May involve initiating or maintaining a collaborative process to assess, plan, implement, coordinate, monitor and/or evaluate the options and services required to meet a client's health care needs.

7.SF.15.TZ for treatment plan execution
Includes: Case management NOS

7.SF.15.ZZ for reason NEC
Includes: Advice for information and referral

7.SF.17.^ ^ Dispensing, service

S 21 M 3 E 46

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 21	Optional	Dx status 2	Status	N	Initial (assessment)

				03	Trifocal
				F	Progressive
				M	Multifocal

Includes: Fitting, assistive or adaptive devices
 Fitting, prosthetic (or orthodontic)
 Measuring and fitting, assistive or adaptive devices
 Measuring and fitting, prosthetic (or orthodontic)
 Measuring, assistive or adaptive devices
 Procedure, mould room

7.SF.18.FE	for soft contact lens
7.SF.18.FF	for gas permeable contact lens
7.SF.18.FG	for contact lens NEC
7.SF.18.FH	for spectacle frame
7.SF.18.FI	for spectacle lens
7.SF.18.FJ	for specialty vision device NEC
	Includes: medical, sports or cosmetic vision device
7.SF.18.KA	for prosthetic device (e.g. limb, eye, ear, nose)
7.SF.18.KB	for orthodontic device (e.g. denture, maxillary obturator)
7.SF.18.KC	for other external appliance (e.g. brace, corset, collar, splint, walker, cane)
7.SF.18.TD	for other assistive/adaptive device (e.g. hearing aid)
7.SF.18.ZZ	for other (reason) NEC

7.SF.19.^.^ Interpretation, service

Includes: Augmentative communication
 Interpretation, language (for client)
 Service, language (for client)
 Translation (for client)

7.SF.19.ZZ	for reason NEC
------------	----------------

7.SJ.^.^.^ Support Activity Healthcare Interventions

7.SJ.08.^.^ Other ministrations, support activity

Includes: Care giver support

7.SJ.08.ZZ	other reason NEC
------------	------------------

Includes: Supportive conversation and friendly visitation to care giver

7.SJ.30.^ ^ Documentation, support activity

- Includes:** Certification (e.g. birth, death, health, psychiatric)
 Completion, certificate
 Completion, claim forms (e.g. insurance, third party payor, worker's compensation)
 Completion, incident report (involving client)
 Correspondence, clinical (for external party on behalf of client)
- Note:** Use this code to identify documentation activity undertaken on behalf of the client as a separate activity for external recipients. Documentation (or patient record- keeping) is considered an integral and required part of the clinical care process of the client and should not be coded separately. (Examples are found below.)
- Omit code:** Charting, patient
 Consent, patient
 Recording, patient (chart)
 Report, assessment
 Report, consultation
 Report, diagnostic (results)
 Report, operative
 Summary, Discharge

7.SJ.30.LA	for certificate (e.g. birth, death, health, psychiatric)
7.SJ.30.LB	for claim form (e.g. for insurance, third party payor, worker's compensation)
7.SJ.30.LC	for consent (patient, substitute decision maker, court)
7.SJ.30.LD	for incident report (involving client)
7.SJ.30.LZ	for other correspondence (on behalf of client)

7.SJ.32.^ ^ Prescription, support activity**S** 21 **L** 82 **E** 46

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
S 21	Optional	Dx status 2	Status	N	Initial (assessment)

				F	Progressive
				M	Multifocal

Includes: Prescribing (diet, exercise, medication)

Excludes: that with assessment or consultation (code only [2.ZZ.02.^](#))

7.SJ.32.FE for soft contact lens
 7.SJ.32.FF for gas permeable contact lens
 7.SJ.32.FG for contact lens NEC
 7.SJ.32.FH for spectacle frame
 7.SJ.32.FI for spectacle lens
 7.SJ.32.FJ for specialty vision device NEC

Includes: medical vision device, cosmetic vision device

7.SJ.32.JA for pharmacological agent (e.g. medication)
 7.SJ.32.JB for herbal preparation
 7.SJ.32.JC for therapeutic service (any type)
 7.SJ.32.JZ for other healthcare product or service NEC
 7.SJ.32.QH for exercise (program)
 7.SJ.32.TD for using assistive/ adaptive device
 7.SJ.32.VD for nutrition

Includes: Prescription, diet (meal plan)

Code Also: Any instruction in weight management (loss, gain) (see [7.SP.59.^](#))

7.SJ.34.^ Testimony (court), support activity

Includes: Expert testimony
 Testimony, medico legal
 Testimony, review board

7.SJ.34.PB for (regarding) mental health
 7.SJ.34.PZ for other testimony

7.SJ.35.^ ^ Collection of legal evidence, support activity

Includes: Photographic evidence gathering
Photography done for forensic purposes
Preparation, evidence kit (e.g. for abuse, rape or violent assault)

7.SJ.35.ZZ reason or method NEC

7.SJ.36.^ ^ Photography, support activity

Includes: Photography, clinical
Videotaping, healthcare session

Excludes: Photography, dental (see [3.FK.94.^ ^](#))
Photography, ocular (see [3.CZ.94.^ ^](#))
that for collection of legal evidence on behalf of client (see [7.SJ.35.^ ^](#))

7.SJ.36.ZZ reason NEC

7.SJ.59.^ ^ Instruction, support activity**E** 26

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 26	Optional	Delivery size parameter 1	Extent	G R	Group of clients with one health care provider
				G S	Group of clients with multiple health care providers
				I M	Individual client with multiple health care providers
				I N	Individual client with one health care provider

Includes: Instruction, care giver support

Excludes: Instruction, personal (self) care (see [7.SC.59.^ ^](#))

Note: Involves providing (primary) care giver with sufficient guidance to enable the performance of supportive care to another person

7.SJ.59.QA for medication administration (any route)
7.SJ.59.QB for oxygen use
7.SJ.59.QC for catheter care
7.SJ.59.QD for dialysis
7.SJ.59.QE for stoma care
7.SJ.59.QF for installation and care of prosthesis
7.SJ.59.QG for dressings (wound management)
7.SJ.59.TA for alimentation (feedings by any route or method)
7.SJ.59.UA for monitoring of biochemical levels (e.g. blood sugar)
7.SJ.59.UK for monitoring of vital signs (e.g. general observation and monitoring)
7.SJ.59.ZZ for other reason NEC

7.SP.^.^ Promoting Health & Preventing Disease Healthcare Interventions**7.SP.10.^.^ Counseling, promoting health and preventing disease****E 66**

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 66	Mandatory	Mandatory Delivery size parameter 2	Extent	G R	Group of clients with one health care provider
				G S	Group of clients with multiple health care providers
				I M	Individual client with multiple health care providers
				I N	Individual client with one health care provider
				U	Unspecified

Includes: Counseling, against (existing) health risk
Counseling, diet (to correct existing condition)
Counseling, health and safety practices
Counseling, lifestyle

Excludes: Counseling, addiction (see [6.AA.10.^.](#))
Counseling, antepartum (nutrition, sexuality, lifestyle adjustment) (see [5.AD.14.^.](#))
Counseling, maternal and fetal health (see [5.AD.14.^.](#))
Counseling, nutrition (for healthy living) (see [7.SP.59.^.](#))
Counseling, stress and relaxation techniques (see [6.AA.10.^.](#))

Note: Involves expert health advice provided for a client to: identify an existing health risk, change existing attitudes and initiate a willingness to modify behavior that will eliminate that particular health risk.

7.SP.10.GA	for gambling
	Excludes: Gambling addiction counseling (see 6.AA.10.^.)
7.SP.10.VA	for alcohol use (misuse)
	Excludes: Alcohol addiction counseling (see 6.AA.10.^.)
7.SP.10.VB	for drug use (misuse)
	Excludes: Drug addiction counseling (see 6.AA.10.^.)
7.SP.10.VC	for conception
7.SP.10.VD	for nutrition (maintaining balanced/ corrective diet)
	Includes: Counselling, swallowing food (e.g. in dysphagia)
7.SP.10.VE	for safe environment (home, work)
7.SP.10.VF	for safe recreation (leisure activity, playground, sports)
7.SP.10.VG	for safe sexual practice (includes: contraception)
7.SP.10.VH	for safe vehicle (bicycle, boat, car)
7.SP.10.VK	for smoking
7.SP.10.VX	for organ donation
7.SP.10.ZZ	for other reason NEC

7.SP.59.^ ^ Instruction, promoting health and preventing disease**M 8 E 66**

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
M 8	Mandatory	Mandatory Type of delivery 8	Location	D I	Direct delivery (health care provider is face to face with client)

E 48

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 48	Optional	Dosage Schedule 1	Extent	A1	Adult dose (schedule) 1
				A2	Adult dose (schedule) 2
				A3	Adult dose (schedule) 3
				B X	Booster dose
				P1	Pediatric dose (schedule) 1
				P2	Pediatric dose (schedule) 2
				P3	Pediatric dose (schedule) 3
				P4	Pediatric dose (schedule) 4
				U	Unspecified

Includes: Vaccination against adenovirus

8.AA.70.BA-BA	by oral intake [po] live (attenuated) virus NOS
8.AA.70.BA-BA-4	by oral intake [po] live (attenuated) virus group 4
8.AA.70.BA-BA-7	by oral intake [po] live (attenuated) virus group 7

8.AB.^.^ Therapeutic Interventions Strengthening the Immune System and/or Genetic Composition against Anthrax**8.AB.70.^.^ Immunization (to prevent) anthrax****E** 48

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 48	Optional	Dosage Schedule 1	Extent	A1	Adult dose (schedule) 1
				A2	Adult dose (schedule) 2
				A3	Adult dose (schedule) 3
				B X	Booster dose
				P1	Pediatric dose (schedule) 1
				P2	Pediatric dose (schedule) 2
				P3	Pediatric dose (schedule) 3
				P4	Pediatric dose (schedule) 4
				U	Unspecified

Includes: Vaccination against anthrax

8.AB.70.HB-BG by subcutaneous injection [sc] of inactivated (whole) bacteria

8.BB.^.^ Therapeutic Interventions Strengthening the Immune System and/or Genetic Composition against Botulism**8.BB.70.^.^ Immunization (to prevent) botulism****E** 48

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 48	Optional	Dosage Schedule 1	Extent	A1	Adult dose (schedule) 1
				A2	Adult dose (schedule) 2
				A3	Adult dose (schedule) 3
				B X	Booster dose
				P1	Pediatric dose (schedule) 1
				P2	Pediatric dose (schedule) 2
				P3	Pediatric dose (schedule) 3
				P4	Pediatric dose (schedule) 4
				U	Unspecified

Includes: Botulinum antitoxin inoculation
Passive immunization with botulinum antitoxin

Note: For administration of botulinum to alleviate neuromuscular disorders, see the index lead term "Pharmacotherapy (local)" and find the subterm for the muscle, by site.

8.BB.70.HA-BX by intramuscular injection [IM] of (passive) antitoxin

8.BM.^.^ Therapeutic Interventions Strengthening the Immune System and/or Genetic Composition against Bacterial Disease - Meningococcal

8.BM.70.^.^ Immunization (to prevent) meningococcal bacteria

E 48

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 48	Optional	Dosage Schedule 1	Extent	A1	Adult dose (schedule) 1
				A2	Adult dose (schedule) 2
				A3	Adult dose (schedule) 3
				B X	Booster dose
				P1	Pediatric dose (schedule) 1
				P2	Pediatric dose (schedule) 2
				P3	Pediatric dose (schedule) 3
				P4	Pediatric dose (schedule) 4
				U	Unspecified

Includes: Vaccination against meningococcal meningitis

8.BM.70.HB-BS-J by subcutaneous [SC] injection of bivalent bacterial (purified) polysaccharide (antigen)

Includes: Groups A and C

8.BM.70.HB-BS-L by [SC] subcutaneous injection of quadravalent bacterial (purified) polysaccharide (antigen)

Includes: Groups A, C, Y and W

8.BM.70.HB-BS-N by [SC] subcutaneous injection of conjugate

8.BQ.^.^ Therapeutic Interventions Strengthening the Immune System and/or Genetic Composition against Non-pneumococcal Streptococcal Bacteria**8.BQ.70.^.^ Immunization (to prevent) non pneumococcal streptococcal bacteria****E** 48

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 48	Optional	Dosage Schedule 1	Extent	A1	Adult dose (schedule) 1
				A2	Adult dose (schedule) 2
				A3	Adult dose (schedule) 3
				B X	Booster dose
				P1	Pediatric dose (schedule) 1
				P2	Pediatric dose (schedule) 2
				P3	Pediatric dose (schedule) 3
				P4	Pediatric dose (schedule) 4
				U	Unspecified

Includes: Vaccination against streptococcal bacteria (Strep A and B)**Excludes:** Immunization (to prevent) streptococcal pneumoniae (see [8.BR.70.^.](#))

8.BQ.70.BA-BP-A	type, group or strain A, by oral intake [po] of bacterial polysaccharide conjugated to protein Includes: vaccination against Strep A pharyngitis, flesh eating disease, rheumatic fever inoculation (Pneumovax)
8.BQ.70.BA-BP-B	type, group or strain B, by oral intake [po] of bacterial polysaccharide conjugated to protein Includes: vaccination against meningitis
8.BQ.70.HA-BP-A	type, group or strain A, by intramuscular [IM] injection of bacterial polysaccharide conjugated to protein Includes: vaccination against Strep A pharyngitis, flesh eating disease, rheumatic fever inoculation (Pneumovax)
8.BQ.70.HA-BP-B	type, group or strain B, by intramuscular [IM] injection of bacterial polysaccharide conjugated to protein Includes: vaccination against meningitis

8.BR.^.^ Therapeutic Interventions Strengthening the Immune System and/or Genetic Composition against Streptococcal Pneumococcal Bacteria**8.BR.70.^.^ Immunization (to prevent) streptococcal pneumococcal bacteria****E** 48

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 48	Optional	Dosage Schedule 1	Extent	A1	Adult dose (schedule) 1
				A2	Adult dose (schedule) 2
				A3	Adult dose (schedule) 3
				B X	Booster dose
				P1	Pediatric dose (schedule) 1
				P2	Pediatric dose (schedule) 2
				P3	Pediatric dose (schedule) 3
				P4	Pediatric dose (schedule) 4
				U	Unspecified

Includes: Immunization (to prevent) streptococcal pneumoniae
Vaccination against pneumococcal pneumonia, bacteremia and pneumococcal meningitis
Vaccination against streptococcal pneumococcal bacteria

8.BR.70.HA-BP	by intramuscular [IM] injection of bacterial polysaccharide conjugated to protein
	Includes: Pneumococcal bacteremia and otitis media inoculation (Pneumovax)
8.BR.70.HA-BQ	by intramuscular [IM] injection of bacterial polysaccharides
	Includes: Pneumovax, Pneumovax 23, Pneumovax-Immune
8.BR.70.HB-BP	by subcutaneous [SC] injection of bacterial polysaccharide conjugated to protein
	Includes: Pneumococcal bacteremia and otitis media inoculation (Pneumovax)
8.BR.70.HB-BQ	by subcutaneous [SC] injection of bacterial polysaccharides
	Includes: Pneumovax, Pneumovax 23, Pneumovax-Immune

8.BS.^.^ Therapeutic Interventions Strengthening the Immune System and/or Genetic Composition against Staphylococcal Bacteria**8.BS.59.^.^ Phage therapy staphylococcal bacteria**

Includes: Methicillin resistant staph aureus [MRSA] bacteriophage treatment
 Staphylococcus bacteriophage lysate
 Vancomycin resistant enterococci [VRE] bacteriophage treatment

8.BS.59.HB-BJ by subcutaneous [SC] injection of viral DNA
 8.BS.59.JA-BJ by topical (powder) application of viral DNA

8.BT.^.^ Therapeutic Interventions Strengthening the Immune System and/or Genetic Composition against Bacterial Disease NEC**8.BT.70.^.^ Immunization (to prevent) bacterial disease NEC****E** 48

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 48	Optional	Dosage Schedule 1	Extent	A1	Adult dose (schedule) 1
				A2	Adult dose (schedule) 2
				A3	Adult dose (schedule) 3
				B X	Booster dose
				P1	Pediatric dose (schedule) 1
				P2	Pediatric dose (schedule) 2
				P3	Pediatric dose (schedule) 3
				P4	Pediatric dose (schedule) 4
				U	Unspecified

8.BT.70.HB-BG by subcutaneous [SC] injection of inactivated (whole) bacteria

8.CA.^.^ Therapeutic Interventions Strengthening the Immune System and/or Genetic Composition against Cholera**8.CA.70.^.^ Immunization (to prevent) cholera****E** 48

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 48	Optional	Dosage Schedule 1	Extent	A1	Adult dose (schedule) 1
				A2	Adult dose (schedule) 2
				A3	Adult dose (schedule) 3
				B X	Booster dose
				P1	Pediatric dose (schedule) 1
				P2	Pediatric dose (schedule) 2
				P3	Pediatric dose (schedule) 3
				P4	Pediatric dose (schedule) 4
				U	Unspecified

Includes: Vaccination against cholera

8.CA.70.BA-BF by oral intake [po] of live (attenuated) bacteria

8.CY.^.^ Therapeutic Interventions Strengthening the Immune System and/or Genetic Composition against Cytomegalovirus [CMV]**8.CY.70.^.^ Immunization (to prevent) cytomegalovirus [CMV]****E** 48

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 48	Optional	Dosage Schedule 1	Extent	A1	Adult dose (schedule) 1
				A2	Adult dose (schedule) 2
				A3	Adult dose (schedule) 3
				B X	Booster dose
				P1	Pediatric dose (schedule) 1
				P2	Pediatric dose (schedule) 2
				P3	Pediatric dose (schedule) 3
				P4	Pediatric dose (schedule) 4
				U	Unspecified

Includes: Vaccination against cytomegalovirus [CMV]

8.CY.70.GR-BW by intravenous [IV] injection of (passive) immunoglobulin [CMV IGIV]

8.DP.^.^ Therapeutic Interventions Strengthening the Immune System and/or Genetic Composition against Diphtheria

8.DP.70.^.^ Immunization (to prevent) diphtheria

E 48

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 48	Optional	Dosage Schedule 1	Extent	A1	Adult dose (schedule) 1
				A2	Adult dose (schedule) 2
				A3	Adult dose (schedule) 3
				B X	Booster dose
				P1	Pediatric dose (schedule) 1
				P2	Pediatric dose (schedule) 2
				P3	Pediatric dose (schedule) 3
				P4	Pediatric dose (schedule) 4
				U	Unspecified

Includes: Vaccination against diphtheria
Vaccination to treat diphtheria

Excludes: Immunization (to prevent) diphtheria and tetanus (see [8.MK.70.^.](#))
Immunization (to prevent) diphtheria, tetanus and pertussis (see [8.MM.70.^.](#))
Immunization (to prevent) diphtheria, tetanus, pertussis and Haemophilus B influenza (see [8.MN.70.^.](#))
Immunization (to prevent) diphtheria, tetanus, pertussis and polio (see [8.MQ.70.^.](#))
Immunization (to prevent) diphtheria, tetanus, pertussis, Haemophilus B influenza and hepatitis B (see [8.MO.70.^.](#))
Immunization (to prevent) diphtheria, tetanus, pertussis, Haemophilus B influenza and polio (see [8.MR.70.^.](#))

8.DP.70.GR-BX by intravenous [IV] injection of (passive) antitoxin
8.DP.70.HA-BK by intramuscular [IM] injection of toxoid
8.DP.70.HA-BX by intramuscular [IM] injection of (passive) antitoxin

8.EA.^.^ Therapeutic Interventions Strengthening the Immune System and/or Genetic Composition against Encephalitis - Japanese**8.EA.70.^.^ Immunization (to prevent) encephalitis, Japanese****E** 48

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 48	Optional	Dosage Schedule 1	Extent	A1	Adult dose (schedule) 1
				A2	Adult dose (schedule) 2
				A3	Adult dose (schedule) 3
				B X	Booster dose
				P1	Pediatric dose (schedule) 1
				P2	Pediatric dose (schedule) 2
				P3	Pediatric dose (schedule) 3
				P4	Pediatric dose (schedule) 4
				U	Unspecified

Includes: Vaccination against Japanese encephalitis

8.EA.70.HB-BC by subcutaneous [SC] injection of inactivated virus (JEVAX)

8.EA.70.HB-CA by subcutaneous [SC] injection of chimeric live (attenuated) virus (ChimeriVAX JE)

8.EB.^.^ Therapeutic Interventions Strengthening the Immune System and/or Genetic Composition against Encephalitis - Tick Borne**8.EB.70.^.^ Immunization (to prevent) encephalitis, tick borne****E** 48

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 48	Optional	Dosage Schedule 1	Extent	A1	Adult dose (schedule) 1
				A2	Adult dose (schedule) 2
				A3	Adult dose (schedule) 3
				B X	Booster dose
				P1	Pediatric dose (schedule) 1
				P2	Pediatric dose (schedule) 2
				P3	Pediatric dose (schedule) 3
				P4	Pediatric dose (schedule) 4
				U	Unspecified

Includes: Vaccination against tick borne encephalitis

8.EB.70.HB-BC by subcutaneous [SC] injection of inactivated virus

8.EC.^.^ Therapeutic Interventions Strengthening the Immune System and/or Genetic Composition against Encephalitis - Venezuelan Equine**8.EC.70.^.^ Immunization (to prevent) encephalitis - Venezuelan equine****E** 48

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 48	Optional	Dosage Schedule 1	Extent	A1	Adult dose (schedule) 1
				A2	Adult dose (schedule) 2
				A3	Adult dose (schedule) 3
				B X	Booster dose
				P1	Pediatric dose (schedule) 1
				P2	Pediatric dose (schedule) 2
				P3	Pediatric dose (schedule) 3
				P4	Pediatric dose (schedule) 4
				U	Unspecified

Includes: Vaccination against Venezuelan equine encephalitis [VEE]

8.EC.70.HB-BA by subcutaneous [SC] injection of live (attenuated) virus
 8.EC.70.HB-BC by subcutaneous [SC] injection of inactivated virus

8.EZ.^.^ Therapeutic Interventions Strengthening the Immune System and/or Genetic Composition against Encephalitis NOS**8.EZ.70.^.^ Immunization (to prevent) encephalitis NOS****E** 48

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 48	Optional	Dosage Schedule 1	Extent	A1	Adult dose (schedule) 1
				A2	Adult dose (schedule) 2
				A3	Adult dose (schedule) 3
				B X	Booster dose
				P1	Pediatric dose (schedule) 1
				P2	Pediatric dose (schedule) 2
				P3	Pediatric dose (schedule) 3
				P4	Pediatric dose (schedule) 4
				U	Unspecified

Includes: Vaccination against encephalitis NOS

8.EZ.70.HB-BA by subcutaneous [SC] injection of live (attenuated) virus
 8.EZ.70.HB-BC by subcutaneous [SC] injection of inactivated virus

8.FA.^^.^^ Therapeutic Interventions Strengthening the Immune System and/or Genetic Composition against Dengue Fever

8.FA.70.^^ Immunization (to prevent) dengue fever

E 48

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 48	Optional	Dosage Schedule 1	Extent	A1	Adult dose (schedule) 1
				A2	Adult dose (schedule) 2
				A3	Adult dose (schedule) 3
				B X	Booster dose
				P1	Pediatric dose (schedule) 1
				P2	Pediatric dose (schedule) 2
				P3	Pediatric dose (schedule) 3
				P4	Pediatric dose (schedule) 4
				U	Unspecified

Includes: Vaccination against Dengue fever

8.FA.70.HB-BC by subcutaneous [SC] injection of inactivated virus

8.FC.^.^ Therapeutic Interventions Strengthening the Immune System and/or Genetic Composition against Rift Valley Fever**8.FC.70.^.^ Immunization (to prevent) Rift valley fever****E** 48

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 48	Optional	Dosage Schedule 1	Extent	A1	Adult dose (schedule) 1
				A2	Adult dose (schedule) 2
				A3	Adult dose (schedule) 3
				B X	Booster dose
				P1	Pediatric dose (schedule) 1
				P2	Pediatric dose (schedule) 2
				P3	Pediatric dose (schedule) 3
				P4	Pediatric dose (schedule) 4
				U	Unspecified

Includes: Vaccination against Rift VALley Fever

8.FC.70.HB-BC by subcutaneous [SC] injection of inactivated virus

8.HA.^.^ Therapeutic Interventions Strengthening the Immune System and/or Genetic Composition against Hantavirus**8.HA.70.^.^ Immunization (to prevent) Hantavirus****E** 48

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 48	Optional	Dosage Schedule 1	Extent	A1	Adult dose (schedule) 1
				A2	Adult dose (schedule) 2
				A3	Adult dose (schedule) 3
				B X	Booster dose
				P1	Pediatric dose (schedule) 1
				P2	Pediatric dose (schedule) 2
				P3	Pediatric dose (schedule) 3
				P4	Pediatric dose (schedule) 4
				U	Unspecified

Includes: Vaccination against Hantavirus

8.HA.70.HB-BC by subcutaneous [SC] injection of inactivated virus

8.HE.^.^ Therapeutic Interventions Strengthening the Immune System and/or Genetic Composition against Hepatitis

8.HE.70.^.^ Immunization (to prevent) hepatitis

E 49

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 49	Optional	Dosage Schedule 2	Extent	A1	Adult dose (schedule) 1
				A2	High risk dialysis patient dosage (schedule) 2
				A3	Adult dose (schedule) 3
				B X	Booster dose
				P1	Pediatric dose (schedule) 1
				P2	High risk dialysis infant/adolescent dosage (schedule) 2
				P3	Pediatric dose (schedule) 3
				P4	Pediatric dose (schedule) 4
				U	Unspecified

Includes: Vaccination against hepatitis

8.HE.70.^.^ Immunization (to prevent) hepatitis	by intramuscular [IM] injection of inactivated viral antigen	by intramuscular [IM] injection of recombinant DNA	by intramuscular [IM] injection of immune globulin
Type A	8.HE.70.HA-BD-A Includes: • Havrix, Vaqta, Aqaxim, Epaxal Bema	—	—
Type B	8.HE.70.HA-BD-B Includes: • HBV	8.HE.70.HA-CB-B Includes: • Recombivax HB, Energix	8.HE.70.HA-BW-B Includes: • HBV-IG
Type A and B	8.HE.70.HA-BD-J Includes: • Hep A Hep B Twinrix, Twinrix Junior	—	8.HE.70.HA-BW-J
Type C	—	8.HE.70.HA-CB-C	—
Type E	—	8.HE.70.HA-CB-E	—

8.HM.^.^ Therapeutic Interventions Strengthening the Immune System and/or Genetic Composition against Haemophilus Influenza type B [Hib]**8.HM.70.^.^ Immunization (to prevent) Haemophilus influenza****E** 48

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 48	Optional	Dosage Schedule 1	Extent	A1	Adult dose (schedule) 1
				A2	Adult dose (schedule) 2
				A3	Adult dose (schedule) 3
				B X	Booster dose
				P1	Pediatric dose (schedule) 1
				P2	Pediatric dose (schedule) 2
				P3	Pediatric dose (schedule) 3
				P4	Pediatric dose (schedule) 4
				U	Unspecified

Includes: Vaccination against Haemophilus influenza only**Excludes:** that given in combination with other vaccines e.g. DAPTP-Hib (see [8.MR.70.^.](#))
that with hepatitis B immunization [Hib-Hep] (see [8.MS.70.^.](#))

8.HM.70.HA-BP-1	PRP-D by intramuscular [IM] injection of bacterial polysaccharide conjugated to protein (e.g. ProHibit)
8.HM.70.HA-BP-2	HbOC by intramuscular [IM] injection of bacterial polysaccharide conjugated to protein (e.g. HibTITER)
8.HM.70.HA-BP-3	PRP-T by intramuscular [IM] injection of bacterial polysaccharide conjugated to protein (e.g. ActHIB)
8.HM.70.HA-BP-4	PRP-OMP by intramuscular [IM] injection of bacterial polysaccharide conjugated to protein (e.g. PedvaxHIB)

8.HP.^.^ Therapeutic Interventions Strengthening the Immune System and/or Genetic Composition against Human Papillomavirus**8.HP.70.^.^ Immunization (to prevent) human papillomavirus****E** 48

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 48	Optional	Dosage Schedule 1	Extent	A1	Adult dose (schedule) 1
				A2	Adult dose (schedule) 2
				A3	Adult dose (schedule) 3
				B X	Booster dose
				P1	Pediatric dose (schedule) 1
				P2	Pediatric dose (schedule) 2
				P3	Pediatric dose (schedule) 3
				P4	Pediatric dose (schedule) 4
				U	Unspecified

Includes: Vaccination, HPV

8.HP.70.HA-CB-J by intramuscular [IM] injection of recombinant DNA bivalent

Includes: Cervarix (16 and 18)

8.HP.70.HA-CB-L by intramuscular [IM] injection of recombinant DNA quadrivalent

Includes: Gardasil (6, 11, 16 and 18)**8.IM.^.^ Therapeutic Interventions Strengthening the Immune System and/or Genetic Composition against Severe Acute Respiratory Syndrome Coronavirus 2 [SARS-CoV-2]****8.IM.70.^.^ Immunization (to prevent) severe acute respiratory syndrome coronavirus 2 [SARS-CoV-2]****E** 83

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 83	Optional	Dosage schedule 3	Extent	F D	First dose
				S D	Second dose
				Z	Other (unknown)

Includes: Vaccination against 2019-new coronavirus acute respiratory disease
 Vaccination against coronavirus disease 2019
 Vaccination against COVID-19 virus

8.IM.70.HA-ZZ by intramuscular [IM] injection of agent or substance NEC

8.IN.^.^ Therapeutic Interventions Strengthening the Immune System and/or Genetic Composition against Influenza

8.IN.70.^ Immunization (to prevent) influenza

E 48

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 48	Optional	Dosage Schedule 1	Extent	A1	Adult dose (schedule) 1
				A2	Adult dose (schedule) 2
				A3	Adult dose (schedule) 3
				B X	Booster dose
				P1	Pediatric dose (schedule) 1
				P2	Pediatric dose (schedule) 2
				P3	Pediatric dose (schedule) 3
				P4	Pediatric dose (schedule) 4
				U	Unspecified

Includes: Vaccination against influenza

8.IN.70.BB-BA by inhalation (intranasal) of live (attenuated) virus
Includes: Cold-adapted influenza vaccine [CAIV], FluMist

8.IN.70.HA-BA by intramuscular [IM] injection of live (attenuated) virus
Includes: Fluzone, Vaxigrip, fluviral S/F

8.IN.70.HA-BB by intramuscular [IM] injection of whole virus

8.IN.70.HA-BC by intramuscular [IM] injection of inactivated virus group or strain NEC
Includes: Fluzone, Vaxigrip, fluviral S/F

8.IN.70.HA-BC-J by intramuscular [IM] injection of inactivated virus combination of two groups or strains (A & B)
Includes: Fluzone, Vaxigrip, fluviral S/F

8.JA.^^.^^ Therapeutic Interventions Strengthening the Immune System and/or Genetic Composition against Junin fever**8.JA.70.^^ Immunization (to prevent) Junin virus****E** 48

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 48	Optional	Dosage Schedule 1	Extent	A1	Adult dose (schedule) 1
				A2	Adult dose (schedule) 2
				A3	Adult dose (schedule) 3
				B X	Booster dose
				P1	Pediatric dose (schedule) 1
				P2	Pediatric dose (schedule) 2
				P3	Pediatric dose (schedule) 3
				P4	Pediatric dose (schedule) 4
				U	Unspecified

Includes: Vaccination against Junin fever

8.JA.70.HA-BA by intramuscular [IM] injection of live (attenuated) virus

Includes: Candid 1 AHF**8.LA.^^.^^ Therapeutic Interventions Strengthening the Immune System and/or Genetic Composition against Leishmaniasis****8.LA.70.^^ Immunization (to prevent) leishmaniasis****E** 48

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 48	Optional	Dosage Schedule 1	Extent	A1	Adult dose (schedule) 1
				A2	Adult dose (schedule) 2
				A3	Adult dose (schedule) 3
				B X	Booster dose
				P1	Pediatric dose (schedule) 1
				P2	Pediatric dose (schedule) 2
				P3	Pediatric dose (schedule) 3
				P4	Pediatric dose (schedule) 4
				U	Unspecified

Includes: Vaccination against leishmaniasis

8.LA.70.HB-BG by subcutaneous [SC] injection of inactivated (whole) bacteria (e.g. promastigotes and BCG)

8.LY.^.^ Therapeutic Interventions Strengthening the Immune System and/or Genetic Composition against Lyme Disease

8.LY.70.^.^ Immunization (to prevent) Lyme disease

E 48

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 48	Optional	Dosage Schedule 1	Extent	A1	Adult dose (schedule) 1
				A2	Adult dose (schedule) 2
				A3	Adult dose (schedule) 3
				B X	Booster dose
				P1	Pediatric dose (schedule) 1
				P2	Pediatric dose (schedule) 2
				P3	Pediatric dose (schedule) 3
				P4	Pediatric dose (schedule) 4
				U	Unspecified

Includes: Vaccination against Lyme disease

8.LY.70.HA-BH by intramuscular [IM] injection of inactivated split bacteria (e.g. OspA of B. burgdorferi)

8.MB.^.^ Therapeutic Interventions Strengthening the Immune System and/or Genetic Composition against Measles**8.MB.70.^.^ Immunization (to prevent) measles****E** 48

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 48	Optional	Dosage Schedule 1	Extent	A1	Adult dose (schedule) 1
				A2	Adult dose (schedule) 2
				A3	Adult dose (schedule) 3
				B X	Booster dose
				P1	Pediatric dose (schedule) 1
				P2	Pediatric dose (schedule) 2
				P3	Pediatric dose (schedule) 3
				P4	Pediatric dose (schedule) 4
				U	Unspecified

Includes: Vaccination against measles

Excludes: that with mumps (see [8.MW.70.^.](#))
that with mumps, rubella and varicella (see [8.MV.70.^.](#))
that with with mumps and rubella (see [8.MU.70.^.](#))

8.MB.70.HB-BA by subcutaneous [SC] injection of live (attenuated) virus

8.MD.^.^ Therapeutic Interventions Strengthening the Immune System and/or Genetic Composition against Mumps**8.MD.70.^.^ Immunization (to prevent) mumps****E** 48

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 48	Optional	Dosage Schedule 1	Extent	A1	Adult dose (schedule) 1
				A2	Adult dose (schedule) 2
				A3	Adult dose (schedule) 3
				B X	Booster dose
				P1	Pediatric dose (schedule) 1
				P2	Pediatric dose (schedule) 2
				P3	Pediatric dose (schedule) 3
				P4	Pediatric dose (schedule) 4
				U	Unspecified

Includes: Vaccination against mumps

Excludes: that with measles (see [8.MT.70.^.](#))
that with measles, rubella and varicella (see [8.MV.70.^.](#))
that with with measles and rubella (see [8.MU.70.^.](#))

8.MD.70.HB-BA by subcutaneous [SC] injection of live (attenuated) virus

8.MK.^.^ Therapeutic Interventions Strengthening the Immune System and/or Genetic Composition against Diphtheria and Tetanus**8.MK.70.^.^ Immunization (to prevent) diphtheria and tetanus****E** 48

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 48	Optional	Dosage Schedule 1	Extent	A1	Adult dose (schedule) 1
				A2	Adult dose (schedule) 2
				A3	Adult dose (schedule) 3
				B X	Booster dose
				P1	Pediatric dose (schedule) 1
				P2	Pediatric dose (schedule) 2
				P3	Pediatric dose (schedule) 3
				P4	Pediatric dose (schedule) 4
				U	Unspecified

Includes: Vaccination against diphtheria and tetanus (DT, Td)

Excludes: Immunization (to prevent) diphtheria alone (see [8.DP.70.^.](#))
Immunization (to prevent) diphtheria, tetanus and pertussis (see [8.MM.70.^.](#))
Immunization (to prevent) diphtheria, tetanus, pertussis and Haemophilus B influenza (see [8.MN.70.^.](#))
Immunization (to prevent) diphtheria, tetanus, pertussis and polio (see [8.MQ.70.^.](#))
Immunization (to prevent) diphtheria, tetanus, pertussis, Haemophilus B influenza and hepatitis B (see [8.MO.70.^.](#))
Immunization (to prevent) diphtheria, tetanus, pertussis, Haemophilus B influenza and polio (see [8.MR.70.^.](#))

8.MK.70.HA-BK by intramuscular [IM] injection of toxoid

8.MM.^.^ Therapeutic Interventions Strengthening the Immune System and/or Genetic Composition against Diphtheria, Tetanus and Pertussis**8.MM.70.^.^ Immunization (to prevent) diphtheria, tetanus and pertussis****E** 48

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 48	Optional	Dosage Schedule 1	Extent	A1	Adult dose (schedule) 1
				A2	Adult dose (schedule) 2
				A3	Adult dose (schedule) 3
				B X	Booster dose
				P1	Pediatric dose (schedule) 1
				P2	Pediatric dose (schedule) 2
				P3	Pediatric dose (schedule) 3
				P4	Pediatric dose (schedule) 4
				U	Unspecified

Includes: Vaccination against diphtheria, tetanus and pertussis

Excludes: that with Haemophilus B influenza (see [8.MN.70.^.](#))
that with Haemophilus B influenza and polio (see [8.MR.70.^.](#))
that with with polio (see [8.MQ.70.^.](#))

8.MM.70.HA-BL by intramuscular [IM] injection of toxoid and inactivated split bacteria
Includes: Diphtheria, tetanus and acellular pertussis [DTaP]

8.MM.70.HA-BM by intramuscular [IM] injection of toxoids and inactivated (whole) bacteria
Includes: Diphtheria, tetanus and pertussis [DTP]

8.MN.^^.^^ Therapeutic Interventions Strengthening the Immune System and/or Genetic Composition against Diphtheria, Tetanus, Pertussis and Haemophilus B Influenza**8.MN.70.^^ Immunization (to prevent) diphtheria, tetanus, pertussis and Haemophilus B influenza****E** 48

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 48	Optional	Dosage Schedule 1	Extent	A1	Adult dose (schedule) 1
				A2	Adult dose (schedule) 2
				A3	Adult dose (schedule) 3
				B X	Booster dose
				P1	Pediatric dose (schedule) 1
				P2	Pediatric dose (schedule) 2
				P3	Pediatric dose (schedule) 3
				P4	Pediatric dose (schedule) 4
				U	Unspecified

Includes: Vaccination against diphtheria, tetanus, pertussis and Haemophilus B influenza

8.MN.70.HA-BN	by intramuscular [IM] injection of toxoids, inactivated (whole) bacteria and bacterial polysaccharide
	Includes: Diphtheria, tetanus, pertussis and Haemophilus B influenza [DTP-Hib]
8.MN.70.HA-BO	by intramuscular [IM] injection of toxoids, inactivated split bacteria and bacterial polysaccharide
	Includes: Diphtheria, tetanus, acellular pertussis and Haemophilus B influenza [DTaP-Hib]
8.MN.70.HZ-CC	by injection targeting (specific) site of monoclonal antibodies

8.MO.^.^ Therapeutic Interventions Strengthening the Immune System and/or Genetic Composition against Diphtheria, Tetanus, Pertussis, Haemophilus B Influenza and Hepatitis B**8.MO.70.^.^ Immunization (to prevent) diphtheria, tetanus, pertussis, Haemophilus B influenza and hepatitis B****E** 48

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 48	Optional	Dosage Schedule 1	Extent	A1	Adult dose (schedule) 1
				A2	Adult dose (schedule) 2

				B X	Booster dose
				P1	Pediatric dose (schedule) 1
				P2	Pediatric dose (schedule) 2
				P3	Pediatric dose (schedule) 3
				P4	Pediatric dose (schedule) 4
				U	Unspecified

Includes: Vaccination against DTP-Hib-HepB

Excludes: Immunization (to prevent) diphtheria alone (see [8.DP.70.^.](#))
Immunization (to prevent) diphtheria and tetanus (see [8.MK.70.^.](#))
Immunization (to prevent) diphtheria, tetanus and pertussis (see [8.MM.70.^.](#))
Immunization (to prevent) diphtheria, tetanus, pertussis and Haemophilus B influenza (see [8.MN.70.^.](#))
Immunization (to prevent) diphtheria, tetanus, pertussis and polio (see [8.MQ.70.^.](#))
Immunization (to prevent) diphtheria, tetanus, pertussis, Haemophilus B influenza and polio (see [8.MR.70.^.](#))

8.MO.70.HA-BT-B type B by intramuscular [IM] injection of toxoid, inactivated (whole) bacteria, bacterial polysaccharide, inactivated viral antigen

8.MQ.^.^ Therapeutic Interventions Strengthening the Immune System and/or Genetic Composition against Diphtheria, Tetanus, Pertussis and Polio**8.MQ.70.^ Immunization (to prevent) diphtheria, tetanus, pertussis and polio****E** 48

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 48	Optional	Dosage Schedule 1	Extent	A1	Adult dose (schedule) 1
				A2	Adult dose (schedule) 2
				A3	Adult dose (schedule) 3
				B X	Booster dose
				P1	Pediatric dose (schedule) 1
				P2	Pediatric dose (schedule) 2
				P3	Pediatric dose (schedule) 3
				P4	Pediatric dose (schedule) 4
				U	Unspecified

Includes: Vaccination against diphtheria, tetanus, pertussis and polio

8.MQ.70.HA-BR by intramuscular [IM] injection of toxoid, inactivated split bacteria and inactivated virus
Includes: Diphtheria, tetanus, acellular pertussis, inactivated polio virus [DTaP-IPV]

8.MR.^.^ Therapeutic Interventions Strengthening the Immune System and/or Genetic Composition against Diphtheria, Tetanus, Pertussis, Polio and Haemophilus B Influenza**8.MR.70.^.^ Immunization (to prevent) diphtheria, tetanus, pertussis, polio and Haemophilus B influenza****E** 48

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 48	Optional	Dosage Schedule 1	Extent	A1	Adult dose (schedule) 1
				A2	Adult dose (schedule) 2
				A3	Adult dose (schedule) 3
				B X	Booster dose
				P1	Pediatric dose (schedule) 1
				P2	Pediatric dose (schedule) 2
				P3	Pediatric dose (schedule) 3
				P4	Pediatric dose (schedule) 4
				U	Unspecified

Includes: Vaccination against diphtheria, tetanus, pertussis, polio and Haemophilus B influenza

8.MR.70.HA-BS by intramuscular [IM] injection of toxoids, inactivated bacteria, bacterial polysaccharide & inactivated virus
Includes: Diphtheria, acellular pertussis, tetanus, polio and Haemophilus B influenza [DaPTP-Hib]

8.MS.^.^ Therapeutic Interventions Strengthening the Immune System and/or Genetic Composition against Haemophilus Influenza and Hepatitis**8.MS.70.^.^ Immunization (to prevent) haemophilus influenza and hepatitis****E** 48

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 48	Optional	Dosage Schedule 1	Extent	A1	Adult dose (schedule) 1
				A2	Adult dose (schedule) 2
				A3	Adult dose (schedule) 3
				B X	Booster dose
				P1	Pediatric dose (schedule) 1
				P2	Pediatric dose (schedule) 2
				P3	Pediatric dose (schedule) 3
				P4	Pediatric dose (schedule) 4
				U	Unspecified

Includes: Vaccination against haemophilus influenza and hepatitis [Hib-HEP, Hib-HB]

Excludes: that with diphtheria, tetanus and pertussis (see [8.MO.70.^.](#))

8.MS.70.HA-BV-B by intramuscular [IM] injection of bacterial polysaccharide and inactivated viral antigen type B (Hib HEP B)

8.MT.^.^ Therapeutic Interventions Strengthening the Immune System and/or Genetic Composition against Measles and Rubella [MR]**8.MT.70.^.^ Immunization (to prevent) measles and rubella****E** 48

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 48	Optional	Dosage Schedule 1	Extent	A1	Adult dose (schedule) 1
				A2	Adult dose (schedule) 2
				A3	Adult dose (schedule) 3
				B X	Booster dose
				P1	Pediatric dose (schedule) 1
				P2	Pediatric dose (schedule) 2
				P3	Pediatric dose (schedule) 3
				P4	Pediatric dose (schedule) 4
				U	Unspecified

Includes: Vaccination against measles and rubella [MR]**Excludes:** that with mumps [MMR] (see [8.MU.70.^.](#))
that with mumps and varicella [MMRV](see [8.MV.70.^.](#))

8.MT.70.HB-BA by subcutaneous [SC] injection of live (attenuated) virus

8.MU.^.^ Therapeutic Interventions Strengthening the Immune System and/or Genetic Composition against Measles, Mumps and Rubella [MMR]**8.MU.70.^.^ Immunization (to prevent) measles, mumps and rubella****E** 48

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 48	Optional	Dosage Schedule 1	Extent	A1	Adult dose (schedule) 1
				A2	Adult dose (schedule) 2
				A3	Adult dose (schedule) 3
				B X	Booster dose
				P1	Pediatric dose (schedule) 1
				P2	Pediatric dose (schedule) 2
				P3	Pediatric dose (schedule) 3
				P4	Pediatric dose (schedule) 4
				U	Unspecified

Includes: Vaccination against measles, mumps and rubella [MMR]**Excludes:** that with varicella (see [8.MV.70.^.](#))

8.MU.70.HB-BA by subcutaneous [SC] injection of live (attenuated) virus

8.MV.^^.^^ Therapeutic Intervention Strengthening Immune System and/or Genetic Composition against Measles, Mumps, Rubella and Varicella [MMRV]**8.MV.70.^^ Immunization (to prevent) measles, mumps, rubella and varicella [MMRV]****E** 48

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 48	Optional	Dosage Schedule 1	Extent	A1	Adult dose (schedule) 1
				A2	Adult dose (schedule) 2
				A3	Adult dose (schedule) 3
				B X	Booster dose
				P1	Pediatric dose (schedule) 1
				P2	Pediatric dose (schedule) 2
				P3	Pediatric dose (schedule) 3
				P4	Pediatric dose (schedule) 4
				U	Unspecified

Includes: Vaccination against measles, mumps, rubella and varicella [MMRV]

8.MV.70.HB-BA by subcutaneous [SC] injection of live (attenuated) virus

8.MW.^^.^^ Therapeutic Interventions Strengthening the Immune System and/or Genetic Composition against Measles and Mumps**8.MW.70.^^ Immunization (to prevent) measles and mumps****E** 48

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 48	Optional	Dosage Schedule 1	Extent	A1	Adult dose (schedule) 1
				A2	Adult dose (schedule) 2
				A3	Adult dose (schedule) 3
				B X	Booster dose
				P1	Pediatric dose (schedule) 1
				P2	Pediatric dose (schedule) 2
				P3	Pediatric dose (schedule) 3
				P4	Pediatric dose (schedule) 4
				U	Unspecified

- Includes:** BIAVAX II vaccination
Vaccination against measles and mumps
- Excludes:** that with rubella (see [8.MU.70.^^](#))
that with rubella and varicella [MMRV] (see [8.MV.70.^^](#))

8.MW.70.BA-BA by oral intake [po] of live (attenuated) virus
8.MW.70.HA-BA by intramuscular [IM] injection of live (attenuated) virus

8.NZ.^^.^^ Therapeutic Interventions Strengthening the Immune System and/or Genetic Composition against (growth of) Neoplasm

8.NZ.70.^^ Immunization (to prevent growth of) neoplasm

E 48

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 48	Optional	Dosage Schedule 1	Extent	A1	Adult dose (schedule) 1
				A2	Adult dose (schedule) 2
				A3	Adult dose (schedule) 3
				B X	Booster dose
				P1	Pediatric dose (schedule) 1
				P2	Pediatric dose (schedule) 2
				P3	Pediatric dose (schedule) 3
				P4	Pediatric dose (schedule) 4
				U	Unspecified

- Includes:** Immunotherapy tumor
Oncogenic vaccination against neoplastic growth (e.g. melanoma)
Strengthening the immune system against (growth of) neoplasm (any site)

8.NZ.70.HZ-CC by injection targeting (specific) site of monoclonal antibodies
Includes: Injection of Alemtuzumab, Cetuximab, Ipilimumab, Rituximab, Trastuzumab for treatment of neoplasm (e.g. breast cancer, leukemia, lymphoma, melanoma)
 Monoclonal antibody (mAb) immunotherapy to stimulate T cell response and prevent neoplastic growth
Code Also: Concomitant administration of monoclonal antibodies for chemotherapy (see [1.ZZ.35.HA-M5](#)) or [1.ZZ.35.HA-M9](#))

8.NZ.70.HZ-CD by injection targeting (specific) site of chimeric live antigen
Includes: Chimeric antigen receptor T cell (CAR-T) therapy allowing T-cells to detect and kill cancer-carrying cells
 Injection of Tisagenlecleucel

8.PA.^.^ Therapeutic Interventions Strengthening the Immune System and/or Genetic Composition against Pertussis**8.PA.70.^.^ Immunization (to prevent) pertussis****E** 48

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 48	Optional	Dosage Schedule 1	Extent	A1	Adult dose (schedule) 1
				A2	Adult dose (schedule) 2
				A3	Adult dose (schedule) 3
				B X	Booster dose
				P1	Pediatric dose (schedule) 1
				P2	Pediatric dose (schedule) 2
				P3	Pediatric dose (schedule) 3
				P4	Pediatric dose (schedule) 4
				U	Unspecified

Includes: Vaccination against pertussis**Excludes:** that with diphtheria and tetanus [DTP, DTaP, Tdap] (see [8.MM.70.^.](#))that with diphtheria, tetanus and polio (see [8.MQ.70.^.](#))that with diphtheria, tetanus, polio and Haemophilus influenza [DTP-Hib, DTaP-Hib] (see [8.MR.70.^.](#))**8.PA.70.HA-BH** by intramuscular [IM] injection of inactivated split bacteria (acellular pertussis)

8.PB.^.^ Therapeutic Interventions Strengthening the Immune System and/or Genetic Composition against Plague**8.PB.70.^.^ Immunization (to prevent) plague****E** 48

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 48	Optional	Dosage Schedule 1	Extent	A1	Adult dose (schedule) 1
				A2	Adult dose (schedule) 2
				A3	Adult dose (schedule) 3
				B X	Booster dose
				P1	Pediatric dose (schedule) 1
				P2	Pediatric dose (schedule) 2
				P3	Pediatric dose (schedule) 3
				P4	Pediatric dose (schedule) 4
				U	Unspecified

Includes: Vaccination against plague

8.PB.70.HA-BG by intramuscular [IM] injection of inactivated (whole) bacteria

8.PC.^.^ Therapeutic Interventions Strengthening the Immune System and/or Genetic Composition against Poliovirus (Poliomyelitis)**8.PC.70.^.^ Immunization (to prevent) poliovirus (poliomyelitis)****E** 48

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 48	Optional	Dosage Schedule 1	Extent	A1	Adult dose (schedule) 1
				A2	Adult dose (schedule) 2
				A3	Adult dose (schedule) 3
				B X	Booster dose
				P1	Pediatric dose (schedule) 1
				P2	Pediatric dose (schedule) 2
				P3	Pediatric dose (schedule) 3
				P4	Pediatric dose (schedule) 4
				U	Unspecified

Includes: Vaccination against polio
Excludes: that with diphtheria, tetanus and pertussis (see [8.MQ.70.^^](#))
 that with diphtheria, tetanus, pertussis and Haemophilus influenza (see [8.MR.70.^^](#))

8.PC.70.BA-BA by oral intake [po] of live (attenuated) polio virus [OPV]
 8.PC.70.HB-BC by subcutaneous [SC] injection of inactivated (polio) virus [IPV]

8.PD.^^.^^ Therapeutic Interventions Strengthening the Immune System and/or Genetic Composition against Orthopoxvirus

8.PD.70.^^ Immunization (to prevent) orthopoxvirus

E 48

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 48	Optional	Dosage Schedule 1	Extent	A1	Adult dose (schedule) 1
				A2	Adult dose (schedule) 2
				A3	Adult dose (schedule) 3
				B X	Booster dose
				P1	Pediatric dose (schedule) 1
				P2	Pediatric dose (schedule) 2
				P3	Pediatric dose (schedule) 3
				P4	Pediatric dose (schedule) 4
				U	Unspecified

Includes: Immunization (to prevent) vaccinia
 Vaccination against small pox, monkeypox, cowpox, vaccinia, variola

8.PD.70.HA-BW by intramuscular [IM] injection of (passive) immunoglobulin [VIG]
Includes: VIG
 8.PD.70.HC-BA by intradermal injection of live (attenuated) virus
Includes: DryVAX
 8.PD.70.HC-BY by intradermal injection of live diluted (super attenuated) virus
Includes: VACV

8.PF.^.^ Therapeutic Interventions Strengthening the Immune System and/or Genetic Composition against Fall Eastern Pollen (Allergy)**8.PF.10.^.^ Essence dilution (to strengthen against) fall eastern pollen (allergy)****E** 48

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 48	Optional	Dosage Schedule 1	Extent	A1	Adult dose (schedule) 1
				A2	Adult dose (schedule) 2
				A3	Adult dose (schedule) 3
				B X	Booster dose
				P1	Pediatric dose (schedule) 1
				P2	Pediatric dose (schedule) 2
				P3	Pediatric dose (schedule) 3
				P4	Pediatric dose (schedule) 4
				U	Unspecified

Includes: Desensitization to fall eastern pollen
 Fall eastern pollen allergen immunotherapy
 Homeopathic treatment, fall eastern pollen

8.PF.10.HB-PE by subcutaneous [SC] injection of plant extract

8.PG.^.^ Therapeutic Interventions Strengthening the Immune System and/or Genetic Composition against Fall Western Pollen (Allergy)**8.PG.10.^.^ Essence dilution (to strengthen against) fall western pollen (allergy)****E** 48

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 48	Optional	Dosage Schedule 1	Extent	A1	Adult dose (schedule) 1
				A2	Adult dose (schedule) 2
				A3	Adult dose (schedule) 3
				B X	Booster dose
				P1	Pediatric dose (schedule) 1
				P2	Pediatric dose (schedule) 2
				P3	Pediatric dose (schedule) 3
				P4	Pediatric dose (schedule) 4
				U	Unspecified

Includes: Desensitization to fall western pollen
Fall western pollen allergen immunotherapy
Homeopathic treatment, fall western pollen

8.PG.10.HB-PE by subcutaneous [SC] injection of plant extract

8.PH.^.^ Therapeutic Interventions Strengthening the Immune System and/or Genetic Composition against Pacific Grasses and Weeds Pollen (Allergy)**8.PH.10.^.^ Essence dilution (to strengthen against) pacific grasses and weeds pollen (allergy)****E** 48

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 48	Optional	Dosage Schedule 1	Extent	A1	Adult dose (schedule) 1
				A2	Adult dose (schedule) 2
				A3	Adult dose (schedule) 3
				B X	Booster dose
				P1	Pediatric dose (schedule) 1
				P2	Pediatric dose (schedule) 2
				P3	Pediatric dose (schedule) 3
				P4	Pediatric dose (schedule) 4
				U	Unspecified

Includes: Desensitization to pacific grasses and weeds pollen
Homeopathic treatment, pacific grass and weed pollen
Pacific grass and weed pollen allergen immunotherapy

8.PH.10.HB-PE by subcutaneous [SC] injection of plant extract

8.PJ.^.^ Therapeutic Interventions Strengthening the Immune System and/or Genetic Composition against Pacific Tree Pollen (Allergy)**8.PJ.10.^.^ Essence dilution (to strengthen against) pacific tree pollen (allergy)****E** 48

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 48	Optional	Dosage Schedule 1	Extent	A1	Adult dose (schedule) 1
				A2	Adult dose (schedule) 2
				A3	Adult dose (schedule) 3
				B X	Booster dose
				P1	Pediatric dose (schedule) 1
				P2	Pediatric dose (schedule) 2
				P3	Pediatric dose (schedule) 3
				P4	Pediatric dose (schedule) 4
				U	Unspecified

Includes: Desensitization to pacific tree pollen
Homeopathic treatment, pacific tree pollen
Pacific tree pollen allergen immunotherapy

8.PJ.10.HB-PE by subcutaneous [SC] injection of plant extract

8.PS.^.^ Therapeutic Interventions Strengthening the Immune System and/or Genetic Composition against Summer Pollen (Allergy)**8.PS.10.^.^ Essence dilution (to strengthen against) summer pollen (allergy)****E** 48

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 48	Optional	Dosage Schedule 1	Extent	A1	Adult dose (schedule) 1
				A2	Adult dose (schedule) 2
				A3	Adult dose (schedule) 3
				B X	Booster dose
				P1	Pediatric dose (schedule) 1
				P2	Pediatric dose (schedule) 2
				P3	Pediatric dose (schedule) 3
				P4	Pediatric dose (schedule) 4
				U	Unspecified

Includes: Desensitization to summer pollen
Homeopathic treatment, summer pollen
Summer pollen allergen immunotherapy

8.PS.10.HB-PE by subcutaneous [SC] injection of plant extract

8.PX.^.^ Therapeutic Interventions Strengthening the Immune System and/or Genetic Composition against Insect Venom**8.PX.10.^.^ Essence dilution (to strengthen against) insect venom (allergy)****E** 48

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 48	Optional	Dosage Schedule 1	Extent	A1	Adult dose (schedule) 1
				A2	Adult dose (schedule) 2
				A3	Adult dose (schedule) 3
				B X	Booster dose
				P1	Pediatric dose (schedule) 1
				P2	Pediatric dose (schedule) 2
				P3	Pediatric dose (schedule) 3
				P4	Pediatric dose (schedule) 4
				U	Unspecified

Includes: Bee venom allergen immunotherapy
Desensitization to bee venom

Excludes: Antidote (post-exposure) for allergy to insect venom (see [8.VN.70.^.](#))

8.PX.10.HB-BI by subcutaneous [SC] injection of venom

8.RA.^.^ Therapeutic Interventions Strengthening the Immune System and/or Genetic Composition against Rabies**8.RA.70.^.^ Immunization (to prevent) rabies****E** 48

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 48	Optional	Dosage Schedule 1	Extent	A1	Adult dose (schedule) 1
				A2	Adult dose (schedule) 2
				A3	Adult dose (schedule) 3
				B X	Booster dose
				P1	Pediatric dose (schedule) 1
				P2	Pediatric dose (schedule) 2
				P3	Pediatric dose (schedule) 3
				P4	Pediatric dose (schedule) 4
				U	Unspecified

Includes: Prophylactic inoculation against rabies (post-exposure)
Vaccination against rabies [RAB]

8.RA.70.HA-BC	by intramuscular [IM] injection of inactivated virus [RVA]
8.RA.70.HA-BW	by intramuscular [IM] injection of (passive) immunoglobulin [HRIG] (unvaccinated, post-exposure)
8.RA.70.HC-BC	by intradermal injection of inactivated virus [HDCV]

8.RB.^.^ Therapeutic Interventions Strengthening the Immune System and/or Genetic Composition against Respiratory Syncytial Virus [RSV]

8.RB.70.^.^ Immunization (to prevent) respiratory syncytial virus [RSV]

E 48

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 48	Optional	Dosage Schedule 1	Extent	A1	Adult dose (schedule) 1
				A2	Adult dose (schedule) 2
				A3	Adult dose (schedule) 3
				B X	Booster dose
				P1	Pediatric dose (schedule) 1
				P2	Pediatric dose (schedule) 2
				P3	Pediatric dose (schedule) 3
				P4	Pediatric dose (schedule) 4
				U	Unspecified

Includes: Immunization (to prevent) human metapneumovirus [hMPV]
Immunization against parainfluenza-3 [PIV-3]
Vaccination against RSV

8.RB.70.HA-BA	by intramuscular [IM] injection of live (attenuated) virus
8.RB.70.HA-BC	by intramuscular [IM] injection of inactivated virus
8.RB.70.HA-CC	by intramuscular [IM] injection of monoclonal antibody (e.g. palivizumab, Synagis)

8.RC.^^.^^ Therapeutic Interventions Strengthening the Immune System and/or Genetic Composition against Rubella**8.RC.70.^^ Immunization (to prevent) rubella**

Includes: Vaccination against rubella
Excludes: that with measles [MR] (see [8.MT.70.^^](#))
 that with measles, mumps and varicella [MMRV] (see [8.MV.70.^^](#))
 that with with measles and mumps [MMR] (see [8.MU.70.^^](#))

8.RC.70.HB-BA by subcutaneous [SC] injection of live (attenuated) virus

8.RO.^^.^^ Therapeutic Interventions Strengthening the Immune System and/or Genetic Composition against Rotavirus**8.RO.70.^^ Immunization (to prevent) rotavirus****E** 48

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 48	Optional	Dosage Schedule 1	Extent	A1	Adult dose (schedule) 1
				A2	Adult dose (schedule) 2
				A3	Adult dose (schedule) 3
				B X	Booster dose
				P1	Pediatric dose (schedule) 1
				P2	Pediatric dose (schedule) 2
				P3	Pediatric dose (schedule) 3
				P4	Pediatric dose (schedule) 4
				U	Unspecified

Includes: Vaccination against rotavirus

8.RO.70.BA-BA by oral intake [PO] of live (attenuated) virus

8.TA.^.^ Therapeutic Interventions Strengthening the Immune System and/or Genetic Composition against Tetanus**8.TA.70.^ Immunization (to prevent) tetanus****E** 48

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 48	Optional	Dosage Schedule 1	Extent	A1	Adult dose (schedule) 1
				A2	Adult dose (schedule) 2
				A3	Adult dose (schedule) 3
				B X	Booster dose
				P1	Pediatric dose (schedule) 1
				P2	Pediatric dose (schedule) 2
				P3	Pediatric dose (schedule) 3
				P4	Pediatric dose (schedule) 4
				U	Unspecified

Includes: Prophylactic inoculation against tetanus (post-exposure)
Vaccination against tetanus

Excludes: that with diphtheria and pertussis (see [8.MM.70.^](#))
that with diphtheria, pertussis and polio (see [8.MQ.70.^](#))
that with diphtheria, pertussis, polio and Haemophilus influenza (see [8.MR.70.^](#))

8.TA.70.HA-BK by intramuscular [IM] injection of toxoid (pre-exposure)
8.TA.70.HA-BW by intramuscular [IM] injection of (passive) immunoglobulin [TIG] (post-exposure)

8.TB.^.^ Therapeutic Interventions Strengthening the Immune System and/or Genetic Composition against Tuberculosis**8.TB.70.^.^ Immunization (to prevent) tuberculosis [TB]****E** 48

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 48	Optional	Dosage Schedule 1	Extent	A1	Adult dose (schedule) 1
				A2	Adult dose (schedule) 2
				A3	Adult dose (schedule) 3
				B X	Booster dose
				P1	Pediatric dose (schedule) 1
				P2	Pediatric dose (schedule) 2
				P3	Pediatric dose (schedule) 3
				P4	Pediatric dose (schedule) 4
				U	Unspecified

Includes: Immunization by Bacillus Calmette Guerin [BCG]
Vaccination against mycobacterium tuberculosis
Vaccination against tuberculosis (and leprosy)

8.TB.70.HB-BF	by subcutaneous [SC] injection of live (attenuated) bacteria
8.TB.70.HC-BF	by intradermal injection of live (attenuated) bacteria

8.TC.^^.^^ Therapeutic Interventions Strengthening the Immune System and/or Genetic Composition against Tularemia**8.TC.70.^^ Immunization (to prevent) tularemia****E** 48

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 48	Optional	Dosage Schedule 1	Extent	A1	Adult dose (schedule) 1
				A2	Adult dose (schedule) 2
				A3	Adult dose (schedule) 3
				B X	Booster dose
				P1	Pediatric dose (schedule) 1
				P2	Pediatric dose (schedule) 2
				P3	Pediatric dose (schedule) 3
				P4	Pediatric dose (schedule) 4
				U	Unspecified

Includes: Vaccination against tularemia

8.TC.70.HA-BF by intramuscular [IM] injection of live (attenuated) bacteria

8.TD.^^.^^ Therapeutic Interventions Strengthening the Immune System and/or Genetic Composition against Typhoid Fever**8.TD.70.^^ Immunization (to prevent) typhoid fever****E** 48

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 48	Optional	Dosage Schedule 1	Extent	A1	Adult dose (schedule) 1
				A2	Adult dose (schedule) 2
				A3	Adult dose (schedule) 3
				B X	Booster dose
				P1	Pediatric dose (schedule) 1
				P2	Pediatric dose (schedule) 2
				P3	Pediatric dose (schedule) 3
				P4	Pediatric dose (schedule) 4
				U	Unspecified

Includes: Vaccination against typhoid fever

8.TD.70.BA-BF	by oral intake [po] of live (attenuated) bacteria [Ty21a, Vivotif]
8.TD.70.BA-BG	by oral intake [po] of inactivated (whole) bacteria
8.TD.70.HA-BF	by intramuscular [IM] injection of live (attenuated) bacteria
	Includes: Typhim VI
8.TD.70.HA-BU	by intramuscular [IM] injection of capsular polysaccharide [VICPS]

8.VA.^^.^^ Therapeutic Interventions Strengthening the Immune System and/or Genetic Composition against Varicella

8.VA.70.^^ Immunization (to prevent) varicella

E 48

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 48	Optional	Dosage Schedule 1	Extent	A1	Adult dose (schedule) 1
				A2	Adult dose (schedule) 2
				A3	Adult dose (schedule) 3
				B X	Booster dose
				P1	Pediatric dose (schedule) 1
				P2	Pediatric dose (schedule) 2
				P3	Pediatric dose (schedule) 3
				P4	Pediatric dose (schedule) 4
				U	Unspecified

Includes: Immunization (to prevent) herpes zoster
Prophylactic inoculation against varicella zoster (post-exposure)
Vaccination against varicella

Excludes: that with measles, mumps and rubella (see [8.MV.70.^^](#))

8.VA.70.HA-BW	by intramuscular [IM] injection of (passive) immunoglobulin [VZIG]
8.VA.70.HB-BA	by subcutaneous [SC] injection of live (attenuated) virus [VZ]
	Includes: Zostavax

8.VN.^^.^^ Therapeutic Interventions Strengthening the Immune System and/or Genetic Composition against Venomous Bite**8.VN.70.^^ Immunization (to treat) venomous bite****E** 48

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 48	Optional	Dosage Schedule 1	Extent	A1	Adult dose (schedule) 1
				A2	Adult dose (schedule) 2
				A3	Adult dose (schedule) 3
				B X	Booster dose
				P1	Pediatric dose (schedule) 1
				P2	Pediatric dose (schedule) 2
				P3	Pediatric dose (schedule) 3
				P4	Pediatric dose (schedule) 4
				U	Unspecified

Includes: Administration of anti-venom (post-exposure)
Antidote for venomous bite (e.g. bee, insect, snake)

Excludes: Allergy immunotherapy to strengthen resistance against insect venom (pre-exposure (see [8.PX.10.^^](#)))

8.VN.70.GR-BZ by intravenous [IV] injection of (passive) antivenin
8.VN.70.HA-BZ by intramuscular [IM] injection of (passive) antivenin

8.YA.^.^ Therapeutic Interventions Strengthening the Immune System and/or Genetic Composition against Yellow Fever**8.YA.70.^.^ Immunization (to prevent) yellow fever****E** 48

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 48	Optional	Dosage Schedule 1	Extent	A1	Adult dose (schedule) 1
				A2	Adult dose (schedule) 2
				A3	Adult dose (schedule) 3
				B X	Booster dose
				P1	Pediatric dose (schedule) 1
				P2	Pediatric dose (schedule) 2
				P3	Pediatric dose (schedule) 3
				P4	Pediatric dose (schedule) 4
				U	Unspecified

Includes: Vaccination against yellow fever

8.YA.70.HB-BA by subcutaneous [SC] injection of live (attenuated) virus

8.ZZ.^.^ Therapeutic Interventions Strengthening the Immune System and/or Genetic Composition against Immune Disorder NEC**8.ZZ.10.^.^ Essence dilution (to strengthen against) immune disorder NEC****E** 48

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 48	Optional	Dosage Schedule 1	Extent	A1	Adult dose (schedule) 1
				A2	Adult dose (schedule) 2
				A3	Adult dose (schedule) 3
				B X	Booster dose
				P1	Pediatric dose (schedule) 1
				P2	Pediatric dose (schedule) 2
				P3	Pediatric dose (schedule) 3
				P4	Pediatric dose (schedule) 4
				U	Unspecified

- Includes:** Desensitization to allergy NEC
Immunotherapy NOS
- Excludes:** Administration of antidote to venomous bite (e.g. insect, snake) (see [8.VN.70.^](#))
Administration of immunoglobulin (see [8.ZZ.70.^](#))
Desensitization to insect venom (see [8.PX.10.^](#))
Desensitization to summer pollen (see Immunotherapy in Index for various types of pollen) (see [8.PS.10.^](#))

- 8.ZZ.10.BA-ZZ by oral intake [po] of agent or substance NEC
Includes: Homeopathy NEC
- 8.ZZ.10.GR-ZZ by intravenous [IV] injection of agent or substance NEC
- 8.ZZ.10.HB-ZZ by subcutaneous [SC] injection of agent or substance NEC

8.ZZ.70.^ Immunization (to prevent) immune disorder NEC**E** 48

Attribute Reference Number	Attribute Optional or Mandatory	Attribute Reference Description	Attribute Type	Attribute Code	Attribute Description
E 48	Optional	Dosage Schedule 1	Extent	A1	Adult dose (schedule) 1
				A2	Adult dose (schedule) 2

Laryngopharyngectomy

- partial [1.GE.87.^](#)
- radical (with or without thyroidectomy or partial esophagectomy) [1.GE.91.^](#)

Laryngoscopy (for inspection) [2.GE.70.^](#)

- with biopsy [2.GE.71.^](#)

Laryngostomy [1.GJ.77.^](#)**Laryngotracheoplasty** [1.GH.84.^](#)**Laryngotracheostomy** [1.GJ.77.^](#)**Laryngotracheotomy** [1.GJ.77.^](#)**Laser**

- as operative device/technique (see [Destruction, by site \(or see specific intervention, by site\)](#))
- assisted optical biopsy (see [Inspection, by site](#))
- low intensity therapy (for photochemical effect) (see [Therapy, by site](#))
- placenta therapy [5.FH.76.^](#)
- sclerostomy [1.CD.52.^](#)
- sculpting, cornea [1.CC.84.^](#)
- therapy (for treatment of skin conditions) (see [Destruction, skin, by site](#))
- trabeculoplasty [1.CJ.52.^](#)

LASIK [laser assisted in situ keratomileusis] [1.CC.84.^](#)**Lateralization**

- nerve (see [Release, nerves, by site](#))
- – inferior alveolar [1.BB.72.^](#)
- vocal folds [1.GA.74.^](#)

Lavage (see also [Pharmacotherapy, by site](#))

- abdominal cavity [1.OT.35.^](#)
- bronchoalveolar [1.GM.35.^](#)
- bronchus [1.GM.35.^](#)
- colonic [1.NP.35.^](#)
- conjunctiva [1.CS.35.^](#)
- gastric [1.NF.35.^](#)
- lung [1.GT.35.^](#)
- – lobe (of) [1.GR.35.^](#)
- oropharynx [1.FX.35.^](#)
- peritoneal cavity [1.OT.35.^](#)
- peritonsillar region [1.FR.35.^](#)
- pharynx [1.FX.35.^](#)
- sinus(es)
 - – paranasal [1.EY.35.^](#)
- trachea [1.GJ.35.^](#)
- wound (see [Irrigation, soft tissue or skin, by site](#))

Lecompte repair [1.HP.76.^](#)**Leech therapy**

- breast [1.YM.12.^](#)
- skin
 - – abdomen [1.YS.12.^](#)
 - – arm [1.YT.12.^](#)
 - – back [1.YS.12.^](#)
 - – breast [1.YS.12.^](#)
 - – chest [1.YS.12.^](#)
 - – ear [1.YC.12.^](#)
 - – face [1.YF.12.^](#)
 - – foot [1.YW.12.^](#)
 - – forehead [1.YB.12.^](#)
 - – hand [1.YU.12.^](#)
 - – leg [1.YV.12.^](#)
 - – NEC [1.YZ.12.^](#)
 - – neck [1.YG.12.^](#)
 - – nose [1.YD.12.^](#)
 - – scalp [1.YA.12.^](#)
 - – total body (multiple sites of) [1.YZ.12.^](#)
 - – trunk [1.YS.12.^](#)

Lengthening

- bones (see [Repair, by lengthening, by site](#))
- – femur, using osseodistraction [1.VC.79.^](#)
- – humerus, using osseodistraction [1.TK.79.^](#)

- mandible, using osseodistractor [1.EE.79.^](#)
- maxilla, using osseodistractor [1.ED.79.^](#)
- metacarpal, using osseodistractor
 - first [1.UE.79.^](#)
 - other [1.UF.79.^](#)
- using osteotomy alone
 - first [1.UE.80.^](#)
 - other [1.UF.80.^](#)
- metatarsal, using osseodistractor
 - first [1.WI.79.^](#)
 - other [1.WJ.79.^](#)
- using osteotomy alone
 - first [1.WI.80.^](#)
 - other [1.WJ.80.^](#)
- phalanx of hand, using osteotomy alone
 - first [1.UJ.80.^](#)
 - other [1.UJ.80.^](#)
- radius and ulna, using osseodistractor [1.TV.79.^](#)
- tibia and fibula, using osseodistractor [1.VQ.79.^](#)
- eyelid [1.CX.80.^](#)
- joint, joints
 - elbow [1.TM.79.^](#)
 - ulnar (distal), using osseodistractor [1.UC.79.^](#)
- muscles (see [Repair, muscles, by site](#))
- of neck (for torticollis) [1.EP.72.^](#)
- tendons (see [Repair, tendons, by site](#))
- Achilles [1.WT.79.^](#)
- ankle and foot [1.WT.79.^](#)
- Lensectomy (see also [Excision, lens, by type](#))**
 - pars plana [1.CL.89.^](#)
 - trans limbal (bi manual) [1.CL.89.^](#)
- Lesioning (see also [Destruction, nerve, by site](#))**
 - nerve
 - calcaneal [1.BT.59.^](#)
- Leucotomy, inferior [limbic] [fronto medial] [1.AN.59.^](#)**
 - using radiosurgery "gamma knife" technique [1.AN.27.^](#)
- Leukapheresis, leukopheresis**
 - for procurement of blood component (for transfusion or manufacturing) [1.LZ.58.^](#)
 - for therapeutic removal of disease involved blood component [1.LZ.20.^](#)
- Levatoroplasty, anal [1.NT.80.^](#)**
- Lift**
 - breast [1.YM.74.^](#)
 - buttock [1.YS.74.^](#)
 - cheek [1.YF.74.^](#)
 - eyebrow (by direct excision) [1.YB.74.^](#)
 - face (with or without neck lift) [1.YF.74.^](#)
 - fanny [1.YS.74.^](#)
 - forehead, coronal [eyebrow] [1.YB.74.^](#)
 - lip [1.YE.74.^](#)
 - neck [1.YG.74.^](#)
 - with facelift [1.YF.74.^](#)
 - thigh [1.YV.74.^](#)
- Ligation (see also [Occlusion, by site](#))**
 - blood vessels (see [Occlusion, blood vessels, by site](#))
 - dermal appendage (see [Destruction, skin, by site](#))
 - ducts
 - Stensen's [1.FM.51.^](#)
 - sublingual [1.FL.51.^](#)
 - Wharton's [1.FN.51.^](#)
 - ductus arteriosus (patent) [1.IM.51.^](#)
 - hemorrhoids
 - external [1.NT.87.^](#)
 - internal [1.NQ.87.^](#)
 - kidney (non functioning) [1.PC.51.^](#)

- phalanx
- foot [1.WL.87.^](#)
- hand
- first phalanx [1.UI.87.^](#)
- other phalanx [1.UJ.87.^](#)
- preauricular skin tag [1.DA.59.^](#)
- tubal
- with crushing or destruction [1.RF.51.^](#)
- with segmental resection [1.RF.51.^](#)
- with transection and ligation (for sterilization) [1.RF.51.^](#)
- umbilical cord [5.CA.90.^](#)
- varicocele, spermatic cord [1.QP.51.^](#)
- vas deferens [1.QN.51.^](#)

Light therapy

- for treatment of mood disorders [6.AA.30.^](#)
- for treatment of other condition (see [Phototherapy, by site](#))
- ultraviolet (see [Phototherapy, by site](#))

Limb reduction (surgery)

- extremity
- lower (for correction of lymphedema) [1.MS.91.^](#)
- upper (for correction of lymphedema) [1.MR.91.^](#)

Lingulectomy [1.GR.87.^](#)**Linking**

- corneal cross
- epithelium off [1.CC.87.LA-DQ](#)
- epithelium on [1.CC.12.JA-DQ](#)

Lip

- lift [1.YE.74.^](#)
- shave [1.YE.87.^](#)
- switch [1.YE.80.^](#)

Liposuction (to reduce adipose tissue) (see [Repair, skin, by site, by decreasing size](#))**Litholapaxy, lithopaxy** (see also [Destruction, calculus, by site](#))

- bladder [1.PM.59.^](#)
- junction
- ureteropelvic (UPJ) [1.PE.59.^](#)
- ureterovesical (UVJ) [1.PG.59.^](#)
- renal pelvis [1.PE.59.^](#)
- ureter [1.PG.59.^](#)
- urethra [1.PQ.59.^](#)

Lithotomy

- junction, ureteropelvic (UPJ) [1.PE.57.^](#)
- junction, ureterovesical (UVJ) [1.PG.57.^](#)
- urethra [1.PQ.57.^](#)

Lithotripsy (see also [Destruction, calculus, by site](#))

- gland (see also [Destruction, gland, by site](#))
- sublingual [1.FL.59.^](#)
- submandibular [1.FN.59.^](#)

Lobectomy

- adrenal [1.PB.87.^](#)
- brain [1.AN.87.^](#)
- glands
- parotid [1.FM.87.^](#)
- thyroid [1.FU.87.^](#)
- hepatic (left, right, right extended) [1.OA.87.^](#)
- lung
- complete (total) [1.GR.89.^](#)
- with partial (segment, wedge) excision of another lobe [1.GT.87.^](#)
- partial [1.GR.87.^](#)
- radical (sleeve) [1.GR.91.^](#)
- involving two or more lobes [1.GT.91.^](#)

Lobotomy

- brain [1.AN.59.^](#)

Lowering

- floor of mouth (lateral) [1.FH.78.^](#)

Lumbar puncture (for collection of CSF for diagnostic purposes) [2.AX.13.^](#)

Lumpectomy

- breast [1.YM.87.^](#)

Lung

- volume reduction surgery [1.GT.78.^](#)

Lymphadenectomy

- axillary
 - partial (subtotal) [1.MD.87.^](#)
 - total (all nodes) [1.MD.89.^](#)
- extremity NEC
 - partial (subtotal) [1.MK.87.^](#)
 - radical (all nodes plus surrounding tissue) [1.MK.89.^](#)
- inguinal
 - partial (subtotal) [1.MJ.87.^](#)
 - radical [1.MJ.91.^](#)
 - modified [1.MJ.89.^](#)
- intraabdominal
 - partial (subtotal) [1.MG.87.^](#)
 - total (all nodes) [1.MG.89.^](#)
- intrathoracic
 - partial (subtotal) [1.MF.87.^](#)
- mediastinal
 - partial (subtotal) [1.ME.87.^](#)
 - total (all nodes) [1.ME.89.^](#)
- neck region
 - functional [1.MC.89.^](#)
 - partial (limited) [1.MC.87.^](#)
 - radical (modified) (extended) [1.MC.91.^](#)
 - selective [1.MC.87.^](#)
- pelvic
 - partial (subtotal) [1.MH.87.^](#)
 - radical (all nodes plus surrounding tissue) [1.MH.89.^](#)

Lymphangiectomy

- abdominal/pelvic region [1.MP.87.^](#)
- extremity
 - lower [1.MS.87.^](#)
 - with excision of adjacent tissue [1.MS.91.^](#)
 - upper [1.MR.87.^](#)
 - with excision of adjacent tissue [1.MR.91.^](#)
- head and neck region [1.ML.87.^](#)
- thoracic region [1.MN.87.^](#)

Lymphangiography (see [Xray, vessels, lymphatic, by site](#))**Lymphangioplasty**

- abdominal/pelvic region [1.MP.80.^](#)
- extremity
 - lower [1.MS.80.^](#)
 - upper [1.MR.80.^](#)
- thoracic region [1.MN.80.^](#)

Lymphangiorrhaphy

- abdominal/pelvic region [1.MP.80.^](#)
- extremity
 - lower [1.MS.80.^](#)
 - upper [1.MR.80.^](#)
- thoracic region [1.MN.80.^](#)

Lymphangiotomy (for inspection) [2.MZ.70.^](#)**Lymphaticostomy**

- ducts
 - lymphatic
 - thoracic region [1.MN.77.^](#)

Lymphoidectomy

- abdominal/pelvic region [1.MP.87.^](#)
- extremity
 - lower [1.MS.87.^](#)
 - upper [1.MR.87.^](#)
- head and neck region [1.ML.87.^](#)
- thoracic region [1.MN.87.^](#)

Lysis (see [Release, by site](#))

– adhesions (see [Release, by site](#))

Appendix A - CCI Code Structure

CCI has a totally alphanumeric structure with a code length maximum of 10 characters. It is composed of as many as six discrete code "components", as illustrated below:

Field 1	Field 2	Field 3	Field 4	Field 5	Field 6
Section	Group	Intervention	Approach, technique, reason	Device, agent, method used	Tissue used
1 digit	2 digits	2 digits	2 digits	2 digits	1 digit

These code "components" make CCI a truly axial classification. It is possible to perform analysis on health interventions looking at just one or any combination of the "components". This makes the classification into a very flexible and powerful tool for searching and organizing information about healthcare interventions.

The values in fields 2, 3, 4, 5 and 6 are unique within a section. This means that the same field 4 code "component", for example, can be used to mean different things in different sections. While attempts have been made to ensure that certain concepts that are repeated in the different sections retain the same code component value and meaning, it would be impossible in a ten-digit code string to enforce unique "component" descriptions across all the sections. This would inhibit the potential for future code "component" expansion when it is anticipated that there will be considerable future demand for "room for growth" to incorporate more detail in the code "components" as the techniques for performing health interventions change. In particular fields 4, 5 and 6 represent the dynamic aspect of "how" the intervention is performed and can be expected to change greatly over time. And so, a workable compromise was struck.

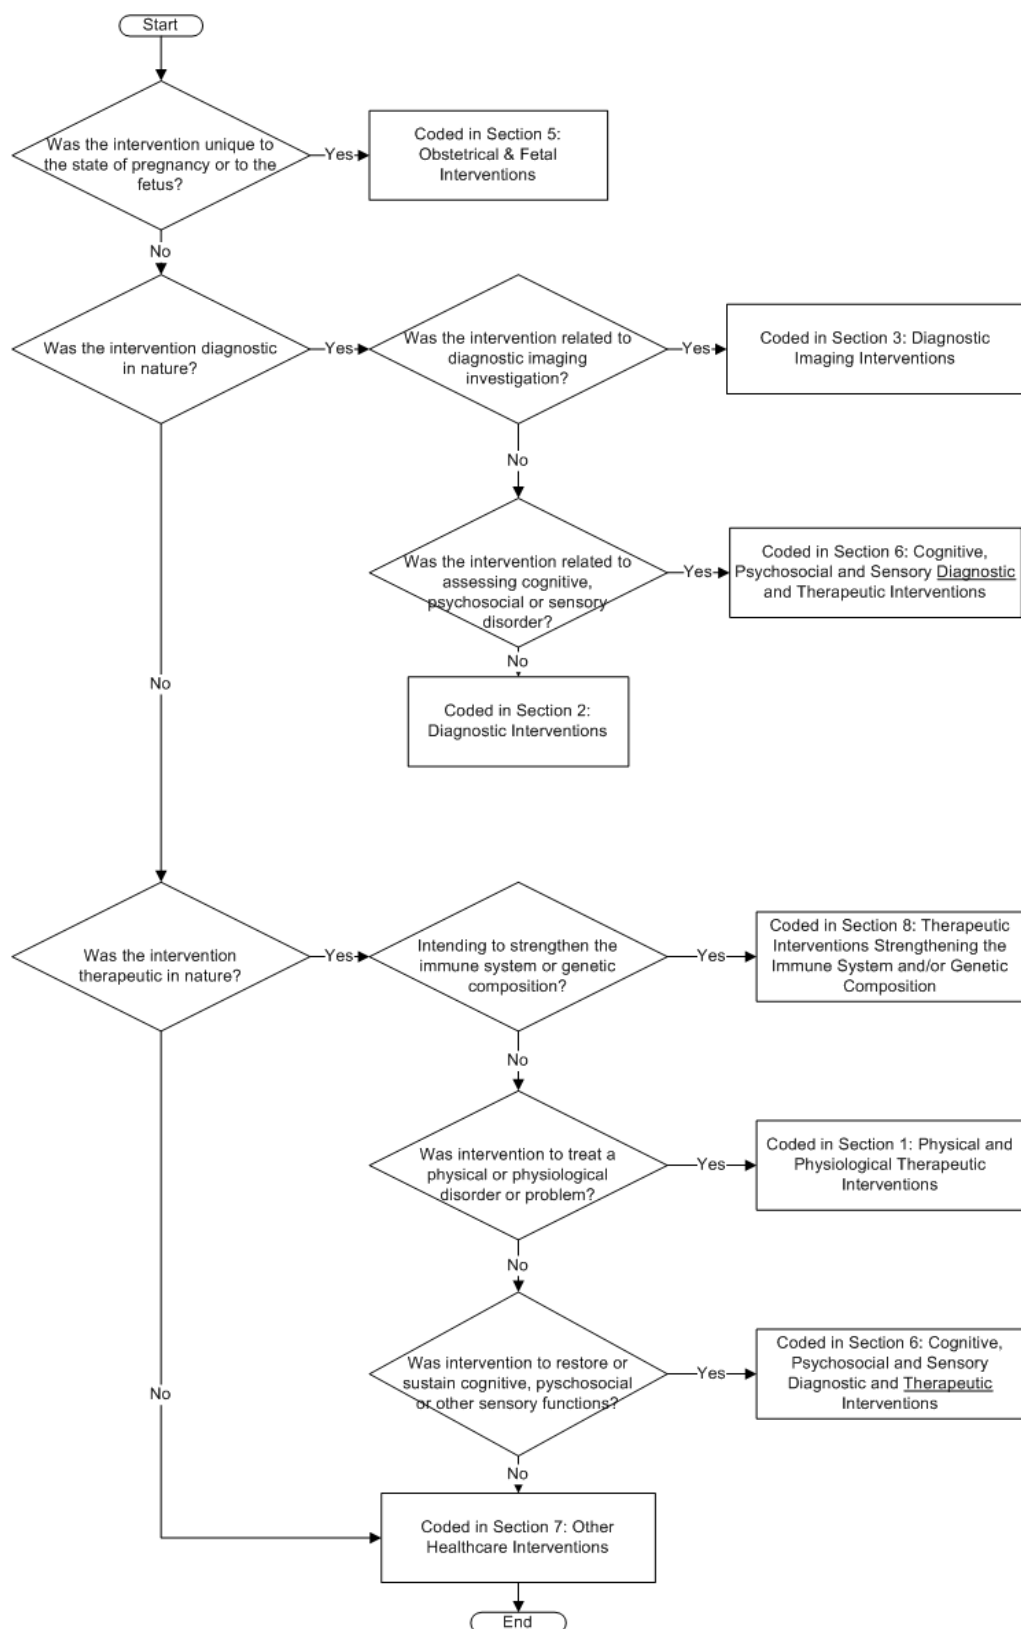

Section:

The first character (field 1) of each code represents the broad realm of intervention. There are currently seven choices:

- 1: Physical and physiological therapeutic interventions
- 2: Other diagnostic interventions
- 3: Diagnostic imaging interventions
- 5: Obstetrical and fetal interventions
- 6: Cognitive, psychosocial and sensory therapeutic interventions
- 7: Other healthcare interventions
- 8: Therapeutic interventions strengthening the immune system and/or genetic composition

A healthcare intervention may fall into only one of these "sections". A decision tree was used as an arbitrary method to impose logic on the assignment of interventions to sections in order to enforce a basic classification rule - uniqueness of code concept. There should be no question about where an intervention belongs in CCI.

Below is the flow diagram of the CCI Decision Tree for assigning interventions to sections:

CCI Decision Tree

An Overview:

Group:

The next two characters (field 2) represent the group (region or area of focus). In three of the sections this is anatomy site while in others it is mental/sensory function or stage of pregnancy.

Intervention:

The fourth and fifth characters (field 3) always represent generic types of healthcare actions. The two-digit code "component" has unique meaning when it is linked with the section code "component". For example, in Section "1" the intervention "50" is described as drainage. In Section "6" the intervention "50" is described as training. As mentioned previously, the meaning of field 2, 3, 4, 5 and 6 are section-dependent.

Qualifier 1:

The sixth and seventh characters (field 4) represent the first intervention qualifier describing how (or why) it was completed. In some sections, for example section 3, 4 and 7, this is all that is required to complete the CCI code. In other sections, such as section 1, it represents only a part of the qualifier - the approach and technique portion.

Definitions of Common Surgical Approaches:

Open approach: usually implies that an incision was made to gain access to the site but there are some exceptions to this. For example, excision of the tonsils and adenoids is considered an open approach but no incision is made to gain access. As was the case in other classifications, the entry and closure are inherent in the code and are not coded separately. If the closure does not require tissue, a different qualifier may be selected to portray this fact.

Endoscopic approach: includes interventions done via the laparoscope, thoracoscope, hysteroscope, and so on. Implies a scope is used to view the intervention. Incisions are minimal in size and are often referred to as ports or as a minimally invasive technique.

Endoscopic per orifice approach: includes interventions done via the cystoscope, bronchoscope, etc. The scope is inserted via an orifice (natural orifice or one surgically created) and no incision is required.

Per orifice approach: includes those interventions that are done through an existing orifice but without a scope or incision. For example, a D and C is performed per orifice.

Percutaneous approach: includes those interventions that are done through a needle, large bore needle or catheter. Diagnostic imaging may accompany these interventions. Examples include angioplasties, removal of a ureteral calculus via a nephrostomy tube.

External approach: includes those interventions done on the outside of the body that do not require an incision, scope or needle to gain access to the site. Examples include destruction of a skin lesion, closed reduction of a fracture.

Qualifier 2:

The eighth and ninth characters (field 5) represent the second intervention qualifier describing the tools, agents or modalities used.

Qualifier 3:

The tenth character (field 6) represents the third and final intervention qualifier. Currently, this qualifier has been activated for use in section 1 only to describe the use of tissue (human, animal or synthetic) during an intervention.

The CCI code format includes all six fields (10 characters) which, for presentation purposes only, are shown with a decimal after fields 1, 2 and 3 and a hyphen between fields 4, 5 and 6 (for example, [1.BG.87.UH-XX-Q](#)). Where fields 5 and/or 6 are not used, these will contain a blank (for example, [1.BG.87.WG](#)).

Building Blocks of CCI - Code Component Values

Sections

1: Physical and physiological therapeutic interventions

- 2: Other diagnostic interventions
- 3: Diagnostic imaging interventions
- 5: Obstetrical and fetal interventions
- 6: Cognitive, psychosocial and sensory therapeutic interventions
- 7: Other healthcare interventions
- 8: Therapeutic Interventions Strengthening the Immune System and/or Genetic Composition

Groups

Section 1 Anatomy Site

(A) Brain and Spinal Cord

(AA) Meninges and dura mater of brain

Includes: dura mater of brain, epidural space [of brain], subdural space [of brain], fossa (frontal, temporal and posterior clinoid), falx

(AB) Subarachnoid

Includes: arachnoid tissue of brain, basal cisterns, subarachnoid space

(AC) Ventricles of brain

Includes: aqueduct of Sylvius, cerebral ventricles [lateral, 3rd and 4th], choroid plexus of 3rd and 4th ventricles, Dandy Walker malformation of 4th ventricle, foramen of Monro, Luschka and Magendie

(AE) Thalamus and basal ganglia

Includes: caudate, hypothalamus, fornix, globus pallidus, internal capsule, lemniscal pathway, lentiform nuclei, putamen, superior and inferior vagal ganglia

(AF) Pituitary region

Includes: cavernous sinus, craniobuccal pouch hypophysis cerebri, hypophyseal fossa, parasella, petrosal sinus, pituitary fossa, Rathke's pouch, sella turcica, sella, suprasella

(AG) Pineal gland

Includes: pineal recess

(AJ) Cerebellum

(AK) Cerebellopontine angle

Includes: choroid plexus of cerebellopontine angle, cisterna, acoustic [vestibular] nerve within the cerebellopontine angle, facial nerve [intracranial] within cerebellopontine angle

(AN) Brain

Includes: ansa, brain NEC, cingulum, cingulate cortex, corpus callosum, lobes of brain [parietal, occipital, frontal and temporal], septum pellucidum

(AP) Brain stem

Includes: midbrain, pons, medulla oblongata, mesencephalon, cerebral peduncle, tectal plate, Chiari malformations of brain stem [hindbrain]

(AW) Spinal cord

Includes: cauda equina, cervical and thoracic spinal cord, conus medullaris, intramedullary spine, spinal nerve roots, spinal nerve NEC

(AX) Spinal canal and meninges

Includes: cerebral spinal fluid (CSF) of spine, meninges of spinal cord, dura of spinal cord, spinal theca, subarachnoid (and subdural) space of spine, epidural (or extradural) space of spine

(AZ) Central nervous system

(B) Nerves

(BA) Cranial nerves

Includes: intracranial nerves, olfactory CN I, optic CN II, oculomotor CN III, trochlear CN IV, abducent CN VI, trigeminal CN V, gasserian ganglion[intracranial portion], facial CN VII, glossopharyngeal CN IX [intracranial], hypoglossal CN XII [intracranial], vagus CN X, accessory CN XI [intracranial]

(BB) Other nerves of head and neck

Includes: facial nerve, accessory nerve CN XI [extracranial], cervical plexus [C2-C4], cranial nerve [extracranial], dental nerve, facial nerve CNVII [extracranial], gasserian ganglion [extracranial portion], glossopharyngeal CN IX [extracranial], hypoglossal nerve CN XII [extracranial], laryngeal nerve, mental nerve, pharyngeal nerve, transverse [superficial] cervical nerve, trigeminal nerve [extracranial], vagus nerve, head and neck region

(BD) Nerve(s) of the ear

Includes: vestibular nerve, ampullary nerve [anterior, lateral and posterior], auditory nerve, auricular nerve [greater], auriculotemporal nerve, cochlear nerve, saccular nerve, tympanic nerve, utricular nerve, vestibulocochlear nerve CN VIII

(BF) Sympathetic nerves

Includes: celiac nerve, parasympathetic ganglia, peripheral autonomic nervous system, perivascular plexus, splanchnic nerve, stellate ganglia

(BG) Brachial plexus

Includes: antebrachial nerve, brachial plexus [lateral, medial and posterior cord], cervical spinal nerves [C5, C6, C7, C8 and T1], intercostal nerve, scalenus plexus, supraclavicular plexus, scapular nerve, spinal nerves [C5, C6, C7, C8 and T1], thoracic nerve, thoracic spinal nerve [T1], thoracodorsal nerve

(BJ) Phrenic nerve**(BK) Vagus nerve**

Includes: thoracoabdominal branches of vagal nerve, esophageal, cardiac and renal plexus, vagal trunk [celiac, hepatic, gastric, splenic, pancreatic branches], gastric nerve

(BM) Nerve(s) of upper arm and elbow

Includes: axillary nerve, cubital tunnel, cutaneous nerve of upper arm, median nerve NEC, radial nerve NEC, radial tunnel, suprascapular nerve, ulnar nerve NEC

(BN) Nerve(s) of forearm and wrist

Includes: carpal tunnel, Guyon's canal, median nerve at level of forearm and wrist, ulnar nerve at level of forearm and wrist, posterior interosseous nerve

(BP) Nerve(s) of hand

Includes: nerves at palmar level, palmar median nerve

(BQ) Nerve(s) of digit of hand

Includes: digital nerve NOS, median digital nerve, radial digital nerve

(BR) Nerves of arm**(BS) Nerve(s) of pelvis, hip and thigh (and lower trunk)**

Includes: femoral nerve, femoral cutaneous nerve, genitofemoral nerve, ilioinguinal nerve, lumbar plexus, obturator nerve, pelvic plexus, pudendal nerve, sacral plexus, sciatic nerve NOS

(BT) Nerve(s) of lower leg

Includes: nerves at ankle, nerves at knee, peroneal nerve NEC, saphenous nerve, sural nerve, tarsal tunnel, tibial nerve NEC, sciatic nerve at tibial level

(BX) Peripheral nerves NEC

Includes: nerve NEC

(BZ) Nervous system**(C) Eye and Ocular Adnexa****(CC) Cornea**

Includes: corneal epithelium, Bowman's membrane [layer][anterior lamina] stroma, Descemet's membrane [posterior elastic lamina] corneal endothelium

(CD) Sclera

Includes: limbus [border], sclerocorneal junction [corneoscleral junction], Schlemm's canal

(CE) Cornea with sclera

(CF) Choroid

(CG) Ciliary body

(CH) Iris

Includes: pupil

(CJ) Anterior Chamber

Includes: anterior chamber angle, anterior segment, trabecular meshwork

(CL) Lens

Includes: capsule, cortex, nucleus

(CM) Vitreous

(CN) Retina

(CP) Soft tissue of orbit and eyeball NEC

Includes: eyeball NOS, soft tissue of orbit

(CQ) Ocular muscles and tendons

(CR) Fascia of eye

Includes: Tenon's capsule

(CS) Conjunctiva

Includes: inner eyelid

(CT) Lacrimal secretory system

Includes: lacrimal gland

(CU) Lacrimal excretory system

Includes: lacrimal ducts, lacrimal sac, nasolacrimal punctum, nasolacrimal canaliculi, nasolacrimal sac, nasolacrimal duct

(CV) Upper eyelid

(CX) Eyelid NEC

Includes: upper eyelid with lower eyelid, lower eyelid, skin of eyelid, eyelashes, eyelash follicles, canthus, epicanthal fold, tarsus, meibomian glands, eyelid retractors [Muller's muscle and capsulo-palpebral fascia]

(CZ) Eye NEC

Includes: eyeball and surrounding structure, eye socket [of eviscerated eye]

(D) Ear and Mastoid (Process)

(DA) External ear NEC

Includes: auricle, pinna, cartilage of ear [helix, fossa triangularis, scapha, concha, tragus, antitragus, antihelix]

(DE) External auditory meatus

Includes: external auditory canal

(DF) Tympanic membrane

Includes: eardrum, plica chordae tympani

(DG) Ossicular chain

Includes: stapes, incus, malleus

(DJ) Eustachian tube

Includes: auditory tube

(DK) Middle ear NEC

Includes: attic, tympanic cavity (with contents), tympanomastoid cavity (with contents), middle ear NOS

(DL) Mastoid (process)

Includes: mastoid bone, mastoid process, petrous pyramid air cells, petrous apex, mastoid portion of temporal bone

(DM) Cochlea

(DN) Endolymphatic sac

(DP) Utricle and saccule

(DR) Inner ear NEC

Includes: inner ear NOS, vestibular system, labyrinth NOS, vestibule, semi-circular canals, semi-circular ducts, osseous labyrinth, membranous labyrinth, round window, oval window

(DZ) Ear NEC

(E) Musculoskeletal Tissue of the Head, Nasal Cavity and Sinuses

(EA) Cranium

Includes: frontal, parietal, temporal, occipital bone, cranial suture or ligament, cranial base, skull NOS

(EB) Zygoma

Includes: zygomatic arch(es), malar bone, facial bone NOS

(EC) Nasoethmoid and orbital complex

Includes: nasal bones, naso-orbital complex, orbital rim, ethmoidal bone [lining nasal sinus], sphenoidal bone [lining nasal sinus] bony structures surrounding the eyeball

(ED) Maxilla

(EE) Mandible

(EF) Maxilla with mandible

(EG) Multiple bones of mid face region without cranium involvement

Includes: maxilla [LeFort I] with any of the following bones: nose, naso-ethmoidal complex, zygoma, malar, orbital rim, midface region [LeFort II], midface NOS

(EH) Multiple bones of mid face region with cranium involvement

Includes: maxilla with cranium, maxilla with cranium and zygoma, maxilla with cranium and nose, midface region with cranium involvement [LeFort III]

(EJ) Hyoid bone

Includes: hyoid bone NOS

(EL) Temporomandibular joint [TMJ]

Includes: joint capsule, bursa, articular disc, meniscus, ligament, synovial lining [cavity], coronoid process of mandible (alone) mandibular condyle (alone)

(EM) Maxillary alveolar ridge

Includes: maxillary alveolar process, arch

(EN) Mandibular alveolar ridge

Includes: mandibular alveolar process, arch

(EP) Muscles of head and neck

Includes: muscles of head: occipitofrontalis, pterygoid, temporalis, temporoparietal, zygomaticus major and minor palatini, muscles of the face, muscles of the neck: buccinator, cricothyroid, digastric, geniohyoid, mylohyoid, omohyoid, platysma, pterygoid, scalene, sternocleidomastoid, sternohyoid, thyrohyoid. Fascia of head and neck: temporal, buccopharyngeal, parotid and masseter

(EQ) Soft tissue of head and neck

Includes: soft tissue of head and neck NOS, soft tissue (abscess, hematomas, wound or neoplasm, sinuses, fistulae) of head and neck

(ES) Nasal cartilage

Includes: septal cartilage, alar cartilage [lower lateral], nasal cartilage [upper, lateral], nasal cartilage alone, columella

(ET) Nose

Includes: nasal bones, turbinates, nasal cavity, nose NEC, nasal fossa, vestibule, choanae, meatus and mucosa, nasal bones with cartilage

(EU) Ethmoidal sinus

Includes: ethmoidal cells, uncinat process [ethmoidal]

(EV) Sphenoidal sinus

(EW) Maxillary sinus
Includes: maxillary antrum

(EX) Frontal sinus
Includes: frontonasal duct

(EY) Paranasal sinuses
Includes: multiple nasal sinuses (2 or more of the following: ethmoidal, sphenoidal, maxillary, frontal), pansinus(es), nasal sinus NOS

(F) Oral Cavity and Pharynx

(FA) Nasopharynx

(FB) Hard palate
Includes: palatine bone, palate NOS

(FC) Soft palate

(FD) Gingiva
Includes: gums, oral vestibule, periodontal pocket

(FE) Tooth

(FF) Root of tooth

(FG) Oral and buccal mucosa
Includes: buccal mucosa [fat pad, glands], buccal sulcus, labial frenulum, labial sulcus, oral papilla, oral mucosa NEC

(FH) Floor of mouth
Includes: retromolar trigone, submandibular space, sublingual space

(FJ) Tongue
Includes: muscles of tongue [intrinsic and extrinsic] genioglossus styloglossus, hyoglossus, lingual frenulum, lingual sulcus, sublingual tonsil [lymph follicles on posterior third of tongue]

(FK) Mouth
Includes: Oral cavity NEC

(FL) Sublingual gland

(FM) Parotid gland
Includes: Stensen's duct

(FN) Submandibular gland
Includes: salivary gland NEC, submaxillary gland, Wharton's duct

(FP) Salivary glands and ducts NEC

(FQ) Uvula

(FR) Tonsils and adenoids
Includes: adenoid, palatine tonsil, pharyngeal tonsil

(FT) Thyroglossal duct

(FU) Thyroid gland
Includes: thyroid isthmus

(FV) Parathyroid gland

(FX) Oropharynx
Includes: retromaxillary, suprahyoid, posterior and lateral oropharynx, valleculae, hypopharynx, oropharynx with nasopharynx, pharynx NOS, retropharyngeal region

(G) Respiratory System

(GA) Glottis
Includes: intrinsic larynx, laryngeal commissure, true cord, true vocal cord, vocal cord NOS, vocal folds

(GB) Supraglottis

Includes: epiglottic region, supraglottic region, extrinsic larynx, laryngeal aspect of aryepiglottic fold, ventricular band of larynx, false cord, false vocal cord, epiglottis NOS, vestibule of glottis

(GC) Subglottis

Includes: subglottic region

(GD) Laryngeal cartilage

Includes: thyroid cartilage [Adam's apple], cricoid cartilage, arytenoid cartilage, corniculate cartilage, cuneiform cartilage

(GE) Larynx NEC

Includes: larynx NOS

(GH) Larynx with trachea**(GJ) Trachea****(GK) Thymus**

Includes: ectopic thymus tissue

(GM) Bronchus NEC

Includes: main bronchus NOS, hilus of lung, left main bronchus, right main bronchus, bronchus NOS, bronchial region

(GN) Carina**(GR) Lobe of lung**

Includes: apex, lingula bronchus, lingula of lung

(GT) Lung NEC

Includes: pulmonary NOS, base of lung, borders and surface of lung, parenchyma of lung, multiple overlapping sites of lung

(GV) Pleura

Includes: parietal pleura, visceral pleura, pleural cavity, pleural space

(GW) Mediastinum

Includes: anterior mediastinum, posterior mediastinum, superior mediastinum, inferior mediastinum, middle mediastinum, mediastinal wall and cavity

(GX) Diaphragm**(GY) Thoracic cavity NEC**

Includes: Chest NOS, sinuses/fistulous tract

(GZ) Respiratory system NEC**(H) Heart and Related Structures****(HA) Pericardium**

Includes: serous pericardium, fibrous pericardium

(HB) Epicardium**(HD) Endocardium****(HH) Cardiac conduction system**

Includes: sinoatrial node, atrioventricular node, atrioventricular pathway

(HJ) Right heart structures

Includes: Right atrium with right ventricle, right side of heart with absent structures (congenital absence)

(HM) Atrium

Includes: sinus venarum/venosus, auricle of atrium [and atrial appendage]

(HN) Interatrial septum

Includes: atrial septal

(HP) Ventricle

Includes: infundibulum of ventricle

(HR) Interventricular septum

Includes: ventricular septal

(HS) Tricuspid valve

Includes: commissure of tricuspid valve, right atrioventricular valve

(HT) Pulmonary valve

Includes: commissure of pulmonary valve

(HU) Mitral valve

Includes: mitral valve, commissure of bicuspid valve, left atrioventricular valve

(HV) Aortic valve

Includes: commissure of aortic valve

(HW) Annulus NEC

Includes: annulus alone of any valve

(HX) Structures adjacent to valves

Includes: chordae tendineae, trabeculae carneae, papillary muscles, sinuses of Valsalva

(HY) Heart with lung(s)

(HZ) Heart NEC

Includes: combined right and left heart, heart NOS, heart tissue NEC

(I) Great Vessels

(ID) Aorta NEC

Includes: ascending aorta, aortic arch, descending thoracic aorta, thoracoabdominal aorta

Excludes: aorta with pulmonary artery and coronary arteries (see IF), aorta with pulmonary artery and interventricular septum (see LA) and abdominal aorta alone (see KA)

(IF) Aorta with pulmonary artery and coronary arteries

Includes: congenitally transposed great arteries

(IJ) Coronary arteries

Includes: right and left coronary arteries and all tributaries [circumflex, left anterior descending, right marginal branch]

(IK) Coronary veins

Includes: coronary sinus, great coronary vein, small coronary vein, anterior cardiac veins, middle cardiac veins, posterior cardiac vein

(IL) Vessels of heart

Includes: coronary arteries and veins together

(IM) Pulmonary artery

Includes: ductus arteriosus, pulmonary artery [main, right, left], pulmonary artery bifurcation

(IN) Pulmonary vein

(IS) Vena cava (superior and inferior)

(J) Upper Body Vessels

(JD) Carotid body and carotid sinus

(JE) Carotid artery

Includes: common carotid arteries, internal carotid arteries, external carotid arteries, carotid bifurcation

(JJ) Brachiocephalic arteries

Includes: innominate artery

(JK) Subclavian artery

(JL) Internal mammary artery

Includes: internal thoracic artery

(JM) Arteries of arm NEC

Includes: axillary arteries, brachial arteries, radial arteries, ulnar arteries, common interosseous arteries, upper limb arteries NOS

(JQ) Jugular veins

Includes: external jugular veins, internal jugular veins

(JT) Subclavian vein**(JU) Veins of arm NEC****(JW) Intracranial vessels**

Includes: ophthalmic vessels, basilar arteries, Circle of Willis, cerebral vessels [anterior, middle, posterior communicating], anterior choroidal vessels, meningeal vessels [anterior, posterior], cerebellar vessels, pontine artery, dural venous sinuses [superior sagittal sinus, inferior sagittal sinus, straight sinus, transverse sinuses, sigmoid sinuses, cavernous sinuses, superior petrosal sinuses, inferior petrosal sinuses], intracranial vessels NOS

(JX) Other vessels of head, neck and spine NEC

Includes: superior thyroid vessels, ascending pharyngeal vessels, lingual, facial and occipital vessels, posterior auricular vessels, superficial temporal vessels, maxillary vessels, hypophyseal vessels, ganglionic vessels, caroticotympanic vessels, pterygoid vessels, cavernous vessels, vertebral vessels, extracranial vessels NEC

(JY) Thoracic vessels NEC

Includes: mediastinal vessels, bronchial vessels, sternal vessels, anterior intercostal vessels, superior epigastric vessels, esophageal vessels

(K) Lower Body Vessels and Blood Vessels NEC**(KA) Abdominal aorta**

Includes: infrarenal aorta, juxtarenal aorta, aortic bifurcation, iliac arteries with abdominal aorta

(KE) Abdominal arteries NEC

Includes: mesenteric arteries [inferior, superior], gastroepiploic arteries, renal arteries, celiac arteries, hepatic arteries, common iliac arteries, gastric arteries, splenic arteries, umbilical arteries, inferior phrenic arteries, mesenteric artery with aorta, abdominal arteries NEC

(KG) Arteries of leg NEC

Includes: femoral arteries, popliteal arteries, tibial arteries [anterior, posterior], dorsalis pedis arteries, lower limb arteries NEC

(KQ) Abdominal veins NEC

Includes: common iliac veins, portal veins, renal veins, suprarenal veins, mesenteric veins [superior, inferior], splenic veins, hepatic veins, visceral veins, abdominal veins NOS

(KR) Veins of leg NEC

Includes: saphenous veins, femoral veins, popliteal veins, tibial veins [anterior, posterior], peroneal veins, perforator veins, lower limb veins NOS

(KT) Vessels of the pelvis, perineum and gluteal region

Includes: internal and external portion of iliac vessels, epigastric vessels, vesical vessels, uterine vessels, vaginal vessels, rectal vessels, obturator vessels, internal pudendal artery, penile vessels, pelvic vessels NEC

(KV) Artery NEC**(KX) Vein NEC****(KY) Artery with vein****(KZ) Blood vessels NEC**

Includes: blood vessels NOS

(L) Combined Sites for Congenital Heart Anomalies and Circulatory System NEC**(LA) Aorta with pulmonary artery with interventricular septum**

Includes: truncus arteriosus

(LC) Interventricular septum with interatrial septum and heart valves

Includes: endocardial cushion

(LD) Interventricular septum with pulmonary valve with aorta with right ventricle
Includes: tetralogy of Fallot

(LZ) Circulatory system NEC
Includes: blood

(M) Lymphatic System

(MA) Lymph node(s), head region
Includes: preauricular [anterior auricular] nodes, postauricular [retroauricular] nodes, occipital nodes, facial nodes, parotid nodes, buccal nodes

(MC) Lymph node(s), cervical
Includes: cervical nodes [superficial and deep], level I nodes [submandibular and submental trigone], level II nodes [upper jugular], level III nodes [middle jugular], level IV nodes [lower jugular], level V nodes [posterior triangle including spinal accessory, transverse cervical and supraclavicular nodes], level VI nodes [anterior/central compartment including paratracheal, pretracheal, parathyroid, precricoid, Delphian and prelaryngeal nodes located above the suprasternal notch], retropharyngeal nodes

(MD) Lymph node(s), axillary
Includes: deep axillary nodes, superficial axillary nodes, lateral nodes, pectoral nodes, subscapular nodes, apical nodes [subclavicular], central nodes

(ME) Lymph node(s), mediastinal
Includes: anterior and posterior mediastinal nodes, superior mediastinal nodes [pre-tracheal, upper paratracheal, pre-carinal and lower paratracheal nodes located below the suprasternal notch], aortic nodes [subaortic and para-aortic nodes of the ascending aorta and aortic arch], inferior mediastinal nodes [subcarinal, paraesophageal and pulmonary ligament nodes], tracheobronchial nodes [tracheal/paratracheal, deep and inferior, tracheobronchial, bronchopulmonary and pulmonary]

(MF) Lymph node(s), intrathoracic NEC
Includes: mediastinal nodes with other intrathoracic nodes, parasternal nodes [internal mammary], intercostal nodes, diaphragmatic nodes, nodes of the thoracic organs, parietal nodes of thoracic wall

(MG) Lymph node(s), intra-abdominal
Includes: retroperitoneal nodes, intra-aortocaval nodes [preaortic, lateral aortic, periaortic nodes located below the diaphragm], para-caval nodes, retrocrural nodes, mesenteric nodes, nodes of the abdominal organs

(MH) Lymph node(s), pelvic
Includes: external iliac nodes, common iliac nodes, internal iliac nodes, circumflex nodes, sacral nodes, intrapelvic nodes, obturator nodes, paracervical nodes, parametrial nodes, presymphysical nodes

(MJ) Lymph node(s), inguinal
Includes: superficial and deep inguinal nodes, inguinofemoral nodes, lymph nodes of groin region

(MK) Lymph node(s), extremity NEC
Includes: anterior tibial nodes, popliteal nodes, femoral nodes, tibial nodes, other lower limb nodes, brachial nodes, anti-cubital nodes, and other upper limb nodes.

(ML) Lymphatic vessels head and neck region
Includes: lymphatic ducts, head and neck region

(MM) Thoracic duct

(MN) Lymphatic vessels thoracic region
Includes: lymphatic ducts of thoracic region

(MP) Lymphatic vessels of abdomen/pelvis
Includes: lymphatic ducts of abdominal and pelvic region, lymphatic structure of abdominal and pelvic region, lymphatic structures of inguinal region

(MR) Lymphatic vessels of arm
Includes: lymphatic ducts of upper extremity, lymphatic structures of upper extremity, lymphatic structures of axillary region

(MS) Lymphatic vessels of leg
Includes: lymphatic ducts of lower extremity, lymphatic structures of lower extremity

(MZ) Lymphatic system NEC
Includes: lymphatic vessels NOS

(N) Digestive System**(NA) Esophagus**

Includes: Cardioesophageal junction, cardiac orifice, ostium, notch, esophagus [cervical, thoracic and abdominal]

(NE) Pylorus

Includes: pylorus alone, pyloric orifice, pyloric sphincter

(NF) Stomach

Includes: Body, fundus of stomach, body of stomach with pylorus, pyloric antrum, gastric antrum, stomach NEC, NOS

(NK) Small intestine

Includes: small bowel, duodenum, jejunum and ileum, Meckel's diverticulum

(NM) Large intestine

Includes: ascending colon, cecum, diaphragmatic flexure, hepatic flexure, sigmoid flexure, colon [right, left, NOS], transverse colon, descending colon, ileocecal valve, iliopelvic colon, splenic flexure, sigmoid colon

(NP) Small and large intestine

Includes: duodenum, jejunum and ileum and colon [any site], intestinal tract NOS

(NQ) Rectum

Includes: pelvirectal juncture, anorectal juncture above dentate line, rectosigmoid junction

(NT) Anus

Includes: anorectal juncture, anal sphincter, anal cushion, hemorrhoidal plexus [lying within anal cushion], levator ani muscle, muscularis propria of anal canal

(NV) Appendix

Includes: vermiform appendix

(O) Hepatobiliary Tract**(OA) Liver**

Includes: lobe of liver, segment I through VIII of liver, caudate, quadrate of liver, liver NOS, subphrenic space

(OB) Spleen**(OD) Gallbladder**

Includes: fundus, body, neck of gallbladder, Luschka's ducts of gall bladder [wall], gall bladder with associated bile ducts

(OE) Bile ducts

Includes: biliary ducts, common bile duct [CBD], cystic duct, hepatic ducts [intra and extra], ampulla and sphincter of Oddi, papilla [ampulla] and sphincter of Vater, hepatopancreatic ampulla, pancreatic duct, duct of Santorini, Wirsung

(OJ) Pancreas

Includes: head, body, tail of pancreas, islets of Langerhans [endocrine pancreas]

(OK) Pancreas with duodenum**(OT) Abdominal cavity**

Includes: peritoneum, peritoneal [retroperitoneal] cavity, pelvic cavity, extraperitoneal space, subdiaphragmatic space, omentum, mesentery, sinuses/fistula of cavity, neoplasm which occupies the abdominal cavity and whose point of origin cannot easily be assigned to a single point of origin

(OW) Surgically constructed sites in digestive and biliary tract

Includes: gastric pouch, pelvic pouch, ileal reservoir, Kock pouch, roux en y limb [of anastomosis], esophagostomy, gastrostomy, duodenostomy, jejunostomy, ileostomy, enterostomy, colostomy, neoesophagus, neopharynx, neorectum

(OZ) Digestive system NEC**(P) Urinary System****(PB) Adrenal gland****(PC) Kidney**

Includes: ectopic kidney, kidney NOS, kidney with renal pelvis, renal capsule, renal cortex, renal medulla, kidney with adrenal gland

(PE) Renal pelvis

Includes: renal calyces, ureteropelvic junction [UPJ]

(PG) Ureter

Includes: ectopic ureter, ureter NOS, ureteral meatus, ureterovesical junction and orifice(s)

(PL) Bladder neck

Includes: detrusor muscle, urethrovesical junction

(PM) Bladder

Includes: bladder NOS, bladder with bladder neck, dome of bladder, intraluminal tissue of bladder, trigone of bladder, urachus

(PQ) Urethra

Includes: urethral sphincter, peri-urethral gland, Skene's gland [duct], urethra [bulbous, penile, prostatic], urethral meatus, urethral valves

(PV) Surgically created urinary tract

Includes: pyelostomy tract, nephrostomy tract, ureterostomy tract, cystostomy tract, urethrostomy tract, ileoconduit

(PZ) Urinary system NEC

Includes: urinary system and function, urinary tract, multi-site, urinary site

(Q) Male Genital Organs**(QD) Prepuce**

Includes: foreskin

(QE) Penis

Includes: Buck's fascia, corpus spongiosum, corpus cavernosa, glans penis, prepuce (foreskin) with body of penis, skin of penis

(QG) Scrotum

Includes: dartos tunic, scrotal skin, spermatic fascia, scrotum with contents

(QH) Tunica vaginalis**(QJ) Epididymis**

Includes: organ of Giralles [paradidymis], vas aberrans of Haller, appendix epididymis

(QM) Testis

Includes: appendix testis, cyst of Morgagni, ectopic testis

(QN) Vas deferens**(QP) Spermatic cord**

Includes: spermatic vein

(QQ) Seminal vesicles

Includes: ejaculatory duct

(QT) Prostate**(QZ) Male genital tract NEC**

Includes: male genital tract NOS

(R) Female Genital Tract**(RB) Ovary**

Includes: ligaments of ovary, ovary NOS, ovas

(RD) Ovary with fallopian tube**(RF) Fallopian tube**

Includes: fimbria of fallopian tube, hydatid of Morgagni, uterine tube

(RM) Uterus and surrounding structures

Includes: body of uterus, cervix with body of uterus, uterus NOS, endometrium, round ligament [canal of Nuck], cardinal ligament, uterosacral ligament, broad ligaments

(RN) Cervix

Includes: cervix, supravaginal cervix, uterine orifice [external os], canal of cervix

(RS) Vagina

Includes: fornix [anterior, posterior, cul-de-sac], vaginal orifice, vaginal vault, vaginal walls [anterior, posterior]

(RW) Vulva

Includes: Bartholin's glands [greater vestibular glands], bulb of vestibule, clitoris, hymen, labia [minora, majora], mons pubis, vestibule, vulva with perineum

(RY) Perineum

Includes: male perineum

(RZ) Female genital tract NEC

Includes: pelvic [female] region

(S) Spine, Trunk and Pelvis**(SA) Atlas and axis**

Includes: atlantoaxial joint, cervical spinal vertebrae: C1 and C2 [with or without C3], occipitoatlantal (occipitocervical) joint, transverse ligament of occipitoatlantal joint, superior and anterior facet (zygapophyseal joint(s), atlas, odontoid process, (dens) axis

(SC) Spinal vertebrae

Includes: transverse process of vertebrae, vertebral joints [facet, interspinous ligament], vertebral column, lumbosacral spinal vertebrae [vertebrae L1-S2], spine NOS

(SE) Intervertebral Disc

Includes: annulus fibrosus, nucleus pulposus

(SF) Sacrum and coccyx**(SG) Muscles of the back**

Includes: transversus aponeurosis, thoracolumbar fascia, muscles and tendons of back NOS, erector spinal vertebrae, iliocostalis, latissimus dorsi, longissimus thoracis and colli, rhomboid, semi-spinalis and serratus posterior muscles

(SH) Soft tissue of the back

Includes: abscess arising in or extending as deep as muscle or tendon of back, hematoma arising in or extending as deep as muscle or tendon of back, neoplasm arising or extending as deep as muscle or tendon of back, soft tissue wound of back

(SI) Sacroiliac joint**(SJ) Back NEC**

Includes: spine with muscles and ligaments of back

(SK) Sternum

Includes: manubrium, sternbrae body, xiphoid process

(SL) Ribs

Includes: cartilage and ligaments [intercostal and sternocostal] of ribs

(SM) Clavicle

Includes: collar bone

(SN) Scapula

Includes: inter-thoracoscapular joint, shoulder blade NOS

(SQ) Pelvis

Includes: acetabulum alone, iliac crest, ilium, ischium, pelvis with pubis with acetabulum with femoral head [when affected in its entirety (e.g. amputation)]

(SW) Pubis

Includes: pubis alone, pubis ramus, symphysis pubis

(SY) Muscles of the chest and abdomen

Includes: internal intercostal, pectoralis major [medial and lateral], serratus anterior, transversus thoracis and teres muscles; muscles and tendons of chest NOS; chest wall NOS; internal and external oblique, rectus abdominis, transversus abdominis [internal and external], inguinal ligament, linea alba and semilunaris; muscles and tendons of abdomen NOS; abdominal wall; deep fascia [endo suprapleural membrane, transversalis, obturator internus]

(SZ) Soft tissue of the chest and abdomen

Includes: abscess arising in or extending as deep as chest or abdominal wall; hematoma arising in or extending as deep as chest or abdominal wall; neoplasm arising in or extending as deep as chest or abdominal wall; wound of soft tissue of chest and abdomen

(T) Shoulder and Arm (excluding hand and wrist)**(TA) Shoulder joint**

Includes: bursa, capsule, cartilage, ligament and synovial lining of coracohumeral and glenohumeral joints; shoulder ligaments [coracohumeral, glenohumeral ligaments, glenoid labrum, humeral and rotator interval]; glenoid cavity, labrum; humeral head and surgical neck; greater tuberosity [tubercle] of humerus; shoulder joint NOS

(TB) Acromioclavicular and sternoclavicular joints

Includes: subacromial bursa, and capsule; acromioclavicular, coracoacromial, coracoclavicular, coracohumeral ligaments; sternoclavicular articular disc; sternoclavicular, costoclavicular and interclavicular ligaments; acromion; coracoid process; distal end of clavicle with acromion; subacromial space

(TC) Rotator cuff

Includes: infraspinatus, subscapularis, supraspinatus and teres minor muscles and tendons

(TF) Muscles of the arm [around shoulder]

Includes: coracobrachialis, deltoid, levator scapulae, teres major, trapezius: muscles of upper arm NEC; muscles of shoulder NEC; fascia of upper arm NEC

(TH) Tendons of the arm [around shoulder]

Includes: biceps, conjoint, pectoralis major, scapularis and triceps tendons; tendons of upper arm NEC; tendons of shoulder NEC

(TK) Humerus

Includes: epiphysis and periosteum of humerus; supracondylar ridge [lateral and medial] of humerus

(TM) Elbow joint

Includes: Bursa, capsule, cartilage, ligaments and synovial lining of: radiohumeral joint, ulnohumeral joint, elbow joint NOS, articular surface of distal humerus, articular surface of proximal radius and ulna; distal humerus capitulum, epicondyles, (medial and lateral), trochlea; radial head and neck; ulnar coronoid process, olecranon, tubercle

(TQ) Muscles of the forearm [around elbow]

Includes: anconeus, biceps, brachialis, brachioradialis and triceps; muscles of forearm [around elbow] NEC, fascia of forearm [around elbow]

(TS) Tendons of the forearm [around elbow]

Includes: common extensor and pronator teres [at elbow], brachioradialis [proximal at elbow], tendons of forearm NEC

(TV) Radius and ulna

Includes: radius NOS, tuberosity of radius, ulna NOS, tuberosity of ulna, epiphysis or periosteum of radius and ulna

(TX) Soft tissue of arm NEC

Includes: soft tissue neoplasm arising in or extending into soft tissue of arm [any site]; wound of soft tissue of arm

(TZ) Arm NEC**(U) Hand and Wrist****(UB) Wrist joint**

Includes: articular disc, bursa, capsule, cartilage, ligament and synovial lining; radiocarpal, ulnocarpal joints; radial tubercle; ulnar head; styloid process: radius and ulna

(UC) Distal radioulnar joint and carpal joints and bones

Includes: carpal joints; carpal bones: capitate [os magnum], hamate [unciform], lunate [semilunar], navicular [scaphoid], pisiform, trapezoid, triquetrum [cuneiform of carpus], carpometacarpal joint, intercarpal joints, midcarpal joints, radioulnar joint, volar wrist ligaments; capsule, cartilage ligament and synovial lining of carpal and radioulnar joints

(UE) First metacarpal bone**(UF) Other metacarpal bones****(UG) Other metacarpophalangeal joint(s)**

Includes: capsule, cartilage and ligament of metacarpophalangeal joint(s); articular surface of metacarpophalangeal joints; metacarpal head, metacarpal joint

(UH) First metacarpophalangeal joint

Includes: Articular surface of 1st metacarpophalangeal joint; Capsule, cartilage and ligament of 1st metacarpophalangeal joint; 1st metacarpal head

(UI) First phalanx of hand**(UJ) Other phalanx of hand**

Includes: tuft of distal phalanx, phalanx of hand, bones of fingers NOS

(UK) Other interphalangeal joints of hand

Includes: phalangeal joints [proximal and distal] of hand; phalangeal articular surface- head and neck; ligaments, joint capsule of interphalangeal joints of hand, PIP and DIP joints of hand

(UL) Joints of finger and hand NEC**(UM) First interphalangeal joint of hand****(US) Extensor tendons of finger [excludes thumb]**

Includes: abductor, adductor tendons of finger [Zone I or II]; extensor tendons of finger [Zone I or II]; lateral band; tendons of finger NOS in Zone I or II

(UT) Flexor tendons of finger [excludes thumb]

Includes: flexor digitorum sublimis and profundus of finger; flexor tendon pulley

(UU) Tendons of the thumb [Pollicis tendons]

Includes: Abductor, adductor, extensor, flexor tendons of thumb [Zone I or II]; pollicis longus, flexor digitorum sublimis and profundus of thumb

(UV) Tendons of the wrist and hand

Includes: abductor, adductor, extensor, flexor tendons of hand [Zone III-V]; flexor carpi radialis, flexor carpi ulnaris, pronator teres [at wrist]; palmar aponeurosis, pollicis longus, tendon sheath or hand

(UY) Soft tissue of the wrist and hand

Includes: Extrinsic muscles of hand and wrist- Extensor wad of three [extensor carpi radialis longus and brevis, brachioradialis]; Flexor wad of five- [flexor carpi ulnaris and radialis, palmaris longus, flexor digitorum superficialis and profundus, pronator teres and quadratus, supinator]; Flexor pollicis longus; Extensor digitorum communis, extensor indicis proprius, extensor pollicis longus and brevis; Abductor pollicis longus and brevis; Adductor pollicis; Dorsal extensor [fascial] compartments; Intrinsic muscles of hand- Lumbricales, dorsal interossei, volar interossei; Thenar [opponens pollicis, abductor pollicis brevis, flexor pollicis brevis]; Hypothenar [opponens digiti minimi, flexor digiti quinti brevis, abductor digiti quinti or minimi]; Muscles of hand, thumb and fingers NOS; Retinacula [digital, flexor and extensor]; Palmar fascia; Fascia of hand NOS; Deep palmar space; Thenar space; Neoplasm of soft tissue [arising in or extending into muscle] of hand or wrist; Wounds of soft tissue of wrist and hand

(UZ) Hand with wrist

Includes: hand NEC

(V) Hip and Leg**(VA) Hip joint**

Includes: acetabulum with femoral head or neck and supporting joint structures [bursa, capsule, cartilage, labrum, synovium, ligament, ligamentum teres]; hip joint NOS

(VC) Femur

Includes: trochanter [greater and lesser] of femur; intertrochanter of femur; pertrochanter of femur

(VD) Muscles of the hip and thigh

Includes: Adductor [brevis, gracilis, longus, magnus, pectineus]; Gluteus [maximus, medius, minimi]; External and internal rotators [obturator gemellus superior and inferior, quadratus femoris, piriformis, tensor fascia lata muscle]; Iliopsoas; Rectus femoris; Sartorius; Tensor fascia lata muscle; Muscles of buttock NOS; Muscles of hip NOS; Muscles of thigh NEC

(VE) Tendons of hip and thigh

Includes: tendons [aponeurosis] of hip NOS; tendons [aponeurosis] of thigh NOS

(VG) Knee joint

Includes: Articular surface of proximal tibia and fibula; Articular surface of distal femur; Bursa, capsule, cartilage, ligaments of knee NEC; Femoral medial and lateral condyles and epicondyles; Synovial lining of tibiofibular and tibiofemoral joints of knee; Tibial plateau, medial and lateral condyles; Knee NOS

(VK) Meniscus of knee

Includes: lateral, medial meniscus; posterior meniscomfemoral ligament; semilunar cartilage

(VL) Cruciate ligaments of knee

Includes: anterior and posterior cruciate ligament of knee; cruciate ligament with meniscus of knee

(VM) Collateral ligaments of knee

Includes: fibular, medial and tibial ligaments of knee; collateral ligaments with meniscus of knee

(VN) Cruciate with collateral ligaments of knee

Includes: cruciate with collateral ligaments with or without meniscus of knee

(VP) Patella

Includes: patellofemoral joint; patellar ligaments; knee cap

(VQ) Tibia and fibula

Includes: tibia NOS; fibula NOS; epiphysis of tibia and fibula; periosteum of tibia and fibula; tuberosity of tibia; neck of fibula; skeletal tissue below knee and above ankle

(VR) Muscles of lower leg [around knee]

Includes: Hamstring [biceps femoris, semitendinosus, semimembranosus]; Popliteus, quadriceps femoris, vastus medialis; Gastrocnemius, soleus muscles; Muscles of lower leg [around knee] NEC

(VS) Tendons of lower leg [around knee]

Includes: patellar, quadriceps, semitendinosus, gastrocnemius and soleus

(VX) Soft tissue of leg

Includes: Soft tissue of leg (any site); Soft tissue of hip and thigh; Wound of leg; Neoplasm arising in or extending as deep as muscle or tendon, lower leg

(VZ) Leg NEC**(W) Ankle and Foot and Musculoskeletal System NEC****(WA) Ankle joint**

Includes: articular surface of distal tibia and fibula; bursa, capsule, cartilage, synovial lining of ankle, malleolus [lateral and medial]; tibiotalar joint; supratolar joint

(WB) Foot ligaments

Includes: Ankle ligaments; Calcaneofibular ligament; Deltoid ligament; Internal collateral, lateral, lateral collateral ligaments; Plantar ligament; Talocalcaneal ligament; Talofibular ligament; Tibiocalcaneal ligament; Tibiofibular ligament; Tibionavicular ligament

(WE) Tarsal bones and intertarsal joints [hindfoot, midfoot]

Includes: Tarsal bones of midfoot (or hindfoot): Calcaneus, Cuboid, Cuneiform, Navicular, Talus; Capsule, cartilage and ligamentous attachments of intertarsal joints- Calcaneocuboid joint, Cuboideonavicular joint, Cuneocuboid joint, Cuneonavicular joint, Intercuneiform joint, Midtarsal joint NEC, Subtalar joint, Talar joint, Talocalcaneonavicular joint; Hindfoot NOS; Midfoot NOS

(WG) Foot**(WI) First metatarsal bone and first metatarsophalangeal joint**

Includes: 1 st MTP joint

(WJ) Tarsometatarsal joints, other metatarsal bones and other metatarsophalangeal joints [forefoot]

Includes: forefoot NOS; metatarsal bones; metatarsal joints; sesamoid bones; tarsal joint NOS

(WK) First phalanx of foot

Include: Hallux

(WL) Phalanx of other foot

Includes: tuft of toe

(WM) Other Interphalangeal Joints of Toe

Includes: phalangeal joint(s) of toe (IP, DIP, PIP) NOS

(WN) 1st Interphalangeal Joint of Toe

Includes: Phalangeal joint of hallux (or great toe)

(WT) Tendons of ankle and foot

Includes: Achilles tendon; pes anserinus tendon; peroneus [brevis, longus] tendon; tendocalcaneus tendon; fibular peroneal retinaculum; plantar aponeurosis of foot; tendons of foot; tendons of ankle

(WV) Soft tissue of the foot and ankle

Includes: Abductor and adductor hallucis muscles; Abductor digiti muscle of foot; Extensor digitorum brevis muscle of foot; Interossei, intrinsic and extrinsic muscles of foot; Peroneus [longus, brevis, tertius] muscles; Tibialis posterior, flexor digitorum longus, flexor hallucis longus muscles; [Quadratus] plantaris; Plantar fascia; Soft tissue [neoplasm] arising in or extending into foot; Wound, soft tissue of foot and ankle

(WX) Bone NEC**(WY) Bone marrow****(WZ) Musculoskeletal system NEC****(Y) Skin and Subcutaneous Tissue and Breast****(YA) Scalp**

Includes: Hair-bearing skin of scalp; Hair and hair follicles

(YB) Skin of forehead

Includes: eyebrow alone, forehead alone, forehead and eyebrow

(YC) Skin of ear

Includes: ear lobe, [lobule], external auricular canal

(YD) Skin of nose**(YE) Lip**

Includes: mucosa of lip

(YF) Skin of face

Includes: Skin of cheek; Skin of chin; Skin of overlapping sites of face; Skin of overlapping sites of face, neck and scalp

(YG) Skin of neck

Includes: overlapping sites of skin of neck with skin of scalp

(YK) Nipple

Includes: areola; accessory nipple

(YL) Lactiferous duct

Includes: mammary ducts

(YM) Breast

Includes: Fascial covering of breast; Lactiferous ducts with breast; Lobular tissue of breast; Nipple and areolar tissue with breast; Retromammary space; Skin of breast with breast; Suspensory ligaments of Cooper (intralobular fascia)

(YR) Skin of axillary region

Includes: Axillary sweat glands

(YS) Skin of abdomen and trunk

Includes: Skin of abdomen; Skin of back; Skin of breast; Skin of buttock; Skin of chest; Skin of thorax; Skin of trunk (single, multiple, overlapping sites)

(YT) Skin of arm

Includes: Skin of shoulder, arm, and wrist; Skin of arm with hand

(YU) Skin of hand

Includes: skin of finger; skin of hand with arm involvement

(YV) Skin of leg

Includes: skin of thigh, leg and ankle;

(YW) Skin of foot

Includes: skin of toes; skin of foot (with or without leg involvement)(overlapping sites)

(YX) Nail

Includes: nail bed; nail matrix; nail plate; lateral and proximal nail fold

(YY) Skin of surgically constructed sites
Includes: external stoma, pacemaker pocket

(YZ) Skin NEC
Includes: skin of overlapping sites of body NEC; skin of overlapping (or multiple) sites involving trunk with arm or leg

(Z) Total Body

(ZX) Multiple body sites NEC

(ZZ) Total body
Includes: whole body NOS

Section 2 Anatomy Site

(A) Brain and Spinal Cord

(AA) Meninges and dura mater of brain
Includes: dura mater of brain, epidural space [of brain], subdural space [of brain], fossa (frontal, temporal and posterior clinoid), falx arachnoid tissue of brain

(AC) Ventricles of brain
Includes: aqueduct of Sylvius, cerebral ventricles [lateral, 3rd and 4th], choroid plexus of 3rd and 4th ventricles, Dandy Walker malformation of 4th ventricle, foramen of Monro, Luschka and Magendie

(AE) Thalamus and basal ganglia
Includes: caudate, hypothalamus, fornix, globus pallidus, internal capsule, lemniscal pathway, lentiform nuclei, putamen, superior and inferior vagal ganglia

(AF) Pituitary region
Includes: cavernous sinus, craniobuccal pouch hypophysis cerebri, hypophyseal fossa, parasella, petrosal sinus, pituitary fossa, Rathke's pouch, sella turcica, sella, suprasella

(AG) Pineal gland
Includes: pineal recess

(AJ) Cerebellum

(AK) Cerebellopontine angle
Includes: choroid plexus of cerebellopontine angle, cisterna, acoustic [vestibular] nerve within the cerebellopontine angle, facial nerve [intracranial] within cerebellopontine angle

(AN) Brain
Includes: ansa, brain NEC, cingulum, cingulate cortex, corpus callosum, lobes of brain [parietal, occipital, frontal and temporal], septum pellucidum

(AP) Brain stem
Includes: midbrain, pons, medulla oblongata, mesencephalon, cerebral peduncle, tectal plate, Chiari malformations of brain stem [hindbrain]

(AW) Spinal cord
Includes: cauda equina, cervical and thoracic spinal cord, conus medullaris, intramedullary spine, spinal nerve roots, spinal nerve NEC

(AX) Spinal canal and meninges
Includes: cerebral spinal fluid (CSF) of spine, meninges of spinal cord, dura of spinal cord, spinal theca, subarachnoid (and subdural) space of spine, epidural (or extradural) space of spine

(AZ) Central nervous system

(B) Nerves

(BA) Cranial nerves

Includes: intracranial nerves, olfactory CN I, optic CN II, oculomotor CN III, trochlear CN IV, abducent CN VI, trigeminal CN V, gasserian ganglion[intracranial portion], facial CN VII, glossopharyngeal CN IX [intracranial], hypoglossal CN XII [intracranial], vagus CN X, accessory CN XI [intracranial]

(BB) Other nerves of head and neck

Includes: facial nerve, accessory nerve CN XI [extracranial], cervical plexus [C2-C4], cranial nerve [extracranial], dental nerve, facial nerve CNVII [extracranial], gasserian ganglion [extracranial portion], glossopharyngeal CN IX [extracranial], hypoglossal nerve CN XII [extracranial], laryngeal nerve, mental nerve, pharyngeal nerve, transverse [superficial] cervical nerve, trigeminal nerve [extracranial], vagus nerve, head and neck region

(BD) Nerve(s) of the ear

Includes: vestibular nerve, ampullary nerve [anterior, lateral and posterior], auditory nerve, auricular nerve [greater], auriculotemporal nerve, cochlear nerve, saccular nerve, tympanic nerve, utricular nerve, vestibulocochlear nerve CN VIII

(BF) Sympathetic nerves

Includes: celiac nerve, parasympathetic ganglia, peripheral autonomic nervous system, perivascular plexus, splanchnic nerve, stellate ganglia

(BG) Brachial plexus

Includes: antebrachial nerve, brachial plexus [lateral, medial and posterior cord], cervical spinal nerves [C5, C6, C7, C8 and T1], intercostal nerve, scalenus plexus, supraclavicular plexus, scapular nerve, spinal nerves [C5, C6, C7, C8 and T1], thoracic nerve, thoracic spinal nerve [T1], thoracodorsal nerve

(BL) Nerves of trunk

Includes: phrenic nerve, vagus nerve

(BP) Nerve(s) of hand

Includes: nerves at palmar level, palmar median nerve, digital nerve NOS, median digital nerve, radial digital nerve

(BR) Nerves of arm

Includes: nerves of upper arm and elbow, nerves of forearm and wrist

(BS) Nerve(s) of pelvis, hip and thigh (and lower trunk)

Includes: femoral nerve, femoral cutaneous nerve, genitofemoral nerve, ilioinguinal nerve, lumbar plexus, obturator nerve, pelvic plexus, pudendal nerve, sacral plexus, sciatic nerve NOS

(BT) Nerve(s) of lower leg

Includes: nerves at ankle, nerves at knee, peroneal nerve NEC, saphenous nerve, sural nerve, tarsal tunnel, tibial nerve NEC, sciatic nerve at tibial level

(BU) Nerves of leg**(BX) Peripheral nerves NEC**

Includes: nerve NEC

(C) Eye and Ocular Adnexa**(CC) Cornea**

Includes: corneal epithelium, Bowman's membrane [layer][anterior lamina] stroma, Descemet's membrane [posterior elastic lamina] corneal endothelium

(CD) Sclera

Includes: limbus [border], sclerocorneal junction [corneoscleral junction], Schlemm's canal

(CG) Ciliary body**(CH) Iris**

Includes: pupil

(CJ) Anterior Chamber

Includes: anterior chamber angle, anterior segment, trabecular meshwork

(CM) Vitreous**(CN) Retina****(CP) Soft tissue of orbit and eyeball NEC**

Includes: eyeball NOS, soft tissue of orbit, fascia of eye

(CQ) Ocular muscles and tendons

(CS) Conjunctiva
Includes: inner eyelid

(CU) Lacrimal excretory system
Includes: lacrimal ducts, lacrimal sac, lacrimal gland, nasolacrimal punctum, nasolacrimal canaliculi, nasolacrimal sac, nasolacrimal duct

(CX) Eyelid NEC
Includes: upper eyelid with lower eyelid, lower eyelid, upper eyelid, skin of eyelid, eyelashes, eyelash follicles, canthus, epicanthal fold, tarsus, meibomian glands, eyelid retractors [Muller's muscle and capsulo-palpebral fascia]

(CZ) Eye NEC
Includes: eyeball and surrounding structure, eye socket [of eviscerated eye], lens

(D) Ear and Mastoid (Process)

(DA) External ear NEC
Includes: auricle, pinna, cartilage of ear [helix, fossa triangularis, scapha, concha, tragus, antitragus, antihelix]

(DE) External auditory meatus
Includes: external auditory canal

(DF) Tympanic membrane
Includes: eardrum, plica chordae tympani

(DJ) Eustachian tube
Includes: auditory tube

(DK) Middle ear NEC
Includes: attic, tympanic cavity (with contents), tympanomastoid cavity (with contents), middle ear NOS, ossicular chain NEC

(DL) Mastoid (process)
Includes: mastoid bone, mastoid process, petrous pyramid air cells, petrous apex, mastoid portion of temporal bone

(DM) Cochlea

(DR) Inner ear NEC
Includes: inner ear NOS, vestibular system, labyrinth NOS, vestibule, semi-circular canals, semi-circular ducts, osseous labyrinth, membranous labyrinth, round window, oval window

(DZ) Ear NEC

(E) Musculoskeletal Tissue of the Head, Nasal Cavity and Sinuses

(EA) Cranium
Includes: frontal, parietal, temporal, occipital bone, cranial suture or ligament, cranial base, skull NOS

(EB) Zygoma
Includes: zygomatic arch(es), malar bone, facial bone NOS

(ED) Maxilla
Includes: alveolar process [ridge, arch]

(EE) Mandible

(EL) Joint, temporomandibular [TMJ]
Includes: joint capsule, bursa, articular disc, meniscus, ligament, synovial lining [cavity], coronoid process of mandible (alone) mandibular condyle (alone)

(EN) Alveolar ridge _ mandibular
Includes: mandibular alveolar process, arch

(EP) Muscles of head and neck
Includes: muscles of head: occipitofrontalis, pterygoid, temporalis, temporoparietal, zygomaticus major and minor palatini, muscles of the face, muscles of the neck: buccinator, cricothyroid, digastric, geniohyoid, mylohyoid, omohyoid, platysma, pterygoid, scalene, sternocleidomastoid, sternohyoid, thyrohyoid. Fascia of hae and neck: temporal, buccopharyngeal, parotid and masseter

(EQ) Soft tissue of head and neck

Includes: soft tissue of head and neck NOS, soft tissue (abscess, hematomas, wound or neoplasm, sinuses, fistulae)

(ES) Nasal cartilage

Includes: septal cartilage, alar cartilage [lower lateral], nasal cartilage [upper, lateral], nasal cartilage alone, columella Excludes: nasal cartilage with bone (see ET)

(ET) Nose

Includes: nasal bones, turbinates, nasal cavity, nose NEC, nasal fossa, vestibule, choanae, meatus and mucosa, nasal bones with cartilage, nasal cartilage

(EY) Paranasal sinuses

Includes: multiple nasal sinuses (2 or more of the following: ethmoidal, sphenoidal, maxillary, frontal), pansinus(es), nasal sinus NOS, nasal sinus NEC

(F) Oral Cavity and Pharynx

(FA) Nasopharynx

(FB) Hard palate

Includes: palatine bone, palate NOS

(FC) Soft palate

(FD) Gingiva

Includes: gums, oral vestibule, periodontal pocket

(FG) Oral and buccal mucosa

Includes: buccal mucosa [fat pad, glands], buccal sulcus, labial frenulum, labial sulcus, oral papilla, oral mucosa NEC

(FH) Floor of mouth

Includes: retromolar trigone, submandibular space, sublingual space

(FJ) Tongue

Includes: muscles of tongue [intrinsic and extrinsic] genioglossus styloglossus, hyoglossus, lingual frenulum, lingual sulcus, sublingual tonsil [lymph follicles on posterior third of tongue]

(FK) Mouth

Includes: Oral cavity NEC

(FP) Salivary glands and ducts NEC

(FQ) Uvula

(FR) Tonsils and adenoids

Includes: adenoid, palatine tonsil, pharyngeal tonsil

(FT) Thyroglossal duct

(FU) Thyroid gland

Includes: thyroid isthmus Excludes: thyroglossal duct or tract (see 2.FT)

(FV) Parathyroid gland

(FX) Oropharynx

Includes: retromaxillary, suprahyoid, posterior and lateral oropharynx, valleculae, hypopharynx, oropharynx with nasopharynx, pharynx NOS

(G) Respiratory System

(GE) Larynx NEC

Includes: larynx NOS, pharynx with larynx, glottis (vocal cord), supraglottis, subglottis, laryngeal cartilage

(GJ) Trachea

(GK) Thymus

Includes: ectopic thymus tissue

(GM) Bronchus NEC

Includes: main bronchus NOS, hilus of lung, left main bronchus, right main bronchus, bronchus NOS, bronchial region, carina

(GT) Lung NEC

Includes: lobe of lung, pulmonary NOS, base of lung, borders and surface of lung, parenchyma of lung, multiple overlapping sites of lung

(GV) Pleura

Includes: parietal pleura, visceral pleura, pleural cavity, pleural space

(GW) Mediastinum

Includes: anterior mediastinum, posterior mediastinum, superior mediastinum, inferior mediastinum, middle mediastinum, mediastinal wall and cavity

(GX) Diaphragm**(GY) Thoracic cavity NEC**

Includes: Chest NOS, sinuses/fistulous tract

(GZ) Respiratory system NEC**(H) Heart and Related Structures****(HZ) Heart NEC**

Includes: combined right and left heart, heart NOS, heart tissue NEC

(I) Great Vessels**(ID) Aorta NEC**

Includes: overlapping sites of aorta [thoracoabdominal aorta], aorta NOS

(IJ) Coronary arteries

Includes: right and left coronary arteries and all tributaries [circumflex, left anterior descending, right marginal branch]

(IL) Vessels of heart

Includes: coronary arteries and/or veins

(IM) Pulmonary artery

Includes: ductus arteriosus, pulmonary artery [main, right, left], pulmonary artery bifurcation

(J) Upper Vessels**(JE) Carotid artery**

Includes: common carotid arteries, internal carotid arteries, external carotid arteries, carotid bifurcation

(JW) Intracranial vessels

Includes: ophthalmic vessels, basilar arteries, Circle of Willis, cerebral vessels [anterior, middle, posterior communicating], anterior choroidal vessels, meningeal vessels [anterior, posterior], cerebellar vessels, pontine artery, dural venous sinuses [superior sagittal sinus, inferior sagittal sinus, straight sinus, transverse sinuses, sigmoid sinuses, cavernous sinuses, superior petrosal sinuses, inferior petrosal sinuses], intracranial vessels NOS

(JX) Other vessels of head, neck and spine NEC

Includes: superior thyroid vessels, ascending pharyngeal vessels, lingual, facial and occipital vessels, posterior auricular vessels, superficial temporal vessels, maxillary vessels, hypophyseal vessels, ganglionic vessels, caroticotympanic vessels, pterygoid vessels, cavernous vessels, subclavian vessels, vertebral vessels, extracranial vessels NEC, jugular veins

(JY) Thoracic vessels NEC

Includes: mediastinal vessels, bronchial vessels, sternal vessels, anterior intercostal vessels, superior epigastric vessels, esophageal vessels, pulmonary vein, vena cava (superior and inferior), brachiocephalic arteries, internal mammary artery

(JZ) Vessels of arm NEC

Includes: arteries and/or veins of arm

(K) Lower Body Vessels**(KE) Abdominal arteries NEC**

Includes: mesenteric arteries [inferior, superior], gastroepiploic arteries, renal arteries, celiac arteries, hepatic arteries, common iliac arteries, gastric arteries, splenic arteries, umbilical arteries, inferior phrenic arteries, mesenteric artery with aorta, abdominal arteries NEC

(KG) Arteries of leg NEC

Includes: femoral arteries, popliteal arteries, tibial arteries [anterior, posterior], dorsalis pedis arteries, lower limb arteries NEC

(KQ) Abdominal veins NEC

Includes: common iliac veins, portal veins, renal veins, suprarenal veins, mesenteric veins [superior, inferior], splenic veins, hepatic veins, visceral veins, abdominal veins NOS

(KR) Veins of leg NEC

Includes: saphenous veins, femoral veins, popliteal veins, tibial veins [anterior, posterior], peroneal veins, perforator veins, lower limb veins NOS

(KT) Vessels of the pelvis, perineum and gluteal region

Includes: internal and external portion of iliac vessels, epigastric vessels, vesical vessels, uterine vessels, vaginal vessels, rectal vessels, obturator vessels, internal pudendal artery, penile vessels, pelvic vessels NEC

(L) Combined Sites for Congenital Heart Anomalies and Circulatory System NEC**(LZ) Circulatory system NEC**

Includes: blood

(M) Lymphatic System**(MA) Lymph node(s), head region**

Includes: preauricular [anterior auricular] nodes, postauricular [retroauricular] nodes, occipital nodes, facial nodes, parotid nodes, buccal nodes

(MC) Lymph node(s), cervical

Includes: Cervical nodes [superficial and deep], level I nodes [submandibular and submental trigone], level II nodes [upper jugular], level III nodes [middle jugular], level IV nodes [lower jugular], level V nodes [posterior triangle including spinal accessory, transverse cervical and supraclavicular nodes], level VI nodes [anterior/central compartment including paratracheal, pretracheal, parathyroid, precricoid, Delphian and prelaryngeal nodes located above the suprasternal notch], retropharyngeal nodes

(MD) Lymph node(s), axillary

Includes: deep axillary nodes, superficial axillary nodes, lateral nodes, pectoral nodes, subscapular nodes, apical nodes [subclavicular], central nodes

(ME) Lymph node(s), mediastinal

Includes: anterior and posterior mediastinal nodes, aortic nodes [subaortic and para-aortic nodes of the ascending aorta and aortic arch], inferior mediastinal nodes [subcarinal, paraesophageal and pulmonary ligament nodes], tracheobronchial nodes [tracheal/paratracheal, deep and inferior, tracheobronchial, bronchopulmonary and pulmonary], superior mediastinal nodes [pre-tracheal, upper paratracheal, pre-carinal and lower paratracheal nodes located below the suprasternal notch]

(MF) Lymph node(s), intrathoracic NEC

Includes: mediastinal nodes with other intrathoracic nodes, parasternal nodes [internal mammary], intercostal nodes, diaphragmatic nodes, nodes of the thoracic organs, parietal nodes of thoracic wall

(MG) Lymph node(s), intra-abdominal

Includes: retroperitoneal nodes, intra-aortocaval nodes [preaortic, lateral aortic, periaortic nodes located below the diaphragm], para-caval nodes, retrocrural nodes, mesenteric nodes, nodes of the abdominal organs

(MH) Lymph node(s), pelvic

Includes: external iliac nodes, common iliac nodes, internal iliac nodes, circumflex nodes, sacral nodes, intrapelvic nodes, obturator nodes, paracervical nodes, parametrial nodes, presymphysical nodes

(MJ) Lymph node(s), inguinal

Includes: superficial and deep inguinal nodes, inguinofemoral nodes, lymph nodes of groin region

(MK) Lymph node(s), extremity NEC

Includes: anterior tibial nodes, popliteal nodes, femoral nodes, tibial nodes, other lower limb nodes, brachial nodes, anti-cubital nodes, and other upper limb nodes.

(MM) Thoracic duct**(MZ) Lymphatic system NEC**

Includes: lymphatic vessels NOS, lymphatic vessels of the head and neck region, thoracic region, abdomen/pelvis, arm, leg

(N) Digestive System**(NA) Esophagus**

Includes: Cardioresophageal junction, cardiac orifice, ostium, notch, esophagus [cervical, thoracic and abdominal]

(NF) Stomach

Includes: Body, fundus of stomach, body of stomach with pylorus, pyloric antrum, gastric antrum, stomach NEC, NOS

(NK) Small intestine

Includes: small bowel, duodenum, jejunum and ileum, Meckel's diverticulum

(NM) Large intestine

Includes: ascending colon, cecum, diaphragmatic flexure, hepatic flexure, sigmoid flexure, colon [right, left, NOS], transverse colon, descending colon, ileocecal valve, iliopelvic colon, splenic flexure, sigmoid colon

(NQ) Rectum

Includes: rectosigmoid juncture [colon], pelvirectal juncture, anorectal juncture above dentate line

(NT) Anus

Includes: anorectal juncture, anal sphincter, anal cushion, hemorrhoidal plexus [lying within anal cushion], levator ani muscle, muscularis propria of anal canal

(O) Hepatobiliary Tract**(OA) Liver**

Includes: lobe of liver, segment I through VIII of liver, caudate, quadrate of liver, liver NOS, subphrenic space

(OB) Spleen**(OD) Gallbladder**

Includes: fundus, body, neck of gallbladder, Luschka's ducts of gall bladder [wall], gall bladder with associated bile ducts

(OE) Bile ducts

Includes: biliary ducts, common bile duct [CBD], cystic duct, hepatic ducts [intra and extra], ampulla and sphincter of Oddi, papilla [ampulla] and sphincter of Vater, hepatopancreatic ampulla, pancreatic duct, duct of Santorini, Wirsung

(OJ) Pancreas

Includes: head, body, tail of pancreas, islets of Langerhans [endocrine pancreas]

(OT) Abdominal cavity

Includes: peritoneum, peritoneal [retroperitoneal] cavity, pelvic cavity, extraperitoneal space, subdiaphragmatic space, omentum, mesentery, sinuses/fistula of cavity, neoplasm which occupies the abdominal cavity and whose point of origin cannot easily be assigned to a single point of origin

(OW) Surgically constructed sites in digestive and biliary tract

Includes: gastric pouch, pelvic pouch, ileal reservoir, Kock pouch, roux en y limb [of anastomosis], esophagostomy, gastrostomy, duodenostomy, jejunostomy, ileostomy, enterostomy, colostomy, neoesophagus, neopharynx, neorectum

(OZ) Digestive system NEC**(P) Urinary System****(PB) Adrenal gland****(PC) Kidney**

Includes: ectopic kidney, kidney NOS, kidney with renal pelvis, renal capsule, renal cortex, renal medulla, kidney with adrenal gland

(PE) Renal pelvis

Includes: renal calyces, ureteropelvic junction [UPJ]

(PG) Ureter

Includes: ectopic ureter, ureter NOS, ureteral meatus, ureterovesical junction and orifice(s)

(PM) Bladder

Includes: bladder NOS, bladder with bladder neck, bladder neck, dome of bladder, intraluminal tissue of bladder, trigone of bladder, urachus

(PQ) Urethra

Includes: urethral sphincter, peri-urethral gland, Skene's gland [duct], urethra [bulbous, penile, prostatic], urethral meatus, urethral valves

(PV) Surgically created urinary tract

Includes: pyelostomy tract, nephrostomy tract, ureterostomy tract, cystostomy tract, urethrostomy tract, ileoconduit

(Q) Male Genital Organs**(QE) Penis**

Includes: Buck's fascia, corpus spongiosum, corpus cavernosa, glans penis, prepuce (foreskin) with body of penis, skin of penis

(QG) Scrotum

Includes: dartos tunic, scrotal skin, spermatic fascia, scrotum with contents

(QJ) Epididymis

Includes: organ of Giraldes [paradidymis], vas aberrans of Haller, appendix epididymis

(QM) Testis

Includes: appendix testis, cyst of Morgagni, ectopic testis, tunica vaginalis

(QN) Vas deferens**(QP) Spermatic cord**

Includes: spermatic vein

(QQ) Seminal vesicles

Includes: ejaculatory duct

(QT) Prostate**(QZ) Male genital tract NEC**

Includes: male genital tract NOS

(R) Female Genital Tract**(RB) Ovary**

Includes: ligaments of ovary, ovary NOS, ovas

(RF) Fallopian tube

Includes: fimbria of fallopian tube, hydatid of Morgagni, uterine tube

(RJ) Uterine ligaments**(RM) Uterus and surrounding structures**

Includes: body of uterus, cervix with body of uterus, uterus NOS, endometrium

(RN) Cervix

Includes: cervix, supravaginal cervix, uterine orifice [external os], canal of cervix

(RS) Vagina

Includes: fornix [anterior, posterior, cul-de-sac], vaginal orifice, vaginal vault, vaginal walls [anterior, posterior]

(RW) Vulva

Includes: Bartholin's glands [greater vestibular glands], bulb of vestibule, clitoris, hymen, labia [minora, majora], mons pubis, vestibule, vulva with perineum

(RY) Perineum

Includes: male perineum

(RZ) Female genital tract NEC

Includes: pelvic [female] region

(S) Musculoskeletal System: Spine, Trunk and Pelvis**(SA) Atlas and axis**

Includes: atlantoaxial joint, cervical spinal vertebrae: C1 and C2 [with or without C3], occipitoatlantal joint, transverse ligament of occipitoatlantal joint

(SC) Spinal vertebrae

Includes: transverse process of vertebrae, vertebral joints [facet, interspinous ligament], vertebral column, lumbosacral spinal vertebrae [vertebrae L1-S2], spine NOS

(SE) Intervertebral Disc

Includes: annulus fibrosus, nucleus pulposus

(SF) Sacrum and coccyx

(SG) Muscles of the back

Includes: transversus aponeurosis, thoracolumbar fascia, muscles and tendons of back NOS, erector spinal vertebrae, iliocostalis, latissimus dorsi, longissimus thoracis and colli, rhomboid, semi-spinalis and serratus posterior muscles

(SH) Soft tissue of the back

Includes: abscess arising in or extending as deep as muscle or tendon of back, hematoma arising in or extending as deep as muscle or tendon of back, neoplasm arising or extending as deep as muscle or tendon of back, soft tissue wound of back

(SK) Sternum

Includes: manubrium, sternebrae body, xiphoid process

(SL) Ribs

Includes: cartilage and ligaments [intercostal and sternocostal] of ribs

(SM) Clavicle

Includes; collar bone

(SN) Scapula

Includes: inter-thoracoscapular joint, shoulder blade NOS

(SQ) Pelvis

Includes: acetabulum alone, iliac crest, ilium, ischium, pelvis with pubis with acetabulum with femoral head [when affected in its entirety (e.g. amputation)]

(SW) Pubis

Includes: pubis alone, pubis ramus, symphysis pubis

(SY) Muscles of the chest and abdomen

Includes: internal intercostal, pectoralis major [medial and lateral], serratus anterior, transversus thoracis and teres muscles; muscles and tendons of chest NOS; chest wall NOS; internal and external oblique, rectus abdominis, transversus abdominis [internal and external], inguinal ligament, linea alba and semilunaris; muscles and tendons of abdomen NOS; abdominal wall; deep fascia [endo suprapleural membrane, transversalis, obturator internus]

(SZ) Soft tissue of the chest and abdomen

Includes: abscess arising in or extending as deep as chest or abdominal wall; hematoma arising in or extending as deep as chest or abdominal wall; neoplasm arising in or extending as deep as chest or abdominal wall; wound of soft tissue or chest and abdomen

(T) Shoulder and Arm (excluding hand and wrist)**(TA) Shoulder joint**

Includes: bursa, capsule, cartilage, ligament and synovial lining of coracohumeral and glenohumeral joints; shoulder ligaments [coracohumeral, glenohumeral ligaments, glenoid labrum, humeral and rotator interval]; glenoid cavity, labrum; humeral head and surgical neck; greater tuberosity [tubercle] of humerus; shoulder joint NOS

(TB) Acromioclavicular and sternoclavicular joints

Includes: subacromial bursa, and capsule; acromioclavicular, coracoacromial, coracoclavicular, coracohumeral ligaments; sternoclavicular articular disc; sternoclavicular, costoclavicular and interclavicular ligaments; acromion; coracoid process; distal end of clavicle with acromion; subacromial space

(TC) Rotator cuff

Includes: infraspinatus, subscapularis, supraspinatus and teres minor muscles and tendons

(TK) Humerus

Includes: epiphysis and periosteum of humerus; supracondylar ridge [lateral and medial] of humerus

(TM) Elbow joint

Includes: Bursa, capsule, cartilage, ligaments and synovial lining of: radiohumeral joint, ulnohumeral joint, elbow joint NOS, articular surface of distal humerus, articular surface of proximal radius and ulna; distal humerus capitulum, epicondyles, (medial and lateral), trochlea; radial head and neck; ulnar coronoid process, olecranon, tubercle

(TV) Radius and ulna

Includes: radius NOS, tuberosity of radius, ulna NOS, tuberosity of ulna, epiphysis or periosteum of radius and ulna

(TX) Soft tissue of arm NEC

Includes: soft tissue neoplasm arising in or extending into soft tissue of arm [any site]; wound of soft tissue of arm, muscles of the arm [around shoulder], tendons of the arm, muscles of the forearm [around elbow], tendons of the forearm

(TZ) Arm NEC

(U) Hand and Wrist**(UB) Wrist joint**

Includes: articular disc, bursa, capsule, cartilage, ligament and synovial lining; radiocarpal, ulnocarpal joints; radial tubercle; ulnar head; styloid process: radius and ulna

(UC) Distal radioulnar joint and carpal joints and bones

Includes: carpal joints; carpal bones: capitate [os magnum], hamate [unciform], lunate [semilunar], navicular [scaphoid], pisiform, trapezoid, triquetrum [cuneiform of carpus], carpometacarpal joint, intercarpal joints, midcarpal joints, radioulnar joint, volar wrist ligaments; capsule, cartilage ligament and synovial lining of carpal and radioulnar joints

(UF) Other Metacarpal bones**(UJ) Phalanx of hand**

Includes: tuft of distal phalanx, phalanx of hand, bones of fingers NOS

(UL) Joints of finger and hand NEC

Includes: metacarpophalangeal joint(s), interphalangeal joints

(UY) Soft tissue of the wrist and hand

Includes: Extrinsic muscles of hand and wrist- Extensor wad of three [extensor carpi radialis longus and brevis, brachioradialis]; Flexor wad of five- [flexor carpi ulnaris and radialis, palmaris longus, flexor digitorum superficialis and profundus, pronator teres and quadratus, supinator]; Flexor pollicis longus; Extensor digitorum communis, extensor indicis proprius, extensor pollicis longus and brevis; Abductor pollicis longus and brevis; Adductor pollicis; Dorsal extensor [fascial] compartments; Intrinsic muscles of hand- Lumbricales, dorsal interossei, volar interossei; Thenar [opponens pollicis, abductor pollicis brevis, flexor pollicis brevis]; Hypothenar [opponens digiti minimi, flexor digiti quinti brevis, abductor digiti quinti or minimi]; Muscles of hand, thumb and fingers NOS; Retinacula [digital, flexor and extensor]; Palmar fascia; Fascia of hand NOS; Deep palmar space; Thenar space; Neoplasm of soft tissue [arising in or extending into muscle] of hand or wrist; Wounds of soft tissue of wrist and hand

(V) Hip and Leg**(VA) Hip joint**

Includes: acetabulum with femoral head or neck and supporting joint structures [bursa, capsule, cartilage, synovium, ligament, ligamentum teres]; hip joint NOS entire pelvis (see SQ)

(VC) Femur

Includes: trochanter [greater and lesser] of femur; intertrochanter of femur; petrochanter of femur

(VG) Knee joint

Includes: articular surface of proximal tibia and fibula; articular surface of distal femur; bursa, capsule, cartilage, ligaments of knee NEC; femoral medial and lateral condyles and epicondyles; synovial lining of tibiofibular and tibiofemoral joints of knee; tibial plateau, medial and lateral condyles; knee NOS

(VK) Meniscus of knee

Includes: lateral, medial meniscus; posterior meniscomfemoral ligament; semilunar cartilage

(VN) Cruciate with collateral ligaments of knee

Includes: cruciate with collateral ligaments with or without meniscus of knee

(VP) Patella

Includes: patellofemoral joint; patellar ligaments; knee cap

(VQ) Tibia and fibula

Includes: tibia NOS; fibula NOS; epiphysis of tibia and fibula; periosteum of tibia and fibula; tuberosity of tibia; neck of fibula; skeletal tissue below knee and above ankle

(VX) Soft tissue of leg

Includes: Soft tissue of leg (any site); Soft tissue of hip and thigh; Wound of leg; Neoplasm arising in or extending as deep as muscle or tendon, lower leg, muscles and tendons of hip, thigh and lower leg

(VZ) Leg NEC**(W) Ankle and Foot****(WA) Ankle joint**

Includes: articular surface of distal tibia and fibula; bursa, capsule, cartilage, synovial lining of ankle, malleolus [lateral and medial]; tibiotalar joint; supratolar joint

(WH) Foot and toe joints

Includes: intertarsal joints [hindfoot, midfoot] . tarsometatarsal joints, metatarsophalangeal joints, interphalangeal joints

(WL) Phalanx of foot

Includes: hallux, tuft of toe

(WQ) Tarsal bones (alone)**(WS) Metatarsal bones (alone)****(WV) Soft tissue of the foot and ankle**

Includes: Abductor and adductor hallucis muscles; Abductor digiti muscle of foot; Extensor digitorum brevis muscle of foot; Interossei, intrinsic and extrinsic muscles of foot; Peroneus [longus, brevis, tertius] muscles; Tibialis posterior, flexor digitorum longus, flexor hallucis longus muscles; [Quadratus] plantaris; Plantar fascia; Soft tissue [neoplasm] arising in or extending into foot; Wound, soft tissue of foot and ankle, tendons of ankle and foot, ligaments of foot

(WY) Bone marrow**(WZ) Musculoskeletal system NEC****(Y) Skin and Subcutaneous Tissue and Breast****(YA) Scalp**

Includes: Hair-bearing skin of scalp; Hair and hair follicles

(YB) Skin of forehead

Includes: eyebrow alone, forehead alone, forehead and eyebrow

(YC) Skin of ear

Includes: ear lobe, [lobule], external auricular canal

(YD) Skin of nose**(YE) Lip**

Includes: mucosa of lip

(YF) Skin of face

Includes: Skin of cheek; Skin of chin; Skin of overlapping sites of face; Skin of overlapping sites of face, neck and scalp

(YG) Skin of neck

Includes: overlapping sites of skin of neck with skin of scalp

(YK) Nipple

Includes: areola; accessory nipple

(YL) Lactiferous duct

Includes: mammary ducts

(YM) Breast

Includes: Fascial covering of breast; Lactiferous ducts with breast; Lobular tissue of breast; Nipple and areolar tissue with breast; Retromammary space; Skin of breast with breast; Suspensory ligaments of Cooper (intralobular fascia)

(YR) Skin of axillary region

Includes: Axillary sweat glands

(YS) Skin of abdomen and trunk

Includes: Skin of abdomen; Skin of back; Skin of breast; Skin of buttock; Skin of chest; Skin of thorax; Skin of trunk (single, multiple, overlapping sites)

(YT) Skin of arm

Includes: Skin of shoulder, arm, and wrist; Skin of arm with hand

(YU) Skin of hand

Includes: skin of finger; skin of hand with arm involvement

(YV) Skin of leg

Includes: skin of thigh, leg and ankle

(YW) Skin of foot

Includes: skin of toes; skin of foot (with or without leg involvement)(overlapping sites)

(YX) Nail

Includes: nail bed; nail matrix; nail plate; lateral and proximal nail fold

(YZ) Skin NEC

Includes: skin of overlapping sites of body NEC; skin of overlapping (or multiple) sites involving trunk with arm or leg

(Z) Total body**(ZZ) Total body**

Includes: whole body NOS

Section 3 Anatomy Site**(A) Brain and Spinal Cord****(AF) Pituitary region**

Includes: cavernous sinus, craniobuccal pouch hypophysis cerebri, hypophyseal fossa, parasella, petrosal sinus, pituitary fossa, Rathke's pouch, sella turcica, sella, suprasella

(AN) Brain

Includes: ansa, brain NEC, cingulum, cingulate cortex, corpus callosum, lobes of brain [parietal, occipital, frontal and temporal], septum pellucidum

(AW) Spinal cord

Includes: cauda equina, cervical and thoracic spinal cord, conus medullaris, intramedullary spine, spinal nerve roots, spinal nerve NEC, spinal canal and meninges, cerebral spinal fluid (CSF)

(C) Eye and Ocular Adnexa**(CA) Orbit of eye****(CU) Lacrimal excretory system**

Includes: lacrimal ducts, lacrimal sac, nasolacrimal punctum, nasolacrimal canaliculi, nasolacrimal sac, nasolacrimal duct

(CZ) Eye NEC

Includes: eyeball and surrounding structures, eye socket [of eviscerated eye]

(D) Ear and Mastoid (Process)**(DL) Mastoid (process)**

Includes: mastoid bone, mastoid process, petrous pyramid air cells, petrous apex, mastoid portion of temporal bone

(DR) Inner ear NEC

Includes: inner ear NOS, inner auditory canal, vestibular system, labyrinth NOS, vestibule, semi-circular canals, semi-circular ducts, osseous labyrinth, membranous labyrinth, round window, oval window, eustachian tube, cochlea, endlymphatic sac, utricle and saccule

(DZ) Ear NEC**(E) Musculoskeletal Tissue of the Head, Nasal Cavity and Sinuses****(EA) Cranium**

Includes: frontal, parietal, temporal, occipital bone, cranial suture or ligament, cranial base, skull NOS

(EB) Zygoma

Includes: zygomatic arch(es), malar bone

(ED) Maxilla

Includes: alveolar process [ridge, arch] of maxilla

(EE) Mandible

Includes: alveolar process [ridge, arch] of mandible

(EF) Maxilla with mandible**(EI) Facial Bone Structure**

Includes: whole face NOS, facial bones NOS

(EL) Joint, temporomandibular [TMJ]

Includes: joint capsule, bursa, articular disc, meniscus, ligament, synovial lining [cavity], coronoid process of mandible (alone) mandibular condyle (alone)

(EQ) Soft tissue of head and neck

Includes: soft tissue of head and neck NOS, soft tissue (abscess, hematomas, wound or neoplasm, sinuses, fistulae, muscles of the head and neck)

(ER) Head NEC

Includes: head NOS, total head (region) (with facial bones)

(ET) Nose

Includes: nasal bones, turbinates, nasal cavity, nose NEC, nasal fossa, vestibule, choanae, meatus and mucosa, nasal bones with cartilage, nasal cartilage

(EY) Paranasal sinuses

Includes: multiple nasal sinuses (2 or more of the following: ethmoidal, sphenoidal, maxillary, frontal), pansinus(es), nasal sinus NOS

(F) Oral Cavity and Pharynx**(FE) Tooth**

Includes: root of tooth, periodontal pocket

(FK) Mouth

Includes: Oral cavity NEC

(FP) Salivary glands and ducts NEC**(FU) Thyroid gland**

Includes: thyroid isthmus

(FV) Parathyroid gland**(FX) Oropharynx**

Includes: retromaxillary, suprahyoid, posterior and lateral oropharynx, valleculae, hypopharynx, oropharynx with nasopharynx, pharynx NOS, nasopharynx, retropharynx

(FY) Soft Tissue of Neck

Includes: neck NEC, neck region

(G) Respiratory System**(GE) Larynx NEC**

Includes: larynx NOS, pharynx with larynx, glottis, laryngeal cartilage

(GT) Lung NEC

Includes: pulmonary NOS, lobe of lung, base of lung, borders and surface of lung, parenchyma of lung, multiple overlapping sites of lung

(GY) Thoracic cavity NEC

Includes: Chest NOS, sinuses/fistulous tract

(H) Heart and Related Structures**(HZ) Heart NEC**

Includes: combined right and left heart, heart NOS, heart tissue NEC

(I) Great Vessels**(ID) Aorta NEC**

Includes: overlapping sites of aorta [thoracoabdominal aorta], aorta NOS

(IJ) Coronary arteries

Includes: right and left coronary arteries and all tributaries [circumflex, left anterior descending, right marginal branch]

(IK) Coronary veins

Includes: anterior cardiac veins, coronary sinus, great coronary vein, middle cardiac veins, posterior cardiac vein, small coronary vein

(IM) Pulmonary artery

Includes: ductus arteriosus, pulmonary artery [main, right, left], pulmonary artery bifurcation

(IN) Pulmonary vein**(IP) Heart with coronary arteries****(IS) Vena cava (superior and inferior)****(J) Upper Vessels****(JE) Carotid artery**

Includes: common carotid arteries, internal carotid arteries, external carotid arteries, carotid bifurcation

(JL) Internal mammary artery

Includes: internal thoracic artery

(JM) Arteries of arm NEC

Includes: axillary arteries, brachial arteries, radial arteries, ulnar arteries, common interosseous arteries, upper limb arteries NOS

(JQ) Jugular veins

Includes: external jugular veins, internal jugular veins

(JS) Ophthalmic vessels**(JU) Veins of arm NEC****(JW) Intracranial vessels**

Includes: basilar arteries, Circle of Willis, cerebral vessels [anterior, middle, posterior communicating], anterior choroidal vessels, meningeal vessels [anterior, posterior], cerebellar vessels, pontine artery, dural venous sinuses [superior sagittal sinus, inferior sagittal sinus, straight sinus, transverse sinuses, sigmoid sinuses, cavernous sinuses, superior petrosal sinuses, inferior petrosal sinuses], intracranial vessels NOS

(JX) Other vessels of head, neck and spine NEC

Includes: superior thyroid vessels, ascending pharyngeal vessels, lingual, facial and occipital vessels, posterior auricular vessels, superficial temporal vessels, maxillary vessels, hypophyseal vessels, ganglionic vessels, caroticotympanic vessels, pterygoid vessels, cavernous vessels, vertebral vessels, extracranial vessels NEC, multiple vessels of head, neck and spine (vertebral) region, (may include subclavian vessels)

(JY) Thoracic vessels NEC

Includes: subclavian vessels (alone or with other thoracic vessels), mediastinal vessels, bronchial vessels, sternal vessels, anterior intercostal vessels, superior epigastric vessels, esophageal vessels, brachiocephalic artery

(K) Lower Body Vessels**(KC) Renal arteries****(KE) Abdominal arteries NEC**

Includes: mesenteric arteries [inferior, superior], gastroepiploic arteries, celiac arteries, hepatic arteries, common iliac arteries, gastric arteries, splenic arteries, umbilical arteries, inferior phrenic arteries, mesenteric artery with aorta, abdominal arteries NEC

(KG) Arteries of leg NEC

Includes: femoral arteries, popliteal arteries, tibial arteries [anterior, posterior], dorsalis pedis arteries, lower limb arteries NEC

(KK) Hepatic vein**(KL) Portal vein**

Includes: portal vein with splenic vein

(KQ) Abdominal veins NEC

Includes: common iliac veins, renal veins, suprarenal veins, mesenteric veins [superior, inferior], splenic veins, visceral veins, abdominal veins NOS

(KR) Veins of leg NEC

Includes: saphenous veins, femoral veins, popliteal veins, tibial veins [anterior, posterior], peroneal veins, perforator veins, lower limb veins NOS

(KT) Vessels of the pelvis, perineum and gluteal region

Includes: internal and external portion of iliac vessels, epigastric vessels, vesical vessels, uterine vessels, vaginal vessels, rectal vessels, obturator vessels, internal pudendal artery, pelvic vessels NEC

(KU) Penile vessels

(KV) Artery NEC

(KX) Vein NEC

(KY) Artery with vein

(KZ) Blood vessels NEC

Includes: blood vessels NOS

(L) Combined Sites for Congenital Heart Anomalies and Circulatory System NEC

(LZ) Circulatory system NEC

Includes: blood

(M) Lymphatic System

(ML) Lymphatic vessels head and neck region

Includes: lymphatic ducts, head and neck region

(MN) Lymphatic vessels thoracic region

Includes: lymphatic ducts of thoracic region

(MP) Lymphatic vessels of abdomen/pelvis

Includes: lymphatic ducts of abdominal and pelvic region, lymphatic structure of abdominal and pelvic region, lymphatic structures of inguinal region

(MR) Lymphatic vessels of arm

Includes: lymphatic ducts of upper extremity, lymphatic structures of upper extremity, lymphatic structures of axillary region

(MS) Lymphatic vessels of leg

Includes: lymphatic ducts of lower extremity, lymphatic structures of lower extremity

(MZ) Lymphatic system NEC

Includes: lymphatic vessels NOS, thoracic duct

(N) Digestive System

(NA) Esophagus

Includes: Cardioesophageal junction, cardiac orifice, ostium, notch, esophagus [cervical, thoracic and abdominal]

(NK) Small intestine

Includes: small bowel, duodenum, jejunum and ileum, Meckel's diverticulum

(NL) Upper gastrointestinal tract

(NM) Large intestine

Includes: ascending colon, cecum, diaphragmatic flexure, hepatic flexure, sigmoid flexure, colon [right, left, NOS], transverse colon, descending colon, ileocecal valve, iliopelvic colon, splenic flexure, sigmoid colon

(NQ) Rectum

Includes: rectosigmoid juncture [colon], pelvirectal juncture, anorectal juncture above dentate line

(NZ) Gastrointestinal tract NOS

(O) Hepatobiliary Tract

(OA) Liver

Includes: lobe of liver, segment I through VIII of liver, caudate, quadrate of liver, liver NOS, subphrenic space

(OB) Spleen

(OC) Liver with spleen

(OD) Gallbladder

Includes: fundus, body, neck of gallbladder, Luschka's ducts of gall bladder [wall]

(OE) Bile ducts

Includes: biliary ducts, common bile duct [CBD], cystic duct, hepatic ducts [intra and extra], ampulla and sphincter of Oddi, papilla [ampulla] and sphincter of Vater, hepatopancreatic ampulla, pancreatic duct, duct of Santorini, Wirsung, biliary ducts with gallbladder

(OG) Biliary ducts with pancreas**(OJ) Pancreas**

Includes: head, body, tail of pancreas, islets of Langerhans [endocrine pancreas]

(OT) Abdominal cavity

Includes: peritoneum, peritoneal [retroperitoneal] cavity, pelvic cavity, extraperitoneal space, subdiaphragmatic space, omentum, mesentery, sinuses/fistula of cavity, neoplasm which occupies the abdominal cavity and whose point of origin cannot easily be assigned to a single point of origin

(OZ) Digestive system NEC**(P) Urinary System****(PB) Adrenal gland****(PC) Kidney**

Includes: ectopic kidney, kidney NOS, kidney with renal pelvis, renal pelvis, renal capsule, renal cortex, renal medulla, kidney with adrenal gland

(PH) Kidney with ureter**(PM) Bladder**

Includes: bladder NOS, bladder with bladder neck, bladder neck, dome of bladder, intraluminal tissue of bladder, trigone of bladder, urachus

(PQ) Urethra

Includes: urethral sphincter, peri-urethral gland, Skene's gland [duct], urethra [bulbous, penile, prostatic], urethral meatus, urethral valves

(PS) Kidney with ureter with bladder**(PZ) Urinary system NEC**

Includes: urinary system and function, urinary tract, multi-site, urinary site

(Q) Male Genital Organs**(QE) Penis**

Includes: Buck's fascia, corpus spongiosum, corpus cavernosa, glans penis, prepuce (foreskin) with body of penis, skin of penis

(QG) Scrotum

Includes: dartos tunic, scrotal skin, spermatic fascia, testis, scrotum with contents

(QN) Vas deferens**(QT) Prostate**

Includes: seminal vesicles

(QZ) Male genital tract NEC

Includes: male genital tract NOS

(R) Female Genital Tract**(RF) Fallopian tube**

Includes: fimbria of fallopian tube, hydatid of Morgagni, uterine tube

(RK) Uterus with Fallopian Tube**(RM) Uterus and surrounding structures**

Includes: body of uterus, cervix with body of uterus, uterus NOS, endometrium, round ligament [canal of Nuck], cardinal ligament, uterosacral ligament, broad ligaments

(RS) Vagina

Includes: fornix [anterior, posterior, cul-de-sac], vaginal orifice, vaginal vault, vaginal walls [anterior, posterior]

(RY) Perineum

Includes: male perineum

(RZ) Female genital tract NEC

Includes: pelvic [female] region

(S) Musculoskeletal System: Spine, Trunk and Pelvis**(SC) Spinal vertebrae**

Includes: transverse process of vertebrae, vertebral joints [facet, interspinous ligament], vertebral column, lumbosacral spinal vertebrae [vertebrae L1-S2], spine NOS

(SE) Intervertebral Disc

Includes: annulus fibrosus, nucleus pulposus

(SF) Sacrum and coccyx**(SH) Soft tissue of the back**

Includes: abscess arising in or extending as deep as muscle or tendon of back, hematoma arising in or extending as deep as muscle or tendon of back, neoplasm arising or extending as deep as muscle or tendon of back, soft tissue wound of back

(SK) Sternum

Includes: manubrium, sternbrae body, xiphoid process

(SL) Ribs

Includes: cartilage and ligaments [intercostal and sternocostal] of ribs

(SM) Clavicle

Includes: collar bone

(SN) Scapula

Includes: inter-thoracoscapular joint, shoulder blade NOS

(SQ) Pelvis

Includes: acetabulum alone, iliac crest, ilium, ischium, pubis

(T) Shoulder and Arm (excluding hand and wrist)**(TA) Shoulder joint**

Includes: bursa, capsule, cartilage, ligament and synovial lining of coracohumeral and glenohumeral joints; shoulder ligaments [coracohumeral, glenohumeral ligaments, glenoid labrum, humeral and rotator interval]; glenoid cavity, labrum; humeral head and surgical neck; greater tuberosity [tubercle] of humerus; shoulder joint NOS

(TB) Acromioclavicular and sternoclavicular joints

Includes: subacromial bursa, and capsule; acromioclavicular, coracoacromial, coracohumeral ligaments; sternoclavicular articular disc; sternoclavicular, costoclavicular and interclavicular ligaments; acromion; coracoid process; distal end of clavicle with acromion; subacromial space

(TK) Humerus

Includes: epiphysis and periosteum of humerus; supracondylar ridge [lateral and medial] of humerus

(TM) Elbow joint

Includes: Bursa, capsule, cartilage, ligaments and synovial lining of: radiohumeral joint, ulnohumeral joint, elbow joint NOS, articular surface of distal humerus, articular surface of proximal radius and ulna; distal humerus capitulum, epicondyles, (medial and lateral), trochlea; radial head and neck; ulnar coronoid process, olecranon, tubercle

(TV) Radius and ulna

Includes: radius NOS, tuberosity of radius, ulna NOS, tuberosity of ulna, epiphysis or periosteum of radius and ulna

(TZ) Arm NEC**(U) Hand and Wrist****(UB) Wrist joint**

Includes: articular disc, bursa, capsule, cartilage, ligament and synovial lining; radiocarpal, ulnocarpal joints; radial tubercle; ulnar head; styloid process: radius and ulna, distal radioulnar joint and carpal joints and bones

(UL) Joints of finger and hand

Includes: metacarpophalangeal joints, interphalangeal joints, fingers NOS, first phalanx [thumb]

(UZ) Hand with wrist

Includes: hand NEC, hand NOS, hand with wrist and fingers (together), metacarpal bones

(V) Hip and Leg

(VA) Hip joint

Includes: acetabulum with femoral head or neck and supporting joint structures [bursa, capsule, cartilage, synovium, ligament, ligamentum teres]; hip joint NOS

(VC) Femur

Includes: trochanter [greater and lesser] of femur; intertrochanter of femur; petrochanter of femur

(VG) Knee joint

Includes: articular surface of proximal tibia and fibula; articular surface of distal femur; bursa, capsule, cartilage, ligaments of knee NEC; femoral medial and lateral condyles and epicondyles; synovial lining of tibiofibular and tibiofemoral joints of knee; tibial plateau, medial and lateral condyles; knee NOS

(VQ) Tibia and fibula

Includes: tibia NOS; fibula NOS; epiphysis of tibia and fibula; periosteum of tibia and fibula; tuberosity of tibia; neck of fibula; skeletal tissue below knee and above ankle

(VZ) Leg NEC

(W) Ankle and Foot

(WA) Ankle joint

Includes: articular surface of distal tibia and fibula; bursa, capsule, cartilage, synovial lining of ankle, malleolus [lateral and medial]; tibiotalar joint; supratolar joint

(WG) Foot

Includes: bones and joints of foot and toes NEC, ligaments and tendons of foot NEC

(WY) Bone marrow

(WZ) Musculoskeletal system NEC

(Y) Skin and Subcutaneous Tissue and Breast

(YL) Lactiferous duct

Includes: mammary ducts

(YM) Breast

Includes: Fascial covering of breast; Lactiferous ducts with breast; Lobular tissue of breast; Nipple and areolar tissue with breast; Retromammary space; Skin of breast with breast; Suspensory ligaments of Cooper (intralobular fascia)

(YN) Surgically removed breast

(YZ) Skin NEC

Includes: skin of overlapping sites of body NEC; skin of overlapping (or multiple) sites involving trunk with arm or leg

(Z) Total Body

(ZA) Surgical specimen NEC

(ZZ) Total body

Includes: whole body NOS

Section 5 Pregnancy (and Fetal Development) Stage Groups

(AB)	Antepartum diagnostic
(AC)	Antepartum therapeutic
(AD)	Antepartum supportive

(CA)	Termination of pregnancy
(FB)	Diagnostic fetal
(FD)	Preventative and therapeutic (interventions) fetus
(FG)	Surgical (interventions) on the fetal digestive system
(FH)	Surgical (interventions) on the fetal circulatory system
(FJ)	Surgical (interventions) on the fetal respiratory system
(FL)	Surgical (interventions) on the fetal nervous system
(FM)	Surgical (interventions) on the fetal urinary system
(FT)	(Interventions on) fetal genetics
(LB)	(Assessment of) labour
(LC)	Latent labour
(LD)	Active labour
(MD)	Delivery (birthing)
(PB)	Postpartum diagnostic
(PC)	Postpartum therapeutic
(PD)	Postpartum supportive

Section 6 Mental, Psychosocial and Sensory Function Groups

(AA)	Mental health and addictions
(DA)	Interpersonal relationships
(KA)	Cognition and learning
(LA)	Communication
(PA)	Hearing
(RA)	Voice
(TA)	Sight and other senses NEC
(VA)	Motor and living skills

Section 7 Other Healthcare Activity Groups

(SC)	Personal care
(SE)	Environment
(SF)	Service
(SJ)	Support activity
(SP)	Promoting health and preventing disease
(SZ)	Emergency use

Section 8 Immune System and Genetic Composition Condition/State Grouping

(AA)	Adenovirus
(AB)	Anthrax
(BB)	Botulism
(BM)	Meningococcal bacteria
(BQ)	Non-pneumococcal streptococcal bacteria

(BR)	Streptococcal pneumococcal bacteria
(BS)	Staphylococcal bacteria
(BT)	Bacterial disease NEC
(CA)	Cholera
(CY)	cytomegalovirus [CMV]
(DP)	Diphtheria
(EA)	encephalitis - Japanese
(EB)	Encephalitis - tick borne
(EC)	encephalitis - Venezuelan equine
(EZ)	Encephalitis NOS
(FA)	Dengue fever
(FC)	Rift valley fever
(FD)	Q fever
(HA)	Hantavirus
(HE)	Hepatitis
(HM)	Haemophilus influenza
(HP)	Human papillomavirus
(IM)	Severe acute respiratory syndrome coronavirus 2 [SARS-CoV-2]
(IN)	Influenza
(JA)	Junin virus
(LA)	Leishmaniasis
(LY)	Lyme disease
(MB)	Measles
(MD)	Mumps
(MK)	Diphtheria and tetanus
(MM)	diphtheria, tetanus and pertussis
(MN)	diphtheria, tetanus, pertussis and Haemophilus B influenza
(MO)	diphtheria, tetanus, pertussis, Haemophilus B influenza and hepatitis B
(MQ)	diphtheria, tetanus, pertussis and polio
(MR)	diphtheria, tetanus, pertussis, polio and Haemophilus B influenza
(MS)	haemophilus influenza and hepatitis
(MT)	Measles and rubella
(MU)	measles, mumps and rubella
(MV)	measles, mumps, rubella and varicella
(MW)	Measles and mumps
(NZ)	Neoplasm
(OS)	herpes virus
(PA)	Pertussis
(PB)	Plague
(PC)	poliovirus (poliomyelitis)
(PD)	Orthopoxvirus
(PF)	Fall eastern pollen (allergy)

(PG)	Fall western pollen (allergy)
(PH)	Pacific grasses and weeds pollen (allergy)
(PJ)	Pacific tree pollen (allergy)
(PS)	Summer pollen (allergy)
(PX)	Insect venom (allergy)
(RA)	Rabies
(RB)	respiratory syncytial virus [RSV]
(RC)	Rubella
(RO)	Rotavirus
(TA)	Tetanus
(TB)	tuberculosis [TB]
(TC)	Tularemia
(TD)	Typhoid fever
(VA)	Varicella
(VN)	Venomous bite
(YA)	Yellow fever
(ZZ)	Immune Disorder NEC

Intervention Definitions

Section 1 Interventions

Acupuncture (10)

Inserting needles into specific exterior body locations to relieve pain, induce surgical anesthesia and for other therapeutic purposes

Alimentation (17)

Administering total nutritional requirements into the digestive tract, excluding parenteral administration of nutrients

- enteral therapy
- tube feeding
- rehydration

Amputation (93)

Removal of any portion of a limb by cutting through joint or bone and soft tissue. Excludes the excision of a body appendage (e.g. nose, ear, penis)

- above knee amputation

Anesthetization (11)

Administering an agent or using alternate means to alleviate pain or sensation

- epidural anesthesia
- spinal anesthesia
- general anesthesia
- nerve block

Apheresis (20)

The process of removing a specific (disease involved) component from blood and returning the remaining components to the individual, in the same episode. Apheresis technique for procurement of healthy blood components for later transfusion is classified to Procurement.

Brachytherapy (26)

Implanting radioactive material within a body site to destroy tissue over time.

- Interstitial radiation therapy

Bypass (76)

Altering a route of passage for body fluids, tissue, gases, impulses and excretions in, or between, body sites. Excludes that done to drain a body part (e.g. ventriculoperitoneal shunt)

- Systemic-to-pulmonary shunt
- Coronary artery bypass graft
- Cholecystojejunostomy

Bypass with exteriorization (77)

Altering a route of passage for body fluids, tissue, gases, impulses and excretions to the exterior of the body

- Tracheostomy
- colostomy

Closure of fistula (86)

Eliminating a fistulous tract by sealing off its point of origin and termination and débriding the communicating tract

- bronchopleural fistulectomy
- correction arteriovenous malformation

Compression (34)

Exerting an external force to reduce the volume or density of a body part(s)

- use of external pressure device (e.g. stockings)

Control of bleeding (13)

Arresting the escape of blood from a vessel or other body site

- embolization
- applying pressure

Decompression (33)

Returning to normal environmental pressure after exposure to greatly increased pressure, also called recompression therapy

- artificially induced pneumothorax

Destruction (59)

Altering or breaking down by physical means, without taking out, part or all of its solid content

- destruction, lesion using laser, cryotherapy, chemocautery
- Debridement, planing, paring, shaving skin
- transection of nerves

Dialysis (21)

Treating by diffusion and filtration of blood to rid the body of urea and other low molecular weight toxins

- hemodialysis
- peritoneal dialysis

Dilation (50)

Expanding or stretching an orifice or the lumen of a tubular or hollow body site by application of pressure

- angioplasty
- choledochotomy using balloon dilator

Division (71)

Separating a body site into 2 parts

- separation of conjoined twins
- symphysiotomy of kidney

Drainage (52)

Taking out or letting out fluid or gas from a body site.

- Drainage of hematoma, cyst, abscess
- Ventriculoperitoneal shunt

Dressing (14)

Applying various materials to cover or protect a wound.

- Bandaging
- Replacement of dressing

Excision partial (87)

Removing a portion of a body part with or without repair of the resultant defect

- excision, lesion
- excisional biopsy
- wedge resection
- segmentectomy

Excision partial with reconstruction (88)

Removing a portion of a body part and concomitantly rebuilding a structure to function as (or take the place of) that body part

- excision of ectropion with composite graft repair
- subtotal esophagectomy with gastric pull-up reconstruction
- subcutaneous mastectomy with concomitant flap reconstruction

Excision radical (91)

Removing a body part (either partially or totally) and its adjacent tissue with or without repair of the resultant defect

- exenteration of orbital contents
- radical neck dissection
- en bloc gastrectomy

Excision radical with reconstruction (92)

Removing a body part (either partially or totally) and its adjacent tissue and concomitantly rebuilding a structure to function as (or take the place of) that body part

- radical cystectomy with creation of continent urinary reservoir
- radical mastectomy with TRAM flap reconstruction

Excision total (89)

Removing all of a body part with or without repair of the resultant defect

- complete pneumonectomy
- appendectomy
- cholecystectomy

Excision total with reconstruction (90)

Removing all of a body part and concomitantly rebuilding a structure to function as (or take the place of) that body part

- heart valve replacement (with or without excision of native valve)
- total esophagectomy with gastric pull up reconstruction
- total mastectomy with myocutaneous flap reconstruction

Exercise (02)

Assisting in the performance of physical exertion for improvement of health or correction of a deformity

- range of motion exercise
- conditioning exercise (e.g. aerobic)

Extraction (57)

Taking out, without excising, all or part of the solid content of a body site

- tooth extraction
- endarterectomy coronary artery
- thrombectomy
- removal of calculus from bile duct
- pyelotomy for removal of calculi

Fixation (74)

Maintaining in a fixed position

- repair ectropion
- fracture fixation
- Marshall-Marchetti operation
- orchidopexy

Fusion (75)

Merging adjacent body parts

- arthrodesis

Hyperthermy (07)

Applying heat to the body or body part to produce a therapeutic effect

- application of heat using hot pack
- application of heat using moist heat (e.g. compress)

Hypothermy (06)

Applying cold to the body or body part to produce a therapeutic effect

- application of cold using cold device (e.g. cold pack, ice)
- gastric cooling

Immobilization (03)

Rendering a body part incapable of being moved, with or without traction or traction elevation

- application external fixator
- traction (with or without suspension)

Implantation of internal device (53)

Putting in an appliance, device [or materials] that can be used to assist, perform or prevent a physiological function

- cardiac pacemakers
- venous access device
- gastric feeding tube
- liver infusion pump

Incision NOS (70)

Opening a body site by cutting

- incision into abdominal cavity
- incision into thoracic cavity

Installation of external appliance (37)

Putting on or changing of an appliance or device to an external part of the body. Refers to various devices used to provide a function or therapeutic effect.

- Placement of visual aids (e.g. corrective glasses, contact lenses)
- Application maxillary obturator
- Cardiopulmonary bypass (extracorporeal circulation device)

Management of external appliance (38)

Adapting or adjusting an external appliance or device to the body or body part. Includes routine removal.

- Removal of waste collection apparatus (e.g. colostomy bag)

Management of internal device (54)

Maintaining or adjusting a device (inside the body) without removing the device

- adding or repositioning or lengthening catheters
- replacement of generators, batteries (e.g. cardiac pacemakers)
- irrigation of devices

Manipulation (05)

Moving a joint beyond the physiological range of movement using a high velocity thrust.

Mobilization (04)

Moving a joint (or soft tissue) within the physiological range of motion without a high velocity thrust.

Natural remedy (15)

Provision of a specific combination of natural elements (such as flowers, herbs or plants in tea, tincture or capsule form) to holistically restore balance and energy to the body.

Occlusion (51)

Closing off of the orifice or lumen of a tubular or hollow body site

- Ligation, patent ductus arteriosus
- Clipping, intracranial aneurysm
- Embolization
- Vasectomy, tubal ligation

Oxygenation (32)

Treating by saturation with oxygen under increased pressure (hyperbaric) or administering supplemental oxygen to relieve hypoxia or hypoxia.

- Hyperbaric chamber

Pharmacotherapy (35)

Treating using chemical/biochemical agents administered through various routes (e.g. orally, by injection, per orifice, topical, by direct instillation, etc.).

- Injection of anticoagulant
- Instillation of anti-infective agent into bladder
- Application of agents to open wound
- Irrigation

Procurement (58)

Removing tissue or cells for transplantation, transfer or production of pharmaceutical/biomedical products

- Harvesting of organs
- Obtaining tissue for use in restorative interventions (e.g. saphenous vein)
- Obtaining blood components by apheresis technique for retransfusion at a later episode

Radiation (27)

Directing radiation (external beam) to destroy tissue

- Stereotactic radiosurgery
- Cobalt 60
- Superficial photon radiation

Reattachment (82)

Rejoining a severed appendage or reestablishing continuity of surgically (or traumatically) divided part

- Take-down colostomy
- Closure tracheostomy
- Vasovasostomy
- Reattachment of traumatically amputated limb (e.g. hand)

Reconstruction/construction (84)

Building (or rebuilding) a structure to function as a body part

- Corneal refractive surgery
- Correction choanal atresia
- Septation single ventricle
- Correction endocardial cushion

Reduction (73)

Restoring a body part to its original position (after it has been displaced). Excludes that with fixation (see Fixation)

- Elevation of segments of skull fracture
- Septoplasty
- Detorsion of intestinal tract
- Reduction of fracture or dislocation

Release (72)

Freeing a body part from abnormal compression

- Decompression spinal cord or nerves
- Epi-retinal membrane peeling
- Lysis adhesions
- Glossotomy for tongue tie

Removal of device (55)

Taking out a device or appliance.

- Pressure monitor
- Radioactive material (beads)
- Shunt
- Sutures

Removal of foreign body (56)

Taking out a foreign body.

- Removal of foreign body using incision
- Removal of foreign body without incision
- Removal of foreign body using magnet
- Extraction of superficial foreign body

Repair (80)

Restoring a body part by encouraging regeneration (of tissue) or by surgical apposition

- Repair using suture or glue
- Blood patch
- Neurorrhaphy
- Tympanoplasty
- Arthroplasty

- Colporrhaphy
- Herniorrhaphy

Repair by decreasing size (78)

Decreasing the size of a body part

- Resection ocular muscles
- Uvulopharyngopalatoplasty
- Lung volume reduction surgery

Repair by increasing size (79)

Increasing the size of a body part

- Augmentation of chin
- Gastrocystoplasty
- Lengthening Achilles tendon using Z-plasty technique

Restoration [dental] (29)

Replacing the surface(s) of a tooth with or without the excision of a carious lesion.

- Filling of carious lesion of tooth (e.g. using amalgam filling)

Resuscitation (30)

Restoring life or consciousness.

- Artificial respiration

Stimulation (09)

Exciting or inducing to a physiological state or functional activity

- Electroconvulsive therapy [ECT]
- Transcutaneous electrical stimulation
- Cardioversion
- Carotid sinus massage

Therapeutic intervention NEC (94)

Any other therapeutic intervention that is not found elsewhere

Therapy (12)

The general treatment of condition, disease, or dysfunction to eradicate its cause, manage or reduce the symptoms, or alleviate other associated disabling conditions by using appropriate selected techniques.

- Phototherapy
- Manipulation nasolacrimal passage
- Massage
- Artificial insemination

Transfer (83)

Moving body tissue, within the same individual, from one site to another

- Recession ocular muscles
- Repositioning Wharton's duct
- Transposition of vocal cords
- Switching great arteries
- Autotransplantation kidney
- Grafting of tissue with/without debridement without fixation device
- Using bone autograft, homograft or synthetic tissue to fill bone defect without fixation device
- Using bone graft to bone site following debridement/sequestrectomy

Transfusion therapy (19)

Introducing blood or blood components directly into the blood stream

- Blood transfusion (autologous or homologous)
- Exchange transfusion

Transplant (85)

Putting in all or part of a living body site taken from another individual or animal to physically take the place of all or part of a similar body site

- Penetrating keratoplasty
- Lung transplant (whole lung or lobe of lung)
- Heart transplant
- Kidney transplant

Ventilation (31)

Providing support or assistance in the process of exchange of air within the lungs

- Positive pressure mechanical ventilator
- Continuous positive airway pressure

Section 2 Interventions**Analysis/Evaluation (07)**

Involves ascertaining the function or composition of character, body system or implanted device.

- Handwriting analysis
- Lacrimal system analysis
- Programming cardiac or nerve pacemaker
- Programming neurostimulator

Assessment (examination) (02)

Involves evaluating a condition, problem, or functional status to establish a diagnosis and/or identify treatment or rehabilitation measures and/or monitor a client's response to an existing treatment/rehabilitation plan. May also include ordering diagnostic investigations, reviewing results, prescribing and counseling as appropriate.

- Determination of mental status
- Eye examination
- Evaluation of aphasia
- General physical examination

Biopsy (71)

The removal and direct examination (usually microscopic) of tissue from the body, performed to establish precise diagnosis only. Excludes the collection of body fluid (see Specimen collection) Excludes excisional biopsy where the intent is also to remove a lesion or body part (see Excision, partial in Section 1)

- Incisional biopsy
- Needle biopsy

Capacity measurement (21)

Determining the power or ability of a body part/organ to hold, retain, contain or absorb.

- Measurement of lung capacity
- Plethysmography

Conduction study (50)

Evaluating the transfer of sound waves, heat, nervous impulses, or electricity

- Neuromuscular junction testing
- Audiometry

Electrophysiological measurement (24)

The study of the mechanisms of production of electrical phenomena

- Electroencephalography [EEG]
- Electromyography [EMG]
- Electrocardiography [ECG]

Flow study (57)

Evaluating the movement or amount of fluid or gas that passes through an organ or body part in a specified amount of time

- Coronary blood volume measurement

Function study (58)

Evaluating the physiological activity of a body organ/part

- Oxygen saturation measurement
- Esophageal motility study
- Gastric secretion study
- Urodynamic studies

Inspection (70)

The act of exploring or viewing a body cavity or part by various approaches and techniques (e.g. open incision or endoscopic)

- Exploration
- Mediastinoscopy
- Esophagogastroduodenoscopy [EGD]
- Cystoscopy

Observation and monitoring (03)

Keep a vigilant watch of a given (set of) condition(s) and make note of observations.

Other diagnostic intervention NEC (94)

Interventions performed solely for the purpose of establishing a diagnosis that are not classified elsewhere.

- Injection of agents to stimulate body/organ function for the sole purpose of diagnosing a condition

Other measurement NEC (29)

All measurements not elsewhere classified

- Monitoring neurological signs
- Acoustic reflex test
- Skin PtcO₂ (segmental) test
- Monitoring weight loss/gain

Other study (59)

All studies not elsewhere classified

- Sleep study

Potential (evoked) measurement (25)

The electrical signal recorded from a sensory receptor, nerve, muscle, or area of the central nervous system that has been stimulated, usually by electricity

- Somatosensory evoked potential [SSEP] of nerves
- Auditory evoked potential [AEP]

Pressure measurement (28)

The act of measuring force per unit area

- Intracranial pressure monitoring
- Swan-Ganz catheterization
- Measuring blood pressure

Size measurement (20)

Determining the dimensions or mass of a body part or substance

- Measuring skull circumference
- Measuring body height

Sound (wave) measurement (23)

Involves indirect measurement of mobility and impedance of tympanic membrane by applying air pressure to external acoustic meatus. In cardiac testing, it involves the graphic representation of heart sounds, murmurs, or other acoustic phenomena. Intracardiac phonocardiography is done by passing a phonocatheter into one of the heart chambers. Excludes ultrasound (see Section 3 -Ultrasound)

- Tympanic membrane impedance test
- Cardiac phonocatheterization

Specimen collection (diagnostic) (13)

Obtaining a sample of body fluid for the purposes of diagnostic testing. Excludes obtaining a sample of tissue (see Biopsy)

- Spinal tap
- Drawing of blood by venous, arterial or capillary puncture
- Urine samples

Test (08)

An examination or trial of function, production, or range of movement of a body part or system.

- Speech localization test
- Psychological testing
- Apgar score

Section 3 Interventions**Computerized Tomography (20)**

[CT or CAT Scan Tomography] [linear or multi-directional scanning] examination (with or without use of contrast) where visual records/images are processed, by a computer, to produce a reconstructed display of the site/region in cross-sections.

Also includes those examinations done for the purpose of radiation treatment planning or simulation.

Diagnostic Nuclear Imaging (70)

Introduction of radioactive material in the body with subsequent measurement of radioactive emissions.

- PET tomography
- Scintigraphy
- SPEC tomography
- Shilling test
- Radionuclide Uptake study
- Cell survival study
- Radioiron study
- Nuclear scan

Fluoroscopy (12)

Real-time display of an image developed from the capture of external ionizing radiation on a fluorescent screen. Unless stated otherwise, a fluoroscopy examination done as a separate examination or as fluoroscopic control for another intervention should be coded separately using the appropriate code.

Intervention NEC (94)

Various methods of visual assistance (e.g. operating microscope, computer assistance viewing wand, stereotactic guidance, photography). Excludes other forms of imaging techniques done for visual assistance, such as intraoperative x-rays (see specific intervention and accompanying attribute).

Magnetic Resonance Imaging (40)

(MRI) Production of computer reformatted digital displays of multi-planar images developed from the capture of radio frequency signals emitted by nuclei in a body site excited within a magnetic field. Examinations are coded regardless of the number of pulse sequences applied.

- MRI spectroscopy
- MRI angiography

Tomography (18)

Production of internal body images, at a predetermined plane by means of a [linear or multi-directional scanning] tomograph, developed from the capture of external ionizing radiation. Unless stated otherwise, all tomography examinations done as separate examinations or in conjunction with other examinations [e.g. Xray] should be coded separately using the appropriate code(s).

Ultrasound (30)

Production of real-time visual displays/images of anatomy or flow information developed from the capture of reflected pulses (echoes) of ultrasonic waves directed into the tissues. Includes, where appropriate, A-Mode, B-Mode, or M-Mode ultrasound. Intervention qualifiers have been provided to identify those ultrasound examinations with color flow and/or Doppler. (Note: Excludes the use of ultrasound for therapeutic purposes - see Section 1).

Xray (10)

Display of an image developed from the capture of external ionizing radiation (e.g. xray) on photographic film or photoconductive plate. Most of these examinations may be further defined (using a field 4 qualifier) to identify whether contrast media was used or not, and if so, what route was used to administer the media. (Note: Where contrast media is used to perform an examination, the actual administration of such contrast is considered to be an integral part of the codes found in this section).

- Chest Xray
- Angiography
- Phlebography

Section 5 Interventions**Amniocentesis (02)**

Percutaneous trans-abdominal puncture of uterus to obtain amniotic fluid

Augmentation of Labour (31)

Methods and techniques of ensuring labour continues or increases in intensity.

- Artificial rupture of membranes
- Administration of oxytocic agent

Biopsy (09)

Sampling of fetal or placental structures prior to the onset of labour for diagnostic purposes.

- Chorionic villus sampling

Care - Antepartum/Postpartum (01)

Major antenatal visits, subsequent antenatal visits, immediate postpartum care, and postpartum follow-up visits.

- Major antenatal visit (e.g. first one)

Counseling (14)

Therapeutic communication (e.g. discussion between service provider and service recipient), provided to or on behalf of a client, to identify and evaluate, introduce and/or eliminate, reinforce and/or reduce certain attitudes on the part of the client regarding a given situation/condition/impairment, which could alter attitudes and in turn change/modify behaviour. Such counseling sessions may be provided on a "one to one" or "one to many" basis.

- Nutritional counseling

- Exercise and physical fitness counseling

Delivery - breech - vaginal (56)

All vaginal deliveries with the fetus in a breech presentation including those with the use of forceps to the aftercoming head.

- Spontaneous breech delivery
- Partial breech extraction with Piper forceps to aftercoming head

Delivery - Cesarean section (60)

A procedure in which the fetus is delivered through an incision in the abdominal wall and uterus.

- Lower segment Caesarean section
- Classical Caesarean section with use of forceps

Delivery - forceps and vacuum combined (55)

Deliveries which require the use of both forceps and vacuum traction devices.

- Use of vacuum for descent of fetal head with forceps applied for delivery

Delivery - forceps traction and rotation (53)

Deliveries that are assisted by the use of an instrument designed to extract or turn the fetal head. The Society of Obstetricians and Gynecologists of Canada define types of forceps. (See definitions in tabular listing at [5.MD.53.^^](#))

- Outlet forceps
- Low forceps with episiotomy

Delivery - spontaneous - manually assisted vaginal (50)

Deliveries considered normal, spontaneous, vertex, requiring minimal assistance from obstetrical personnel (e.g. Ritgen maneuver) with or without perineal massage.

- Normal vertex delivery with episiotomy

Delivery - spontaneous - unassisted vaginal (51)

Autonomous delivery where health or obstetrical professionals do not intervene or assist during the delivery (e.g. unattended delivery).

Delivery - vacuum traction (54)

Deliveries that are assisted by the use of a traction device which uses suction to attach to the fetal scalp.

- Low vacuum traction
- Vacuum traction unspecified with episiotomy

Delivery - water birth (52)

Deliveries that take place with the mother submersed in water.

- Baby delivered totally submersed in water

Doppler studies (04)

Doppler studies done on the pregnant woman of the fetus, uterine arteries/veins, umbilical cord or other fetal vessels.

- Doppler study of fetal heart
- Doppler study of uterine arteries/veins

Drainage (73)

Taking out or letting out fluid or gas from a body site.

- Amnioreduction
- Needling of fetal abdomen (to treat hydronephrosis)

Education (13)

Education normally provided in a structured format (e.g. classroom style), to enhance knowledge and skill that directly or indirectly assists the client/family to understand, monitor and manage their situation/condition/impairment. Includes, where applicable, provision of educational materials such as pamphlets, tapes, books and videos. Such educational sessions may be provided on a "one to one" or "one to many" basis.

- Childbirth classes
- Breast feeding and infant nutrition classes

Evaluation (06)

Biometric examinations of the fetus

- Biophysical profiles
- Fetal movement counts
- Non-stress testing
- Amniotic fluid index

Imaging (alternative) techniques (05)

Any other imaging techniques done on the pregnant woman, excluding ultrasound.

- Pelvimetry with placental localization
- MRI of gravid uterus

Induction of Labour (30)

Methods and techniques of causing labour to occur. Excludes these interventions when labour has begun spontaneously - see Augmentation

- Administration of oxytocic agent
- Artificial rupture of membranes

Insertion (74)

Putting in an appliance, device [or materials] that can be used to assist, perform or prevent a physiological function.

- Placement of vesico-amniotic shunt

Inspection (70)

Percutaneous trans-abdominal examination of the umbilical cord, embryo or fetus using an endoscopic approach.

- Fetoscopy
- Embryoscopy

Intervention NEC - fetal (94)

Procedures performed in utero on the fetus.

Interventions NEC - maternal - (following delivery or termination) (91)

Procedures done following delivery or termination to remove retained products of conception, control bleeding or correct an inverted uterus.

- Dilation and curettage -excludes that done for termination of pregnancy (see Termination of pregnancy -surgical)
- Manual removal of placenta
- Manual correction of inverted uterus

Interventions to facilitate delivery - fetal NEC - (45)

Interventions done directly to the fetus to enable passage of the fetus through the birth canal.

- Fracture of humerus or clavicle
- Needling of fetal abdomen (at time of delivery - excludes that done in the antepartum period)

Interventions to facilitate delivery - maternal NEC (47)

Incisions performed to enlarge the birth canal to permit delivery of the fetus. Excludes episiotomy (see Delivery, by type)

- Symphysiotomy

- Episiotomy

Monitoring - fetal (07)

Monitoring of the fetal heart during latent or active labour using techniques such as auscultation, electronic monitoring or use of a fetoscope.

- Continuous electronic monitoring

Monitoring - maternal (08)

Monitoring of the vital signs or reflexes of the mother during latent or active labour

- Initial triage to assess establishment or stage of labour

Pharmacotherapy (20)

Treating using chemical/biochemical agents administered through various routes (e.g. orally, by injection, per orifice, topical, direct instillation etc.) regardless of whether the intent is to treat the mother or the fetus.

- Diabetes therapy
- Anti-nausea/anti-emetic
- Immunoglobulins

Positioning - maternal (16)

A listing of physical positions or locations in which a client may use or be placed in to cope with labour or delivery.

- In bed
- Ambulatory

Preparation by dilating cervix (for) (24)

Dilation or ripening of cervix

- in preparation for the termination of pregnancy
- in preparation for the induction of labour

Removal of Device (25)

Removal of device during pregnancy

- Removal of cervical cerclage suture (e.g. Shirodkar)

Removal of extrauterine pregnancy (93)

The extraction of an embryo or fetus that has developed outside the uterine cavity.

- Salpingectomy for ectopic pregnancy
- Fimbrial evacuation of ectopic pregnancy

Repair (80)

Restoring a body part by encouraging regeneration (of tissue) or by surgical apposition.

- Insertion of cervical cerclage suture (e.g. Shirodkar)
- Suture of obstetrical laceration (e.g. 1st, 2nd, 3rd or 4th degree tears)
- Re-suturing of episiotomy dehiscence

Replacement (46)

Interventions where fetal parts or the umbilical cord are returned to the uterine cavity.

- Replacement of prolapsed umbilical cord within the uterus
- Replacement of fetal head

Sampling, cord blood (11)

Refers to the drawing of fetal blood immediately following birth

Support (15)

Therapeutic communication, actions or devices provided to a client to assist with coping with a given situation/condition/impairment.

- Use of music therapy during labour
- Use of birthing ball
- Patterned breathing techniques to ease maternal labour distress

Suppression of Labour (32)

Methods and techniques of stopping or preventing labour from occurring.

- Administration of pharmacological labour suppressants (e.g. Ritodrine, bromocriptine)

Termination of pregnancy - pharmacological (88)

The use of pharmacological agents to induce expulsion from the uterus of the products of conception, embryo or a non-viable fetus.

- Injection of salt solution into amniotic sac
- Administration of uterotonic agent (e.g. oxytocin) to induce labour

Termination of pregnancy - selective fetal reduction (90)

The act of reducing the number of fetuses in a multiple pregnancy in order to maintain the health of the remaining fetuses and/or the mother.

- Cardiac puncture
- Ligation of umbilical cord

Termination of pregnancy - surgical (89)

The removal of products of conception (embryo or non-viable fetus) from the uterus by aspiration, curettage or other surgical techniques.

- Aspiration D&C
- Dilation and Curettage
- Hysterectomy of gravid uterus

Therapy - gene (78)

An intervention using viruses as vectors to supply somatic cells with healthy copies of missing or flawed genes to fight disease (e.g. cystic fibrosis, adenosine deaminase deficiency (ADA deficiency)).

Therapy - laser placenta (76)

Photocoagulation using laser to occlude communicating vessels. (e.g. twin-to twin transfusion syndrome)

Therapy - postpartum therapies on the breast (21)

Techniques used to alleviate postpartum breast discomfort and/or disorders. Excludes interventions related to lactational and/or non-lactational breast abscesses after the six-week puerperium period.

- Expression of breast milk
- Nipple care

Transfusion / instillation (72)

Percutaneous infusion of a substance into the gravid uterus (e.g. blood for in-utero transfusion, saline injection into amniotic fluid for volume replacement)

- Amnioinfusion
- Intrauterine fetal transfusion

Ultrasound (03)

Fetal and/or maternal assessment using ultrasound probe - excludes ultrasounds that do not examine the gravid uterus

- Abdominal ultrasound of gravid uterus
- Trans-vaginal ultrasound of gravid uterus

Version and/or rotation (40)

Intervention in which the fetus is turned in utero, either before or during labour or at the time of delivery, for the purpose of changing the fetal presentation.

- External cephalic version
- Manual rotation of fetal head
- Corkscrew maneuver

Section 6 Interventions**Assessment (02)**

Involves evaluating a condition, problem, or functional status to establish a diagnosis and/or identify treatment or rehabilitation measures and/or monitor a client's response to an existing treatment/rehabilitation plan. May also include ordering diagnostic investigations, reviewing results, prescribing and counseling as appropriate.

- Language comprehension and speech assessment
- Life coping skills assessment
- Psychiatric assessment

Counseling (10)

Providing health advice to a client that identifies health problems (or risks), encourages a change of client attitude or behavior in order to initiate a willingness to modify lifestyle or behavior that will result in an elimination of the health problem (or risk).

- Addiction counseling (e.g. alcohol, drugs, gambling)
- Marital counseling
- Counseling for hearing loss

Facilitation (07)

Providing general supportive assistance to a client.

- Assistance with community integration
- Mediation of interpersonal relationships

Observation and monitoring (03)

Keep a vigilant watch of a given (set of) condition(s) and make note of observations.

Test (08)

An examination or trial of function performed to evaluate results and determine a condition.

- Intelligence quotient (IQ) test
- Psychometric testing
- Vocational skills testing

Therapy (30)

The general treatment of a condition, disease or dysfunction to eradicate its cause, manage or reduce the symptoms, or alleviate other associated disabling conditions by using appropriate selected techniques.

- Behaviour using desensitization technique
- Psychotherapy using active listening technique

Training (50)

Teaching new or different skills to assist a client in overcoming a functional problem (or impairment) that usually involves a complex learning process before those skills are acquired and integrated.

- Teaching parenting skills
- Teaching language skills using phonetics

Section 7 Interventions**Accommodation (04)**

Provision of a safe, healthy and appropriate living space to a client in order to fulfill healthcare needs.

Activity program delivery (06)

Provides (semi)structured activities to help clients to develop and use leisure in ways that enhance health, wellness and independence.

Advocacy (05)

The act of mediation or pleading in favour of a client.

- Patient advocacy

Assessment (02)

Involves evaluating a condition, problem, situation or functional status to establish and/or identify treatment or rehabilitation measures and/or monitor response to an existing treatment/rehabilitation plan. May also include ordering diagnostic investigations, reviewing results, prescribing and counseling as appropriate. Examples are:

- Analysis of barriers to access
- Ergonomic assessment
- Group home assessment
- Review of health hazards

Assistance (01)

The act of helping or aiding a client to perform a task of daily living.

- Bathing a patient [client]
- Porterage patient
- Assistance with feeding

Brokerage (15)

The act of delegating, managing or monitoring services or care on behalf of a client.

- Case management
- Patient referral

Clinical photography (36)

Photographs or videotapes of a lesion, disease process, or healthcare session done to track progression of the disease or for education purposes.

Collection evidence (35)

Gathering tissue samples, or photographs of a client for use in a court of law.

- Rape kit preparation

Counseling (10)

Providing advice to a client that identifies health problems (or risks), encourages a change of client attitude or behaviour in order to initiate a willingness to modify lifestyle or behaviour that will result in an elimination of the health problem (or risk).

- Lifestyle counseling
- Drug abuse counseling
- Safe sex counseling
- Coping information and resources
- Interactive visits with health care professional

Dispensing (17)

Preparing and distributing pharmaceutical agents or health care products for a particular client.

- Unit dose dispensing

Documentation (30)

Written correspondence or completion of certificates or documents done on behalf of a client. Excludes patient record keeping which is considered part of the clinical care process.

- Completion of birth or death certificate
- Certificate completion

Education (60)

Information provided, normally in a structured format (e.g. lecture, seminar, classroom) to bring an audience to a better understanding of a health-related topic so that the quality of their lives (and future decision-making) may be improved

- Educating for health risks (e.g. disease process)
- Listing available community healthcare resources
- Other family members learning about a patient's condition

Instruction (59)

Simple demonstration of a process (or task) and repetition of that task by the client in a supportive environment to assist the client in future self-care.

- Instruction in self-administration of medication
- Instruction in self catheterization
- Diabetic teaching (e.g. monitoring glucose levels)

Language interpretation (19)

The act of explaining the meaning of medical terminology or translating from one language to another.

- Language translation

Measuring and fitting (18)

The act of obtaining an appropriate size or range of a prosthetic device/appliance to match a particular client's size.

- Measuring and fitting for prosthetic limb
- Measuring and fitting for contact lenses

Other ministration (08)

Other acts of giving support, care and empathy through conversation, spiritual or cultural ceremonies or thought diversion, not elsewhere classified.

- Healing ceremony
- Spiritual ministration

Planning (12)

Preparing an outline of care, services, or activities that affect a specific client

- Discharge planning
- Clinical service rounds

Postmortem care (80)

Acts performed to a client immediately following death but prior to the cadaver being relinquished to non-health care personnel.

- Cadaver care (e.g. shrouding)

Precaution (70)

The act of preventing or protecting from harm.

- Isolation
- Incubation
- Patient restraint

Preparation (13)

Initial services done to ready a client for an upcoming intervention. Includes processing a specimen, rehearsal or simulation of an intervention.

- Surgical rehearsal
- Operative simulation

Prescription (32)

Writing out suggested lists of pharmaceutical agents, services, devices, or other health care products which enables a client to obtain those items.

- Diet prescription
- Exercise prescription

Robotic assisted telemanipulation of tools (14)

Robotic assistance to aid in performance of intervention.

Testimony (medicolegal) (34)

Bearing witness or giving evidence in front of a court, jury or board on behalf of a client

- Medico-legal testimony
- Court witness on behalf of a client

Therapeutic intervention NEC (94)

Any other therapeutic intervention that is not found elsewhere

Section 8 Interventions

Essence dilution (to strengthen against) (10)

The use of diluted extracts of plants and minute dosages of venom in order to strengthen the body against allergic hypersensitivity.

Immunization (to prevent) (70)

The use of bacterial and viral agents in order to prevent (and thus strengthen the body against) infection.

Phage therapy (59)

Treatment which involves using a virus to lyse bacteria.

Qualifier 1

Section 1 Approach/Technique

AA	using combined endoscopic with vaginal per orifice approach
AB	using combined open with endoscopic approach
AC	using combined open abdominal with vaginal per orifice approach
AD	using combined open abdominal with vaginal per orifice approach for fistula terminating at vagina
AE	using combined urethral and rectal per orifice approach
AF	using combined open abdominal and endoscopic transvaginal approach
AG	using combined endoscopic percutaneous and per orifice approach
AH	using combined open and endoscopic per orifice approach
AL	using combined per orifice and percutaneous approach

AY	using endoscopic per orifice approach terminating at vagina
AZ	using endoscopic per orifice approach terminating at uterus (or cervix)
BA	using endoscopic per orifice approach
BB	using endoscopic per orifice approach with continuous technique
BC	using endoscopic per orifice approach with intermittent technique
BD	using endoscopic per orifice approach with interstitial technique
BE	using endoscopic per orifice intracavitary approach
BF	using endoscopic per orifice intracervical approach
BG	using endoscopic per orifice rectal approach
BH	using endoscopic per orifice approach with self clean technique
BJ	using endoscopic per orifice urethral approach
BK	using endoscopic per orifice vaginal approach
BL	using endoscopic per orifice vaginal approach, for fistula terminating at vagina
BM	using endoscopic per orifice approach with coagulum
BN	endoscopic per orifice approach using circular stapling or suturing technique
BP	using endoscopic per orifice approach with needle aspiration
BQ	using endoscopic approach with robotic telemanipulation of tools
BR	using endoscopic per orifice approach with special excision technique
BS	using endoscopic per orifice approach with tissue welding technique
BT	using endoscopic per orifice approach with special incision technique
BV	using endoscopic per orifice approach with injection
BW	endoscopic [retrograde] per orifice approach using pancreaticoenterostomy diversion
BX	endoscopic [retrograde] per orifice approach using pancreaticogastrostomy diversion
CA	using per orifice approach
CB	using per orifice approach for ventilation
CC	using per orifice approach with compression/pressure
CD	using per orifice pump approach
CE	using per orifice injection (syringe) approach
CF	using per orifice drip or instillation approach
CG	using per orifice approach, interstitial
CH	using per orifice approach intracavitary
CJ	using per orifice approach with manual technique
CK	using per orifice approach with mechanical technique
CM	using per orifice approach with flexible intubating fibroscope
CN	using per orifice approach with rigid bronchoscope
CQ	using per orifice needle approach
CR	using per orifice approach and incision
DA	using endoscopic approach
DB	using endoscopic abdominal approach
DC	using endoscopic abdominal approach with anastomosis at abdominal level
DD	using endoscopic abdominal approach with anastomosis at cervical level
DE	using endoscopic approach with anastomosis at colorectal level

DF	using endoscopic approach with enterocolostomy [or colocolostomy] anastomosis
DG	using endoscopic approach with enteroenterostomy anastomosis
DH	using endoscopic approach with gastroduodenal anastomosis
DI	endoscopic [laparoscopic] approach using gastric bypass technique with enteroenterostomy and biliopancreatic bypass [to terminal ileum] [e.g. duodenal switch]
DJ	using endoscopic approach with gastroduodenal anastomosis and vagotomy
DK	using endoscopic approach with gastrojejunal anastomosis
DL	using endoscopic approach with gastrojejunal anastomosis and vagotomy
DM	using endoscopic approach with aspiration technique
DN	using endoscopic approach with enterocolostomy [or colocolostomy] bypass technique
DO	endoscopic [laparoscopic] approach using gastric bypass technique with gastroenterostomy and biliopancreatic bypass [to terminal ileum] [e.g. biliopancreatic diversion]
DP	using endoscopic approach with enteroenterostomy bypass technique
DQ	using endoscopic approach with gastroenterostomy bypass technique
DR	using endoscopic approach with gastroenterostomy bypass technique and proximal vagotomy
DS	using endoscopic approach with gastroenterostomy bypass technique and vagotomy [truncal or NOS]
DT	using endoscopic approach with calculi/stone extraction
DU	using endoscopic approach with calculi/stone extraction by incision
DV	using endoscopic approach with choledochoenterostomy bypass technique
DW	using endoscopic approach with circular stapling [fixation] technique
DX	using endoscopic (laparoscopic) approach with stoma formation and distal closure
DY	using endoscopic (laparoscopic) approach with stoma formation and creation of mucous fistula
DZ	using endoscopic approach with esophagoenterostomy technique
EA	using endoscopic approach with esophagoenterostomy technique and proximal vagotomy
EB	using endoscopic approach with esophagoenterostomy technique and truncal vagotomy [vagotomy NOS]
EC	using endoscopic approach with exploration
ED	using endoscopic approach with fixation technique
EE	using endoscopic approach with hepaticoenterostomy
EF	using endoscopic approach with manual technique
EG	using endoscopic approach with pancreaticoenterostomy
EH	using endoscopic approach with pancreaticogastrostomy
EI	endoscopic approach using combined techniques
EJ	using endoscopic approach with tightening technique
EK	using endoscopic approach with truncal vagotomy [vagotomy NOS]
EL	using endoscopic approach with proximal vagotomy
EM	using endoscopic approach with/of feeding jejunostomy
EN	using endoscopic approach with/of ileostomy
EP	using endoscopic approach with/of terminal colostomy
EQ	using endoscopic abdominoperineal approach with colorectal [or coloanal] anastomosis
ER	using endoscopic anterior approach NOS

ES	using endoscopic extracorporeal approach [bench surgery]
EV	using endoscopic inguinal approach
EW	using endoscopic interstitial approach
EX	using endoscopic intracavitary approach
EY	using endoscopic thoracic approach with anastomosis technique, cervical level
EZ	using endoscopic thoracic approach, with anastomosis technique, thoracic level
FA	using combined endoscopic thoracoabdominal approach
FB	using endoscopic thoracoabdominal approach with anastomosis technique, abdominal level
FC	using endoscopic thoracoabdominal approach with anastomosis technique, thoracic level
FD	using endoscopic transgluteal approach
FE	using endoscopic transperitoneal approach
FF	using endoscopic transrectal [anal] approach
FG	using endoscopic transrenal [trans-capsular] approach
FH	using endoscopic transurethral approach
FJ	using endoscopic transvaginal approach
FK	using endoscopic transvaginal approach with tissue welding
FL	using endoscopic transvesical approach
FM	using endoscopic ureterostomic approach
FN	using endoscopic approach with coagulum
FP	using endoscopic approach with debulking
FQ	using endoscopic approach with destruction
FR	using endoscopic approach with endarterectomy
FS	using endoscopic approach with endoureterotomy
FT	using endoscopic approach with formation of continent catheterizable reservoir
FU	using endoscopic approach with formation of ileoanal reservoir or neobladder
FV	using endoscopic approach with formation of neobladder with cutaneous diversion
FW	using endoscopic approach with ligament resection [or repair]
FY	using endoscopic approach with meniscectomy [or meniscopectomy]
FZ	using endoscopic approach with multiple sites
GA	using endoscopic approach with placement/implant of stent
GB	using endoscopic approach with special excision technique
GC	using endoscopic approach with tenodesis technique
GD	using endoscopic approach with special incisional technique
GE	using endoscopic (percutaneous) approach terminating at bladder
GF	using endoscopic (percutaneous) approach terminating at skin
GG	using endoscopic (percutaneous) approach terminating at uterus (or cervix)
GH	using endoscopic (percutaneous) approach terminating in genital tract (vagina, uterus)
GI	using endoscopic (percutaneous) approach terminating in circulatory system
GJ	using endoscopic (percutaneous) approach terminating in thoracic cavity
GK	using endoscopic (percutaneous) approach terminating in site NEC
GN	using endoscopic (percutaneous) approach terminating at abdominal cavity (digestive tract)
GP	using percutaneous transluminal approach

GQ	using percutaneous transluminal arterial approach
GR	using percutaneous transluminal venous approach
GS	using percutaneous transluminal approach with placement/implant of stent
GT	using percutaneous transluminal approach with excision technique
GU	using percutaneous transluminal approach with aspiration technique
GV	using combined endoscopic with perineal approach with coloanal or ileoanal (anastomosis/bypass)
GW	using endoscopic approach with esophagoduodenal anastomosis
GX	using endoscopic approach with esophagogastric anastomosis and vagotomy
GY	using endoscopic approach [arthroscopic] with meniscectomy
GZ	using endoscopic (arthroscopic) approach with special incisional technique
H1	using percutaneous approach with erythrocyte removal
H2	elution from other device
HA	using percutaneous needle approach [injection]
HB	using percutaneous aspiration technique
HC	using percutaneous block technique
HD	using percutaneous continuous flow technique
HE	using percutaneous infiltration technique
HG	using percutaneous approach injection local
HH	using percutaneous transcatheter approach
HI	using trans-tympanic injection
HJ	using percutaneous intermittent flow technique
HK	using percutaneous interstitial approach
HL	using percutaneous intracavitary approach
HM	using percutaneous approach intravenous exchange transfusion technique
HN	using percutaneous approach multiple site technique
HO	using percutaneous approach with lymphocyte removal using automated technique
HP	using percutaneous approach for peritoneal dialysis
HQ	using percutaneous approach for renal dialysis
HR	using percutaneous transcatheter intraosseous approach
HS	using percutaneous approach with blood collection using manual technique
HT	using percutaneous approach with leukocyte collection using automated technique
HU	using percutaneous approach with plasma collection using automated technique
HV	using percutaneous approach with plasma collection using manual technique
HW	using percutaneous approach with platelet collection using automated technique
HX	using percutaneous approach with stem cell collection using automated technique
HY	using percutaneous approach with stereotactic direction
HZ	elution from implanted device
JA	using external approach
JB	using external chiropractic technique
JC	External, continuous
JD	external approach using acupressure technique

JE	using external forced expulsion
JF	using external approach with intermittent (manual) technique
JG	using external approach with intermittent (mechanical) technique
JH	using external approach with manual technique
JJ	using external approach with massage technique
JK	using external approach with mechanical technique
JL	using external approach with osteopathic technique
JM	using external approach with percussion technique
JN	using external approach with pressure [compression] technique
JP	using external approach with therapeutic touch technique
JQ	using external approach with topical (includes spray, brush etc) technique
JR	using external approach with application to external fixator
JS	using external approach with application to internal fixator
JT	using external approach with application to skin fixator
JU	using external approach with depilation
JV	using external approach with placement/implant of stent (eye)
JW	using external approach with pressure technique
JX	using external approach with stabilization technique
JY	using external approach with manual compression and ventilation
JZ	using external approach with traction
KP	using extracorporeal approach with external beam
KQ	using extracorporeal lithotripsy
KR	using extracorporeal vibration
KS	using extracorporeal approach
KZ	using open abdominoperineal approach, with coloanal or ileoanal (anastomosis/ bypass)
LA	using open approach
LB	using open abdominal approach
LC	using open abdominal approach for fistula terminating at vagina
LD	using open abdominal approach with anastomosis technique, abdominal level
LE	using open abdominal approach with anastomosis technique, cervical level
LF	using open abdominoperineal approach NOS
LG	using open abdominoperineal approach with colorectal [or coloanal] anastomosis
LH	using open abdominoperineal approach with colostomy [or ileostomy]
LJ	using open abdominoperineal approach with colostomy, with urinary diversion
LK	using open abdominoperineal approach with continent ileostomy [Kock, Barnett]
LL	using open anterior approach NOS
LM	using open anterior approach, with interfascicular [split] repair technique
LN	using open anterior approach, with posterior approach
LP	using open cervical approach NOS
LQ	using open cervical approach with anastomosis technique, cervical level
LR	using open computer assisted approach
LU	using open combined transnasal and transcranial approach

LY	using open cranial base approach NEC
MA	using open approach for fistula terminating at bladder
MB	using open approach for fistula terminating at skin
MC	using open approach for fistula terminating at uterus
MD	using open approach for fistula terminating at vagina
ME	using open approach for fistula terminating in abdominal cavity [e.g. digestive or biliary tract]
MF	using open approach for fistula terminating in circulatory system
MG	using open approach for fistula terminating in face
MH	using open approach for fistula terminating in genital tract
MI	using open approach for fistula/shunt terminating in artery of lower limb
MJ	using open approach for fistula terminating in head and neck
MK	using open approach for fistula terminating in neck
ML	using open approach for fistula terminating in nose
MM	using open approach for fistula terminating in pharynx
MN	using open approach for fistula terminating in oral cavity
MO	using open approach for fistula/shunt terminating in vein of lower limb
MP	using open approach for fistula terminating in site NEC
MQ	using open approach for fistula terminating in thoracic cavity
MR	using open approach for fistula terminating in urinary tract
MS	using open approach with terminating site [fistula] at ear
MT	using open approach with terminating site [fistula] travelling through multiple cavities
MU	using open approach with terminating site [fistula] at abdominal vessels
MV	using open approach with terminating site [fistula] at subclavian vessel
MW	using open approach with terminating site [fistula] at other vessels of head and neck
MX	using open approach with terminating site [fistula] at carotid artery
MY	using open approach with terminating site [fistula] at upper limb artery
MZ	using open approach with terminating site [fistula] at vessels of lower limb
NA	using open approach with terminating site [fistula] at pulmonary artery
NB	using open approach with terminating site [fistula] at aorta
NC	using open approach with terminating site [fistula] at upper limb vein
ND	using open approach with terminating site [fistula] at vena cava
NF	using open approach with terminating site [fistula] at thoracic vessels
NG	using incisional approach with drainage into subconjunctival space
NH	using incisional approach with drainage into Schlemm's canal
NJ	using incisional approach with drainage into suprachoroidal space
NL	using open approach with lymphaticovenous or lymphnodal venous shunt
NM	using open cervical approach with incision
NP	using open extracapsular approach
NQ	using open extracorporeal approach [bench surgery]
NR	using open facial recess approach
NU	using open transpenile approach
NV	using open intracapsular approach

NW	using open intrapericardial approach
NX	using open intrapericardial approach for release of pulmonary vessels
NY	using open intrapericardial approach with laryngeal release
NZ	using open lateral neck approach
PA	using open lingual approach
PB	using open perineal approach NOS
PC	using open perineal approach, with circular stapling [fixation] technique
PD	using open perineal approach, with fixation technique
PE	using open perineal approach, with plication technique
PF	using open posterior approach NOS
PG	using open posterior approach, with interfascicular [split] repair technique
PH	using open retrograde approach
PJ	using open retroperitoneal approach
PK	using open retropubic approach
PL	using open retrosigmoid [suboccipital] approach
PM	using open scrotal approach
PN	using robotic assisted telemanipulation of tools [telesurgery]
PP	using open transcervical robotic assisted approach
PQ	using open translabyrinthine robotic assisted approach
PR	using open transnasal robotic assisted approach
PS	using open transoral robotic assisted approach
PW	using open anterior subcostal approach
PX	using open posterior subcostal approach
PY	using open transperitoneal subcostal approach
PZ	using open substernal approach
QA	using open subxiphoid approach
QB	using open thoracic approach NOS
QC	using open thoracic approach with anastomosis technique, cervical level
QD	using open thoracic approach with anastomosis technique, thoracic level
QE	using open thoracic approach with tracheoesophageal fistula repair technique
QF	using open thoracoabdominal approach
QG	using open thoracoabdominal approach with anastomosis technique, abdominal level
QH	using open thoracoabdominal approach with anastomosis technique, thoracic level
QJ	using open thoracoabdominal approach with tracheoesophageal fistula repair technique
QK	using open transaortic approach
QL	using open transcapsular approach
QM	using open transcapsular approach, with coagulum
QN	using open transcervical approach
QP	using open transfrontal approach
QQ	using open translabyrinthine approach
QR	using open transmastoid approach [mastoidectomy]
QS	using open transnasal approach

QT	using open transoral approach
QU	using open transperineal approach
QV	using open transpleural approach
QW	using open transrenal pelvis approach
QX	using open transthoracic approach
QY	using open transvaginal approach
QZ	using open transvesical approach
RA	using open vaginal approach
RB	using open vaginal approach for fistula terminating in genital tract (vagina, uterus)
RC	using open approach with adjustable suture technique
RD	using open approach with anastomosis technique, colorectal [or coloanal]
RE	using open approach with anastomosis technique, enterocolostomy [or colocolostomy]
RF	using open approach with anastomosis technique, enteroenterostomy
RG	using open approach with anastomosis technique, gastroduodenal
RH	using open approach with anastomosis technique, gastroduodenal, with vagotomy
RJ	using open approach with anastomosis technique, gastroenteral
RK	using open approach with anastomosis technique, gastroenteral, with vagotomy
RL	using open approach with anterior female pelvic exenteration
RM	using open approach with anterior female pelvic exenteration, with vaginal reconstruction
RN	using open approach with/of colocolostomy [diversionary]
RP	using open approach with/of enteroenterostomy [or enterocolostomy]
RQ	using open approach with/of feeding jejunostomy
RR	using open approach with/of ileostomy
RS	using open approach with/of terminal colostomy
RT	using open approach with arcuate incision
RU	using open approach with arthrectomy
RV	using open approach with arthroplasty
RW	using open approach with aspiration technique
RX	using open approach with atriopulmonary connection
RY	using open approach with atrioventricular connection
RZ	using open approach with attachment of muscles
SA	using open approach with baffle technique
SB	using open approach with bidirectional cavopulmonary anastomosis
SC	using open approach with bilateral fusion technique
SD	using open approach with bilateral transsternal anterior thoracotomy
SE	using open approach with burr hole technique
SF	using open approach with bypass technique, enterocolostomy [or colocolostomy]
SG	using open approach with bypass technique, enteroenterostomy
SH	using open approach with bypass technique, gastroenterostomy
SI	open approach using gastric bypass technique with enteroenterostomy and biliopancreatic bypass [to terminal ileum] [e.g. duodenal switch]
SJ	using open approach with bypass technique, gastroenterostomy, with biliopancreatic

SK	using open approach with bypass technique, gastroenterostomy, with proximal vagotomy
SL	using open approach with bypass technique, gastroenterostomy, with vagotomy NEC [truncal or NOS]
SM	using open approach with calculi/stone extraction
SN	using open approach with calculi/stone extraction, with incision
SP	using open approach with capsulectomy
SQ	using open approach with chest wall [subcutaneous] tunnel exteriorization technique
SR	using open approach with choledochoenterostomy
SS	using open approach with circular stapling [fixation] technique
ST	using open approach with closed heart technique
SU	using open approach with coagulum
SV	using open approach with colostomy [or ileostomy]
SW	using open approach with colostomy, with urinary diversion
SX	using open approach with columellar incision technique
SY	open approach and percutaneous transluminal approach
SZ	using open approach with craniotomy flap technique
TA	using open approach with debulking
TB	using open approach with dilation technique
TC	using open approach with end cervical exteriorization technique
TD	using open approach with endarterectomy
TE	using open approach with endoureterotomy
TF	using open approach with stoma formation and distal closure
TG	using open approach with stoma formation and creation of mucous fistula
TH	using open approach with esophagoenterostomy technique
TJ	using open approach with esophagoenterostomy technique, with proximal vagotomy
TK	using open approach with esophagoenterostomy technique, with vagotomy NEC [truncal, NOS]
TL	using open approach with exocrine drainage via bladder
TM	using open approach with exocrine drainage via intestine
TN	using open approach with exocrine suppression
TP	using open approach with exploration
TQ	using open approach with extended end to end anastomosis
TR	using open approach with extended radical excision
TS	using open approach with extension key technique
TT	using open approach with extracardiac cavopulmonary connection
TU	using open approach with extracardiac conduit
TV	using open approach with fixation technique
TW	using open approach with fixation technique [posterior]
TX	using open approach with fixation to floor of mouth technique
TY	using open approach with fixation to lower lip technique
TZ	using open approach with formation of continent catheterizable reservoir
UA	using open approach with formation of ileoanal reservoir or neobladder
UB	using open approach with formation of neobladder with cutaneous diversion

UC	using open approach with free nipple graft technique
UD	using open approach with full thickness excision
UE	using open approach with functional neck dissection
UF	using open approach with hepaticoenterostomy
UG	using open approach with implantation of ovary into uterus
UH	using open approach with interfascicular [split] repair technique
UJ	using open approach with intraventricular tunnel with extracardiac conduit
UK	using open approach with intrascleral thermosclerostomy
UL	using open approach with intraventricular tunnel
UM	using open approach with laryngeal release
UO	using open approach with ectropion repair
UP	using open approach with levator muscle advancement
UQ	using open approach with ligament resection [or repair]
UR	using open approach with ligature dissection technique
US	using open approach with liposuction
UT	using open approach with localization device
UU	using open approach with loop stabilization technique
UV	using open approach with mammographic wire localization
UW	using open approach with manual technique
UX	using open approach with medial spindle technique
UY	using open approach with meniscectomy [or meniscoplasty]
UZ	using open approach with mobilization of hyoid bone for access
VA	using open approach with total node dissection
VB	using open approach with modified radical neck dissection
VC	using open approach with multiple sites
VD	using open approach with node dissection [low level] [without localization assistance]
VE	using open approach with node dissection [low level], with mammographic wire localization
VF	using open approach with node dissection [low level], with needle hook or guide wire localization
VG	using open approach low level node dissection
VH	using open approach with optical technique
VJ	using open approach with osteotomy
VK	using open approach with pancreaticoenterostomy
VL	using open approach with pancreaticogastrostomy
VM	using open approach with pars plana lensectomy
VN	using open approach with partial neck dissection
VO	using open approach with phacoemulsification and laser
VP	using open approach with partial thickness excision
VQ	using open approach with periareolar round block technique
VR	using open approach with phakoemulsification
VS	using open approach with placement/implant of stent
VT	using open approach with plication technique

VU	using open approach with posterior female pelvic exenteration
VV	using open approach with posterior female pelvic exenteration, with vaginal reconstruction
VW	using open approach with preservation of facial nerve technique
VX	using open approach with preservation of vascular [or neural] pedicle technique
VY	using open approach with proximal vagotomy
VZ	using open approach with pylorus preserving technique
WA	using open approach with pylorus preserving technique, with vagotomy
WB	using open approach with radical exenteration
WC	using open approach with radical maxillary antrectomy
WD	using open approach with radical neck dissection
WE	using open approach with removal of annulus
WF	using open approach with resected nerve end buried
WG	using open approach with resected nerve end coagulated [and buried]
WH	using open approach with size reduction technique NEC [without excision]
WJ	using open approach with special excisional technique
WK	using open approach with special incisional technique
WL	using open approach with splitting technique
WM	using open approach with stripping technique
WN	using open approach with subcutaneous mastectomy with nipple areola preservation
WP	using open approach with super radical excision
WQ	using open approach with suture technique
WR	using open approach with sympathectomy
WS	using open approach with tarsectomy mullerectomy
WT	using open approach with temporary bypass
WU	using open approach with tenodesis technique
WV	using open approach with thyrotomy
WW	using open approach with total (complete) exenteration
WX	using open approach with total cavopulmonary connection
WY	using open approach with total female pelvic exenteration
WZ	using open approach with total female pelvic exenteration, with vaginal reconstruction
XA	using open approach with total female pelvic exenteration with vaginal reconstruction, with rectal anastomosis
XB	using open approach with total tarsorrhaphy
XC	using open approach with trabeculectomy
XD	using open approach with trabeculotomy
XE	using open approach with transcanal mastoidectomy
XF	using open approach with transection technique
XG	using open approach with tympanoplasty type 1
XH	using open approach with tympanoplasty type 2
XJ	using open approach with tympanoplasty type 3
XK	using open approach with tympanoplasty type 4
XL	using open approach with tympanoplasty type 5

XM	using open approach with use of multiple drains
XN	using open approach with vagotomy NEC [truncal or NOS]
XO	using endoscopic [laparoscopic] approach with vertical banded technique
XP	using open approach with vertical banded technique
XQ	using open approach with vitrectomy technique
XS	using open approach with splitting technique and exocrine drainage via bladder
XT	using open approach with splitting technique and exocrine drainage via intestine
XU	using open approach with multiple sites and exocrine drainage via bladder
XV	using open approach and multiple sites with exocrine drainage via intestine
XY	using open approach with transannular patch
YA	route NEC
YB	continence training
YC	using forced expiration (e.g. coughing)
YD	using exercise NOS
YE	using breathing exercise
YF	using conditioning exercise
YG	using exertional rotation exercise
YH	using mobility exercise (joint motion)
YK	using passive motion exercise
YL	using postural (training) exercise
YN	using active range of motion exercise
YP	using functional training
YQ	using resistive exercise
YS	using muscle relaxation technique
YT	using partial activity restriction
YW	using total activity restriction
YY	using breathing and position maneuvers
YZ	using forced expulsion
ZA	using aquatic exercise
ZB	using balance training exercise
ZC	work hardening exercise
ZD	work conditioning exercise
ZZ	using technique NEC

Section 2 Approach/Technique

AB	using intelligence quotient scale technique
AC	using social quotient scale technique
AD	forensic (self harm, suicide, violence to others)
AE	competence (financial, testamentary, legal)
AF	direction of EMS/ALS program
AH	memory scale technique (e.g. Weschler)
AJ	inventory technique (e.g. MMPI)

AK	color vision testing
AL	dark adaptation testing
AM	brightness acuity testing
AN	contrast sensitivity testing
AP	vision potential testing
AQ	functional visual loss testing
AR	light reflex testing
AS	cover test
AT	extra-ocular movement testing
BA	endoscopic per orifice NOS
BB	endoscopic per orifice following stimulation
BC	using antegrade (via mouth) endoscopic per orifice approach
BD	using retrograde (via rectum) endoscopic per orifice approach
BG	endoscopic per orifice, with suction/curettage
BN	endoscopic per orifice & laser assisted optical technique (for biopsy)
BP	endoscopic per orifice, with needle aspiration
BR	endoscopic per orifice, with brushing/washing/scraping
BS	using antegrade (via mouth) endoscopic per orifice approach brush biopsy or washing
BT	using retrograde (via rectum) endoscopic per orifice approach brush biopsy or washing
CA	per orifice approach NOS
CB	per orifice approach, with punch device
CC	per orifice approach, with loop electrode
CD	per orifice approach, with cold knife
CG	per orifice approach, with suction/curettage
CQ	using per orifice needle approach
CR	per orifice approach, with brushing/washing/scraping
DA	endoscopic approach NOS
DC	endoscopic approach, anterior
EA	total capacity determination only
EB	total capacity with timed forced expiratory capacity
EC	total capacity with timed forced expiratory capacity and peak flow rate
ED	total capacity with timed forced expiratory capacity and peak flow rate with maximal voluntary ventilation
EF	maximal voluntary ventilation only
EG	flow volume loops
EH	with evaluation following use of bronchodilator
EJ	with evaluation following exercise
EK	with evaluation following prolonged exposure to various agents
ET	for tear production
EU	for lacrimal drainage following instillation of fluorescein dye in conjunctival sac
EV	for lacrimal drainage following instillation of water or saline after dilation of puncta
FA	slit-lamp biomicroscopy

FB	keratometer
FC	photokeratoscope
FD	computerized corneal topography
FE	evaluation of voice
FF	evaluation of speech/fluency
FG	language evaluation (e.g. morphology, syntax, phonetics_)
FK	expression of spoken language
FL	expression of written language
FM	expression of non-spoken/written language
FN	evaluation of aphasia
FP	using pachymeter
FR	helium dilution method
FS	nitrogen washout method
GA	functional capacity/ability
GB	situational/environmental
GC	activities of daily living
GE	assistive/adaptive
GP	percutaneous transluminal approach NOS
GQ	percutaneous transluminal approach, arterial
GR	percutaneous transluminal approach, venous
HA	percutaneous (needle) approach
HB	percutaneous aspiration technique
HN	percutaneous repetitive stimulation technique
JA	external approach NOS
JB	light source (trans-illumination) technique
JD	slit- lamp microscopy following fluorescein staining
JH	manual technique
JJ	blood glucose
JK	urine glucose
JL	blood pressure
JM	temperature
JN	cardiac rate/pulse
JQ	external scraping [of cells] technique
JW	air (cuff) plethysmography
JX	applanation indentation tonometer
JY	Strain-Gauge plethysmograph
LA	open approach NOS
LL	open approach, anterior
LR	open computer-assisted approach NOS
LT	open computer-assisted approach, trans-labyrinthine
LU	open computer-assisted approach, trans-nasal
LV	open computer-assisted approach, trans-oral

LW	open computer-assisted approach, with burr hole technique
LX	open computer-assisted approach, with craniotomy [flap] technique
MA	allergenic extract injection for immediate reaction
MB	allergenic extract injection for delayed reaction
MC	allergenic extract scratch test
MD	allergenic extract patch test
ME	allergenic extract photopatch test
MF	microorganisms injection for immediate reaction
MG	microorganisms injection for delayed reaction
MH	microorganisms scratch test
MJ	microorganisms patch test
MK	microorganisms photopatch test
ML	drugs injection for immediate reaction
MM	drugs scratch test
MN	drugs patch test
MP	drugs photopatch test
MQ	venoms injection for immediate reaction
MR	venoms scratch test
MS	venoms patch test
MT	venoms photopatch test
MU	other biological products immediate reaction
MV	other biological products scratch test
MW	other biological products patch test
MX	other biological products photopatch test
NA	nutritional
NB	neurological scale (e.g. Glasgow coma)
NC	respiratory
ND	fluid
NE	vital signs
NK	dual chamber rate responsive pacemaker
NL	dual chamber fixed rate pacemaker
NM	single chamber rate responsive pacemaker
NN	single chamber fixed rate pacemaker
NR	cardioverter/defibrillator
NZ	open approach, neck incision
PF	open approach, posterior
PM	for assistance in dying
PN	open robotic-assisted approach NOS
PQ	open robotic-assisted approach, trans-labyrinthine
PS	open robotic-assisted approach, trans-oral
PZ	open approach, substernal
QA	comprehension of spoken language

QB	comprehension of written language
QC	recognition of non written language
QP	for activities of daily living (ADL)
QQ	open approach, trans-labyrinthine
QS	open approach, trans-nasal
QT	open approach, trans-oral
QV	open approach, trans-canal
RA	venous puncture
RB	venous catheterization, femoral
RC	venous catheterization NEC
RD	capillary puncture
RE	arterial puncture
RF	arterial catheterization, femoral
RG	arterial catheterization NEC
RH	urine by catheterization technique
RJ	quantitative urine
RK	urine by technique NOS
RL	sweat
RM	swab, microbiological
RW	open approach, with aspiration, through burr hole
SE	open approach, with burr hole technique
SZ	open approach, with craniotomy [flap] technique
TA	at rest
TG	sleep deprivation technique
TP	with exercise
TQ	with special technique/recording NEC
TS	routine/complete study with oxygen uptake and exercise
TU	single breath study
TV	pacemaker tracings
TW	steady state study
TX	decreasing concentration of O2
TY	increasing concentration of O2
UC	oxygen consumption technique
UD	thermodilution technique
UE	air/gas
UF	saline/dye
UJ	intravenous administration
UK	oral administration
UL	intramuscular injection
UM	subcutaneous injection
VD	residual volume measurement
VE	bladder capacity
VF	voiding pressure study

VG	urine flow
VH	filling cystometry
XD	without caloric stimulation
XF	with recording of evoked response
XH	with stimulation
XK	with provocation
XL	with stimulation and measurement
XM	with stimulation and EPO measurement
YA	pure tone with air conduction only
YB	pure tone with air and bone conduction
YC	combination of techniques NEC
YD	pure tone loudness balance test
YE	pure tone decay testing
YF	Stenger test
YG	speech reception threshold only
YH	speech reception threshold and word recognition
YJ	delayed auditory feedback test
YK	filtered speech test
YL	visual technique (e.g. Bender, Benton test)
YM	other word recognition test
ZR	for use of assistive (or adaptive) equipment
ZS	for nutrition status
ZT	for pharmacy profile
ZU	for physiological function
ZV	for situation
ZX	for determining candidacy for treatment
ZZ	approach/technique NEC

Section 3 Approach/Technique

AP	of single tooth
AQ	of partial set/series (e.g. multiple teeth)
AR	of full set/series (e.g. all teeth, full mouth)
AS	with pantomography
AY	with cine/video recording
CA	using scintigraphy
CB	using scintigraphy with vascular flow
CC	using SPEC tomography (SPECT)
CD	using SPEC tomography (SPECT) with vascular flow
CE	using PE tomography (PET)
CF	using PE tomography (PET) with vascular flow
CG	dual energy (xray) absorptiometry
CH	using SPEC tomography (SPECT) with CT hybrid technique, single machine

CJ	using PE tomography (PET) with CT hybrid technique, single machine
DA	with ultrasound alone
DB	with ultrasound and color flow
DC	with ultrasound and Doppler
DD	with ultrasound and color flow and Doppler
DE	with transoral ultrasound alone
DF	using abdominal approach
DG	using trans rectal approach
FA	using imaging study
FD	using biometric study
FE	for multiple areas
FX	for whole body
GP	percutaneous transluminal intravascular
HA	with ultrasound alone (abdominal and trans-vaginal or trans- esophageal)
HB	with ultrasound and color flow (abdominal and trans-vaginal or trans- esophageal)
HC	with ultrasound and Doppler (abdominal and trans-vaginal or trans- esophageal)
HD	with ultrasound and color flow and Doppler (abdominal and transvaginal or transesophageal)
HE	using transbronchial endoscopic per orifice approach
HH	using endoluminal approach
HJ	using trans-esophageal approach
HK	with ultrasound and color flow (intravascular or abdominal and transrectal)
HL	with ultrasound and Doppler (intravascular or abdominal and transrectal)
HM	with intravascular ultrasound and color flow and Doppler
KA	with function study
KC	with perfusion study
KD	with ventilation study
KE	with ventilation study and perfusion study
KG	with perfusion imaging, single study at rest
KH	with perfusion imaging, multiple studies, resting and with stress and redistribution
KK	with vascular flow and function study
KM	with physically induced stress
KN	with pharmacologically induced stress
KP	with blood pool imaging, first pass technique, single study at rest
KQ	with blood pool imaging, first pass technique, multiple studies, resting and with stress
KR	blood pool imaging and vascular flow
KS	blood pool imaging and SPEC tomography (SPECT)
LA	with abdominal and trans-vaginal ultrasound alone
LB	with abdominal and trans-vaginal ultrasound and color flow
LC	with abdominal and trans-vaginal ultrasound and Doppler
LD	with abdominal and trans-vaginal ultrasound and color flow and Doppler
MA	with intravascular ultrasound alone
MB	with intravascular ultrasound and color flow

MC	with intravascular ultrasound and Doppler
MD	with intravascular ultrasound and color flow and Doppler
MX	without intrinsic factor
MY	with intrinsic factor
MZ	with and without intrinsic factor
NA	with abdominal and trans-rectal ultrasound alone
NB	with abdominal and trans-rectal ultrasound and color flow
NC	with abdominal and trans-rectal ultrasound and Doppler
ND	with abdominal and trans-rectal ultrasound and color flow and Doppler
PB	for total blood volume determination
PD	for white blood cell survival
PE	for white blood cell survival with sequestration
PL	for plasma volume determination
PP	for red blood cell survival
PQ	for red blood cell survival with sequestration
PR	for red blood cell volume determination
PS	for red blood cell survival
PT	for platelet survival
PU	for platelet survival with sequestration
SC	for blood loss
SD	for absorption study
SE	esophageal transit study
SN	for esophageal reflux study
SP	for esophageal motility study
SQ	for glomerular filtration rate
SZ	for placement of localization device
TA	for plasma radioiron clearance
TB	for protein loss study
TC	for gastric emptying
TD	for radioiron (oral) absorption study
TE	for red cell radioiron utilization
TF	for renal clearance
TG	for renal plasma flow
TH	for residual urine in bladder
TK	for ureteral reflux
TL	for urinary recovery
VA	without contrast (e.g. plain film)
VC	following intravenous injection of contrast
VF	following intra-lymphatic injection of contrast
VH	following injection of air or gas (in cavity)
VJ	following subarachnoid injection of contrast
VK	following intradiscal injection of contrast
VL	following intraarticular injection of contrast
VM	after epidural injection of contrast

VN	with fluoroscopy
VR	with double contrast
VT	with double contrast and glucagon
VV	following per orifice injection of contrast
VX	following intra-arterial injection of contrast
VY	following intra-cardiac injection of contrast
VZ	following percutaneous injection of contrast
WA	without enhancement- Deactivated v2015
WC	with contrast
WE	with and without enhancement- Deactivated v2015
WG	following oral administration of contrast
WN	following antegrade injection of contrast
WQ	following antegrade injection of contrast with voiding views
WX	following T-tube or catheter injection of contrast
WZ	following endoscopic (retrograde) injection of contrast
XA	following percutaneous (transhepatic) injection of contrast
XB	following percutaneous trans-hepatic injection of contrast and hemodynamic evaluation
XJ	following retrograde injection of contrast
XK	following retrograde injection of contrast using special light source
XN	following retrograde injection of contrast with voiding views
ZA	using microscope
ZB	using computer (with or without stereotaxis)
ZC	using stereotaxis (without computer guidance)
ZE	using camera
ZF	using light source (infrared)
ZZ	using imaging technique NEC

Section 5 Approach/Technique or Method

AA	without episiotomy
AB	major antenatal visit
AC	subsequent visits
AD	biophysical profile with non stress test
AE	biophysical profile without non stress test
AF	fetal movement count
AG	non stress test
AH	contraction stress test
AJ	amniotic fluid index [AFI]
AK	external tocodynamometer
AL	combined routes of administration (e.g. oral followed by intravenous)
AM	using manual palpation and observation
AN	using membrane stripping
AP	using artificial rupture of membranes

AW	using combination of two or more methods
AX	psychophysiologic preparation
AY	developing a birth plan
AZ	nipple stimulation
BA	individual childbirth teaching
BB	group childbirth teaching
BC	birthing educational tour
BD	diet teaching and assessment
BE	classes for fathers
BF	classes for siblings
BG	classes for the pregnant adolescent
BH	exposure to infectious diseases in pregnancy
BJ	stress alleviation
BK	lifestyle adjustment
BL	sexuality
BM	exercise and physical fitness
BN	developmental abnormalities
BP	genetic counseling
BQ	nutritional
BR	work during pregnancy
BS	physical/mental abuse during pregnancy
BT	pre-existing conditions in pregnancy (e.g. epilepsy)
BU	parenting
BV	same sex parenting
BW	contraception and sterilization
BX	suppression of lactation
BY	community resources
BZ	physical comfort measures
CA	oral approach
CB	Cesarean hysterectomy with use of both vacuum and forceps
CC	classical section [vertical incision in upper segment] with use of both vacuum and forceps
CD	extraperitoneal section with use of both vacuum and forceps
CE	inverted T incision with use of both vacuum and forceps
CF	low segment transverse incision with use of both vacuum and forceps
CG	other type of Cesarean section NEC [e.g. vaginal, J incision] with use of both vacuum and forceps
CK	per orifice approach
DA	endoscopic approach
EC	salpingostomy using open approach
ED	salpingostomy using endoscopic approach
EF	endoscopic approach with manual technique
EJ	partial salpingectomy using open approach
EK	partial salpingectomy using endoscopic approach

EM	other extra-uterine pregnancy using open approach
EQ	other extrauterine pregnancy using endoscopic approach
FB	menstrual extraction or regulation [minisuction curettage]
FC	injection into amniotic sac, intrauterine pregnancy,image assisted
FF	injection into amniotic sac, extrauterine pregnancy, image assisted
FH	injection into amniotic sac, extrauterine pregnancy, endoscopic approach
FJ	using cardiac puncture
FK	using intracardiac/intrathoracic injection
FL	using sac aspiration
FM	using vascular occlusion
GA	using dilatation and curettage
GB	using endoscopic approach with special excisional technique
GC	using aspiration and curettage
GD	dilation and evacuation [D & E]
GH	using episiotomy
GJ	using incision of cervix
GK	using symphysiotomy
GL	using episiotomy
GN	removal of cerclage material
GP	using intravascular approach
GS	major morphological assessment
GU	incision of vagina
GV	transperineal approach
GW	using pelvimetry with placental localization
GX	using pelvimetry without placental localization
GY	using placentography
GZ	using other imaging techniques
HA	using percutaneous approach
HB	using patterned breathing techniques
HC	using other relaxation techniques
HD	using counter pressure
HE	using hot/cold packs
HF	using music therapy
HG	using birthing ball
HH	using hydrotherapy
HJ	using touch therapy
HK	using therapeutic touch
HL	using coaching
HM	using massage
HN	manual removal of placenta
HP	manual correction of inverted uterus
HQ	surgical correction of inverted uterus

HR	manual exploration of uterine cavity
HS	visualization
HT	using uterine packing
HU	using bimanual compression and massage
HV	compression using intrauterine balloon
JA	external approach
JB	using internal podalic version
JC	using manual rotation of fetal head
JD	using forceps rotation of fetal head
JE	using forceps rotation with episiotomy
JH	laceration of corpus uteri [body of uterus]
JJ	laceration of cervix occurring with vaginal delivery
JK	laceration of cervix occurring with Cesarean delivery
JL	laceration of broad ligament
JM	secondary incision or wound dehiscence of uterus
JN	secondary repair of episiotomy
JP	laceration of pelvic floor, perineum, lower vagina or vulva
JQ	laceration of rectum and sphincter ani
JR	laceration of bladder and urethra
JS	incisional hematoma
JT	other hematoma of vulva or vagina
JU	high vaginal laceration
JW	using lower segment transverse incision and forceps
JX	using lower segment transverse incision and vacuum
JY	using classical incision
JZ	using classical incision and forceps
KA	using classical incision and vacuum
KB	using extraperitoneal incision
KC	using extraperitoneal incision and forceps
KD	using extraperitoneal incision and vacuum
KE	using Cesarean hysterectomy
KF	using laparotomy (for abdominal pregnancy)
KG	using inverted "T" incision
KH	using outlet (forceps or vacuum) without episiotomy
KJ	using outlet (forceps or vacuum) with episiotomy
KK	using low forceps/ forceps NOS, low vacuum without episiotomy
KL	using low forceps/vacuum with episiotomy
KM	using mid forceps/vacuum without episiotomy
KN	using mid forceps/vacuum with episiotomy
KP	using double application of forceps without episiotomy [e.g. Scanzoni maneuver]
KQ	using vacuum (for descent only) with forceps extraction
KR	using vacuum (for descent only) with forceps extraction & episiotomy

KS	using double application of forceps with episiotomy [Scanzoni maneuver]
KT	using other type of incision
KV	under water
KW	above water
KY	bed
KZ	ambulatory
LA	using open approach
LB	lateral
LC	delivery on all fours (limbs)
LD	lithotomy position
LE	squatting position
LF	modified squatting position
LG	using multiple position changes
LH	using Wood's corkscrew maneuver
LJ	standing
LK	sitting
LL	using flexion of legs over abdomen (McRobert's maneuver for shoulder dystocia)
LM	using modified Prague maneuver
LN	using Pinard's maneuver
LP	using Zavanelli maneuver [cephalic replacement]
LR	umbilical cord [cordocentesis]
LS	using chorionic villus sampling <12 weeks transcervical approach
LT	using chorionic villus sampling <12 weeks transabdominal approach
LU	using late chorionic villus sampling >12 weeks transcervical approach [placental biopsy]
LV	using late chorionic villus sampling >12 weeks transabdominal approach [placental biopsy]
MA	using expression (emptying)
MB	using binding
MC	using heat
MD	using ice
ME	nipple care
MF	using electric pump
MG	using manual pump
MJ	fetal head [cerebral artery]
MK	fetal heart
ML	uterine artery/arteries
MM	umbilical artery/vein
MN	transcutaneous electrical nerve stimulation [TENS]
MP	using hypnosis
MQ	using acupuncture
MR	using pressure points
MU	of other fetal vessels
MV	other fetal parts
NE	using vacuum type unspecified

NF	using vacuum type unspecified with episiotomy
NL	using partial breech extraction
NM	using partial breech extraction with manually assisted delivery of head
NN	using partial breech extraction with forceps to aftercoming head
NP	using total breech extraction
NQ	using total breech extraction with manually assisted delivery of head
NR	using total breech extraction with forceps to aftercoming head
NU	using unspecified [unqualified] breech extraction
NV	using unspecified breech extract with manually assisted delivery of head
NW	using unspecified breech extraction with forceps to aftercoming head
PA	using partial breech extraction with spontaneous delivery of head & episiotomy
PB	using partial breech extraction with manual delivery of head & episiotomy
PC	using partial breech extraction with forceps to aftercoming head [e.g. Piper's] and episiotomy
PD	using total breech extraction with episiotomy
PE	using total breech with manual delivery of head & episiotomy
PF	using total breech extraction with forceps delivery of aftercoming head & episiotomy
PG	using unspecified breech extraction & episiotomy
PH	using unspecified breech extraction with manual delivery of head & episiotomy
PJ	using unspecified breech extraction with forceps delivery of aftercoming head & episiotomy
QA	destruction of (dead) fetus
QB	fracture of humerus
QC	fracture of clavicle
QD	clavicotomy (cleidotomy)
QE	needling of hydrocephalic head
QF	needling of fetal abdomen
QG	other methods of decompression of (dead) fetus
QH	scalp blood sampling
QJ	blood sampling, image assisted
QK	pulse oximetry
QM	skin
QN	open approach, transcervical
QP	liver
QS	vesicoamniotic catheter shunt
QU	muscle
QV	using endoscopic approach and insertion of vesicoamniotic catheter shunt
QX	site NEC
RA	using "T" incision with forceps
RB	using "T" incision with vacuum
RC	using Cesarean hysterectomy with forceps
RD	using Cesarean hysterectomy with vacuum
RE	using laparotomy with forceps
RF	using laparotomy with vacuum

RG	using other type of Cesarean incision and forceps
RH	using other type of Cesarean incision and vacuum
SA	use of equipment
SB	care of 3rd or 4th degree tear
SC	normal puerperium care
SD	contraceptive use
SE	infant care
SF	psychosocial
SG	body image after birth
SH	child growth and development
SJ	breastfeeding techniques and/or alternatives
SK	postpartum depression
SL	grieving/bereavement
SM	(group) prenatal classes
TA	procurement of cord blood
TB	intrauterine pressure catheter
TC	salpingotomy using endoscopic approach
UW	open approach with manual technique
WJ	open approach with special excision technique
WK	open approach with special incision technique
YA	route NEC
ZZ	unspecified NOS (NEC)

Section 6 Technique or Reason

AD	for addiction
AS	for sleep
AV	for assault victimization
BE	for behavior
BR	for breath control
CD	for concurrent disorders
CM	for competence (financial, legal, testamentary)
CP	for capacity for harm (to self or others)
CT	for crisis or trauma
DC	for couples
DF	for family
DS	for sex
DW	for work
DZ	for other interpersonal relationship NEC
FR	forensic
GA	for gambling
GB	for grief or bereavement
LA	for low vision
LB	for orthoptic vision

LC	for reading (braille)
LE	for using guide dog
MA	for mood
MD	for orientation
ME	for memory
MP	for perception
MR	for recognition
MZ	for other cognition and learning NEC
PE	for personality
QA	for spoken language
QB	for written language
QC	for self- expression
RB	for speech production
RC	for speech fluency
RD	for speech articulation
SK	for coping skills
SN	for sound production
TA	for alimentation
TB	for bathing
TD	for using assistive/ adaptive devices
TF	for meal preparation
TG	for grooming
TH	for housekeeping
TJ	for home economics
TM	for oral hygiene
TP	for body positioning
TQ	for hair washing
TT	for transfers
TU	job placement
TV	supported work
TW	for multiple motor functions
ZZ	for other NEC

Section 7 Reason or Method

7A	reason 1
7B	reason 2
7C	reason 3
7D	reason 4
7E	reason 5
7F	reason 6
7G	reason 7
7H	reason 8
7J	reason 9

7K	reason 10
7L	reason 11
7M	reason 12
7N	reason 13
7P	reason 14
7Q	reason 15
7R	reason 16
7S	reason 17
7T	reason 18
7U	reason 19
7V	reason 20
AA	of communal living space
AB	of private living space
AD	of public meeting place
AE	of public recreation site
AG	of public roads and highways
AK	of public transportation (system)
AL	of public waterways
AP	of other public place
AW	of workplace
ED	for eligibility determination
FE	soft contact lens
FF	gas permeable contact lens
FG	contact lens NEC
FH	spectacle frame
FI	spectacle lens
FJ	specialty vision device NEC
GA	for gambling
JA	for pharmacological agent
JB	for herbal preparation
JC	for therapeutic service
JD	for assistive/ adaptive device
JZ	for other healthcare product
KA	for prosthetic device
KB	for orthodontic device
KC	for other external appliance
KF	for seating
KG	for wheelchair
KH	for walking aid
KP	for oxygen
LA	for certificate
LB	for claim form
LC	for consent
LD	for incident report

LZ	for other correspondence
PA	for psychiatric review board
PB	for (regarding) mental health
PK	for palliation
PL	for (chronic) pain
PM	for assistance in dying
PR	for placement requirements
PZ	for other testimony
QA	for medication administration (any route)
QB	for oxygen use
QC	for catheter care
QD	for dialysis
QE	for stoma care
QF	for installation & care of prosthesis
QG	for dressings
QH	for exercises
QJ	for surgical site marking
QP	of quality of air
QS	of quality of soil
QV	of quality of water
SA	by area restriction
SB	by physical restraint
SC	by chemical restraint
SD	by physical & chemical restraint
SE	by enforcing airborne precaution
SF	by enforcing contact precaution
SJ	by placement in incubator
SL	by placement under hood (or tent)
SM	for stress management and balanced lifestyle
SZ	by environmental adaptation NEC
TA	for alimentation (food intake)
TB	for bathing
TC	for bladder hygiene
TD	for using assistive/ adaptive devices
TE	for bladder & bowel hygiene
TF	for meal preparation
TG	for grooming
TH	for housekeeping
TJ	for shopping
TK	for transportation
TL	for bowel hygiene
TM	for oral hygiene

TO	for toileting
TP	for body positioning
TQ	for hair washing
TT	for transfers
TZ	for treatment plan execution
UA	for self- monitoring of biochemical levels
UB	for self-monitoring of diet
UK	for self- monitoring of vital signs
UL	for self- examination of breast
UM	for self- examination of genitalia
UN	for biofeedback
UZ	for other self- examination NEC
VA	for alcohol use (misuse)
VB	for drug use (misuse)
VC	for conception
VD	for nutrition
VE	for safe environment
VF	for safe recreation
VG	for safe sexual practice
VH	for safe vehicle
VK	for smoking
VX	for organ donation
VZ	for self care during chemo/radiation therapy
XA	for disease process
XB	for health and wellness promotion
XC	for health resources available in community
XD	for impact of disablement
XE	for life cycle changes
XM	for (sustaining) mental health (recognizing problems
ZX	using system NEC
ZZ	for other NEC (reason)

Section 8 Route/Nature of Administration

BA	by oral intake [po]
BB	by inhalation (intranasal)
GR	by intravenous [IV] injection
HA	by intramuscular [IM] injection
HB	by subcutaneous [SC] injection
HC	by intradermal injection
HZ	by injection targeting (specific) site
JA	by topical application

Qualifier 2**Section 1 Agent or Device**

1C	using thrombolytic agent
A0	using alimentary tract and metabolism agent
A1	using stomatological or mouth preparation agent
A2	using antacid or drug for treatment of peptic ulcer and flatulence
A3	using antispasmodic or anticholinergic agent and propulsive agent
A4	using antiemetic or antinauseant agent
A5	using bile and liver therapy agent
A6	using laxative agent
A7	using antidiarrheals, intestinal antiinflammatory or anti-infective agent
A8	using anti-obesity preparation agent
A9	using digestive agent
AB	and scraping device
AC	and cold knife
AD	and cryoprobe
AE	and curette
AF	and aspiration curette
AG	and laser NEC
AH	and laser with prosthesis
AK	and (electric) loop
AL	and electrical device
AM	and basket device
AN	and electrocoagulation
AP	and electrical spark
AQ	and electromagnetic shock wave
AR	and piezoelectric shock wave
AS	and electrohydraulic device
AT	and electromechanical device
AU	and electrosleeve
AV	and probe
AW	and radiofrequency
AY	and dermatome
AZ	and ultrasonic device
B1	using diabetes treatment agent
B2	using vitamin agent
B3	using mineral supplement agent
B4	using tonic
B5	using anabolic agent
B6	using appetite stimulant agent
B7	using other alimentary tract and metabolism agent
BC	and pneumatic balloon dilator

BD	and mechanical balloon dilator
BE	and high pressure balloon dilator
BF	and balloon dilator with laser
BH	and contraceptive device
BI	and flexible dilatator with laser
BJ	and flexible dilator
BK	and hydraulic dilator
BL	and hydrostatic balloon dilator
BM	and hyperbaric dilator
BP	and rigid or telescoping sound dilator
BR	and hemodialysis
BS	continuous venovenous hemodialysis
C0	using blood and blood forming agent
C1	using antithrombotic agent
C2	using antihemorrhagic agent
C3	using antianemic agent
C4	using serum lipid reducing agent
C5	using blood related product or agent
C6	using parenteral nutrition solution or agent
C7	using electrolyte balance agent
C8	using osmotic diuresis solution or agent
C9	using biological agent NEC
CA	and extraction device
CB	and magnetic extractor
CC	and incision device
CD	and manual action
CE	and (automated) centrifuge
CF	and mechanical device
CG	and microwave
CH	and needle
CJ	and manual technique
CN	and bronchoscope in situ
D1	using antiinfective irrigating solution
D2	using salt irrigating solution
D3	using other irrigating solution
D4	using dialysate solution for peritoneal dialysis
D5	using additive to IV solution
D6	using hemodialytic and hemofiltrate agent for hemodialysis
D7	using other hematological agent
D8	using synthetic blood substitute
DA	and superficial radiation
DB	and (deep) orthovoltage radiation
DC	and cobalt-60 radiation

DE	and linear accelerator radiation
DF	and electrons
DG	and particulate radiation
DH	and hyperfractionation radiation
DJ	and laser, light NEC
DK	and radiation therapy NEC
DL	and photosensitizer
DM	and ruby laser
DN	and dye/tunable dye laser
DP	and yellow light or copper vapor laser
DQ	and ultraviolet UV light
DR	and ultraviolet UVA light
DS	and green light laser
DT	and non-ultra-violet light
DU	and light NEC
DV	and electrical stimulation device
DW	and neuromotor electrical stimulating device
DX	and inferential stimulating device
DY	and low-intensity laser
DZ	and short wave
E0	using cardiovascular system agent
E1	using cardiac glycoside
E2	using antiarrhythmic agent (class I and III)
E3	using cardiac stimulant
E4	using vasodilator
E5	using other cardiac preparation
E6	using antihypertensive agent
E7	using diuretic agent
E8	using peripheral vasodilator
E9	and vaso-protective agent
EA	and conductive heat source
EB	and interstitial radioactive material
EC	and intracavity radioactive material
ED	and activator device
EE	and functional electrical stimulation [FES]
EF	and anchoring device with abutment
EG	and abutment
EH	and amplification device
EI	and conduction device (implant)
EJ	and anchoring device
EK	and antishock device
EL	and behavioural appliance
EM	and brachytherapy applicator

EP	and bag
EQ	and brace
ER	and detachable balloon
ES	and barrier device
F1	using beta blocking agent
F2	using calcium channel blocker agent
F3	using agent acting on renin-angiotensin system
F4	using serum lipid reducing agent
FA	and encirclage device
FB	other occlusive device
FE	and prosthetic ring/disc
FF	and closure device
FG	and binding device
FH	and bioabsorbable binding device
FJ	and occlusive dressing
FK	and umbrella device
FL	and double sided umbrella device
FN	and wet occlusive device
FP	and extracorporeal blood salvage device
FQ	and cast
FR	resynchronization pacemaker
FS	and cardioverter or defibrillator
FT	and catheter
FU	resynchronization defibrillator
FV	and atherectomy device
FZ	and decompression chamber
G0	using dermatological agent NOS
G1	using antifungal agent
G2	using emollient and protectant agent
G3	using preparation or agent for treatment of wounds and ulcers
G4	using antipruritic agent
G5	using antipsoriatic agent
G6	using dermatological antibiotic and chemotherapeutic agent
G7	using dermatological corticosteroid agent
G8	using antiseptic/disinfectant agent
GB	and complete circulation device
GC	and partial circulation device
GE	and coil
GF	using vascular [nitinol mesh] plug
GH	and electronic cooling device
GJ	and collection appliance/apparatus
GL	and tissue expander with prosthesis
GM	and compresses

GN	and compression/pressure device
GP	and condom catheter system/appliance
GQ	contraceptive device
GR	and internal corrective device
GS	and external corrective device
GW	and descaling device
GX	and device NEC
GY	using multiple devices
H1	using medicated dressing
H2	using anti-acne preparation
H3	using other dermatological preparation
H4	using occlusive agent
HB	and diathermy device
HC	and disk
HD	and drain
HE	and closed drain with underwater seal
HF	and drying device
HG	and cystostomy tube
HJ	and inguinal ejaculation device
HK	and scrotal ejaculation device
HL	and elevation device
I0	using genitourinary or sex hormone agent
I1	using gynecological anti-infective or antiseptic agent
I2	using uterotonic agent
I3	using topical contraceptive agent
I4	using other gynecological agent
I5	using sex hormones and modulators of the genital system
I6	using urological agent
J0	using systemic hormonal agent NOS
J1	using pituitary, hypothalamic hormone or analogue
J2	and systemic corticosteroid
J3	using thyroid therapy
J4	using pancreatic hormones
J5	using calcium homeostasis
JA	externally applied electrodes
JB	Electrode with laser
JE	and electrode converter
JF	and electrode converter with synchronized DC shock
JK	and electronic gaiter
K0	using general anti-infective agent NOS
K1	using tetracycline
K2	using amphenicol
K3	and penicillins and beta lactam antibacterials

K4	using cephalosporin or related substance
K5	using monobactams or carbapenems
K6	using sulfonamide or trimethoprim
K7	and macrolide/lincosamide
K8	and antibacterial agent (e.g. gentamycin beads)
K9	and quinolone antibacterial
KA	and manual filtering device
KB	and automated (electronic) filtering device
KC	and external fixation device
KD	and fixation device NEC
KE	and subperiosteal intraoral framework
KH	and dry heat device
KJ	and moist heat device
KK	and special electrical heat device
KL	and dry cold device
KM	and moist cold device
KN	and wet device
KO	anti-infective agent
KP	and artificial heart
KQ	and paraffin
KR	and hood
KS	and scleral implant
KT	and scleral buckle
L1	and other antibacterial
L2	and systemic antimycotic
L3	and antimycobacterial
L4	and antiviral
L5	and immune sera
L6	and immunoglobulin
L7	and bacterial vaccine
L8	and viral vaccine
L9	and other vaccine
LB	and blade design implant
LC	and cylinder design implant
LD	and screw design implant
LE	and transmandibular plate/ screw design implant [TMI]
LF	and permanent implant NEC
LG	and temporary implant NEC
LH	and ocular implant
LI	and living organism
LJ	and orbital implant
LK	and single channel implant
LL	and multi-channel implant
LM	and folded intraocular posterior chamber implant

LN	and rigid posterior chamber implant
LO	intraocular telescope
LP	and anterior chamber implant
LQ	and intramedullary nail
LR	and other lens
LS	and jet lavage
LT	and keel or plate
LU	and lamp
LV	and ligature
LW	lines, intravenous
LZ	and magnetic device
M0	and antineoplastic/immuno-modulating agent NOS
M1	and alkylating agent
M2	and antimetabolites
M3	and plant alkaloid or other natural product
M4	and cytotoxic antibiotic or related substance
M5	and other antineoplastics
M6	and endocrine therapy
M7	using immunostimulant agent
M8	and immunosuppressive agent
M9	and combination [multiple] antineoplastic or immunomodulating agents
MA	and membrane
MC	and mould
MD	and motion device
MG	and osseodistractor device
MJ	and functional orthotic device
MK	and dynamic (orthotic) device
ML	and hyperextensive orthotic device
MM	and pneumatic orthotic device
MP	and bag
MQ	and (ventilation) mask
MR	and nebulizer (ultrasonic)
MS	and pressure oxygen
MT	and hyperbaric oxygen
MU	and liquid system oxygen
MV	and compressed gas cylinder oxygen
MW	and oxygen concentrator
MX	and catalytic oxygen device
MY	and cytochrome reduction oxygen device
MZ	oxygen device, oxygenator
N0	and musculoskeletal system agent NOS
N1	and anti-inflammatory/antirheumatic agent
N2	and topical joint/muscle pain agent

N3	and muscle relaxant
N4	and anti-gout preparation
N5	and other drug for treatment of bone diseases
N6	and other drug for disorders of the musculoskeletal system
NA	and obturator airway
NB	and nasopharyngeal airway
NC	and negative pressure
ND	and positive pressure
NE	and positive end-expiratory pressure ventilator
NF	and high frequency ventilator
NG	and ventilation tube
NJ	and battery/generator
NK	and double chamber rate-responsive pacemaker
NL	and fixed rate pacemaker
NM	and pacemaker
NN	and temporary pacemaker
NP	and packing
NQ	and protective device
NR	and stent
NS	and multiple stents
NU	and pessary
NV	and pin and/or nail
NW	and plate and/or screw
OA	balloon dilator with (endovascular) stent (insertion)
OB	laser with (endovascular) stent (insertion)
OC	atherectomy device with (endovascular) stent (insertion)
OD	therapeutic ultrasound and balloon dilator
OE	therapeutic ultrasound, balloon dilator and (endovascular stent (insertion)
P0	and nervous system agent NOS
P1	and anesthetic agent
P2	and analgesic agent
P3	and antiepileptic agent
P4	and anti Parkinson agent
P5	and antipsychotic agent
P6	and anxiolytic
P7	and hypnotic/sedative agent
P8	and psycho-analeptic agent
P9	and other nervous system agent
PK	and pneumatic device NEC
PL	and pressure measurement device
PM	and prosthetic device NEC
PN	and dual-component prosthetic device

PP	and tri-component prosthetic device
PQ	reverse dual-component prosthetic device [humeral cup and glenoid head]
PR	and partial component [e.g. tibial liner (insert) alone]
PX	and inflatable hydraulic penile prosthesis
PY	and artificial spermatocele
PZ	and artificial sphincter
Q0	and anti-parasitic agent
Q1	and antiprotozoals
Q2	and anthelmintic
Q3	and ectoparasiticide
Q5	and ophthalmological agent
Q6	and otological agent
Q7	and combined ophthalmological/otological agent
QB	and valved shunt or tube
QD	and prosthetic device with fixative device NEC
QE	and prosthetic device with plate and/or screw
QG	and prosthodontic device
QH	and dual-component prosthetic device with fixative device NEC
QJ	and pump NEC
QK	and infusion pump
QL	and balloon pump
QM	and extracorporeal pump (membrane) oxygenator
QN	and suction pump
QP	and ventricular assist pump
QQ	and external radiotransmitter activator device
QS	and reservoir NEC
R0	and respiratory system agent NOS
R1	and nasal preparation NEC
R2	and throat preparation NEC
R3	and anti-asthmatic
R4	and cough and cold preparation
R5	and antihistamines
R6	and other respiratory systemic agent
RG	and amalgam filling
RO	and crown
RV	and retentive device
RW	crown using acid etched/resin bond colored/plastic (includes composite, veneer)
RX	and filling NEC
S9	and radiopharmaceutical agent
SA	and gutta percha with eugenol [and zinc oxide] sealant
SB	and gutta percha with synthetic resin sealant
SC	and gutta percha with natural resin sealant
SD	and gutta percha with calcium hydroxide sealant

SE	and silver point with eugenol [and zinc oxide] sealant
SF	and ionomer glass with eugenol [and zinc oxide] sealant
SG	and dentin chips with eugenol [and zinc oxide] sealant
SH	and blood clot with eugenol [and zinc oxide] sealant
SJ	and shunt
SL	and spacer device
SN	and space retainers
SQ	and sling
SR	and splinting device
SS	and acid etch joint restoration splint
ST	and acid etch enamel [interproximal] splint
SU	and wire ligation splint
SV	and acrylic- covered wire ligation splint
SW	and dental floss ligation splint
SX	and orthodontic band splint
SY	and cast/soldered acid etch/resin-bonded splint
SZ	and acrylic/composite/amalgam with knurled wire splint
T1	and allergens
T2	and other therapeutic product
T3	and diagnostic agent
T4	and general nutrients
T5	and other non-therapeutic product
T6	and surgical dressing
T7	using synthetic blood substitutes
T9	and pharmacological agent NEC
TA	and traction device
TB	and transosseous [mandibular] staple
TC	and rod with hook
TD	and supportive device
TE	and semipermeable device
TF	and (stryker/foster) frame
TG	and soaking (sitz bath)
TH	and tub or shower
TJ	and manual suction device
TK	and mechanical suction device
TL	and syringe
TP	and tissue expander
TQ	and tank (hubbard)
TR	and whirlpool
TS	and tube NOS
TT	and vacuum device
TW	and vibration device
TX	to floor of mouth using fixation technique

TY	of drainage tube
TZ	and zipper
U1	and red cell concentrate
U2	and plasma
U3	and platelets-apheresis
U4	and platelets
U5	and cryoprecipitate
U6	and leukocytes
U7	and stem cells
U8	and cord blood stem cells
U9	using whole blood
UE	using vibrating device
V0	and air or gas NOS
V1	radioactive pharmaceutical agent
V3	and humidified air
V4	and carbon dioxide
V6	and helium
V7	and nitrogen
V9	nitrogen replacement
VO	gas
W0	and other synthetic
W1	and augmentation agent
W2	and collagen
W3	and fibrin
W4	and glue
W6	and laminaria
W7	using absorbent agent (e.g. charcoal)
W8	and teflon
WJ	wedge resection
X1	and bleaching agent
X2	using cold inducing agent
X3	and drying agent
X4	and dye
X7	and chemocautery agent
X9	and water
XX	DO NOT USE
Z9	and agent NEC

Section 2 Agent or Device

A0	and digestive (gastric, biliary) stimulant
AC	and cold knife
AK	and electric loop
AL	and bioelectrical impedance

B3	mineral supplements
BG	using short rigid scope
BH	using short flexible scope
BJ	and colonoscope
BK	and (double) balloon enteroscope
BL	and gastroscope
CP	and cold pressor
D2	and saline
DU	and infra red impedance
DV	and electrical stimulation device
GX	and device NEC
JA	and electrodes
JB	and ophthalmoscope
JC	and laser scanning ophthalmoscope
JD	and ophthalmoscope and fluorescent dye (by IV)
JE	and laser scanning ophthalmoscope & fluorescent dye (by IV)
JX	and pressure resistance (impedence) measuring device
KE	and rhythm strips (ECG)
KF	and apex cardiogram
KG	and vector loops [vectorcardiogram]
KH	and holter monitor
KJ	and stimulation pacing electrodes
KL	and stimulation pacing and recording electrodes
KM	and cardiac mapping
KP	and tilt table and pharmacological agent
KT	and tilt table
LZ	and magnetic device
P7	and amobarbital
PL	and pressure measuring device
PQ	using applanation indentation tonometer [e.g. Goldman tonometer]
PR	hand-held tonometer (e.g. Schiotz tonometer)
QN	and pump suction
T9	and other pharmacological agent NEC
TS	and catheter
VD	and air/ gas
X4	and dye
XJ	and recording electrodes
Z9	and agent NEC

Section 5 Agent or Device

A2	antacids
A4	and antinauseant
A6	and stool softener

AG	using laser
B1	and diabetes therapy
B2	and vitamin supplement
BD	and balloon catheter
C3	antianemic preparation (e.g. iron, cyanocobalamin, folic acid, erythropoietin)
D2	and salt solution
E1	and cardiac glycoside
E2	and cardiac antiarrhythmic
E6	and antihypertensive agent
F1	and beta blocker
F2	and calcium channel blocker
FN	and moist dressing
FR	and intermittent auscultation
FT	and intermittent electronic monitoring
FW	and continuous electronic monitoring
FX	and fetal scalp electrode
G2	and emollient
I2	and uterotonic agent
I4	and labour suppressant
I5	sex hormone and regulator
J1	and hormone for suppression of labour
J2	and corticosteroid
J3	and thyroid therapy
K0	and anti infective
L4	and antiviral agent
M2	and antimetabolite
P1	and general anesthetic
P2	and analgesic
P3	and anticonvulsant
P6	and tranquilizer
P7	and sedative
T9	and other pharmaceutical agent NEC
U1	using red cell concentrate
U4	using platelets
U7	and stem cells
U9	and whole blood
W6	and laminaria
X9	and sterile water
Z9	and chemical agent NEC

Section 6 Method or Tool

AA	by active listening
AR	interactive
BA	by Adlerian

BE	by behavioral
BL	by art expression
BM	by keeping a journal expression
BN	by meditation expression
CA	by animal- assisted
CC	by symbol comprehension
CE	by cognitive- behavioral
CF	by discourse comprehension
CG	by lexicon comprehension
CH	by morphology comprehension
CJ	by phonetics comprehension
CK	by phonology comprehension
CL	by pragmatics comprehension
CM	by semantics comprehension
CN	by syntax comprehension
CP	by punctuation comprehension
CQ	by written narrative comprehension
CZ	by comprehension technique NEC
DA	by aroma
DE	by developmental
EA	by contingency management
EC	by symbol expression
EF	by discourse expression
EG	by lexicon expression
EH	by morphology expression
EJ	by phonetics expression
EK	by phonology expression
EL	by pragmatics expression
EM	by semantics expression
EN	by syntax expression
EP	by punctuation expression
EQ	by written narrative expression
EZ	by expression technique NEC
FA	by creative movement (e.g. dance)
GA	by drama
HA	by desensitization
JA	by dynamic
KA	by existential
LA	by free association
MA	by Gestalt
NA	by hypnosis
PA	by light

QA	by logotherapy
RA	by music
RE	by rational emotive
SA	by play
SC	by specific sound patterns
SD	by sound segmental awareness (syllables)
SE	by sound sequence
SF	by sound rate (onset duration)
SG	by rhythm
SZ	by sound technique NEC
TA	by process- experiential
UA	by response prevention
VA	by sensitization
WA	by stimulus control
XA	by strategic
YA	by transactional
ZA	by transference
ZZ	by other NEC (technique)

Section 8 Agent

BA	of live (attenuated) virus
BB	of whole virus
BC	of inactivated virus
BD	of inactivated viral antigen
BE	of inactivated virus and toxoid(s)
BF	of live (attenuated) bacteria
BG	of inactivated (whole) bacteria
BH	of inactivated split bacteria
BI	of venom
BJ	of viral DNA
BK	of toxoid
BL	of toxoid and split bacteria
BM	of toxoids and inactivated bacteria
BN	of toxoids, inactivated (whole) bacteria and bacterial polysaccharide
BO	of toxoids, inactivated split bacteria and bacterial polysaccharide
BP	of bacterial polysaccharide conjugated to protein
BQ	of bacterial polysaccharides of various types
BR	of toxoid, inactivated split bacteria and inactivated virus
BS	of toxoids, inactivated bacteria, bacterial polysaccharide & inactivated virus
BT	of toxoid, inactivated (whole) bacteria, bacterial polysaccharide, inactivated viral antigen
BU	of capsular polysaccharide
BV	of bacterial polysaccharide and inactivated viral antigen

BW	of (passive) immunoglobulin
BX	of (passive) antitoxin
BY	of live diluted (super attenuated) virus
BZ	of (passive) antivenin
CA	of chimeric live (attenuated) virus
CB	of recombinant DNA
CC	of monoclonal antibodies
CD	of chimeric live antigen
PE	of plant extract
ZZ	of agent or substance NEC

Qualifier 3

Section 1 Tissue

A	autograft
B	split thickness (skin) autograft
D	composite graft - xenograft with synthetic tissue
E	local flap
F	free flap
G	pedicled flap
H	split homograft
I	related donor homograft
J	living donor homograft
K	homograft
L	xenograft
M	homograft, purged
N	synthetic material
P	cultured tissue
Q	combined sources of tissue
R	fenestrated graft

Section 8 Type, Group, Strain

1	type, group or strain 1
2	type, group or strain 2
3	type, group or strain 3
4	type, group or strain 4
5	type groupe or strain 5
7	type, group or strain 7
A	type, group or strain A
B	type, group or strain B
C	type, group or strain C
E	type, group or strain E

J	combination of two groups or strains (bivalent)
K	combination of three groups or strains
L	combination of four group or strains
N	conjugates
P	type Pneumoniae

Appendix B - Rubric Finder

Section 1 Rubric Finder

(A) Brain and Spinal Cord

AA - Meninges and dura mater of brain	AB - Subarachnoid
AC - Ventricles of brain	AE - Thalamus and basal ganglia
AF - Pituitary region	AG - Pineal gland
AJ - Cerebellum	AK - Cerebellopontine angle
AN - Brain	AP - Brain stem
AW - Spinal cord	AX - Spinal canal and meninges
AZ - Central nervous system

(B) Nerves

BA - Cranial nerves	BB - Other nerves of head and neck
BD - Nerve(s) of the ear	BF - Sympathetic nerves
BG - Brachial plexus	BJ - Phrenic nerve
BK - Vagus nerve	BM - Nerve(s) of upper arm and elbow
BN - Nerve(s) of forearm and wrist	BP - Nerve(s) of hand
BQ - Nerve(s) of digit of hand	BR - Nerves of arm
BS - Nerve(s) of pelvis, hip and thigh (and lower trunk)	BT - Nerve(s) of lower leg
BX - Peripheral nerves NEC	BZ - Nervous system

Section 3 Rubric Finder

(A) Brain and Spinal Cord

AF - Pituitary region	AN - Brain
AW - Spinal cord	

-	-	AF	AN	AW
Computerized Tomography	(20)	3AF20	3AN20	-
Diagnostic Nuclear Imaging	(70)	-	3AN70	3AW70
Fluoroscopy	(12)	-	3AN12	3AW12
Intervention NEC	(94)	-	3AN94	3AW94
Magnetic Resonance Imaging	(40)	3AF40	3AN40	-
Tomography	(18)	3AF18	-	-
Ultrasound	(30)	-	3AN30	3AW30
Xray	(10)	3AF10	3AN10	3AW10

(C) Eye and Ocular Adnexa

CA - Orbit of eye	CU - Lacrimal excretory system
CZ - Eye NEC	

-	-	CA	CU	CZ
Computerized Tomography	(20)	3CA20	-	-
Diagnostic Nuclear Imaging	(70)	-	3CU70	-
Fluoroscopy	(12)	3CA12	3CU12	-
Intervention NEC	(94)	-	-	3CZ94
Magnetic Resonance Imaging	(40)	3CA40	-	-
Tomography	(18)	3CA18	-	-
Ultrasound	(30)	3CA30	-	-
Xray	(10)	3CA10	3CU10	-

(D) Ear and Mastoid (Process)

DL - Mastoid (process)	DR - Inner ear NEC
DZ - Ear NEC	

-	-	DL	DR	DZ
Computerized Tomography	(20)	-	3DR20	-
Diagnostic Nuclear Imaging	(70)	-	-	-
Fluoroscopy	(12)	3DL12	3DR12	-
Intervention NEC	(94)	-	-	3DZ94
Magnetic Resonance Imaging	(40)	3DL40	3DR40	-
Tomography	(18)	3DL18	-	-
Ultrasound	(30)	-	-	-
Xray	(10)	3DL10	3DR10	-

(E) Musculoskeletal Tissue of the Head, Nasal Cavity and Sinuses

EA - Cranium	EB - Zygoma
ED - Maxilla	EE - Mandible
EF - Maxilla with mandible	EI - Facial Bone Structure

EL - Joint, temporomandibular [TMJ]	EQ - Soft tissue of head and neck
ER - Head NEC	ET - Nose
EY - Paranasal sinuses	

-	-	EA	EB	ED	EE	EF	EI	EL	EQ	ER	ET	EY
Computerized Tomography	(20)	3EA20	-	-	-	-	-	3EL20	-	3ER20	-	3EY20
Diagnostic Nuclear Imaging	(70)	-	-	-	-	-	-	-	-	-	-	-
Fluoroscopy	(12)	3EA12	-	3ED12	3EE12	-	-	3EL12	3EQ12	-	3ET12	3EY12
Intervention NEC	(94)	3EA94	-	3ED94	3EE94	-	-	3EL94	3EQ94	-	-	3EY94
Magnetic Resonance Imaging	(40)	-	-	-	-	-	-	3EL40	-	3ER40	-	-
Tomography	(18)	3EA18	-	-	-	-	-	3EL18	-	-	-	-
Ultrasound	(30)	-	-	-	-	-	-	-	3EQ30	3ER30	-	-
Xray	(10)	3EA10	3EB10	3ED10	3EE10	3EF10	3EI10	3EL10	3EQ10	-	3ET10	3EY10

(F) Oral Cavity and Pharynx

FE - Tooth	FK - Mouth
FP - Salivary glands and ducts NEC	FU - Thyroid gland
FV - Parathyroid gland	FX - Oropharynx
FY - Soft Tissue of Neck	

-	-	FE	FK	FP	FU	FV	FX	FY
Computerized Tomography	(20)	-	-	-	-	-	3FX20	3FY20
Diagnostic Nuclear Imaging	(70)	-	-	3FP70	3FU70	3FV70	-	-
Fluoroscopy	(12)	-	-	3FP12	-	-	3FX12	-
Intervention NEC	(94)	-	3FK94	-	-	-	-	-
Magnetic Resonance Imaging	(40)	-	-	-	-	-	-	3FY40
Tomography	(18)	-	-	-	-	-	-	-
Ultrasound	(30)	-	-	-	3FU30	-	-	3FY30
Xray	(10)	3FE10	-	3FP10	-	-	3FX10	-

(G) Respiratory System

GE - Larynx NEC	GT - Lung NEC
GY - Thoracic cavity NEC	

-	-	GE	GT	GY
Computerized Tomography	(20)	3GE20	3GT20	3GY20
Diagnostic Nuclear Imaging	(70)	-	3GT70	-
Fluoroscopy	(12)	3GE12	3GT12	3GY12
Intervention NEC	(94)	3GE94	-	3GY94
Magnetic Resonance Imaging	(40)	-	-	3GY40
Tomography	(18)	-	-	3GY18
Ultrasound	(30)	-	-	3GY30
Xray	(10)	3GE10	3GT10	3GY10

(H) Heart and Related Structures

HZ - Heart NEC

-	-	HZ
Computerized Tomography	(20)	-
Diagnostic Nuclear Imaging	(70)	-
Fluoroscopy	(12)	3HZ12
Intervention NEC	(94)	-
Magnetic Resonance Imaging	(40)	-
Tomography	(18)	-
Ultrasound	(30)	3HZ30
Xray	(10)	-

(I) Great Vessels

ID - Aorta NEC	IJ - Coronary arteries
IK - Coronary veins	IM - Pulmonary artery
IN - Pulmonary vein	IP - Heart with coronary arteries
IS - Vena cava (superior and inferior)	

-	-	ID	IJ	IK	IM	IN	IP	IS
Computerized Tomography	(20)	3ID20	-	-	-	-	3IP20	-
Diagnostic Nuclear Imaging	(70)	-	-	-	-	-	3IP70	-
Fluoroscopy	(12)	3ID12	3IJ12	-	3IM12	3IN12	-	3IS12
Intervention NEC	(94)	-	3IJ94	-	-	-	-	-
Magnetic Resonance Imaging	(40)	3ID40	-	-	-	-	3IP40	-
Tomography	(18)	-	-	-	-	-	-	-
Ultrasound	(30)	3ID30	3IJ30	-	-	-	3IP30	-
Xray	(10)	3ID10	-	3IK10	3IM10	3IN10	3IP10	3IS10

(J) Upper Vessels

JE - Carotid artery	JL - Internal mammary artery
JM - Arteries of arm NEC	JQ - Jugular veins
JS - Ophthalmic vessels	JU - Veins of arm NEC
JW - Intracranial vessels	JX - Other vessels of head, neck and spine NEC
JY - Thoracic vessels NEC	

-	-	JE	JL	JM	JQ	JS	JU	JW	JX	JY
Computerized Tomography	(20)	3JE20	-	3JM20	-	-	-	-	3JX20	3JY20
Diagnostic Nuclear Imaging	(70)	-	-	-	-	-	-	-	-	-
Fluoroscopy	(12)	3JE12	3JL12	3JM12	3JQ12	3JS12	3JU12	3JW12	3JX12	3JY12
Intervention NEC	(94)	-	-	-	-	-	-	-	-	-
Magnetic Resonance Imaging	(40)	3JE40	-	3JM40	-	-	-	-	3JX40	3JY40
Tomography	(18)	-	-	-	-	-	-	-	-	-
Ultrasound	(30)	3JE30	-	3JM30	3JQ30	3JS30	3JU30	3JW30	3JX30	3JY30
Xray	(10)	3JE10	3JL10	3JM10	3JQ10	3JS10	3JU10	3JW10	3JX10	3JY10

(K) Lower Body Vessels

KC - Renal arteries	KE - Abdominal arteries NEC
KG - Arteries of leg NEC	KK - Hepatic vein
KL - Portal vein	KQ - Abdominal veins NEC
KR - Veins of leg NEC	KT - Vessels of the pelvis, perineum and gluteal region

KU - Penile vessels	KV - Artery NEC
KX - Vein NEC	KY - Artery with vein
KZ - Blood vessels NEC	

-	-	KC	KE	KG	KK	KL	KQ	KR	KT	KU	KV	KX	KY	KZ
Computerized Tomography	(20)	-	3KE20	3KG20	-	-	-	-	3KT20	-	-	-	-	-
Diagnostic Nuclear Imaging	(70)	-	-	-	-	-	-	3KR70	-	-	-	-	-	3KZ70
Fluoroscopy	(12)	3KC12	3KE12	3KG12	3KK12	3KL12	3KQ12	3KR12	3KT12	-	3KV12	3KX12	3KY12	-
Intervention NEC	(94)	-	-	-	-	-	-	-	-	-	-	-	-	-
Magnetic Resonance Imaging	(40)	-	3KE40	3KG40	-	-	-	3KR40	3KT40	-	3KV40	3KX40	-	-
Tomography	(18)	-	-	-	-	-	-	-	-	-	-	-	-	-
Ultrasound	(30)	-	3KE30	3KG30	-	-	3KQ30	3KR30	3KT30	3KU30	3KV30	3KX30	3KY30	-
Xray	(10)	3KC10	3KE10	3KG10	3KK10	3KL10	3KQ10	3KR10	3KT10	-	3KV10	3KX10	3KY10	-

(L) Combined Sites for Congenital Heart Anomalies and Circulatory System NEC**LZ - Circulatory system NEC**

-	-	LZ
Computerized Tomography	(20)	-
Diagnostic Nuclear Imaging	(70)	3LZ70
Fluoroscopy	(12)	-
Intervention NEC	(94)	-
Magnetic Resonance Imaging	(40)	3LZ40
Tomography	(18)	-
Ultrasound	(30)	-
Xray	(10)	-

(M) Lymphatic System

ML - Lymphatic vessels head and neck region	MN - Lymphatic vessels thoracic region
MP - Lymphatic vessels of abdomen/pelvis	MR - Lymphatic vessels of arm
MS - Lymphatic vessels of leg	MZ - Lymphatic system NEC

-	-	ML	MN	MP	MR	MS	MZ
Computerized Tomography	(20)	-	-	-	-	-	-
Diagnostic Nuclear Imaging	(70)	-	-	-	-	-	3MZ70
Fluoroscopy	(12)	-	-	-	-	-	-
Intervention NEC	(94)	-	-	-	-	-	3MZ94
Magnetic Resonance Imaging	(40)	-	-	-	-	-	-
Tomography	(18)	-	-	-	-	-	-
Ultrasound	(30)	-	-	-	-	-	-
Xray	(10)	3ML10	3MN10	3MP10	3MR10	3MS10	3MZ10

(N) Digestive System

NA - Esophagus	NK - Small intestine
NL - Upper gastrointestinal tract	NM - Large intestine
NQ - Rectum	NZ - Gastrointestinal tract NOS

-	-	NA	NK	NL	NM	NQ	NZ
Computerized Tomography	(20)	-	3NK20	-	3NM20	-	-
Diagnostic Nuclear Imaging	(70)	-	-	-	-	-	3NZ70
Fluoroscopy	(12)	3NA12	-	-	-	-	-
Intervention NEC	(94)	-	-	-	-	-	-
Magnetic Resonance Imaging	(40)	-	-	-	-	-	-
Tomography	(18)	-	-	-	-	-	-
Ultrasound	(30)	-	-	-	-	-	-
Xray	(10)	3NA10	3NK10	3NL10	3NM10	3NQ10	3NZ10

(O) Hepatobiliary Tract

OA - Liver	OB - Spleen
OC - Liver with spleen	OD - Gallbladder
OE - Bile ducts	OG - Biliary ducts with pancreas
OJ - Pancreas	OT - Abdominal cavity
OZ - Digestive system NEC

Xray	(10)	3OA10	-	-	-	3OE10	3OG10	3OJ10	3OT10	-

(P) Urinary System

PB - Adrenal gland	PC - Kidney
PH - Kidney with ureter	PM - Bladder
PQ - Urethra	PS - Kidney with ureter with bladder
PZ - Urinary system NEC	

-	-	PB	PC	PH	PM	PQ	PS	PZ
Computerized Tomography	(20)	-	3PC20	-	-	-	-	3PZ20
Diagnostic Nuclear Imaging	(70)	3PB70	3PC70	-	-	-	-	3PZ70
Fluoroscopy	(12)	-	3PC12	3PH12	3PM12	-	-	3PZ12
Intervention NEC	(94)	-	-	-	-	-	-	3PZ94
Magnetic Resonance Imaging	(40)	-	3PC40	-	-	-	-	-
Tomography	(18)	-	3PC18	-	-	-	-	3PZ18
Ultrasound	(30)	-	3PC30	-	3PM30	-	-	-
Xray	(10)	-	3PC10	3PH10	3PM10	3PQ10	3PS10	3PZ10

(Q) Male Genital Organs

QE - Penis	QG - Scrotum
QN - Vas deferens	QT - Prostate
QZ - Male genital tract NEC	

-	-	QE	QG	QN	QT	QZ
Computerized Tomography	(20)	-	-	-	3QT20	-
Diagnostic Nuclear Imaging	(70)	-	3QG70	-	-	-
Fluoroscopy	(12)	3QE12	-	-	-	3QZ12
Intervention NEC	(94)	-	-	-	-	3QZ94
Magnetic Resonance Imaging	(40)	-	3QG40	-	3QT40	-
Tomography	(18)	-	-	-	-	-
Ultrasound	(30)	-	3QG30	-	3QT30	3QZ30
Xray	(10)	3QE10	-	3QN10	-	3QZ10

(R) Female Genital Tract

RF - Fallopian tube	RK - Uterus with Fallopian Tube
RM - Uterus and surrounding structures	RS - Vagina
RY - Perineum	RZ - Female genital tract NEC

-	-	RF	RK	RM	RS	RY	RZ
Computerized Tomography	(20)	-	-	-	-	-	-
Diagnostic Nuclear Imaging	(70)	-	-	3RM70	-	-	-
Fluoroscopy	(12)	-	-	-	-	-	3RZ12
Intervention NEC	(94)	-	-	-	-	-	3RZ94
Magnetic Resonance Imaging	(40)	-	-	-	-	-	-
Tomography	(18)	-	-	-	-	-	-
Ultrasound	(30)	-	-	-	-	-	3RZ30
Xray	(10)	3RF10	3RK10	-	3RS10	3RY10	-

(S) Musculoskeletal System: Spine, Trunk and Pelvis

SC - Spinal vertebrae	SE - Intervertebral Disc
SF - Sacrum and coccyx	SH - Soft tissue of the back
SK - Sternum	SL - Ribs
SM - Clavicle	SN - Scapula
SQ - Pelvis	

-	-	SC	SE	SF	SH	SK	SL	SM	SN	SQ
Computerized Tomography	(20)	3SC20	-	3SF20	-	-	-	-	-	-
Diagnostic Nuclear Imaging	(70)	3SC70	-	-	-	-	-	-	-	-
Fluoroscopy	(12)	3SC12	3SE12	3SF12	-	3SK12	3SL12	3SM12	3SN12	3SQ12
Intervention NEC	(94)	-	-	-	-	-	-	-	-	-
Magnetic Resonance Imaging	(40)	3SC40	-	3SF40	-	-	-	-	-	-
Tomography	(18)	3SC18	-	3SF18	-	-	-	-	-	3SQ18
Ultrasound	(30)	-	-	-	3SH30	-	-	-	-	-
Xray	(10)	3SC10	3SE10	3SF10	-	3SK10	3SL10	3SM10	3SN10	3SQ10

(T) Shoulder and Arm (excluding hand and wrist)

TA - Shoulder joint	TB - Acromioclavicular and sternoclavicular joints
TK - Humerus	TM - Elbow joint
TV - Radius and ulna	TZ - Arm NEC

-	-	TA	TB	TK	TM	TV	TZ
Computerized Tomography	(20)	-	-	-	-	-	3TZ20
Diagnostic Nuclear Imaging	(70)	3TA70	-	-	3TM70	-	-
Fluoroscopy	(12)	3TA12	3TB12	3TK12	3TM12	3TV12	3TZ12
Intervention NEC	(94)	-	-	-	-	-	3TZ94
Magnetic Resonance Imaging	(40)	-	-	-	-	-	3TZ40
Tomography	(18)	-	-	-	-	-	3TZ18
Ultrasound	(30)	3TA30	-	-	3TM30	-	3TZ30
Xray	(10)	3TA10	3TB10	3TK10	3TM10	3TV10	3TZ10

(U) Hand and Wrist

UB - Wrist joint	UL - Joints of finger and hand
UZ - Hand with wrist	

-	-	UB	UL	UZ
Computerized Tomography	(20)	-	-	-
Diagnostic Nuclear Imaging	(70)	-	-	-
Fluoroscopy	(12)	3UB12	-	3UZ12

-	-	UB	UL	UZ
Intervention NEC	(94)	-	-	3UZ94
Magnetic Resonance Imaging	(40)	-	-	-
Tomography	(18)	-	-	-
Ultrasound	(30)	-	-	-
Xray	(10)	3UB10	3UL10	3UZ10

(V) Hip and Leg

VA - Hip joint	VC - Femur
VG - Knee joint	VQ - Tibia and fibula
VZ - Leg NEC	

-	-	VA	VC	VG	VQ	VZ
Computerized Tomography	(20)	-	-	-	-	3VZ20
Diagnostic Nuclear Imaging	(70)	3VA70	-	3VG70	-	-
Fluoroscopy	(12)	3VA12	3VC12	3VG12	3VQ12	3VZ12
Intervention NEC	(94)	3VA94	3VC94	3VG94	3VQ94	3VZ94
Magnetic Resonance Imaging	(40)	-	-	-	-	3VZ40
Tomography	(18)	-	-	-	-	3VZ18
Ultrasound	(30)	3VA30	-	3VG30	-	3VZ30
Xray	(10)	3VA10	3VC10	3VG10	3VQ10	3VZ10

(W) Ankle and Foot

WA - Ankle joint	WG - Foot
WY - Bone marrow	WZ - Musculoskeletal system NEC

-	-	WA	WG	WY	WZ
Computerized Tomography	(20)	-	-	-	3WZ20
Diagnostic Nuclear Imaging	(70)	-	-	3WY70	3WZ70
Fluoroscopy	(12)	3WA12	3WG12	-	-
Intervention NEC	(94)	-	3WG94	-	-
Magnetic Resonance Imaging	(40)	-	-	3WY40	3WZ40

-	-	WA	WG	WY	WZ
Tomography	(18)	-	-	-	-
Ultrasound	(30)	-	-	-	-
Xray	(10)	3WA10	3WG10	-	3WZ10

(Y) Skin and Subcutaneous Tissue and Breast

YL - Lactiferous duct	YM - Breast
YN - Surgically removed breast	YZ - Skin NEC

-	-	YL	YM	YN	YZ
Computerized Tomography	(20)	-	3YM20	-	-
Diagnostic Nuclear Imaging	(70)	-	3YM70	-	-
Fluoroscopy	(12)	-	3YM12	3YN12	-
Intervention NEC	(94)	-	3YM94	-	3YZ94
Magnetic Resonance Imaging	(40)	-	3YM40	-	-
Tomography	(18)	-	-	-	-
Ultrasound	(30)	-	3YM30	3YN30	-
Xray	(10)	3YL10	3YM10	3YN10	-

(Z) Total Body

ZA - Surgical specimen NEC	ZZ - Total body
-----------------------------------	------------------------

-	-	ZA	ZZ
Computerized Tomography	(20)	-	3ZZ20
Diagnostic Nuclear Imaging	(70)	-	3ZZ70
Fluoroscopy	(12)	3ZA12	-
Intervention NEC	(94)	-	-
Magnetic Resonance Imaging	(40)	-	3ZZ40
Tomography	(18)	-	-
Ultrasound	(30)	-	-
Xray	(10)	3ZA10	3ZZ10

Appendix C - CCI Attributes

Although the CCI code is sufficiently detailed to provide a comprehensive view of the type of health care intervention and how it was performed, there are classification users who require even more detail to support their analytical, utilization and research demands. It is for this group that CIHI has designed a series of three separate fields of CCI intervention attributes: status, location and extent. These entities are designed to allow users to identify additional circumstances or conditions which may impact on the resources required to perform the intervention or the outcome expected. In most cases the use of these attribute fields is optional. Users are recommended to decide if they will use any or all of the attributes so that within their data collection practices, information retrieval (and subsequent analysis) will be standardized.

There are a few occasions when our national grouping methodology requires the mandatory collection of an attribute (for instance, bilateral hip replacement). At the codes where an attribute is mandatory, the "button" will be coloured pink and an edit requirement (for the submission of data) will be operational.

Below you will find the list of valid attributes and their generic descriptions. Only when applicable are they indicated at the code level. (For standards concerning the correct selection of these attributes, see CCI Coding Standards).

Status	(Generic Descriptions)
0	Not applicable
A	Abandoned after onset
B	Incidental
C	Converted (from endoscopic to open)
CR	Crisis
D	Delayed (closure >24 hrs post trauma)
D1	Other PCI for STEMI
DP	Delayed primary (repair occurring 2 to 14 days post trauma)
DS	Delayed secondary (repair occurring > 14 days post trauma)
DX	Diagnostic
E	Extended
FU	Follow up
I	Intra-operative
IN	Primary induction
IO	Other induction
IP	Consolidation
J	Primary palliative
K	Primary curative
L	Metastatic palliative
M	Metastatic curative

Status	(Generic Descriptions)
M1	Related – Matched (HLA)
M2	Related – Mismatched
M3	Unrelated – Matched (HLA)
M4	Unrelated – Mismatched
N	Initial
N1	Repeat (assessment)
N2	Elective primary c/s with indications
N3	Elective primary c/s without indications -e.g. mother's request
N4	Elective repeat c/s
N5	Emergency primary c/s
N6	Emergency repeat c/s
OP	Other PCI
P	Routine
P1	Pre (operative, treatment)
PA	Primary, Indicated, Planned
PB	Primary, Indicated, Emergent
PC	Primary, Not indicated, Planned
PM	Permanent
Q	Ambulatory
R	Revision
R1	Revision of previous angioplasty
R2	Revision of previous stent site
R3	Primary and revision of previous angioplasty site
R4	Primary and revision of previous stent site
RA	Repeat, Indicated, Planned
RB	Repeat, Indicated, Emergent
RC	Repeat, Not indicated, Planned
RI	Repeat induction
RL	Relapse
RS	Respite

Status	(Generic Descriptions)
S	Staged
S1	Stage one
S2	Stage two
TL	Long term
TM	Temporary
TS	Short term
U	Initial consultation
UN	Unknown
UR	Urgent
V	Repeat consultation
V1	Ventilation at time of death or ended less than 3 hours before time of death
V2	Ventilation ended equal to or greater than 3 hours to less than 6 hours before time of death
V3	Ventilation ended equal to or greater than 6 hours to less than 24 hours before time of death
V9	Ventilation ended equal to or greater than 24 hours before time of death
W	Active
X	Passive
Y	Syngeneic (or identical twin)
Z	Other NEC

Location	(Generic Descriptions)
0	null
1	One vessel
2	Two vessels
AB	Abdominal aorta
AD	Above
AN	Anterior
AP	Intra-atrial
AR	Arch of aorta
AS	Ascending aorta

Location	(Generic Descriptions)
AT	Aberrant tissue
AV	Intra-atrial and intra-ventricular
AX	Apex
AZ	Aorta
B	Bilateral
B1	Bilateral first
BB	Bilateral deep
BC	Ramus
BD	Body
BE	Symphysis
BG	Broad
BH	Bundle of His
BL	Bilateral legs (both)
BP	Bulbous
BQ	Bilateral distal
BS	Bilateral superficial
BU	Bilateral arms (both)
BV	Bilateral proximal
BW	Below
CB	Combined
CD	Cardinal
CI	Clitoris
CO	Cortical
CR	Craniopagus
CT	Cervicothoracic
CX	Cervical
D	Duodenum
DI	Direct
DM	Dome
DR	Dorsal
EM	Embryo

Location	(Generic Descriptions)
EN	Endometrium
F	Frontal
FE	Femoral
FT	Foot
FY	Femoral artery
GA	Gamete
GL	Glans penis
GV	Greater vestibular glands
HB	Hemibody
HD	Hand
HP	Ischiopagus
HY	Hymen
I	Ileum
IA	Intra-abdominal
IF	Inferior
IN	Indirect
IR	Infrarenal/NOS
IT	Introitus
J	Jejunum
JU	Jugular
L	Left
L1	Left first
L2	Left second
LA	Left arm
LB	Lumbar
LC	Left deep
LD	Left distal
LE	Left epiphysis
LF	Left superficial
LG	Major
LH	Left lower

Location	(Generic Descriptions)
LL	Left leg
LM	Minor
LP	Left proximal
LS	Lumbosacral
LT	Lateral
LU	Left upper
LW	Lower
LY	Left arm artery
M	Multiple
MB	Membraneous
MD	Multiple quadrants, primary (deciduous) dentition
ML	Multiple segments, left lung
MM	Multiple quadrants, mixed (permanent and primary) dentition
MR	Multiple segments, right lung
MT	Multiple quadrants, permanent dentition
MX	Mixed dentition (permanent and primary)
N	Main
O	Occipital
P	Parietal
PA	Anterior and posterior
PC	Prostatic
PD	Pelvic cavity (genitourinary tract, retroperitoneum)
PE	Penile
PI	Peripheral via veins of the antecubital fossa
PJ	Pararenal/Juxtarenal
PK	Subcutaneous pocket
PL	Peripheral
PR	Primary dentition
PS	Posterior
PT	Permanent dentition

Location	(Generic Descriptions)
PV	Perivascular region
PY	Pygopagus
R	Right
R1	Right first
R2	Right second
RA	Right arm
RC	Right epiphysis
RD	Right distal
RE	Right extended
RH	Right lower
RL	Right leg
RM	Right middle
RO	Round
RP	Right proximal
RS	Right superficial
RT	Retromolar
RU	Right upper
RY	Right arm artery
S	Single
SA	Suprarenal
SC	Subclavian
SD	Single quadrant, deciduous [primary] teeth
SE	Superior
SG	Sigmoid
SK	Skin
SL	Sacral
SM	Single quadrant mixed dentition
SP	Spinal
SR	External stoma of respiratory system
SS	External stoma of digestive system

Location	(Generic Descriptions)
ST	Single quadrant permanent dentition
SU	External stoma of urinary system
SZ	Other external stoma
T	Temporal
T1	Trimester one (< 14 weeks)
T2	Trimester two (14 to 26 weeks)
T3	Trimester three (> 26 weeks)
TC	Transverse
TH	Thoracic
TL	Thoracolumbar
TP	Thoracopagus
TR	Trigone
U	Unspecified
UL	Uterine ligament(s)
UM	Umbilical
UN	Unknown
UO	Ureteric orifice
UP	Upper
UR	Urachnus
UT	Uterosacral
V3	Third ventricle
V4	Fourth ventricle
VE	Ventral
VF	Intra-ventricular
XP	Xiphopagus
Z	Other NEC
ZU	Other or unspecified
ZY	Zygote
Mode of Delivery	
0	Not applicable
B	Bilateral (both) with direct delivery (by health care provider to client)

Location	(Generic Descriptions)
DI	Direct
IB	Bilateral (both) with indirect delivery (from a distance to client)
IL	Left with indirect delivery (from a distance to client)
IN	Indirect
IR	Right with indirect delivery (from a distance to client)
IS	Unilateral (unspecified if right or left) with indirect delivery (from a distance to client)
L	Left with direct delivery (by health care provider to client)
MO	Mobile
R	Right with direct delivery (by health care provider to client)
S	Unilateral (unspecified if left or right) with direct delivery (by health care provider to client)
SD	Self directed
U	Unknown
ZU	Third party

Extent	(Generic Descriptions)
0	null
01	01
02	02
03	03
04	04
05	05
06	06
07	07
08	08
09	09
1	One
10	Ten
11	Eleven
12	Twelve
13	Thirteen

Extent	(Generic Descriptions)
14	Fourteen
15	Fifteen
16	Sixteen
17	Seventeen
18	Eighteen
19	Nineteen
1A	Unicompartmental, medial: unicondylar
1B	Unicompartmental, lateral: unicondylar
1C	Unicompartmental, unspecified if medial or lateral: unicondylar
2	Two
20	Twenty
21	Twenty one
22	Twenty two
23	Twenty three
24	Twenty Four
25	Twenty five
26	Twenty six
27	Twenty seven
28	Twenty eight
29	Twenty nine
2A	Bicompartmental, medial with lateral: bicondylar
2B	Bicompartmental, medial with patellofemoral: bicondylar
2C	Bicompartmental, lateral with patellofemoral: bicondylar
2D	Bicompartmental, unspecified
3	Three
30	Thirty
31	Thirty one
32	Thirty two
33	Thirty three
34	Thirty four

Extent	(Generic Descriptions)
3D	Three dimensional (3D)
4	Four
5	Five
6	Six
7	Seven
8	Eight
9	Nine
A	Two or less
A1	Adult dose (schedule) 1
A2	Adult dose (schedule) 2
A3	Adult dose (schedule) 3
AR	Arc rotation
AT	One lead into atrium
AV	One lead into atrium and one lead into ventricle
B	Three to four
BX	Booster dose
C	Five to six
CE	Complex extended SSD
CM	Comprehensive
CN	Continuous
CS	Cement spacer
D	Greater than six
DA	Bypass graft with any native artery vessel
DB	Bypass graft alone
DC	Left main artery with LAD and/or Cx and/or RCA
DD	Left main artery alone
DE	3 vessels
DF	2 vessels
DG	1 vessel
E	Between five to 10 centimetres
ED	All remaining

Extent	(Generic Descriptions)
EM	Endoscopic mucosal resection (EMR)
EP	Intermittent (episodic)
ES	Endoscopic submucosal dissection (ESD)
EX	Extended
F	More than three
F1	One to eight
FD	First dose
FH	Modular ball (with or without modular neck) with stem remaining in situ
G	More than ten
GR	Group of clients with one health care provider
GS	Group of clients with multiple health care providers
H	More than 20
IM	Individual client with multiple health care providers
IN	Individual client with one health care provider (one on one)
L	Less than five centimetres
LG	Large
LT	Limited
LU	Lumpectomy
M	Multiple
M1	Modular (two or more interlocking pieces) stem with exchangeable ball, unipolar femoral component
M2	Modular (two or more interlocking pieces) stem with exchangeable ball, bipolar femoral component
MB	Individual client with multiple health care providers, brief session
MD	Modular (two or more interlocking pieces) stem with exchangeable ball
MG	Group of clients with multiple health care providers
MI	Individual client with multiple health care providers, intermediate session
MO	Monoblock (all one piece) ball and stem
MU	Modular (two or more interlocking pieces) stem with exchangeable ball, unspecified if unipolar or bipolar

Extent	(Generic Descriptions)
MX	Individual client with multiple health care providers, extensive session
NB	Individual client with one health care provider, brief session
NI	Individual client with one health care provider, intermediate session
NP	Subcutaneous resection - Nipple sparing
NX	Individual client with one health care provider, extensive session
P	Partial
P1	Pediatric dose (schedule) 1
P2	Pediatric dose (schedule) 2
P3	Pediatric dose (schedule) 3
P4	Pediatric dose (schedule) 4
PA	Polypectomy, polyp greater than or equal to 2 cm
PE	Polypectomy, polyp less than or equal to 5 mm
PL	Planar
PO	Polypectomy, polyp less than 2 cm
PP	Polypectomy
RA	Recording and analysis
RB	Group of clients with one health care provider, brief session
RC	Receipt (analysis) only
RE	Joint resurfacing only
RI	Group of clients with one health care provider, intermediate session
RX	Group of clients with one health care provider, extensive session
S	Single
SB	Group of clients with multiple health care providers, brief session
SC	Subcutaneous resection - Skin sparing
SD	Second dose
SH	Staghorn
SI	Group of clients with multiple health care providers, intermediate session
SM	Small
SN	Sentinel

Extent	(Generic Descriptions)
SP	Supervision only
SS	Surgical specimen
SU	Subtotal hysterectomy
SX	Group of clients with multiple health care providers, extensive session
T	Total
TA	Transanal minimally invasive surgery (TAMIS)
TM	Transanal endoscopic microsurgery (TEMS)
TR	Transmission (recording) only
U	Unspecified
UN	Unknown
VE	One lead into ventricle
Z	Other

Use of Reference Codes for CCI Attributes

Because multiple values may be applicable for each of the intervention attributes at the CCI code, the grouping of acceptable values has been assigned an identification code. This code number appears on the attribute button which is coloured pink (for mandatory use) or yellow (for optional use). If you are using a paper version of CCI, you will need to refer to this appendix in order to determine which values apply. If you are using the electronic version of CCI, simply click on the button to review your attribute options. You will find that when this identification (or reference) code is associated with a specific CCI code in the table, the description of the values may be specifically tailored to make optimal sense at that code. This should make for better clarity and precision.

For example, the location attribute "RE" always means "right-extended". At 1.NM.87.TF Excision partial large intestine open approach stoma formation and distal closure, however, the use of "RE" as a location attribute is described more specifically as "*right extended: cecum, appendix, ascending, transverse and descending—may involve a portion of the distal ileum (right extended hemicolon).*" This tailoring of the description, at the code level, is intended to eliminate coder confusion and increase confidence that the correct attribute is being selected.

Status Reference Codes and Descriptions

Reference Number	Reference Description	Status Attribute Code	Status Attribute Description
S01	Intra-operative	I	Intra-operative
S04	Abandoned	A	Abandoned after onset
S05	Tx Status 1	A	Abandoned after onset
		R	Revision

Reference Number	Reference Description	Status Attribute Code	Status Attribute Description
S06	Tx Status 2	A	Abandoned after onset
		R	Revision (return to same site to debride abscess, not planned)
		S	Staged (resection completed over 2 separate operative episodes)
S07	Tx Status 3	A	Abandoned after onset
		DP	Delayed primary (repair occurring 2 to 14 days post trauma)
		DS	Delayed secondary (repair occurring >14 days post trauma)
		R	Revision
S08	Eyelid	A	Abandoned after onset
		S	Staged (applies only to 1.CX.84.LA-XX-E and 1.CX.84.LA-XX-Q)
S09	Tx Status 4	A	Abandoned after onset
		S	Staged
S10	Tx Status 5	A	Abandoned after onset
		R	Revision
		S	Staged
S11	Tx Status 6	A	Abandoned after onset
		R	Revision
		S1	Stage 1, placement of implant
		S2	Stage 2, abutment attachment
S12	Tx Status 7	R	Revision
S13	Mandatory Tx Status 8	0	Not applicable
		A	Abandoned after onset
		B	Incidental (to another intervention)
		C	Converted (from endoscopic to open approach)
S14	Radiotherapy	J	Primary palliative
		K	Primary curative
		L	Metastatic palliative
		M	Metastatic curative

Reference Number	Reference Description	Status Attribute Code	Status Attribute Description
S15	Tx Status 9	A	Abandoned after onset
		C	Converted (from endoscopic to open approach)
		R	Revision
S16	Tx Status 10	A	Abandoned after onset
		C	Converted (from endoscopic to open approach)
S17	Tx Status 11	A	Abandoned after onset
		C	Converted (from endoscopic to open approach)
		DP	Delayed primary (repair occurring 2 to 14 days post-trauma)
		DS	Delayed secondary (repair occurring > 14 days post-trauma)
		R	Revision
S18	Tx Status 12	A	Abandoned after onset
		R	Revision [Atherectomy or thrombectomy (without dilation) of a previously treated site]
S20	Dx status 1	E	Extended
		P	Routine
		Q	Ambulatory
S21	Dx status 2	N	Initial (assessment)
		P	Routine (repeat)
		Z	Other NEC
S22	Dx status 3	N	Initial (intake)
		P	Routine
		Z	Other (special)
S23	Dx status 4	N	Initial (assessment)
		P	Routine (exam, assessment)
		P1	Pre (operative, treatment)
		U	Initial consultation
		V	Repeat consultation
		Z	Other NEC

Reference Number	Reference Description	Status Attribute Code	Status Attribute Description
S24	Term of intervention	TL	Long term
		TS	Short term
S25	Vaccination status	W	Active (toxoid)
		X	Passive (immunoglobulin)
S26	Dialysis status	Q	Ambulatory (home)
S27	Transplant status	M1	Related – Matched (HLA)
		M2	Related – Mismatched
		M3	Unrelated – Matched (HLA)
		M4	Unrelated – Mismatched
		Y	Syngeneic (or identical twin)
S28	Treatment Status 3A	D	Delayed (closure occurs > 24 hrs post trauma)
		R	Revision
		S	Staged
S29	Abandoned and intraoperative	A	Abandoned after onset
		I	Intra-operative
S30	Dx Status 5	N	Initial (intake)
		P	Routine
		Z	Other (special)
S31	Mandatory Tx Status 1	0	Not applicable
		A	Abandoned after onset
		R	Revision
S32	Mandatory Tx Status 5	0	Not applicable
		A	Abandoned after onset
		R	Revision
		S	Staged
S33	Mandatory Dx Status 5	N	Initial (intake)
		P	Routine
		Z	Other (special)

Reference Number	Reference Description	Status Attribute Code	Status Attribute Description
S35	Implant Status	PM	Permanent implant – Radioactive source left in place permanently
		TM	Temporary implant – Radioactive source removed after course of treatment is complete
S38	Mandatory Dx Status 5	0	Not applicable
		N	Initial (general assessment)
		N1	Repeat (general assessment)
		P	Routine (periodic general exam or assessment)
		P1	Pre (operative or treatment assessment)
		U	Initial consultation (specialty referral)
		V	Repeat consultation (specialty referral)
		Z	Other NEC
S41	Tx Status 12	A	Abandoned after onset
		C	Converted (from endoscopic to open)
		R	Revision
		S	Staged
S42	Dx Status 6	N	Initial
		N1	Repeat
		Z	Other (special)
S43	Mandatory Cesarean Section Status	N2	Elective primary c/s with indications
		N3	Elective primary c/s without indications - e.g. mother's request
		N4	Elective repeat c/s
		N5	Emergency primary c/s
		N6	Emergency repeat c/s
		Z	Other (unknown)

Reference Number	Reference Description	Status Attribute Code	Status Attribute Description
S44	Mandatory Dx status 7	0	Not applicable
		N	Initial (intake)
		N1	Repeat (assessment)
		P	Routine
		Z	Other (special)
S45	Tx Status 13	CR	Crisis
		FU	Follow up
		RL	Relapse (prevention)
		TL	Long term
		TS	Short term
		UR	Urgent
S46	Tx Status 14	CR	Crisis
		UR	Urgent
S47	Tx Status 15	CR	Crisis
		FU	Follow up
		RS	Respite
		TL	Long term
		TS	Short term
		UR	Urgent
S49	Mandatory Tx Status 8	CR	Crisis
		UR	Urgent
		Z	Other (unknown)
S50	Mandatory Dx Status 8	N	Initial (intake)
		N1	Repeat (assessment)
		P	Routine
		Z	Other (unknown)

Reference Number	Reference Description	Status Attribute Code	Status Attribute Description
S51	Mandatory Tx Status 9	CR	Crisis
		FU	Follow up
		RS	Respite
		TL	Long term
		TS	Short term
		UR	Urgent
		Z	Other (unknown)
S52	Mandatory Term of Intervention 1	TL	Long term
		TS	Short term
		Z	Other (unknown)
S53	Mandatory Tx Status 10	0	Not applicable
		A	Abandoned after onset
		C	Converted (from endoscopic to open)
		R	Revision
		S	Staged
S55	Mandatory Coronary (Artery) Angiography	0	Not applicable [i.e. ventriculogram] [for use with 3.IP.10.VC and 3.IP.10.VZ only]
		DX	Diagnostic
		I	Intraoperative
		UN	Unknown [whether diagnostic or intraoperative]
S56	Tx Status 16	A	Abandoned after onset
		R	Revision
		S1	Stage 1
		S2	Stage 2

Reference Number	Reference Description	Status Attribute Code	Status Attribute Description
S57	Mandatory Transplant Status	0	Not applicable -Note: valid value for autologous bone marrow only
		M1	Allogeneic (homologous) related matched
		M2	Allogeneic (homologous) related mismatched
		M3	Allogeneic (homologous) unrelated matched
		M4	Allogeneic (homologous) unrelated mismatched
		Y	Syngenic (allogeneic (homologous)) matched (from identical twin donor)
S58	Mandatory Tx Status 12	A	Abandoned after onset
		P	Primary (first insertion of prosthesis component(s) within the joint)
		R	Revision (replacement of previous prosthesis component(s) within the joint)
		UN	Unknown
S59	Mandatory Tx Status 13	0	Not applicable
		A	Abandoned after onset
		C	Converted (from endoscopic to open)
		DP	Delayed primary (repair occurring 2 to 14 days post-trauma)
		DS	Delayed secondary (repair occurring > 14 days post-trauma)
		R	Revision
S60	Mandatory Tx Status 14	A	Abandoned after onset
		P	Primary (first insertion of a prosthetic component, patella or patellofemoral)
		R	Revision (replacement of previous prosthetic component, patella or patellofemoral)
		UN	Unknown
S61	Tx Status 17	A	Abandoned after onset
		I	Intra-operative
		R	Revision

Reference Number	Reference Description	Status Attribute Code	Status Attribute Description
S62	Mandatory PCI 3	A	Abandoned
		D1	Other PCI for STEMI
		N	Primary PCI for STEMI
		OP	Other PCI
		P	Elective PCI
		UN	Unknown
		UR	Urgent PCI for NSTEMI or unstable angina
S63	Tx Status 18	A	Abandoned after onset
		C	Converted (from endoscopic to open)
		S	Staged
S64	Mandatory Cesarean Section Status 2	PA	Primary, Indicated, Planned
		PB	Primary, Indicated, Emergent
		PC	Primary, Not indicated, Planned
		RA	Repeat, Indicated, Planned
		RB	Repeat, Indicated, Emergent
		RC	Repeat, Not indicated, Planned
		Z	Other (unknown)
S65	Tx Status 19	A	Abandoned after onset
		R	Revision
		S1	Stage 1 (includes single stage hybrid repair)
		S2	Stage 2 (completion repair)
S66	Mandatory Tx Status 15	A	Abandoned after onset
		P	Primary (first insertion of prosthesis component(s) within the joint)
		R	Revision (replacement of previous prosthesis component(s) within the joint)
S67	Mandatory Tx Status 16	A	Abandoned after onset
		P	Primary (first insertion of a prosthetic component, patella or patellofemoral)
		R	Revision (replacement of previous prosthetic component, patella or patellofemoral)

Reference Number	Reference Description	Status Attribute Code	Status Attribute Description
S68	Mandatory Tx Status 17	A	Abandoned after onset
		P	Primary (first insertion of prosthesis component(s) within the acetabulum)
		R	Revision (replacement of previous prosthesis component(s) within the acetabulum)
S69	Chemotherapy Status 1	IN	Initial induction (to achieve remission)
		IO	Other induction (following relapse, to achieve remission)
		IP	Consolidation (to control/maintain remission)
S70	Chemotherapy Status 2	IN	Primary initial induction (to achieve remission)
		IO	Other induction (following relapse, to achieve remission)
		IP	Consolidation (to control/maintain remission)
		RI	Repeat initial induction (to achieve remission when previous initial induction failed to achieve remission)
S71	Mandatory Potential Organ Donor Opportunity	0	Not applicable: discharged alive
		V1	Ventilation at time of death or ended less than 3 hours before time of death
		V2	Ventilation ended equal to or greater than 3 hours to less than 6 hours before time of death
		V3	Ventilation ended equal to or greater than 6 hours to less than 24 hours before time of death
		V9	Ventilation ended equal to or greater than 24 hours before time of death

Location Reference Codes and Descriptions

Reference Number	Reference Description	Location Attribute Code	Location Attribute Description
L01	Brain lobes	F	Frontal lobe
		M	Multiple (overlapping) lobes
		O	Occipital lobe
		P	Parietal lobe
		T	Temporal lobe
		Z	Other NEC (e.g. corpus callosum)
L02	Bilaterality (optional)	B	Bilateral
		L	Left
		R	Right
		S	Unilateral (unspecified if right or left)
L03	Aorta	AB	Abdominal aorta
		AR	Arch of aorta
		AS	Ascending aorta
		AZ	Aorta NEC (or overlapping sites of aorta)
		TH	Thoracic aorta
L04	Mandatory Aorta Enlargement Regions	AR	Aortic arch
		AS	Ascending aorta (root)
L05	Hernias 1	B	Bilateral (for contralateral hernia)
L06	Spine 1	CX	Cervical spine
		LB	Lumbar spine
		TH	Thoracic spine
L07	Spine 2	CT	Cervicothoracic spine
		CX	Cervical spine alone
		LB	Lumbar spine alone
		LS	Lumbosacral spine
		SP	Complete spine (or spine NEC)
		TH	Thoracic spine alone
		TL	Thoracolumbar spine (or thoracolumbosacral)

Reference Number	Reference Description	Location Attribute Code	Location Attribute Description
L08	Single/multiple sites	M	Multiple sites/vessels
		S	Single site/vessel
L09	Vena cava	IF	Inferior vena cava
		SE	Superior vena cava
L10	Ventricles of brain	V3	3rd ventricle of brain
		V4	4th ventricle of brain
L11	Sympathetic	CX	Cervical level [includes: stellate ganglion]
		LB	Lumbar level
		PV	Perivascular region [any site]
		SL	Sacral level
		TH	Thoracic level [includes: dorsal]
		Z	Other NEC [e.g. splanchnic nerve]
L12	Right/Left	L	Left
		R	Right
		S	Unilateral (unspecified if right or left)
L13	Pulmonary	L	Left
		N	Main
		R	Right
		S	Unilateral (unspecified if right or left)
L15	Abdominal veins	1	One vessel
		2	Two vessels
L16	Extremities NEC	BL	Bilateral (both) legs
		BU	Bilateral (both) arms
		LA	Left arm
		LL	Left leg
		RA	Right arm
		RL	Right leg
L17	Upper extremities	BU	Bilateral (both) arms
		LA	Left arm
		RA	Right arm

Reference Number	Reference Description	Location Attribute Code	Location Attribute Description
L18	Lower extremities	BL	Bilateral (both) legs
		LL	Left leg
		RL	Right leg
L19	Cranium	F	Frontal bone
		M	Multiple (overlapping) bones
		O	Occipital bone
		P	Parietal bone
		T	Temporal bone
L20	Mandatory Artery Access	0	Not applicable [i.e. venous approach] [for use with 3.IP.10.VC and 3.IP.10.VZ only]
		CB	Combined [for chronic total occlusion]
		FY	Femoral artery (left) (right)
		LY	Left arm artery [e.g. radial, brachial]
		RY	Right arm artery [e.g. radial, brachial]
		U	Unknown artery
L21	Mandible	BC	Ramus
		BD	Body
		BE	Symphysis
		M	Multiple sites
L22	Mandible 2	BC	Ramus (sagittal split)
		BD	Body (unspecified)
		M	Multi-site (segmental)
L23	Anterior/posterior	AN	Anterior
		M	Multi-site
		PS	Posterior
L24	Laterality	B	Bilateral
		S	Unilateral
L25	Upper/lower	CB	Combined upper and lower
		LW	Lower (mandibular)
		UP	Upper (maxillary)

Reference Number	Reference Description	Location Attribute Code	Location Attribute Description
L26	Teeth location	MD	Multiple quadrants, deciduous [primary] teeth
		MM	Multiple quadrants, mixed dentition
		MT	Multiple quadrants, permanent teeth
		SD	Single quadrant, deciduous [primary] teeth
		SM	Single quadrant, mixed dentition
		ST	Single quadrant, permanent teeth
L27	Floor of mouth	AN	Anterior
		LT	Lateral
		RT	Retromolar
L28	Small intestine	D	Duodenum
		Z	Other small intestine (e.g. jejunum, ileum, overlapping or contiguous sites)
L29	Mandatory Large intestine	L	Left: transverse, descending and sigmoid colon (multiple sites or continuous e.g. left hemicolon)
		R	Right: cecum, appendix, ascending and transverse – may involve distal portion of ileum (multiple sites or continuous right hemicolon)
		RE	Right extended: cecum, appendix, ascending, transverse and descending – may involve the distal portion of ileum (right extended hemicolon)
		SG	Sigmoid [alone]
		TC	Transverse [alone]
		U	Unqualified, not applicable or of unknown extent
L30	Liver	L	Left [lobectomy, hepatectomy]
		M	Multi segments [or wedges from]
		R	Right [lobectomy, hepatectomy]
		RE	Right extended [tri-segmental hepatectomy, including cholecystectomy]
		S	Single segment [or wedge from]
		U	Unqualified [or unknown extent]
L31	Hand/foot	FT	Foot
		HD	Hand

Reference Number	Reference Description	Location Attribute Code	Location Attribute Description
L32	Stoma	PK	Subcutaneous pocket (for implanted device)
		SR	External stoma of respiratory system
		SS	External stoma of digestive system
		SU	External stoma of urinary system
		SZ	Other external stoma
L33	Bladder	AN	Anterior wall
		DM	Dome
		LT	Lateral wall
		M	Multiple/contiguous sites
		PS	Posterior wall
		TR	Trigone
		U	Unspecified
		UO	Ureteric orifice
		UR	Urachus
L35	Trunk	LW	Lower trunk (e.g. rectus abdominis)
		UP	Upper (e.g. pectoralis major)
L36	Mandatory Hernias 2	0	Not applicable
		B	Lower abdominal region includes: femoral, inguinal, pudendal, retroperitoneal - bilateral sites (hernias)
		LW	Lower abdominal region includes: femoral, inguinal, pudendal, retroperitoneal – unilateral site (hernia)
		U	Unspecified (or multiple or overlapping regions/hernias)
		UP	Upper abdominal region includes: umbilical site (hernia)
L37	Ovary	EM	Embryo
		GA	Gamete
		ZY	Zygote

Reference Number	Reference Description	Location Attribute Code	Location Attribute Description
L38	Conjoined twins	CR	Craniopagus
		HP	Ishiopagus
		M	Multiple types
		PY	Pygopagus
		TP	Thoracopagus
		U	Unspecified
		XP	Xiphopagus [omphalopagus]
L39	Ureter	B	Bilateral
		LD	Left distal
		LP	Left proximal
		RD	Right distal
		RP	Right proximal
		U	Unspecified
L40	Urethra	BP	Bulbous
		MB	Membraneous
		PC	Prostatic
		PE	Penile
		U	Unspecified
L43	Uterine ligaments	BG	Broad ligament
		CD	Cardinal ligament
		RO	Round ligament
		U	Unspecified
		UT	Uterosacral ligament
L44	Uterus	AT	Aberrant tissue
		BD	Body
		EN	Endometrium
		U	Unspecified

Reference Number	Reference Description	Location Attribute Code	Location Attribute Description
L45	Cervix	BD	Body
		CX	Cervical canal [internal os]
		U	Unspecified
L46	Vagina	AN	Anterior fornix
		IT	Introitus
		M	Multiple sites
		PS	Posterior fornix
		U	Unspecified
L47	Vulva	CI	Clitoris
		GV	Greater vestibular glands [Bartholin's]
		HY	Hymen
		LG	Labia majora
		LM	Labia minora
		M	Multiple sites
		U	Unspecified
L48	Diagnostic tooth structures	MX	Mixed (primary and permanent) dentition
		PR	Primary (deciduous) dentition
		PT	Permanent dentition
		Z	Other (edentulous)
L49	Nerves	CO	Cortical
		SP	Spinal
L50	Long bones 1	B	Bilateral
		L	Left [shaft or NOS]
		LD	Left distal
		LE	Left epiphysis
		LP	Left proximal (trochanter)
		R	Right [shaft or NOS]
		RC	Right epiphysis
		RD	Right distal
		RP	Right proximal (trochanter)

Reference Number	Reference Description	Location Attribute Code	Location Attribute Description
L51	Long bones 2	B	Bilateral
		L	Left [shaft or NOS]
		LD	Left distal
		LP	Left proximal (trochanter)
		R	Right [shaft or NOS]
		RD	Right distal
		RP	Right proximal (trochanter)
L52	Metacarpal bones	L	Left (2nd to 5th) metacarpal
		L1	Left 1st metacarpal (thumb)
		R	Right (2nd to 5th) metacarpal
		R1	Right 1st metacarpal (thumb)
L53	Metacarpophalangeal joints	L	Left (2nd to 5th) MCP joint
		L1	Left 1st MCP joint (thumb)
		R	Right (2nd to 5th) MCP joint
		R1	Right 1st MCP joint (thumb)
L54	Phalanx of hand	B	Bilateral
		L	Left (2nd to 5th) phalanx
		L1	Left 1st phalanx (thumb)
		R	Right (2nd to 5th) phalanx
		R1	Right 1st phalanx (thumb)
L55	Interphalangeal joints 1	L1	Left 1st interphalangeal (PIP) joint
		LD	Left distal (2nd to 5th) DIP joint
		LP	Left proximal (2nd to 5th) PIP joint
		R1	Right 1st interphalangeal (PIP) joint
		RD	Right distal (2nd to 5th) DIP joint
		RP	Right proximal (2nd to 5th) PIP joint

Reference Number	Reference Description	Location Attribute Code	Location Attribute Description
L56	Tendons of hand	L1	Left Zone 1 (A3, C2, A4 or C3 pulleys only)
		L2	Left Zone 2 (A1, A2 or C1 pulleys with or without Zone 1 – known as no man's land)
		R1	Right Zone 1 (A3, C2, A4 or C3 pulleys only)
		R2	Right Zone 2 (A1, A2 or C1 pulleys with or without Zone 1 – known as no man's land)
L57	Metatarsophalangeal bone/joint	B	Bilateral (2nd to 5th) MTP bone/joint
		B1	Bilateral 1st MTP bone/joint (hallux or great toe)
		L	Left (2nd to 5th) MTP bone/joint
		L1	Left 1st metatarsal bone/joint (hallux or great toe)
		R	Right (2nd to 5th) MTP bone/joint
		R1	Right 1st metatarsal bone/joint (hallux or great toe)
L58	Phalanx of foot	B	Bilateral (2nd to 5th) phalanx
		B1	Bilateral 1st phalanx (hallux or great toe)
		L	Left (2nd to 5th) phalanx
		L1	Left 1st phalanx (hallux or great toe)
		R	Right (2nd to 5th) phalanx
		R1	Right 1st phalanx (hallux or great toe)
L59	Interphalangeal joints 2	B1	Bilateral 1st interphalangeal joint (hallux or great toe)
		BQ	Bilateral distal (2nd to 5th) DIP joint
		BV	Bilateral proximal (2nd to 5th) PIP joint
		L1	Left 1st interphalangeal joint (hallux or great toe)
		LD	Left distal (2nd to 5th) DIP joint
		LP	Left proximal (2nd to 5th) PIP joint
		R1	Right 1st interphalangeal joint (hallux or great toe)
		RD	Right distal (2nd to 5th) DIP joint
		RP	Right proximal (2nd to 5th) PIP joint

Reference Number	Reference Description	Location Attribute Code	Location Attribute Description
L60	Tendons of foot	B	Bilateral
		B1	Bilateral 1st hallucis
		L	Left
		L1	Left 1st hallucis
		R	Right
		R1	Right 1st hallucis
L61	Total body	HB	Hemibody
L62	Lymph nodes	IF	Inferior
		SE	Superior
L63	Lymph nodes	BB	Bilateral deep
		BS	Bilateral superficial
		LC	Left deep
		LF	Left superficial
		RP	Right deep
		RS	Right superficial
		S	Unilateral (unspecified if right or left)
L64	Lymph nodes	AN	Anterior mediastinal
		IF	Inferior tracheobronchial
		PS	Posterior mediastinal
		SE	Superior tracheobronchial
		U	Unspecified
L65	Lymph nodes	AZ	Aortic
		IA	Intra-abdominal
		RP	Retroperitoneal
		U	Unspecified
L66	Lymph nodes	AD	Above diaphragm
		BW	Below diaphragm
		U	Unspecified

Reference Number	Reference Description	Location Attribute Code	Location Attribute Description
L67	Trimester	T1	1st trimester (< 14 weeks)
		T2	2nd trimester (14-26 weeks)
		T3	3rd trimester (> than 26 weeks)
		U	Unspecified
L68	Heart parameters	AP	Intra-atrial
		AV	Intra-atrial and intra-ventricular
		BH	Bundle of His alone
		U	Unspecified (NOS)
		VE	Intra-ventricular
L69	Abdominal imaging	LW	Lower abdomen (intestinal tract, rectum)
		PD	Pelvic cavity (genitourinary tract, retroperitoneum, uterus)
		U	Unspecified
		UP	Upper abdomen (stomach, gall bladder, liver, spleen)
		Z	Other NEC (complete abdominal and pelvic cavity or overlapping sites)
L70	Dialysis fistula	LA	Left arm
		LL	Left leg
		RA	Right arm
		RL	Right leg
		Z	Other site (e.g. jugular, subclavian)
L71	Vein access	PL	Peripheral vein
		UM	Umbilical vein
L72	Bilaterality Mandatory	B	Bilateral
		L	Left
		R	Right
		U	Unilateral unspecified
L73	Maxillary osteotomy regions	M	Multiple (e.g. segmental)
		U	Unspecified
		Z	Other (e.g. Lefort 1, total)

Reference Number	Reference Description	Location Attribute Code	Location Attribute Description
L74	Mandatory Regions of Vagina	AN	Anterior wall (e.g. cystocele, urethrocele)
		AX	Apex (e.g. enterocele)
		IT	Introitus
		M	Multiple sites
		PA	Anterior and posterior
		PS	Posterior wall (e.g. rectocele)
		U	Unspecified region
L76	Mandatory Spine 2	CT	Cervicothoracic
		CX	Cervical [C3-C7 vertebrae, C2-C7 intervertebral discs]
		LB	Lumbar
		LS	Lumbosacral
		M	Multiple (regions)
		SP	Complete spine, spine NEC
		TH	Thoracic
L78	Mandatory Liver	TL	Thoracolumbar (or thoracolumbosacral)
		L	Left (lobectomy, hepatectomy)
		M	Multiple segments (or wedges from)
		R	Right (lobectomy, hepatectomy)
		RE	Right extended (tri-segmental hepatectomy, including cholecystectomy)
		S	Single segment (or wedge from)
L79	Mandatory Sympathetic	U	Unspecified (unqualified or unknown)
		CX	Cervical level (includes stellate ganglion)
		LB	Lumbar level
		PV	Perivascular or endovascular region (any site)
		SL	Sacral level
		TH	Thoracic (dorsal) level
		Z	Other NEC (e.g. splanchnic nerve)

Reference Number	Reference Description	Location Attribute Code	Location Attribute Description
L81	Uterus 2	AT	Aberrant tissue
		BD	Body
		EN	Endometrium
		M	Multiple sites
		U	Unspecified
L82	Laterality as Applicable	B	Bilateral
		L	Left
		R	Right
		S	Unilateral (unspecified as left or right)
		Z	Other NEC (not applicable)
L84	Abdominal Imaging 2	LW	Lower abdomen (intestinal tract, rectum or anus)
		PD	Pelvic cavity (retroperitoneum)
		U	Unspecified
		UP	Upper abdomen (stomach, gall bladder, liver, spleen)
		Z	Other NEC (overlapping sites)
L85	Uterus 3	AT	Aberrant tissue
		BD	Body
		EN	Endometrium
		M	Multiple sites
		U	Unspecified
		UL	Uterine ligaments
L86	Vagina 2	AN	Anterior fornix
		IT	Introitus
		M	Multiple sites
		PS	Posterior fornix
		U	Unspecified

Reference Number	Reference Description	Location Attribute Code	Location Attribute Description
L87	Brain lobes 2	F	Frontal lobe
		M	Multiple (overlapping) lobes
		O	Occipital lobe
		P	Parietal lobe
		T	Temporal lobe
		ZU	Other NEC (e.g. corpus callosum) or unspecified
L88	Spine 3	CT	Cervicothoracic
		CX	Cervical alone
		LB	Lumbar alone
		LS	Lumbosacral
		SP	Complete spine (or spine NEC)
		TH	Thoracic only
		TL	Thoracolumbar
L89	Bilaterality Mandatory 2	AT	Aberrant tissue only
		B	Bilateral
		L	Left
		R	Right
		U	Unilateral unspecified
L90	Bronchus bilateral	B	Bilateral
		L	Left
		N	Main
		R	Right
		S	Unilateral (unspecified if right or left)
L91	Mandatory Small Intestine 2	D	Duodenum
		U	Unqualified, not applicable or of unknown extent (simple excisional technique e.g. polypectomy or excision of lesion)
		Z	Other area of small intestine (e.g. jejunum, ileum, not otherwise specified)

Reference Number	Reference Description	Location Attribute Code	Location Attribute Description
L92	Pulmonary 2	B	Bilateral
		L	Left
		N	Main
		R	Right
		S	Unilateral (unspecified if right or left)
L93	Mandatory Arterial Access Site	0	Not applicable [i.e. venous approach]
		FY	Femoral artery (left) (right)
		LY	Left arm artery [e.g. radial, brachial]
		RY	Right arm artery [e.g. radial, brachial]
		U	Unknown artery
L94	Lobes of Lung - optional	LH	Left lung, lower lobe
		LU	Left lung, upper lobe
		ML	Multiple segments, left lung
		MR	Multiple segments, right lung
		RH	Right lung, lower lobe
		RM	Right lung, middle lobe
		RU	Right lung, upper lobe
		U	Unilateral, unspecified if right or left
L95	Mandatory Right/Left	L	Left
		R	Right
		S	Unilateral (unspecified if right or left)
L96	Mandatory Lobes of Lung	LH	Left lung, lower lobe
		LU	Left lung, upper lobe
		ML	Multiple segments, left lung
		MR	Multiple segments, right lung
		RH	Right lung, lower lobe
		RM	Right lung, middle lobe
		RU	Right lung, upper lobe
		U	Unilateral, unspecified if right or left

Reference Number	Reference Description	Location Attribute Code	Location Attribute Description
L97	Mandatory Venous Access Site	FE	Femoral
		JU	Jugular
		PI	Peripheral - Includes: veins of the antecubital fossa, (e.g. brachial, cephalic, or basilic), greater or lesser saphenous vein, posterior auricular vein
		SC	Subclavian
		UM	Umbilical
		UN	Unknown
L98	Mandatory Aorta Regions	AR	Aortic arch – involving or originating at aortic arch with or without any other regions of aorta
		AS	Ascending thoracic aorta only
		TH	Thoracic (descending) (thoracoabdominal) (overlapping regions) aorta
L99	Mandatory Region for Aortopexy	AS	Ascending thoracic aorta only
LA1	Mandatory long bones 1	B	Bilateral
		L	Left [shaft or NOS]
		LD	Left distal
		LE	Left epiphysis
		LP	Left proximal (trochanter)
		R	Right [shaft or NOS]
		RC	Right epiphysis
		RD	Right distal
		RP	Right proximal (trochanter)
LA2	Abdominal aorta	IR	Infrarenal/NOS
		PJ	Pararenal/Juxtarenal
		SA	Suprarenal
LA3	Small Intestine 3	D	Duodenum
		I	Ileum
		J	Jejunum
		U	Unqualified, not applicable or unknown

		A2	High risk dialysis patient dosage (schedule) 2
		A3	Adult dose (schedule) 3
		BX	Booster dose
		P1	Pediatric dose (schedule) 1
		P2	High risk dialysis infant/adolescent dosage (schedule) 2
		P3	Pediatric dose (schedule) 3
		P4	Pediatric dose (schedule) 4
		U	Unspecified
E50	Application of instrumentation with C Section	01	Single application (of instruments)
		02	Double application (of instruments) during trial of labour and then during C Section

Reference Number	Reference Description	Extent Attribute Code	Extent Attribute Description
E52	Mandatory Uterus	0	Not applicable (e.g. Other type of excision)
		P	Myomectomy/fibromectomy
		SU	Subtotal hysterectomy
E53	Mandatory Coils	0	Not applicable (no coil used)
		01	One coil
		02	Two coils
		03	Three coils
		04	Four coils
		05	Five coils
		06	Six coils
		07	Seven coils
		08	Eight coils
		09	Nine coils
		10	Ten coils
		G	More than ten coils (11 - 20)
		H	More than twenty coils
		U	Unspecified
E54	Multidirectional	1	Unidirectional
		2	Bidirectional
E60	Observation type	CN	Constant observation (includes one-on-one)
		EX	Close observation
		SP	General observation
E61	Intraocular lens	0	Not applicable
		01	Single intraocular lens
		02	Piggyback [stacked] intraocular lenses
E63	One on one	IN	Individual client with one health care provider (one on one)

Reference Number	Reference Description	Extent Attribute Code	Extent Attribute Description
E64	Bones/Joints	1	1 bone/joint
		2	2 bones/joints
		3	3 bones/joints
		4	4 bones/joints
		5	5 bones/joints
		6	6 bones/joints
		7	7 bones/joints
		8	8 bones/joints (or more)
E65	Mandatory Time parameter 4	CM	Comprehensive
		LT	Limited (brief)
		U	Unspecified
E66	Mandatory Delivery size parameter 2	GR	Group of clients with one health care provider
		GS	Group of clients with multiple health care providers
		IM	Individual client with multiple health care providers
		IN	Individual client with one health care provider
		U	Unspecified
E67	Mandatory Coronary Arteries 2	DA	Bypass graft with any native artery vessel
		DB	Bypass graft alone (without native artery vessel)
		DC	Left main artery with LAD and/or Cx and/or RCA
		DD	Left main artery alone (without LAD or Cx or RCA)
		DE	3 vessels - LAD and Cx and RCA
		DF	2 vessels - 2 of the following: LAD, Cx, RCA
		DG	1 vessel - LAD or Cx or RCA
		UN	Unknown
E68	Specimen Handling	RA	Preparation and analysis (of results)
		RC	Review analysis (of results) only
		TR	Preparation (specimen) only

Reference Number	Reference Description	Extent Attribute Code	Extent Attribute Description
E70	Mandatory Lymph Node Involvement 2	SN	Sentinel node(s)
		U	Unspecified
		Z	Other
E71	Mandatory Femoral Component 2	CS	Cement spacer
		FH	Modular ball (with or without modular neck) with stem remaining in situ [this component value requires Status value R=Revision]
		M1	Modular hemiarthroplasty, unipolar femoral component [Includes: Femoral head and stem for partial hip replacement; fits into (native) acetabulum without a liner]
		M2	Modular hemiarthroplasty, bipolar femoral component [Includes: Femoral head with larger outer head (ball in ball) with a plastic acetabular liner for partial hip replacement; articulates with the (native) acetabulum]
		MO	Monoblock (all one piece) ball and stem (e.g. Austin-Moore, Thompson) [Includes: that used in total arthroplasty or hemiarthroplasty]
		MU	Modular total arthroplasty [Includes: Total hip replacement (femoral and acetabular)]
		RE	Joint resurfacing only (anatomical head not resected) (e.g. Birmingham, Finsbury)
		UN	Unknown [select this value only when there is no information to select from the list above]
E72	Mandatory compartments of knee 2	0	Not applicable [i.e. cement spacer, tibial liner (insert) alone]
		1A	Unicompartmental, medial: unicondylar
		1B	Unicompartmental, lateral: unicondylar
		1C	Unicompartmental, unspecified if medial or lateral: unicondylar
		2	Bicompartmental, medial with lateral: bicondylar
		3	Tricompartmental, medial with lateral & patellofemoral

Reference Number	Reference Description	Extent Attribute Code	Extent Attribute Description
E73	Mandatory Cardiac Pacemaker Leads 2	0	Zero leads (leadless pacemaker)
		3	Three leads: into atrium, ventricle(s), coronary sinus
		AT	One lead into atrium
		AV	Two leads: into atrium and ventricle
		U	Unspecified
		VE	One lead into ventricle
		Z	Other
E74	Graft Types	1	Single (simple tubular) graft
		2	Branched (bifurcated) (biiliac) (bifemoral) graft
E75	Graft Types 2	1	Single (simple tubular) graft
		2	Branched (bifurcated) (biiliac) (bifemoral) graft
E76	Graft Types 3	1	Single (simple tubular) graft
		2	Branched (bifurcated) graft
E77	Gastrointestinal excision	EM	Cap-assisted endoscopic mucosal resection (Cap-assisted EMR)
		ES	Endoscopic submucosal dissection (ESD)
		PA	Polypectomy, polyp greater than or equal to 2 cm
		PE	Polypectomy, polyp less than or equal to 5 mm
		PO	Polypectomy, polyp greater than 5 mm or less than 2 cm
E78	Rectal excision	EM	Cap-assisted endoscopic mucosal resection (Cap-assisted EMR)
		ES	Endoscopic submucosal dissection (ESD)
		PA	Polypectomy, polyp greater than or equal to 2 cm
		PE	Polypectomy, polyp less than or equal to 5 mm
		PO	Polypectomy, polyp greater than 5 mm or less than 2 cm
		TM	Transanal endoscopic microsurgery (TEMS)

Reference Number	Reference Description	Extent Attribute Code	Extent Attribute Description
E79	Mandatory Partial Breast Excision	LU	Lumpectomy
		NP	Subcutaneous mastectomy - Nipple sparing (nipple and breast skin spared)
		SC	Subcutaneous mastectomy - Skin sparing (nipple removed) or NOS
		Z	Other
E80	Mohs Micrographic Surgery	0	Not applicable (e.g. other type of excision)
		01	One layer removed
		02	Two layers removed
		03	Three layers removed
		04	Four layers removed
		05	Five layers removed
		06	Six layers removed
		D	Greater than 6 layers removed
E81	Gastrointestinal excision 2	EM	Cap-assisted endoscopic mucosal resection (Cap-assisted EMR)
		ES	Endoscopic submucosal dissection (ESD)
		PP	Polypectomy
E82	Rectal excision 2	EM	Cap-assisted endoscopic mucosal resection (Cap-assisted EMR)
		ES	Endoscopic submucosal dissection (ESD)
		PP	Polypectomy
		TA	Transanal minimally invasive surgery (TAMIS)
		TM	Transanal endoscopic microsurgery (TEMS)
E83	Dosage schedule 3	FD	First dose
		SD	Second dose
		Z	Other (unknown)

Reference Number	Reference Description	Extent Attribute Code	Extent Attribute Description
E84	Mandatory compartments of knee 3	0	Not applicable [i.e. cement spacer, tibial liner (insert) alone]
		1A	Unicompartmental, medial: unicondylar
		1B	Unicompartmental, lateral: unicondylar
		1C	Unicompartmental, unspecified
		2A	Bicompartmental, medial with lateral: bicondylar
		2B	Bicompartmental, medial with patellofemoral: bicondylar
		2C	Bicompartmental, lateral with patellofemoral: bicondylar
		2D	Bicompartmental, unspecified
		3	Tricompartmental, medial with lateral & patellofemoral

Appendix D - Pharmacological, Biological and Other Agents: Table of Conversions for CCI Code Component to ATC Code

The following table contains a list of the various groups and sub-groups of agents, pharmacological (local and systemic), biological and others, which are found in a number of CCI interventions. Examples of each group of agents have been provided to assist classification users in selecting the appropriate code component (alphanumeric characters 8 and 9 of the CCI code).

A cross reference from the CCI code component to the Anatomical Therapeutic Chemical Classification (ATC) which was designed by the World Health Organization and is maintained by the WHO Collaborating Centre for Drug Statistics Methodology in Oslo, Norway (2000 version).

CCI Qualifier Codes	Agents (Local and Systemic)	Examples	ATC Codes
ALIMENTARY TRACT AND METABOLISM AGENTS			
A0	Alimentary tract and metabolism agent NOS	agent not specified	—
A1	Stomatological preparations	hydrogen peroxide, chlorhexidine, nystatin, benzydamine, fluoride, triamcinolone, for local oral treatment	A01
A2	Antacids, drugs for treatment of peptic ulcer and flatulence	antacids, ranitidine, misoprostol, omeprazole, sucralfate, simethicone	A02
A3	Antispasmodic and anticholinergic agents and propulsives	propantheline, atropine, belladonna alkaloids, metoclopramide, cisapride, domperidone	A03
A4	Antiemetics and antinauseants	ondansetron, scopolamine, dimenhydrinate	A04
A5	Bile and liver therapy	ursodiol	A05
A6	Laxatives	docusate, bisacodyl, cascara, senna, psyllium, osmotic laxatives, enema laxatives	A06
A7	Antidiarrheals, intestinal antiinflammatory,/ anti-infective agents, intestinal adsorbents	neomycin, charcoal, bismuth subsalicylate, attapulgit, loperamide, mesalimine	A07
A8	Anti-obesity preparations, excluding diet products	phentermine, diethylpropion	A08
A9	Digestives, including enzymes	pepsin, lactase	A09
B1	Drugs used in diabetes	insulins, metformin, chlorpropamide, tolbutamide, glyburide, glipizide	A10
B2	Vitamins	single vitamins, multivitamins, vitamins with minerals	A11
B3	Mineral supplements	calcium, potassium, magnesium, zinc, sodium	A12
B4	Tonics	—	A13
B5	Anabolic agents for systemic use	nandrolone	A14
B6	Appetite stimulants	—	A15
B7	Other alimentary tract and metabolism products	amino acids and derivatives, anethol trithion	A16
BLOOD AND BLOOD FORMING ORGAN AGENTS			
1C	Thrombolytic agents	anistreplase, alteplase, reteplase, streptokinase, tenecteplase, TNKase (TNK), tissue plasminogen activator (tPA), urokinase	B01
C0	Blood and blood forming organ agent NOS	agent not specified	—

CCI Qualifier Codes	Agents (Local and Systemic)	Examples	ATC Codes
C1	Antithrombotic agents	warfarin, heparin, enoxaparin, dipyridamole, glycoprotein IIb/IIIa receptor inhibitors (GPI) (e.g. ReoPro [abciximab], Aggrastat [tirofiban HCl], Integrilin [eptifibatide], lamifiban]	B01
C2	Antihemorrhagic agents	aminocaproic acid, aprotinin, phytonadione, thrombin, coagulation factors	B02
C3	Antianemic preparations	iron, cyanocobalamin, folic acid, erythropoietin	B03
C5	Blood and related products	albumin, dextran, hetastarch	B05A
C6	Solutions for parenteral nutrition	amino acids, fat emulsions, carbohydrates and combinations, for parenteral nutrition	B05BA
C7	Solutions affecting the electrolyte balance	electrolytes, electrolytes with carbohydrates, for IV administration	B05BB
C8	Solutions producing osmotic diuresis	mannitol, for IV administration	B05BC
D1	Irrigating solutions - anti-infectives	chlorhexidine, neomycin, for irrigation	B05CA
D2	Irrigating solutions - salt solutions	sodium chloride, for irrigation	B05CB
D3	Other irrigating solutions	sorbitol, mannitol, for irrigation	B05CX
D4	Peritoneal dialytic agents	isotonic and hypertonic solutions, for peritoneal dialysis	B05D
D5	IV solution additives	potassium salts, sodium salts, calcium preparations, trace elements, as IV solution additives	B05X
D6	Hemo-dialytic and hemo-filtrate agents	—	B05Z
D7	Other hematological agents	hyaluronidase, chemotrypsin	B06
CARDIOVASCULAR AGENTS			
E0	Cardiovascular system agents NOS	agent not specified	—
E1	Cardiac glycosides	digoxin	C01A
E2	Antiarrhythmics, class I and III	quinidine, procainamide, lidocaine, propafenone, amiodarone	C01B
E3	Cardiac stimulants excluding cardiac glycosides	isoproterenol, dopamine, dobutamine, epinephrine (adrenaline), amrinone	C01C
E4	Vasodilators used in cardiac diseases	nitroglycerin, isosorbide dinitrate	C01D
E5	Other cardiac preparations	alprostadil, indomethacin, adenosine, for cardiac use	C01E
E6	Antihypertensives	methyldopa, prazosin, hydralazine, reserpine, nitroprusside, plain and in combination with diuretics	C02
E7	Diuretics	thiazides, metolazone, furosemide, spironolactone, triamterene	C03
E8	Peripheral vasodilators	phentolamine, pentoxifylline, ergoloid mesylates	C04
E9	Vaso-protectives	topical antihemorrhoidals, sodium tetradecyl sulfate	C05
F1	Beta blocking agents	propranolol, metoprolol, atenolol, plain or in combination with other agents	C07

CCI Qualifier Codes	Agents (Local and Systemic)	Examples	ATC Codes
F2	Calcium channel blockers	nifedipine, verapamil, diltiazem, plain or in combination with other agents	C08
F3	Agents acting on renin-angiotensin system	captopril, enalapril, lisinopril, losartan, plain or in combination with other agents	C09
F4	Serum lipid reducing agents	lovastatin, genfibrozil, cholestyramine, nicotinic acid	C10
DERMATOLOGICAL AGENTS			
G0	Dermatological agent NOS	agent not specified	—
G1	Antifungals for dermatological use	nystatin, clotrimazole, miconazole, tolnaftate, for topical use; griseofulvin for systemic use	D01
G2	Emollients and protectives	silicone, dimethicone, zinc oxide, urea, protectives against UV radiation	D02
G3	Preparations for treatment of wounds and ulcers	collagenase, dextranomer	D03
G4	Antipruritics, including antihistamines, anesthetics, etc.	diphenhydramine, lidocaine, benzocaine, crotonitron, calamine, for topical use	D04
G5	Antipsoriatics	coal tar preparations, anthralin, methoxsalen, for topical use; methoxsalen, etretinate for systemic use	D05
G6	Antibiotics and chemotherapeutics for dermatological use	fusidic acid, bacitracin, polymyxin, metronidazole, idoxuridine, acyclovir, for topical use	D06
G7	Corticosteroids, dermatological preparations	hydrocortisone, triamcinolone, clobetasol, betamethasone, for topical use	D07
G8	Antiseptics and disinfectants	chlorhexidine, hexachlorophene, iodine, clioquinol, isopropyl alcohol, silver nitrate	D08
H1	Medicated dressings	framycetin dressings, zinc bandages, soft paraffin dressings	D09
H2	Anti-acne preparations	sulfur, tretinoin, benzoyl peroxide, clindamycin, isotretinoin for systemic use	D10
H3	Other dermatological preparations	medicated shampoos, wart preparations, minoxidil topical	D11
GENITO-URINARY SYSTEM AGENTS AND SEX HORMONES			
I0	Genito-urinary or sex hormone agent NOS	agent not specified	—
I1	Gynecological anti-infectives and antiseptics	nystatin, metronidazole, clotrimazole, povidone-iodine, for gynecological use	G01
I2	Uterotonic agent	ergometrine, dinoprostone, prostaglandin, misoprostol	G02A
I3	Contraceptives for topical use	nonoxynol-9	G02B
I4	Other gynecological agent; labour suppressants	ritodrine, bromocriptine	G02C
I5	Sex hormones and modulators of the genital system	progestogens, estrogens, androgens, plain or in combination; clomiphene, danazol, mifepristone, RU486	G03
I6	Urological agent	methenamine, nalidixic acid, nitrofurantoin, oxybutinin, finasteride	G04
SYSTEMIC HORMONAL PREPARATIONS, EXCLUDING SEX HORMONES			

CCI Qualifier Codes	Agents (Local and Systemic)	Examples	ATC Codes
J0	Systemic hormonal agent NOS	agent not specified	—
J1	Pituitary, hypothalamic hormones, and analogues	vasopressin, desmopressin, gonadorelin, octreotide, oxytocin	H01
J2	Corticosteroids for systemic use	prednisone, dexamethasone, fludrocortisone, for systemic use	H02
J3	Thyroid therapy	levothyroxine, potassium iodide, propylthiouracil	H03
J4	Pancreatic hormones	glucagon	H04
J5	Calcium homeostasis	parathyroid hormones, calcitonin	H05
GENERAL ANTIINFECTIVE AGENTS FOR SYSTEMIC USE			
K0	General anti-infective agent NOS	agent not specified	—
K1	Tetracyclines	tetracycline, minocycline, doxycycline	J01A
K2	Amphenicols	chloramphenicol	J01B
K3	Penicillins, Beta-lactam antibacterials	penicillin, amoxicillin, ampicillin, ticarcillin, cloxacillin, piperacillin, tazobactam	J01C
K4	Cephalosporins and related substances	cephalexin, cefotaxime, cefuroxime, cefepime	J01DA
K5	Monobactams, carbapenems	aztreonam, imipenem and enzyme inhibitor, meropenem	J01DF, J01DH
K6	Sulfonamides and trimethoprim	trimethoprim, sulfamethoxazole, sulfadiazine, cotrimoxazole	J01E
K7	Macrolides and lincosamides	erythromycin, clarithromycin, clindamycin	J01F
K8	Aminoglycoside antibacterials	streptomycin, gentamicin, tobramycin, amikacin	J01G
K9	Quinolone antibacterials	norfloxacin, ciprofloxacin	J01M
L1	Other antibacterials	vancomycin, polymyxin B, metronidazole	J01R, J01X
L2	Antimycotics for systemic use	amphotericin, ketoconazole, fluconazole, flucytosine	J02
L3	Antimycobacterials	rifampin, isoniazid, ethambutol, rifabutin, clofazimine	J04
L4	Antivirals for systemic use	acyclovir, zidovudine, didanosine, zalcitabine, ritonavir, foscarnet	J05
L5	Immune sera	tetanus antitoxin, diphtheria antitoxin, snake venom antiserum	J06A
L6	Immunoglobulins	normal human immunoglobulin, specific immunoglobulins	J06B
L7	Bacterial vaccines	diphtheria toxoid, haemophilus influenza b vaccines, meningococcal vaccine, tetanus toxoid	J07A
L8	Viral vaccines	influenza vaccines, hepatitis vaccines, poliomyelitis vaccines, rabies vaccines	J07B
L9	Other vaccines	bacterial and viral vaccines combined	J07C, J07X
ANTINEOPLASTICS AND IMMUNOMODULATING AGENTS			
M0	Antineoplastic or immuno-modulating agent NOS	agent not specified	—
M1	Alkylating agents	cyclophosphamide, melphalan, ifosfamide, busulfan, carmustine	L01A

CCI Qualifier Codes	Agents (Local and Systemic)	Examples	ATC Codes
M2	Antimetabolites	methotrexate, cytarabine, fluorouracil, cladribine	L01B
M3	Plant alkaloids and other natural products	vinblastine, vincristine, etoposide, paclitaxel, docetaxel	L01C
M4	Cytotoxic antibiotics and related substances	doxorubicin, epirubicin, bleomycin, mitoxantrone, mitomycin	L01D
M5	Other antineoplastics	alemtuzumab (Campath), asparaginase, carboplatin, cetuximab, cisplatin, estramustine, ipilimumab, procarbazine, rituximab, trastuzumab	L01X
M6	Endocrine therapy	diethylstilbestrol, megestrol, goserelin, tamoxifen, aminoglutethimide	L02
M7	Immunostimulants	interferon alpha, filgrastim, interferon beta-1B, aldesleukin, BCG	L03
M8	Immunosuppressive agents	cyclosporine, muromonab-CD3, azathioprine, tacrolimus, Remicade, infliximab	L04
M9	Combination [multiple] antineoplastic or immunomodulating agents	CHOP (cyclophosphamide, doxorubicin, vincristine, prednisone) and MVAC (methotrexate, vinblastine, doxorubicin, cisplatin) regimens	L05
MUSCULOSKELETAL SYSTEM AGENTS			
N0	Musculoskeletal system agent NOS	agent not specified	—
N1	Antiinflammatory and antirheumatic agents	NSAIDs (indomethacin, ibuprofen, diclofenac, aurothioglucose, D-penicillamine	M01
N2	Topical products for joint and muscular pain	dimethyl sulfoxide for topical use	M02
N3	Muscle relaxants	pancuronium, rocuronium, methocarbamol, orphenadrine, baclofen, dantrolene	M03
N4	Anti-gout preparations	allopurinol, probenecid, colchicine	M04
N5	Drugs for treatment of bone diseases	pamidronate, etidronate, clodronate	M05
N6	Other drugs for disorders of the musculoskeletal system	chymopapain	M09
NERVOUS SYSTEM AGENTS			
P0	Nervous system agent NOS	agent not specified	—
P1	Anesthetics, general, local	enflurane, thiopental, alfentanil, ketamine, propofolprocaine, lidocaine, bupivacaine, cocaine	N01A, N01B
P2	Analgesics	opioids (morphine, meperidine), acetylsalicylic acid, acetaminophen, ergotamine, sumatriptan	N02
P3	Antiepileptics	phenobarbital, phenytoin, carbamazepine, valproic acid, lamotrigine, gabapentin	N03
P4	Anti-Parkinson drugs	trihexiphenidyl, levodopa, amantadine, bromocriptine, selegiline	N04
P5	Antipsychotics	chlorpromazine, thioridazine, haloperidol, loxapine, risperidone	N05A
P6	Anxiolytics	benzodiazepines (diazepam, lorazepam), meprobamate, buspirone	N05B

CCI Qualifier Codes	Agents (Local and Systemic)	Examples	ATC Codes
P7	Hypnotics and sedatives	barbiturates (secobarbital, pentobarbital), chloral hydrate, benzodiazepines (flurazepam, midazolam), zopiclone	N05C
P8	Psycho-analeptics	antidepressants (desipramine, amoxapine, sertraline), methylphenidate, caffeine	N06
P9	Other nervous system drugs	neostigmine, nicotine	N07
ANTIPARASITIC PRODUCTS, INSECTICIDES AND REPELLENTS			
Q0	Anti-parasitic product, insecticide or repellent NOS	agent not specified	—
Q1	Antiprotozoals	iodoquinol, chloroquine, proguanil, pyrimethamine, atovaquone	P01
Q2	Anthelmintics	praziquantel, mebendazole, piperazine, pyrantel, pyvinium	P02
Q3	Ectoparasiticides, including scabicides, insecticides and repellents	lindane, permethrin, benzyl benzoate	P03
SENSORY ORGAN AGENTS			
Q5	Ophthalmological agents	anti-infectives, antiinflammatory agents, mydriatics, cycloplegics, anesthetics for ophthalmic use	S01
Q6	Otological agents	anti-infectives, antiinflammatory agents, anesthetics for otic use	S02
Q7	Ophthalmological/otological combined preparations	ophthalmological and otological combined preparations	S03
RESPIRATORY SYSTEM AGENTS			
R0	Respiratory system agent NOS	agent not specified	—
R1	Nasal preparations	nasal decongestants, topical and oral systemic; nasal cromoglycate sodium, nasal corticosteroids (budesonide, flunisolide)	R01
R2	Throat preparations	dequalinium, cetylpyridinium, benzocaine, as throat preparations	R02
R3	Anti-asthmatics	salbutamol, fenoterol, budesonide, ipratropium bromide, inhalants or systemic use; theophylline, zafirlukast	R03
R4	Cough and cold preparations	guaifenesin, acetylcysteine, hydrocodone, dextromethorphan	R05
R5	Antihistamines for systemic use	diphenhydramine, cetirizine, cyproheptadine, for systemic use	R06
R6	Other respiratory systemic products	colfosceril, beractant, doxapram	R07
VARIOUS AGENTS			
T1	Allergens	allergen extracts (feather, grass, pollen)	V01
T2	Other therapeutic products	disulfiram, antidotes, deferoxamine, sodium polystyrene sulfonate, ipecac	V03
T3	Diagnostic agents	urine tests, other diagnostic agents (glucose, tuberculin)	V04
T4	General nutrients	protein supplements, infant formulas, milk substitutes	V06
T5	All other non-therapeutic products	plasters, stoma equipment, sensitivity discs	V07
T6	Surgical dressings	—	V20

CCI Qualifier Codes	Agents (Local and Systemic)	Examples	ATC Codes
T9	Pharmacological agent NEC	pharmacological agent not elsewhere classified	—
BLOOD AND BLOOD COMPONENTS			
U1	Red cells	packed, frozen, etc.	—
U2	Plasma	fresh, stored	—
U3	Platelets, single donor	—	—
U4	Platelets, pooled	—	—
U5	Cryoprecipitate	—	—
U6	Leukocytes	lymphocytes, granulocytes	—
U7	Stem cells	—	—
U9	Blood NEC	—	—
GAS AGENTS			
V0	Air or gas NOS	—	—
V3	Air, humidified [mist]	—	—
V4	Carbon dioxide	—	—
V6	Helium	—	—
V7	Nitrous oxide	—	—
V9	Nitrogen	—	—
OTHER AGENTS NEC			
W0	Other synthetic	methyl methacrylate, gelfoam, microspheres, polystyrene, polyvinyl alcohol, contour particles, silk particles, polymer, macroplastique, silicone	—
W1	Augmentation agent NEC	—	—
W2	Collagen	—	—
W3	Fibrin paste/glue	—	—
W4	Glue	—	—
W6	Laminaria	—	—
W8	Teflon	—	—
X1	Bleaching agent	—	—
X2	Cold inducing agent/Cryorefrigerant	—	—
X3	Drying agent	—	—
X4	Dye	—	—
X7	Neurolytic agent[chemocautery]	alcohol, phenol	—
X9	Water	—	—
Z9	Agent NEC	talc	—

Appendix E - New CCI Codes for 2022

This appendix provides a list of the new codes that were added to version 2018. This information should be taken into consideration when trending data from one version to the next.

1.AN.70.JA-AZ	Incision NOS, brain using transcranial focused ultrasonic pulse
1.BB.35.HH-P1	Pharmacotherapy (local), other nerves of head and neck using percutaneous catheter infusion of local anesthetic agent
1.BX.35.HH-P1	Pharmacotherapy (local), peripheral nerves NEC using percutaneous catheter infusion of local anesthetic agent
1.CL.54.LA-FE	Management of internal device, lens of ring (e.g. capsular tension or reform ring) using open approach
1.DF.80.LA	Repair, tympanic membrane using myringoplasty technique without tissue
1.DF.80.LA-XX-A	Repair, tympanic membrane using myringoplasty technique and autograft
1.DF.80.LA-XX-L	Repair, tympanic membrane using myringoplasty technique and xenograft
1.DF.80.LA-XX-Q	Repair, tympanic membrane using myringoplasty technique and combined sources of tissue [e.g. autograft, xenograft, synthetic tissue]
1.DF.80.TP-XX-A	Repair, tympanic membrane using tympanoplasty technique and autograft
1.DF.80.TP-XX-L	Repair, tympanic membrane using tympanoplasty technique and xenograft
1.DF.80.TP-XX-Q	Repair, tympanic membrane using tympanoplasty technique and combined sources of tissue [e.g. autograft, xenograft, synthetic tissue]
1.DG.84.LA	Reconstruction, ossicular chain using open approach
1.DG.84.WJ-PM	Reconstruction, ossicular chain using stapedectomy technique and prosthesis
1.DG.84.WK-PM	Reconstruction, ossicular chain using stapedotomy technique and prosthesis
1.EA.27.JX	Radiation, cranium using focused beam [e.g. gamma knife, cyber knife stereotactic radiosurgery]
1.ET.55.LA-GX	Removal of device, nose of device NEC using open approach
1.FC.80.LA-XX-Q	Repair, soft palate using combined sources of tissue [e.g. graft and flap, combined local and pedicled flap]
1.FC.86.LA-XX-E	Closure of fistula, soft palate using local flap
1.FC.86.LA-XX-G	Closure of fistula, soft palate using pedicled flap [e.g. pharyngeal flap, buccinator myomucosal flap]
1.FC.86.LA-XX-Q	Closure of fistula, soft palate using combined sources of tissue [e.g. graft and flap, combined local and pedicled flap]
1.FF.89.LA	Excision total, root of tooth using open excisional approach (to root)
1.FX.80.LA-XX-G	Repair, oropharynx using open approach and pedicled flap [e.g. pharyngeal flap]
1.HT.80.GP-XX-L	Repair, pulmonary valve percutaneous transluminal approach using xenograft
1.HU.80.GR-XX-L	Repair, mitral valve percutaneous transluminal venous (transcatheter) (transseptal) approach using xenograft
1.HU.80.ST-XX-L	Repair, mitral valve closed heart technique (transapical) (transcatheter) using xenograft
1.HV.80.GQ-XX-L	Repair, aortic valve percutaneous transluminal (transcatheter) arterial approach using xenograft tissue valve [e.g. bovine or porcine tissue]
1.HV.80.GR-XX-L	Repair, aortic valve percutaneous transluminal (transcatheter) (transseptal) venous approach using xenograft tissue valve [e.g. bovine or porcine tissue]
1.HV.80.ST-XX-L	Repair, aortic valve closed heart technique (transapical) (transcatheter) using xenograft tissue valve [e.g. bovine or porcine tissue]
1.ID.79.LA-XX-L	Repair by increasing size, aorta NEC using open approach with xenograft [e.g. bovine]
1.KG.35.HZ-C1	Pharmacotherapy (local), arteries of leg NEC elution from implanted device using antithrombotic agent

1.NA.87.DA	Excision partial, esophagus with anastomosis using endoscopic [thoracic, abdominal] approach
1.NA.87.DA-XX-F	Excision partial, esophagus with interpositional (intestine) flap using endoscopic [thoracic, abdominal] approach
1.NA.87.DA-XX-G	Excision partial, esophagus with gastric pull up using endoscopic [thoracic, abdominal] approach
1.NA.89.DA	Excision total, esophagus using endoscopic [thoracic, abdominal] approach with anastomosis
1.NA.89.DA-XX-F	Excision total, esophagus using endoscopic [thoracic, abdominal] approach with interpositional (intestine) flap
1.NA.89.DA-XX-G	Excision total, esophagus using endoscopic [thoracic, abdominal] approach with gastric pull up
1.NA.91.DA	Excision radical, esophagus using endoscopic [thoracic, abdominal] approach with anastomosis
1.NA.91.DA-XX-F	Excision radical, esophagus using endoscopic [thoracic, abdominal] approach with interpositional (intestine) flap
1.NA.91.DA-XX-G	Excision radical, esophagus using endoscopic [thoracic, abdominal] approach with gastric pull up
1.NF.87.EL	Excision partial, stomach with vagotomy endoscopic [laparoscopic] approach simple apposition technique (without anastomosis)
1.NQ.89.AG	Excision total, rectum combined endoscopic [abdominal] with per orifice approach coloanal anastomosis technique
1.NQ.89.GV-XX-G	Excision total, rectum combined endoscopic [abdominal] with perineal approach pouch formation
1.SA.59.HA-AW	Destruction, atlas and axis using percutaneous (needle) approach with radiofrequency
1.SC.74.HA-KD	Fixation, spinal vertebrae percutaneous approach using wire, staple, button, cabling [alone]
1.SC.74.HA-NW	Fixation, spinal vertebrae percutaneous approach using screw, screw with plate or rod
1.SE.75.DA-SL-A	Fusion, intervertebral disc endoscopic [thoracoscopic, laparoscopic] approach using spacer device and bone autograft
1.SE.75.DA-SL-K	Fusion, intervertebral disc endoscopic [thoracoscopic, laparoscopic] approach using spacer device and bone homograft
1.SE.75.DA-SL-Q	Fusion, intervertebral disc endoscopic [thoracoscopic, laparoscopic] approach using spacer device and combined sources of tissue
1.SE.75.LL-SL-A	Fusion, intervertebral disc open anterior [anterolateral, thoracic] approach using spacer device and bone autograft
1.SE.75.LL-SL-K	Fusion, intervertebral disc open anterior [anterolateral, thoracic] approach using spacer device and bone homograft
1.SE.75.LL-SL-Q	Fusion, intervertebral disc open anterior [anterolateral, thoracic] approach using spacer device and combined sources of tissue
1.SE.75.PF-SL-A	Fusion, intervertebral disc open posterior [posterolateral] approach using spacer device and bone autograft
1.SE.75.PF-SL-K	Fusion, intervertebral disc open posterior [posterolateral] approach using spacer device and bone homograft
1.SE.75.PF-SL-Q	Fusion, intervertebral disc open posterior approach [posterolateral] using spacer device and combined sources of tissue
1.SF.59.HA-AW	Destruction, sacrum and coccyx using percutaneous approach with radiofrequency
1.SK.80.LA-PM	Repair, sternum open approach without tissue (for repair) using prosthetic [silicone] implant
1.SQ.53.LA-PR	Implantation of internal device, pelvis uncemented partial component [e.g. acetabular liner (insert) alone]
1.TA.53.LA-PR	Implantation of internal device, shoulder joint uncemented partial component [e.g. polyethylene liner alone]
1.TH.80.LA-XX-K	Repair, tendons of the arm [around shoulder] open approach using apposition technique [e.g. tendon sutured to tendon] with homograft [e.g. tendon allograft]
1.TH.80.WU-FH-K	Repair, tendons of the arm [around shoulder] open approach using tenodesis with bioabsorbable (binding) device with homograft [e.g. tendon allograft]

1.TM.80.DA-XX-K	Repair, elbow joint endoscopic [arthroscopic] approach using homograft [e.g. donor tendon for ligament repair]
1.TM.80.LA-XX-K	Repair, elbow joint open approach using homograft [e.g. donor tendon for ligament repair]
1.TS.72.DA	Release, tendons of the forearm [around elbow] using endoscopic [arthroscopic] approach
1.VC.58.LA-XX-A	Procurement, femur of [bone] autograft using open approach
1.WX.58.LA-XX-A	Procurement, bone NEC of autograft using open approach
1.YF.87.LA-XX-Q	Excision partial, skin of face open [excisional] approach using combined sources of tissue [e.g. graft and flap]
3.NK.20.VA	Computerized tomography [CT], small intestine without contrast
3.NK.20.WC	Computerized tomography [CT], small intestine with contrast
3.PM.10.XK	Xray, bladder following retrograde injection of contrast using special light source (with or without fluoroscopy)
5.CA.88.CA-I5	Pharmacological termination of pregnancy, oral approach sex hormone and regulator
5.LD.31.CA-I2	Augmentation of labour, using oral administration of uterotonic agent
7.SF.13.QJ	Preparation, service for surgical site marking
7.SZ.94.7A	Emergency use, intervention NEC reason 1
7.SZ.94.7B	Emergency use, intervention NEC reason 2
7.SZ.94.7C	Emergency use, intervention NEC reason 3
7.SZ.94.7D	Emergency use, intervention NEC reason 4
7.SZ.94.7E	Emergency use, intervention NEC reason 5
7.SZ.94.7F	Emergency use, intervention NEC reason 6
7.SZ.94.7G	Emergency use, intervention NEC reason 7
7.SZ.94.7H	Emergency use, intervention NEC reason 8
7.SZ.94.7J	Emergency use, intervention NEC reason 9
7.SZ.94.7K	Emergency use, intervention NEC reason 10
7.SZ.94.7L	Emergency use, intervention NEC reason 11
7.SZ.94.7M	Emergency use, intervention NEC reason 12
7.SZ.94.7N	Emergency use, intervention NEC reason 13
7.SZ.94.7P	Emergency use, intervention NEC reason 14
7.SZ.94.7Q	Emergency use, intervention NEC reason 15
7.SZ.94.7R	Emergency use, intervention NEC reason 16
7.SZ.94.7S	Emergency use, intervention NEC reason 17
7.SZ.94.7T	Emergency use, intervention NEC reason 18
7.SZ.94.7U	Emergency use, intervention NEC reason 19
7.SZ.94.7V	Emergency use, intervention NEC reason 20
8.IM.70.HA-ZZ	Immunization (to prevent) severe acute respiratory syndrome coronavirus 2 [SARS-CoV-2] by intramuscular [IM] injection of agent or substance NEC
8.NZ.70.HZ-CD	Immunization (to prevent growth of) neoplasm by injection targeting (specific) site of chimeric live antigen

Appendix F - Disabled CCI Codes for 2022

This appendix includes a list of all codes that were disabled from version 2018. This information should be taken into consideration when trending data from one version to the next.

1.AN.09.JA-V4	Stimulation, brain using gas stimulation (e.g. carbon dioxide)
1.DF.80.XG	Repair, tympanic membrane without tissue tympanoplasty, type 1
1.DF.80.XG-XX-A	Repair, tympanic membrane using full thickness autograft [e.g. fascia], tympanoplasty type 1
1.DF.80.XG-XX-N	Repair, tympanic membrane using synthetic material, [e.g. ceramic, metal] tympanoplasty type 1
1.DF.80.XG-XX-Q	Repair, tympanic membrane using combined tissue types (e.g. full/split grafts, synthetic material) tympanoplasty type 1
1.DF.80.XH	Repair, tympanic membrane without tissue tympanoplasty type 2 (that with ossicular repair, stapes is present)
1.DF.80.XH-XX-A	Repair, tympanic membrane using full thickness autograft [e.g. fascia], tympanoplasty type 2 (that with ossicular repair, stapes is present)
1.DF.80.XH-XX-K	Repair, tympanic membrane using homograft [e.g. deceased donor ossicles], tympanoplasty type 2 (that with ossicular repair, stapes is present)
1.DF.80.XH-XX-L	Repair, tympanic membrane using xenograft, tympanoplasty type 2 (that with ossicular repair, stapes is present)
1.DF.80.XH-XX-N	Repair, tympanic membrane using synthetic material [e.g. ceramic, metal] tympanoplasty type 2 (that with ossicular repair, stapes is present)
1.DF.80.XH-XX-Q	Repair, tympanic membrane using combined tissue types (e.g. full/split grafts, synthetic material) tympanoplasty type 2 (that with ossicular repair, stapes is present)
1.DF.80.XJ-XX-A	Repair, tympanic membrane using full thickness autograft [e.g. fascia] tympanoplasty type 3 (that with ossicular repair, stapes is absent or severely defective)
1.DF.80.XJ-XX-K	Repair, tympanic membrane using homograft [e.g. deceased donor ossicles], tympanoplasty type 3 (that with ossicular repair, stapes is absent or severely defective)
1.DF.80.XJ-XX-N	Repair, tympanic membrane using synthetic material [e.g. ceramic, metal], tympanoplasty type 3 (that with ossicular repair, stapes is absent or severely defective)
1.DF.80.XJ-XX-Q	Repair, tympanic membrane using combined tissue types (e.g. full/split grafts, synthetic material) tympanoplasty type 3 (that with ossicular repair, stapes is absent or severely defective)
1.DF.80.XK-XX-A	Repair, tympanic membrane using full thickness autograft [e.g. fascia], tympanoplasty type 4
1.DF.80.XK-XX-Q	Repair, tympanic membrane using combined tissue types [e.g. full/split grafts, synthetic material], tympanoplasty type 4
1.DF.80.XL	Repair, tympanic membrane without tissue, tympanoplasty type 5
1.DF.80.XL-XX-A	Repair, tympanic membrane using full thickness autograft [e.g. fascia], tympanoplasty type 5
1.DF.80.XL-XX-Q	Repair, tympanic membrane using combined tissue types [e.g. full/split grafts, synthetic material] tympanoplasty type 5
1.DG.84.LA-AG-A	Reconstruction, ossicular chain using full thickness autograft [e.g. bone, fat, perichondrium] and laser (to vaporize suprastructure or create fenestra)
1.DG.84.LA-AG-K	Reconstruction, ossicular chain using homograft [e.g. donor ossicles] and laser (to vaporize suprastructure or create fenestra)
1.DG.84.LA-AH	Reconstruction, ossicular chain using synthetic prosthesis [e.g. Causse, Robinson, Fisch Mcgee, House] and laser (to vaporize suprastructure or create fenestra)
1.DG.84.LA-AH-A	Reconstruction, ossicular chain using synthetic prosthesis and full thickness autograft [e.g. prosthesis covered with fat] and laser (to vaporize suprastructure or create fenestra)
1.DG.84.LA-PM	Reconstruction, ossicular chain using synthetic prosthesis [e.g. Causse, Robinson, Fisch Mcgee, House], microdrill or device NEC (to fracture or sever stapes)
1.DG.84.LA-PM-A	Reconstruction, ossicular chain using synthetic prosthesis and full thickness autograft [e.g. prosthesis covered with fat], microdrill or device NEC (to fracture or sever stapes)

1.DG.84.LA-XX-A	Reconstruction, ossicular chain using full thickness autograft [e.g. bone, fat, perichondrium], microdrill or device NEC (to fracture or sever stapes)
1.DG.84.LA-XX-K	Reconstruction, ossicular chain using homograft [e.g. donor ossicles], microdrill or device NEC (to fracture or sever stapes)
1.FF.89.LL	Excision total, root of tooth using anterior approach
1.FF.89.PF	Excision total, root of tooth using posterior approach
1.FX.86.ME	Closure, fistula, oropharynx with simple apposition [e.g. suturing] For closure for fistula terminating at digestive tract
1.FX.86.ME-XX-A	Closure, fistula, oropharynx using autograft[e.g. skin, fascia] For fistula terminating at digestive tract
1.FX.86.ME-XX-G	Closure, fistula, oropharynx using pedicled flap[e.g. muscle from neck] For fistula terminating at digestive tract
1.GZ.31.CA-PK	Ventilation, respiratory system NEC invasive per orifice approach by (endotracheal) intubation pneumatic resuscitator (e.g. pneumobelt)
1.GZ.31.JA-MD	Ventilation, respiratory system NEC non-invasive rocking bed
1.GZ.31.JA-PK	Ventilation, respiratory system NEC non-invasive pneumatic resuscitator (e.g. pneumobelt)
1.HT.90.GP-XX-L	Excision total with reconstruction, pulmonary valve using percutaneous transluminal approach with xenograft [e.g. Melody stent valve]
1.HU.90.GR-XX-L	Excision total with reconstruction, mitral valve using percutaneous transluminal (transcatheter) venous (transseptal) approach with xenograft [bovine or porcine valve]
1.HU.90.ST-XX-L	Excision total with reconstruction, mitral valve using closed heart technique (transapical) (transcatheter) with xenograft [bovine or porcine valve]
1.HV.90.GQ-XX-L	Excision total with reconstruction, aortic valve replacement of valve alone with xenograft tissue valve [e.g. bovine or porcine tissue] using percutaneous transluminal (transcatheter) arterial approach
1.HV.90.GR-XX-L	Excision total with reconstruction, aortic valve replacement of valve alone with xenograft tissue valve [e.g. bovine or porcine tissue] using percutaneous transluminal (transcatheter) (transseptal) venous approach
1.HV.90.ST-XX-L	Excision total with reconstruction, aortic valve replacement of valve alone with xenograft tissue valve [e.g. bovine or porcine tissue] using closed heart technique (transapical) (transcatheter)
1.IL.35.HA-1C	Pharmacotherapy (local), vessels of heart percutaneous injection approach of thrombolytic agent
1.IM.35.HA-1C	Pharmacotherapy (local), pulmonary artery percutaneous injection approach using thrombolytic agent
1.JW.35.HA-1C	Pharmacotherapy (local), intracranial vessels, percutaneous injection approach using thrombolytic agent
1.KE.35.HA-1C	Pharmacotherapy (local), abdominal arteries NEC percutaneous injection approach using thrombolytic agent
1.KG.35.HA-1C	Pharmacotherapy (local), arteries of leg NEC, percutaneous injection approach using thrombolytic agent
1.KG.82.GQ-ER	Reattachment, arteries of leg NEC using percutaneous transluminal (arterial) approach and detachable balloon
1.KG.82.GQ-GE	Reattachment, arteries of leg NEC using percutaneous transluminal (arterial) approach and detachable coils
1.KV.35.HA-1C	Pharmacotherapy (local), artery NEC, percutaneous injection approach using thrombolytic agent
1.KX.35.HA-1C	Pharmacotherapy (local), vein NEC, percutaneous injection approach using thrombolytic agent
1.NA.35.BA-X4	Pharmacotherapy (local), esophagus using endoscopic per orifice approach and tattooing dye (for tumor mapping)
1.NA.50.CR-BJ	Dilation, esophagus per orifice approach with incision using flexible dilator
1.NA.87.DB	Excision partial, esophagus with anastomosis using endoscopic abdominal approach [e.g. open cervical with laparoscopic approach]
1.NA.87.DB-XX-F	Excision partial, esophagus with interpositional (intestine) flap using endoscopic abdominal approach [e.g. open cervical with laparoscopic approach]

1.NA.87.DB-XX-G	Excision partial, esophagus with gastric pull up using endoscopic abdominal approach [e.g. open cervical with laparoscopic approach]
1.NA.87.EZ	Excision partial, esophagus with anastomosis using endoscopic thoracic approach [e.g. open cervical with thoracoscopic approach]
1.NA.87.FA	Excision partial, esophagus with anastomosis using combined endoscopic thoracoabdominal approach
1.NA.87.FA-XX-F	Excision partial, esophagus with interpositional (intestine) flap using combined endoscopic thoracoabdominal approach
1.NA.87.FA-XX-G	Excision partial, esophagus with gastric pull up using combined endoscopic thoracoabdominal approach
1.NA.89.DB	Excision total, esophagus using endoscopic abdominal approach with anastomosis
1.NA.89.DB-XX-F	Excision total, esophagus using endoscopic abdominal approach [e.g. open cervical with laparoscopic approach] with interpositional (intestine) flap
1.NA.89.DB-XX-G	Excision total, esophagus using endoscopic abdominal approach [e.g. open cervical with laparoscopic approach] with gastric pull up
1.NA.89.FA	Excision total, esophagus using combined endoscopic thoracoabdominal approach with anastomosis
1.NA.89.FA-XX-F	Excision total, esophagus using combined endoscopic thoracoabdominal approach with interpositional (intestine) flap
1.NA.89.FA-XX-G	Excision total, esophagus using combined endoscopic thoracoabdominal approach with gastric pull up
1.NA.91.DB	Excision radical, esophagus using endoscopic abdominal approach [e.g. open cervical with laparoscopic approach] with anastomosis
1.NA.91.DB-XX-F	Excision radical, esophagus using endoscopic abdominal approach [e.g. open cervical with laparoscopic approach] with interpositional (intestine) flap
1.NA.91.DB-XX-G	Excision radical, esophagus using endoscopic abdominal approach [e.g. open cervical with laparoscopic approach] with gastric pull up
1.NA.91.FA	Excision radical, esophagus using combined endoscopic thoracoabdominal approach with anastomosis
1.NA.91.FA-XX-F	Excision radical, esophagus using combined endoscopic thoracoabdominal approach with interpositional (intestine) flap
1.NA.91.FA-XX-G	Excision radical, esophagus using combined endoscopic thoracoabdominal approach with gastric pull up
1.NF.35.BA-X4	Pharmacotherapy (local), stomach using endoscopic per orifice approach and tattooing dye (for tumor mapping)
1.NK.53.TG-TS	Implantation of internal device, small intestine of feeding tube [jejunal] using open approach and formation of mucous fistula
1.NP.35.BA-X4	Pharmacotherapy (local), small and large intestine using endoscopic per orifice approach and tattooing dye (for tumor mapping)
1.NQ.35.BA-X4	Pharmacotherapy (local), rectum using endoscopic per orifice approach and tattooing dye
1.SA.80.HA-AW	Repair, atlas and axis using percutaneous approach and radiofrequency probe
1.SC.75.ER-GX-L	Fusion, spinal vertebrae endoscopic [thoracoscopic, laparoscopic] anterior approach with xenograft (e.g. Surgibone, Keil bone) using device NEC
1.SC.75.ER-KD-L	Fusion, spinal vertebrae endoscopic [thoracoscopic, laparoscopic] anterior approach with xenograft (e.g. Surgibone, Keil bone) using wire, staple, button, cabling [alone]
1.SC.75.ER-NW-L	Fusion, spinal vertebrae endoscopic [thoracoscopic, laparoscopic] anterior approach with xenograft (e.g. Surgibone, Keil bone) using screw, screw with plate, staple or rod [e.g. TSRH, Zielke, pedicle screw]
1.SC.75.ER-XX-L	Fusion, spinal vertebrae endoscopic [thoracoscopic, laparoscopic] anterior approach with xenograft (e.g. Surgibone, Keil bone) using no device for fusion
1.SC.75.LL-GX-L	Fusion, spinal vertebrae open anterior approach [anterolateral and transoral approaches] with xenograft (e.g. Surgibone, Keil bone) using device NEC

1.SC.75.LL-KD-L	Fusion, spinal vertebrae open anterior approach [anterolateral and transoral approaches] with xenograft (e.g. Surgibone, Keil bone) using wire, staple, button, cabling [alone]
1.SC.75.LL-NW-L	Fusion, spinal vertebrae open anterior approach [anterolateral and transoral approaches] with xenograft (e.g. Surgibone, Keil bone) using screw, screw with plate, staple or rod
1.SC.75.LL-XX-L	Fusion, spinal vertebrae open anterior approach [anterolateral and transoral approaches] with xenograft (e.g. Surgibone, Keil bone) using no device for fusion
1.SC.75.LN-GX-L	Fusion, spinal vertebrae open combined anterior approach and posterior approach [e.g. with hemiepiphysiodesis] with xenograft (e.g. Surgibone, Keil bone) using device NEC
1.SC.75.LN-KD-L	Fusion, spinal vertebrae open combined anterior and posterior approach [e.g. with hemiepiphysiodesis] with xenograft (e.g. Surgibone, Keil bone) using wire, staple, button, cabling [alone]
1.SC.75.LN-NW-L	Fusion, spinal vertebrae open combined anterior and posterior approach [e.g. with hemiepiphysiodesis] with xenograft (e.g. Surgibone, Keil bone) using screw, screw with plate, staple or rod [e.g. TSRH, Zielke, pedicle screw]
1.SC.75.LN-TC-L	Fusion, spinal vertebrae open combined anterior and posterior approach [e.g. with hemiepiphysiodesis] with xenograft (e.g. Surgibone, Keil bone) using rod with hook or wire [e.g. Harrington rod]
1.SC.75.PF-GX-L	Fusion, spinal vertebrae open posterior approach [posterolateral approach] with xenograft (e.g. Surgibone, Keil bone) using device NEC
1.SC.75.PF-KD-L	Fusion, spinal vertebrae, open posterior approach [posterolateral approach] with xenograft (e.g. Surgibone, Keil bone) using wire, staple, button, cabling [alone]
1.SC.75.PF-NW-L	Fusion, spinal vertebrae open posterior approach [posterolateral approach] with xenograft (e.g. Surgibone, Keil bone) using screw, screw with plate, staple or rod [e.g. TSRH, Zielke, pedicle screw]
1.SC.75.PF-TC-L	Fusion, spinal vertebrae open posterior approach [posterolateral approach] with xenograft (e.g. Surgibone, Keil bone) using rod with hook or wire [e.g. Harrington rod]
1.SC.75.PF-XX-L	Fusion, spinal vertebrae open posterior approach [posterolateral approach] with xenograft (e.g. Surgibone, Keil bone) using no device for fusion
1.SC.80.HA-AW	Repair, spinal vertebrae using percutaneous approach and radiofrequency probe
3.JE.10.VY	Xray, carotid artery following intracardiac injection of contrast (with or without fluoroscopy)
5.AC.30.CK-A2	Induction of labour using per orifice (intra vaginal) administration of antacids [e.g. misoprostol]
5.CA.24.CK-A2	Preparation by dilating cervix (for), termination of pregnancy per orifice approach and antacid treatment [e.g. misoprostol]
5.CA.88.AL-A2	Pharmacological termination of pregnancy, combined types of approaches antacid treatment
5.CA.88.CA-A2	Pharmacological termination of pregnancy, oral approach antacid treatment
5.CA.88.CK-A2	Pharmacological termination of pregnancy per orifice [vaginal] approach antacid treatment
5.CA.88.HA-A2	Pharmacological termination of pregnancy, percutaneous approach (e.g. intravenous, injection into intra-amniotic or extra-amniotic sac) antacid treatment
8.FD.70.HB-BC	Immunization (to prevent) COVID-19 (SARS-CoV-2) virus

Appendix G - New CCI Mandatory Reference Values for 2022

This appendix provides a list of the new mandatory reference values introduced for 2022.

Reference Number	Reference Description	Attribute Code	Attribute Description
E84	Mandatory compartments of knee 3	0	Not applicable [i.e. cement spacer, tibial liner (insert) alone]
		1A	Unicompartmental, medial: unicondylar
		1B	Unicompartmental, lateral: unicondylar
		1C	Unicompartmental, unspecified
		2A	Bicompartmental, medial with lateral: bicondylar
		2B	Bicompartmental, medial with patellofemoral: bicondylar
		2C	Bicompartmental, lateral with patellofemoral: bicondylar
		2D	Bicompartmental, unspecified
		3	Tricompartmental, medial with lateral & patellofemoral
LA1	Mandatory long bones 1	B	Bilateral
		L	Left [shaft or NOS]
		LD	Left distal
		LE	Left epiphysis
		LP	Left proximal (trochanter)
		R	Right [shaft or NOS]
		RC	Right epiphysis
		RD	Right distal
		RP	Right proximal (trochanter)
S71	Mandatory Potential Organ Donor Opportunity	0	Not applicable: discharged alive
		V1	Ventilation at time of death or ended less than 3 hours before time of death
		V2	Ventilation ended equal to or greater than 3 hours to less than 6 hours before time of death
		V3	Ventilation ended equal to or greater than 6 hours to less than 24 hours before time of death
		V9	Ventilation ended equal to or greater than 24 hours before time of death

Appendix H - Disabled CCI Mandatory Reference Values for 2022

This appendix provides a list of the disabled mandatory reference values for 2022.

Reference Number	Reference Description	Attribute Code	Attribute Description
None
