## Preface

The Canadian Institute for Health Information (CIHI) collects and analyzes information on health and health care in Canada and makes it publicly available. Canada's federal, provincial and territorial governments created CIHI as a not-for-profit, independent organization dedicated to forging a common approach to Canadian health information. CIHI's goal: to provide timely, accurate and comparable information. CIHI's data and reports inform health policies, support the effective delivery of health services and raise awareness among Canadians of the factors that contribute to good health.

To meet this mandate, CIHI's core functions include the coordination and promotion of national health information standards and health indicators, the development and management of health databases and registries, the funding and facilitation of population health research and analysis, the coordination and development of education sessions and conferences, and the production and dissemination of health information research and analysis.

Any questions or requests regarding this publication or the Regulated Nurse Databases should be directed to:

Program Lead, Health Human Resources  
Canadian Institute for Health Information

## Acknowledgements

The Canadian Institute for Health Information (CIHI) wishes to acknowledge and thank the following individuals for their contribution to *Highlights From the Regulated Nursing Workforce in Canada, 2005*:

- Paul Sajan, Program Lead, CIHI
- Andrea Porter-Chapman, Senior Analyst, CIHI
- Guoliang Xi, Senior Analyst, CIHI
- Josée Vallerand, Senior Analyst, CIHI
- Ryanna Brown, Analyst, CIHI
- Tiffany Semple, Analyst, CIHI
- Luc Turcotte, Analyst, CIHI
- Krystina Lewis, Summer Student, CIHI

CIHI would also like to thank the following associations/colleges/councils, without their effort, commitment and collaboration, a national nurses database could not exist:

- Association of Registered Nurses of Newfoundland and Labrador;
- Association of Registered Nurses of Prince Edward Island;
- College of Registered Nurses of Nova Scotia;
- Nurses Association of New Brunswick / Association des infirmières et infirmiers du Nouveau Brunswick;
- Ordre des infirmières et infirmiers du Québec;
- College of Nurses of Ontario / Ordre des infirmières et infirmiers de l'Ontario;
- College of Registered Nurses of Manitoba;
- Saskatchewan Registered Nurses' Association;
- College & Association of Registered Nurses of Alberta;
- College of Registered Nurses of British Columbia;
- Yukon Registered Nurses Association;
- Registered Nurses Association of the Northwest Territories and Nunavut;
- Council for Licensed Practical Nurses of Newfoundland and Labrador;
- Prince Edward Island Licensed Practical Nurses Registration Board;
- College of Licensed Practical Nurses of Nova Scotia;
- Association of New Brunswick Licensed Practical Nurses / Association des infirmières et infirmiers auxiliaires du Nouveau-Brunswick;
- Ordre des infirmières et infirmiers auxiliaires du Québec;
- College of Nurses of Ontario / Ordre des infirmières et infirmiers de l'Ontario;
- College of Licensed Practical Nurses of Manitoba;
- Saskatchewan Association of Licensed Practical Nurses;
- College of Licensed Practical Nurses of Alberta;
- College of Licensed Practical Nurses of British Columbia;

- Yukon Licensed Practical Nurses, Yukon Government;
- Northwest Territories Licensed Practical Nurses, Department of Health and Social Services, Government of Northwest Territories;
- College of Registered Psychiatric Nurses of Manitoba;
- Registered Psychiatric Nurses Association of Saskatchewan;
- College of Registered Psychiatric Nurses of Alberta;
- College of Registered Psychiatric Nurses of British Columbia;
- Canadian Nurses Association; and
- Health Canada.

Please note that the analyses and conclusions in the present document do not necessarily reflect those of the individuals or organizations mentioned above.

# Introduction

The Health Human Resources team of the Canadian Institute for Health Information (CIHI) is pleased to present *Highlights from the Regulated Nursing Workforce in Canada, 2005*. This document is a companion to the *Workforce Trends of Regulated Nurses in Canada* series of publications.

The *Workforce Trends* series organizes and presents data by nursing profession, with separate publications for each of the licensed practical nurse (LPN), registered nurse (RN) and registered psychiatric nurse (RPN) workforces. This publication, in contrast, organizes and presents data by province or territory.

CIHI developed this new format to better meet the needs of stakeholders who prefer to see information from all the nursing professions in a single jurisdiction. For each province and territory, therefore, CIHI highlights current trends in the nursing workforces and provides separate LPN, RN and RPN profiles.

This document centralizes some of the summary information previously duplicated in each *Workforce Trends* publication and also presents a partial look at the Health Human Resource workforce of Canada's provincial and territorial health regions.

We hope this format proves a useful companion to the *Workforce Trends* publications, and look forward to readers' feedback.

Questions or comments may be directed to:

# The Regulated Nursing Workforce in Canada

The 2005 data year marks the first time CIHI has developed a companion publication to organize nursing data by province and territory. This is also the third time in which CIHI has simultaneously released the latest licensed practical nurse (LPN), registered nurse (RN) and registered psychiatric nurse statistics (RPN).

## National Highlights

### Supply Trends of the Regulated Nursing Workforce

- The number of registrations submitted for nursing practice in Canada (including both employed and unemployed regulated nurses) increased 1.8% from 2004 to 2005, from 339,858 to 345,822. These totals include RN, LPN and RPN registrations.
- From 2004 to 2005, the number of regulated nurses employed in their discipline increased by 2.0%, from 315,121 to 321,590.
- The 2005 regulated nursing workforce included 268,376 RNs representing 77.6% of the total, 72,419 (20.9%) LPNs and 5,027 (1.5%) RPNs.

### Demographic Trends of the Regulated Nursing Workforce

- The proportion of males in the nursing workforce increased from 6.0% in 2004 to 6.1% in 2005. Among the nursing professions, 5.6% of the RN workforce, 6.8% of the LPN workforce and 22.6% of the RPN workforce is male.
- The average age of regulated nurses was 44.7 years in 2005, a slight increase from 44.6 years in 2004.
- The age group of 50–54 years was the largest in 2005, accounting for 17.4% of the entire regulated nursing workforce.

### Education Trends of the Regulated Nursing Workforce

- Foreign-trained nurses accounted for 6.9% (20,787) of the regulated nursing workforce in 2005, a slight increase from 6.7% in 2004. The most common countries of graduation were the Philippines (29.0% of all foreign-trainees), the United Kingdom (20.8%) and the United States (6.6%).
- Educational preparation varies among the three regulated nursing professions. In 2005, 34.0% of the RN workforce had obtained a baccalaureate, master's or doctorate as their highest education in registered nursing.
- For the 2005 nursing workforce, the average age at the time of initial graduation was 24.6 years. This compares to average ages at graduation of 24.2 years for the RN workforce, 26.1 years for the LPN workforce and 25.2 years for the RPN workforce.

## Employment Trends of the Regulated Nursing Workforce

- Excluding “status unknown” figures, the full-time employment rate increased slightly from 53.5% to 53.8% between 2004 and 2005. The part-time employment rate decreased from 34.9% to 33.8%, while the casual employment rate increased from 11.6% to 12.4%.
- The proportion of the nursing workforce with multiple employers increased from 12.8% in 2004 to 14.1% in 2005.
- From 2004 to 2005, the proportion of the nursing workforce in the hospital sector decreased from 60.6% to 59.9%, while the proportion in the nursing home/long-term care sector increased to 17.4% and the proportion in the community health sector decreased slightly from 12.4% to 12.3%. These trends were not consistent for all three regulated nursing professions.
- In 2005, 6.1% of the regulated nursing workforce were employed as managers. This includes 7.2% of the RN workforce, 1.3% of the LPN workforce and 12.2% of the RPN workforce.

## Mobility Trends of the Regulated Nursing Workforce

- Excluding nurses who did not state their “Location of Graduation,” 93.1% of regulated nurses employed in Canada in 2005 graduated from a Canadian nursing program and 6.9% graduated from a foreign program.
- The regulated nursing workforces of British Columbia (13.5%) and Ontario (10.1%) had the highest concentration of foreign-trained regulated nurses in 2005.
- Amongst the provinces, British Columbia (26.2%), Alberta (23.8%) and Prince Edward Island (24.4%) had the highest proportion of Canadian graduates from other provinces. Between foreign graduates and graduates from other Canadian jurisdictions, almost 40% (39.6%) of British Columbia’s regulated nursing workforce did not graduate in British Columbia.

## Notes for Canada Nursing Workforce Profile

- <0.1 value is less than 0.05%; value is replaced to prevent displaying cells of 0.0 that are not true zero values.
- Data include all nurses (registered nurses, licensed practical nurses and registered psychiatric nurses) employed in nursing discipline at the time of annual registration. Nurses not employed in nursing discipline and nurses failing to state their employment status are excluded from the data.
- RN data does not include nurse practitioners (NPs) registered in the provinces of New Brunswick and Saskatchewan; information on NPs registered in New Brunswick and Saskatchewan are reported in the CIHI report *The Regulation and Supply of Nurse Practitioners in Canada: 2006 Update*.
- RN data from the Yukon, Northwest Territories and Nunavut include interprovincial duplicates employed in nursing.
- For 2005, *Multiple Employment Status* for all RNs in the Northwest Territories and Nunavut was defaulted to "Not Stated."
- In 2005, British Columbia defaulted all RPNs to "Employed—Status Unknown."
- Quebec does not submit LPN data for *Location of Graduation*.
- The *Employment Status* of all RNs of the Northwest Territories and Nunavut in 2005 was defaulted to "Employed—Status Unknown."
- Northwest Territories and Nunavut RN data are combined for 2005.
- Nunavut LPN data is excluded from the Canada total.
- LPN Newfoundland and Labrador *Location of Graduation* data is currently under review by CIHI and CLPNNL; data may be revised in future publications.
- Totals may not sum to 100 percent due to rounding.
- Statistics released by CIHI will differ from statistics released by provincial/territorial regulatory authorities due to CIHI's collection, processing and reporting methodologies. Additional methodological information is available upon request to [nursing@cihi.ca](mailto:nursing@cihi.ca).

## Provincial and Territorial Highlights

This section highlights the nursing workforce in each of Canada's provinces and territories. The unique composition of each province and territory's workforce becomes evident through the analysis presented here.

Included in this section are:

- Provincial and territorial nursing workforce highlights;
- Provincial and territorial nursing workforce profiles;
- Maps illustrating designated health regions; and
- An analysis of the nursing workforce, employed in direct care, per 100,000 population by provincial and territorial health region.

Provincial and territorial analysis by health region has been integrated into this CIHI publication as a result of increasing demand for health information at a regional level.

"Health regions are legislated administrative areas defined by provincial ministries of health. These administrative areas represent geographic areas of responsibility for hospital boards or regional health authorities. Health regions, being provincial administrative areas, are subject to change." (Statistics Canada, 2005)

The health regions boundaries presented in this publication are those defined in the Statistics Canada report *Health Regions: Boundaries and Correspondence with Census Geography* (2006).

## **Newfoundland and Labrador**

### **Provincial Highlights**

- The number of registrations submitted for nursing practice in Newfoundland and Labrador (including both employed and unemployed regulated nurses) increased slightly (0.8%) since 2004 from 8,252 to 8,315. These totals include registered nurse and licensed practical nurse registrations.
- From 2004 to 2005, the number of regulated nurses employed in their discipline increased slightly (0.4%) from 8,162 to 8,192.
- The average age of regulated nurses in Newfoundland and Labrador was 42.7 years in 2005; this is an increase from 41.9 years in 2003.
- The number of full-time regulated nurses in Newfoundland and Labrador decreased from 66.9% to 65.4% since 2004 (this does not include nurses with employment status unknown).
- Of the registered nurses employed in Newfoundland and Labrador, the percentage of foreign-trained registered nurses remained the same as in 2004 at 1.9%. Of the Canadian-trained registered nurses, over 95.2% were educated in Newfoundland and Labrador, 2.0% in Ontario and 1.4% in Nova Scotia.
- Of the 7,184 graduates of Newfoundland and Labrador registered nursing programs employed in Canada in 2005, 70.9% were employed in Newfoundland and Labrador. An additional 8.7% were employed in Ontario, 6.7% in Nova Scotia and 6.2% in Alberta.

- *Outside of Jurisdiction* includes nurses with a postal code located outside of the province or territory of analysis.
- The Canada *All Nurse* counts include Registered Nurses (251,675), Licensed Practical Nurses (64,951) and Registered Psychiatric Nurses (4,964).
- Data include all nurses (registered nurses and licensed practical nurses) employed in nursing discipline at the time of annual registration. Nurses not employed in nursing discipline and nurses failing to state their employment status are excluded from the data.
- Statistics released by CIHI will differ from statistics released by provincial/territorial regulatory authorities due to CIHI's collection, processing and reporting methodologies.
- The sum of the population estimates by health regions is different than the provincial total due to Statistics Canada methodology of reporting the data.
- Additional methodological information is available upon request to [nursing@cihi.ca](mailto:nursing@cihi.ca).

## Prince Edward Island

### Provincial Highlights

- The number of registrations submitted for nursing practice in Prince Edward Island (including both employed and unemployed regulated nurses) increased 3.2% since 2004. These totals include registered nurse and licensed practical nurse registrations; and do not include nurse practitioners.
- From 2004 to 2005, the number of regulated nurses employed in their discipline increased by 2.2%, from 2,005 to 2,049.
- The average age of regulated nurses in Prince Edward Island was 45.4 years in 2005; this is an increase from 44.6 years in 2003.
- The number of full-time regulated nurses in Prince Edward Island increased slightly from 49.2% to 49.8% since 2004 (this does not include nurses with employment status unknown).
- Of the regulated nurses employed in Prince Edward Island, the percentage of foreign-trained regulated nurses increased slightly from 1.6% in 2004 to 1.7% in 2005. Of the Canadian-trained regulated nurses, over 75.2% were educated in Prince Edward Island, 8.4% in Nova Scotia and 6.5% in New Brunswick.
- Of the 1,944 graduates of Prince Edward Island nursing programs employed in Canada in 2005, 77.8% were employed in Prince Edward Island. An additional 6.6% were employed in Nova Scotia, 5.0% in Ontario and 4.0% Alberta.

## New Brunswick

### Provincial Highlights

- The number of registrations submitted for nursing practice in New Brunswick (including both employed and unemployed regulated nurses) increased 1.3% since 2004, from 10,535 to 10,674. These totals include registered nurse and licensed practical nurse registrations and do not include nurse practitioners.
- From 2004 to 2005, the number of regulated nurses employed in their discipline increased by 2.2% from 9,917 to 10,140.
- The average age of regulated nurses in New Brunswick was 43.6 years in 2005; this is an increase from 43.3 years in 2003.
- The number of full-time regulated nurses in New Brunswick Island increased from 59.7% to 60.1% since 2004 (this does not include nurses with employment status unknown).
- Of the regulated nurses employed in New Brunswick, the percentage of foreign-trained regulated nurses decreased slightly from 1.1% in 2004 to 0.9% in 2005. Of the Canadian-trained regulated nurses, over 88.1% were educated in New Brunswick, 3.5% in Nova Scotia and 3.4% in Quebec.
- Of the 10,954 graduates of New Brunswick nursing programs employed in Canada in 2005, 80.8% were employed in New Brunswick. An additional 5.5% were employed in Ontario, 4.4% in Nova Scotia and 3.2% in Quebec.

## Quebec

### Provincial Highlights

- The number of registrations submitted for nursing practice in Quebec (including both employed and unemployed regulated nurses) increased 1.5% since 2004, from 81,928 to 83,159. These totals include registered nurse, and licensed practical nurse registrations.
- From 2004 to 2005, the number of regulated nurses employed in their discipline increased by 1.5%, from 78,927 to 80,120.
- The average age of regulated nurses in Quebec was 43.5 years in 2005; this is a slight decrease from 43.6 years in 2003.
- The number of full-time regulated nurses in Quebec decreased slightly from 51.7% in 2004 to 51.6% in 2005 (this does not include nurses with employment status unknown). When nurses with an unknown employment status are included in the number of full-time nurses, we see a slight increase from 49.2% in 2004 to 50.0% in 2005.
- Of the regulated nurses employed in Quebec, the percentage of foreign-trained regulated nurses decreased from 2.5% in 2004 to 2.4% in 2005 (foreign-trained data for licensed practical nurse registrations is not submitted to CIHI). Of the Canadian-trained regulated nurses, 98.2% were educated in Quebec, 1.0% in Ontario and 0.6% in New Brunswick.
- Of the 65,473 graduates of Quebec nursing programs employed in Canada in 2005, 93.5% were employed in Quebec. An additional 4.3% were employed in Ontario, 1.0% in British Columbia and 0.5% in New Brunswick.

## Notes for Quebec Nursing Workforce Profile

- - Data are not applicable or do not exist.
- n/s Data not submitted to CIHI.
- <0.1 value is less than 0.05%; value is replaced to prevent displaying cells of 0.0 that are not true zero values.
- Data include all nurses (registered nurses and licensed practical nurses) employed in nursing discipline at the time of annual registration. Nurses not employed in nursing discipline and nurses failing to state their employment status are excluded from the data.
- Quebec data for 2005 includes RNs licensed with temporary permits.
- Totals may not sum to 100 percent due to rounding.
- Statistics released by CIHI will differ from statistics released by provincial/territorial regulatory authorities due to CIHI's collection, processing and reporting methodologies.
- Additional methodological information is available upon request to [nursing@cihi.ca](mailto:nursing@cihi.ca).

## Notes for Quebec—Nursing Workforce by Health Region

- \* Value suppressed in accordance with CIHI privacy policy; cell value is from 1 to 4.
- \*\* Value suppressed to ensure confidentiality; cell value is 5 or greater.
- *Outside of Jurisdiction* includes nurses with a postal code outside of the province or territory of analysis.
- The Canada *All Nurse* counts include Registered Nurses (251,675), Licensed Practical Nurses (64,951) and Registered Psychiatric Nurses (4,964).
- Data include all nurses (registered nurses and licensed practical nurses) employed in nursing discipline at the time of annual registration. Nurses not employed in nursing discipline and nurses failing to state their employment status are excluded from the data.
- The Ordre des infirmières et infirmiers auxiliaires du Québec (OIIQ) does not submit postal code information to CIHI. As such, data presented here was contributed to CIHI by the OIIQ.
- Statistics released by CIHI will differ from statistics released by provincial/territorial regulatory authorities due to CIHI's collection, processing and reporting methodologies.
- The sum of the population estimates by health regions is different than the provincial total due to Statistics Canada methodology of reporting the data.
- Additional methodological information is available upon request to [nursing@cihi.ca](mailto:nursing@cihi.ca).

## Ontario

### Provincial Highlights

- The number of registrations submitted for nursing practice in Ontario (including both employed and unemployed regulated nurses) increased by 2.1% from 2004 to 2005, from 128,317 to 131,015. These totals include registered nurse and licensed practical nurse registrations.
- From 2004 to 2005, the number of regulated nurses employed in their discipline increased by 3.0%, from 110,566 to 113,887.
- The average age of regulated nurses in Ontario was 45.2 years in 2005; this is an increase from 44.9 years in 2003.
- The number of full-time regulated nurses in Ontario increased from 58.0% to 59.0% since 2004 (this does not include nurses with employment status unknown).
- Of the regulated nurses employed in Ontario, the percentage of foreign-trained regulated nurses increased slightly from 9.6% in 2004 to 10.1% in 2005. Of the Canadian-trained regulated nurses, 92.9% were educated in Ontario, 2.8% in Quebec and 0.9% in Nova Scotia.
- Of the 102,437 graduates of Ontario nursing programs employed in Canada in 2005, 92.6% were employed in Ontario. An additional 2.8% were employed in British Columbia, 2.0% in Alberta and 0.6% in Quebec.

## Notes for Ontario Nursing Workforce Profile

- - Data are not applicable or do not exist.
- Data include all nurses (registered nurses and licensed practical nurses) employed in nursing discipline at the time of annual registration. Nurses not employed in nursing discipline and nurses failing to state their employment status are excluded from the data.
- Please review the notes for Ontario the Comparability section of *Workforce Trends of Registered Nurses in Canada, 2005* and *Workforce Trends of Licensed Practical Nurses in Canada, 2005* for information on the comparability of Ontario LPNDB and RNDB data.
- Totals may not sum to 100 percent due to rounding.
- Statistics released by CIHI will differ from statistics released by provincial/territorial regulatory authorities due to CIHI's collection, processing and reporting methodologies.
- Additional methodological information is available upon request to [nursing@cihi.ca](mailto:nursing@cihi.ca).

## Notes for Ontario—Nursing Workforce by Health Region

- *Outside of Jurisdiction* includes nurses with a postal code outside of the province or territory of analysis.
- The Canada *All Nurse* counts include Registered Nurses (251,675), Licensed Practical Nurses (64,951) and Registered Psychiatric Nurses (4,964).
- Data include all nurses (registered nurses and licensed practical nurses) employed in nursing discipline at the time of annual registration. Nurses not employed in nursing discipline and nurses failing to state their employment status are excluded from the data.
- Statistics released by CIHI will differ from statistics released by provincial/territorial regulatory authorities due to CIHI's collection, processing and reporting methodologies.
- The sum of the population estimates by health regions is different than the provincial total due to Statistics Canada methodology of reporting the data.
- The analysis of Ontario health regions using the Local Health Integration Network (LHIN) is available on the Nursing website ([www.cihi.ca/nurses](http://www.cihi.ca/nurses)) but does not include a breakdown by peer group.
- Additional methodological information is available upon request to [nursing@cihi.ca](mailto:nursing@cihi.ca).

## **Manitoba**

### **Provincial Highlights**

- The number of registrations submitted for nursing practice in Manitoba (including both employed and unemployed regulated nurses) increased by 2.3% from 2004 to 2005, from 14,533 to 14,863. These totals include registered nurse, licensed practical nurse and registered psychiatric nurse registrations.
- From 2004 to 2005, the number of regulated nurses employed in their discipline increased by 5.7%, from 14,006 to 14,805.
- The average age of regulated nurses in Manitoba was 45.3 years in 2005; this is a slight increase from 44.9 years in 2003.
- The number of full-time regulated nurses in Manitoba increased slightly from 46.1% to 46.8% since 2004 (this does not include nurses with employment status unknown).
- Of the regulated nurses employed in Manitoba, the percentage of foreign-trained regulated nurses increased slightly from 5.3% in 2004 to 5.8% in 2005. Of the Canadian-trained regulated nurses, over 90% (90.7) were educated in Manitoba, 3.8% in Ontario and 2.0% in Saskatchewan.
- Of the 16,400 graduates of Manitoba nursing programs employed in Canada in 2005, 77.1% were employed in Manitoba. An additional 7.5% were employed in British Columbia, 7.1% in Alberta and 4.2% in Ontario.

## Notes for Manitoba Nursing Workforce Profile

- Data include all nurses (registered nurses, licensed practical nurses and registered psychiatric nurses) employed in nursing discipline at the time of annual registration. Nurses not employed in nursing discipline and nurses failing to state their employment status are excluded from the data.
- Totals may not sum to 100 percent due to rounding.
- Statistics released by CIHI will differ from statistics released by provincial/territorial regulatory authorities due to CIHI's collection, processing and reporting methodologies.
- Additional methodological information is available upon request to [nursing@cihi.ca](mailto:nursing@cihi.ca).

## Notes for Manitoba—Nursing Workforce by Health Region

- \* Value suppressed in accordance with CIHI privacy policy; cell value is from 1 to 4.
- \*\* Value suppressed to ensure confidentiality; cell value is 5 or greater.
- *Outside of Jurisdiction* includes nurses with a postal code outside of the province or territory of analysis.
- The Canada Registered Psychiatric Nurse (RPN) "Per 100,000 Population" rate was calculated using the population estimate for Canada; this reflects a low rate as RPNs are educated and registered as a separate nursing profession in Manitoba, Saskatchewan, Alberta and British Columbia only. Calculating the per 100,000 population rate using only the Western provinces results in a value of 52.
- Data include all nurses (registered nurses, licensed practical nurses and registered psychiatric nurses) employed in nursing discipline at the time of annual registration. Nurses not employed in nursing discipline and nurses failing to state their employment status are excluded from the data.
- Statistics released by CIHI will differ from statistics released by provincial/territorial regulatory authorities due to CIHI's collection, processing and reporting methodologies.
- The sum of the population estimates by health regions is different than the provincial total due to Statistics Canada methodology of reporting the data.
- Additional methodological information is available upon request to [nursing@cihi.ca](mailto:nursing@cihi.ca).

## Saskatchewan

### Provincial Highlights

- The number of registrations submitted for nursing practice in Saskatchewan (including both employed and unemployed regulated nurses) increased by 1.0% from 2004 to 2005, from 11,741 to 11,857. These totals include registered nurse, licensed practical nurse and registered psychiatric nurse registrations.
- From 2004 to 2005, the number of regulated nurses employed in their discipline increased by 1.1%, from 11,565 to 11,676.
- The average age of regulated nurses in Saskatchewan was 45.4 years in 2005; this is an increase from 44.7 years in 2003.
- The number of full-time regulated nurses in Saskatchewan decreased slightly from 56.0% to 55.6% since 2004 (this does not include nurses with employment status unknown).
- Of the regulated nurses employed in Saskatchewan, the percentage of foreign-trained regulated nurses decreased slightly from 2.6% in 2004 to 2.4% in 2005. Of the Canadian-trained regulated nurses, 85.3% were educated in Saskatchewan, 6.5% in Alberta and 4.0% in Manitoba.
- Of the 13,637 graduates of Saskatchewan nursing programs employed in Canada in 2005, 70.6% were employed in Saskatchewan. An additional 15.7% were employed in Alberta, 8.2% in British Columbia and 2.4% in Ontario.

## Alberta

### Provincial Highlights

- The number of registrations submitted for nursing practice in Alberta (including both employed and unemployed regulated nurses) increased by 3.5% from 2004 to 2005, from 32,735 to 33,897. These totals include registered nurse, licensed practical nurse and registered psychiatric nurse registrations.
- From 2004 to 2005, the number of regulated nurses employed in their discipline increased by 3.2%, from 31,774 to 32,793.
- The average age of regulated nurses in Alberta was 44.6 years in 2005; slightly lower than in 2003 (44.7).
- The number of full-time regulated nurses in Alberta decreased slightly from 40.6% to 40.2% since 2004 (this does not include nurses with employment status unknown).
- Of the regulated nurses employed in Alberta the percentage of foreign-trained regulated nurses increased from 4.3% in 2004 to 4.4% in 2005. Of the Canadian-trained regulated nurses, 73.7% were educated in Alberta, 7.2% in Saskatchewan and 6.8% in Ontario.
- Of the 26,300 graduates of Alberta nursing programs employed in Canada in 2005, 83.3% were employed in Alberta. An additional 9.6% were employed in British Columbia, 2.8% in Saskatchewan and 2.4% in Ontario.

## Notes for Alberta Nursing Workforce Profile

- <0.1 value is less than 0.05%; value is replaced to prevent displaying cells of 0.0 that are not true zero values.
- Data include all nurses (registered nurses, licensed practical nurses and registered psychiatric nurses) employed in nursing discipline at the time of annual registration. Nurses not employed in nursing discipline and nurses failing to state their employment status are excluded from the data.
- Totals may not sum to 100 percent due to rounding.
- Statistics released by CIHI will differ from statistics released by provincial/territorial regulatory authorities due to CIHI's collection, processing and reporting methodologies.
- Additional methodological information is available upon request to [nursing@cihi.ca](mailto:nursing@cihi.ca).

## Notes for Alberta—Nursing Workforce by Health Region

- \* Value suppressed in accordance with CIHI privacy policy; cell value is from 1 to 4.
- \*\* Value suppressed to ensure confidentiality; cell value is 5 or greater.
- *Outside of Jurisdiction* includes nurses with a postal code outside of the province or territory of analysis.
- The Canada Registered Psychiatric Nurse (RPN) "Per 100,000 Population" rate was calculated using the population estimate for Canada; this reflects a low rate as RPNs are educated and registered as a separate nursing profession in Manitoba, Saskatchewan, Alberta and British Columbia only. Calculating the per 100,000 population rate using only the Western provinces results in a value of 52.
- Data include all nurses (registered nurses, licensed practical nurses and registered psychiatric nurses) employed in nursing discipline at the time of annual registration. Nurses not employed in nursing discipline and nurses failing to state their employment status are excluded from the data.
- Statistics released by CIHI will differ from statistics released by provincial/territorial regulatory authorities due to CIHI's collection, processing and reporting methodologies.
- The sum of the population estimates by health regions is different than the provincial total due to Statistics Canada methodology of reporting the data.
- Additional methodological information is available upon request to [nursing@cihi.ca](mailto:nursing@cihi.ca).

## British Columbia

### Provincial Highlights

- The number of registrations submitted for nursing practice in British Columbia (including both employed and unemployed regulated nurses) decreased by 0.1% from 2004 to 2005, from 36,312 to 36,271. These totals include registered nurse, licensed practical nurse and registered psychiatric nurse registrations.
- From 2004 to 2005, the number of regulated nurses employed in their discipline decreased by 1.6%, from 35,200 to 34,652.
- The average age of regulated nurses in British Columbia was 46.0 years in 2005; this is a slight increase from 45.7 years in 2003.
- The number of full-time regulated nurses in British Columbia decreased from 52.3% to 50.2% since 2004 (this does not include nurses with employment status unknown).
- Of the regulated nurses employed in British Columbia the percentage of foreign-trained regulated nurses increased slightly from 13.4% in 2004 to 13.5% in 2005. Of the Canadian-trained regulated nurses, 69.5% were educated in British Columbia, 9.5% in Ontario and 8.5% in Alberta.
- Of the 22,578 graduates of British Columbia nursing programs employed in Canada in 2005, 91.6% were employed in British Columbia. An additional 4.5% were employed in Alberta and 1.9% in Ontario.

## Notes for British Columbia Nursing Workforce Profile

- <0.1 value is less than 0.05%; value is replaced to prevent displaying cells of 0.0 that are not true zero values.
- Δ British Columbia defaulted all RPNs to “Employed—Status Unknown.”
- Data include all nurses (registered nurses, licensed practical nurses and registered psychiatric nurses) employed in nursing discipline at the time of annual registration. Nurses not employed in nursing discipline and nurses failing to state their employment status are excluded from the data.
- Totals may not sum to 100 percent due to rounding.
- Statistics released by CIHI will differ from statistics released by provincial/territorial regulatory authorities due to CIHI’s collection, processing and reporting methodologies.
- Additional methodological information is available upon request to [nursing@cihi.ca](mailto:nursing@cihi.ca).

## Notes for British Columbia—Nursing Workforce by Health Region

- *Outside of Jurisdiction* includes nurses with a postal code outside of the province or territory of analysis.
- The Canada Registered Psychiatric Nurse (RPN) “Per 100,000 Population” rate was calculated using the population estimate for Canada; this reflects a low rate as RPNs are educated and registered as a separate nursing profession in Manitoba, Saskatchewan, Alberta and British Columbia only. Calculating the per 100,000 population rate using only the Western provinces results in a value of 52.
- Data include all nurses (registered nurses, licensed practical nurses and registered psychiatric nurses) employed in nursing discipline at the time of annual registration. Nurses not employed in nursing discipline and nurses failing to state their employment status are excluded from the data.
- Statistics released by CIHI will differ from statistics released by provincial/territorial regulatory authorities due to CIHI’s collection, processing and reporting methodologies.
- The sum of the population estimates by health regions is different than the provincial total due to Statistics Canada methodology of reporting the data.
- Additional methodological information is available upon request to [nursing@cihi.ca](mailto:nursing@cihi.ca).

## Northern Territories

### Yukon

#### *Yukon Territory Highlights*

- The number of registrations submitted for nursing practice in the Yukon Territory (including both employed and unemployed regulated nurses) increased by 5.2% from 2004 to 2005. These totals include registered nurse and licensed practical nurse registrations.
- From 2004 to 2005, the number of regulated nurses employed in their discipline increased by 6.5%, from 336 to 358.
- The average age of regulated nurses in the Yukon was 45.1 years in 2005; this is a slight increase from 44.4 years in 2003.
- The number of full-time regulated nurses in the Yukon increased slightly from 47.9% to 48.5% since 2004 (this does not include nurses with employment status unknown).
- Of the regulated nurses employed in the Yukon the percentage of foreign-trained regulated nurses increased slightly from 6.5% in 2004 to 6.7% in 2005. Of the Canadian-trained regulated nurses, 11.1% were educated in the Yukon, 29.0% in Ontario and 17.7% in Alberta.
- Of the 66 graduates of Yukon nursing programs employed in Canada in 2005, 56.1% were employed in the Yukon. An additional 24.2% were employed in British Columbia, 6.1% in Ontario and 6.1% in Saskatchewan.

## Northwest Territories and Nunavut

### *Northwest Territories and Nunavut Highlights*

- The number of registrations submitted for nursing practice in the Northwest Territories and Nunavut increased by 2.5% from 2004 to 2005. These totals include registered nurse and licensed practical nurse registrations (including both employed and unemployed regulated nurses).
- From 2004 to 2005, the number of regulated nurses employed in their discipline increased by 3.6%, from 1,021 to 1,058.
- The average age of regulated nurses in Northwest Territories and Nunavut was 43.8 years in 2005; this is a slight decrease from 44.3 years in 2003.
- The number of full-time regulated nurses in Northwest Territories and Nunavut decreased slightly from 79.1% to 78.2% since 2004 (this does not include nurses with employment status unknown).
- Of the regulated nurses employed in Northwest Territories and Nunavut the percentage of foreign-trained regulated nurses decreased from 9.7% in 2004 to 8.6% in 2005. Of the Canadian-trained regulated nurses, 10.6% were educated in the Northwest Territories, 23.1% in Ontario and 12.0% in Alberta.
- Of the 144 graduates of Northwest Territories nursing programs employed in Canada in 2005, 71.5% were employed in either the Northwest Territories or Nunavut. An additional 10.4% were employed in Alberta, 4.8% in Saskatchewan and 4.1% in Ontario.

## Notes for Yukon Territory Nursing Workforce Profile

- \* Value suppressed in accordance with CIHI privacy policy; cell value is from 1 to 4.
- \*\* Value suppressed to ensure confidentiality; cell value is 5 or greater.
- n/s Data not submitted to CIHI.
- - Data are not applicable or do not exist.
- Data include all nurses (registered nurses and licensed practical nurses) employed in nursing discipline at the time of annual registration. Nurses not employed in nursing discipline and nurses failing to state their employment status are excluded from the data.
- RN Data from the Yukon Territory include interprovincial duplicates employed in nursing.
- Totals may not sum to 100 percent due to rounding.
- Statistics released by CIHI will differ from statistics released by provincial/territorial regulatory authorities due to CIHI's collection, processing and reporting methodologies.
- Additional methodological information is available upon request to [nursing@cihi.ca](mailto:nursing@cihi.ca).

## Notes for Northwest Territories and Nunavut Nursing Workforce Profile

- ‡ In 2005, *Employment Status* of all RNs of the Northwest Territories/Nunavut was defaulted to "Status Unknown."
- ‡‡ In 2005, *Multiple Employment Status* for all RNs in the Northwest Territories/Nunavut was defaulted to "Not Stated."
- \* Value suppressed in accordance with CIHI privacy policy; cell value is from 1 to 4.
- \*\* Value suppressed to ensure confidentiality; cell value is 5 or greater.
- n/s Data not submitted to CIHI.
- - Data are not applicable or do not exist.
- Data include all nurses (registered nurses and licensed practical nurses) employed in nursing discipline at the time of annual registration. Nurses not employed in nursing discipline and nurses failing to state their employment status are excluded from the data. RN Data from the Northwest Territories and Nunavut include interprovincial duplicates employed in nursing. LPN data does not include Nunavut.
- Totals may not sum to 100 percent due to rounding.
- Statistics released by CIHI will differ from statistics released by provincial/territorial regulatory authorities due to CIHI's collection, processing and reporting methodologies.
- Additional methodological information is available upon request to [nursing@cihi.ca](mailto:nursing@cihi.ca).

**Notes Northern Territories—Nursing Workforce by Health Region**

- \* Value suppressed in accordance with CIHI privacy policy; cell value is from 1 to 4.
- \*\* Value suppressed to ensure confidentiality; cell value is 5 or greater.
- *Outside of Jurisdiction* includes nurses with a postal code outside of the province or territory of analysis.
- The Canada *All Nurse* counts include Registered Nurses (251,675), Licensed Practical Nurses (64,951) and Registered Psychiatric Nurses (4,964).
- Data include all nurses (registered nurses and licensed practical nurses) employed in nursing discipline at the time of annual registration. Nurses not employed in nursing discipline and nurses failing to state their employment status are excluded from the data.
- Statistics released by CIHI will differ from statistics released by provincial/territorial regulatory authorities due to CIHI's collection, processing and reporting methodologies.
- The sum of the population estimates by health regions is different than the provincial total due to Statistics Canada methodology of reporting the data.
- Additional methodological information is available upon request to [nursing@cihi.ca](mailto:nursing@cihi.ca).

## Methodological Notes

The following information should be used to ensure a clear understanding of the basic concepts that define the data provided in this publication, of the underlying methodology of the data collection, and of key aspects of the data quality.

This information will provide a better understanding of the strengths and limitations of the data, and of how they can be effectively used and analyzed. The information is of particular importance when making comparisons with other data sources, and especially when drawing conclusions regarding changes over time.

The Canadian Institute for Health Information is founded upon the principles of data quality and privacy and confidentiality. Data collection, processing, analysis and dissemination are each guided by CIHI's commitment to ensuring good quality data in a privacy-sensitive manner. Further details regarding CIHI's privacy principles are available in the document *Privacy and Confidentiality of Health Information at CIHI: Principles and Policies for the Protection of Health Information*, which may be obtained from the CIHI website.

The accompanying publications,

- *Workforce Trends of Licensed Practical Nurses in Canada, 2005;*
- *Workforce Trends of Registered Nurses in Canada, 2005; and*
- *Workforce Trends of Registered Psychiatric Nurses in Canada, 2005.*

include a comprehensive methodological notes section that provide more detailed information on data coverage, data collection, analytical methods, data quality assessment, comparability and data limitations.

## General Notes

### Provincial and Territorial Health Regions

The health regions boundaries presented in this publication are those defined in the Statistics Canada report *Health Regions: Boundaries and Correspondence with Census Geography* (2006).

"Health regions are legislated administrative areas defined by provincial ministries of health. These administrative areas represent geographic areas of responsibility for hospital boards or regional health authorities. Health regions, being provincial administrative areas, are subject to change." (Statistics Canada, 2005)

## Analytical Methods

### *Exclusion of Nurses in Administration, Education and/or Research*

The health region data presented in this publication include only those nurses who work in direct patient care; those employed in *administration, education and/or research* are excluded from the health region totals.

This method was developed after initial data analyses found high concentrations of nursing professionals in mid-sized regions with teaching hospitals and/or post-secondary institutions. The exclusion of those nursing professionals working outside of direct patient care provides a more accurate measurement for comparison. This method was applied to all health regions.

The result is a nursing workforce total of 281,418 in the health region data, compared to a total of 321,590 in the highlights section of the publication. The health region data represent 87.5% of the total.

### *Assigning the Nursing Workforce to Health Regions*

CIHI used postal code data and Statistics Canada's *Postal Code Conversion File Plus* (PCCF+) to assign the nursing workforce to health regions.

The six digit postal code of worksite was used first; where this postal code was missing or invalid, the six digit postal code of residence was used. This method accurately assigned 99.94% of the direct care nursing workforce to a particular health region; the remaining 0.06% were pro-rated and re-distributed into the existing totals. For registered nurses in Alberta, the six digit postal code of residence was used as only the first three digits of the postal code of worksite are submitted to CIHI

CIHI would like to acknowledge the cooperation of the Ordre des infirmiers et infirmières du Québec, who kindly provided CIHI with the number of registered nurses employed and/or living in each Quebec health region.

### *Health Region Peer Groups*

The analysis presented in this publication incorporates the use of health region peer groups as defined by Statistics Canada<sup>i</sup>.

In order to compare health regions, Statistics Canada developed a methodology that groups health regions with similar socio-economic and socio-demographic characteristics into peer groups. The methodology used data collected at the health region level primarily from the *Census of Canada*. Using the *Census* data, it was possible to represent social and economic determinants of health, for all health regions.

Statistics Canada's methodology examined twenty-four *Census* variables, identified and defined below.

**Table 1. Census of Canada Variable Definitions**

<i>2001 Population</i>
<b>Definition:</b> Estimate of the total number of individuals living in a region.
<b>Source:</b> Statistics Canada, Census 2001 (unadjusted).
<i>Aboriginal Percentage</i>
<b>Definition:</b> Proportion of a regions' total population self-identifying with an Aboriginal group.
<b>Sources:</b> Statistics Canada, 2001 Census, 2001 Census Coverage Studies, and Demography Division (population estimates).
<i>Average Dwelling Value</i>
<b>Definition:</b> Average expected value of an owner-occupied, non-farm, non-reserve dwelling (including the value of the land the dwelling is on) at the time of the Census.
<b>Source:</b> Statistics Canada, 2001 Census.
<i>Average Income</i>
<b>Definition:</b> Average family income for persons aged 15 and over, from all sources.
<b>Source:</b> Statistics Canada, 2001 Census.
<i>Post-secondary Graduates</i>
<b>Definition:</b> Population aged 25 to 54 who have obtained a post-secondary certificate, diploma, or degree.
<b>Source:</b> Statistics Canada, 2001 Census (special tabulations).
<i>Employment Rate (population aged 25 to 54)</i>
<b>Definition:</b> Number of employed persons aged 25 to 54 divided by the total number of individuals between the ages of 25 and 54 in a given region.
<b>Source:</b> Statistics Canada, 2001 Census (special tabulations).
<i>Growth Rate</i>
<b>Definition:</b> Percent change in a regions population estimate from 1996 to 2001.
<b>Source:</b> Statistics Canada, 1996 and 2001 Census (unadjusted).
<i>Government Transfer Income</i>
<b>Definition:</b> Proportion of all income that came from government transfers (e.g. GIS/OAS, C/QPP, EI, etc.) for the population 15 years of age and older.
<b>Source:</b> Statistics Canada, 2001 Census.
<i>Housing Affordability</i>
<b>Definition:</b> Proportion of total households spending 30% or more of total household income on shelter.
<b>Source:</b> Statistics Canada, 2001 Census.
<i>Immigrant Percentage</i>
<b>Definition:</b> Those immigrants who came to Canada from 1991 to 2001 as a proportion of the total population.
<b>Source:</b> Statistics Canada, 2001 Census.
<i>Median Share of Income</i>
<b>Definition:</b> Proportion of income (from all sources) held by the bottom half of all households, based on the median household income for that specific community.
<b>Source:</b> Statistics Canada, 2001 Census (special tabulations).

**Table 1. Census of Canada Variable Definitions (cont'd)**

<i>Internal Migrant Mobility</i>
<p><b>Definition:</b> Proportion of people that lived in a different Canadian municipality at the time of the previous Census (5-year internal migrants). This excludes Canadians in households outside Canada (military and government personnel).</p> <p><b>Source:</b> Statistics Canada, 2001 Census.</p>
<i>Lone-Parent Families</i>
<p><b>Definition:</b> Proportion of lone-parent families among all census families living in private households. A census family refers to a married or common-law couple or lone parent with at least one never-married son or daughter living in the same household.</p> <p><b>Source:</b> Statistics Canada, 2001 Census.</p>
<i>Long-Term Unemployment Rate</i>
<p><b>Definition:</b> Proportion of the labour force aged 15 and over who did not have a job any time during the current or previous year.</p> <p><b>Source:</b> Statistics Canada, 2001 Census.</p>
<i>Low Income 15+</i>
<p><b>Definition:</b> Proportion of persons in economic families and unattached individuals with 2000 incomes below the Statistics Canada low-income cut-off (LICO). The cut-offs represent levels of income where people spend disproportionate amounts of money for food, shelter, and clothing. LICOs are based on family size and degree of urbanization; cut-offs are updated to account for changes in the consumer price index. Data were not derived for economic families or unattached individuals in the Territories or on Indian Reserves.</p> <p><b>Source:</b> Statistics Canada, 2001 Census.</p>
<i>Low Income Children</i>
<p><b>Definition:</b> Proportion of children under age 18 living in economic families with 2000 incomes below Statistics Canada's low-income cut-offs (LICO). Data were not derived for economic families or unattached individuals in the Territories or on Indian Reserves.</p> <p><b>Source:</b> Statistics Canada, 2001 Census.</p>
<i>Male-Female Ratio</i>
<p><b>Definition:</b> Total number of males in a given region in 2001 divided by the total number of females.</p> <p><b>Source:</b> Statistics Canada, 2001 Census.</p>
<i>Owner-Occupied Dwellings</i>
<p><b>Definition:</b> Proportion of dwellings in which the owner also lives. Band housing and collective dwellings (i.e. rooming houses, nursing homes, military camps etc.) are excluded from both numerator and denominator.</p> <p><b>Source:</b> Statistics Canada, 2001 Census.</p>
<i>Population Density</i>
<p><b>Definition:</b> Number of people per square kilometre.</p> <p><b>Source:</b> Statistics Canada, 2001 Census and Geography Division (special tabulations).</p>
<i>Population Under 15</i>
<p><b>Definition:</b> Proportion of the population in a given region under the age of 15 (2001 population).</p> <p><b>Source:</b> Statistics Canada, 2001 Census (unadjusted).</p>

**Table 1. Census of Canada Variable Definitions (cont'd)**

<i>Population 65 Years and Older</i>
<b>Definition:</b> Proportion of the population in a given region aged 65 years and older (2001 population).
<b>Source:</b> Statistics Canada, 2001 Census (unadjusted).
<i>Strong MIZ</i>
<b>Definition:</b> Strong MIZ (Census Metropolitan and Census Agglomeration Influenced Zones) represents the proportion of the population living in Census Metropolitan Areas (CMAs), Census Agglomerations (CAs) and communities that fall outside CMAs/CAs that have at least 30% of the employed labour force commuting to CMAs/CAs. The larger the proportion, the stronger the relationship between the specific community and a nearby CMA/CA.
<b>Source:</b> Statistics Canada, 2001 Census (special tabulations).
<i>Unemployment Rate</i>
<b>Definition:</b> Total number of unemployed individuals 15 and older divided by the total number of individuals 15 and older participating in the labour force.
<b>Source:</b> Statistics Canada, 2001 Census.
<i>Visible Minority</i>
<b>Definition:</b> Proportion of the population belonging to a visible minority group. As defined by the Employment Equity Act (1986), visible minorities are persons (other than Aboriginal people) who are non-Caucasian in race or non-white in colour.
<b>Source:</b> Statistics Canada, 2001 Census.

Source: Statistics Canada. *Health Region Peer Groups Working Paper* (2003).

As stated above, Statistics Canada used these variables to establish nine peer groups identified by the letters A through I. Appendix A provides a table listing the health regions and their associated peer group for each province/territory in Canada; example communities for each region are also identified.

The following table lists the principal characteristics for each peer group.<sup>ii</sup>

ii. <http://www.statcan.ca/english/freepub/82-221-XIE/2006001/hregions/sumpg.htm>.

**Table 2. Summary Table of Peer Groups and Principal Characteristics**

Peer Group	Number of Health Regions	Percentage of Population	Principal Characteristics
A	23	24.6%	Urban-rural mix from coast to coast Average percentage of Aboriginal population Low male population Slow population growth from 1996-2001
B	14	27.0%	Mainly urban centres with moderately high population density Low percentage of government transfer income Rapid population growth from 1996 to 2001
C	24	12.3%	Sparsely populated urban-rural mix from coast to coast Average percentage of Aboriginal population Negative population growth
D	10	1.7%	Rural regions mainly in the central Prairies Moderate Aboriginal population Moderately high percentage of government transfer income Almost equal numbers of men and women Negative population growth
E	24	13.3%	Mainly rural regions in Quebec, Ontario and the Prairies High proportion of people recently moved to or within these regions since 1996 Average percentage of Aboriginal population Moderate population growth
F	5	0.4%	Northern and remote regions Very high Aboriginal population Moderately high percentage of government transfer income Slightly higher male population Moderate population growth
G	3	16.2%	Largest metro centres with an average population density of 3,934 people per square kilometre Low Aboriginal population Moderate percentage of government transfer income High female population
H	13	2.7%	Rural northern regions High Aboriginal population High male population Negative population growth
I	8	1.9%	Mainly rural Eastern regions Very high percentage of government transfer income Negative population growth Low percentage of people having moved to or within these regions since 1996

**Notes:**

*Percentage of Population* refers to the percentage of the Canadian population living in a specific type of peer group.

Source: Statistics Canada. *Health Region Peer Groups Working Paper* (2003).

The full publication, and cluster analysis methodology, is available from the Statistics Canada<sup>iii</sup> website.

iii. Statistics Canada. *Health Region Peer Groups Working Paper* (2000) and *Health Region Peer Groups Working Paper* (2003). 82-221-XIE. <<http://www.statcan.gc.ca>>.

### *Rates per 100,000 Population*

Using 2004 fiscal year population estimates from Statistics Canada, CIHI calculated the rates of licensed practical nurses, registered nurses, registered psychiatric nurses and the nursing workforce, employed in direct care, per 100,000 population for each health region.

There are limitations to this analysis, but within the proper context and with the use of *peer groups*, these rates are a valuable comparative indicator of how many nursing professionals provide direct patient care in each health region.

The rates per 100,000 population presented in this publication are *crude rates*, meaning they are not adjusted (or standardized) to account for differences in population. In part, the data were not standardized because it is CIHI's intent to present the actual number of regulated nurses working and/or living in each health region. Standardized rates, by definition, result in different totals from the actual numbers. While standardized rates can be quite useful for certain types of analyses, it is the actual numbers that are the most valuable in this publication.

In addition, each health region is assigned to a particular peer group with similar socioeconomic determinants of health. The use of peer groups is necessary for comparison between health regions.

It is also important to note that these statistics are head-counts (or the total number) of nursing professionals working and/or living in each region, as opposed to the number of full-time equivalent (FTE) positions available within a region. For that reason, these data will not match any statistics provided by regional health authorities or regional employers.

Therefore, the number and rates of nursing professionals per 100,000 population presented for each health region includes the following notes:

- Only nursing professionals identifying their area of responsibility as *direct care* are included; those working in *administration, education* and/or *research* are excluded;
- Nursing professionals not employed or who failed to state their employment status at the time of annual registration are excluded;
- The data are crude rates, unadjusted for differences in age or sex.

The following documents are available in electronic (PDF) format free of charge on our website [www.cihi.ca/nurses](http://www.cihi.ca/nurses). These documents outline the data elements (and definitions) collected for each of the Nursing Databases, as well as the file specifications sent to the provincial/territorial regulatory authorities for data submission.

- *Licensed Practical Nurses System Data Dictionary and Processing Manual;*
- *Registered Nurses System Data Dictionary and Processing Manual; and*
- *Registered Psychiatric Nurses System Data Dictionary and Processing Manual.*

## Request Services

CIHI completes ad hoc requests and special analytical projects on a cost-recovery basis using data from the three nursing databases. Ad hoc requests are short queries that generally can be handled through standard reports, and do not require major programming resources. Special analytical projects require project planning and the commitment of extra resources.

For an estimate of the costs associated with these products and services, please contact:

Program Lead, Health Human Resources  
Canadian Institute for Health Information

## Notes

\* Value suppressed in accordance with CIHI privacy policy; cell value is from 1 to 4.

\*\* Value suppressed to ensure confidentiality; cell value is 5 or greater.

^ Northwest Territories and Nunavut data combined for 2005.

- Data do not exist, or are not applicable.

.. Data not currently collected by CIHI.

For LPN and RN data:

*Hospital* includes data from: hospital (general, maternal, paediatric, psychiatric), mental health centre, rehabilitation/convalescent centre.

*Community Health Agency* includes data from: nursing stations (outpost or clinic), home care agency, community health centre/agency.

*Nursing Home/LTC Facility* includes data from: nursing home/long-term care facility.

*Other Place of Work* includes data from: business/industry/occupational health office, private nursing agency/private duty, self-employed, physician's office/family practice unit, educational institution, association/government, other.

For RPN data:

*Hospital* includes data from: hospital (general, maternal, paediatric, psychiatric).

*Community Mental Health Agency* includes data from: nursing station (outpost or clinic), home care agency, community mental health agency/community health centre.

*Nursing Home/LTC Facility* includes data from: nursing home/long-term care facility, residential care facility.

*Other Place of Work* includes data from: correctional agency, association/government, educational institution, other (includes data from: business/industry/occupational health office, private nursing or psychiatric nursing agency/private duty, physician's office/family practice unit, self-employed/private practice).

CIHI data will differ from provincial/territorial data due to the CIHI collection, processing and reporting methodology.

Additional methodological information is available upon request to nursing@cihi.ca.

- E.RPN.5 RPN Workforce by Position, Average Age and Province of Registration, Canada, 2005
- E.RPN.6 RPN Workforce by Position, Years Since Graduation and Province of Registration, Canada, 2005

### Series F—Multiple Employment Status

- F.LPN.1 LPN Workforce by Multiple Employment Status and Province/Territory of Registration, Canada, 2005
- F.LPN.2 LPN Workforce by Multiple Employment Status, Age Group and Province/Territory of Registration, Canada, 2005
- F.LPN.3 LPN Workforce by Multiple Employment Status, Average Age and Province/Territory of Registration, Canada, 2005
- F.LPN.4 LPN Workforce by Multiple Employment Status, Years Since Graduation and Province/Territory of Registration, Canada, 2005
  
- F.RN.1 RN Workforce by Multiple Employment Status and Province/Territory of Registration, Canada, 2005
- F.RN.2 RN Workforce by Multiple Employment Status, Age Group and Province/Territory of Registration, Canada, 2005
- F.RN.3 RN Workforce by Multiple Employment Status, Average Age and Province/Territory of Registration, Canada, 2005

## List of Data Tables Available on the CIHI Website (cont'd)

### Series F—Multiple Employment Status (cont'd)

- F.RN.4 RN Workforce by Multiple Employment Status, Highest Education in Nursing and Province/Territory of Registration, Canada, 2005
- F.RN.5 RN Workforce by Multiple Employment Status, Years Since Graduation and Province/Territory of Registration, Canada, 2005
- F.RPN.1 RPN Workforce by Multiple Employment Status and Province of Registration, Canada, 2005
- F.RPN.2 RPN Workforce by Multiple Employment Status, Age Group and Province of Registration, Canada, 2005
- F.RPN.3 RPN Workforce by Multiple Employment Status, Average Age and Province of Registration, Canada, 2005
- F.RPN.4 RPN Workforce by Multiple Employment Status, Years Since Graduation and Province of Registration, Canada, 2005

### Series G—Sex

- G.LPN.1 LPN Workforce by Sex and Province/Territory of Registration, Canada, 2005
- G.LPN.2 LPN Workforce by Sex, Age Group and Province/Territory of Registration, Canada, 2005
- G.LPN.3 LPN Workforce by Sex, Average Age and Province/Territory of Registration, Canada, 2005
- G.RN.1 RN Workforce by Sex and Province/Territory of Registration, Canada, 2005
- G.RN.2 RN Workforce by Sex, Age Group and Province/Territory of Registration, Canada, 2005
- G.RN.3 RN Workforce by Sex, Average Age and Province/Territory of Registration, Canada, 2005
- G.RPN.1 RPN Workforce by Sex and Province of Registration, Canada, 2005
- G.RPN.2 RPN Workforce by Sex, Age Group and Province of Registration, Canada, 2005
- G.RPN.3 RPN Workforce by Sex, Average Age and Province of Registration, Canada, 2005

### Series H—Location of Graduation

- H.LPN.1 LPN Workforce by Location of Graduation and Province/Territory of Registration, Canada, 2005
- H.RN.1 RN Workforce by Location of Graduation and Province/Territory of Registration, Canada, 2005

## List of Data Tables Available on the CIHI Website (cont'd)

### Series H—Location of Graduation (cont'd)

H.RPN.1 RPN Workforce by Location of Graduation and Province of Registration, Canada, 2005

### Series I—Years Since Graduation

I.LPN.1 LPN Workforce by Years Since Graduation and Province/Territory of Registration, Canada, 2005

I.LPN.2 LPN Workforce by Years Since Graduation, Average Age and Province/Territory of Registration, Canada, 2005

I.RN.1 RN Workforce by Years Since Graduation and Province/Territory of Registration, Canada, 2005

I.RN.2 RN Workforce by Years Since Graduation, Average Age and Province/Territory of Registration, Canada, 2005

I.RPN.1 RPN Workforce by Years Since Graduation and Province of Registration, Canada, 2005

I.RPN.2 RPN Workforce by Years Since Graduation, Average Age and Province of Registration, Canada, 2005

### Series J—Age Group

< Summary tables only >

### Series K—Average Age

< Summary tables only >

### Series L—Initial Education in Nursing Discipline

< Summary tables only >

### Series M—Highest Education in Nursing Discipline

M.RN.1 RN Workforce by Highest Education in Registered Nursing and Province/Territory of Registration, Canada, 2005

M.RN.2 RN Workforce by Highest Education in Registered Nursing, Age Group and Province/Territory of Registration, Canada, 2005

M.RN.3 RN Workforce by Highest Education in Registered Nursing, Employment Status and Province/Territory of Registration, Canada, 2005

## **List of Data Tables Available on the CIHI Website (cont'd)**

### **Summary Tables**

- A. Summary Total Number of Nursing Registrations by Province/Territory of Registration, Canada, 2005
- B. Summary Regulated Nursing Workforce by Employment Status and Province/Territory of Registration, Canada, 2005
- C. Summary Regulated Nursing Workforce by Place of Work and Province/Territory of Registration, Canada, 2005
- D. Summary Regulated Nursing Workforce by Area of Responsibility and Province/Territory of Registration, Canada, 2005
- E. Summary Regulated Nursing Workforce by Position and Province/Territory of Registration, Canada, 2005
- F. Summary Regulated Nursing Workforce by Multiple Employment Status and Province/Territory of Registration, Canada, 2005
- G. Summary Regulated Nursing Workforce by Sex and Province/Territory of Registration, Canada, 2005
- H. Summary Regulated Nursing Workforce by Location of Graduation and Province/Territory of Registration, Canada, 2005
- I. Summary Regulated Nursing Workforce by Years Since Graduation and Province/Territory of Registration, Canada, 2005
- J. Summary Regulated Nursing Workforce by Age Group and Province/Territory of Registration, Canada, 2005
- K. Summary Regulated Nursing Workforce by Average Age and Province/Territory of Registration, Canada, 2005
- L. Summary Regulated Nursing Workforce by Initial Education in Nursing Discipline and Province/Territory of Registration, Canada, 2005
- M. Summary Regulated Nursing Workforce by Highest Education in Nursing Discipline and Province/Territory of Registration, Canada, 2005
